These facts were brought out by recent surveys of broadcasting to the other American Republics. Polls showed that Latin America's 4,000,000 receivers now tune more frequently to Allied frequencies than to enemy wavelengths, while more of its 200 shortwave stations prefer to tie up with United States and British networks.

Even before the outbreak of war the Axis was running wild in the ether over America. Powerful shortwave senders beamed a constant stream of propaganda on Brazil and the Spanish speaking nations in an attempt to undermine American unity and discredit democracy.

But this Axis domination of the American air is a thing of the past. Allied radiomen and government agencies have made willing converts in the southern republics with Spanish and Portuguese programs aimed at telling the truth about the United States and its allies.

These broadcasts—news, features, commentaries, music and radio plays—have been so successful that United States networks now average 420 hours a week to the other Americas, with the British Broadcasting Company averaging 32 hours more.

Six BBC men are in South and Central America to arrange for an expanded Latin American service, while a recent agreement enables Radio Mil, of Mexico City, and the 242 stations in the Mutual network to pick up and rebroadcast one another's programs.

United States programs are beamed simultaneously in Spanish over 10 shortwave stations and in Portuguese over 3 more, operating on 3 frequencies for best coverage. Facilities of CBS, NBC, Westinghouse, General Electric, Crosley and World Wide networks are used for the transmissions.

The Office of Inter-American Affairs, besides supervising and coordinating programs, prepares a daily average of about 40,000 words of news and commentary in 3 languages for the networks. Distinguished visitors from the other Americas daily interpret the United States war effort to their countrymen on the *Americas All* shortwave hour.

Other programs include a quiz program, *Caravan of Questions*, with experts trying to answer questions on inter-American affairs; radio plays illustrating Axis barbarism, espionage methods and anti-American activities, and a program in which a pretended Axis commentator tries to reconcile conflicting Axis propaganda until he gives up in ludicrous confusion.

New plans call for short news broadcasts every hour, in addition to the regular 15-minute news programs. Many of these broadcasts are handled by distinguished Latin Americans, including Dr. Enrique Rodriquez Fabregat, former Foreign Minister of Uruguay; Carlos Garcia Palacios, former Chilean diplomat; Alejandro Sux, United States correspondent for *El Mundo*, of Buenos Aires; Vicente Tovar, author and lecturer, and Mario Comargo, Colombian vice-consul.

Hitler once said that he had won more psychological battles with radio propaganda than with his armies. But the battle for the American ether adds another resounding defeat to the many setbacks the Axis is suffering on the world's fronts.

RADIO COUNCIL LEADER SAYS CHILD LISTENING HABITS ARE RESPONSIBILITY OF PARENTS

(The following article was submitted to the *New York Herald-Tribune* for publishing in its August 1 issue in answer to an article by Margo Pitts of Beacon, New York, which appeared in a previous issue and compared children's radio programs with comic books in content and influence. This was written by Dorothy L. McFadden, chairman, committee on children's programs, Radio Council of New Jersey.)

May I go just a step further than Miss Margo Pitts, of Beacon, New York, in placing responsibility for children's radio listening habits on the parents? There are fine programs on the air designed for young audiences, but many of them are on local stations, not always the networks, and are blandly ignored by the very parents and organizations that are most vocal in their concern over the "children's radio problem." In a survey made by Mrs. Dorothy Lewis, Vice-President of the Radio Council on Children's Programs, covering over 200 cities in 44 states and including a study of programs presented over some 400 stations, she discovered that there were 1500 different children's programs on the air.

In discussions with club, civic, and educational organizations and individual leaders in each city, it appeared that, while they were greatly concerned about "getting some of the bad programs off the air," actually little encouragement was being given to those programs that were approved. Her study resulted in spontaneous and very encouraging action. In many of these cities the local leaders and broadcasters decided to form groups to really study the relationship of the listener and the radio station, to become thoroughly informed on the problems of both and to give constructive suggestions and assistance whenever possible. These groups became known as Radio Councils, and I am happy to be an active member of the one recently formed in New Jersey, which is headed by Mrs. R. W. Cornelison of Somerville.

Parents' Child-Listening Study Urged

Surely it is high time that we, parents or other interested laymen, turned to a thorough study of the problem of children's radio listening as it affects us in our own localities. Each state and city has different program material available to the listener. Do we really know what is on the air? Are we sure that there is no program at hand that just fits our Johnny's new enthusiasm for Victory Gardening, or Susie's mania for riddles and tongue twisters? Should we not become really familiar with our local stations and the general picture of radio for children before condemning all programs wholesale or even making suggestions for new ones?

Lest I be misunderstood, let me hasten to say that I do not consider the present children's serials on the networks to be perfect. They are, to a great extent, all of a pattern, with little variety or character originality in many of them. They completely lack humor, that delightful ingredient used by good dramatists as a leaven to give moments of relaxation in contrast to suspense. Children love to laugh. As president of Junior Programs, Inc., the non-profit organization that has taken the living theater to some four million children, I have watched their glee over every bit of comedy. Why should we not hear more laughter when children are listening to the radio programs planned for them? They do enjoy Aunt Agatha's comic voice and lines in "Hop Harrigan."

Program Suggestions

When we consider the hours spent by children with ears glued to the radio, I do think we should capitalize on this golden opportunity by encouraging more of the series that have something of value to give to their development. Family hobbies are particularly needed in the strain of wartime and should be stimulated in more programs. More newscasts for children, like those presented by Catherine Clark, Station WCAU, in Philadelphia; fine music series like the delightful ones formerly broadcast by Mary Van Doren from the Toledo Museum over the NBC network; "Safety" programs like those of Irving Caesar's that are really fun; nature series like "Afield with Ranger Mac" in Wisconsin (which won the George Foster Peabody Award this year); the "Reading is Fun" programs of Portland, Oregon. These are examples of the variety that we should add to our children's menu of listening. Groups like our Radio Council of New Jersey can help to encourage such programs in every area. In Louisville, Kentucky, and in middle Tennessee the Radio Councils have published and distributed thousands of bookmarks, in cooperation with the libraries, listing recommended books and radio programs for children. These have had a great effect in increasing discriminating reading and listening.

A nation-wide study made by the Nashville Radio Council resulted in a newscast series, "Children Analyze the News" over WLAC. In Texas, a "School of the Air" reaches 500,000 students each week day, because 200,000 parents and taxpayers recognized the importance of radio education and established through legislature a radio division in the State Department of Education. Our own Radio Education Committee in New Jersey is planning a study of conditions here.

The tastes and radio listening habits of the family strongly influence those of the child. We cannot simply banish programs from our children's ears or, heaven forbid, "put pressure on the radio industry." We must know our subject before we criticize. We should know what is lacking in our particular area to give the child a balanced menu of radio listening from which to choose. Only then are we ready to go to a radio station with suggestions.

Parents' Responsibilities

I can hear the immediate question, always brought up by parents at meetings where I have spoken, "But will the radio stations listen to us? Do they even read our letters?" My answer is another question: "Have you ever written to the stations *commending* them for programs you like? Have you proved that you know your subject, and most of all, that you are willing to get behind a really fine program? Have you helped, individually or as a group, to build a bigger audience for the best things on the air?" If you have done this, and are willing to do it again, your radio people will be delighted to listen and will cooperate in every way. Encouraging good programs is not so difficult. My own Girl Scout troop became very interested in the "Game Parade" and "Let's Pretend" programs since I turned them on Saturday mornings while we were working on crafts badges. Many of our children are cooperating with the Write-a-fighter Corps, a wartime activity of the Jack Armstrong program. Group listening can be great fun, and has hardly been tried with children's amusement programs. There are many ways in which we can improve this picture of radio listening for our children, but let's have a constructive plan this time.

This is what the Radio Councils are trying to do. My own committee has ready a plan of Group Study of Children's Radio Listening, including a list of suggested reading. We plan to study the programs available to children in our state, and then to help publicize the best ones in every possible way to keep them on the air. This can easily be done through the groups which our committee represents—children's libraries, parents organizations, Boy and Girl Scouts, etc.—but only if each individual in those groups will really become an active "booster of the best."

WHAT GOES ON AT WHO RED, WHITE AND BLUE!

Clever stunt of the editors (or editor or editoress) of the station WHO publication for service men "What Goes On At Who"—a three-page deal—is to have page one white, page two blue and page three red. Type is all black. Fair enough, WHO!

THE TRIPLE-A CENSORSHIP

For your information the NAB news bureau was in the middle of a fact-finding program to counteract, if found necessary, the recent censorship clamped on all personnel of the Agricultural Adjustment Administration when the ban was suddenly withdrawn.

WIOD TELLS THE FOLKS

James M. LeGate, general manager, WIOD, Miami, recently used two column ads in the *Miami Daily News* to tell a brief story of the station's public service broadcasts for June.

Air time, opened and closed with martial music, was used to present the same material in greater detail.

NEWS ANALYSTS CODE

At a recent meeting of the Association of Radio News Analysts in New York, the following Code of Ethics was drawn up. We print it for your information. H. V. Kaltenborn is ARNA president.

Code of Ethics of the Association of Radio News Analysts

The Association of Radio News Analysts, aware of the necessity of maintaining the independence and prestige of the profession, and of improving the standards of analytical news broadcasting, particularly in time of war, has adopted the following Code of Ethical Practice:

I

The Association expects and requires of the radio news analyst painstaking accuracy in his public statements, recognizing the difficulties attendant upon the dissemination of news during war time.

II

The Association expects and requires of the radio news analyst the exercise of sound judgment and good taste, and the avoidance of sensationalism in both the substance of his broadcast material and the manner of its presentation.

III

The Association believes that the inclusion in any radio news analysis of commercial, or "institutional" advertising material in the guise of news or personal opinion is undesirable from every point of view.

IV

The Association believes the reading of commercial announcements by radio news analysts is against the best interests of broadcasting. It requires its own members to refrain from this practice. The Association deplores the interruption of a news analysis by commercial announcements.

V

The Association endorses the standards of the National Association of Broadcasters restricting the time allotted to commercial announcements in connection with news broadcasts.

VI

The Association opposes all censorship of broadcast material, except insofar as duly required by governmental authorities in the interest of public safety during a national emergency.

NAME ADDITIONAL PEABODY AWARD SUB-COMMITTEES

Sub-committees on recommendations for the annual George Foster Peabody radio awards have been named in the following cities. Committee chairmen are listed after the particular city.

Oklahoma City, Okla., Mrs. Milton B. Williams; Toledo, Ohio, Harry D. Lamb, president, Radio Council of Toledo; Cincinnati, Ohio, John F. Locke, community relations director, Cincinnati Board of Education; Eastern Massachusetts, Mrs. Benjamin F. Kraus; Rochester, N. Y., Mrs. George Howard, president, Rochester Federation of Women's Clubs; Champaign, Ill., Mrs. C. C. Wiley, NAB regional director of listener activity; Indianapolis, Ind., Mrs. R. F. Groskopf, Indiana Federation of Women's Clubs, and Des Moines, Iowa, Mrs. Cyrus B. Hillis.

FABER NAMED FOR WPB

Peter J. Faber, radio buyer for the Montgomery-Ward Company, has been named an advisor to the domestic and foreign radio branch of the radio and radar division, War Production Board, it has been announced. Mr. Faber will advise the branch on the distribution of non-military radio equipment.

FEDERAL COMMUNICATIONS COMMISSION

MINDERMAN NAMED TO FCC

The Federal Communications Commission today announced the appointment of Earl Minderman as director of information. For the past year Mr. Minderman has been director of the division of research and information of the bureau of motion pictures, Office of War Information. Previously, he had been national director of information of the Work Projects Administration here and state information director of the same organizaton in Ohio. Before entering government service, he had been on the editorial staff of the *Columbus* (Ohio) *Citizen* and the *Toledo* (Ohio) *News-Bee*.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

No broadcast hearings are set before the Commission for the week beginning August 9th.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted modification (B-MP-1478) of construction permit, which authorized installation of new 5 KW composite transmitter, for extension of commencement and completion dates.

WOI—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa.—Granted special service authorization to operate from 6 a. m. to local sunrise, with 1 KW power, for the period ending February 1, 1944.

WBEZ—Board of Education, City of Chicago, Chicago, Ill.—Granted authority to construct a new non-commercial educational broadcast station to use frequency **42500 kc.** with power of 1 KW, limited time for frequency modulation (B4-PED-25).

MISCELLANEOUS

KGCX—E. E. Krebsbach, Radio Station KGCX, Sidney, Mont.—Dismissed without prejudice petition to intervene in the hearing on application of KCMO for license to change frequency to **1480 kc.**

WKY—WKY Broadcasting Co., Oklahoma City, Okla.—Granted modification (B3-MP-1718) of construction permit authorizing increase in power, installation of DA and move of transmitter, for extension of completion date to 1-20-44.

WBBL—Grace Covenant Presb. Church, M. A. Sitton, Agent, Richmond, Va.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1534).

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1533).

WSYB—Philip Weiss, d/b as Philip Weiss Music Co., Rutland, Vt.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1535, and action taken 7-26).

KGBK—Helen Townsley, area of Great Bend, Kans.—Present relay broadcast station license further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending October 1, 1943 (B4-SRY-240).

WAEA—W. A. Patterson, area of Chattanooga, Tenn.—Present relay broadcast station license further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending October 1, 1943 (B3-SRY-132).

B-175—Newark Broadcasting Corp., Newark, N. J.—Ordered that the Proposed Findings (B-175) entered on June 22, 1943, be adopted as the Findings of Fact and Conclusions of the Commission, and ordered that the application of Newark Broadcasting Corp. for construction permit be denied.

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Reconsidered and set aside its action of July 27, granting renewal application of WABY on a regular basis, and placed the station on a temporary extension of license pending final disposition of the WOKO application.

APPLICATIONS FILED AT FCC

920 Kilocycles

WTTM—Trent Broadcast Corp., Trenton, N. J.—Acquisition of control of licensee corporation by Elmer H. Wene through purchase of 43⅓ shares of stock from A. Harry Zoog.

1220 Kilocycles

NEW—Detroit Broadcasting Company, Detroit, Mich.—Construction permit for a new standard broadcast station to be operated on **1220 kc.**, 50 KW power, unlimited hours of operation, using a directional antenna day and night.

1240 Kilocycles

NEW—Charles Swaringen, Alex Teitlebaum, Myer Wiesenthal, Jack N. Berkman, Richard Teitlebaum, John J. Laux, Louis Berkman, Joseph M. Troesch, John L. Merdian—partners doing business as Buckeye Broadcasting Co., Akron, Ohio.—Construction permit for a new standard broadcast station to be operated on **1240 kc.**, 250 watts power, unlimited hours of operation.

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—Construction permit to move auxiliary transmitter from Dorchester St., Quincy, Mass., to corner Vershire St. and Harriett Ave., Quincy, Mass.

1310 Kilocycles

WCAP—Radio Industries Broadcast Company, Asbury Park, N. J.—Construction permit to install a new transmitter.

MISCELLANEOUS APPLICATIONS

WINS—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3026 as modified, which authorized increase in power to 50 KW, unlimited time, move of transmitter, installation of new transmitter and directional antenna) for a change in frequency from **1000 kc.** to **1010 kc.**, and make changes in directional antenna system.

W9XG—Purdue University, West Lafayette, Ind.—Modification of construction permit (B4-PVB-52 as modified, which authorized changes in equipment, frequencies, decrease in power and addition of aural channel using special emission), for extension of completion date from 9-24-43 to 9-24-44.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Durakote Paint Corp.—A complaint has been issued charging Durakote Paint Corp., 1775 Broadway, New York, and its officers with misrepresenting the quality and price of paint they sell and the status and character of the business of the corporate respondent. The respondent officers are Philip H. Eisgrau, Cele Eisgrau, Nathan Pashman and Theodore Shapiro. (5018)

Holzbeierlein & Sons, Inc., 1849 Seventh St., N. W., Washington, D. C., manufacturing and distributing bakery bread under the name of "Bamby Bread," is charged in a complaint with violation of the Robinson-Patman Act. (5020)

West African Specialty Company and African Specialty Company, 309 E. 47th St., Chicago, selling and distributing powders, oils, books and other goods, are charged in a complaint with misrepresentation. (5019)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Belvedere Products, 29 West 57th St., New York, engaged in the sale of medicinal preparations designated "Polanka" and "Zielanka," stipulated that they will cease and desist from certain misrepresentations in connection with the sale of their products. They agree to cease representing that Polanka will aid the digestive system, regulate the stomach or provide relief for digestive disturbances generally, or that it has any therapeutic value other than that of temporarily relieving constipation. (3692)

M. Binkovitz & Sons, Inc., 458 Broadway, stipulated that it will cease and desist from use of the words "Sanotick," "Sanibed," or other words connoting "sanitary," as trade names for its products; from representing that its products are sanitary, antiseptic, germ repellant, bacteriostatic or mildew resistant, or that they prevent the growth of bacteria life; and from using the words "health tick" or "health" as descriptive of its products, and the word "health" in any manner implying that its products are of therapeutic value in the cure or prevention of disease or will assure health to the users. (3689)

H. Bogin & Son, Inc., 30 Steinway St., Long Island City, N. Y., trading as Grand Rapids Furniture Co. and as Western Furniture Showrooms, entered into a stipulation to cease and desist from using the words "Grand Rapids Furniture Company" as a trade name, and the name "Grand Rapids" in any manner the effect of which tends to convey the belief that any of its furniture not actually produced in Grand Rapids, Mich., is manufactured in that city. (3690)

Fair Store, a Cincinnati department store, stipulated that in advertising or selling so-called rebuilt Eureka vacuum cleaners it will cease and desist from using the phrase "Completely rebuilt at the factory" in connection with the word "Eureka" so as to imply that the cleaners in question have been rebuilt at the factory of the Eureka Vacuum Cleaner Company, of Detroit. (3691)

McCampbell & Co., Inc., 40 Worth St., stipulated that it will cease and desist from representing that its ticking fabrics are antiseptic, sanitary, germ repellant, or mildew resistant. (3688)

M & M Mail Order Company, 206 Madison Street, New York, selling and distributing second-hand or previously used clothing, has stipulated to discontinue advertising, labeling or selling any worn, second-hand or previously used article of clothing unless there be securely attached to the exposed surface of it a tag or label bearing a conspicuous statement that the article is second-hand or has been previously used or worn, and from the use of any fiber designation in connection with the advertising, labeling, selling or offering for sale of any merchandise unless such designation truthfully discloses each constituent fiber thereof in the order of predominance by weight, beginning with the largest single constituent. (3693)

Milton University, Inc., and William James Heaps, president of the corporation, 3700 North Charles St., Baltimore, engaged in the sale and distribution of publications for use in connection with a home study course of instruction and of so-called diplomas or documents purporting to represent the attainment of academic degrees, have stipulated to cease and desist from offering for sale, selling, conferring, distributing, delivering, or otherwise disposing of, any documents or writing purporting to represent any academic degree as, for example, Bachelor's Degree, Master's Degree, or Doctor's Degree, or any diploma or other document purporting to have been issued by a duly qualified institution of higher learning authorized to confer academic or scientific degrees; use of the word "University" as part of or in connection with the corporate or trade name under which they conduct their business, or of any other word or words of like meaning which may tend to convey the belief or impression that they maintain, operate or conduct a university. (3694)

Plough, Inc., 121 So. 2nd St., Memphis, Tenn., manufacturing various preparations, including a dry cleaning compound designated "Mufti," has stipulated that it will cease and desist from representing that the preparation "Removes Spots Instantly or Quickly," "remove spots from anything," "spots disappear almost instantly," "The Perfect Dry Cleaner," or any other statement or representation of similar meaning which would imply that use of the product will have the effect of removing spots or stains, regardless of kind, either instantly, quickly or effectively or completely, from fabrics generally. (3696)

Spratt's Patent (America) Limited, a British corporation, 17 Congress Street, Newark, N. J., engaged in selling various dry dog food preparations designated "Spratt's Fibo," "Spratt's Ovals," "Spratt's Spix," "Spratt's Fish and Meat Ovals," "Spratt's Meat-Fibrine Dog Biscuits," "Spratt's Dog Biscuits" and "Spratt's Assorted Dog Biscuits," has stipulated to cease and desist representing that "Spratt's Charcoal Ovals" will maintain a dog's breath in a sweet and clean condition, prevent canine ills or remove systemic impurities, and be of benefit to the intestinal tract; that Spratt's Biscuits will eliminate pyorrhea and disorders of the bowel and skin; that Spratt's Biscuit Foods will tone the dog's stomach, prevent dog odors and dental decay, or that Spratt's Dog Foods contain meat. (03123)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Amogen Co., 147 North St., San Antonio, Tex., has been ordered to cease and desist from disseminating advertisements which misrepresent the therapeutic properties of Amogen Tablets and which fail to reveal the harmful consequences that may result from long continued use of the tablets. (4836)

J. E. Todd, Inc., Kenmore, N. Y., engaged in the sale of Todd's Capsules, has been ordered to cease and desist from disseminating any advertisement which represents that the preparation has any therapeutic value in the treatment of arthritis, neuritis, rheumatism or similar diseases or conditions. (4549)

FTC COMPLAINT DISMISSED

The Federal Trade Commission has ordered the dismissal of a complaint issued by it against Judd A. Brown and Barry A. Brown, trading as Eureka Fibre Company, Eureka, Calif., and Charles H. Brown, of Neenah, Wis., associated with them in the manufacture and distribution of a loose-fill insulating material designated "Shredded Redwood Bark."

Charles H. Brown is now deceased, and it appearing to the Commission that there is failure of proof with respect to the other respondents, the Commission has ordered the complaint be dismissed.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 33, August 13, 1943

WHITE-WHEELER BILL REPRINTS

A number of requests for additional reprints of the White-Wheeler FCC Bill have been made of NAB headquarters and we have ordered another printing. If you wish additional copies of this bill please address Willard Egolf at NAB headquarters.

11TH DISTRICT RESOLUTION

Broadcasters of the 11th district, NAB, at their meeting August 4 in Minneapolis, presided over by Director Ed Hayek, passed the following resolution:

> **"Resolved that we view with alarm the jeopardy in which the American system of broadcasting is placed by the interpretation of the powers of the Federal Communications Commission as handed down by the Supreme Court, and we urge that Congress give immediate consideration to a new radio law, and that the United States Senate at once take the initial steps by passing the White-Wheeler bill."**

FCC LOOSENS UP ON SMALL STATION PERMITS

Power of some 100 watt stations would be increased to 250 watts and new 100 watt or 250 watt local stations would be authorized in certain localities under an FCC ruling of August 10. FCC believes it would be in the public interest to grant such applications when the use of idle equipment is involved.

The applicant for a new station must show that:

1. All required materials, except vacuum tubes, may be obtained without priority assistance.
2. Such applications involve no inconsistencies with the Commission's Rules and Regulations.
3. Such applications tend toward a fair, efficient and equitable distribution of radio service, are consistent with sound allocation principles, offer substantial improvement in standard broadcast service, and
4. Such applications are otherwise in the public interest.

If building construction is involved WPB clearance also is mandatory.

Thirty days are allowed for reinstatement of applications for new local stations or modification of existing local stations which previously were dismissed without prejudice.

NEW TRANSMITTER TUBES WILL BE SCARCER

Indications are now prevalent that new transmitting tubes, especially those used by the higher powered stations, will become increasingly difficult to obtain. This is expected to be true during the balance of 1943, and the coming year.

During almost 21 months of wartime operation the availability of transmitting tubes has been generally satisfactory.

This fact, however, should not lull the industry into a false sense of security. Broadcasters are urged to maintain a full inventory of tubes consistent with WPB regulations. Broadcasters can do much to improve their individual positions and the industry by minimizing new tube requirements and by making fullest possible use of tube repairing facilities.

Any lengthening of operational hours is to be avoided. Tube life is measured in hours of operation and any extension of the operating schedule will automatically deteriorate the tube situation.

WMC MANPOWER LIST MAY CRAMP BROADCASTING INDUSTRY

Within a few days the War Manpower Commission will issue its long awaited revision of manpower policy. Included in the new regulations will be a new list of critical occupations.

This list is expected to include only a few of the occupations previously listed in the series of occupational bulletins now in the hands of local draft boards. In all probability the broadcast industry, along with other industries, will suffer many deletions.

It is not expected that the new regulations will specifically rescind the occupational bulletins (No. 29 as applicable to broadcasting). However, the issuance of the new super-critical list will probably cause draft boards to give less consideration to the jobs listed in the occupational bulletins.

These new regulations together with the announced intention to draft fathers indicate that stations should intensify efforts to obtain and train replacements.

'BUSINESS AT WAR'

NAB, through cooperation of NBC, has on hand master recordings made of the broadcast "Business At War," which featured Donald Nelson, Elmer Davis, Judge Fred M. Vinson, Marvin Jones and Chester LaRoche in an appeal to advertising to support the war. Radio is lauded.

Pressings are available of the complete 45-minute program at a total cost of only $3.00, express collect.

A complete set includes one double-face record and one single-face record, 16", 33 1/3 r.p.m. The records may be used before civic clubs, private auditions in your studios, etc., but must not be broadcast. Order your set today from NAB headquarters!

ANALYSIS—JUNE 1943 WAR EFFORT BROADCAST REPORT

Here is an analysis of programs and announcements, of local origination, tabulated from station War Effort Broadcast Reports for June, 1943.

A sharp rise in the number of topics broadcast by stations becomes quickly apparent by reference to the last published analysis on page 677 of NAB REPORTS, Dec. 4, 1942.

The figures herein are minimum, not maximum. From a long time inspection of reporting forms, it is apparent that many stations do not report all war effort broadcasts.

	Type & Length	*Number*
Get Ready for Winter	1-Min. ET	4,640
Fats and Greases	1-Min. ET	11,340

'HASTEN THE DAY' IS TIMELY NEW OCD SHOW

The United States Office of Civilian Defense, beginning the week of August 15, is releasing to broadcast stations a new and totally different type of government wartime radio show. The new transcription series, "HASTEN THE DAY," will be a weekly fifteen-minute dramatic comedy of the "Aldrich Family" type.

Advance billing is that "it can hold its own with the best commercial shows." Stations wishing to carry the series may obtain the platters through OWI, Washington, or the radio section, Office of Civilian Defense, Washington, D. C.

"HASTEN THE DAY" is a series of episodes about the Tucker family, each show complete in itself, with a one-minute spot at the end of the show where local speakers may be scheduled if desired by the station and/or the local civilian defense organization. OWI has cleared the shows.

Leaning heavily on entertainment qualities to build a popular audience, "HASTEN THE DAY," is a sparkling, well-produced show with good music and an excellent professional cast. It is done without guns, tanks, planes and flag-waving speeches. The "message" is put across with expert showmanship and constant consideration of the importance of entertainment values.

FEDERAL COMMUNICATIONS COMMISSION

FCC RULE AMENDED

In view of the present shortage of electrical indicating instruments and the need for uninterrupted production of marine radio equipment for war uses, the FCC has amended Subsection 8.142 of its Rules, effective immediately, deleting the requirement for additional meters for a main transmitter completed by the manufacturer after January 1, 1944.

The amended Subsection 8.142 now reads:

"Subsection 8.142(d). A main transmitter shall be equipped with suitable indicating instruments of approved accuracy to measure (1) the current in the antenna circuit, (2) the potential of the heating current applied to the cathode or cathode heater of each electron tube or a potential directly proportional thereto, and (3) the anode current of the radio frequency oscillator or amplifier which supplies power to the antenna circuit, or in lieu thereof, the anode current of such oscillator or amplifier plus the anode current of any other radio or audio frequency oscillator(s) or amplifier(s) normally employed as part of the transmitter."

912 STATIONS

During the month of July, one construction permit was granted by the FCC. A comparative table of the number of stations by months, follows:

	1942					1943							
	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, August 16th. It is subject to change.

Monday, August 16

Further Hearing in Washington, D. C.

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Co-partners d/b as Red Lands Broadcasting Association, Lufkin, Texas—Renewal of license, **1340 kc.**, 250 watts, unlimited.

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Co-partners, d/b as Red Lands Broadcasting Association (Assignor)—Voluntary assignment of license, **1340 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Granted modification of license to change frequency from **1490 kc.** to **1240 kc.** (B2-ML-1164)

WABY—Adirondack Broadcasting Co., Inc., Albany. N. Y.—Granted construction permit to authorize the installation of a new 250 watts transmitter, subject to decision on pending application for renewal of license. (B1-P-3530)

Mutual Broadcasting System, Inc., Chicago, Ill.—Granted extension of authority to transmit programs to Station CKLW, Windsor, Ontario, Canada, to stations owned and operated by the Canadian Broadcasting Corp., and to stations licensed by the Canadian Minister of Transport. (B4-FP-112)

KWKW—Marshall S. Neal, Individually and as Trustee of all other stockholders (transferor), and L. W. Peters (transferee), Southern California Broadcasting Co., Pasadena, Calif.—Granted motion to dismiss without prejudice application for consent to transfer control of Southern California Broadcasting Co. (KWKW), Pasadena, Calif., from Marshall S. Neal, Individually and as Trustee of all other stockholders, to L. W. Peters. (Docket No. 6523)

LICENSE RENEWALS

Granted renewal of licenses of the following stations:

KPLT, Paris, Tex.; KGKL, San Angelo, Tex.; KBST, Big Spring, Tex.; KCMC, Texarkana, Tex.; KRBC, Abilene, Tex.

DOCKET CASE

The Commission has adopted Proposed Findings of Fact and Conclusions (B-183) denying the application of the Bremer Broadcasting Corporation, licensee of Station WAAT, Jersey City, N. J., for a construction permit to increase power from one to five kilowatts, install a new transmitter and effect changes in its directional antenna system for night use. WAAT is presently licensed to operate on **970 kc.**, 1 kilowatt, unlimited time, with a directional antenna at night.

At the same time, the Commission adopted Proposed Findings of Fact and Conclusions (B-184) denying the application of The Tribune Company, licensee of WFLA, Tampa, Florida, for a construction permit to increase its power from one to five kilowatts during nighttime operation and to make corresponding changes in its directional antenna. WFLA now operates on **970 kc.** with power of 5 kilowatts day and 1 kilowatt night, with directional antenna, unlimited time.

The Commission's action on both these applications followed its policy, announced in the Memorandum Opinion of April 27, 1942, with respect to the use of critical materials during the war period.

In another action, the Commission adopted a Decision and Order modifying a construction permit granted December 9, 1941, to the Miami Broadcasting Co., licensee of Station WQAM, Miami, Florida, so as to permit utilization of its present transmitter site and antenna, with 5 kilowatts power, subject to certain specified conditions. WQAM is now operating on **560 kc.**, 1 kilowatt day and night, unlimited time.

MISCELLANEOUS

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted petition for postponement of hearing to October 4 in re application for modification of license to increase power to 5 KW.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted authority to determine operating power by direct measurement of antenna power. (B1-Z-1536)

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1537)

WSYB—Philip Weiss, tr/as Philip Weiss Music Co., Rutland, Vt.—Granted authority to determine operating power by direct measurement of antenna power. (B1-Z-1535)

WOKO—WOKO, Inc., Albany, N. Y.—Adopted an Order granting petition for a continuance of the further hearing now set for August 10, on the application for renewal of license of Station WOKO; hearing continued until September 20, 1943. (Docket No. 6486)

The Commission adopted an Order modifying its Order of July 29, 1943 (which denied the application of Newark Broadcasting Corporation for a construction permit for a new broadcast station at Newark, N. J.), to include at the end of the last paragraph the words "without prejudice". (B-175; Docket No. 6190)

KWSC—State College of Washington, Pullman, Wash.—Adopted an order denying petitions to modify Commission freeze policy of September 22, 1942, and to strike issues 6 and 7 and to amend notice of hearing in re application for modification of license. (Docket 6499)

APPLICATIONS FILED AT FCC

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine—Modification of construction permit (B1-P-2868) as modified, which authorized increase in power, installation of new equipment and directional antenna) for extension of completion date from 8-11-43 to 9-11-43.

1090 Kilocycles

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Special service authorization to install new transmitter and operate with power of 1 KW for the period ending 4-1-44. Amended to request authority to broadcast point to point messages.

MISCELLANEOUS APPLICATIONS

WRUS—NEW—World Wide Broadcasting Corp., Scituate (Boston), Mass.—License to cover construction permit (B1-PIB-46) which authorized construction of a new international broadcast station.

WRUA—NEW—World Wide Broadcasting Corp., Scituate (Boston), Mass.—License to cover construction permit (B1-PIB-27) which authorized construction of a new international broadcast station.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why cease and desist orders should not be issued against it.

American Business Survey, Inc., 160 Fifth Ave., New York, and its president, Milton Strauss, are charged in a complaint with misrepresentation in connection with the sale of a so-called "magazine" having the title "American Business Survey" and purporting to be a "recording of the achievements of commerce and industry." (5021)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Ballard & Ballard Co., 912 E. Broadway, Louisville, Ky., selling a dog food designated "Ballard's Insurance Dog Food," has stipulated to cease representing that the product contains meat or that it will insure the health of dogs. (03124)

Bio-Mineral Products Company, 2708 Myrtle St., Detroit, selling and distributing a mineralized water called "Bio-Mineral," has stipulated that it will cease and desist from representing that use of the product would constitute an adequate or dependable remedy, treatment or relief for a number of ailments or conditions which include tuberculosis, cancer, heart disease, goiter, infantile paralysis, arthritis and sciatica; that the product contains a therapeutically scientific or effective amount of any mineral which is recommended by medical science as a preventative of or as a treatment for any of the ailments enumerated by it, or that the product is drugless and that its use will assure health. (3693)

Infilco, Incorporated, 325 W. 25th Place, Chicago, selling and distributing an apparatus for chemically treating ordinary city or well water, has stipulated that in the dissemination of any advertising of its product it will cease and desist from the use of the word "distilled" as descriptive of any water or fluid treated by the process, or from the use of any word or words that represent, directly or impliedly, that any water or fluid treated by said process is distilled. (03125)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Electrovita Sales Company of Ohio, Norwalk, Ohio, selling and distributing an artificial mineral water designated "Elsaco Mineralized Water," has been ordered to cease and desist from misrepresentation of its product. The Commission finds the water is processed at the respondent's place of business at Norwalk, where it is subjected to a secret process involving an electrolytic treatment which the respondent claims in its various descriptive advertising alters the chemical or mineral composition of the water. NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 34, August 20, 1943

REPORT ON LEGISLATIVE COMMITTEE MEETING

(Released by NAB News Bureau)

The broadcasting industry is strongly united in the demand for new legislation re-defining the powers and scope of the Federal Communications Commission, Neville Miller, NAB president, has announced.

Mr. Miller's statement followed a meeting of the NAB legislative committee held here August 17 over which he presided as chairman and during which reports from meetings in nearly half the 17 NAB districts, the first held since the Supreme Court FCC decision of May 10, were reviewed.

"Most of the meetings have resulted in the passage of resolutions and the appointment of district Legislative Committees. Recognition of the industry's peril is evident in these moves," Miller concluded.

Continued formulation of plans and policies occupied the Committee during its all-day session, including discussions of the White-Wheeler bill, scheduled for hearings in September, and the Holmes bill, recently refiled in the House of Representatives.

Committee members present were: Nathan Lord, WAVE, Louisville, Ky.; Clair McCollough, WGAL, Lancaster, Pa.; Joseph Ream, CBS, New York; William Barlow, appearing for James D. Shouse, WLW, Cincinnati, Ohio; Ed Yocum, Billings, Montana; G. Richard Shafto, WIS, Columbia, S. C.

Don S. Elias, WWNC, Asheville, N. C., Frank M. Russell, NBC, Washington, D. C., and James W. Woodruff, Jr., WRBL, Columbus, Ga., were unable to attend.

Willard D. Egolf, Assistant to the President of NAB, served as Secretary.

Labor

A. F. OF M. DEVELOPMENTS

The WLB panel hearing on the dispute between the A. F. of M. and the transcription companies is now set for September 6 in New York. The hearing was postponed from August 16 because of the illness of Joseph Padway, Mr. Petrillo's lawyer.

Other developments:

Henry Woodbridge, industry member of the tripartite panel, has found it will be impossible for him to serve. His successor will be named within a few days.

Olin Downes, music editor of the *New York Times*, has been running on his Sunday page a series of letters advocating legislation to give musicians a copyright right in recordings. This would give musicians a right to collect a fee for public performances. Among the writers was Sir Thomas Beecham, English conductor who has found the heavy dough in his trade in this country. Jack Gould reported in last Sunday's *Times*, however, that Mr. Petrillo felt the legislative road to his goal was too long and that Mr. P. felt direct action was better. In this connection Representative Joe Baldwin of New York, who runs with the international *élite* now headquartered in New York, says he will push for the enactment of copyright legislation for the musicians.

WMC TIGHTENS JOB TRANSFERS

At the same time that Selective Service issued its new list of 149 critical jobs (see Selective Service Bulletin No. 13, enclosed), the War Manpower Commission issued an order that all transfers of such jobs must be made through the United States Employment Service. A certificate of availability from the former employer is no longer sufficient. In other words, chief engineers and maintenance engineers no longer can be hired except through the USES. Local WMC boards were given until October 15 to incorporate this national rule (regulation No. 7) into their rules. If in doubt about hiring a technician, consult your local WMC or USES officials.

PLEASE NOTE

If any member has had a job classification and salary plan approved by the WLB, please advise the NAB Labor Relations Department.

WEBR CONDUCTS AGGRESSIVE ABSENTEEISM CAMPAIGN

For the past six weeks WEBR, Buffalo, has conducted an aggressive and successful campaign over the station to reduce absenteeism.

One thousand dollars in prizes for suggestions to reduce

(Continued on page 356)

Four Bulletins

With this issue of the "Reports" are four special bulletins as follows:

1. Third War Loan Bulletin
2. Broadcast Advertising Bulletin
3. Selective Service Supplement
4. Special Legislative Bulletin

If you do not get any one or all of these, please notify NAB headquarters at once and they will be sent you.

absenteeism and accidents in Buffalo were offered according to Cy King, station director.

The promotion included daily programs with dramatizations, talks by labor leaders and safety officials and the use of material from the National Safety Council.

Some sixty-one representative Buffalo area firms participated in the series and "are very happy with it."

WEBR is now in the process of judging entries in the $1,000 contest for the awarding of prizes. Ceremonies concerned with the presentation of prizes will be broadcast in the near future.

WOMEN TECHNICIAN BROCHURE IS ON WAY

Women in increasing numbers are coming to the aid of broadcasters by performing control room and transmitter duties formerly handled by men now in service.

An illustrated sixteen-page brochure, featuring women technicians at work, in all sections of the country, was mailed to all stations today. In a note accompanying the brochure Arthur Stringer, secretary, NAB War Committee, said that the purpose of the brochure was to provide broadcasters with a tool to aid in securing the cooperation of all concerned in the training of women technicians. It will also encourage women now in training or who contemplate training, he pointed out. What so many others have done, they, too, can do.

The influence of NAB's launching and promotion of the federally financed course, "Fundamentals of Radio," is evidenced in the many captions in the brochure. Some of the girls holding FCC Licenses, they reveal, are graduates of this course. Many of the station engineers were instructors.

The brochure pictures 117 women technicians employed in 61 member stations.

It is the feeling at NAB headquarters that the number of women technicians twelve months hence will increase many fold.

WKBN ON THE BARRELHEAD

WKBN, Youngstown, uses the columns of the Youngstown Shopping News each week to publicize spots and programs of its advertisers. At the bottom of the sheet to which clippings are attached appears the following statement of policy and practice:

"Radio is advertising. We never forget that fact. WKBN believes in advertising and believes in full promotional cooperation with its network and spot advertisers. When you buy the CBS Station for the Youngstown, Ohio, Market Area you automatically receive this additional service regardless of whether you ask for it or not. And you receive it without any charge. The above publicity, promoting your scheduled program over WKBN, was placed by our publicity department and appeared in the. . . ."

ENOCH IS 12TH DISTRICT PUBLIC RELATIONS CHAIRMAN

Robert D. Enoch, general manager of station KTOK, Oklahoma City, has been appointed public relations chairman for the twelfth district by William B. Way, district director. Mr. Enoch is the ninth P.R. chairman appointed to date.

MR. FLY TALKS ON FREEDOM OF SPEECH AND THE ROLE OF RADIO INTERNATIONALLY

(The following excerpts are taken from an NBC broadcast of July 31, 1943, in a series with the general title "For This We Fight." The particular broadcast was "The World of Sight and Sound" and participants included FCC Chairman James Lawrence Fly, Walt Disney of Hollywood and Francis S. Harmon, of the War Activities Committee, Motion Picture Industry. Ben Grauer was discussion chairman. We are reprinting only the remarks concerning radio.)

INTRODUCTION

Mr. Fly: The war has given radio new stature! It has made clear its potentialities as a weapon of offense. And —what is infinitely more important for the post-war era— it has for the first time brought home to the American people the role which radio can and must play in international affairs.

The realization of the four freedoms, FOR WHICH WE FIGHT, depends, perhaps more than anything else, upon mutual understanding among the peoples of the world. For understanding, knowledge is the first prerequisite; the strange must become familiar; the way must be clear for the peoples of all nations to become thoroughly acquainted with the music, literature, games and living habits of their world-neighbors.

We in the Western Hemisphere, particularly, have already come to a closer understanding through our exchange of short-wave programs, which, rebroadcast by local stations on both continents, reach many thousands of radio listeners. Broadcasts from Central and South America have given many of us our first sustained draught from the deep well of Pan-American culture. Its singers, its dance orchestras, are becoming as familiar to us as our own artists, and ours are becoming known in all America. In the same manner, people of the United Nations have come to know more of each other's way of life.

Radio can broaden the horizons of international understanding in the post-war world. Radio waves know no national boundaries. Encircling the globe as they do in the fraction of a second, they link together instantaneously sender and listener in the most distant parts of the world. Furthermore, radio, like the movie "talkie" is a peculiarly democratic medium; it speaks to those who cannot even read. Technical innovations after the war will further improve the quality of radio transmission. A few years of peace, for example, will make possible the use over wide areas of frequency modulation broadcasting with its freedom from static. More important, to the aural will be added the visual in the post-war period. Wide exploitation of television,—at first in black and white and eventually in full color,—will make us eye-witnesses as well as auditors of events throughout the world. Televised programs will be filmed, say, in Hollywood, shipped abroad, and broadcast locally in Buenos Aires, Warsaw and Chungking.

The potentialities of television for fostering international understanding are tremendous. What the eye can see, the mind can absorb. Television and comparable media can materially help in removing the frictions and misunderstandings between peoples, which ignorance and suspicion based on half-knowledge have traditionally engendered. After the war television and radio broadcasting together can do much toward developing the sort of mutual understanding between neighbors that will keep the bombers on the ground.

The power of radio, of course, like the forces unleashed by the Industrial Revolution, can be as productive of harm as of good. Without intelligent direction, it can be a serious detriment rather than a rich asset. It is our responsibility to provide this intelligent direction. The nations of the world must begin now to plan for a sound, workable system of world radio. Through this one development alone, we will go a long way toward realizing our ideal of lasting peace based upon common understanding and mutual respect.

DISCUSSION

Mr. Grauer: We have one question here which is a compound of something that came from a number of our listeners. I will direct it at Mr. Fly.

"One of the expressed aims of international broadcasting is that nations shall speak peace to nations. How can we be sure some nations won't misuse international radio?"

Mr. Fly: Mr. Grauer, I don't think we can be sure. Where a transmitter is devoted to an evil cause, as of course it may be, it can only mean we have failed in our job. We must be better acquainted with our neighbors. There must be a common and sympathetic understanding between us and upon that we must rely to avoid any abuse of the great power of radio.

Mr. Grauer: Mr. Harmon, I see you are raising your hand. Do you want to say something on that?

Mr. Harmon: Mr. Grauer, we of motion pictures oppose compulsion as a method of control. We believe in self-discipline. Our voluntarily adopted production code has a paragraph in it, for example, which provides that the history, institutions, prominent people and citizenry of other nations shall be represented fairly. This is a standard to which Hollywood is adhering with increasing fidelity.

Mr. Grauer: Well, you speak of a standard. Is that standard violated when pictures present the United States, let's say, in an unfavorable light and are exported that way?

Mr. Harmon: No. The first criterion of a plot is honesty. To present this country always in terms of sweetness and light is as unfair as to show only the seamy side of our life. If all films sent abroad adopted this, it would quickly undermine confidence in our intellectual and artistic integrity. Americans are not perfect, Mr. Grauer, and a portrayal of various aspects of our national life produces a wholesome result in the long run. For example, Jessie James and Abraham Lincoln are both parts of the American scene. The same film distributor sent the two films, "Jessie James" and "Young Mr. Lincoln" to Latin America the very same month. Incidentally, I might say "Jessie James" paid the traveling expenses of "Young Mr. Lincoln" throughout that continent.

Mr. Grauer: Mr. Fly, here is a radio question: "In post-war discussion, the thought of an international bill of rights comes up. Wouldn't the right to listen in to foreign broadcasts be an essential part of such a bill?"

Mr. Fly: I think, Mr. Grauer, that the freedom to listen is one of the things for which we fight. Freedom to listen must be universal if freedom in general is to prevail. Free speech is futile where people may not listen freely. Now that we finally have in radio a great practical mechanism of free speech, I think it must be obvious that the interest of the millions of listeners is of much greater significance than the right of the single speaker at the transmitter. We must assume that all of us will remain completely free to listen.

Mr. Grauer: While we are talking about radio, Mr. Fly, one of the essential things, of course, in listening is to have a set, and there are many nations which do not have as high a per capita listener average as others. Isn't one of the problems of this post-war world, in which international radio will be more widely used, to get radios to the vast number of people who just can't afford to buy them?

Mr. Fly: Yes, that is one of our very serious problems. I am not sure that I know the answer. At least I know a part of the answer, however. We expect to have more efficient and economical machines after the war. We must rely heavily upon our modern mechanism for mass production and distribution, and the governments themselves may need to take an interest in this very serious problem.

Mr. Grauer: Mr. Fly, I have a question for you. "Since the line between education and propaganda is extremely thin sometimes, do you think it might be necessary to set up an international board to control broadcasts? Do you envision something remotely like that being necessary?"

Mr. Fly: No, I hardly think so. It seems to me that in the main, we must rely heavily upon the basic principles of free speech, and, as I indicated a while ago, the freedom to listen. I do think that whoever has the continuing control of the transmitters has an awfully significant job. It is a continuing affair. There are many delicate problems and they must be watched from moment to moment. But I should think it very unfortunate if there were anything resembling a scheme of censorship set up to control the international broadcasting in time of peace.

Mr. Grauer: Let honesty govern the art, as Mr. Harmon indicated a little earlier.

Mr. Fly: I think so.

Mr. Grauer: That brings up a question. They will be hand-maidens, won't they, Mr. Harmon, television and motion pictures, in this expanding world we envision?

Mr. Harmon: Yes, I think so.

Mr. Grauer: The product of Hollywood will be transferred to telefilm which will be televised?

Mr. Harmon: Right. May I supplement what Mr. Fly said a moment ago? I am reminded of the comment the President made in his letter to Toscanini on the latter's birthday: Art can flourish only where men are free. And because these two great media have enjoyed freedom, we must accept the responsibilities that go with that freedom.

QUESTIONS & ANSWERS ON THE NEW CHANGES IN SELECTIVE SERVICE

(See also the Special Selective Service Supplement enclosed with this issue of the "Reports.")

Q. What are the main purposes of the War Manpower Commission's recently announced plan for the utilization of manpower?

A. It is a plan to hold essential workers on war-useful jobs if that is where they are employed now, to assure the transfer of workers to jobs aiding in the war effort and to supply men needed for the armed forces without cutting war production.

Q. What are the main features of the program?

A. There are four principal steps: (1) Establishment of a list of critical occupations, covering skills urgently needed in the war effort. (2) Instruction to Selective Service Boards to give greater consideration than ever before to occupational deferment. (3) Establishment of new standards for permitting the transfer of civilian workers from job to job. (4) Extension of the list of non-deferrable activities and occupations providing that all men of military age must transfer from such jobs or be placed first in the list for induction by local boards.

Q. How will the new list of Critical Occupations and the additions to the List of Nondeferrable Activities and Occupations affect the drafting of fathers?

A. Fathers who are in nondeferrable activities or occupations, regardless of their order numbers, will be the first called for military service. Fathers who transfer to essential occupations and thus release single men who are otherwise eligible for military service also help to decrease the need for drafting fathers.

Q. After October 1, will the occupation of a registrant otherwise qualified for military service be the main factor in determining whether he will be inducted or deferred if his order number is called?

A. Generally speaking, yes. In the cases of men with dependents, the question of hardship to dependents must always be given grave consideration. But as a general proposition, when a registrant is being considered for 1-A classification after October 1, the main question will be whether he can serve his country better in the armed forces or in war production and support of the war effort.

Q. Does the new List of Critical Occupations replace the List of Essential Activities and Occupations which has previously guided Selective Service local boards in considering occupational deferments?

A. No. It simply tells local boards that among the occupations on the previously issued list, the 149 named on the List of Critical Occupations are those most urgently needed in war industry and supporting civilian activities and that they also require lengthy training and considerable experience. For these reasons, local boards are instructed to give particular and grave consideration to the deferment of registrants having these critically needed skills provided they are engaged in war production or in support of the war effort. However, any registrant qualified for an occupation on the critical list who is not engaged in an essential activity by October 1, 1943, will not be considered for occupational deferment.

Q. What are the chances for occupational deferment of registrants whose jobs are included on the List of Essential Activities and Occupations but not on the List of Critical Occupations?

A. The basis for all occupational deferment is that the registrant must be a "necessary man" in war production or in support of the war effort. The decision in each individual case, subject to the right of appeal, is made by the registrant's local board. The list of "Critical Occupations," "Essential Activities and Occupations," and "Nondeferrable Activities and Occupations" are issued by the War Manpower Commission to guide the local boards in making these decisions. Local boards also are instructed to obtain all available information from national, state, and local levels to assist them in determining whether a registrant is a "necessary man," and particularly to use the facilities of the United States Employment Service for information as to whether there is a national or local shortage of persons with his qualifications.

Q. What is the status of registrants whose activities and occupations are not included on the "List of Essential Activities and Occupations" or on the "List of Nondeferrable Activities and Occupations"?

A. The inclusion of a registrant's employment on the "List of Essential Activities and Occupations" or its omission from that list and the "List of Nondeferrable Activities and Occupations" does not conclusively determine his occupational status. The question to be determined by his local board, in consultation with the United States Employment Service and other national, state and local agencies, is whether or not the registrant is needed in his current occupation in support of the war effort. If the board so finds, when the registrant is called by his order number for possible induction into the armed forces, the board can defer him.

Q. How long is a "necessary man" continued in occupational deferment?

A. Until he can be replaced by someone not qualified for military service. In the cases of men deferred in war production or activities supporting the war effort deferment cannot be granted for a period longer than 6 months at one time, and the deferment can be revoked at any time a registrant's local board finds that a registrant has left the job in which he was deferred or is no longer needed in it. On the other hand, the board can continue the deferment, by not more than 6-month periods, so long as in its judgment the registrant is needed in the war effort and is irreplaceable. Registrants deferred in agriculture, however, come under the Tydings' Amendment and are deferred for indefinite periods as long as they are found necessary to and regularly engaged in an essential agricultural occupation or endeavor.

Q. What special restrictions apply with respect to workers in occupations in the new "List of Critical Occupations"?

A. When employment stabilization programs are amended to conform with Regulation No. 7, workers last employed in critical occupations may be hired only in jobs to which they are referred by the Employment Service. Likewise, no employer may hire a worker for a job in one of these occupations unless the worker has been referred by the local USES or such office has approved the employment.

LISTENER RESPONSIBILITY IN RADIO CITED BY CALIFORNIA WOMAN RADIO CHAIRMAN

Mrs. Leo Viano, State Radio Chairman for Northern California, recently made the following annual report (in part):

"This Department asks that listeners shoulder more responsibility in judging radio programs and making it a habit to send to the stations both commendation and criticism of all types of broadcasts. Only in this manner, may American radio stay as it is—the democratic organ of a free thinking people. We have been tardy in recognizing that we, the listeners, have a part to play in radio as much as have the members of the industry. During the coming year "Listener Activity" will become organized in many more communities through Radio Councils in many of the larger sections of the country. These groups are composed of representatives of many civic organizations such as the Federated clubs, PTA, Daughters of the American Revolution, American Legion and others, together with educational leaders, librarians and members of the radio industry. Among the committees of the average Radio Council is the Evaluation Committee which studies the radio offerings of the local area.

"Radio institutes are being held during the summer at many of the universities, giving instruction in the technical and public service angles to radio production. Radio conferences have been held every year bringing together representatives of civic and educational organizations to meet with radio representatives in discussion of the problems and interests of the medium. The public service activity of radio has been brought to the front through these conferences, giving the listener the realization of the fact that radio is much more than purely entertainment and that the future will find it a new force in educational dissemination.

"Presenting a series of sustaining programs over a long period of time, the Federation found its time cut the past two years in nearly every section, but continued to cooperate with the stations wherever they wished our programs.

"The goal of all who work with radio groups is to develop better informed radio listeners since it is a cooperative affair of broadcaster and public."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

No broadcast hearings have been set before the Commission for the week beginning Monday, August 23.

BLUE NETWORK HEARING

In view of the national importance and general public interest in the proposed sale of the Blue Network, Inc., licensee of three radio stations and operator of a major network, the FCC designated for public hearing on September 10 next, the application for consent to transfer control of the Blue Network Company, Inc., from Radio Corporation of America to the American Broadcasting System, Inc.

Under Section 310(b) of the Communications Act, the Commission must act upon the transfer of control of the three stations —WJZ (New York City), WENR (Chicago), and KGO (San Francisco)—which are licensed by the Blue Network, Inc. Also involved in the transfer and subject to Commission approval are 48 relay stations licensed to the Blue and authority to transmit programs to Canada.

The procedure of public hearing on this application, it was noted, will provide opportunity for presentation of all material evidence and enable the Commission to obtain full information regarding the proposed transfer. The full Commission will preside at the September hearing.

DESIGNATED FOR HEARING

The Commission designated for hearing the application for renewal of license of Georgia School of Technology (Station WGST), Atlanta, Georgia (B3-R-441). (Chairman Fly and Commissioner Craven voted "No".)

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WAPO—W. A. Patterson (Assignor), Joda Patterson, Executrix of the Estate of W. A. Patterson, Deceased (Assignee), Chattanooga, Tenn.—Granted consent to involuntary assignment of license of Station WAPO and relay station WAEA, from W. A. Patterson to Joda Patterson, Executrix of the Estate of W. A. Patterson, Deceased. (B3-AL-374; B3-ALRY-17)

WAPO—Joda Patterson, Executrix of the Estate of W. A. Patterson, Deceased (Assignor), Joda Patterson, Ramon G. Patterson and Louise Patterson Pursley, d/b as WAPO Broadcasting Service, Chattanooga, Tenn.—Granted consent to voluntary assignment of licenses of Station WAPO and relay station WAWA, from Joda Patterson, Executrix of the Estate of W. A. Patterson, Deceased, to Joda Patterson, Ramon G. Patterson and Louise Patterson Pursley, doing business as WAPO Broadcasting Service, a newly formed partnership. No monetary consideration is involved. (B3-AL-375; B3-ALRY-18)

Churchill Tabernacle, Buffalo, N. Y.—Granted petition for intervention in re applications for renewal licenses of Buffalo Broadcasting Corp., Stations WKBW and WGR, Buffalo, N. Y., for the purpose of filing exceptions to the Proposed Findings of the Commission, making an appearance at the oral argument if any is held, and the submission of a brief. (Dockets Nos. 6324 and 6325)

In the Matter of Regulations governing the initial contract period and guarantee of revenue applicable to the rendition of teletypewriter exchange service within certain exchange areas of the West Coast Telephone Company and West Coast Telephone Co. of California—Granted petition to continue until September 22, 1943, the oral argument now scheduled for September 8, 1943, in Docket No. 5897.

LICENSE RENEWAL

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—Granted renewal of license for main and auxiliary transmitters of Station WHOM. (B1-R-170)

DOCKET ACTION

The Commission has announced its Proposed Findings of Fact and Conclusions (B-185) denying without prejudice the application of R. O. Hardin and J. C. Buchanan, doing business as Nashville Broadcasting Company, for a permit to construct a new local broadcasting station at Nashville, Tennessee, to operate on the frequency **1240 kc.** with power of 250 watts, unlimited time.

This action is in conformity with the policy announced by the Commission in its Memorandum Opinion of April 27, 1942, with respect to the use of critical materials during the war period.

MISCELLANEOUS

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted license to cover construction permit, as modified, which authorized move of transmitter, new transmitter, change in frequency, changes in directional antenna for night use, and increase in power; also for approval of new type transmitter. (B3-L-1764) Granted authority to determine operating power by direct measurement of antenna power. (B3-Z-1519)

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine—Granted modification of construction permit, as modified, which authorized increase in power, installation of new equipment and directional antenna for day and night use, for extension of completion date from August 11 to September 11, 1943. (B1-MP-1721)

W6XYZ—Television Productions, Inc., Los Angeles, Calif.—Granted license to cover construction permit, as modified, which authorized new experimental television broadcast station. (B5-LVB-43)

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Denied request for special service authorization to operate unlimited time, power of 500 watts night, 1 KW day, for the period ending February 1, 1944. (Station operates on **810 kc.**, 1 KW, daytime.) (B4-SSA-76)

APPLICATIONS FILED AT FCC

560 Kilocycles

WQAM—Miami Broadcasting Company, Miami, Fla.—Modification of license to change hours of operation of auxiliary transmitter from for auxiliary purposes only *to* for auxiliary purposes and to operate from 12 midnight to 6 a. m., EST, during alternate weeks when operating as a key station for the local filter center.

970 Kilocycles

WCSH—Congress Square Hotel Co., Portland, Maine—Transfer of control of licensee corporation from Henry P. Rines, Deceased, by Adeline B. Rines, Executrix of the Last Will and Testament of Henry P. Rines, to Adeline B. Rines, William H. Rines, and Mary R. Thompson, Trustees.

KOIN—KOIN, Inc., Portland, Ore.—Special service authorization to make changes in transmitting equipment and operate with 10 KW power using directional antenna at night.

1450 Kilocycles

WFNC—W. C. Ewing & T. K. Weyher, doing business as Cumberland Broadcasting Co., Fayetteville, N. C.—Voluntary assignment of license to Cape Fear Broadcasting Company.

WGOV—E. D. Rivers, Valdosta, Ga.—Authority to determine operating power by direct measurement of antenna power.

MISCELLANEOUS APPLICATIONS

NEW—Blue Network Company, Inc., New York, N. Y.—Transfer of control of licensee corporation from Radio Corporation of America to AMERICAN BROADCASTING SYSTEM, INC. (1000 shares of stock) (WJZ, WENR, KGO, 48 relay stations and B1-FP-109).

NEW—National Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit recorded programs to all broadcast stations under the control of the Canadian authorities that may be heard consistently in the United States for the period beginning 9-15-43.

NEW—National Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit programs to Stations CFCF and CBL and other stations under the control of the Canadian Broadcasting Corp. for the period beginning 9-15-43.

W6XLA—Television Productions, Inc., Portable-Mobile (area of Los Angeles, Calif.)—Modification of construction permit (B5-PVB-87 as modified, which authorized construction of a new television relay broadcast station) for extension of completion date only from 9-1-43 to 11-1-43.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Acme and Acme Mail Order House, 120 East Broadway, New York, selling and distributing used, worn or second-hand clothing, is charged in a complaint with misrepresentation. (5023)

Bennettsville Mattress Factory, Bennettsville, S. C., manufacturing mattresses and other bedding, is charged in a complaint with misrepresentation. (5024)

Frank Corwin Co., Frank Cohen, David Demerer, and Hanover Wool Stock Co., are charged in a complaint with violation of the provisions of the Wool Products Labeling Act of 1939 and the Federal Trade Commission Act. (5025)

Cravat-Silks, Inc., 180 Madison Ave., New York, operating mills in Paterson, N. J., and manufacturing and distributing rayon and wool fabrics sold to manufacturers of men's ties, is charged in a complaint with violating the provisions of the Wool Products Labeling Act of 1939 and the Federal Trade Commission Act. (5022)

Rock Crusher Manufacturers Assn. et al.—A combination and conspiracy to suppress competition and create a monopolistic control over prices in the interstate sale of rock crushing and other heavy construction machinery is alleged in a complaint issued against the Rock Crusher Manufacturers Association, Cedar Rapids, Iowa, the Associated Equipment Distributors, National Press Building, Washington, D. C., and the members of the two associations. The secretaries of the associations, Arthur W. Daniels of the manufacturers and C. F. Winchester of the distributors, also are named respondents, as are the officers, directors and governors of Associated Equipment Distributors. (5026)

CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Foxstand Foods, Inc., 81 Arlington St., Boston, selling a dry dog food preparation designated "Sassified Dried Meat for Dogs," has stipulated to cease representing that "Sas," previously offered and sold as "Sassified Dried Meat for Dogs," contains any meat or beef; that the animal protein ingredient of "Sas" is produced in a plant licensed by the State of Massachusetts or that it is subject to inspection by duly appointed State health inspectors unless such is a fact; or that the animal protein ingredient in the product, in its original form, is fit for human consumption. (03126)

Kennel Food Supply Co., Fairfield, Conn., selling dog food designated "Cero-Meato," "C. F. Meat Biscuits," "Cod Liver Oil Biscuits," "Terrier Food" and "Puppy Biscuits," and the Park City Advertising Agency, Inc., Bridgeport, Conn., an advertising agency which disseminated advertisements for the products on behalf of The Kennel Food Supply Co., have stipulated that in connection with the dissemination of advertising for "Cod Liver Oil Biscuits," "Terrier Food" and "Puppy Biscuits" they will cease and desist from using the terms "meat," "meat scrap," "dry meat" or any other terms of similar import or meaning to describe any ingredient which is not meat in fact, and that in connection with the advertising of "C. F. Meat Biscuits" they will cease using the terms "meat," "dry meat" or other terms of similar import to describe a product which is not meat in fact. They also agree to discontinue representing, by use of the word "Meat" in the brand or trade name of a product, that it contains meat, and to desist from use of the brand name "Cero-Meato" or any other brand name or designation in dissemination of advertising for the products unless composition of the products is truthfully described. (03127)

C. R. Wade Medicine Co., P. O. Box 555, Hot Springs, Ark., selling and distributing a medicinal preparation designated "Wade's Wonder Worker," has stipulated to cease representing that the preparation will remove corns or callouses instantly or afford immediate relief from such conditions; that it contains ingredients not found in other preparations; that it is an effective treatment for bunions, chilblains, ingrowing nails, warts, rusty nail wounds, poison oak, or all skin diseases and ailments; that it is an adequate treatment for all deep-seated cases of athlete's foot or ringworm; that it is an effective treatment for bites or stings of poisonous insects, or that it can be depended upon to relieve all types of toothache. (3698)

Wonder Peanut Co., 2000 N. Central Ave., Knoxville, Tenn., selling and distributing candy and peanuts, has stipulated to cease and desist from selling and distributing any merchandise so packed and assembled that sales to the public are to be made or, due to the manner in which such merchandise is packed and assembled at the time it is sold by him, may be made by means of a game of chance, gift or lottery scheme; supplying or placing in the hands of others push cards or other devices which are to be used in the sale and distribution of the merchandise to the public by means of a game of chance, or selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise or lottery scheme. (3697)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 35, August 27, 1943

OWI NAMES RADIO ADVISORY COMMITTEE

The Office of War Information has announced the formation of an advisory Radio News and Policy Committee.

Elmer Davis, Director of War Information, and Palmer Hoyt, Director of Domestic Operations, have invited nine outstanding officials in the radio industry to serve as an Advisory Committee to consult with OWI from time to time upon war information problems as they relate to radio.

A similar Advisory Committee composed of newspaper editors and publishers was appointed several weeks ago and has already had an initial meeting with Mr. Davis and Mr. Hoyt. The new Radio News and Policy Committee will be invited to meet with OWI as soon as a satisfactory date can be arranged.

The radio officials who have consented to serve on the Advisory Committee are:

Lewis Allen Weiss, Vice President & General Manager of the Don Lee Broadcasting System.

Miller McClintock, President of Mutual Broadcasting System, Inc.

William S. Paley, President of Columbia Broadcasting System, Inc.

Mark Woods, President, The Blue Network.

Leo Fitzpatrick, Vice President & General Manager of the Goodwill Station at Detroit.

Herbert L. Pettey, Director of WHN, NYC.

Martin B. Campbell, Managing Director, WFAA, Dallas Studios, and WBAP, Fort Worth Studio.

Neville Miller, President, National Association of Broadcasters.

Niles Trammell, President, National Broadcasting Company, Inc.

4TH DISTRICT MEETING SEPT. 3-4 AT ASHEVILLE

District Director G. Richard Shafto of the 4th district, NAB, will preside at a meeting of the district September 3-4 at Grove Park Inn, Asheville, N. C.

Neville Miller and Lewis H. Avery will represent NAB. Legislative, A. F. M. and manpower problems are expected to be discussed.

2ND DISTRICT NAB RESOLVES FOR RADIO LEGISLATION; AGAINST HITCH-HIKE SPOTS

The 2nd district, NAB, met at the Hotel Syracuse, Syracuse, N. Y., August 24, with Kolin Hager, district director, presiding. Neville Miller represented NAB.

The meeting passed unanimously the following two resolutions:

Radio Legislation

"RESOLVED that the Broadcasters of New York and New Jersey in meeting assembled at Second District of NAB at Hotel Syracuse, Syracuse, New York, on Tuesday, August 24, 1943, call the attention of the Congress of the United States to the fact that present radio law was enacted in 1927 and although amended in 1934 in substance remains as originally enacted, that radio has made great progress since that date and a greater significance in American life, that it is now time for the Congress to reappraise the radio law in the light of this progress made since the enactment of the present law especially in view of the May Tenth decision of the Supreme Court giving greatly enlarged power to the Federal Communications Commission and that early dates be set for the hearings upon the bills now pending before both Houses of Congress."

Hitch-hikers

"WHEREAS the so-called hitch hike and cow catcher announcements presently used on network programs and on national spot announcements tend to lower the standards of broadcasting, and

"WHEREAS such announcements are considered to be a violation of the responsibility placed upon radio station licensees to operate in the public interest and convenience and necessity, and

"WHEREAS the use of such announcements was permitted without the consent of affiliates save those spots sold on a national spot basis.

"NOW THEREFORE BE IT RESOLVED that Kolin Hager, Chairman of the NAB Second District of New York and New Jersey, is instructed to convey to the proper officials of NAB for action at the next regularly called meeting of NAB a request that immediate steps be taken to eliminate from network programs hitch hike, cow catcher or other similar announcements and form all announcements on a national spot basis as soon as may be practicable."

Congressman Clarence Hancock of Syracuse was a guest speaker. He lauded radio and the American System of Broadcasting.

Notice

An extra copy of Broadcast Advertising Bulletin No. 4 is being sent you with this week's "REPORTS" so your commercial staff may be more adequately covered. If you need more copies, please notify Lew Avery at headquarters.

Special Legislative Bulletin No. 14, dealing with further digest of the Cox Select Committee hearings in New York also is enclosed along with some special material.

Neville Miller, *President* C. E. Arney, Jr., *Secretary-Treasurer*

Lewis H. Avery, *Director of Broadcast Advertising;* Walter L. Dennis, *Chief, News Bureau;* Willard D. Egolf, *Assistant to the President;* Howard S. Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Arthur C. Stringer, *Director of Promotion.*

EGOLF REQUESTS BALANCE OF DISTRICT PUBLIC RELATIONS CHAIRMEN APPOINTMENTS

Seven NAB district directors have not yet appointed public relations chairmen for their districts and Willard Egolf, NAB assistant to the president, asks that these appointments be made in time to present a full slate of p.r. chairmen to the September 15 meeting of the NAB p.r. committee.

Three district public relations chairmen visited Mr. Egolf at NAB Washington headquarters recently, including Clarence Leich, district 8, WGBF-WEOA; Irvin G. Abeloff, district 4, WRVA, and Karl O. Wyler, district 13, KTSM.

The seven other chairmen already appointed are: Edward Hill (1), WTAG; Michael R. Hanna (2), WHCU; Vernon H. Pribble (7), WTAM; Merle Jones (10), KMOX; Robert D. Enoch (12), KTOK; Harry Buckendahl (17), KALE, and John Elwood (15), KPO.

Broadcast Advertising

WHAT OTHERS SAY TO HELP YOU SELL

The Department of Broadcast Advertising tries to review as many advertising and business papers as possible in search of articles by leading authorities that will help you to sell more time on the air. Recently several articles, bearing principally on the use of broadcast advertising by department stores, have been read, checked and reprinted.

The appearance of such articles with increasing frequency in publications directed to retailers is proof of the timeliness of the Retail Promotion Plan—proof, too, that this project should have industry-wide support.

With this issue of the NAB REPORTS are enclosed three reprints—two of which bear directly on the use of broadcast advertising by department stores. Put these stories to work for you with your local prospects—and write for more copies if you can use some—they are available.

WHY ADVERTISE NOW?

No other question is being asked more frequently of advertising solicitors today than that new bugaboo: "Why advertise now?" Although the director cited a number of reasons why present-day advertisers should continue their campaigns without interruption or reduction, at the District meetings last fall, an unusually pertinent summary appeared in the August 13, 1943, issue of *Printers' Ink.* The article is entitled: "Why Merchandise-short Retailers Must Continue Advertising" and was written originally for the Gruen Watch house organ. It makes a common-sense case for the continuation of advertising with sound emphasis on the post-war market.

STORE LAUNCHES RADIO PROGRAM

The July 26, 1943 issue of *Broadcasting* carried a convincing story on the "Hour of Melody" over KSFO, San Francisco, for Hale Bros. It is further proof of the importance of continuity and long-range planning in the sale of broadcast advertising to department stores.

OTHER DEPT. STORE STORIES

The May, 1943, issue of *Dry Goods Journal* featured a story you should show every retail prospect. Entitled "Wartime Use of Radio Advertising," it recounts success stories that should build conviction with you and your prospects that department stores and retailers can make increased use of broadcast advertising, both profitably and promptly.

Be sure these stories reach your sales staff. Or, if you want to keep these copies for yourself, write a brief note and you will receive extra copies.

THIRD WAR LOAN

If you didn't read "Broadcast Advertising Bulletin No. 4," enclosed with the last issue of the NAB REPORTS, why not read the enclosed copy right now? The nationwide campaign to promote the Third War Loan offers you an opportunity to write the biggest volume of business in the history of your station and, most important of all, to render a public service in your community that will be unmatched by any other medium. Read all about it in the enclosed bulletin.

SALARY FREEZE RELIEF IS GRANTED RADIO

Some relief for radio from the salary freeze was granted by the War Labor Board this week when new rules for employers of 30 or less were issued.

Employers of 30 or less may now grant, without WLB approval, individual merit increases which individually do not amount to more than 10 cents an hour in any one year, and which, in total, do not amount to an average of more than 5 cents an hour in any one year starting July 1.

Employers of 8 or less are exempt from the salary freeze altogether.

The "30 or less" rules may be applied to various "establishments" within a company. For instance, it would appear that transmitters may be separated from studios for the purpose of determining the number of employees.

Additional increases, beyond the 10 cents an hour, may be granted without WLB approval if included in a plan approved by the WLB or meeting WLB requirements.

(See pages 260 and 282 in NAB REPORTS.)

FULL USE OF VENEREAL DISEASE TERMS ON AIR URGED BY WOMEN'S GROUP

The following resolution, which is self-explanatory, was forwarded to NAB by Elliott Ness, director, social protection division, Federal Security Agency. Inasmuch as NAB has cooperated with this agency in the current nationwide venereal disease campaign, we are printing this resolution as part of that cooperation:

RESOLUTION OF THE NATIONAL WOMEN'S ADVISORY COMMITTEE ON SOCIAL PROTECTION

WHEREAS, venereal disease is causing millions of man-hours of service to be lost to the armed forces and to war industry, and is also endangering the health and welfare of the civilian population, and

WHEREAS, prostitution is the greatest contributing factor in the spread of venereal disease, and

WHEREAS, a nation-wide program to repress prostitution, control the spread of venereal disease and provide medical and social rehabilitation is an imperative war measure and an indispensable part of a sound welfare program,

BE IT RESOLVED THAT we, the National Women's Advisory Committee on Social Protection on this 9th day of June, 1943, do:

1. Declare our support of the Social Protection Program carried on by the War and Navy Departments, the Social Protection Division of the Office of Community War Services, and the U. S. Public Health Service, in cooperation with the American Social Hygiene Association and state and local officials.
2. Recommend to our several National women's organizations that they officially endorse this Social Protection Program, and further recommend that they undertake such activities as lie within the powers of each, and that they urge similar action by their local groups.
3. Recommend that the work of the National Women's Advisory Committee on Social Protection be continued, and that a more detailed and broadened plan of work to implement this resolution be presented to the several women's organizations, and

BE IT FURTHER RESOLVED THAT

1. In order to safeguard the health and welfare of the Nation, we urge the Press, Radio, Motion Pictures, and other information channels, to permit a full presentation of Social Protection information, including frank use of the words, "Prostitution", "Syphilis", "Gonorrhea", and "Venereal Disease". We further urge that informed persons—in addition to medical authorities, be permitted to present this program.
2. That copies of this resolution be given to the managements of the Press, Radio, Motion Pictures, and other channels of information.

SIGNED: (Mrs. H. B. Ritchie), (Chairman); (Dr. Helen Gladys Kain), (Elizabeth Cecil Scott), (Caroline F. Ware), RESOLUTION COMMITTEE.

NOTICE ON GENE NOBLES

Station KVAK, Atchison, Kans., would like to hear at once from any station manager or other broadcaster who has seen or know the whereabouts of the following described man:

GENE NOBLES, native of Texas, five feet three inches; black, curly hair parted on the right side; slightly crippled from rheumatism; left hand bent and crippled and he limps decidedly; 4-F draft status.

WILLIAM TERRELL OF FCC RETIRES ON AUGUST 31

The Federal Communications Commission has made public a letter to Mr. William D. Terrell, Chief of the FCC's Field Division, Engineering Department, who will terminate 40 years of government service when he retires August 31, 1943.

Born August 10, 1871, in Golansville, Va., Mr. Terrell is one of the outstanding pioneers in communications science. As chief of the radio division of the Department of Commerce from 1915 to 1932 he contributed perhaps more than any other government official to the growth of broadcasting and high frequency communications. In 1932, Mr. Terrell became chief of the division of field operations of the Federal Radio Commission and in 1934 took over the direction of the field division of the newly-created FCC. The letter follows:

"Mr. William D. Terrell,
Chief, Field Division,
Engineering Department,
Federal Communications Commission,
Washington, D. C.

Dear Mr. Terrell:

On the occasion of your voluntary retirement from government service August 31, 1943, may I convey to you on behalf of the Commission and its staff, as well as personally, our sincere best wishes and our hope that you will continue to enjoy for many years to come health, happiness, and the satisfaction of important work well done. We know that the friendships cemented during our association with you will endure, and that you will continue to hold the respect of all concerned with radio which you have earned during your forty years of meritorious service to your government.

In 1911, when you became the first United States Radio Inspector, you had already had twenty-two years of pioneer communications experience including eight years of government service. Thereafter, as Chief of the Radio Division of the Department of Commerce, you contributed more than any other government official toward the early growth of broadcasting and of high-frequency communication. Since 1932, as Chief of the Division of Field Operations of the Federal Radio Commission, and as Chief of the Field Division of the Federal Communications Commission, you have devoted yourself unremittingly and unsparingly to the duties of your office.

We especially wish to thank you for your last two years on active duty, undertaken at our request and with the approval of the President after you had passed seventy, the statutory age of retirement for Federal employees, thus giving us the benefit of your expert advice and assistance during the most difficult period of adjustment to war conditions when your help was urgently needed.

As tokens of your accomplishment and of the esteem in which you are held in your profession, you were elected a Fellow of the Institute of Radio Engineers in 1929 and made an honorary member of the Veteran Wireless Operators Association. You have represented this Government with distinction at many national and international meet-

Seen Your Congressmen?

It was to assist Arthur T. Whiteside, WPB vice chairman for civilian requirements, and the members of Congress, that Arthur Stringer sent the August 6 bulletin on tubes to all members.

Members who have not communicated with their Congressmen in accordance with this bulletin are urged to do so, by mail, if they have returned to Washington.

The bulletin was prompted by Mr. Whiteside's own letter to Congressmen, several weeks ago, when he stated that a 20 per cent reduction in dollar value of civilian business was expected during the last half of the year. He wrote, he explained, so that the Congressmen would be in a position to discuss conditions while they were at home during the congressional recess. He told the members that he wanted to hear of any *"particularly severe local complaints."*

ings, including the International Radiotelegraph Conference, London, 1912; National Broadcast Conferences called by the Secretary of Commerce, 1922, 1923, 1924, and 1925; International Telegraph Conference, Paris, 1925; International Radio Conference, Washington, 1927; Safety of Life at Sea Conference, London, and European Broadcasting Conference, Prague, 1929. In all these lines of duty, you have brought credit to yourself and the government.

Not the least of your services has been the selection and training of younger men who will now carry on the tradition of competence and integrity which you have established, and who will seek to maintain the high standards you have set. I know these men join with the Commissioners in appreciation and cordial best wishes.

BY ORDER OF THE COMMISSION.

James Lawrence Fly,
Chairman.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

No broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 30.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted modification of construction permit (which authorized installation of new transmitter and antenna, increase power from 250 watts unlimited time to 1 KW day, 500 watts night, and change frequency from **1490 kc.** to **560 kc.**) for extension of completion date. (B5-MP-1719.) Granted extension of special service authorization to operate on **560 kc.,** with power of 1 KW day, 500 watts night, unlimited time, for the period ending December 1, 1943. (B5-SSA-78)

WCBI—Birney Imes, Columbus, Miss.—Granted renewal of license for regular period. (B3-R-1093)

WCBI—Birney Imes (Assignor), Birney Imes, Jr. (Assignee), Columbus, Miss.—Granted assignment of license of Station WCBI from Birney Imes, Sr., to Birney Imes, Jr. No monetary consideration is involved. (B3-AL-368.) Also granted power of attorney for Birney Imes, Sr., to act for Birney Imes, Jr., until his discharge from the Army of the U. S.

DESIGNATED FOR HEARING

WJW—The Akron Broadcasting Co. (Assignor), The WJW Company (Assignee), WJW, Inc. (Permittee), Akron, Ohio—Designated for hearing application for consent to assignment of construction permit from The Akron Broadcasting Co. (formerly WJW, Inc.) to The WJW Company. (B2-AP-36)

WJW—WJW, Inc., Akron, Ohio.—Designated for hearing modification of license to change name of licensee to The Akron Broadcasting Company. (B2-ML-1167)

NEW CALL LETTERS FOR FM BROADCASTERS

A new system of CALL LETTERS for Frequency Modulation (FM) broadcast stations, like that currently used by standard broadcast and commercial television stations, was adopted by the Commission. The change in FM station calls, to become effective November 1, next, will affect approximately 45 high frequency broadcast stations in operation and all future licensees.

This system of CALL LETTERS for FM stations will replace the present combination of letter-numeral calls (such as W47NY, W51R, etc.) presently used by FM broadcasters. In cases where a licensee of an FM station also operates a standard broadcast station in the same city, he may, if he so desires, retain his standard call letter assignment followed by the suffix "FM" to designate broadcasting on the FM band. Thus, if the licensee of a standard broadcast station with the call letters "WAAX" (hypothetical) also operates an FM station in the same location, he will have the choice of using the call "WAAX-FM" or he may, on the other hand, be assigned a new four-letter call—say, WXRI. Similarly, an FM broadcaster on the West Coast, who also operates a standard broadcast station "KQO," may, if he likes, use the call "KQO-FM" or he may ask for a new four-letter call "KQOF" for his FM station. This choice will remain entirely with the FM operator.

FM licensees may inspect at the FCC a list of the approximately 4,000 four-letter calls which are available for assignments. This number appears ample to supply calls for all additional standard, commercial television, FM stations and non-broadcast classes for some time to come. (The Commission wishes to call attention to the fact, however, that all three-letter calls have already been assigned.)

All call letters beginning with "W" are assigned to stations east of the Mississippi River; all station calls beginning with "K" are located west of the Mississippi and in the territories. A breakdown of the 4,000 four-letter calls available shows approximately 2,900 "K" calls and 1,100 "W's" still unassigned.

FM stations are asked to have their requests, indicating a preference in call letters, filed with the Commission by October 1. If no request has been received from an FM licensee by that date, the FCC will, at its discretion, assign a new four-letter call to that station.

It is recommended that FM operators, who wish a new four-letter call, list their first, second and third choices, and in the event two stations seek identical call letters the request first received by the Commission will be honored.

All FM stations will use their new call letters on the air effective November 1, next.

Under the old system the first letter of an FM call, either K or W, indicated the geographical position of the station in relation to the Mississippi River, the number designation showed the frequency on which that station was operating and the last letter or letters gave a clue to the city from which the broadcast emanated. (FM stations are licensed in the 43,000 to 50,000 kilocycle band, on frequencies from 43,000 to 49,000 kc., progressing by 200 kilocycle steps.) Thus the call K37LA indicates a station operating on 43,700 kc. at Los Angeles; W53D, a station on 45,300 kc. at Detroit, etc.

The Commission's decision to discard the combination of letter-numeral calls for FM stations arose out of several disadvantages and inherent limitations in the system based upon the past experience of FM broadcasters themselves, and the advisability of making the change at this time when transmitter construction is halted because of the war. Licensees of FM stations have found that the letter-numeral system is somewhat cumbersome and does not meet with general public acceptance. In addition, a change in frequency of an FM station under the old system involved a change in its call with consequent confusion to the listening public. Finally, it was felt that as FM broadcast stations were licensed in more and more cities, it would become increasingly difficult to identify the station call with a particular city through the use of an initial letter or letters.

MISCELLANEOUS

WILM—Delaware Broadcasting Co., Wilmington, Del.—Granted license to cover construction permit which authorized move of transmitter approximately 30 feet from present site and use of WDEL's south tower of directional array; granted authority to determine operating power by direct measurement of antenna power. (B1-L-1694; B1-Z-1495)

WDEL—WDEL, Inc., Wilmington, Del.—Granted license to cover construction permit as modified, for increase in power and installation of new transmitter and directional antenna for day and night use; granted authority to determine operating power by direct measurement of antenna power. (B1-L-1751; B1-Z-1496)

WORK—York Broadcasting Co., York, Pa.—Granted license to cover construction permit as modified, for installation of new directional antenna system for night use only; granted authority to determine operating power by direct measurement of antenna power. (B2-L-1769; B2-Z-1529)

National Broadcasting Co., Inc., New York, N. Y.—Granted extension of authority to transmit programs to Station CMX, Havana, Cuba. (B1-FP-114)

KFAR—The Midnight Sun Broadcasting Co., Fairbanks, Alaska—Denied request for authority to conduct tests for a period of 10 days on **610 kc.,** with power of 10 KW, between midnight and 4 a. m.

APPLICATIONS FILED AT FCC

740 Kilocycles

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Modification of license to move main studio from 87 East San Antonio St., San Jose, Calif., to 140 Jessie St., San Francisco, Calif.

770 Kilocycles

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Extension of special service authorization to operate on **770 kc.,** 25 KW night, 50 KW daytime, unlimited hours of operation, using transmitter as specified in construction permit (B5-P-2783 as modified), for the period 10-1-43 to 4-1-44.

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—License to cover construction permit (B1-P-3445 as modified) which authorized increase in power, installation of directional antenna for night use, changes in equipment and move of transmitter.

WNAC—The Yankee Network, Inc., Boston, Mass.—Authority to determine operating power by direct measurement of antenna power.

1450 Kilocycles

KFMB—Worcester Broadcasting Corp., San Diego, Calif.—Transfer of control of licensee corporation from The First National Trust and Savings Bank of San Diego, as Trustee under Declaration of Trust for Warren B. Worcester, to O. L. Taylor and Jack O. Gross, 7500 shares of stock.

MISCELLANEOUS APPLICATION

KWIX—The Associated Broadcasters, Inc., San Francisco, Calif.—License to cover construction permit (B5-PIB-40) which authorized construction of a new international broadcast station.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Associated Merchandising Corp., 1440 Broadway, New York, and its 21 member corporations which operate department stores in some of the largest cities of the country, are charged in a complaint with violation of the Robinson-Patman Act by knowingly inducing manufacturers, producers and suppliers to discriminate in price in their favor by selling them merchandise of like grade and quality at lower prices or higher discounts than those accorded competing stores. (5027)

Columbia River Packers Association, Inc., Astoria, Ore., packing, canning and distributing salmon, shad and other sea food products, is charged in a complaint with violation of the brokerage section of the Robinson-Patman Act. (5033)

Dawe's Products Co., Inc., trading as Dawe's Vitamelk Co., 4800 South Richmond St., Chicago, with branch offices at Denver, Colo., and Portland, Ore., is charged in a complaint with misrepresentation. (5029)

Harvest House, 50 West 17th St., New York, selling and distributing a book entitled "The Complete Guide to Bust Culture," is charged in a complaint with misrepresentation. (5028)

Modern Home Diathermy, 505 W. 8th St., Los Angeles, selling and distributing diathermy machines designated "Vitatherm Short Wave Diathermy," is charged in a complaint with misrepresentation and false advertising. (5032)

Samuel B. Smith, United Mine Workers Bldg., Springfield, Ill., using the name "Central Clearing House Occupational Information," and formerly engaged in selling and distributing printed mailing cards intended to be used by creditors and collection agencies in obtaining information concerning debtors, is charged in a complaint with misrepresentation. (5030)

Zonite Products Corp., Chrysler Bldg., New York, engaged in the sale of Forhan's Toothpaste, a cosmetic preparation, and Erwin, Wasey & Company, Inc., 420 Lexington Ave., New York, advertising agency, which has participated in the preparation and dissemination of advertising matter for Forhan's Toothpaste, are charged in a complaint with misrepresentation. (5031)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Dentists' Supply Company of New York, 220 W. 42d St., New York, said to be the largest manufacturer and distributor of artificial teeth in the country, has been ordered to cease and desist from violation of the Robinson-Patman Act. (4915)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Chattanooga Medicine Co., Chattanooga, Tenn., selling medicinal preparations designated "Syrup of Black-Draught", "Black-Draught", and "Black-Draught (Granulated)", and Nelson Chesman Co., Chattanooga, an advertising agency which disseminates advertising for the products, have stipulated to cease and desist from representing that the preparations contain a tonic, help to tone lazy intestinal muscles or the digestive system, or have any effect upon a sallow complexion. They further agree not to publish any advertisement which fails to reveal that the preparations should not be used when abdominal pain, nausea, vomitting or other symptoms of appendicitis are present; provided, however, that such advertisements need only contain the statement: "CAUTION, USE ONLY AS DIRECTED", if the directions for use, whether appearing on or in the labeling, contain a caution or warning to the same effect. (03132)

S. P. S. Chemical Co., 3404 Calumet Ave., Chicago, selling a medicinal preparation designated "S. P. S. Scalp Food", has stipulated to discontinue representing that his preparation will feed or nourish the scalp; that it is a cure or remedy for, or has therapeutic value in the treatment of, itching scalp, eczema, conditions which cause falling hair, or dandruff, except insofar as its use will facilitate the mechanical removal of the loose scales of dandruff; or that it will grow, promote the growth or improve the grade of hair. He further agrees to cease and desist from representing through the use of the term "Scalp Food", or any other term of similar import, that the preparation will feed or nourish the scalp. (03130)

Espiridion Gonzalez, Laredo, Tex., selling a medicinal preparation designated "Pomade Gonzalez", has stipulated to cease and desist from representing that excellent results may be obtained by using the preparation in cases of ringworms, warts or skin sores or that it will get rid of all kinds of skin eruptions or pimples. He further agrees to desist from disseminating any advertisements which fail to reveal that the preparation contains 50 percent salicylic acid, and that a preparation of this strength, when repeatedly applied to the skin, other than two or three applications for hard corns and calluses, will cause local irritation; provided, however, that such advertisements need only contain the statement: "CAUTION, USE ONLY AS DIRECTED", if the directions for use appearing on the label or in the labeling contain a caution or warning to the same effect. (03128)

Histex Corp., 604 No. Wells St., Chicago, selling a medicinal preparation designated "Histeen Tablets", and United Advertising Companies, 205 No. Michigan Ave., Chicago, an advertising agency disseminating advertising for the product, have stipulated to cease and desist from disseminating any advertisement which fails to reveal that the product should not be taken by persons having heart or kidney ailments, except on competent medical advice, and that the product may cause serious blood disturbances if taken frequently or continuously; provided, however, that such advertisements need only contain the statement, "CAUTION, USE ONLY AS DIRECTED", if the directions for use, whether appearing on the label or in the labeling, contain a caution or warning to the same effect. (03133)

Posture-Aid Company, 509 Centre St., Dallas, Tex., selling a health device designated "Posture-Aid", and John Brough and Evelyn Brough, trading as John and Evelyn Brough, Stewart Bldg., Dallas, conducting an advertising agency disseminating advertising for the product, have stipulated to cease and desist from representing that the device relieves constipation, headache, backache, nervousness, fatigue or tenseness; pulls muscles into place, relaxes or strengthens the muscles, relieves tired or cramped muscles or teaches the muscles to hold the body erect; corrects misplaced vertebrae, double chin, round shoulders, swayback or flat chest; lifts the chest or gives greater room for lung expansion, or flattens the stomach; promotes health, appetite, well-being, new energy, beauty of figure or improved posture; exercises the muscles of the neck, or tones, relaxes, straightens or stretches the spine. (03129)

Uncas Manufacturing Co., 623 Atwells Ave., Providence, R. I., selling jewelry, has stipulated to cease and desist from representing by quality markings on rings and other articles of jewelry, or otherwise, the ratios of the weight of the gold alloy overlay to the weight of the metal of any such article, or the gold fineness of the gold alloy when the actual ratio of the weight of the gold alloy overlay to the total weight of the metal is less than indicated by the markings, or the actual gold fineness is less than that indicated by the markings. (03131)

Williams Gold Refining Co., 2978 Main St., Buffalo, manufacturing and selling dental gold specialties, has stipulated, in connection with the offering for sale or sale of its products, to cease and desist from use of the figures "585" or "650" to describe or designate gold solder products not containing, respectively, 585/1000ths or 650/1000ths of fine gold content; and from the use of such figures or other indicia or symbols in any manner which may have the capacity or tendency to confuse, mislead or deceive purchasers respecting the quantity or quality of the gold content of such products. (3700)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 36, September 3, 1943

ROBERT T. BARTLEY NAB WAR DIRECTOR

Karl A. Smith, Special Counsel

Two new appointments by Neville Miller reinforce NAB's war-depleted staff with a War Director and Special Legislative Counsel.

Robert T. Bartley, vice-president of the Yankee Network, will take the War Director's post, a newly created position, between September 15 and October 1.

Karl A. Smith, Washington attorney, will act as special legislative counsel and will work with the NAB special legislative committee, which authorized the appointment.

Cooperation with government bureaus and departments requires a directing head with wide experience in Washington. Bartley is well qualified for this important task as war director. He will also assume many of the duties of Russell Place, former counsel for NAB, who is now with the Office of Strategic Services.

Born in Ladonia, Texas, May 20, 1909, Mr. Bartley attended Southern Methodist university and was married to Ruth Adams of Washington in 1936. They have two children, Robert, Jr., 5, and Jane, 2.

Following his employment as assistant to Walter M. W. Splawn, special counsel to the house committee on Interstate and Foreign Commerce, in 1932-33, Mr. Bartley continued with Mr. Shawn when he became a member of the Interstate Commerce Commission in 1934. During these years, Speaker Sam Rayburn of the House, who is Mr. Bartley's uncle, was chairman of the House Interstate Foreign and Commerce committee.

When the Federal Communications Commission was formed in 1934, Mr. Bartley transferred there as telegraph division director, a post abolished in 1937 with Mr. Bartley becoming senior securities analyst with the Securities and Exchange Commission.

In March, 1939, he became John Shepard's executive secretary in the Yankee Network, and was elected a vice president of that organization in August, 1942, resigning effective September 25, 1943, to assume his NAB duties.

Mr. Smith will continue his connection with his law firm and act in a special consulting capacity for NAB.

MORE DISTRICT PUBLIC RELATIONS CHAIRMEN APPOINTED

The names of three more district public relations chairmen have been received at headquarters. They are Walter Tison, general manager, WFLA, Tampa, Fla., appointed by James W. Woodruff, Jr., fifth district director; P. G. Paltridge, director of public relations, Earle C. Anthony, Inc., Los Angeles, appointed by Calvin J. Smith, director of the sixteenth district; and Edward E. Lindsay, WSOY, Decatur, Ill., appointed by Director Leslie C. Johnson of the ninth district.

Only four NAB Districts remain without Public Relations Chairmen. They are 3, 6, 11 and 14. Willard Egolf expects to complete the panel prior to the Public Relations Committee meeting in New York, September 15-16, if District Directors will furnish him with the names of their appointees.

FIFTH DISTRICT AND FLORIDA MEETINGS

The fifth district will meet in Atlanta Sept. 10.

The Florida Broadcasters Association will meet at the George Washington Hotel, Jacksonville, Sept. 12.

NEWSPAPER-RADIO COMMITTEE RESOLVES ON NEWSPAPER OWNERSHIP OF STATIONS

The steering committee of the Newspaper-Radio Committee, which is headed by Harold V. Hough, of KGKO, has adopted a resolution requesting legislation to do away with discrimination against newspaper ownership of broadcasting stations.

The resolution is:

> "Resolved—that the Newspaper-Radio Committee should immediately advocate legislation which will make it impossible for there to be any present or future discrimination against newspaper ownership of broadcasting stations, and that this advocacy should include the support of provisions intended to accomplish this end in the White-Wheeler bill, the Holmes bill, as well as other legislation relating to the subject."

Appearance of members of the committee before hearings on the bills mentioned above and active support by them of other pertinent legislation which may be introduced was action approved.

Steering committee members present at the meeting in New York recently are: Walter J. Damm, WTMJ, committee vice chairman; H. Dean Fitzer, WDAF, treasurer; John E. Person, WRAK; Gardner Cowles, Jr., KSO-KRNT; A. H. Kirchhofer, WBEN; Truman Green, WFLA; Harry M. Ayers, WHMA, and Mr. Hough.

Labor

CIO PETITION REFERRED TO ENTIRE FCC BY COMM. CASE

A decision on the CIO petition (see below) requesting a hearing on the radio industry's alleged unfair programming of labor programs now rests with the full FCC, following a preliminary hearing Wednesday, Sept. 2, before Commissioner Norman S. Case, sitting as a single delegated member.

(Continued on page 368)

Lewis H. Avery, *Director of Broadcast Advertising;* Walter L. Dennis, *Chief, News Bureau;* Willard D. Egolf, *Assistant to the President;* Howard S. Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Arthur C. Stringer, *Director of Promotion.*

CIO PETITION REFERRED TO ENTIRE FCC BY COMM. CASE

(Continued from page 367)

Commissioner Case, in referring the petition to the full Commission, said that a broad matter of policy was involved. Consideration of the petition is scheduled for the Tuesday, Sept. 7, regular Commission meeting.

CIO, in its petition, requests that the hearings on its allegations be made a part of public hearings on the transfer of the Blue network (changed to the American Broadcasting System by the new owner) from RCA to Edward J. Noble, now scheduled for Sept. 10 in Washington.

Eugene Cotton, representing CIO, presented oral arguments on the petition before Commissioner Case and was answered by Gustav B. Margraf, for RCA, who claimed that the subject matter of the petition was broad and irrelevant to the transfer hearings. John P. Lipscomb represented Mr. Noble and Willard D. Egolf represented NAB as counsel and secretary of the NAB Code Compliance Committee.

Following, in the order named, are the CIO petition and NAB's release answering the petition:

CIO PETITION

The Congress of Industrial Organizations, acting to secure "relief necessary when labor organizations are not permitted either to buy time or to receive free time to put their programs on the air," today petitioned the Federal Communications Commission for permission to intervene in the transfer of the Blue Network from RCA to new owners.

The petition, filed by Lee Pressman, general Counsel of the CIO, follows in full:

The Congress of Industrial Organizations petitions the Federal Communications Commission to intervene in the above proceeding to be held on September 10, 1943, and states:

1. The Congress of Industrial Organizations is a labor organization representing approximately five million organized workers who with their families comprise over twenty million persons in the population of the United States.

2. The membership of the labor organizations affiliated to the Congress of Industrial Organizations have a vital interest in the operation of radio broadcast stations and radio networks. This interest arises from the fact that organized labor represents a substantial portion of the listening audience and is the largest single organization of persons composing that audience. Organized labor is also interested because it uses time on radio broadcast stations and radio networks.

3. This hearing affords an opportunity to present certain problems of organized labor in relation to radio broadcasting both to the Federal Communications Commission and to the radio broadcasting industry. Through the influence of the spoken word, and its ability to reach audiences numbered in the millions, radio is the outstanding medium of mass communication. To achieve its greatest benefits organized labor must use this medium, and the radio industry in performing its role in the public interest must serve organized labor which forms so large a part of its listening audience.

4. Members of unions affiliated to the Congress of Industrial Organizations desire to present to the public at large as well as to potential members and themselves radio programs regarding the merits of collective bargaining and the value of membership in a trade union, the legislative programs of the unions, discussions of public affairs, and labor's point of view on current public issues.

5. At the present time business and commercial concerns buy time from radio broadcast stations and the networks not only for the purpose of selling their particular product but to a growing extent for goodwill programs and institutional advertising. Sustaining free time or a sustaining program is given by one of the networks at the present time to the National Association of Manufacturers. This is a half hour program weekly. From time to time spokesmen for employing interests on the other end of the bargaining scale from labor are given time for speeches to present their program.

6. Organized labor, however, has one fifteen-minute sustaining program once a week on one of the major networks. From time to time officials of labor organizations and other spokesmen secure free time for speeches.

7. Although organized labor also is anxious to present programs for the purpose of securing the goodwill of the community, certain restrictions exist which prevent labor's full participation in the public service of radio broadcast stations. Labor may not buy time on the networks or on a large number of individual stations.

It has not been given a large proportion of the regularly organized sustaining programs on networks. Labor may not solicit memberships on the air. These restrictions are based on the code of the National Association of Broadcasters.

8. The National Association of Broadcasters is, of course, a trade association of the owners of broadcast stations. Some years ago this association adopted a code which provided that time is not to be sold for programs involving controversial issues but sustaining time may be given for such program. Individual stations belonging to the National Association of Broadcasters, either acting on their own or with advice of the National Association of Broadcasters staff, have for practical purposes uniformly held that labor programs are controversial. It should be noted that the National Association of Broadcasters code has no provision that any time or a certain proportion of time need be given at all for controversial issues, so that a station or a network may abide by the code by neither giving nor selling labor any time on the air at all. In the spring of this year, this code was further amended to provide that solicitations of membership in organizations are deemed to be unacceptable under the basic theory of the code and therefore time should be neither given nor sold for this purpose. The major activity of labor organizations is to extend their membership and the benefits achieved by them to workers as yet unorganized. To the extent that broadcast stations and networks abide by this provision of the code, labor organizations are seriously crippled in one of their major activities.

9. A recent instance of the unfairness of the operation of the code, and indeed an example of the dangers inherent in the code, is the treatment accorded certain transcriptions of the United Automobile, Aircraft, Agricultural Implement Workers of America, affiliated with the Congress of Industrial Organizations, dealing with price control. The National Association of Broadcasters circulated its members on July 23, 1943, regarding these transcriptions for which the United Automobile, Aircraft, Agricultural Implement Workers of America sought to purchase time at commercial rates on various broadcast stations. The National Association of Broadcasters informed its members that this was a controversial program and should not be presented on paid time.

10. The above review of the National Association of Broadcasters code and its effects in restricting labor's use of the air points to a serious defect in the control and

operation of broadcast stations and networks. Decisions to exclude labor from the air are made either by the individual broadcaster, the owners of the network, or by the commercial broadcasters represented in the code committee of the National Association of Broadcasters. In none of these bodies is there representation of the public, including labor, nor is there any machinery for appeal or relief from unfair and discriminatory actions of the code committee.

11. Operation of radio broadcast stations and radio networks in the public interest requires that the Federal Communications Commission and radio broadcast station managements recognize:

(a) That a larger proportion of free time should be made available to labor organizations in the form of organized weekly recurring sustaining programs.
(b) That labor organizations should suffer no blanket restriction on their purchase of time on stations or on the networks.
(c) That labor organizations should suffer no blanket restrictions on their solicitation of memberships or use of broadcasting programs in an organizing campaign.
(d) That machinery should be promptly established for the relief necessary when labor organizations are not permitted to either buy or to receive free time to put their programs on the air.

MILLER ANSWERS PETITION

(Released by NAB News Bureau)

American Labor is entitled to and has the same access to the facilities of American broadcasting stations as any other individual or group, Neville Miller, NAB president, declared.

Mr. Miller's statement was in answer to a petition sent by the Congress of Industrial Organizations to the Federal Communications Commission, requesting that FCC afford CIO time during the FCC hearings on the transfer of the BLUE network to present CIO's grievance against NAB and the radio industry in not giving CIO all the radio time it wants.

The NAB president pointed out that organized labor was given more than 100 broadcasts on the networks in 1942 and this gesture by radio to labor was heartily commended by William Green, A. F. of L. president, and Philip Murray, CIO president.

It was also recalled that at the NAB Code Compliance Committee meeting June 16-17 the four members of the Radio Committee of the National Council on Freedom from Censorship, Thomas R. Carskadon, chairman, met with the NAB group. As a result of that meeting, Carskadon himself issued the following statement to the effect that "labor has ample opportunity for the use of broadcasting facilities in this country."

Mr. Carskadon, who is also radio committee chairman of the American Civil Liberties Union, had the concurrence of Roger Baldwin, ACLU president, when he further stated that "no changes are recommended" in the NAB code.

Mr. Carskadon also suggested that labor organizations avail themselves of the opportunities to become educated as to what their broadcast privileges are and how better to take advantage of them.

In referring to Mr. Carskadon's suggestion, Mr. Miller said: "The ACLU has stated that labor should become better acquainted with its opportunities for the use of broadcasting facilities. This position is supported by the radio industry.

"A public hearing would not only reveal radio's cooperation with labor throughout the United States, but might also provide the education apparently most needed by the CIO."

CHECK YOUR TURNTABLE NEEDS

A three sentence NAB memo on turntables, distributed at the Fourth District meeting in Asheville on September 3, read:

Patch up your present turntables as long as you can but—anticipate new turntable requirements for the first half of 1944 and place orders now:

"Apparently, turntables are to remain a hard-to-get item. It will be easier for factories to deliver on time if they know your needs months in advance."

PETRILLO HEARING SEPT. 7

Gilbert Edmund Fuller, president of Raymond Whitcomb Co., Boston, has been appointed to succeed Henry Woodbridge as Industry Member of the War Labor Board Panel for the Petrillo Case. The Panel will start its public hearing Tuesday, September 7, in New York.

SAN FRANCISCO WLB DISAPPROVES RULING

The Regional War Labor Board, San Francisco, has disapproved an arbiter's award which set the technicians scale at Station KPAS at $1.68 per hour.

The Board substituted a scale ranging from $1.25 to $1.70, depending upon length of service.

The NAB intervened in the proceedings after the arbiter had found that all technicians were entitled to the same rate of pay, no matter what size station they worked in.

Public Service

4 SAN FRANCISCO STATIONS CITED FOR FINE WORK BY TUBERCULOSIS ASSOCIATION

The following report compiled by the San Francisco Tuberculosis Association shows the amount of radio activity engendered by four local stations on behalf of the station over the last two years. The stations are KSAN, KJBS, KSFO and KYA.

Edward W. Koehler, association public relations director, wrote the report and it was sent to NAB by NAB Director Arthur Westlund, of KRE.

SERIES ONE

"The Tuberculosis Battle" as sponsored by the Department of Public Health and the San Francisco Tuberculosis Association, was originated by Dr. Edward A. Schaper. The first broadcast on KSAN was on September 6, 1941. This was a half-hour transcribed program, 15 minutes of which were given over to the discussion of the various phases of tuberculosis by qualified physicians. The second portion of the program was given over to a question and answer period in which Dr. Schaper answered questions sent in by listeners.

Between September 6, 1941 and June 27, 1942 there were forty-three weekly broadcasts from KSAN. The time was donated by the management of the station. The transcriptions were made at the expense of the San Francisco Tuberculosis Association, more than $2,100 being expended for this purpose.

These same transcriptions were rebroadcast over KALW, the Board of Education's frequency modulation station, to all schools in San Francisco. Between February 20, 1942 and June 19, 1942 fifteen weekly half-hour broadcasts were made.

SERIES TWO

In order to utilize fully the transcriptions it was felt that they should be offered to various other radio stations in San Francisco. The management of radio station KJBS agreed to use the transcriptions if only the first portion could be used. They felt that a full half-hour was too much for their listening audience.

Between February 14, 1942 and July 22, 1942 KJBS rebroadcast nineteen 15-minute transcriptions of "The Tuberculosis Battle."

KALW rebroadcast thirteen 15-minute programs from the same series of records between December 5, 1942 and March 23, 1943.

All of the radio time was donated free of charge by the radio stations as a public service. The only expense was that of having the transcriptions made.

SERIES THREE

Resuming on KSAN sixteen 10-minute transcribed programs were broadcast between September 5, 1942 and December 26, 1942. The Association expended approximately $365 for this series.

The management of KSFO selected and rebroadcast fourteen of the 10-minute programs originally produced for KSAN between January 7, 1943 and April 8, 1943.

KALW rebroadcast this same 10-minute series and between May 26, 1943 and January 12, 1944, eighteen records will have been broadcast to the schools of San Francisco.

KYA rebroadcast this same 10-minute series and between May 26, 1943 and January 12, 1944, eighteen records will have been broadcast to the schools of San Francisco.

KYA rebroadcasts this 10-minute series each Thursday evening and between July 6, 1943 and September 28, 1943 thirteen 10-minute records will have been broadcast.

SERIES FOUR—"live" programs

10-minute "live" programs were released through KSAN starting January 2, 1943.

The first 5 of these broadcasts originating from the Telenews Theater featured tuberculosis specialists and public health nurses.

Fifteen additional "live" 10-minute broadcasts featured personnel of the following organizations:

WACS
WAVES
SPARS
Maritime Service
Navy
Coast Guard
U. S. Maritime Corps Women's Reserve
State Bureau of Vocational Rehabilitation
California Tuberculosis Association
Booker T. Washington Community Center
San Francisco Tuberculosis Association
U. S. Army
Board of Education

The scripts for these programs were written and produced by the San Francisco Tuberculosis Association with the official sanction of the various services and the Office of War Information. This new format consisted of an 8-minute discussion of the particular branch of the armed service, their traditions, and uniforms. Two minutes were given over to a discussion of the type of examination for tuberculosis given by their particular branch of the service, the kind of X-ray equipment used, and the method of follow-up used when an inductee was found to have active tuberculosis.

One particular broadcast featuring Lt. Dorothy Davis of the U. S. Navy Nurse Corps resulted in more than 15 Bay Area nurses joining this organization. Between January 2, 1943 and May 5, 1943 there were twenty 10-minute "live" broadcasts from KSAN.

Because the management of KSFO liked the format used on KSAN they requested that we continue over KSFO as a "live" program. The scripts were rewritten and brought up-to-date for use over KSFO and between April 15 and July 1, 1943 there were 12 "live" broadcasts from this station. Mrs. Leo J. Clayburgh was guest speaker on the concluding broadcast over KSFO on July 1, 1943.

Approximately $2,550 were expended to produce transcriptions between September 6, 1941 and December 26, 1942. Between September 6, 1941 and January 12, 1944 there will have been 178 weekly broadcasts of "The Tuberculosis Battle" without cost of radio time to the Association. This is approximately 36 hours of free radio time.

THE STORY OF WNAX AND THE 'TYPICAL MIDWEST FARMER'

Station WNAX recently undertook to name the "typical Midwest farmer." As indicated in a fine report of this activity to NAB by Phil Hoffman, vice president of WNAX, it was a "giant" undertaking based on the desire to afford some recognition to that great soldier of the home front—the farmer.

September 4 is the day on which the climax of all the activities connected with this plan came to be.

More than two thousand bankers in the Dakotas, Minnesota, Iowa and Nebraska submitted case histories on outstanding farm families with Charles Worcester, CBS farm director in Washington, acting as judge.

An outstanding farm family for each state was selected for the five states and these families were invited to Yankton, South Dakota, on the big day.

Celebrities and notables present included the governors and senators of the five states, Commissioner John P. Carmody, Maritime Commission, and Commissioner M. Clifford Townsend, of the Food Commission, who together acted as a jury to select the one family of the five represented to be the typical Midwest farm family, and to award the family a tractor as a prize.

The evening doings saw Gardner "Mike" Cowles, jr., of the Cowles stations (of which WNAX is one) dedicate America's tallest radio tower—the new WNAX radiator, which was dedicated to the typical farmer and all Midwest farmers.

Speeches were an integral part of the day's activities, of course, with Governor Sharpe of South Dakota making the keynote address.

The Maritime Commission will name a Liberty ship "Midwest Farmer" and the wife of the typical farmer will be sent to the west coast with her entire family to dedicate the ship, which will be launched about Sept. 12.

Mary Little, Des Moines Register and Tribune radio columnist, handled publicity for the events, while Bob Hawk of the "Thanks to the Yanks" program was on hand with "Ma Perkins" to help glorify the Midwest farmer. Three CBS network "feeds" were made during the course of the day and evening.

All in all, an outstanding job by a great radio station.

Engineering

10 ENGINEERING COMMITTEEMEN NAMED; 7 TO COME

Ten NAB district directors have notified NAB of appointments to the engineering committee. Howard Frazier, NAB director of engineering, asks that the chairmen for the remaining districts be appointed as soon as possible. It is anticipated that the growing shortage of transmitting tubes and technical manpower will require the committee's early attention.

The ten chairmen already appointed and the NAB district director making the respective appointments are listed below:

District 1 Paul W. Morency, Director
F. M. Sloan, Chief Engineer
Radio Station WBZ-WBZA
275 Tremont Street
Boston, Massachusetts

District 3 Roy Thompson, Director
T. C. Kenney, Chief Engineer
Radio Station KDKA
Grant Building
Pittsburgh, Pennsylvania

District 4 Richard Shafto, Director
Clyde M. Hunt, Chief Engineer
Radio Station WTOP
Earle Building
Washington, D. C.

District 5 James W. Woodruff, Jr., Director
J. C. Bell, Chief Engineer
Radio Station WBRC
2nd Ave. & 18 St. N.
Birmingham, Alabama

District 7 Nathan Lord, Director
Lester H. Nafzger, Chief Engineer
Radio Station WBNS
33 North High Street
Columbus, Ohio

District 8 John E. Fetzer, Director
A. Friedenthal, Chief Engineer
Audio Division
Radio Station WJR
Detroit, Michigan

District 10 John J. Gillin, Jr., Director
Henry E. Goldenberg
Radio Station WHB
Scarritt Building
Kansas City, Missouri

District 13 Hugh Halff, Director
George W. Ing, Chief Engineer
Radio Station KONO
317 Arden Grove
San Antonio, Texas

District 15 Arthur Westlund, Director
George Greaves, Chief Engineer
Radio Station KPO
420 Taylor Street
San Francisco, California

District 17 Harry R. Spence, Director
Joseph Kolesar, Chief Engineer
Radio Station KMO
914 Broadway
Tacoma, Washington

TURNER APPOINTED TO FCC ENGINEERING STAFF

The FCC announces the appointment of George S. Turner as chief of the field division of the FCC's Engineering Department, replacing William D. Terrell, who retired from government service today after 40 years' outstanding work in the field of communications. Mr. Turner has been Assistant Chief of the Field Division since 1940.

A native of Independence, Md., Mr. Turner has the degrees of Bachelor and Master of Law from the Atlantic Law School in Atlanta, Ga. During World War I he served as radio instructor at the Great Lakes Naval Training Station and was subsequently commissioned Ensign in the Volunteer Naval Reserve.

After the war, Mr. Turner became the original radio operator-engineer at stations 9XAB, Kansas City, Mo., one of the first experimental radio broadcast stations in the Middle West, and in 1921 was employed by the Southwestern Bell Telephone Co. in Kansas City. From 1924 to 1931 he served with the Department of Commerce, first as a Radio Inspector and later as Assistant Radio Supervisor of the Radio Division. Mr. Turner came with the Federal Radio Commission in 1931 as Radio Inspector in Charge at Atlanta. He is a member of the Institute of Radio Engineers and the Georgia bar.

ALFRED STEELE NAMED WAR BOND RADIO ADVISOR

Alfred M. Steele, vice president of the D'Arcy Advertising Agency of St. Louis, was today appointed by Secretary of the Treasury Henry Morgenthau, as radio advisor of the War Finance Division, in charge of production of the various War Bond air programs.

Mr. Steele is at present responsible for such radio programs as the Andre Kostelanetz program, the Spotlight Band series; the Morton Downey-Raymond Paige programs; the Home Front Reporter programs and others.

REYNOLDS HITS AGAIN

A program titled "Armed Forces Week" to stimulate sale of war bonds during the impending Third War Loan drive has been accepted by Vincent F. Callahan, War Savings Staff advertising, press and radio director, according to John E. Reynolds, now with the Marine Corps, and formerly manager of station WJRD.

Private Reynolds is author of the program idea just accepted and also of the highly successful "War Bond Week" idea originated by him at WJRD and accepted by the Treasury last January.

"Armed Forces Week" would include naming each day during a specified week of the drive as "Navy Day", "Marine Day", etc. On each of these days special programs and stunts could be originated which would include the Armed Forces personnel represented on the particular day. Speeches by returned heroes could be made, letters from overseas could be read, etc.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WDSU—J. H. Uhalt (transferor), E. A. Stephens, H. G. Wall, and Fred Weber (transferees), WDSU, Inc., New Orleans, La.—Granted consent to transfer control of WDSU, Inc., licensee of Station WDSU, from J. H. Uhalt to E. A. Stephens, H. G. Wall, and Fred Weber, for a consideration of $200,000 cash plus additional consideration. (B3-TC-327)

Columbia Broadcasting System, Inc., New York, N. Y.—Granted extension of authority to transmit programs to Stations CFRB and CKAC and other stations under the control of the Canadian Broadcasting Corp. (B1-FP-113)

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted special service authorization to operate from 7 a. m. to local sunrise with 250 watts power for the remainder of the license period. (B2-SSA-71)

LICENSE RENEWALS

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Granted renewal of license for the period ending not later than April 1, 1945. (B1-R-892)

KVSF—New Mexico Broadcasting Co., Santa Fe, N. Mex.—Granted renewal of license for the period ending not later than June 1, 1945. (B5-R-840)

WLBJ—The Bowling Green Broadcasting Co., near Bowling Green, Ky.—Granted renewal of license for the period ending not later than June 1, 1945. (B2-R-1076)

KWLK—Twin City Broadcasting Corp., Longview, Wash.—Granted renewal of license for the period ending not later than August 1, 1945. (B5-R-959)

WEOA—Evansville on the Air, Inc., Evansville, Ind.—Granted renewal of license for the period ending not later than August 1, 1945. (B4-R-883)

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Granted renewal of license for the period ending not later than August 1, 1945. (B2-R-1062)

ACTION ON RELAY BROADCAST STATIONS

Upon consideration of a further report of its Committee on Critical Radio Materials, the Commission announced that under certain enumerated conditions it would be in the public interest to authorize judicious use of idle equipment to increase the power of relay broadcast stations when existing power is insufficient, to make other changes in relay equipment to render improved service, and to construct new relay broadcast stations for the following purposes:

(a) To be used as an emergency program link between the studio and the main transmitter in case of failure of the normal wire lines.

(b) To facilitate the transmission of programs in connection with the war effort, particularly from camps and other places where adequate telephone line facilities are not available or where the cost is prohibitive.

(c) To facilitate the broadcast of programs from remote points where the shortage of lines has made it impossible or extremely difficult to obtain these facilities.

Applications for authorizations to change facilities or to construct new relay broadcast stations for the purposes set forth herein may be granted upon a satisfactory showing that:

(1) All required materials may be obtained without priority assistance for either construction or maintenance;

(2) Such applications involve no inconsistencies with the Commission's Rules and Regulations;

(3) Such applications tend toward a fair, efficient, and equitable distribution of radio service, are consistent with sound allocation principles, and offer substantial improvement in relay broadcast service; and

(4) Such applications are otherwise in the public interest.

Applications to change facilities or to construct new relay broadcast stations, which have been dismissed without prejudice pursuant to the policy announced in Memorandum Opinion of April 27, 1942, may be reinstated for consideration in the light of the new circumstances upon the filing of petitions within thirty (30) days of this date showing (1) that such applications are in conformity with the foregoing conditions; and (2) any and all changes with respect to facts and circumstances given in original applications.

MISCELLANEOUS

WBEZ—Board of Education, City of Chicago, Ill.—Granted license to cover construction permit for new non-commercial educational broadcast station. (B4-LED-9)

In re Harold Gilliam, Fairbanks, Alaska.—Adopted order for substitution of parties in the proceedings in Dockets 5646, 5647, 5656, 5709 and 5710, to change the name of the applicant to Thomas H. Appleton and Thomas M. Donohoe, administrators of the estate of Harold Gilliam.

APPLICATIONS FILED AT FCC

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Modification of construction permit (B4-P-3288 as modified) which authorized increase in power and installation of directional antenna for night use requesting extension of completion date from 9-7-43 to 11-7-43.

620 Kilocycles

KWFT—Wichita Broadcasting Co., Wichita Falls, Tex.—Voluntary assignment of license to Wichita Broadcasters, a partnership, Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, Trustee, P. K. Smith, Mrs. Claude M. Simpson, Jr.

790 Kilocycles

KVOS—KVOS, Inc., Bellingham, Wash.—Modification of construction permit (B5-P-3237 as modified) which authorized change in frequency, increase in power, installation of new transmitter and directional antenna and move, FOR decrease in power from 1 KW to 250 watts, using present licensed transmitter and antenna at licensed site, and extension of commencement and completion dates.

820 Kilocycles

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Acquisition of control of licensee corporation by Aurelia S. Becker through the purchase of 50 shares of stock from Leon E. Pamphilon.

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Construction permit to change frequency from **820 kc.** to **1450 kc.** and hours of operation from limited to unlimited time.

930 Kilocycles

WJAX—City of Jacksonville, Jacksonville, Fla.—Construction permit to install an auxiliary transmitter.

1240 Kilocycles

KFJI—KFJI Broadcasters, Inc., Klamath Falls, Ore.—Involuntary transfer of control of licensee corporation from John A. Kincaid to George Kincaid, Executor of the Last Will and Testament of John A. Kincaid, Deceased (64% of stock).

1320 Kilocycles

KXYZ—Harris County Broadcast Co., Houston, Tex.—Special service authorization to operate on **1320 kc.**, unlimited time, with power of 5 KW day and 2½ KW night, employing temporary non-directional antenna, for the period ending 10-1-44.

KXYZ—Harris County Broadcast Co., Houston, Tex.—Authority to determine operating power by direct measurement of antenna power under above application for special service authorization.

1340 Kilocycles

WSAV—WSAV, Inc., Savannah, Ga.—Acquisition of control of licensee corporation by Harben Daniel and Catherine Murrey Daniel through transfer of 32 shares of stock from E. E. Murray, Sr., to Catherine Murrey Daniel.

WDAK—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., Columbus, Ga.—License to cover construction permit (B3-P-3529) which authorized move of station from West Point, Ga., to Columbus, Ga.

WDAK—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., Columbus, Ga.—Authority to determine operating power by direct measurement of antenna power.

MISCELLANEOUS APPLICATIONS

W8XAL—The Crosley Corp., Cincinnati, Ohio.—Extension of special experimental authorization and modification requesting authority to operate a 1-KW transmitter on **6080 kc.**, with 1 KW power, A-0 and A-1 emission for identification purposes only to be used with WLWK and WLWO, for the period ending 11-1-44.

KDNT—Harwell V. Shepard, Denton, Tex.—Construction permit to increase power from 100 watts to 250 watts and make changes in transmitting equipment.

NEW—World Publishing Company, Omaha, Nebr.—Construction permit for a new high frequency broadcast station (FM) to be operated on **45,500 kc.**, with coverage of 11,660 square miles.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Good Value Bargain House, 643 E. 9th St., New York, engaged in buying and selling new and old, worn and previously used articles of clothing, including dresses and overcoats, is charged in a complaint with violation of the Wool Products Labeling Act of 1939 and the Federal Trade Commission Act. (5034)

Mid-West Drug Co., Inc.—A complaint has been issued charging Mid-West Drug Co., Inc., Fort Wayne, Ind., and its officers, J. R. Dale and W. O. Duane, with misrepresenting the therapeutic properties of Ju-Van, advertised as a treatment for obesity, and with failing to reveal in advertisements that use of the preparation may be injurious to health. (5036)

Peggy Shop, 1412 Chestnut St., Philadelphia, selling women's clothing, is charged in a complaint with violation of the Wool Products Labeling Act of 1939, and the Federal Trade Commission Act. (5035)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Utilities Engineering Institute, 1314 Belden Ave., Chicago, has been ordered to cease and desist from representing that students who complete its correspondence courses of instruction in refrigeration, air-conditioning and welding qualify as experts in those fields and have unusual opportunities for employment. (4532)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Thomas W. Dunn Co., 546 Greenwich St., New York, selling and distributing various products, has stipulated that in connection with the sale and distribution of food gelatine it will cease and desist from representing that it makes or manufactures any such product unless it actually owns and operates, or directly and absolutely controls, a plant or factory wherein is made any and all products sold or offered for sale by it under such representation. (3702)

Dwarfies Corporation, Council Bluffs, Iowa, selling and distributing a breakfast cereal designated "Dwarfies Wheatmix," has stipulated to cease and desist from the use of any statement or representation the effect of which tends to convey the belief or impression that the product can be depended upon to provide increased energy, vigor or "pep"; supply children with vim, vigor or vitality, or put color in their cheeks; promote growth or energy, benefit the nervous system, improve the appetite, or result in strong nerves or nerve strength.

It also agrees to discontinue representing that the product, due to its iron or copper content, makes "red blood" or is a blood builder, or that it contains iron or copper in such significant or substantial amount as to render the product of therapeutic value in the treatment of any type of anemia. (3704)

Fusion Engineering, 1836 Euclid Ave., Cleveland, Ohio, and conducting an experimental and research laboratory for the development of formulas for solders to meet specific industrial needs, has stipulated that, in connection with the advertising, sale or distribution of its products in commerce, it will cease and desist from use of the words "Silver Fuse" as a brand name for the products; and from use of the word "silver" in any way as descriptive of said products, so as to imply that they are composed of silver. If the products are composed of silver in substantial part, and the word "silver" is used to designate such silver content, then the word "silver" whenever used shall be immediately accompanied by some other words printed in type equally as conspicuous so as to indicate clearly that the product is not composed of silver or of silver in excess of the quantity actually contained therein. (3706)

Miller's Furs, Inc., 1235 G St., N. W., Washington, D. C., selling and distributing furs and fur garments, has entered into a stipulation in which it agrees to cease and desist from using the words "Civet Cat" or words of like meaning, either alone or in connection with other words, to describe furs or fur garments made from the peltries of little spotted skunks or any peltries other than civet cat peltries; the word "Mink" or other word of like meaning to describe furs made from rabbit or muskrat peltries or peltries other than mink peltries; the word "Sable" or other word of like meaning to describe or refer to furs made from rabbit, muskrat or any peltries other than sable peltries; the word "Beaver" to describe garments made from rabbit peltries or peltries other than beaver peltries; the word "Seal" or other word or term of like meaning to describe or refer to furs or fur garments made from rabbit peltries or any peltries other than seal peltries; the word "Caracul" to describe furs or fur garments made from kid peltries; or the word "Marmink" or other word connoting mink to describe furs or fur garments made from marmot peltries or any peltries other than mink peltries; unless each of the foregoing words or terms is compounded with the word "Dyed" and, when so compounded, is immediately followed in equally conspicuous type by the true name of the fur. (3701)

Northern Research Industries, 402 East First St., Dayton, Ohio, selling cosmetic preparations designated "Vita-Fluff," "Lovili" and "Glamour," has stipulated to cease and desist from representing that Vita-Fluff adds natural sheen or any sheen or luster to the hair; that Lovili is not similar to Vita-Fluff or that they are not identical except for a small content of synthetic oil added to Lovili; that Lovili creates a true sheen which will last indefinitely or for any longer time than that produced by ordinary oil shampoos; that Glamour is made from actual lemon, or that, as an acid-free product, it may be relied upon to accomplish results equivalent to those obtained from a lemon rinse. (3699)

Pharmacal Products Co., Inc., 480 Lexington Ave., New York, selling and distributing electrically operated shaving devices called "Roto-Shavers," has stipulated to discontinue use of the statement "Thousands have been sold for $18.75" and from use of any statement or representation which may convey the belief that the product is of an indicated value in excess of what is actually the fact, or that it has been regularly sold for a stated amount which is fictitious or in excess of the amount for which it has been customarily sold in the usual course of business. (3707)

Plato Training Service and formerly as Plato Institute, 15224 Plato Ave., Cleveland, Ohio, engaged in the sale and distribution of correspondence school courses of home study intended to assist students to pass civil service examinations, have stipulated to cease and desist from use of the word "Institute" as part of the trade name under which they carry on their business and from use of other words implying that the business conducted by them is an organization for the promotion of learning, such as philosophy, art or science, and has equipment and faculty such as to entitle it to be designated an institute; from referring to any persons as "President" and "Secy. Treas." of Plato Training Service and from any other representation which may convey the belief or impression that the business is incorporated; and from representing that a course of instruction or enrollment in the school conducted by them is a condition precedent to qualifying for a civil service position or that subscription to or completion of such course or any other home study course of instruction is a prerequisite for success in passing civil service examinations. (3703)

Morris Schwartz Corp., 363 Seventh Ave., New York, engaged in the sale and distribution of furs, has stipulated to cease and desist from use of the words "Menton Beaver", "Beaver" or words of like meaning, either alone or in connection with other words, to describe furs or fur products made of other than beaver peltries; from use of the words "Hudseal Sealine", "Norm. Sealines" or other words or terms to describe furs or fur products made of peltries other than seal peltries, and from use of the word "Persian" or any other word of like meaning to designate furs or fur products made of peltries other than true or pure bred Persian lamb peltries, unless in each case the word or term is compounded with the word "dyed" or the word "processed", and, when so compounded, is immediately followed in equally conspicuous type by the true name of the fur. 1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 37, September 10, 1943

NAB 4TH DISTRICT MEETS AT ASHEVILLE; CAMPBELL ARNOUX ELECTED DIRECTOR

Broadcasters of the fourth district, NAB, met at Asheville, N. C., Sept. 3-4, and elected Campbell Arnoux, WTAR, district director to succeed G. Richard Shafto, WIS, who presided over the meeting sessions.

NAB Director-at-Large Don Elias and his WWNC staff were hosts at the gathering, which was termed enthusiastic and successful by all present.

First session was opened in the Grove Park Inn by Mr. Shafto who, after a brief talk, introduced Neville Miller, NAB president, who spoke on the need of legislation to clarify the powers of FCC due to the recent Supreme Court decision.

After general discussion on legislation, the following resolution was passed:

"Resolved: That the membership of the fourth district of the NAB, comprised of the owners and managers of radio stations in North Carolina, South Carolina, Virginia, West Virginia and the District of Columbia, view with alarm the possible effect of the May 10th decision of the Supreme Court of the United States, holding that the FCC was endowed with heretofore unsuspected, expansive powers.

"Be it Further Resolved: That the membership of this fourth district, in conjunction with other members throughout the United States, urges the Congress to adopt legislation which will definitely and clearly prescribe the powers which they wish delegated to the FCC and that the first step in obtaining this legislation be taken immediately by the United States Senate through the passage of the White-Wheeler bill or such other legislation as will provide for the security and safety of a free radio."

Discussion of the afternoon session, first day, centered around the A. F. of M. recording ban, with Cy Langlois, Lang-Worth; Carl Haverlin, BMI; Mr. Miller, Mr. Shafto, Mr. Elias, Ed Allen, Fred Fletcher and others participating. The broadcasters agreed all possible positive steps to solve the problem should be taken.

D. Hiden Ramsey, general manager, *Asheville Citizen Times*, talked on public relations (see account of this talk at end of this report), after which Harold Essex, of WSJS-W41MM, put on an FM demonstration and talk. A question and answer discussion ensued.

Senator Ed (Cotton Ed) Smith, of South Carolina, was scheduled as dinner speaker, but illness prevented his appearance. Mr. Shafto read Senator's Smith's speech, after which Toastmaster Elias introduced Sol Taishoff, editor, *Broadcasting;* Leonard Callahan, SESAC, and Earl Gammons, of CBS, Washington, all of whom made talks.

Second day sessions were opened by two breakfasts, one for sales managers, presided over by Stanton P. Kettler, WMMN, and the other for public relations directors, over which Irvin Abeloff, WRVA, presided.

Remainder of the meeting was taken up with discussions of the recording ban, election of Mr. Arnoux and a talk by Lewis H. Avery, NAB director of broadcast advertising, who described the Retail Promotion Plan presentation, which "opens" in Washington October 5 and then will tour the nation.

Following are additional resolutions passed at the meeting:

Resolutions Passed at Fourth District Meeting

September 3-4, 1943

1) Resolved: That the members of the Fourth District of the NAB do here express their gratitude and appreciation to the management of the Grove Park Inn for the very courteous and efficient manner in which it has entertained Fourth District meeting.

2) Resolved: That the membership of the Fourth District extend its thanks and appreciation to Don Elias and the staff of WWNC for their untiring effort and gracious hospitality as hosts of this meeting.

3) Resolved: That the Fourth District membership does here express its deep appreciation to D. Hiden Ramsey for his clear, masterful, and sympathetic exposition of some of radio's most pressing problems. Be it further resolved that our appreciation be also extended to the Asheville Citizen Times Company for its generous cooperation.

4) Resolved: That the membership of the Fourth District of NAB extend its gratitude and appreciation to G. Richard Shafto for his unselfish devotion and his splendid contribution to the affairs and interests of his constituents in this District.

5) Resolved: That the membership of the Fourth District of NAB express to Honorable Ellison D. Smith, Senior Senator from South Carolina, sincere regret that illness precluded his attendance at this meeting, and resolved further, that we the members are deeply grateful for the sympathetic understanding of our problems so ably expressed in his address as delivered by Director Shafto.

Mr. Ramsey's Talk

Mr. Ramsey discussed the activities of the press in the field of community service and told the radio officials that they must consistently strive to associate their industry with local affairs if they are to make the public fully conscious of its value on the American scene.

"If you would take a leaf from the book of experience of newspapers, make a local imprint with your radio station. Newspapers long ago learned that people are most vitally interested in the things they know—that an American gets a lot more excited about a dog fight in the next block than he does about a famine in China," Mr. Ramsey said.

"Radio has been too cosmopolitan," he continued; "you have bragged too much about the programs you bring the

Neville Miller, *President* C. E. Arney, Jr., *Secretary-Treasurer*

Lewis H. Avery, *Director of Broadcast Advertising;* Walter L. Dennis, *Chief, News Bureau;* Willard D. Egolf, *Assistant to the President;* Howard S. Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Arthur C. Stringer, *Director of Promotion.*

NAB 4TH DISTRICT MEETS AT ASHEVILLE; CAMPBELL ARNOUX ELECTED DIRECTOR

(Continued from page 375)

people from New York; you have not had enough local interests; there has not been enough of continuous community service."

Mr. Ramsey said that the press long ago learned the truth of the expression, "Eternal vigilance is the price of liberty," and stated that the threat to the freedom of radio will not be lifted with the passing of certain individuals or groups from high places in public life.

"Efforts to take away this freedom are not peculiar to this administration or this generation," Mr. Ramsey said. "To give men long periods of power is to make men despotic. Even Thomas Jefferson, who had done more than any other man in behalf of freedom of the press up to his time, wondered at one time whether or not the press should be regulated.

"The decision which gave rise to grave fears for the freedom of radio was not a decision of Mr. Frankfurter, it was a decision of the supreme court of the United States. It is not only Mr. Fly who is going to carry out this decision; it will be other officials in the years that are to come."

Mr. Ramsey ended his address by warning his hearers that "there can be no secure independence for the individual unless you have government by law and not by men."

The speaker had referred to the supreme court decision of last May 10 which held that the Federal Communications Commission had power to regulate, under the present communications act, not only the frequency and power assignments of radio but also to regulate the composition of the traffic, or programs.

Broadcasters and guests who attended the 4th district meeting are: Irvin G. Abeloff, WRVA; Edward A. Allen and Mrs. Allen, WLVA-WBTM-WSLS; Campbell Arnoux, WTAR; W. E. Bray, WMRC; Harry Bright and Mrs. Bright, WGBR; Stanley H. Brown, WRAL; Carl Burkland and Mrs. Burkland, WTOP; Leonard Callahan, SESAC; Ollie L. Carpenter, WPTF; Charles Crutchfield, WBT; Don S. Elias and Mrs. Elias, WWNC; Harold Essex and Mrs. Essex, WSJS-W41MM; W. C. Ewing, WFNC, and Francis Fitzgerald, WSOC.

Fred Fletcher, WRAL; R. A. Furr, WIS; Earl Gammons and Mrs. Gammons, WTOP; Mahlon A. Glascock, WRC; James A. Hagan and Mrs. Hagan, WWNC; Wilbur M. Havens, WMBG; Carl Haverlin, BMI; Grady Hipp, WIS; Herman Hipp, WIS; W. Russ Holt, WOLS; Cecil B. Hoskins and Mrs. Hoskins, WWNC; Walter Huffington and Mrs. Huffington, OWI; W. C. Irwin, WSOC; J. F. Jarman, WDNC; R. A. Jolley, WMRC; Alice Keith, National Academy of Broadcasting; Herbert Kendrick, WJLS, and Frank Kesler, WDBJ.

Peter Kettler, WMMN; J. W. Kirkpatrick, WSPA; C. Y. Langlois, Lang-Worth; Ezra McIntosh and Mrs. McIntosh, WWNC; Richard H. Mason, WPTF; Neville Miller, NAB; Robert E. Mitchell, WMBG; Durham Moore, WRAL; R. S. Morris, WSOC; Paul Moyle, WFNC; John New, WTAR; Edwin Otis, MBSE; Royal Penny, WBT; Lieut. Graham Poyner, Navy public relations; John M. Rivers, WCSC; Odes E. Robinson and Mrs. Robinson, WCHS, and J. D. Saumenig, WIS.

G. Richard Shafto, WIS; G. O. Shepherd, WAYS; George W. Smith and Mrs. Smith, WWVA; Carleton Smith, WRC; Stewart Spencer, WPTF; Sol Taishoff and Mrs. Taishoff, *Broadcasting;* Harold H. Thoms and Mrs. Thoms, WAYS; Zeno Wall, Jr., and Mrs. Wall, WWNC; Jonas Weiland, WFTC; E. S. Whitlock, WRML; Bevo Whitmire, WFBC; A. D. Willard, WBT; Easton Woolley, NBC, and T. Doug Youngblood, WFIG.

MEETINGS NOTICE

James W. Woodruff, Jr., WATL, as director of the NAB 5th district, will be host to and will preside over the 5th district meeting at Atlanta, Georgia, September 10 (today).

Willard D. Egolf, NAB assistant to the president, will represent NAB and will discuss new radio legislation, the latest developments in manpower, materials, etc., in Washington and public relations. John Outler, WSB, will describe the Retail Promotion Plan presentation.

Mr. Egolf will also attend the Florida Broadcasters Association meeting September 12 at Jacksonville.

RADIO NEWS COMMITTEE APPOINTED; TO MEET IN NEW YORK WITH P.R. GROUP

Neville Miller has completed appointments to the newly-formed NAB Radio News Committee and has announced that this committee will meet with the NAB Public Relations Committee at the Waldorf-Astoria hotel in New York City September 15-16.

Committee personnel is: Karl Koerper, managing director, KMBC; William Dowdell, news editor, WLW; Tom Eaton, news editor, WTIC; Rex Howell, manager, KFXJ; L. Spencer Mitchell, WDAE; Paul White, director of news broadcasts, CBS, and Bill Brooks, director of news and special events, NBC. Walt Dennis, NAB news bureau chief, will serve the committee as secretary.

The News committee will meet jointly with the Public Relations committee the opening session Wednesday and at the luncheon that day to which the Association of Radio News Analysts members have been invited. Major George Fielding Eliot, ARNA president, and H. V. Kaltenborn will make brief talks.

The News committee will convene separately Wednesday afternoon and will hear Charter Heslep, radio division, Office of Censorship, speak on "After 12,000 Newscasts," and Russell Hogin, division of information, War Production Board, on "A Government Press Agent Looks at Radio News."

Thursday's sessions will be taken up with discussions on standards of newscast handling; recognition of the medium, its news and its personnel; radio and its own news; editorializing on the air and the future of radio news.

Bruce Robertson, associate editor of *Broadcasting* magazine, will address the Thursday luncheon of the News committee on "News of Radio Within the Industry."

Principal business of the Public Relations committee sessions will be discussion of the NAB public relations working plan, in preparation by Willard Egolf, NAB assistant to the president, since last June, and hearing of reports concerning the activities of Mrs. Dorothy Lewis, NAB coordinator of listener activity. The committee also will discuss NAB participation in the Peabody Awards during the coming year.

Edgar Bill, WMBD, is chairman of the Public Relations committee and Mr. Egolf is secretary.

FCC DENIES CIO PETITION

The CIO petition to intervene in the hearings on the BLUE network transfer (see pp. 367-68-69 NAB "Reports") was denied without prejudice by the Commission last week.

CIO in a long bill of particulars charged the radio industry with being unfair to labor in restricting labor's use of radio facilities on either a free or commercial basis. The petition asked FCC permission to bring these charges, which named NAB, before the hearings. FCC refused, but said CIO could appear with any matters relevant to the BLUE network transfer.

REVISED RESOLUTION AGAINST HITCH-HIKES

The following resolution, passed by the 2nd district NAB meeting in Syracuse, is a revised issue of the one which appeared on page 361 of the NAB "Reports," Aug. 27, 1943:

"WHEREAS, the so-called hitch-hike and cow-catcher announcements presently used on Network, National Spot and Local commercial programs tend to lower the standards of good radio broadcasting, because they are a confusing annoyance to the radio listener, and,

"WHEREAS, the use of such announcements are considered to be incompatible with the responsibility placed upon radio station licensees to operate in the "public interest, convenience and necessity," and,

"WHEREAS, the use of such announcements is a growing concern to the Radio industry,

"NOW THEREFORE BE IT RESOLVED that Kolin Hager, chairman of the second district of the NAB, is instructed to advise the Board of Directors of the NAB of their views and request said Board of Directors to include this subject of hitch-hike and cow-catcher announcements on the agenda of the next National Convention of the NAB. Mr. Hager is further instructed by this resolution to request the NAB offices to inform, by adequate means, other districts of this resolution to the end that said districts may take whatever action on the subject which they deem advisable. Should the National Convention pass a resolution similar to this one, it is suggested that such resolution be brought to the attention of all advertising agencies, advertisers, networks and others engaged in the planning, production and presentation of commercial radio programs."

HORSE BETTING RACKET

The old "place-a-bet" racket, familiar in many industries, is getting into the radio industry, according to a report furnished NAB by an alert broadcaster.

Here's the operation: Someone purporting to be a well-known broadcaster, or a friend of a w.k. broadcaster, will arrive in a town and call a station manager and say: "I'm a friend of Ted Husing" or "your friend, Benny, told me to look you up when I got here and as I'm a stranger, will you do a little favor for me . . . etc."

The "favor" is for the station manager to place bets on some horses for the visiting fireman. If the horses win, the station manager is to send the check or checks to a certain address by mail; if the nags lose, the fireman will send a check to the station manager—*but he never does.*

If you get a call on this subject, the best answer is "no, I don't bet on horses, I just eat them."

Fortune Reprint

The *Fortune* magazine reprint of the article "The Promise of Television" has been received at NAB headquarters and will be sent all NAB members next week (Sept. 17).

USES TO RECOMMEND DEFERMENTS

Instructions for referring to the United States Employment Service of cases involving selective service registrants engaged in critical occupations in war production or a war supporting activity were issued September 1, 1943, by the Selective Service Bureau of the WMC. The cases would be referred before the registrants affected are ordered to report for induction.

Under this procedure the USES may recommend that a registrant be deferred in his present employment or place him in more essential production. Broadcast occupations listed as critical are set forth in NAB Selective Service Handbook Supplement No. 13. This new regulation is fully covered by NAB Selective Service Supplement No. 14, mailed with this issue of the NAB "Reports."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 13. They are subject to change.

Monday, September 13

To Be Heard Before Commissioner Durr

WNYC—City of New York Municipal Broadcasting System, New York, N. Y.—For special service authorization; **830 kc.,** 1 KW, 6 a. m. to 10 p. m.; directional antenna.

Wednesday, September 15

Oral Argument Before the Commission

WCOP—Massachusetts Broadcasting Corporation, Boston, Mass.—C. P., **1150 kc.,** 1 KW, DA-night, unlimited.

Thursday, September 16

Further Hearing

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Copartners, d/b as Red Lands Broadcasting Association, Lufkin, Tex.—Renewal of license, **1340 kc.,** 250 watts, unlimited.

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Copartners, d/b as Red Lands Broadcasting Association (Assignor).—Voluntary assignment of license, **1340 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WLOL—Beatrice L. Devaney, Executrix of Estate of John P. Devaney, David J. Winton, and Charles J. Winton, Jr. (Transferor), Ralph L. Atlass (Transferee), Minneapolis, Minn.—Granted consent to acquisition of control of Independent Merchants Broadcasting Co., licensee of station WLOL, by Ralph L. Atlass (transferee), from Beatrice L. Devaney, Executrix of the Estate of John P. Devaney, David J. Winton, and Charles J. Winton, Jr. (transferors), for a total consideration of $6,319 (B4-TC-324).

National Broadcasting Co., Inc., New York City.—Granted extension of authority to transmit recorded programs to all broadcast stations under the control of the Canadian authorities that may be heard consistently in the United States (B1-FP-115). Granted extension of authority to transmit programs to Stations CBM and CBL and other stations under the control of the Canadian Broadcasting Corp. (B1-FP-116).

KFI—Earl C. Anthony, Inc., Los Angeles, Cal.—Adopted an Order (1) granting the petition for reconsideration filed by KFI directed against the action of the Commission granting the application of Iowa State College of Agriculture and Mechanic Arts (WOI), Ames, Iowa, for special service authorization to operate on **640 kc.** from 6 a. m. to local sunrise, CST, with 1 KW power, for the period ending February 1, 1944; (2) set aside said action; and (3) designated the application for hearing upon specified issues. The Commission further ordered that Earle C. Anthony, Inc. (KFI), Los Angeles, be made a party to such hearing.

DOCKET CASES

The Commission adopted a Decision and Order (B-190) granting application of O. R. Richardson, Fred L. Adair and Robert C. Adair, d/b as Radio Station WJOB (WJOB), Hammond, Ind., for a construction permit to make changes in transmitting equipment and increase operating power on **1230 kc.** from 100 watts to 250 watts, unlimited time.

* * *

At the same time the Commission adopted an Order (B-174) granting application of WIBC, Indiana Broadcasting Corp., Indianapolis, Ind., for construction permit to make modifications in the equipment of Station WIBC (which is now authorized to operate with 1 KW power night, 5 KW day), for operation of the station with 5 KW power, unlimited hours, employing a directional antenna during nighttime hours, subject to the express conditions that (a) objectionable interference will not be caused to the secondary nighttime service of Station CBA, Sackville, N. B., within the terms of the North American Regional Broadcasting Agreement, and (b) that as soon as materials become available or upon notice from the Commission the permittee will provide and install equipment necessary to comply in all respects with the Standards of Good Engineering Practice.

* * *

In another action, the Commission adopted Proposed Findings of Fact and Conclusions (B-189) granting application of WGAR, The WGAR Broadcasting Co., Cleveland, Ohio, for construction permit to change frequency from **1480** to **1220 kc.**, increase nighttime power from 1 to 5 KW, make changes in directional antenna for nighttime use, and move transmitter site locally. This grant is subject to condition that (a) applicant shall take whatever steps are necessary to improve the signal of WGAR over the Cleveland business district to comply with the Commission's Rules and Regulations when materials and equipment again become available for construction of broadcast facilities; and (b) that applicant shall submit proof that the proposed radiating system is capable of producing a minimum effective field of 175 mv/m at one mile for 1 KW power (or 392 mv/m for 5 KW power).

Contingent upon the above action on the WGAR application a grant of construction permit was also made to WHBC, The Ohio Broadcasting Co., Canton, Ohio, to make changes in transmitting equipment, install directional antenna for nighttime use, change frequency from **1230** to **1480 kc.**, and increase power from 250 watts to 1 KW.

At the same time the application of WADC, Allen T. Simmons, Talmadge, Ohio, to use the **1220 kc.** channel, increase power to 50 KW, and move transmitter site locally was denied. This station now operates on **1350 kc.** with 5 KW, unlimited time, using directional antenna both daytime and nighttime.

* * *

The Commission in a fourth action adopted Proposed Findings of Fact and Conclusions (B-188) denying without prejudice the application of United Broadcasting Co., WHKC, Columbus, Ohio, to change frequency from **640** to **610 kc.**, increase power from 500 watts to 1 KW, and hours of operation from limited to unlimited time, relocate transmitter site, and install directional antenna for nighttime operation.

This action is in conformity with the policy announced by the Commission in its Memorandum Opinion of April 27, 1942, with respect to use of critical materials during the war period.

DESIGNATED FOR HEARING

WFTL—Ralph A. Horton (Assignor), The Fort Industry Co. (Assignee), Fort Lauderdale, Fla.—Designated for hearing application for assignment of construction permit and license of broadcast station WFTL and license of relay stations WAAD and WRET, from Ralph A. Horton to The Fort Industry Co. (B3-APL-15; B3-ALRY-16; B3-ALRE-27).

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Designated for hearing application for license to cover construction permit (for change in frequency from **1400** to **710 kc.**, increase in power from 250 watts to 10 KW, install new transmitter and directional antenna for night use, and move transmitter) and authority to determine operating power by direct method (B3-L-1755; B3-Z-1500).

WFTL—The Fort Industry Co., Fort Lauderdale, Fla.—Designated for hearing application for modification of license to move main studio from Fort Lauderdale to Miami, Fla. (B3-ML-1163).

LICENSE RENEWALS

Granted renewal of license of following stations for the period beginning October 1, 1943, and ending not later than October 1, 1945:

KEUB, Price, Utah; KFAM, St. Cloud, Minn.; KORE, Eugene, Ore.; WCHV, Charlottesville, Va.; WFMJ, Youngstown, Ohio; WGL, Fort Wayne, Ind.; WGOV, Valdosta, Ga.; WHDL, Allegany, N. Y.; WHMA, Anniston, Ala.; WKIP, Poughkeepsie, N. Y.; WMVA, Martinsville, Va.; WNAB, Bridgeport, Conn.; KDNT, Denton, Tex.; KGFF, Shawnee, Okla.; WASK, Lafayette, Ind.; WLEU, Erie, Pa.; WHIT, New Bern, N. C.; WHLN, Harlan, Ky.; WHLS, Port Huron, Mich.

KIUL—Garden City Broadcasting Co. (Homer A. Ellison and Frank D. Conrad), Garden City, Kans.—Granted renewal of license for period ending not later than April 1, 1945 (B4-R-848).

WHDF—Upper Michigan Broadcasting Co., Calumet, Mich.—Granted renewal of license for period ending not later than August 1, 1945 (B2-R-750).

MISCELLANEOUS

Congress of Industrial Organizations (CIO).—Referred to the Commission petition to intervene in re the application of Radio Corp. of America (Transferor) and American Broadcasting System, Inc. (Transferee), for consent to the transfer of control of Blue Network Company, Inc., licensee of Stations WJZ, New York, WENR, Chicago, and KGO, San Francisco, and 48 relay broadcast stations (Docket 6536).

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Granted modification of construction permit which authorized increase in power and DA for night use, for extension of completion date to 11-7-43 (B4-MP-1722).

WGOV—E. D. Rivers, Valdosta, Ga.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1539).

W6XLA—Television Productions, Inc., Los Angeles, Cal.—Granted modification (B5-MPVB-104) of construction permit for new television relay broadcast station, for extension of completion date only, from September 1 to November 1, 1943.

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Adopted Decision and Order denying petition for rehearing filed by Arkansas Broadcasting Co. (KLRA), directed against the action of the Commission granting the application of Baylor University and Carr P. Collins for a construction permit for new broadcast station in Corpus Christi, Tex.

National Broadcasting Co., Inc.—Denied petition for modification of Regulation 3.104.

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Granted petition to dismiss without prejudice application for construction permit to increase power to 5 KW on **970 kc.,** unlimited time.

Ira Chase Koehne as a creditor and in behalf of all other creditors of Blue Network and as Counsel for Petitioning Creditors.—Denied without prejudice petition to intervene in the matter of Radio Corp. of America (Transferor) and American Broadcasting System, Inc. (Transferee), applicants for consent to transfer of control of Blue Network Company, Inc., licensee of Stations WJZ, New York, WENR, Chicago, KGO, San Francisco, and 48 relay broadcast stations.

The American Network, Inc.—Referred to the Commission petition to intervene in re application of Blue Network transfer of control.

APPLICATIONS FILED AT FCC

740 Kilocycles

KTRH—KTRH Broadcasting Co., Houston, Tex.—Authority to determine operating power by direct measurement of antenna power in accordance with terms of above authorization.

KTRH—KTRH Broadcasting Co., Houston, Tex.—Special service authorization to operate on **740 kc.,** with power of 50 KW day and 25 KW night, employing a temporary directional antenna at night, for the period ending 2-1-44.

950 Kilocycles

KPRC—Houston Printing Corp., Houston, Tex.—Special service authorization to operate with power of 2½ KW night and 5 KW daytime, employing temporary non-directional antenna, for the period ending 8-1-44.

KPRC—Houston Printing Corp., Houston, Tex.—Authority to determine operating power by direct measurement of antenna power under terms of above application for special service authorization.

1240 Kilocycles

WTAX—WTAX, Inc., Springfield, Ill.—Authority to determine operating power by direct measurement of antenna power.

1250 Kilocycles

WDAE—Tampa Times Company, Tampa, Fla.—Special service authorization to operate on **770 kc.,** with power of 5 KW, unlimited time, employing directional antenna at night, for the period ending 8-1-44.

1400 Kilocycles

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—License to cover construction permit (B1-P-3530) which authorized installation of new transmitter.

1450 Kilocycles

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Authority to determine operating power by direct measurement of antenna power.

WMVA—Martinsville Broadcasting Co., Inc., Martinsville, Va.—Modification of license to change location of the main studio to E. of State Highway Route No. 108, 1.3 miles north of Martinsville, Va.

WGPC—J. W. Woodruff and J. W. Woodruff, Jr., d/b as Albany Broadcasting Co., Albany, Ga.—Construction permit to change frequency from **1450 kc.** to **1490 kc.** and move transmitter and studio from Albany, Ga., to West Point, Ga.

KWBW—William Wyse and Stanley Marsh, d/b as The Nation's Center Broadcasting Co., Hutchinson, Kans.—Voluntary assignment of license to William Wyse, Stanley Marsh and Bess Wyse, d/b as The Nation's Center Broadcasting Company.

MISCELLANEOUS APPLICATIONS

NEW—The Times Herald Company, Port Huron, Mich.—Construction permit for a new high frequency (FM) broadcast station to be operated on **47,700 kc.,** with coverage of 5,600 square miles.

NEW—Mutual Broadcasting System, Inc., Chicago, Ill.—Authority to transmit programs to Mexican stations known as "Radio Mil's Network."

FEDERAL TRADE COMMISSION DOCKETS

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Detroit Soda Products Company, Wyandotte, Mich., packing and distributing a baking soda (bicarbonate of soda) designated "Crystal Brand Baking Soda," recommended for use in the treatment of and as a remedy for various human ailments, and Aarons, Sill & Caron, Inc., Architects Bldg., Detroit, an advertising agency that has acted as agent in the dissemination of advertisements of the preparation, are charged in a complaint. (5037)

Ox'o-Gas Company, Palisades Park, N. J., selling and distributing a solution designated "Ox'o-Gas" for mixing or blending with gasoline, is charged in a complaint with misrepresentation. Under the name "Ox'o-Gas," he also has sold gasoline mixed with the solution. (5040)

Trans-Pac Services, Inc.—Misrepresentations of the therapeutic value of a medicinal preparation known as "OCA" and "OCA Pinkovels" is alleged in a complaint against Trans-Pac Services, Inc., 233 West 14th St., New York, which sells the product, and Dorland International, Rockefeller Center, New York, the advertising agency which aids in the preparation and dissemination of advertisements of the preparation. (5039)

Wyeth Chemical Co., Jersey City, N. J., selling and distributing a medicinal preparation designated "Hill's Cold Tablets," and Hill Blackett and Glen Sample, trading as Blackett-Sample-Hummert, 221 No. La Salle St., Chicago, an advertising agency employed by the Wyeth Chemical Co., are charged in a complaint with misrepresentation and false advertising in radio continuities and in advertisements in newspapers, magazines and other periodicals. (5038)

CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Crescent Yarns, Mascher St. and Allegheny Ave., Philadelphia, selling and distributing knitting yarns, has stipulated to cease and desist from use of the word "Saxony" or any other word or words connoting any foreign geographical origin as a designation for or as descriptive of a product not imported from or made of materials imported from the country or locality indicated by the geographical designation or term. (3713)

Fogel Refrigerator Co., 5400 Eadom St., Philadelphia, and selling and distributing refrigerators and refrigerating units, has stipulated to cease and desist from use of the words "Lifetime Vision" or other word or words of like meaning as descriptive of their refrigerator cases; from representing that purchasers of the units are afforded unlimited protection, or any protection in excess of that actually provided, against display case worries such as fogging or sweating of glass fronts or other factors deterrent to clear vision; and from use of the words "Insurance Policy," or other words of like meaning, as a designation for or descriptive of an undertaking under the terms of which they agree to replace glass or other parts of such refrigerators for a consideration. (3714)

Gantner-Williams, Inc., Golf, Ill., entered into a stipulation to cease and desist from certain misrepresentations in connection with the sale of a device designated "Auto-Serv Kleenex Dispenser," designed to dispense Kleenex tissues in automobiles. (3711)

Hanovia Chemical & Manufacturing Co., Chestnut St. and New Jersey Railroad Ave., Newark, N. J., has entered into a stipulation to cease and desist from misrepresentation in the sale of its Hanovia Alpine Sun Lamp, advertised as having curative properties and as being safe for unsupervised home use. (3708)

George V. Harnetty, P. O. Box 1736, San Diego, Calif., selling a publication designated "My Own Story of My Diabetes," has stipulated to cease representing that by reading the publication a person "can learn a cure for diabetes." He further agrees not to publish or cause to be published any advertisement concerning the publication which fails to reveal the material fact that the treatment referred to in the advertisement involves the use of a chemical or drug which will have irritant effects and may seriously interfere with the proper functioning of injured or diseased kidneys, and that its prolonged use may injure kidneys that are normal. (03136)

Hy-Grade Fur Corp.—A stipulation to cease and desist from misrepresentations in the sale of fur garments has been entered into by Hy-Grade Fur Corp., Baltimore. (3709)

National Retailer-Owned Grocers, Inc., Merchandise Mart, Chicago, selling dry dog food preparations designated "Roxey Dog Food Mix," "Roxey Dog Food," in kibbled and meal form, and "Roxey Rations Dog and Cat Food Meal," and referred to generally as "Roxey Brand Dog Food," has stipulated to cease and desist from representing that the products contain meat or beef, or causing to be published or disseminated any testimonials containing any representations contrary to the foregoing agreement. (03137)

Permaflex Products Co., 1844 North Front St., Philadelphia, selling a mastic preparation designated "Permaflex," has stipulated to cease and desist from representing that the product is wearproof or the only hard mastic. (03138)

Religious House and M. B. Waterman & Co., Not Inc., 333 So. Market St., Chicago, selling certain religious articles, has stipulated to cease and desist from representing that a crucifix advertised by him is hand-carved. (03139)

San-Nap-Pak Manufacturing Co., Inc., 144 Broadway, New York, stipulated that, in connection with the sale of the sanitary tissue napkins it manufactures, it will discontinue representing by means of statements or picturizations that their absorbency exceeds that of other reputable brands by an apparent 50 percent or in any degree not established by competent scientific evidence. The corporation also agrees to cease using any other unwarranted statement or representation which tends to discredit or disparage competitors or their products. (3710)

Schiff Bio-Food Products, 3265 Joy Road, Detroit, selling medicinal preparations, designated "Crysta-Jell" and "Reducers Skin Lotion," has stipulated to cease and desist from representing that Crysta-Jell will restore energy or health; preserve health, youth or appearance, cure obesity, satisfy hunger, or effect a loss of 3 to 4 pounds of weight per week or in any other definitely stated amount within any given period of time; that it contains no drugs or chemicals; that it is a vegetable gelatin compound or a vegetable concentrate; or that Reducers Skin Lotion will keep the skin firm. (03135)

Yarn Novelty Co., 42 North Ninth St., Philadelphia, selling and distributing knitting yarns, has stipulated to cease and desist from the use of the word "Shetland" or any other word of similar import as a designation for or as descriptive of any product not composed entirely of fibers from fleece of Shetland sheep grown on the Shetland Islands; provided, however, that in the case of a product composed in substantial part of such fiber, the word "Shetland" may be used as descriptive of the Shetland fiber content if there are used in immediate conjunction therewith, in letters of at least equal size and conspicuousness, words truthfully describing such other constituent fibers or materials; and from use of the words "Scotch," "Spanish," "Saxony" or other words connoting any foreign geographical origin as designations for or as descriptive of products not imported from or made of materials imported from the country or locality indicated by use of the geographical designation or term. (3712)

Petrillo Hearing Continued

Hearings before the panel of the War Labor Board continued on Thursday, September 9, when Mr. Socolow completed his presentation on behalf of the electrical transcription manufacturers. Mr. Padway, as counsel for the Union, thereupon requested and received an adjournment of one week to study the evidence before putting in the Union's case. The hearings are, therefore, expected to resume on Monday, September 20.

In addition to the completion of the transcription companies' case by Mr. Socolow, Mr. Milton Diamond made a statement on behalf of World Broadcasting System. In his presentation, Mr. Diamond said that the fact that the phonograph record cannot be controlled by the manufacturer and is used for any purpose which the purchaser chooses "presents a problem to us as manufacturers of records and we are not here in this proceeding as manufacturers of records . . . it presents a problem equally serious to the members of the American Federation of Musicians."

Mr. Diamond also said that the manufacturers of transcriptions should not be considered as record manufacturers at all but rather as rendering a service analogous to that of networks; and he thought that the relationship between transcription companies and the AFM should perhaps be re-evaluated in the light of the analogy.

Mr. Petrillo in response praised Mr. Diamond for asserting that the union had a problem in connection with the use of phonograph records and for his approach to this problem. Mr. Petrillo also threatened "that 160 radio stations in this country which have not employed musicians are going to employ musicians within the next 60 days. . ." Mr. Petrillo stated that he had received this information from the NAB, and he apparently was under the impression that the NAB had made public a list of 160 broadcasting stations affiliated with networks which did not employ musicians.

In this Mr. Petrillo is mistaken. The 160 stations to which he refers are actually 165 in number. These are the 165 stations which according to a survey made by the American Federation of Musicians are located in towns in which there is no local of the American Federation of Musicians. The NAB has never challenged this figure of 165 because the discrepancies between the NAB's information on this point and the union's acknowledged absence of locals is a minor one. With respect to network affiliated stations, Mr. Petrillo himself put into the record at the Senate hearing last January a list of 201 affiliated stations which he claimed did not employ union musicians.

In this connection it is of interest to note that on September 10, Judge Love of the Supreme Court of Monroe County in Rochester refused to grant WSAY a temporary injunction restraining the AFM from preventing Mutual and Blue from feeding to WSAY musical programs for so long as WSAY failed to employ a quota of musicians satisfactory to the local union.

FREC Meeting

A meeting of the Executive Committee of the Federal Radio Education Committee has been called by Chairman John W. Studebaker, United States Commissioner of Education, for Friday, September 17, at the Statler Hotel in Washington, D. C. This is the first under the new plan adopted in April to hold meetings semi-annually rather than quarterly for the duration, and to formalize them to the extent of having different members prepare papers on assigned topics.

A sub-committee was appointed by Chairman Studebaker to be responsible for the planning of programs. Made up of the Washington, D. C. members, the committee, under the chairmanship of Neville Miller, NAB President, comprises George P. Adair, Assistant Chief Engineer of the Federal Communications Commission, Willard E. Givens, Executive Secretary of the National Education Association, Rt. Rev. Msgr. George Johnson, Director, Department of Education, National Catholic Welfare Conference, with Gertrude G. Broderick serving as secretary.

At the opening session Friday morning, four members are expected to discuss the general topic *How Can Radio Be More Effective as an Aid to Teaching?* Dr. Lyman Bryson, Director of Education of CBS, will consider it from the angle of what the network broadcaster considers his responsibility to be in the planning of educational programs. Dr. Bruce E. Mahan, Director of Extension Division, State University of Iowa, will evaluate the efforts of the networks to develop programs from the standpoint of education. The use of radio by State departments of education will be reported by Dabney S. Lancaster, State Superintendent of Public Instruction, Virginia. Some of the extra-curricular uses of radio that might make it seem important in a school system that may not be giving attention to its use as a classroom teaching aid will be discussed by Rt. Rev. Msgr. George Johnson, National Catholic Welfare Conference.

The luncheon and afternoon sessions are to be given over largely to a discussion of *FM and Its Possibilities as an Education Aid.* Heading the discussion at the luncheon session will be James Lawrence Fly, Chairman, Federal Communications Commission, after which George P. Adair, Assistant Chief Engineer at the FCC will outline in detail the present utilization of the five channels reserved exclusively in the ultra-high frequency band for education. Harold B. McCarty, Director, Station WHA, University of Wisconsin, will discuss what FM will mean to the college-owned station and what the attitude of the National Association of Educational Broadcasters is toward the development of FM educational stations.

Each topic will be followed by discussion of what FREC's responsibility may be in connection with the problem under consideration.

A preliminary report of the FREC Sub-Committee to Study Post-War Problems in Educational Radio, will be presented by the chairman, Levering Tyson, President of

Muhlenberg College. This sub-committee was appointed at the April meeting of the committee and is made up of Judith C. Waller, Mid-West Educational Director of NBC at Chicago, George P. Adair, of the FCC, and Dr. Tyson.

OWI Shuffle

Palmer Hoyt, domestic director of OWI, announces a strengthening of organization and a realignment of personnel in his branch. "This realignment," Mr. Hoyt said, "will produce these results:"

"It will improve our effectiveness in serving the media of information and the war agencies of the government. It will strengthen control over our varied programs, so as to carry out the policies laid down by Congress. It will effect many economies, but we will get the maximum possible return out of every dollar and every man and woman on the job."

James Allen continues as Assistant Director, while Stephen E. Fitzgerald becomes Assistant Director in Charge of Operations. Donald Stauffer likewise continues as Chief of the Radio Bureau.

Among the functions which the Domestic Branch will continue to perform, according to Mr. Hoyt's statement, are to serve as a channel between war agencies and the radio industry; coordinate and allocate all government requests for radio time; prepare radio war messages; and clear government war radio programs.

The major cuts in OWI operations are the elimination of certain production activities, including radio transcriptions, and the elimination of field offices.

Public Relations and News Committees in Session

The NAB Executive Committee on Public Relations and the Radio News Committee held a joint session in New York on Wednesday (15) and are continuing in session at the time the REPORTS go to press. A complete statement of the discussions and conclusions reached will be given in next weeks NAB REPORTS.

BMI TOP TUNES

These songs are currently listed by VARIETY as being among those most played on the networks for the week of August 23:

"Do You Know"
"I Heard You Cried Last Night"
"Paper Doll"
"Things That Mean So Much to Me"
"Brazil—'Saludos Amigos'"
"I'm Thinking Tonight of My Blue Eyes"
"Pistol Packin' Mama"

Radio Backs National War Fund Campaign

Indicative of the widespread industry support to the forthcoming National War Fund is the list of industry men behind the guns on the Radio Committee. They are:

RADIO COMMITTEE

Neville Miller, President, NAB, chairman
Burridge Butler WLS, Chicago
Martin Campbell WFAA, Dallas
Carl M. Everson WHKC, Columbus, Ohio
Leo Fitzpatrick WJR, Detroit
Clarence T. Hagman WTCN, Minneapolis
Wiley P. Harris WJDX, Jackson, Miss.
Harold A. Lafount 730 Fifth Avenue, New York City
Miller McClintock, president, MBS
Clair McCollough WGAL, Lancaster
Paul W. Morency WTIC, Hartford
William S. Paley, President, CBS
Eugene Pulliam WIRE, Indianapolis
Harry Spence KXRO, Aberdeen
Major E. M. Stoer Hearst Radio, New York City
Niles Trammel, president, NBC
Lee B. Wailes KYW, Philadelphia
Lewis Allen Weiss, Don Lee Network
Arthur Westlund KRE, Berkeley
Mark Woods, president, Blue
Ed Yocum, KGHL, Billings

RADIO ADVERTISING COMMITTEE

The Radio Advertising Committee consists of:

Joseph R. Busk, Ted Bates, Inc., Chairman
Hubbell Robinson, Young and Rubicam
Cadwell S. Swanson, J. Walter Thompson Co.
S. Heagen Bayles, Ruthrauff and Ryan
Harold Wengler, H. M. Kiesewetter Agency
Maurice H. Bent, Blackett, Sample and Hummert

OFFICE OF WAR INFORMATION

OWI personnel engaged in the radio campaign are:

Herman S. Hettinger, deputy director, OWI
Donald D. Stauffer, chief, Domestic Radio Bureau
Philip H. Cohen, deputy, Domestic Radio Bureau
William Spire, chief, allocation section, Domestic Radio Bureau
John Hymes, chief, station relations

Jesse Butcher is director of the radio department of the National War Fund. Associates are: Rene Kuhn, Jane Moore, and Joan MacDonald.

A radio kit, dated Sept. 10 has been mailed all stations.

Fifth District Resolves on New Legislation

NAB Fifth District, meeting in Atlanta, Georgia, September 10, with James W. Woodruff, Jr., presiding, resolved that legislation was the greatest problem facing the radio industry, as follows:

"BE IT RESOLVED by the Fifth District of NAB:

1. That sound adequate basic legislation defining the rights and responsibilities of broadcasters and protecting the freedom of radio is the most important matter before the industry today.

2. That the Legislative Committee of NAB be instructed to proceed forthwith to prosecute the passage of such legislation through the White-Wheeler, Holmes or other bills which might prove, after adequate hearing and consideration, to be the best for the public and all interests of the industry.

3. That a Legislative Committee, composed of Harry Ayers of Anniston; Henry Johnston, Birmingham; Leonard

Reinsch, Atlanta; Walter Tison, Tampa, be appointed in the Fifth District to cooperate with the National Legislative Committee."

Discussion of the Petrillo situation resulted in a second resolution:

"A motion that this District go on record urging the Board of Directors and the Staff of the National Association of Broadcasters to prosecute with every means at their command methods to prevent the industry from being persecuted by any action of the American Federation of Musicians."

Addressing more than fifty registered delegates from Georgia, Alabama, and Florida, Willard D. Egolf, Assistant to the President, NAB, discussed the status of new legislation, the White-Wheeler bill, the Holmes bill and prospective hearings on both. Up to date reports on manpower, materials and selective service were also given. Many participated in the open discussions on all topics.

James W. Woodruff, Jr., appointed the following Legislative Committee: Thad Holt, WAPI, Birmingham, Ala.; Frank King, WMBR, Jacksonville, Fla.; Walter Tison, WFLA, Tampa, Fla.; and Red Cross, WMAZ, Macon, Ga.

Luncheon speaker, Lou Gordon, Director of Public Relations for the Citizens and Southern Bank, paid radio high compliments for its promotion of the sale of War Bonds and requested generous contributions of time and talent in the Third War Loan Campaign.

Florida Broadcasters Discuss ASCAP Law

The Florida Association of Broadcasters met in Jacksonville on Sunday, September 12, where Jack Hopkins, WJAX, assumed the office of President, following L. Spencer Mitchell, WDAE, Tampa, past incumbent.

Discussion of new radio legislation by Willard D. Egolf, NAB Assistant to the President, with additional remarks from the floor, was followed by passage of the resolution adopted by the Fifth NAB District in Atlanta two days previously, urging new laws. A report on manpower, materials, selective service and other phases of industry activities was also heard.

The afternoon session was devoted exclusively to a discussion of the Florida "anti-ASCAP" law, originally passed in 1937, which places prohibitions upon the operations of ASCAP, SESAC, AMP and BMI in that state. Further legislation was passed in 1939 and this year additional legislation was vetoed by the Governor.

Assistant Attorney General, John C. Wynn, explained the action of the Attorney General in filing a suit against these organizations for clarification of the law and his obligations as an enforcement officer, which the legislation prescribes. Action was taken by the Association to insure satisfactory conclusion to this and a suit previously filed by Palm Taverns, Inc., of West Palm Beach, in a "friendly" action against ASCAP.

Thirteen of the twenty members of the Association were present.

Technician Training

Three youngsters have just received first-class radiotelephone licenses and six others have received second-class radiotelephone licenses in Portland, Oregon. All completed training in the Benson Polytechnic School which is a division of the Portland Public Schools. William E. Richardson is head instructor, War Production Training, Radio School.

The boys and girls vary in age from sixteen to seventeen years according to word received by Howard S. Frazier, NAB director of engineering. Stations located in and around Portland that are interested in this group should communicate with Mr. Richardson.

Members of the group are:

FIRST-CLASS LICENSE:
John Backman
Lyle Eastlund
James Holland

SECOND-CLASS LICENSE:
Miss Susanna Johnson
Emmett Bernard
Leslie Smith
Richard White
Don Kerlee
Rudolph Peterson

FEDERAL COMMUNICATIONS COMMISSION

Fly on Broadcasting in the Public Interest

Discussing the transfer of the Blue Network at his press-radio conference on Monday, FCC Chairman James Lawrence Fly said that such an investigation gives the Commission a chance to look into questions which involve the broad general policies that fix the scope of broadcast operations. Fly said that it has to be borne in mind the necessity of having a broad general public service in radio, not a tendency to constrict and exclude, particularly in the field of public discussion, the presentation of views on important current issues, political, social and economic in character.

To the extent that broadcasting fails to meet that most important public need, to that extent it is deficient, Fly said. There seems to be something of a tendency in the industry generally to restrict and exclude rather than to lay down sound policies that will give us broader and more wholesome public service. He said: "It is time for the industry itself to take hold of this whole problem and see how opportunities can be made to render broader service and to agree on rendering more fundamental services. It is conceivable it may be the easiest way out to constrict and exclude, but it is not so clear that the easiest way out is the most constructive way."

To the extent that the industry might not "see the light," he was questioned, and the Chairman said "That would be a matter for the consideration of the Commission. It is something of a defensive complex, you know, that enters into this sort of thing, a tendency of the industry to avoid these vital questions on the public issues, to take refuge behind shibboleths rather than move out in a fundamental and vital way and grasp the issues and do something about rendering a public service in regard to them."

Continuing on this subject the Chairman said: "I rather suspect that if the present tendency continues, the overall utility of the broadcasting will tend to diminish from day to day, month to month, year to year, simply because of the ease of adopting restrictions and constrictive and exclusive measures. We seem to be simply sticking to the point that so long as an outfit is big enough and has some product to sell over a national network, it will get the time, and if not it won't get it. That's too easy a standard. Then, too, I would suppose it doesn't help that situation any where we permit that small restricted group to promote their own ideas and their own philosophies and press those upon the public's attention. You have that in a number of instances, which only accentuates the fact that you don't render a broad public service.

"I heard a so-called news program last night. It always is supposed to be a news program. Through the months it has been tending more and more to get away from the news of the day to the philosophies of the particular sponsor. Things like that are done in a somewhat subtle if not over-subtle manner. Only by careful listening do you discover that he is not giving you news or comment on the world news, but is peddling ideas to you from the company headquarters. Where ideas and ideals and philosophies are promoted they ought to be promoted openly, and in any case when they are promoted they should be counterbalanced by other presentations so that the public will have the benefit of both sides of the controversial issues."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 20th. They are subject to change.

Monday, September 20

Further Hearing

WOKO—WOKO, Incorporated, Albany, N. Y.—Renewal of license (Main and Auxiliary), **1460 kc.**, Main, 500 watts night, 1 KW day; Auxil., 500 watts, unlimited.

Further Hearing

To be heard before the Commission en banc in room 6121, New Post Office Bldg.

WJZ, WENR, KGO and 48 relay broadcast stations—Radio Corporation of America, (Transferor), and American Broadcasting System, Inc., (Transferee), New York, N. Y.—For consent to transfer of control of the Blue Network Co., Inc., Licensee of Radio Stations WJZ, WENR, KGO and 48 relay broadcast stations.

Thursday, September 23

To Be Heard Before Commissioner Durr

WNYC—City of New York Municipal Broadcasting System, New York, N. Y.—For Special Service Authorization, **830 kc.**, 1 KW, 6 a. m. to 10 p. m., directional antenna.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KROC—Agnes P. Gentling, Executrix of the Estate of Gregory P. Gentling, Deceased, (Transferor), Lawrence C. Miller, et al., Trustees (Transferees), Rochester, Minn.—Granted consent to transfer control of station KROC from Agnes P. Gentling, Executrix of the Estate of Gregory P. Gentling, Deceased, to Lawrence C. Miller, et al., Trustees of the estate of Gregory P. Gentling, Deceased. No monetary consideration is involved in this application, only a transfer of 2505.5 shares of stock from the Executrix to a Trusteeship, as provided in the will of the Deceased (B4-TC-326).

KRLH—Clarence Scharbauer, Deceased (Assignor), Millard Eidson, Independent Executor of his estate (Assignee), Midland, Texas.—Granted consent to involuntary assignment of license (B3-AL-379), of station KRLH from Clarence Scharbauer, Deceased, to Millard Eidson, Independent Executor of his Estate.

KRLH—Millard Eidson, Independent Executor of the Estate of Clarence Scharbauer, Deceased, Midland, Texas.—Granted renewal of license (B3-R-877).

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted petition to operate booster amplifier by remote control, waiving requirements of Sec. 2.53 of the Rules, subject to certain conditions.

MISCELLANEOUS

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1532).

W9XG—Purdue University, W. Lafayette, Ind.—Granted modification (B4-MPVB-103) of construction permit which authorized changes in equipment, frequencies, decrease in power and addition of aural channel using special emission for FM, for extension of completion date from 9-24-43 to 9-24-44.

WFLA—The Tribune Co., Tampa, Fla.—Granted request for oral argument and scheduled same for September 29, 1943, in re (B-184).

American Network, Inc.—Denied without prejudice to the right of petitioner to seek intervention in any future proceedings involving a change in the name of the operating company of the Blue Network Company, Inc., to the American Broadcasting System, Inc., or any similar name which would involve confusion with that of petitioner (Docket No. 6536).

WHDH—Matheson Radio Company, Inc., Boston, Mass.—Denied petition to correct existing station license so as to permit the operation of WHDH at night with a directional antenna after local sunset at Gainesville, Fla., instead of after local sunset at Boston, Mass.

WNYC—City of New York Municipal Broadcasting System, New York, N. Y.—Adopted order cancelling hearing scheduled for September 23, removed from the hearing docket and granted application for Special Service Authorization to permit station WNYC to operate until 10 p. m.

APPLICATIONS FILED AT FCC

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Modification of Construction Permit (B1-P-2868 as modified) which authorized increase in power, installation of new equipment and directional antenna for extension of completion date from 9-11-43 to 9-25-43.

1240 Kilocycles

KROY—Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney and Will Thompson, Jr., a partnership, d/b as Royal Miller Radio, Sacramento, Calif.—Voluntary Assignment of License to Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney d/b as Royal Miller Radio.

1400 Kilocycles

KRKO—The Everett Broadcasting Co., Inc., Everett, Wash.—Modification of License to increase power from 100 watts night, 250 watts daytime to 250 watts day and night.

1490 Kilocycles

NEW—L. J. Duncan, Leil A. Duncan, Josephine A. (Keith) Rawls, Effie H. Allen, d/b as Valley Broadcasting Co., West Point, Ga.—Construction Permit for a new standard broadcast station to be operated on **1490 kc.**, 250 watts, unlimited time.

MISCELLANEOUS APPLICATION

NEW—The Regents of the University of Michigan, Ann Arbor, Mich.—Construction Permit for a new Non-Commercial Educational Broadcast Station to be operated on **42900 kc.**, power of 1 KW and special emission for frequency modulation, unlimited hours of operation.

FEDERAL TRADE COMMISSION DOCKETS

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bell's Homeopathic Pharmacy, 222 Greenwich Street, New York, selling and distributing a preparation designated "Bell's Liquo Garlic," advertised as a competent treatment for ailments of dogs and cats, is charged in complaint with misrepresentation. (5043)

Benjamin Chaitt, Isaac Chaitt, Max Chaitt, and Mrs. Elizabeth Carl, conducting clothing stores in various cities, are charged in a complaint with violation of the Wool Products Labeling Act of 1939 and the Federal Trade Commission Act. (5041)

Mayo Brothers Vitamins, Inc., trading as Mayo Bros., 639 South Spring St., Los Angeles, and its officers, Irby L. Mayo, Oran Frank F. Mayo and Paul Murry, are charged in a complaint with falsely advertising that they are connected with the Mayo Clinic at Rochester, Minn., and that the medicinal preparations they sell are sponsored or produced by the Mayo Clinic. The complaint also alleges that they have misrepresented the therapeutic value of the preparations which are designated "May Bros. Vitamin B Complex," "Mayo Bros. Vitamin B1," and "Mayo Bros. Family Formula." (5044)

Motloid Company, Inc., and Wallace A. Erickson, 325 West Huron St., Chicago, engaged in the sale and distribution of a denture base designated "Moldent," are charged in a complaint with misrepresentation of the product. (5042)

Danville Engraving Company, 220 North Logan Ave., Danville, Ill., making, selling and distributing photo-engraving plates, is charged in the complaint with disparagement of competitors and misrepresentations of his products. (5045)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Barnes Advertising Agency, Marceline, Mo., selling and distributing calendars, has stipulated that, in soliciting the sale of or selling calendars or other printed, mimeographed or multigraphed matter in commerce, she will cease making use of any alleged samples of calendars or other material in any manner, the effect of which may tend to convey the belief that such so-called samples are representative of or actually are samples of the calendars or other material to be delivered to purchasers, when such articles of merchandise as delivered are not comparable with the samples in quality, workmanship, material, design and appearance. (3716)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Manhattan Brewing Company, 3901 Emerald Ave., Chicago, brewing and selling beer and ale, among which are brands designated "Canadian Ace Brand Beer," "Canadian Ace Brand Ale," and "Old Wisconsin Lager Brand Beer," has been ordered to cease and desist from misrepresentation in the sale of its products. (4572)

Modern Marketing Service, Inc., a purchasing organization with headquarters in Chicago, and a group of wholesale grocery firms for which it buys Red and White private brand foodstuffs and allied commodities, have been ordered to cease and desist from violation of the brokerage section of the Robinson-Patman Act. (3783)

FTC CASES CLOSED

The Federal Trade Commission has closed without prejudice two cases growing out of complaints which alleged violation of Section 2 (a) of the Robinson-Patman Act.

One complaint (4506) was against Callaway Mills, Lagrange, Ga., and the other (4744) against Tennessee Tufting Co., Nashville, Tenn. The respective respondents are engaged in the manufacture and sale of tufted bedspreads, bath mats, rugs and allied products.

The complaints alleged that the respondents, in the sale of products of like grade and quality to different purchasers, had discriminated in price by selling to some of their customers at prices lower than those at which they sold to other customers and by allowing certain purchasers rebates or discounts which were not granted to others.

WORLD PREMIER RETAIL PROMOTION COMMITTEE PLAN

WASHINGTON, D. C., OCTOBER 12

One Hundred and Sixteen Presentations Planned

Culminating over eighteen months of painstaking effort on the part of leaders in the retailing and radio field, the Retail Promotion Committee Plan is ready for debut. Chairman Paul W. Morency, under whose able leadership this ambitious undertaking has been carried out, has announced the Premier Showing for Washington, D. C., on Tuesday, October 12. Capital city stations participating in the plan have formed a committee headed by Carlton Smith, WRC; the other members being Carl Burkland, WTOP; Henry Seay, WOL; Ben Baylor, WMAL, and Bennett Larson, WWDC. This committee will join with representative Washington retailers in sponsoring the inaugural showing in the Congressional Room of the new Hotel Statler. Reaction to the preliminary announcement indicates widespread interest on the part of government officials and industry leaders and every indication points to a large attendance. This showing will set the pattern for one hundred sixteen presentations to be made in as many cities from coast to coast.

MC's Selected

From the ranks of the radio industry fifteen men have been picked to serve as masters of ceremony for the showings. These men will be carefully trained in their MC duties in two especially arranged schools, one to be held in Detroit the week of October 4 and the other in New York the week of October 11. These men are M. F. Allison, WIW-WSAI, Cincinnati; Lew H. Avery, NAB, Washington, D. C.; Harry Burke, WOW, Omaha, Nebraska; Donald D. Davis, WHB, Kansas City, Missouri; James Gaines, NBC, New York; Arthur Hull Hayes, WABC, New York; Kingsley F. Horton, WEEI, Boston; Walter Johnson, WTIC, Hartford, Connecticut; John Nell, WOR, New York; John M. Outler, Jr., WSB, Atlanta, Georgia; Clyde Pemberton, KFJZ, Fort Worth, Texas; William C. Roux, NBC, New York; Frank Webb, KDKA, Pittsburgh, Pennsylvania; Frank P. Wright, San Francisco Retail Radio Bureau; and E. Y. Flanigan, WSPD, Toledo, Ohio.

All cities in which Master Showings are to be made have been notified of the dates and as soon as confirmations are received a complete schedule will be made public. Meantime Chairman Morency has released a list of the cities to be covered:

The committee which has devoted much time and energy to the successful production of this plan to its present point of showing is, in addition to Chairman Morency, as follows:

Robert E. Bausman, WISH, Indianapolis, Ind.
Gene L. Cagle, Texas Star Network, Fort Worth, Texas.
Dietrich Dirks, KTRI, Sioux City, Iowa.
John Esau, KTUL, Tulsa, Okla.
James V. McConnell, NBC, New York, N. Y.
Kenneth K. Hackathorn, WHK-WCLE, Cleveland, Ohio.
Arthur Hull Hayes, WABC, New York, N. Y.
Walter Johnson, WTIC, Hartford, Conn.
C. L. McCarthy, KQW, San Jose, Calif.
John M. Outler, Jr., WSB, Atlanta, Ga.
Oliver Runchey, KOL, Seattle, Wash.
William Crawford, WOR, New York, N. Y.

Lewis H. Avery, NAB Director of Broadcast Advertising has served as secretary.

DECCA-WORLD MAKE A.F.M. SETTLEMENT

Decca Records, Inc. and World Broadcasting System, Inc. announced to the War Labor Board this week that they had concluded a contract with the A. F. of M. for a period ending December 31, 1948, and that the contract would be put in writing by Monday, September 27th.

Decca and World under the terms of the verbal arrangement began recording at once, although it is believed that the recordings so made cannot be released by the companies until the contract is actually signed.

A. Walter Socolow speaking on behalf of the remaining transcription companies urged that the men return to work simultaneously for the other companies so that World and Decca would not receive any undue advantage, but the Union opposed this request and the Chairman of the Panel reserved decision on it.

Although Decca and World refused to make the terms of their deal with the Union public at the Panel hearing, a press release distributed on behalf of these companies gave some of the essential terms. The release shows the following schedule of payments:

¼¢ on 35¢ records
½¢ " 50¢ "
¾¢ " 75¢ "
1¢ " $1 "
5¢ " $2 "

On library transcriptions 3% of the gross rental fee of the transcriptions. No payment is to be made on transcriptions used only once.

World and Decca announced that no part of these payments would be passed along to the consumer.

It is not yet clear whether the payment is to be made to the musicians who are actually employed by World and Decca, or directly to the Union itself. It will be remembered that the Statement of Principle to which all of the record and transcription companies including World and Decca subscribed on February 23, 1943, included a statement that the companies would not accept the principle of making payments directly to the Union. This Statement of Principle received the support of the last NAB Convention.

Mr. Socolow stated to the Panel of the War Labor Board that the other transcription companies which are party to the proceeding would not accept the principle of making payment directly to the Union and that if this were part of the contract they wanted the case to continue before the Panel upon its merits. The Chairman of the Panel has announced that the War Labor Board will continue its jurisdiction in the dispute and that if the terms of the deal between the Union on the one hand and World and Decca on the other are not made public on Monday, he will again entertain the motion of other companies that the strike be ended as to all companies.

Meanwhile, WOR Recording Studios, which was never a party to the proceeding, which is engaged solely in the manufacture of commercial transcriptions, has agreed to execute any contract with respect to commercial transcriptions that may be executed by World and has received the right to commence the manufacture but not the distribution of transcriptions at once.

An editorial with respect to the principles in the proposed contract which appeared in the *New York Times* of September 23rd is reprinted herewith:

Why Petrillo Wins

One of the phonograph record companies has succumbed in large part to Mr. Petrillo's demands. It has signed a four-year contract with him agreeing to pay fees on every record it sells, ranging from one-quarter of a cent on records selling for 35 cents to 5 cents on a $2 disk. It has still not been made entirely clear to whom these fees are to be paid. According to earlier reports they were to be paid to the musicians actually engaged in making the recordings. It was understood that the musicians, in turn, would be taxed by the Petrillo union to aid its unemployed members. Later reports, however, are that the fees will be paid by the record company direct to the union and not to the musicians making the disks.

Either of these arrangements would be unsound in principle, though the second would be the worse. In either case Mr. Petrillo would be levying a private tax—in one case on employers, in the other on members of his own union. The second arrangement would be unobjectionable if the members of his union were in fact as well as theory merely voluntary members free to remain with or to leave the union as they saw fit. But their membership is, in fact, obligatory. Through the irresponsible powers that Mr. Petrillo is free to exercise under existing law a musician, no matter how competent, can be effectively prevented from making a livelihood unless he is a member of the Petrillo union. Nevertheless, the membership of the union would presumably retain at least a nominal control over the funds that they were forced to turn into its treasury.

If the fees on record sales are to be paid directly to the Petrillo union, however, the resulting situation would be much worse. In that case Mr. Petrillo would be levying his private tax on employers. At best he would be administering a private system of unemployment relief. But there would be no public control whatever of the manner in which he used these funds. If only a small part of the funds actually went for paying unemployed musicians, if the bulk of them were used instead to increase the salaries or expense accounts of Mr. Petrillo and other union leaders, neither the record companies nor the consuming public that ultimately paid this private excise tax through higher record prices would have anything to say about the matter. If Mr. Petrillo can succeed in getting this principle established, he will render himself and his fellow union leaders financially independent even of the members of their own unions.

It would be lacking in clarity of thought to put the primary blame for the resulting situation either on Mr. Petrillo personally or on any record company that succumbs to his terms. The primary blame must be placed on the Administration and Congress, who, by their official labor policy, have placed in the hands of labor leaders the private irresponsible powers which enable them to drive such anti-social bargains.

HOUSE JUDICIARY COMMITTEE REJECTS DURR'S PETITION TO OUST H. I. C. CHAIRMAN COX

Asserting "no jurisdiction," and "no responsibility as a committee with reference to the subject matter," Representative Sumners, (D. Texas) Chairman of the House Judiciary Committee, this week made public his Committee's decision to reject F.C.C. Commissioner Durr's petition to oust Representative Cox (D. Georgia) as Chairman of the special House committee investigating the F.C.C. Durr's petition claimed "bias and personal interest."

Last May, Commissioner Durr directed his petition to Speaker of the House, Sam Rayburn (D. Texas), who referred it to the House Judiciary Committee. When Congress convened this month, Durr addressed himself directly to the Judiciary Committee, asking to be heard on the petition.

Durr's letter of September 14 charged that the procedures of the Cox committee "have more than confirmed my original feeling that an investigation by a committee created and staffed as this one is, could serve no purpose except to prostitute the investigatory powers of Congress."

Broadcast Advertising

LOCAL WAR ADVERTISING POOL

Community support is needed to insure the success of the various war campaigns to buy bonds, to combat the black markets, to fight inflation, to lessen absenteeism, etc. In a number of cities the media have joined together to raise a local war advertising pool by donations of space, radio time and money from local advertisers, which has been administered by a local committee which allocates the pool among the advertising media and among the various war campaigns in accordance with the campaign's importance under local community conditions. Such a plan has been very successfully operated by all media jointly in Cleveland and in some other cities.

Immediate Action Needed

Representatives of the War Advertising Council last summer worked on a proposal for a national plan which it was hoped could be put into operation in most of the cities of the country. However, announcement of a national plan has been abandoned, although the War Advertising Council still believes the plan is sound and would be helpful in all cities which could promote it. If such a plan is not in operation in your city, it is suggested that you give it serious consideration now, jointly with other media if possible, or separately if joint action is impossible.

Outline of Plan

Due to the fact that the NAB does not know the circumstances existing in each city, we are outlining a general plan which can be modified to fit local conditions.

Raising the Pool—Donations should be requested from local advertisers of advertising space, radio time and money. Assurances should be given that each donor will not be again solicited for support of war programs for a stated period.

Committee—A committee should be formed composed of community leaders. Radio and newspaper executives perhaps will have to take the lead, but local business executives from all branches of business should be included.

Allocation of fund—The local committee should allocate the pool among the local media participating.

Preparation and execution of the plan—The local committee should have charge of the preparation and execution of the plan. In many cities where the plan has been in operation, a local advertising agency has been retained to assume responsibility for the execution of the plan, working under direction of the local committee.

Campaigns—Food will be the subject of a national campaign in November, followed by anti-inflation in December. There will be local campaigns on absenteeism, womanpower, etc. Complete information on all these campaigns will be supplied by OWI.

Contact Your Local Newspaper

Rowan D. Spraker, representative of the National Editorial Association, on the War Advertising Council has just announced a plan similar to the one outlined above entitled "Small Community War Advertising Plan," which has been sent to the publishers of small community newspapers. This plan recommends joint action, stating:

"It should be emphasized in connection with each request that the plan is not the plan of any one group or of any one advertising medium, but that it is a *community* plan for community war advertising which should include the combined support of all business, agricultural and civic interests in the community."

Therefore, it is suggested you contact your local newspaper publisher, as it is believed that the plan will be more successful in most cities if all media join in the promotion of a joint plan.

Local Responsibility

This type of plan has operated successfully in many cities. However, its success depends upon action of the local executives of radio stations, newspapers and billboard companies. The OWI will continue to furnish complete information on all campaigns, but the raising of the pool, its allocation, the keying of the campaigns to local conditions and the execution of the plan depends upon action by the local committee.

The NAB will be glad to supply additional information and advice on request.

YOUNG & RUBICAM'S TRIBUTE TO MEDIA

Young & Rubicam will publish shortly full page advertisements paying tribute to the contribution to the war program made by newspapers, magazines and radio. These advertisements will appear in the *New York Times*, *Time*, *Newsweek*, *Fortune*, *Editor & Publisher* and *Broadcasting Magazine*. The tribute to newspapers will appear September 26, followed a week later by the tribute to magazines, and the following week by the tribute to radio.

Copies of advertisements will be sent to the respective media. All stations will receive a copy of the radio advertisement shortly after October 10. Watch for it as it will tell a story of which you will be proud and will want to retell in your own community.

NAB NEWS COMMITTEE TO WORK UP PROPOSED NEWS TRAINING CURRICULUM

(Released by NAB News Bureau)

Practical plans to assist schools and colleges to install courses in radio news technique and broadcasting is the first major undertaking of the newly-organized Radio News Committee of the National Association of Broadcasters, it was announced at the closing session of the Committee's first meeting here today.

Curricula already established in such centers of news education as Columbia and Northwestern Universities will be studied and educators will be consulted to expedite placing such courses in as many universities and schools as possible to help alleviate the serious personnel shortage in radio news bureaus.

The Committee, meeting at the Waldorf-Astoria hotel in a two-day session, heard Charter Heslep, radio division, Office of Censorship, in a talk entitled "After 12,000 Newscasts" offer the following comments on broadcast news operations:

1. Accuracy: copyreading of material to be broadcast is highly essential; complete authority of the news operation should be vested in the news editor.

2. Honesty: broadcasters should do away with phony buildups of news analysts; false labels of personnel and service; lack of credit lines on sources; overworking of the terms "bulletin" and "flash"; establishing of a 30-minute pre-broadcast deadline for "bulletin" material.

3. Integrity: there should be no sponsor "censorship" of news; controversial issues in line with the broadcast code should be played impartially and fairly; broadcasters should be alert to propaganda; time "chiselers" should be banned from the air.

4. Responsibility: news editors should be aggressive in asserting their rights and responsibilities; radio stations should provide the most complete coverage within their means; there should be more coverage of local news to establish a closer bond between the community and the radio station.

Heslep spoke his own opinions formed after monitoring more than 12,000 newscasts in the Office of Censorship in the last year.

Russell Hogin, division of information, War Production Board, talked on "A Government Press Agent Looks at Radio" and said radio is giving too much "what" treatment of news without the "why"—too much bulletin stuff and not enough detail and qualification. He recommended that radio continually experiment to find new techniques in news broadcasting to give the listener the fullest service possible.

In a joint luncheon the first day with the NAB Public Relations Committee, the Radio News Committee had as guests the Association of Radio News Analysts. Neville Miller, president of NAB, was toastmaster and H. V. Kaltenborn, ARNA vice president, talked briefly on the place of the news analyst in broadcasting.

Bruce Robertson, associate editor of Broadcasting Magazine, spoke at the second day's luncheon on "News of Radio Within the Industry" and discussed trade press news presentation and standards.

In considering problems of radio newscast operation and standards of news broadcasting, the Radio News Committee took no action at the initial meeting, preferring to hold over definite recommendations to the industry to the next meeting after due consideration of the material presented.

In considering the problem of editorializing on the air and the operation and functions of news commentators and analysts, the Committee took the following position jointly with the Public Relations Committee:

"Responsibility for all broadcasting, including talks by news analysts, rests and must continue to rest on individual station and network managements. The industry recognizes and accepts this responsibility and the Radio News Committee of the National Association of Broadcasters is certain that various management policies, however they may occasionally differ, are designed to further the public interest."

Members of the Radio News Committee are: L. Spencer Mitchell, WDAE, Tampa, Fla., temporary chairman; Paul White, director of news and special events, CBS; Bill Brooks, director of news and special events, NBC; Tom Eaton, news editor, WTIC, Hartford, Conn.; Rex Howell, manager, KFXJ, Grand Junction, Colo.; Bill Dowdell, news editor, WLW, Cincinnati, Ohio, and Walt Dennis, NAB news bureau chief, secretary. Karl Koerper, managing director, KMBC, Kansas City, Mo., chairman, was not able to attend.

P. R. COMMITTEE ADOPTS WORKING PLAN

(Released by NAB News Bureau)

A complete working plan of public relations for the radio industry was adopted by the Public Relations Committee of NAB at its two-day meeting in New York Sept. 15-16.

The "grass roots" policy of this Committee, announced after its first session in Chicago in April, finds concrete expression in the finished working plan, which calls for active participation of local station management.

A completed panel of District Public Relations Chairmen was presented to the Committee by Willard D. Egolf, NAB Assistant to the President, who perfected the details of the working plan. The panel was completed yesterday with the appointment of three more district chairmen, C. T. Hagman, WTCN, Minneapolis, (11); Mrs. G. M. Phillips, KIDO, Boise, Idaho, (14), and W. H. Summerville, WWL, New Orleans, Louisiana, (16). An outline of activities will be given all seventeen district chairmen in the immediate future.

"Under the plan adopted by the Committee," said Edgar Bill, WMBD, Peoria, Ill., chairman, following the meeting, "radio's place in American life will be asserted and substantiated wherever there are broadcast facilities."

Mrs. Dorothy Lewis, coordinator of listener activity for NAB, presented reports of her contemplated fall tour of twenty-two cities in the interest of radio's role in the war, as well as details of the organization of the Association of Women Directors of NAB, of which there are now more than 600 members.

Also present at the two day meeting, Committee members and district chairmen, were Leslie Joy, KYW, Philadelphia; Edgar H. Twamley, WBEN, Buffalo; Frank M. Russell, NBC, Washington; George Crandall, CBS, New York; Neville Miller, NAB President, Washington; Edward E. Hill, WTAG, Worcester; Michael R. Hanna, WHCU, Ithaca; George D. Coleman, WGBI, Scranton; Vernon H. Pribble, WTAM, Cleveland, and John W. Elwood, KPO, San Francisco.

EGOLF ANNOUNCES FULL LIST OF P. R. CHAIRMEN

Completed panel of district public relations chairmen for the 17 NAB districts as announced by Willard Egolf at the recent Public Relations Committee meeting in New York is as follows:

DISTRICT 1—Edward E. Hill, Director, Radio Station WTAG, Worcester Telegram Publishing Co., Inc., Worcester, Mass.

DISTRICT 2—Michael R. Hanna, Manager, Radio Station WHCU, Cornell University, Ithaca, New York.

DISTRICT 3—George D. Coleman, Radio Station WGBI, Scranton Broadcasters Inc., Scranton, Pennsylvania.

DISTRICT 5—W. Walter Tison, General Manager, Radio Station WFLA, The Tribune Company, Tampa, Florida.

DISTRICT 6—W. H. Summerville, Manager, Radio Station WWL, Loyola University, New Orleans, Louisiana.

DISTRICT 7—Vernon H. Pribble, Radio Station WTAM, 815 Superior Avenue, Cleveland, Ohio.

DISTRICT 8—Clarence Leich, Manager. Radio Stations WGBF-WEOA, Evansville on the Air, Inc., Evansville, Indiana.

DISTRICT 9—Edward E. Lindsay, Manager, Radio Station WSOY, Commodore Broadcasting Inc., Decatur, Illinois.

DISTRICT 10—Merle Jones, General Manager, Radio Station KMOX, Columbia Broadcasting System, St. Louis, Missouri.

DISTRICT 11—Clarence T. Hagman, Radio Station WTCN, Minnesota Broadcasting Corp., 115 East Grant Street, Minneapolis, Minnesota.

DISTRICT 12—Robert D. Enoch, General Manager. Radio Station KTOK, Oklahoma Broadcasting Company. Inc., Oklahoma City, Oklahoma.

DISTRICT 13—Karl O. Wyler, Manager, Radio Station KTSM, Tri-State Broadcasting Company, Inc., El Paso. Texas.

DISTRICT 14—Mrs. C. G. Phillips, Manager, Radio Station KIDO, Boise Broadcast Station, Boise, Idaho.

DISTRICT 15—John W. Elwood, General Manager. Radio Station KPO, National Broadcasting Company, San Francisco, California.

DISTRICT 16—J. G. Paltridge, Director of Public Relations, Earle C. Anthony, Inc., Radio Stations KFI-KECA. 141 North Vermont Avenue, Los Angeles, California.

DISTRICT 17—Harry Buckendahl, Radio Station KALE; KALE, Incorporated, Portland. Oregon.

Engineering

"RADIO TECHNICAL PLANNING BOARD" ORGANIZED BY NINE INDUSTRY AND SERVICE GROUPS

Nine industry and service groups have joined in organization of a "Radio Technical Planning Board" for studies to develop postwar radio services and products. Preliminary organization of the RTPB technical advisory group, which will formulate recommendations to the Federal Communications Commission and other organizations concerned, was effected at a meeting of the nine groups on September 15 at the Roosevelt Hotel, New York City. The organization plan for RTPB, sponsored and presented jointly by the Radio Manufacturers Association and the Institute of Radio Engineers, was approved unanimously by the initially invited "sponsors." These included, in addition to RMA and IRE, the following:

American Institute of Electrical Engineers
American Institute of Physics
American Radio Relay League
FM Broadcasters, Inc.
International Association of Chiefs of Police
National Association of Broadcasters
National Independent Broadcasters

Other sponsors are expected to later join RTPB for work on many technical projects, including utilization of the broadcast spectrum and systems, standardization for many public radio services, including television and frequency modulation.

The general plan for organization of RTPB, approved unanimously at the New York meeting on September 15, will be developed in detail at another meeting in New York on September 29. President Paul V. Galvin of the Radio Manufacturers Association and Dr. L. P. Wheeler, President of the Institute of Radio Engineers, have issued the invitation for the RTPB meeting on September 29 for detailed panel and other organization procedure.

Neville Miller and Howard S. Frazier will represent the National Association of Broadcasters.

MILLER CITED FOR MERITORIOUS SERVICE

Neville Miller, member of the National War Fund Committee, of which Winthrop W. Aldrich is President, has received a citation for meritorious service from the National War Fund "in behalf of those in our country's service, our valiant allies, and our neighbors at home. for his outstanding contribution to the 1943 National War Fund Campaign."

SHARP TO WPB RADIO AND RADAR DIVISION

Harold R. Sharp of Philadelphia has been appointed assistant director of labor of the WPB Radio and Radar Division. according to an announcement made Friday by Ray C. Ellis, director of the division.

Mr. Ellis has designated to Mr. Sharp responsibility within the division for handling labor problems, determining manpower needs in critical plants and areas, and securing appropriate inter-agency action to alleviate plant and community hindrance to the most effective use of available manpower. Mr. Sharp also will analyze individual plant manpower requirements upon request, in conjunction with Selective Service National Headquarters. advise regional WPB radio specialists on labor problems and make any necessary recommendations as to readjustment of production schedules.

RADIO TO PLAY PROMINENT PART IN UNITED CHURCH CANVASS

Final plans are nearing completion for the United Church Canvass, in which all churches and synagogues have been invited to participate.

Niles Trammel, president, National Broadcasting Company, is radio chairman and Neville Miller is NAB representative.

The eight practical results of the canvass, according to Mr. Trammel are:

1. Increased church attendance.
2. Cooperation of laymen.
3. Increased community interest in church affairs.
4. Good will between local churches.
5. Sharing of common problems.
6. Cooperation of the finance committees of the churches.
7. A spiritual revival of interdenominational unity and consecration.
8. Increased giving.

During October and early November local committees will increase the tempo of their activities to peak as Canvass Day approaches. It is recommended by the United Church Canvass committee that the local canvass take place between November 21 and December 12.

Partial List of Sponsors

Among the national sponsors are:

Charles E. Wilson, Washington, D. C., Chairman; Vice Chairman, War Production Board; former President, General Electric Company.

Judge Florence E. Allen, Cleveland.

Dr. Ferdinand Q. Blanchard, Cleveland, Moderator. Congregational Christian Church.

Dr. Paul H. Bowman, Bridgewater, Va., Moderator, Church of the Brethren.

Dr. John Stewart Bryan, Williamsburg, Va., President, William and Mary College.

Bishop A. R. Clippinger, Dayton, United Brethren in Christ.

Dr. Henry Sloane Coffin, New York. Moderator, Presbyterian Church in the U. S. A.

William H. Danforth, St. Louis. Chairman of the Board, Ralston Purina Mills.

David Davies, Newport, Ky.

Judge Hubert Delaney, New York, Court of Domestic Relations.

Dr. Harold M. Dodds, Princeton, N. J., President, Princeton University.

Bishop S. H. Gapp, Bethlehem, Pa., President, Moravian Church in America.

Dr. L. W. Goebel, Chicago, President, Evangelical and Reformed Church.

Mrs. Maurice L. Goldman, President, National Council of Jewish Women.

William Green, Washington, D. C., President, American Federation of Labor.

Bishop J. A. Hamlett, Kansas City, Kans., Colored Methodist Episcopal Church.

Judge William H. Holy, Chicago, United States District Court.

Herbert Hoover.

Dr. Douglas Horton, New York, Executive Secretary, Congregational Christian Church.

James L. Kraft, Chicago, President, Kraft-Phenix Cheese Corp.

Dr. John Howland Lathrop, Brooklyn, First Unitarian Congregational Society.

Herbert H. Lehman, New York, Director, Office of Foreign Relief and Rehabilitation.

Dr. C. E. Lemmon, President, Disciples of Christ.

Henry R. Luce, New York, Editor, "Time."

William G. Miller, Treasurer, Moravian Church in America.

George L. Morelock, Chicago, Executive Secretary, Board of Lay Activities of The Methodist Church.

John R. Mott, New York.

C. D. Pantle, St. Louis.

Mrs. Howard S. Palmer, New Haven, President, Women's American Baptist Home Mission Society.

Bishop W. W. Peele, Richmond, Chairman, Council of Bishops, The Methodist Church.

Rev. Jacob Prins, Grand Rapids, President, General Synod, Reformed Church in America.

Dr. William Barrow Pugh, Philadelphia, Stated Clerk, Presbyterian Church in the U. S. A.

Stanley Resor, New York, President, J. Walter Thompson Co.

Dr. Joseph C. Robbins, Newton Center, Mass., President, Northern Baptist Convention.

Hon. Owen J. Roberts, Washington, D. C., Justice of the Supreme Court.

Harl L. Russell, Marshalltown, Iowa, President, Council of Men's Work, Church of the Brethren.

Governor Leverett Saltonstall, Massachusetts.

Dr. Charles Seymour, New Haven, President, Yale University.

Harper Sibley, Rochester, N. Y.

Frank J. Sladen, M.D., Detroit, Chief Physician, Henry Ford Hospital.

Miss Cornelia Otis Skinner, New York.

Governor Charles A. Sprague, Oregon.

Former Governor Harold E. Stassen, Minnesota.

Paul Sturtevant, New York.

Charles P. Taft, Cincinnati, Assistant Coordinator, Federal Security Agency.

John H. Trent, New York, Vice President, Johns-Manville Corp.

Rt. Rev. Henry St. George Tucker, New York, Presiding Bishop, Protestant Episcopal Church.

Bishop Ernest Lynn Waldorf, Chicago, The Methodist Church.

Dr. Luther A. Weigle, New Haven, Dean, Yale Divinity School.

Judge Curtis B. Wilbur, San Francisco, U. S. Circuit Court.

Wendell L. Willkie, New York.

Dr. W. Bruce Wilson, Pittsburgh, General Secretary, United Presbyterian Church.

FREC EXECUTIVE COMMITTEE PLANS FUTURE ACTION

James Lawrence Fly, addressing the executive committee of the Federal Radio Education Committee in Washington last Friday, discussed the five educational channels that have been set aside by FCC in the ultra high frequency band for exclusive non-commercial broadcasting and urged that "educators actually get busy and fill them with educational stations." (Full text of Chairman Fly's speech may be found in Federal Communications Commission section.)

Harold B. McCarty, representing the National Association of Educational Broadcasters, took issue with Chairman Fly for adopting what he described as "scare tactics" but he was assured by both Chairman Fly and by George P. Adair, who later addressed the meeting on procedures for licensing an FM educational station, that there was no intention to do anything more than to try to create an awareness in the minds of educators throughout the country of the need for making plans now which will justify retention of the frequencies for educational use when pressure for them for commercial use is intensified.

Under the general topic, "How Can Radio Be More Effective as an Aid to Teaching?" Dr. Lyman Bryson, Director of Education of CBS, addressed the meeting from the angle of what the network broadcaster considers his responsibility to be in the planning of educational programs. Dr. Bruce E. Mahan, Director of Extension Division, State University of Iowa, evaluated the efforts of the networks to develop educational programs. The use of radio by State departments of education was reported by Dabney S. Lancaster, State Superintendent of Public Instruction, Virginia. Some of the extra-curricular uses of radio that might make it seem important in a school system that may not be giving attention to its use as a classroom teaching aid were discussed by the Rt. Rev. Msgr. George Johnson, of the National Catholic Welfare Conference.

Training Standards

The FREC, for many years, has published an annual list of colleges offering courses in radio but no attempt has been made to evaluate the courses. The need for some sort of evaluation of the work being done and the creation of standards for vocational training in radio as well as for teacher training courses, was regarded as a legitimate function of the FREC. The chairman was instructed to appoint a committee to develop a set of criteria for consideration at the next meeting of the committee.

The new network program-listing service for schools is to be launched late in September, when lists will be circulated to State Departments of education for re-circulation and promotion among city and county school systems.

Post-War Planning

Dr. Levering Tyson, heading the sub-committee for the study of post-war educational radio, made a brief report of his committee, which included (1) that steps be taken to guarantee the continuity of the FREC; (2) that the educational world in general be kept informed continuously and accurately through the FREC, of the technical developments in radio in relation to education, with particular emphasis at this time upon the utilization of FM facilities reserved exclusively for education; (3) that the FREC assist in the formation of local and regional radio councils and committees for the promotion of better understanding of the use of radio in the public interest; (4) that FREC continue its efforts to stimulate interest in the use of radio by teachers and to raise the standards of teacher training courses in colleges and universities; (5) that FREC study the financial implications of developing radio as an educational medium, and wherever possible to recommend adequate support for it by school administrators throughout the country.

The program for the meeting was planned by a subcommittee comprising the members residing in Washington, D. C., under the chairmanship of Neville Miller, NAB President. Members were guests of the NAB at luncheon at the Hotel Statler. Another meeting is slated for mid-December.

FEDERAL COMMUNICATIONS COMMISSION

Talk by James Lawrence Fly, Chairman, Federal Communications Commission, before the Luncheon Session of the Executive Committee of the Federal Radio Education Committee, September 17, 1943, Hotel Statler, Washington, D. C.

When your Chairman, Commissioner Studebaker, asked me to have lunch with you this noon and to address you on educational FM radio stations, I told him that I would be delighted to have the lunch, but as for a talk afterward, I had only one thing to say. "Say it," was the reply.

Now I find that George Adair, the assistant chief engineer of the F.C.C. is to follow me on the program at 2:30 this afternoon, and that he has a great deal to say about FM and radio in education. So I want to get my word in edgewise here, and leave the rest of the subject to George.

My own single thought can be briefly stated. Following a prolonged struggle, which began long before the present Federal Communications Commission was set up, the present Commission has found it possible to set aside five educational channels the country over exclusively for the use of non-commercial educational institutions. Those five channels afford room for hundreds of FM stations all over the country. It is not unlikely that every school board or other educational body which so desires can find room on one of these channels for a long time to come. Moreover, the five are among the choicest channels in the spectrum; they immediately adjoin the 35 channels set aside for commercial FM broadcasting, so that programs broadcast on these channels will be audible not merely on special school receivers but on most ordinary FM home receivers as well. The rules of the Federal Communications Commission specifically provide for adult educational and other programs aimed at the community generally to be broadcast over the school stations, provided only that they remain non-commercial. Thus education now has what it has sought through bitter battle over more than a decade—a home of its own on the air.

But—and this is the point I want chiefly to stress—those choice channels were not set aside for *absentees*. The ether is far too crowded, the pressure from other interests seeking to use radio far too great, to permit continued reservation of those channels, unless educators actually get busy and fill them with educational stations. There is no room for what the railroad industry calls "deadheading." If education doesn't want and doesn't need those channels, and if it doesn't prove its desires and needs by actually making intensive use of them, history is going to repeat itself, and education will again find that it is left with memories of a lost opportunity.

Some of you have memories long enough to recall what I mean. You will remember that in the early 1920's, when broadcasting was first capturing the attention of the American people and opening up vistas of unlimited service in the cause of human enlightenment, educational institutions—the colleges chiefly but the schools as well—were among the first to pioneer in this new medium. A considerable proportion of all the early radio broadcasting licenses issued were to educational institutions.

One by one the majority of those early educational stations have fallen by the wayside. There have been exceptions! I need only mention Harold McCarty's Station WHA which has survived lean years and fat at the University of Wisconsin, serving the state well throughout the years. And other examples of survivors could be mentioned. But certainly you will have to look a lot farther for a bona fide educational station in the standard broadcast band today than you would have 15 years ago.

Some persons have blamed the old Federal Radio Commission, predecessor to the present Communications Commission, for that tendency of educational stations to fall by the wayside. Others have placed the blame on monopolistic policies within the broadcasting industry which have one by one either ousted or absorbed the pioneer educational stations. Here again I want to express no opinion. But I do want to suggest, talking here to a group of educators, that educators themselves were not altogether free of blame. As competition in the radio field became more and more intense, as equipment became better and therefore more expensive, as program quality rose and therefore required more effort, too many educational stations tended first to lag behind, and thereafter to abandon their licenses. After 1929, when educational budget problems became particularly acute, educational radio stations were among the first to feel the axe.

All that is now ancient history, and FM opens a new chapter. It was George Canning who said more than a century ago:

> "I called the New World into existence to redress the balance of the Old."

Similarly it may be suggested that, at least as far as educational broadcast stations are concerned, the new FM radio band has been called into existence to redress the balance of the old standard broadcast band.

The Commission, I think I can fairly state, has now done everything in its power to redress that balance. It has assigned a sufficient number of choice frequencies, and has established rules and regulations governing non-commercial educational FM stations which should allow ample latitude. If in practice any Commission rules or procedures stand in the way of further educational radio progress, I can assure you that suggested changes will be given the fullest attention of the Commission.

But there are some things we cannot do for you. We can't build stations for you. We can't operate stations for you. And we can't supply programs for you. These are things education must supply for itself. And it must do so promptly if its channels are to be maintained. For, as I cannot too strongly suggest, if education does not move into the home set aside for it, there will be plenty of others who will first seek and then demand admission to the vacant rooms.

George Adair, who will speak later, will give you the technical details. He'll tell you roughly how much a station costs to build and to run, what the licensing procedure is, and so on. If you have any doubtful points, ask him questions, either now or later. I'd like to pass on instead to a further point—namely what to do with your stations after they are built.

On the new FM band, let me assure you, you're going to be travelling in fast company. Your programs will be competing, so far as general listeners at least are concerned, with the best that commercial radio can offer. And remember, it's easy to play hookey from a radio school. A mere twist of the dial will shut out 17th century history or trigonometry and bring in Jack Benny or the results of the World Series. I am myself a great believer in competition, and I have a notion that, if educators do their part and do it well, competition between the adjacent commercial and non-commercial FM bands will result in improved program service on both hands.

In one sense, of course, all radio is educational, for better or worse. The local commercial stations and the networks alike are educating listeners every hour of the day and night. I suppose the Symphony and the Opera are music education whether they are treated in the classroom or are sponsored by a roofing company. Similarly the news programs which have done so much to make commercial radio an indispensable part of our daily lives are no less educational because they are not called courses in current events. The techniques for reaching and impressing mass audiences so skillfully developed by commercial radio can and indeed must be applied, though perhaps in somewhat modified form, if the new educational FM stations are to live up to their promise.

By that I don't mean to suggest that such slogans as "the square of the hypotenuse is equal to the sum of the squares of the other two sides" should be set to music and plugged home to the tune of "Twice as much for a nickel, too—Pepsi-Cola is the drink for you." But I do want to suggest that the dramatic and narrative techniques which have proved successful in commercial competition are not without their lessons to the educator seeking to use a new and sensitive medium. Much progress has already been made in the direction of introducing "listener interest" in educational programs. If the new FM stations are to succeed, that progress must continue.

It is certainly not too early to begin plans for these five educational channels. During the war period, of course, equipment and manpower shortages are preventing immediate expansion. After the war, however, equipment will be freely available; plans should be laid now to get going at the earliest possible date. For inevitably, after this war, there will have to be a reshuffle of frequency assignments. Whole new portions of the spectrum, formerly deemed useless, have been opened up through wartime research, while the expanding need for worldwide communications and especially the vast new aviation uses of radio, will in all probability crowd the postwar ether even more tightly than the comparatively smaller spectrum was jammed before the war. In such a reshuffle, the friends of educational radio will certainly want to hold their own. If their plans are ready, and they can show both the real use to which educational frequencies are being put and the proposed use for which plans have been fully laid, the necessary frequencies will no doubt remain available. But if lethargy prevails, and others seeking to expand their own services are able to show that the channels reserved for educational stations are going to waste, then it will almost certainly be either difficult or impossible to continue the reservation of unused frequencies.

I trust that the meeting here today will help prevent that unfortunate result, and that it will take real steps towards the fullest possible utilization of the FM educational band in the service of American education.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 27th. They are subject to change.

Wednesday, September 29

Broadcast

Oral Argument Before the Commission

Report No. B-184:

WFLA—The Tribune Company, Tampa, Florida.—C. P. to increase power (night) and make changes in DA. **970 kc.,** 5 KW, unlimited, DA-night. Present power: 1 KW night, 5 KW day.

Report No. B-169:

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—C. P., **1150 kc.,** 1 KW, DA-night, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WCBT—J. Winfield Crew, Jr. (assignor); WCBT, Inc. (assignee), Roanoke Rapids, N. C.—Granted consent to voluntary assignment of license of Station WCBT from J. Winfield Crew, Jr., to WCBT, Inc., a corporation organized by S. Ellis Crew, W. Lunsford Crew, and J. Winfield Crew (brothers), (B3-AL-373).

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted petition for 90 days extension of temporary license pending Commission's decision in so-called Wilkes-Barre cases.

The Commission on September 20 granted petition of five FM stations, Philadelphia, Pa., for waiver of requirements of Rule 3.261 to permit operation under cooperative plan, for the period ending May 1, 1944.

KWJB—Bartley T. Sims, tr/as Sims Broadcasting Co. (assignor), Gila Broadcasting Co. (assignee), Globe, Arizona.—Granted consent to voluntary assignment of license of Station KWJB from Bartley T. Sims, tr/as Sims Broadcasting Co. to Gila Broadcasting Co., for a consideration of $20,000 (B5-AL-376).

WFTL—Ralph A. Horton, The Fort Industry Co., Ft. Lauderdale, Fla.—Adopted Order granting petition of Ralph A. Horton and The Fort Industry Co., asking that the hearing be expedited in re applications of Ralph A. Horton for assignment of license of WFTL, WAAD and WRET (Docket 6542), for license to cover construction permit as modified (Docket 6543), and of The Fort Industry Co. for modification of license (Docket 6544); ordered that a consolidated hearing on said applications be set for October 11, 1943, in the city of Miami, Fla.; and further ordered that the presiding officer at said hearing be authorized to adjourn the same to such other points as he deems necessary for the expedition thereof.

DESIGNATED FOR HEARING

KDRO—Albert S. and Robert A. Drohlich, d/b as Drohlich Brothers (assignor), Sedalia, Mo., Milton J. Hinlein.—Designated for hearing application for assignment of license of Station KDRO from Albert S. and Robert A. Drohlich, a partnership, d/b as Drohlich Brothers, to Milton J. Hinlein of Philadelphia, Pa. (B4-AL-367).

WGPC—J. W. Woodruff and J. W. Woodruff, Jr., d/b as Albany Broadcasting Co., Albany, Ga.—Designated for hearing application for construction permit to move transmitter and main studio from Albany, Ga., to West Point, Ga., and change frequency from **1450** to **1490 kc.** (B3-P-3545). To be heard jointly with application listed in following item.

L. J. Duncan, Leila A. Duncan, Josephine A. (Keith) Rawls, Effie H. Allen, d/b as Valley Broadcasting Co., West Point, Ga.—Designated for hearing application for construction permit for new station at West Point, Ga., to operate on **1490 kc.,** 250 watts, unlimited time, to be heard jointly with application of WGPC (above noted), (B3-P-3543).

LICENSE RENEWALS

Granted renewal of following station licenses for the period beginning October 1, 1943, and ending not later than October 1, 1945:

WJMS, Ironwood, Mich.; WLAP, Lexington, Ky.; WLPM, Suffolk, Va.; WMBH, Joplin, Mo.; WMFJ, Daytona Beach, Fla.; WRLC, Toccoa, Ga.; KFIZ, Fond du Lac, Wisc.; KRBM, Bozeman, Mont.; KRIC, Beaumont, Tex.; KTRI, Sioux City, Iowa; KVAK, Atchison, Kans.; KWBW, Hutchinson, Kans.

WGGA—Blue Ridge Broadcasting Co., Gainesville, Ga.—Granted renewal of license for the period ending not later than April 1, 1945 (B3-R-1151).

WCBT—J. Winfield Crew, Jr., Roanoke Rapids, N. C.—Granted renewal of license for regular period (B3-R-2015).

W39NY—City of New York Municipal Broadcasting System, New York, N. Y.—Granted license to cover construction permit (B1-PH-83 as modified) in part, subject to the condition that licensee take immediate steps to comply fully with the Rules, Regulations and Standards of the Commission when materials and personnel become available (B1-LH-38).

MISCELLANEOUS

R. O. Hardin & J. C. Buchanan, d/b as Nashville Broadcasting Co., Nashville, Tenn.—Granted telegraphic request for extension of time to file request for oral argument in re application for construction permit for new station at Nashville, Tenn.; time extended to September 24, 1943. (Docket 6191)

WJBW—Charles C. Carlson, New Orleans, La.—Granted petition to accept appearance filed late in re application for renewal of license of WJBW. (Docket 6529)

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Granted modification of construction permit which authorized increase in power, installation of new equipment and DA for night use, for extension of completion date to September 25, 1943 (B1-MP-1724).

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Granted license (B1-L-1772) to cover construction permit which authorized installation of new transmitter.

WAGM—Aroostock Broadcasting Corp., Presque Isle, Maine.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1546).

WTAX—WTAX, Inc., Springfield, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B-4-Z-1545).

KFXM—J. C. Lee and E. W. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1531).

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted license (B1-L-1770) to cover construction permit which authorized increase in power from 1 KW night, 5 KW day, to 5 KW day and night, installation of DA for night use; changes in equipment, and move of transmitter from Dorchester St., Quincy, Mass., to corner Vershire St. and Meritt Avenue, Quincy, Mass. Also granted authority to determine operating power by direct measurement of antenna power (B1-Z-1541).

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Adopted Order denying petition requesting reconsideration of Commission action of June 15, 1943, in designating for hearing application for modification of license to increase nighttime power from 1 KW to 5 KW. (Docket 6522)

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Modification of construction permit (B4-P-2827, as modified) which authorized change in hours of operation, move of transmitter and directional antenna for change in directional antenna system.

590 Kilocycles

WTBC—State Capital Broadcasting Assn., Inc., Austin, Texas.—Authority to determine operating power by direct measurement of antenna power.

1230 Kilocycles

WPHO—M. C. Reese, Phoenix, Ariz.—Voluntary assignment of license to Phoenix Broadcasting, Inc.

1260 Kilocycles

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Authority to determine operating power by direct measurement of antenna power.

NEW—Charles Swaringen, Alex Teitlebaum, Myer Wiesenthal, Jack N. Berkman, Richard Teitlebaum, John J. Laux, Louis Berkman, Joseph M. Troesch, John L. Merdian—partners d/b as Buckeye Broadcasting Co., Akron, Ohio.—Construction permit for a new standard broadcast station to be operated on **1240 kc.,** 250 watts power, unlimited hours of operation. Amended: to change type of transmitter.

1340 Kilocycles

KWOC—A. D. McCarthy, O. A. Tedrick and J. H. Wolpers, d/b as Radio Station KWOC, Poplar Bluff, Mo.—Authority to determine operating power by direct measurement of antenna power.

1420 Kilocycles

WPRP—Julio M. Conesa, Ponce, Puerto Rico.—Construction permit to move transmitter from #4 Trujillo St., Ponce, Puerto Rico, to Barrio Cerrillos-Military Road, San Juan to Ponce, Puerto Rico, Puerto Rico, and install new antenna.

1490 Kilocycles

WGPC—J. W. Woodruff and J. W. Woodruff, Jr., d/b as Albany Broadcasting Co., Albany, Ga.—Construction permit to change frequency from **1450 kc.** to **1490 kc.** and move transmitter and studio from Albany, Ga., to West Point, Ga. Amended: re transmitter site.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Art Clay Co., Indianapolis, manufacturer of educational supplies such as crayons, chalk, paint sets and art materials, is charged in a complaint issued with violation of the Robinson-Patman Act by discriminating in price between different purchasers of its products of like grade and quality and by granting certain favored customers discounts in consideration of the furnishing of merchandising and selling services, which discounts are denied to other customers. (5049)

Imperial Candy Company—Use of lottery methods in the sale of peanuts to ultimate purchasers is alleged in a complaint issued against Imperial Candy Co., 800 Western Ave., Seattle, Wash. (5046)

Rudd Manufacturing Co., 17 West 17th St., New York, designing and cutting fabrics which are manufactured into men's and boys' pants and other articles of wearing apparel, is charged in a complaint with violation of the Wool Products Labeling Act of 1939. (5047)

Standard Business Institute, Inc.—A complaint has been issued charging Standard Business Institute, Inc., of Chicago, with misrepresentation in the sale of its correspondence courses of instruction in accounting and business administration. (5050)

Unity Stamp Co., Inc., 7 West 30th St., New York, processing, manufacturing and selling made-to-order straight line stamps, commonly referred to as rubber stamps, is charged in a complaint with violation of the Robinson-Patman Act. (5048)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Columbia Research Company, 417 South Hill St., Los Angeles, has been ordered to cease and desist from misrepresentation in the sale of envelopes and questionnaires referred to by bill collectors as "lures" and which are designed to obtain information concerning debtors. (4867)

Milk and Ice Cream Can Institute, Cleveland, Ohio, and its eight member manufacturers have been ordered to cease and desist from entering into, carrying out or continuing any combination or conspiracy to fix uniform prices and restrain competition in the sale of metal milk and ice cream cans. (4551)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Artloom Corporation, Allegheny and Front Streets, Philadelphia, selling and distributing upholstery fabrics, including a fabric designated "Artwist," has entered into a stipulation in which it agrees to cease and desist from use of the word "mohair" or other words of like meaning as a designation for any upholstery fabric the face or pile of which does not consist wholly of mohair, the hair of the Angora goat; provided, however, that in the case of an upholstery fabric the face or pile of which is composed in substantial part of mohair and in part of other fibers or materials, such word may be used as descriptive of the mohair content if there are used in immediate connection therewith, in letters of at least equal size and conspicuousness, words truthfully describing such other constituent fibers or materials. (3718)

Bill Adams Company, James Acuff, Richard Mockler, Willard Hoffman, and Wayne Hoffman, trading as "Bill the Diamond Man" and the "Bible Study Club," Omaha Building and Loan Building, Omaha, Nebr., engaged in the mail order distribution of imitation jewelry and books, have stipulated in connection with the sale and distribution of their merchandise, to cease and desist from use of the word "free," the term "absolutely free," or other expression of like import with reference to an article not actually given as a gratuity, the recipient thereof being required to pay the whole or a part of its purchase price, to purchase some other article, or to render some service to obtain it; from representing that an advertised offer is unusual or special so long as no price reduction or other trade concession is made with it; from stating that merchandise sold in connection with an alleged free gift or gratuity has a designated sales value in excess of the price for which it is customarily sold; and from designating their rings as "Rolled Gold Finish" or referring to insets used in their imitation jewelry as diamonds or simulated diamonds. (3723)

Clare-Ann Hat Company and Clare-Ann Hat Co., Inc., 153 North Wabash Ave., Chicago, manufacturing and selling women's hats, has stipulated to cease representing that hats composed in whole or in part of used or second-hand materials are new, by failure to stamp in some conspicuous place on the exposed surface of the inside of the hat in conspicuous and legible terms, which cannot be removed or obliterated without mutilating the hat itself, a statement that the products are composed of second-hand or used materials, provided that if substantial bands, placed similarly to sweat bands in men's hats, are attached to the hats in such manner that they cannot be removed without rendering the hats unserviceable, then such statements may be stamped upon the exposed surface of such bands in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bands; representing in any manner that hats made from old, used, or second-hand materials are new or composed of new materials and from use of the abbreviation "Inc." or any other abbreviation or word connoting the words "incorporated" or "incorporation" as part of his trade name, or in any manner which may convey the belief that his business is conducted by a duly accredited and authorized corporate entity. (3721)

Darrington's, Marshfield, Oreg., selling a dehydrated goat's milk product designated "Dar-Sal," recommended for the treatment of various human ailments, has stipulated to cease representing that the product is made by a secret process; that it possesses unique or special properties which are not present in other dehdydrated goat milk products; that it has any therapeutic value when used in connection with the treatment of run-down conditions, nervous disorders, stomach trouble, eczema, asthma, hyperacidity, rheumatism, paralysis or arthritis; that it is a cold preventive; or that it will improve the user's health or build up the user's resistance to infectious diseases. (03143)

Loye Distributing Company, Wheeling, W. Va., selling a medicinal preparation designated "Blue Bonnet Mineral Water Crystals," has stipulated to cease and desist from representing that use of the preparation will correct excess acidity, build up the system or keep the body healthy, or help one regain good health; will increase resistance to colds, grippe and other ailments; will insure good appetite, sound sleep or restore energy; will be beneficial for conditions of fatigue, listlessness or lack of pep, or that it will rid the system of, or keep it free from, poisons. (03141)

Stanco Incorporated, 216 West Fourteenth Street, New York, selling drug products designated "Mistol Drops" and "Mistol Drops with Ephedrine"; and McCann-Erickson, Inc., 50 Rockefeller Plaza, New York, an advertising agency, which disseminated advertisements for Stanco, Incorporated, have stipulated to cease and desist from disseminating any advertisement which fails to reveal that Mistol Drops and Mistol Drops with Ephedrine should not be administered to undernourished infants, abnormally weak children or debilitated elderly persons; that frequent or excessive use of Mistol Drops should be avoided; that frequent or excessive use of Mistol Drops with Ephedrine may cause nervousness, restlessness or sleeplessness, and that individuals suffering from high blood pressure, heart disease, diabetes or thyroid trouble should not use this preparation except on competent advice, provided, however, that such advertising need contain only the statement: "CAUTION: Use only as directed" if and when the directions for use, whether they appear on the label or in the labeling, contain a caution or warning to the same effect. (03140)

Dr. J. F. True & Co., Inc., Auburn, Maine, selling a drug product called "Dr. True's Elixir," and S. A. Conover Co., 75 Federal St., Boston, an advertising agency disseminating advertisements for the product, have stipulated to cease and desist disseminating any advertisement which fails to reveal that the product should not be used when abdominal pain, nausea, vomiting, or other symptoms of appendicitis are present; provided, however, that such advertisement need contain only the statement, "CAUTION: Use Only as Directed," if and when the directions for use wherever they appear on the label or in the labeling contain a caution or warning to the same effect. (03144)

W. G. Reardon Laboratories, Inc., Port Chester, New York, selling a mouse poison designated "Mouse Seed," and H. B. LeQuatte, Inc., 200 Madison Ave., New York, an advertising agency which disseminated advertisements for the product, have stipulated to cease and desist from representing that mice cannot resist eating "Mouse Seed"; that use of "Mouse Seed" will rid the house of all mice, and that mice, having eaten the preparation in one's house, will not die in the house. (03142)

Bernhard Ulmann Company, Inc., 107-113 Grand St., New York, selling and distributing knitting yarns, has stipulated to cease and desist from use of the word "Saxony" or other words connoting any foreign geographical origin as a designation for or descriptive of a product not imported from or made of materials imported from the country or locality indicated by the use of such geographical designation. (3720)

Universal Trading House, 370 Grand Street, New York, selling and distributing knitting yarns, has stipulated to cease and desist from the use of the word "Angora" or any word of similar import as descriptive of a product that is not composed entirely of the hair of the Angora goat; provided, however, that in the case of a product composed in substantial part of the hair of the Angora goat and in part of other fibers or materials, the word "Angora" may be used as descriptive of the Angora fiber content if there are used in immediate connection therewith, in letters of at least equal size and conspicuousness, words truthfully describing such other constituent fibers and materials; and further provided that in connection with a product composed wholly or in substantial part of Angora rabbit hair, the words "Angora rabbit hair" may be used as descriptive of the product if composed wholly of Angora rabbit hair or as descriptive of such portion of the product as is composed of Angora rabbit hair. (3719)

U. S. Enterprises, Beverly Hills, Calif., assembling and selling so-called first aid kits, and Stephen P. Shoemaker, Los Angeles, preparing the radio advertising disseminated by the other respondents, have entered into a stipulation to cease and desist from representing that the first aid kits sold by them meet with the suggestions of the Office of Civilian Defense, that the kits are adequate for the requirements of homes generally, or that they have been recommended or approved by the Office of Civilian Defense; that the items included in the kits are of such quality, quantity and kind as to comprise an adequate supply of the medical and surgical aids needed in the home or for civilian defense; that such aids would meet the needs in the event of a major catastrophe that might befall a community; that the price at which the kit is offered for sale is a special price, that is, other than the price customarily charged for the kit in the usual course of business; that it can be purchased at the offered price only by those who avail themselves of the opportunity to buy during a specified limited period of time, or that the offered price is less than that for which the items comprising the kit can be purchased separately at retail. (3722)

J. Warshal & Sons, Seattle, Wash., has entered into a stipulation that, in connection with the sale of so-called "Nestle Down" garments, they will cease and desist from use of the words "Nestle Down" or "Down" as a trade name or designation for any product the filling of which does not consist wholly of down, and from use of the word "Down" or other words of like meaning in any manner which tends to convey the impression that a product is composed of or filled with down, when such is not a fact. (3717)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 40, October 1, 1943

REPRESENTATIVE E. E. COX RESIGNS AS CHAIRMAN OF THE SELECT COMMITTEE

(Text of Congressman Cox's resignation speech given September 30 on the House floor is contained in the special legislative bulletin enclosed.)

Representative E. E. Cox, of Georgia, chairman of the Select Committee of the House of Representatives, 78th Congress, to Investigate the Federal Communications Commission, has resigned his chairmanship.

In a speech before the House September 30, Congressman Cox said he was taking this step because of the controversy over his chairmanship which had arisen.

Placing the "best interests of the House" before personal justice to himself, Congressman Cox submitted his resignation both out of a "deep desire" to live up to the sacred obligations of the House and because he was "fortified" in his action by friends and colleagues in whose "friendship and judgment I have the utmost confidence."

The action followed closely a lengthy open letter in the *Washington Post* of September 27 from *Post* Publisher Eugene Meyer to Speaker Sam Rayburn asking that the Speaker take immediate action on FCC Commissioner C. J. Durr's petition to disqualify Congressman Cox as a member of the Select Committee. Commissioner Durr had written Speaker Rayburn on September 24 asking action on his petition, which had been filed with the Speaker on May 13, 1943. The petition was referred to the House Judiciary Committee, which disclaimed jurisdiction to act and referred it back to the House.

CONGRESSMAN KENNEDY OF N. Y. SUBMITS 'FREEDOM OF SPEECH' RESOLUTION

(Text of statement and resolution enclosed in special legislative bulletin.)

Representative Martin J. Kennedy submitted a joint resolution to the House September 30, which stated simply: "Congress shall make no law abridging the freedom of speech by radio or wire communication."

The resolution was preceded by a statement issued from Representative Kennedy's office explaining the reasoning behind the resolution which consisted of only two one-sentence sections.

Broadcast Advertising

RETAIL PROMOTION PREMIERE PLANS BEING COMPLETED

Plans for the World Premiere showing of the Retail Promotion Plan presentation October 12 at the Statler hotel in Washington, D. C., were being completed this week by a special committee of Washington broadcasters headed by Carleton Smith, WRC manager.

Approximately 800 government, retailing, broadcasting and other industry leaders will be invited to see the showing.

Prelminary showings of the presentation "Air Force and the Retailer" held in New York City for retailing and broadcasting industry leaders who have been assisting in planning the show have engendered considerable enthusiasm among these men, who predict a high degree of success for the film.

The 16 masters of ceremonies who will tour 126 cities with the 16 units of the presentation will also attend the Washington showing as a "baptismal" experience, Paul W. Morency, WTIC, Retail Promotion Committee chairman, has announced.

Other members of the Washington committee are: Carl Burkland, WTOP; Ben Baylor, jr., WMAL; Henry Seay, WOL, and G. Bennett Larson, WWDC.

DU PONT RADIO AWARDS PERPETUATED BY TRUST

Three annual awards, each including payment of $1,000, have been established by Mrs. Jessie Ball du Pont, wife of the late Alfred I. du Pont, Jacksonville, Florida.

(Continued on page 400)

The Petrillo - Decca Contract

Full text of the contract, which has been signed by Decca and World with the A. F. of M. together with a statement concerning the contract, will be found in the special A. F. of M. bulletin enclosed.

Lewis H. Avery, *Director of Broadcast Advertising;* Walter L. Dennis, *Chief, News Bureau;* Willard D. Egolf, *Assistant to the President;* Howard S. Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Arthur C. Stringer, *Director of Promotion.*

DU PONT RADIO AWARDS PERPETUATED BY TRUST

(Continued from page 399)

A trust agreement has been entered into with The Florida National Bank of Jacksonville, which, according to a communication to NAB from Mrs. du Pont, "establishes, and I hope guarantees for all time, the Alfred I. du Pont Radio Awards." Facsimilies of the trust agreement were mailed to all radio stations and commentators for their permanent reference and information.

Two Radio Station Awards shall be conferred in each calendar year to two radio stations in the continental United States for outstanding and meritorious service in encouraging, fostering, promoting and developing American ideals of freedom and for loyal and devoted service to the nation and to the communities served by these stations respectively. One award shall go to a large radio station, as defined from the standpoint of power and range of coverage, the other to a small radio station, similarly defined in the trust agreement. Both awards shall be of equal size, dignity and merit, the agreement sets forth.

The Radio Commentator Award shall be conferred in each calendar year to one individual, who shall be a citizen of the United States, in recognition of distinguished and meritorious performance of public service by aggressive, consistently excellent and accurate gathering and reporting of news by radio and the presentation of expert, informed and reliable interpretation of news and opinion for the purpose of encouraging initiative, integrity, independence and public service through the medium of radio, according to the language of the agreement, which also provides for a Committee of Awards to determine the winners.

Awards will be made during March for the preceding calendar year.

A.F.A. DISTRICT URGES CLARIFIED RADIO LEGISLATION

The 10th (Southwest) District of the Advertising Federation of America, meeting in Dallas, Texas, September 13-14, passed the following resolution:

Be it resolved that, in view of the recent interpretation of the Communications Act of 1934 by the Supreme Court of the United States, holding that the Federal Communications Commission is empowered to supervise, not only the traffic, but also the content of radio broadcasting, the 10th District, A.F.A., hereby petitions the Congress of the United States to so amend the said Communications Act as to rigidly define the authority, powers and duties of the Federal Communications Commission. We do not believe that the Congress intended to confer upon any bureau or bureaucrat the un-American power of censorship of the spoken word, and we urge the Congress to so clarify this legislation as to insure freedom of speech and communications against any possibility of capricious legislation.

EGOLF APPOINTED CHAIRMAN OF A.F.A. WAR ACTIVITIES

Willard Egolf, assistant to the president of NAB and vice-president of the Advertising Federation of America, was appointed chairman of the A.F.A. War Activities Committee at a meeting of the officers and board of directors in New York, Sept. 28.

Remainder of the Committee, consisting of prominent figures in advertising, are being notified by Joe Dawson, president of Tracy-Locke-Dawson advertising agency, New York, also president of A.F.A.

Mr. Egolf succeeds Allan T. Preyer, executive vice-president of Vick Chemical Company, last year's chairman of the committee which correlates and promotes the use of advertising in the war throughout the United States, principally assisting local advertising clubs in outlining and expediting campaigns for the home front.

OWI RECOGNIZES WRVA FOR "EXTRA" CONTRIBUTION

Signal recognition of Station WRVA, Richmond, Virginia, and Irvin Abeloff, program director, for his ingenious method of inserting OWI messages in Army and Navy shows, was accorded by John Hymes, chief of the OWI station relations division, in his bulletin to regional chiefs September 17. Text of the bulletin follows:

For quite some time Station WRVA, Richmond, Virginia, has been devoting a large portion of its public service features to the armed services in the way of special programs emanating from Army and Navy camps within the station's coverage area. Mr. Irving Abeloff, War Program Manager of WRVA, has adopted the policy for his station for granting time for such broadcasts only on the condition that they provide more than entertainment and service themes. Before WRVA grants time to an armed service for a program they must agree to devote some portion of their broadcast time to a message that would aid the over-all war objectives; in other words, an OWI message. This, of course, is an extraordinary situation, but it is an attitude which presents a national idea to us.

Mr. Abeloff, WRVA, and our regional chief in Richmond, Walter Huffington, have accordingly been very successful in incorporating OWI messages into these armed service programs, and because of their success we are passing an adaptation of their plan along to you with the suggestion that you work out similar schedules with the stations in your region. Some of you are already doing this on a spasmodic basis, and it is our hope that these allocations will be done nationally on a regular basis.

Because we believe this plan has great possibilities for more effective placement of OWI messages, we are suggesting that you attempt to set up an armed service program-OWI Allocation Plan on the stations in your region, and offer you the following procedure for a plan of operations in putting this into effect:

1. Contact all War Program Managers in your region and obtain from them a list of the local programs they carry which are either produced by an armed service personnel or by the stations for any armed service. This list should include all sustaining shows emanating either from military posts or from station studios.
2. Together with this list of shows, have the War Program Manager give you the military office and the personnel which the station contacts for production on each of these shows.
3. Write to this military contact and ask him if he would be willing to incorporate or include an OWI message in his armed service program. For your "sales story," suggest to them that in doing so they would be contributing largely towards the home front war effort, and that the spot coming from a military post would be extremely effective. In addition, you might state that it is certainly to the armed services' benefit that OWI messages

be given as wide and as effective coverage as possible. In contacting the Army it was suggested that you request them to "schedule an OWI message in addition to your Army theme."

4. When you receive acceptances, then contact the War Program Manager of the station over which the show is being broadcast. Advise the War Program Manager to submit accordingly one of his OWI messages each week to the production man on the particular show for routining into the program. This message can be on any one of the OWI campaigns which the station is currently carrying, the selection being dependent on importance, appropriateness or military acceptance. The station can submit the live copy to the program production chief for use either as a straight announcement or for a re-write into the script. In the case of a studio show, if desired, a transcribed announcement could be used.

In some cases you may run into armed service programs which would like to give particular OWI messages a complete or a more thorough treatment. On WRVA, for example, camp writers have effectively worked the messages into the script either in a comedy or a dramatic vein, or in one way or another. In such instances, furnish the program writers with fact sheets or background material on the subject. I think these cases, however, will be the exception rather than the rule, and I would say that we should be satisfied with straight messages.

We are grateful, and hereby express our appreciation to Mr. Abeloff, Station WRVA, and Mr. Huffington for suggesting this plan to us, and for helping us in working it out.

Bill Spire, our government liaison chief, has checked and cleared this plan with the Navy and War Departments, Commander Reichner representing the Navy and Major Pellegrin representing the War Department. Incidentally, they both suggested that it would be more effective if the requests came from stations rather than from OWI. I do not feel, however, that the average War Program Manager would be sufficiently interested or could devote the time to doing this and believe it should be our job to make the solicitation. If you find individual cases to the contrary, you are at liberty to take advantage of such a situation.

Radio Councils

GREATER BOSTON RADIO COUNCIL ORGANIZED

Dean Howard M. Le Sourd, of Boston University, has been named president of the newly-organized Radio Council of Greater Boston.

Other officers are: Mrs. Benjamin F. Kraus, Federated Women's Club; Dr. Carl Friedrich, Harvard University, and Adelaide Fitzgerald, vice-presidents; Carolyn La Vers, recording secretary; Elizabeth Boudreau, Boston Public Library, and Charles G. Bernard, Kiwanis Club, treasurer.

The executive board includes representatives of seven Boston radio stations, chairman of standing committees and the six members-at-large.

N. J. COUNCIL EDUCATION COMMITTEE HOLDS MEETING; PLANS ACTIVE RADIO WORK

First meeting of the education committee of the Radio Council of New Jersey was held September 22 in Elizabeth, with members agreeing that:

1. The committee should endeavor to impress upon New Jersey educators the really tremendous and rapidly growing importance of American radio as a factor in modern life and that they should more thoroughly and effectively realize this in planning educational activities.
2. There should be a radio division in the New Jersey State Department of Public Instruction or some person should be given the specific responsibility of encouraging and promoting the use of radio and sound equipment.
3. There should be in each school building radio and other sound equipment adequate for the needs of the entire student body.
4. There should be an extension of opportunities for teachers, librarians, and others to learn about radio and sound equipment and how they can be used as educational aids, both in and out of school.
5. Encouragement should be given to libraries as well as to other educational institutions to establish script libraries, make collections of recordings, and also to further the study of radio in their communities.
6. Radio stations should be encouraged to continue to expand the production of programs which have educational significance and thereby develop closer cooperation between educators and broadcasters.

The first and most important task of the committee will be to survey the public, private and parochial schools to determine to what extent the radio is a factor in education today. This questionnaire will ascertain what receiving and broadcasting equipment is available including stationary and portable radios, microphones, recording devices, loud speakers, amplifying systems, and recordings. An effort will be made to learn to what extent schools participate in broadcasts, how radio techniques are utilized in regular classes, and the use of the radio and sound equipment both in and out of school.

The committee discussed at some length the possibilities of using radio and sound equipment as a supplement to the usual teaching techniques and procedures. Its significance as an educational factor was presented from many angles. The committee recognized that teachers need to be trained in the use of the radio and sound equipment and that educational administrators must be sold on the growing importance of audio aides in teaching-learning situations. Several educational institutions in the state are to be urged to make application for FM radio stations. The attention of educators will be called to the fact that the use of radio and sound equipment means more than listening to programs in school and out and in visiting local stations. The appreciation by youth of the better type of programs is one of the major responsibilities of educators.

Those present included: Charles W. Hamilton, assistant in secondary education of the State Department of Public Instruction, chairman; Anne Hoppock, assistant in elementary education, and Lloyd H. Jacobs, supervisor of distributive education, also of the State Department; Max J. Herzberg, principal of Weequahic High School of Newark and president of the National Council of Teachers of English; Mrs. Marjorie Merritt Quinn, associate extension editor of the N. J. College of Agriculture; Miss Hannah Severns, librarian of Moorestown; Prof. Paul S. Nickerson, Montclair State Teachers College; Robert B. Macdougall, Trenton State Teachers College; Mrs. Robert W. Cornelison of Somerville, chairman of the department of education of the New Jersey State Federation of Women's Clubs and president of the Radio Council of New Jersey; Mrs. Carl Bannwart of Newark, chairman of the radio committee of the N. J. State Federation of Women's Clubs; Leon C. Hood, teacher of English in Clifford J. Scott High School of East Orange; Dr. Frederick L. Hipp, editor of the N. J. Educational Review and Director of Democratic Discussions, and Rt. Rev. Msgr. William F. Lawlor, superintendent of schools of the Archdiocese of Newark. Guests were Mrs. Dorothy Lewis, coordinator of listener activity of NAB and Miss Dorothy Rowden, assistant to the director of education of the Columbia Broadcasting System.

DES MOINES COUNCIL GETS BOOST FROM NEWSPAPER

(The following editorial is reprinted from the Des Moines *Tribune* of September 10 and is self-explanatory.)

Radio Council

The Federal Communications Commission has power to yank the broadcasting licenses of radio stations if the commission doesn't think they operate "in the public interest, convenience, and necessity."

But in addition to this, the stations themselves regard it as their chief duty to entertain the listeners and to sell time to advertisers, so they keep constant check on what the advertisers and listeners get for their money through various "listener surveys."

Every little while there is a wave of public indignation or hysteria over something to add to their worries, like the Mae West wisecracks of a few years back, the Orson Welles "invasion from Mars," or parental concern over the quantity and quality of children's programs.

Each of these waves of excitement has left permanent marks on the broadcasters in the form of new "don'ts" and "do's."

In the last few years, the National Association of Broadcasters has been promoting the local "radio council" as a device for more continuous and helpful contact between broadcasters and their public. Cedar Rapids, Ia., has had one for several years; Des Moines has a new one, organized last June and expecting to be in full swing by October.

These radio councils have two chief functions—to afford a channel for constructive and representative criticism of radio programs, and to help the local radio stations make the best use of free time given to local civic organizations.

The new Des Moines radio council, formed with the co-operation of all three local stations and of the National Association of Broadcasters, has an allocation committee to divide up the time donated by the stations to local non-profit organizations, a continuity committee to give them advice about scripts, a talent and production committee to give them help in putting on their programs.

For its more generalized function of helping broadcasters keep in touch with their audience, it has a survey and program evaluation committee.

Critics in the past have sometimes chided the radio industry for seeking less to please than to avoid complaints. Existence of a live radio council should help radio executives determine which complaints are widespread and which are merely crotchety. It should also help raise the quality, variety, and representativeness of the donated-time programs.

Engineering

RTPB MEETING

The Radio Technical Planning Board met in New York City on September 29 for the purpose of electing the chairman. The voting sponsors represented at the meeting were the following:

American Radio Relay League
FM Broadcasters, Incorporated
Institute of Radio Engineers
National Association of Broadcasters
Radio Manufacturers Association

Other sponsors present, but not yet qualified to vote, were:

The American Institute of Electrical Engineers
Aeronautical Radio, Incorporated
International Association of Chiefs of Police
National Independent Broadcasters

Dr. W. R. G. Baker, General Electric vice president and RMA director of engineering, was elected chairman for the term ending October 1, 1944. Dr. Baker was the chairman of the Television Standards Committee.

The chairman is expected to call another meeting of RTPB for the election of other officers, organization of panels, budget determinations and administrative details.

Neville Miller and Howard Frazier attended for NAB.

RADIO TOWER LIGHTS

FCC has announced changes in its Rules and Regulations regarding the condition of radio tower lights and entries thereof in radio station logs. These changes, effective October 28, 1943, provide first, for visual observation and physical inspections of tower lights, to be followed by a report to the nearest Airways Communications station of the Civil Aeronautics Administration where any failure of tower lights which cannot be readily corrected is observed; and second, entries in the station log indicating not only that regular checks have been made, but also showing where failure has occurred and the nature of steps taken to remedy the condition.

W.C.T.U. GIVES RADIO BIG PLAY IN MAGAZINE

In the September 4 issue of *Union Signal*, publication of the National Women's Christian Temperance Union, radio was accorded the majority of space in the 24-page magazine.

Articles by Earl J. Glade, KSL; Dorothy Lewis, NAB; Dorothy Gordon, national director of children's radio programs for OCD and Helen Hewitt Green, national director, W.C.T.U. department of radio, featured the issue.

FEDERAL COMMUNICATIONS COMMISSION

FM BROADCASTING AND EDUCATION

(This talk was delivered by George Adair, assistant chief engineer, FCC, before the Federal Radio Education Committee executive committee in Washington, September 17, and is the talk to which FCC Chairman James Lawrence Fly referred in his speech printed in the September 24 issue of the "Reports.")

Reluctant to admit it as many of us are, the days of "Readin', Ritin' and Rithmetic, taught to the tune of the Hickory Stick" are past. The horse and buggy days of education are over. Education the hard way is no longer acceptable.

The present-day tendencies of lessening discipline in the home almost to the vanishing point and the psychology propounded by many educators as well as parents, that children should be permitted full self expression or in other words to do as they please, have made teaching increasingly difficult.

In order to make life easier for themselves and to escape responsibilities, more and more parents and teachers are only too willing to accept the theory that a child should be made happy so that if he were to die tomorrow he would have lived a happy life instead of training the child so that if he lived to be a hundred he would have had a happy and useful life.

Such conditions make the position of the conscientious teacher almost untenable leaving only three courses of action:

1. Attempt to force learning on the children which brings down the wrath of some parents and makes the teacher so unpopular that the majority of the students learn little or nothing.
2. Let the children act and do as they please so again the majority learn little or nothing, or;
3. Meet the challenge of present-day conditions and the distraction of competing interests and make the courses of study and their presentation such as to demand the interest of the students.

Obviously, the third is the only logical course to take and the only remaining problem is how to meet the challenge. Examination indicates that the competing interests largely center around such things as airplanes, mechanics, movies, sports and radio. Further investigation immediately reveals that as in many other things in life, the strategic thing to do is to make these allies instead of trying to fight them. There are, of course, many ways to do this and in some cases efforts along this line have produced highly satisfactory results; on the whole, however, the surface only has been scratched.

Modernize Education

We see and hear much about the importance of electronics, radar, airplanes and other technical developments in our post-war manufacturing, home construction, travel and other phases of life. Why not modernize our educational program?

One method of modernizing education is by intelligent and diligent use of radio in schools. Use of the commercial broadcast stations has very definite possibilities, but the installation and operation of a school's own radio system has infinitely more possibilities, not only in bringing the outside interests into the school but in taking the school interests to the outside world and into the homes of the pupils. The specific uses of such a system are too numerous to attempt to list, but a few are:

Class room instruction.
More coordinated instruction.
Bringing the quality of instruction in all classrooms teaching a particular subject up to the standard of the best teachers available in the whole school system.
Faculty instruction.
Practical applications of the basic studies.
Self-expression of pupils and teachers.
Languages, history, music and the arts.
Teaching of various phases of radio and broadcasting.
Programs directed to parents and public.
Home classes for confined pupils.
Courses for adult instruction.

Educators interested in the possibilities of education by radio, particularly by the use of noncommercial educational broadcast stations, no doubt are concerned as to how this service will develop and form a part of the post-war broadcast structure. While the construction of broadcast stations has virtually stopped because of limitations in the use of critical materials and shortage of skilled personnel, research in radio transmission and reception has proceeded apace. Particularly is this true with respect to the development of high frequency equipment, so important to the prosecution of the war. Conversely, there should be no doubt but that this research will have marked effect on the progress of high frequency broadcasting when facilities may be directed to this end. Since it is probable that the post-war period will bring rapid expansion in high frequency (FM) broadcasting, it is appropriate that plans be started now by educational agencies to take advantage of the broadcast facilities that have been allocated for their particular use.

FM Development

The development of frequency modulation broadcasting (FM in common parlance) is of considerable importance to those interested in the use of noncommercial educational broadcast facilities. Just why is this so and what advantage does FM bring?

After extensive tests of FM, and following a hearing in March, 1940, on the subject of high frequency broadcasting, the Federal Communications Commission announced that FM was ready to move forward on a broad scale. Rules and standards were adopted, providing 35 channels for commercial stations between 43 and 50 megacycles for use by FM stations. The band set aside for educational stations was changed from the 41 to 42 megacycle band to the 42 to 43 megacycle band. This provides five educational channels. The allocation of the educational band adjacent to that of commercial FM broadcast stations places the educational stations on an entirely independent basis, yet gives them the benefits of developments in the service rendered by commercial stations. Since regular FM receivers provide for the reception of both services, noncommercial educational broadcast stations may transmit educational and entertainment programs to the general public as well as to special school receivers. Thus, there is established a sound basis for the parallel growth of noncommercial educational and commercial broadcasting with this new and superior form of transmission at these frequencies.

Approximately seventy FM stations had been authorized when the war required the restriction of construction, and at this time, some forty-five FM stations are in operation and providing a high-quality noise-free broadcast service. Since the use of an FM channel generally may be repeated at intervals of 100 to 150 miles, the total number of educational stations which may be established is very large although the maximum number erected in any one locality is relatively small. It is anticipated, however, that there will be at least one educational FM channel available for every community that wants one.

There are five educational agencies which are actually taking advantage of the opportunities of FM by the operation of such stations at this time. These are as follows: [1]

Licensee and Location	*Call Letters*	*Frequency (kc)*	*Power*
Board of Education, City of Chicago, Chicago, Illinois	WBEZ	42,500	1kw
Board of Education, City of New York, Brooklyn, New York	WNYE	42,100	1kw
Board of Education of the San Francisco Unified School District, San Francisco, California	KALW	42,100	1kw
Cleveland City Board of Education (Charles H. Lake, Superintendent), Cleveland, Ohio	WBOE	42,500	1kw
University of Illinois, Urbana, Illinois	WIUC	42,900	250w

[1] There is one other noncommercial educational broadcast station which has not as yet converted from amplitude modulation (AM) to frequency modulation (FM).

The foremost advantage of frequency modulation over amplitude modulation (used in standard broadcasting and most other radio services) is its ability to reduce or eliminate noise received with the signal. Atmospheric and man-made electrical noise, which consists primarily of amplitude variations, may be eliminated in FM since the amplitude of the radio signal is maintained constant and amplitude disturbances may be overcome. Further, FM signals have the ability to discriminate against other signals of lesser intensity, providing freedom from such interference. The characteristics of FM provide an excellent means for the transmission and reception of high fidelity programs.

"Educational" Station Defined

By definition the term "noncommercial educational broadcast station" means a station licensed to an organized non-profit educational agency for the advancement of its educational work and for the transmission of educational and entertainment programs to the general public. A license for such a station will be issued only to such an agency and upon a showing that the station will be used for the advancement of the agency's educational program, particularly with regard to use in an educational system consisting of several units. Each station may transmit programs directed to specific schools in the system for use in connection with the regular courses as well as routine and administrative material pertaining to the school system, and may also transmit educational and entertainment programs to the general public.

Since noncommercial educational broadcast stations are intended primarily for use by school systems where a coordinated educational program service is carried on, it is expected the use of such stations will be largely in city and county school systems for the transmission of program material directed to the schools in the system, and, for the transmission of program material to the general public.

The transmission characteristics of stations operating on these high frequencies are such that at the powers usually employed adequate service is provided to the schools in the system as well as to the public within the area, but normally do not furnish a service to regions beyond. Because of the limited transmission range, these stations are not suitable for widespread coverage, such as, for example, over more than the smallest states. However, state colleges and universities may desire to employ stations for use with schools within transmission range. Although no networks or combinations of educational broadcast stations have as yet been developed, such operation on a statewide or even perhaps a nationwide basis would appear to offer definite and interesting possibilities.

To those unacquainted with the equipment necessary in a typical educational broadcast system, a few words regarding this topic may be of interest. In addition to the transmitter and antenna, a number of components are required to complete a noncommercial educational broadcast station and to permit the transmission of a high quality dependable program service. There would be required the usual microphones, a studio amplifier, transcription equipment, monitors for determining adherence to the assigned frequency and for determining percentage of modulation, and such power supply equipment and miscellaneous apparatus as may be necessary in any particular installation. In addition, it may sometimes be desirable to install studios in several buildings, thus requiring supplementary equipment at each studio. All principal studios should be acoustically treated to permit the transmission of program material with as much fidelity as possible.

Servicing Schools

Schools equipped with public address systems would, of course, need only one receiver to provide every classroom with the material being broadcast. While a number of loud speakers may be employed with a single receiver of proper design without the use of additional amplifying equipment, it is believed desirable to use some form of amplifier in schools where a considerable number of loud speakers are needed in order not to sacrifice high fidelity and adequate volume. A system of this type would be much more inexpensive than one where separate receiving sets are used in the individual rooms. This arrangement would have the added advantage of enabling such schools to have, by the simple addition of a microphone, a public address system for communications to the individual rooms. However, in schools where additional wiring proved burdensome, either by reason of cost or decorative standpoint, individual classroom receivers may be used.

It has been estimated that an average school station may be installed at the price of one classroom and that the personnel required would consist only of a radio engineer and a program director, both of whom could be obtained from the regular school staff. While the cost of an installation varies widely with individual requirements, a few approximations will be given to indicate the general minimum cost of equipment.

An FM transmitter of standard manufacture and of 250 watts rating can be obtained for approximately $4,500. This power should be sufficient for the coverage needed by many school systems, particularly where an antenna site is available which is high with respect to the surrounding terrain. Should a 1000-watt transmitter be needed, these can be purchased for approximately $9,000. While it is possible that such equipment can be assembled by a competent radio engineer at a cost below these figures, it is suggested that such an expedient be carefully studied before attempting to effect economics along this line.

Other Costs and Equipment

The cost of the antenna will depend largely on the transmitter site, for if a tall building or other point of high elevation is available a comparatively simple antenna structure can be used, the cost of which should not exceed a few hundred dollars. The propagation of high frequency radio signals is dependent to a large extent upon the height of the transmitting antenna above the surrounding terrain, and thus it is important that a suitable location be obtained. While this is not as important for service to limited areas, such as the confines of a city, it would be necessary to insure coverage of the schools in a large county, but in any case better service with less installed power may be obtained by a good antenna at a good location.

Other equipment, such as microphone, amplifiers, transcription equipment, etc., may run into several thousand dollars, again depending upon each individual installation. Thus, a complete FM radio transmitter with necessary appurtenances may cost a probable minimum of about $6,000 to $7,000 for 250 watts and $11,000 to $12,000 for 1000 watts. Added to this will be the cost of the receivers at the various schools, any amplifiers and loud speakers used in these installations, building requirements, studio treatment and furniture.

Major Edwin H. Armstrong, whose research and developmental work in frequency modulation demonstrated its possibilities, has given impetus to and reduced the cost of the establishment of noncommercial broadcast stations by not requiring from educational agencies the payment of royalties on his frequency modulation patents, except for the nominal royalty of one dollar.

Depreciation Figures

Depreciation of most low powered broadcast equipment is considered to be approximately 10% to 15% per annum; equipment used in noncommercial educational broadcasting will, however, probably be used less per year and over a longer time, permitting a smaller figure to be used for depreciation. Ten percent should be a safe value. Depreciation of any required building construction can probably be considered at approximately 3 to 5% per annum.

Maintenance costs of equipment used in noncommercial educational broadcasting, probably in use only a limited number of hours per day, should be very low and should not exceed the depreciation figures. The tubes and other components of the low powered transmitters used in this service are relatively inexpensive and long lived. FM transmitters, operating at constant efficiencies and not subject to higher voltages during modulation peaks, should be less subject to breakdown and tube troubles. Maintenance of studio and transmitting equipment should not exceed $500 to $1,000 per year at the average station.

The operating costs will also vary over wide limits depending on personnel employed, local salary scales, time operated, power and telephone rates, elaborateness of programs, etc. Operating costs should be far less than for a commercial station however, since the rules of the Commission permit operation of noncommercial educational station by the holder of a second class radiotelephone operator's permit; since personnel such as time salesmen are not required; and since in many cases the personnel may be at least partially drawn from the faculty or student body.

It is believed that the present operators of noncommercial educational stations will be glad to give the benefit of their experience relative to costs of establishing and operating such stations. For information regarding maintenance and operating costs of standard broadcast stations, which are comparable in many respects, it is suggested that reference be made to the Federal Communications Commission release 65515 "Financial and Employee Data Respecting Networks and 817 Standard Broadcast Stations, 1941."

Educators May Plan Now

Educators who are considering the use of radio for the advancement of their educational program may well plan now and take such steps as are possible toward the establishment of an educational station. Upon determining the number of schools to be served and the nature of service to be provided, a determination should be made as to the most desirable location for the transmitter, which should generally be centrally located and have an elevation as high as possible above the surrounding terrain, particularly if rural coverage is to be obtained. It must be kept in mind that radio frequencies employed in this service are subject to some shadow effect, caused by hills and other obstructions, and thus it is important that the transmitting antenna be as high and as clear of obstructions as possible. Schools can be equipped with public address systems, consisting of an amplifier and classroom loud speakers, for future use with the broadcast service. Miscellaneous equipment, such as transcription equipment, amplifiers, control desks, and FM receivers may possibly be built by students under the supervision of members of the faculty, or can be purchased as funds are available. Plans for obtaining the requisite funds which in many cases will be a major problem may well be begun at this time so that there will be a minimum delay when equipment is available.

All planning should be with the advice and council of persons fully qualified in the particular field even though it is necessary to go outside the school staff. Any reasonable expenditures for such services will be more than justified by the economies effected and the assurance of a system that will meet the requirements. A system that is too elaborate or more powerful than the job requires is not only unnecessarily expensive but may prove cumbersome and also may cause unnecessary interference to other stations. On the other hand, a system that is inadequate is unsatisfactory and will prove much more expensive to expand to accomplish the desired service than if it were originally properly designed and constructed.

Filing Procedure

When it is desired to file an application for construction permit, application forms should be requested from the Federal Communications Commission, Washington 25, D. C., or from one of their field offices. These forms are required to be submitted in duplicate and should include a complete statement as to the plans for transmission of programs to the schools within the system. Upon the filing of the application and the granting of the construction permit by the Federal Communications Commission, a permit is issued which specifies required dates of commencement and completion of construction, normally two and eight months, respectively, after the date of grant. Upon the completion of construction, certain tests are permitted before the station license is issued, as indicated by Sections 2.42 and 2.43 of the Commission's Rules. The license application must be filed with the Commission before the completion date specified by the construction permit. Applicants should obtain copies of pertinent portions of the Commission's Rules which describe application procedure and the rules under which educational stations operate. It is therefore suggested that the following portions of the Rules be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., which are available at the prices indicated:

Part 1, Rules of Practice and Procedure	10¢
Part 2, General Rules and Regulations	10¢
Part 4, Rules Governing Broadcast Services Other than Standard Broadcast	10¢
Part 13, Rules Governing Commercial Radio Operators	5¢

In conclusion, a word of caution may not be out of place. When the station is an accomplished fact and is actually in operation, the work is just begun. Radio is a powerful yet delicate tool which must be properly used in order to obtain the desired results. The degree of success attained will depend almost entirely on the skill with which it is used. In many cases the tool will be handed to educators skilled in their own fields but unskilled as to this type of education and who, if they are to be successful, must revise and adapt many of their previous conceptions of instruction. The results first obtained may be discouraging, but with experience and intelligent and diligent use radio in the school has been found to be invaluable. It cannot be too strongly emphasized that the responsibility for the station's operation, both technical and program, should be placed in the hands of persons who are eminently qualified and who give it their primary consideration. Otherwise, it may prove to be of little aid or an actual detriment, like any other tool improperly used.

FREEDOM TO LISTEN A UNIVERSAL PRINCIPLE

(*Speech delivered by FCC Chairman James Lawrence Fly before the Advertising Club of Boston, September 28, 1943.*)

It is with real pleasure that I meet with you here in Boston today. For some time past I have been concerned with the freedom to listen. It is a propitious circumstance that enables me to speak of it in Boston—cradle of freedoms.

For the moment, let's pretend. In recent years a good deal of new radio legislation has been proposed, but I do *not* think the proposal I have in mind has been broached heretofore in this country. Permit me to introduce the following bill for your consideration.

> Be it enacted by the Senate and House of Representatives of the United States of America, that on and after the effective date of this Act it shall be illegal
>
> a. to possess a radio receiver or receiving device capable of hearing any radio transmitter not

programmed by the United States Government;

b. to listen to any radio program not originated by the United States Government;

c. to manufacture or sell any radio receiver capable of hearing programs not originated by the United States Government.

And suppose our bill might provide further that it shall be illegal

> . . . to manufacture, sell, possess or listen by means of a radio receiver which does not have affixed to it a government approval stamp. Such government approval stamps will be placed upon radio receivers only if they meet the following specifications:
>
> a. They must be capable of receiving the programs of two stations which broadcast the Government's programs;
>
> b. They must not be capable of receiving any stations other than those listed in section (a) above.
>
> The appropriate government agency shall "jam" by means of artificial static devices all programs not originated by the Government.
>
> Listening after 10:00 p. m. is forbidden. Listening in groups of more than three is forbidden, except for specific programs to which listening is compulsory.
>
> Free reception at public receivers will be provided for all programs to which listening is compulsory.
>
> Violations of this Act shall be punished by fine and imprisonment, except violation of the provisions relating to reception of prohibited stations. The punishment for listening to such stations shall be death.

Is such a statute unthinkable? Weird? Fantastic? No, let me assure you. The counterpart of almost every one of those provisions, or equally onerous restraints, can be found in one part of the world or another now under Axis domination. Such edicts as the above are not vain imaginings applicable only to existence on another planet. They are in force in our own contemporary world.

Consider the practices in Germany. The State controls the manufacture of radio receivers so that it is impossible to obtain a set capable of receiving a short-wave signal. Furthermore, the standard broadcast range is limited to the German propaganda centers. Not willing to give the German people a sporting chance to sneak a listen to the ideas of the rest of the world, Goebbels makes doubly sure and jams any *verbatim* utterances as they occur.

The will to listen dies hard and the mechanical precautions have had to be strengthened with legal sanctions. An inhuman German statute provides the death penalty for persistent "black listening." Those people guilty of one act of "black listening" are merely thrown into a concentration camp. A wife with guilty knowledge of her husband's "black listening" goes to the concentration camp too. The Japanese militarists go a step further than their German colleagues; they kill and torture Japanese people for what they call "dangerous thoughts." Such fear and tyranny stagger our imagination so that we can hardly imagine that we would be taking our lives in our hands for *thinking* of turning on our radios.

Such moral darkness is a breeding ground for suspicion. There can be no understanding when people are shrouded by the ideas only of the Fuerher, no matter who he may be. The end product for these benighted people is a pathological conviction that war against their fellow-man is a noble thing.

In the fact of this world (or half-world) chaos, can we safely say that our imaginative bill is wholly outside the realm of imagination?

Freedom to listen, at least so far as radio in the United States is concerned, is so elementary a concept that it sometimes escapes attention altogether. In this hemisphere, as well as this nation, people are encouraged to listen to the voices of all their neighbors; many of us listen to our enemies; we are confident that free men can appraise the wheat and the chaff and that the dictators will be unable to alienate citizens of these democracies from the governments they themselves control. We take it for granted when we sit in our own homes, throw the radio switch, and turn the dial, that in this gesture at least we, as listeners, are completely free. We take all of this as a matter of course and all too seldom articulate our underlying confidence that democratic government depends ultimately on a truly informed citizenry.

I would suppose that the first reaction to my fanciful bill would be that our constitution protects us. Whether this bill violates due process or "due substance" or even the commerce clause, I leave to the Harvard Law School professors. I leave to the Harvard Law professors, too, a further constitutional problem that would appear, at least at first blush, to bear on this statute. This is the guarantee of the right to assemble. Millions each night assemble on the various wavelengths; without freedom to listen those assembled are as effectively deprived of their constitutional rights as if, assembled in Boston Common, they were ridden down by the police and clubbed into dispersion. For my own part, I want to orient my thinking on the subject in terms of free speech. To most of us, in a deep emotional sense, freedom of speech is a basic right. I venture to suggest that the freedom to listen is an essential counterpart of freedom of speech.

In the days when Sam Adams was able to rally the people of a colony by forming "committees of correspondence" for the writing of letters, and when James Otis was able to stir even the illiterate by his fiery addresses in the Boston town meeting, freedom of speech was fairly effective. Today, for all we know, a hundred Sam Adams and a hundred James Otis may be writing letters or addressing small corner gatherings with little or no effect upon the vast force of public opinion. All too often today, free speech supplies by itself only a mental catharsis for the speaker. It must be borne in mind that however much the individual has personally enjoyed his freedom of speech there were always serious limitations. How many people could he reach by speech—how many by leaflets—over what distances—through what machinery—and at whose expense? Whatever therapeutic aid to his nervous system he may have enjoyed, there were various limitations in the means of achieving his own purposes as an individual. But there has always been the important need of the democratic nations to create and maintain an enlightened and informed public opinion based, as it must be, upon the facts—fully and fairly presented.

The chief interest of the Founding Fathers, I suggest, was not freedom of speech merely for its own sake or for the sake of the speaker. They, too, had a concern for freedom to listen—for Whitman's "ears willing to hear the tongues." Their philosophy of free speech and press was based in large part upon the beneficial impact upon the people at the receiving end. True democratic government, they wisely felt, rests upon the capacity for self government which, in turn, is founded upon the unstinting diffusion of knowledge. Thus Jefferson said: "Enlighten the people generally, and tyranny and oppressions of body and mind will vanish like spirits at the dawn of day." James Madison, the Father of the Constitution, stated it even more bluntly. He said, "A popular Government, without popular information, or the means of acquiring it, is but a Prologue to a Farce or a Tragedy."

Such is the overtone of a recent Supreme Court opinion, which states:

> The authors of the First Amendment knew that novel and unconventional ideas might disturb the complacent, but they chose to encourage a freedom which they believed essential if vigorous enlightenment was ever to triumph over slothful ignorance. This freedom embraces the right to distribute literature, and necessarily protects the right to receive it.

Our history is rich with battles looking toward a sound basis for democracy, in effect for the informed electorate, and in practical effect for the freedom to listen. What was significant at the beginning of this democracy is emphasized in the modern world. Listening has become one of the vital functions of our modern civilization. A vast amount of public information, public enlightenment, public news and even public education—not to speak of entertainment—now reaches our people via the air waves. Radio has provided the mechanical means for attaining the Founding Fathers' ideal; a great responsibility lies upon those in control.

Do you remember how Woodrow Wilson described the "radio revolution?" Although radio was still in its infancy then—this was September 1919—President Wilson prophetically foresaw its immense global potentialities. He said:

> Do you not know that the world is all now one single whispering gallery? Those antennae of the wireless telegraph are the symbols of our age. All the impulses of mankind are thrown out upon the air and reach to the ends of the earth.

What Wilson foresaw is coming to pass in greater measure. The listening people demanded and got only entertainment from radio in its formative stage; today and for some time past they have demanded, and demanded successfully, that in addition to amusement radio shall carry a full budget of news and discussion. Despite modern transport, our millions of people, widely dispersed or metropolitanly congested, cannot be reached through town meetings. National and world problems today completely overshadow town and colony problems. In this environment the old soap box methods lack any real persuasive force.

It is a fortuitous circumstance that modern science has provided the means for the first adequate realization of free speech. With the advent of radio audiences have become nationwide and even worldwide; their interests national and international. With innumerable listeners, the duty of the speaker to subordinate his interests becomes clear. Few may speak, all may listen. From the very limited nature of the facility it is at once apparent that the paramount interest is not in the single speaker—but in the millions of listeners. Therefore, those who control this mechanism of free speech must treat free speech not as a right but as a duty. They must hold this mechanism of free speech in trust for the people—the listeners.

We have a culture developed in part by radio. It is a common source of information and ideas. This wide country with its divergent groups is becoming aware of itself through radio. Sectionalism is fast disappearing; the unity, the harmony, and the understanding—all these things must rest upon a proper use of this medium of knowledge.

Over four decades ago, Dicey came from England to Harvard Law School to tell its students that "Freedom of discussion and the disintegration of beliefs are so closely interconnected that they may well be considered as two sides or aspects of one phenomenon." Dicey stated the interrelation well. And, in the radio network world today—a day of mass communications—180 million people provide an excellent sounding board to test the validity of beliefs.

Radio appears to have come all the way but in reality it has only approached the crossroads. Radio is a living thing; it must grow and expand as people grow and expand. Despite its achievements we dare not be too smug about it. Restriction, constriction and exclusion must give way to a broader and more democratic approach as to the persons the listening public may hear. Likewise, complete freedom to listen demands that divergent views must be aired. In the market place of ideas diversity of opinion enables us intelligently to sift the sound from the unsound.

The warnings from abroad that prompted me to offer you a mythical statute have been drastic. There are significant, though certainly far less aggressive, restrictions on the freedom to listen on the home front. Simply by careful selection of what is broadcast the freedom of the listener can be tightly restricted. The listener's freedom is thus inextricably bound up with freedom of speech over the air. There is no need for restriction; our own Professor Chafee has well said:

> . . . unremitting regard for the First Amendment benefits the nation even more than it protects the individuals who are prosecuted. The real value of freedom of speech is not to the minority that wants to talk but to the majority that does not want to listen.

There should be no rule of thumb set up to hide behind whenever *any* group requests time on the air. The free radio can become a powerful instrument for the protection of freedom of opinions. A democracy is in many ways like a kettle of boiling water; there must be an open spout for the outlet of steam. Men must be guaranteed their right to express their opinions and ideas. As Justice Holmes once told a friend, "With effervescing opinions as with not yet forgotten champagnes, the quickest way to let them get flat is to let them get exposed to the air." The radio is a perfect outlet for such exposure to the air.

In the post-war world, international broadcasting will stand on the threshold much as our domestic radio stood in the days when Woodrow Wilson foresaw its great possibilities. As the domestic radio has played a large part in welding one nation, so international broadcasting should provide the free flow of information, and generate the tolerance for beliefs, and an appreciation of cultures and thought patterns. Radio is that necessary catalyst upon which we shall rely to bring about a more sympathetic understanding among peoples. It would be harmful beyond prediction to have world radio restricted either by hiding behind a restrictive world policy or by allowing any individual national to go further and adopt restrictions of a more mechanical kind. I cannot but feel that the future peace and security of the peoples of the world must rest in large measure upon enlightenment. If we are to have an enlightened world it must function on the basis of enlightened principles. The thoughts of men must be expressed freely and openly or thinking dries up. Any substitute for the free communication of ideas that may then rush into this vacuum is bound to be dangerous. Witness what we are fighting today.

We are primarily engaged in a struggle for freedom. From the idea of complete freedom itself have sprung many phases of more particularity. My own particular interest is, of course, in communications; and truly transmission is nothing without reception. But I suggest to you a development of this point along broader and deeper lines. All of us must be deeply concerned with bringing this freedom to those we are seeking to liberate and to further expand it for ourselves. I suggest that the principle is fuundamental and must be guaranteed in the post-war world. The growth of international broadcasting and the prospective development of international television demand it. It is inevitable that for good or evil closer relations will exist among nations, races and religious groups. We must strive to make it for the good.

It is also true that no relaxation in the pursuit of the freedom to listen can be allowed to take place when the war is over. Eternal vigilance and undeviating regard for this and comparable principles must be observed if we are to have a lasting peace. Let me remind you again that freedom to listen encompasses more than the ability to spin the dial without fear. With only general policy safeguards the transmitters of all nations must foster a free and complete exchange of thought and the optimum diffusion of knowledge. The right to hear new ideas is part of the freedom to listen and is as much a burden of my theme as is the inadequacy of free speech in the absence of effective mechanisms, and in the absence of ears to listen.

I, therefore, leave with you this fundamental conclusion: that there must be universally accepted the freedom of all peoples to listen without fear and without restraint.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, October 4th. It is subject to change.

Wednesday, October 6

Oral Argument Before the Commission

Report No. B-176:

NEW—Beauford H. Jester, et al., Waco, Texas.—C. P. 1230 kc., 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KVOS—KVOS, Inc., Bellingham, Wash.—Granted modification (B5-MP-1723) of construction permit (B5-P-3237, as modified) for decrease in power from 1 KW to 250 watts, using presently licensed equipment and antenna at site specified in existing license, and extension of commencement and completion dates to 30 days after grant and 60 days thereafter respectively. Dismissed application (B5-MP-1701) for modification of construction permit to extend completion date. Also dismissed application (B5-SSA-69) for Special Service Authorization to operate on **790 kc.** with 250 watts power for the period ending February 1, 1945.

Mutual Broadcasting System, Inc., Chicago, Ill.—Granted authority to transmit programs to Mexican stations known as Radio Mil's Network (B4-FP-117).

KXYZ—Harris County Broadcast Co., Houston, Texas.—Granted Special Service Authorization (B3-SSA-82), for period of 90 days, to operate with power of 5 KW day and 2½ KW night, employing temporary non-directional antenna; and authority to determine operating power by direct measurement of antenna power (B3-Z-1543).

KPRC—Houston Printing Corp., Houston, Texas.—Granted Special Service Authorization (B3-SSA-83) for period of 90 days, to operate with power of 2½ KW night, 5 KW LS, with temporary non-directional antenna; also authority to determine operating power by direct measurement of antenna power (B3-Z-1544).

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted extension of Special Service Authorization using equipment authorized under construction permit as modified, for the period ending April 1, 1944 (B5-SSA-81).

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending October 1, 1945:

KABC, San Antonio, Tex.; KGIW, Alamosa, Colo.; KMYC, Marysville, Calif.; KNET, Palestine, Texas; WACO, Waco, Texas; WGNC, Gastonia, N. C.; WJPA, Washington, Pa.; WSLI, Jackson, Miss.; WSPB, Sarasota, Fla.; KGLU, Safford, Ariz.; KLBM, La Grande, Ore.; WAGM, Presque Isle, Maine; WCRS, Greenwood, S. C.; WEED, Rocky Mount, N. C.; WFNC, Fayetteville, N. C.; WFPG, Atlantic City, N. J.; WLAY, Muscle Shoals City, Ala.; WNOE, New Orleans, La.

The following stations were granted renewals for the period ending August 1, 1945:

KORN, Fremont, Neb.; WJHO, Opelika, Ala.; WMSL, Decatur, Ala.

Licenses for the following stations were further extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending December 1, 1943:

KGGF, Coffeyville, Kans.; KVGB, Great Bend, Kans.; KWFC, Hot Springs, Ark.; BABI, Bangor, Maine; WATL, Atlanta, Ga.; WBLK, Clarksburg, W. Va.; WELL, Battle Creek, Mich.; WING, Dayton, Ohio; WNBZ, Saranac Lake, N. Y.; WTEL, Philadelphia, Pa.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon application for renewal, for the period ending December 1, 1943:

KBPS, Portland, Ore.; KSAN, San Francisco, Calif.; KWAL, Wallace, Idaho; WAOV, Vincennes, Ind.; WAZL, Hazleton, Pa.; WGPC, Albany, Ga.; WIBM, Jackson, Mich.; WILM, Wilmington, Del.; WKEU, Griffin, Ga.; WMAS, Springfield, Mass.; WPAD, Paducah, Ky.; WPAR, Parkersburg, W. Va.

The following stations were granted renewal of license for the regular period:

KSJB, Jamestown, N. Dak.; WCOV, Montgomery, Ala.; KATE, Albert Lea, Minn.; WCBS, Springfield, Ill.; WHFC, Cicero, Ill.

WWDC and synchronous amplifier.—Capital Broadcasting Co., Washington, D. C.—Granted renewal of license on a temporary basis for period of 60 days.

KSUB—Southern Utah Broadcasting Co., Cedar City, Utah.—Granted renewal of license for the period ending June 1, 1945.

WSYB—Philip Weiss, tr/as Philip Weiss Music Co., Rutland, Vt.—Granted renewal of license for the period ending December 1, 1944.

WJW—WJW, Inc., Akron, Ohio.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending November 1, 1943.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Granted renewal of experimental high frequency broadcast station license for the period ending April 1, 1944.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Granted renewal of experimental high frequency broadcast station license for the period ending April 1, 1944.

W8XWI—Guy S. Cornish, area of Cincinnati, Ohio.—Granted renewal of public address relay station (Class II experimental) license for the period ending October 1, 1944.

W2XWE—WOKO, Inc., Albany, N. Y.—Present license for facsimile broadcast station was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending December 1, 1943.

MISCELLANEOUS

WJWA—Birney Imes (Portable-Mobile), area of Columbus, Miss.—Granted voluntary assignment of relay broadcast station license from Birney Imes to Birney Imes, Jr. (B3-ALRY-20).

KTRH Broadcasting Co. (Portable-Mobile), area of Houston, Texas.—Granted construction permit (B3-PRY-291) for a new relay broadcast station to be used with applicant's standard station KTRH; frequencies **1606, 2074, 2102, 2758 kc.,** 50 watts.

KOIN—KOIN, Inc., Portland, Ore.—Denied special service authorization to operate with 10 KW power, using directional antenna at night and make changes in transmitting equipment (B5-SSA-80).

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Denied special service authorization to install new transmitter, increase power from 250 watts to 1 KW and authority to conduct point-to-point communication (B5-SSA-77).

APPLICATIONS FILED AT FCC

560 Kilocycles

WQAM—Miami Broadcasting Co., Miami, Fla.—Modification of license to use present licensed RCA 1 KW transmitter during night hours of operation. (Contingent upon granting of license to cover construction permit) (B3-MP-1543).

590 Kilocycles

WKZO—WKZO, Inc., Kalamazoo, Mich.—Voluntary assignment of license to John E. Fetzer and Rhea Y. Fetzer, doing business as Fetzer Broadcasting Company.

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—License to cover construction permit (B1-P-2868 as modified), which authorized increase in power, installation of new equipment and directional antenna.

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Authority to determine operating power by direct measurement of antenna power.

WHJB—Pittsburgh Radio Supply House, Greensburg, Penna.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

KROY—Royal Miller, Sacramento, Calif.—Construction permit to install new transmitter and increase power from 100 watts to 250 watts. Amended: to change name of applicant to Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney and Will Thompson, Jr., a partnership, d/b as Royal Miller Radio.

KGY—KGY, Inc., Olympia, Wash.—Construction permit to increase power from 100 watts to 250 watts. Amended: to make changes in transmitting equipment.

1270 Kilocycles

WPDQ—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Transfer of control of licensee corporation from Ernest D. Black, E. G. McKenzie and Mrs. Margaret Curtis to L. D. Baggs (18 shares, 60 per cent).

1490 Kilocycles

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Construction permit to mount FM antenna atop present antenna.

MISCELLANEOUS APPLICATIONS

W8XCT—The Crosley Corp., Cincinnati, Ohio.—Modification of construction permit (B2-PVB-23 as modified, which authorized construction of a new experimental television station) for extension of completion date from 10-28-43 to 4-28-44.

WRUX—World Wide Broadcasting Corp., Scituate (Boston), Mass.—License for a new international broadcast station to be operated on **6040** and **7805 kc.**, 7 KW power and unlimited hours of operation, A1, A3 and A4 emission.

NEW—Blue Network Co., Inc., New York, N. Y.—Authority to transmit recorded programs to all broadcast stations under the control of the Canadian authorities that may be heard consistently in the United States.

NEW—Ashbacker Radio Corp., Muskegon, Mich.—Construction permit for a new high frequency (FM) broadcast station, to be operated on **45700 kc.**, with service area of 2,290 square miles.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Burton Brothers & Co., Inc., 267 Fifth Ave., New York, is charged in a complaint with misrepresentation in connection with the sale of a textile product it designates "Burton's Irish Poplin." (5053)

Kay Laboratories, Inc.—A complaint has been issued charging Kay Laboratories, Inc., 150 Niagara St., Providence, R. I., and its president, Joseph P. Kayatta, with misrepresentation in the sale of a medicinal preparation designated "Kaytonik," advertised as a remedy for colds and other ailments. (5054)

Montgomery Ward & Co., Inc., Chicago, is charged in a complaint with disseminating false advertisements concerning two laxative preparations it sells under the names "Dr. Pierce's Purgative Pellets" and "Ward's Bile Salts Compound and Cascara Tablets." (5052)

Al Rosenfeld, Inc., 9 East 38th St., New York, and its officers, Al Rosenfeld and S. Theodore Lande, are charged in a complaint with misrepresentation in the sale of perfumes and toilet preparations. (5051)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Balbo Oil Co., 4425 First Ave., Brooklyn, engaged in the sale of a cooking or edible oil designated "Balbo Oil," stipulated that in advertising the product they will discontinue representing that 20 percent of its content is olive oil, unless such is a fact, or making any representation which tends to convey the belief that its olive oil content is greater than what it actually is. (3728)

Estelle Cobb Brown, East Lynn, Mass., has entered into a stipulation to cease and desist from representing, in connection with the sale of Dr. Carolus M. Cobb's Nasal Spray for Sinus Relief, that the preparation will relieve sinus trouble or the pain or headaches associated therewith, or that it will open sinus passages. (03148)

Cliveden Yarn Co., 711 Arch St., Philadelphia, entered into a stipulation to cease and desist from misrepresenting the fiber content and place of origin of the knitting yarns they sell in interstate commerce. (3727)

Damman Brothers, 228 West 26th St., New York, stipulated that they will discontinue use of the words "Seal" or "Sealine," or other terms of like meaning, to describe furs made from rabbit or any peltries other than seal; and will stop using the word "Beaver" or other words of like import to designate furs made from rabbit or any peltries other than beaver. The stipulation provides for discontinuing the use of such words unless they are compounded with the word "dyed" and immediately followed in equally conspicuous type by the true name of the fur. (3729)

Exterminator Manufacturing Co., Baltimore, stipulated that in the sale of a preparation designated "Ratfinish" he will cease and desist from representing that it is completely without danger to humans, animals and poultry; that it is an effective poison for mice; that rats dying from eating it leave no odor, and that it will drive poisoned rats out-of-doors to die. (03146)

Flock Co., Fourth and Cambria Sts., Philadelphia, stipulated that in the sale of knitting yarns they will cease and desist from the use of the word "Saxony" or other words connoting any foreign geographical origin as a designation for a product which is not imported or made of materials imported from the country or locality indicated by the use of such geographical designations. (3426)

Hopkinsville Milling Co., Hopkinsville, Ky., has stipulated to cease and desist from representing that a flour it sells under the name "Enriched Sunflour" furnishes one with his entire daily minimum requirement of Vitamin B_1 or niacin, gives one "health assurance," or contains all the necessary vitamins or double the minimum standard of calcium. (03145)

Modern Printing and Calendar Publishers, Inc., 82 West Washington St., Chicago, stipulated that in the sale of printed material it will discontinue using the words "printing" or "publishers" in its corporate or trade name, or representing that it is engaged in the publishing business or prints any material sold by it until it actually owns and operates or absolutely controls a printing establishment. (3724)

Neal Advertising Agency, trading as Illinois Merchandise Mart, 500 North Dearborn St., Chicago, engaged in the sale of billfolds and other merchandise, entered into a stipulation to cease and desist from use of the words "genuine leather" to describe a product not composed wholly of top grain leather; from use of the word "calfskin" as descriptive of a product not composed wholly of calfskin; and from use of the words "leather," "calfskin" or other words of like meaning to convey the belief that the product so designated is made of top grain leather. (3725)

Standard Manufacturing Co. and Standard Container Co., 413 Lafayette St., New York, stipulated that in the sale of corrugated and cardboard containers they will cease and desist from the use of the words "Manufacturers," "Manufacturing" or "Factory," or the abbreviation "Mfg." in their trade name, advertisements, trade literature, or on delivery trucks so as to imply that they are manufacturers of containers or any other product not made by them, or that they actually own and operate or absolutely control an establishment in which such merchandise is manufactured. (3730)

Vanco Co., Brady, Nebr., entered into a stipulation to cease and desist from representing that the preparation they sell under the name "Vanco Ointment" prevents, cures or penetrates to the source of a cold; that it draws out congestion or pain or has any effect upon congestion or pain in excess of acting as a counterirritant, or that it is a remedy or cure for a sinus condition aggravated by a cold or for pneumonia or influenza. (03147)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Globe Inheritance Bureau, 401 Land Title Bldg., Philadelphia, has been ordered to cease and desist from misrepresentation in the sale of form letters and envelopes designed to be used by creditors and collection agencies in obtaining information concerning delinquent debtors. (5012)

Nature Seed Co., 175 E. Broadway, New York, selling and distributing a medicinal preparation designated "Nature Seed" has been ordered to cease and desist from false advertising and misrepresentation of the preparation. (4926)

Fly Speech

Chairman Fly's speech on "Free Speech", given before the Radio Executives Club of New York, October 7, is reprinted in full in this issue of the "REPORTS" under the FCC section heading.

REP. CLARENCE LEA OF CALIFORNIA IS NAMED SELECT COMMITTEE HEAD

Representative Clarence Lea, California Democrat and chairman of the House Interstate and Foreign Commerce Committee, has been named chairman of the Select Committee investigating the FCC to succeed Eugene E. Cox of Georgia, who resigned last week.

A native of California, Congressman Lea attended Stanford and Denver universities and was admitted to the bar in 1898. After a career as an attorney is private and public life, Congressman Lea entered Congress in 1917 and has been there since.

Following is the statement of Speaker Sam Rayburn issued at the time of Congressman's Lea's appointment:

"I have appointed as Chairman of the Special Committee to investigate the Federal Communications Commission the Honorable Clarence Lea of California. I have served in the House with Mr. Lea for 27 years, many of these years as a colleague on the Committee on Interstate and Foreign Commerce.

"Mr. Lea is a man of splendid courage, unimpeachable integrity, and great ability. He is possessed of a splendid judicial temperament and his fairness cannot be questioned."

The following statement was made by Congressman Lea when he was appointed:

"The Federal Communications Commission is an agency of Congress. It was created by authority of that provision of the Constitution which makes it the duty of the Congress to regulate interstate commerce.

"It is selected to perform a congressional function.

"The duties of this Commission, like many other functions committed to Congress by the Constitution, must be performed by administrative personnel appointed by the Executive Department. Congress is nevertheless responsible, but cannot perform the detailed administrative functions of such agencies. The responsibility of this agency, however, is primarily to the Congress.

"Congress is entirely within its rights in investigating the manner in which this or any other of its agencies performs its functions.

"The resolution adopted by Congress providing for the investigation of the Federal Communications Commission directed this Committee to conduct a study and investigation of three phases of this Commission in particular. This resolution made it the duty of this Committee to go into the question of the organization of the Commission, its personnel, and its activities, with a view of determining whether or not the Commission, in its organization, in the selection of its personnel, and in the conduct of its activities, has been, and is, acting in accordance with law and in the public interest.

"I will expect that, with a concurrence of the other members of this Committee, we will give the answers which Congress has thus made our responsibility. I trust that the investigation will not rest on a plane of personal controversy, but rather on the *important* question as to whether or *not*, this agency and its personnel have been and are now properly performing their duties, their public duties, to the country.

"We should measure all of the activities of the Commission, and its personnel, from the standpoint of their duty to the nation as measured by the law by which their duties are defined. In other words, a broad public interest is involved in this Commission and its activities, and the work of the Commission must be measured from that standpoint.

"The Interstate and Foreign Commerce, of which I am Chairman, has jurisdiction over legislation affecting this Commission. I trust that the investigation may provide constructive information to aid the work of our Committee.

"I have not followed the details of the investigation so far conducted. So I must first bring myself up to date as to what has been done in the investigation and then, in cooperation with the Committee, proceed to its completion."

REPORT ON A. F. OF M. TRANSCRIPTION NEGOTIATIONS

The hearings before the War Labor Board panel in connection with the A. F. of M. transcription contract have been temporarily suspended and mediation is now being carried on in the attempt to clear up some of the ambiguities of the contract recently signed by Decca, World Broadcasting System, Empire Broadcasting Corp. and WOR Recording Studios.

It is believed that this phase of the proceedings will be concluded shortly, but if the mediation is not successful, the hearings will be immediately resumed and pushed to a conclusion within the next two or three weeks. The industry will be kept fully advised of developments.

TUBE AND BATTERY CONFERENCES BEGIN

The civilian tube and battery situation received extended consideration by top-flight Washington officials on Monday, October 4.

The series of conferences began with A. D. Whiteside, WPB vice chairman for Civilian Requirements. NAB was

TUBE AND BATTERY CONFERENCES BEGIN

(Continued from page 411)

represented by Neville Miller, Howard Frazier, Robert Bartley and Arthur Stringer.

Mr. Whiteside was positive in his statement that there had been no change in the government policy on maintaining domestic radio throughout the emergency. He asserted that ways and means will be found to secure the required tubes to maintain civilian radio.

Our government's policy is identical with that of Great Britain. The English, however, are unable to produce all of their requirements for maintaining 9,000,000 receivers and secure approximately 35% of their civilian receiver tubes from this country.

OWI RADIO ADVISORY COMMITTEE MEETS; ISSUES STATEMENT

The OWI Radio Advisory Committee met Tuesday afternoon, October 5, in the office of Palmer Hoyt, director of Domestic Branch of OWI. The committee was welcomed by Elmer Davis who expressed his appreciation to the committee members for their willingness to serve.

The committee discussed with the staff past operations and there was a general discussion looking toward a closer and more effective cooperation between the government, the broadcasting industry and the OWI. The committee issued the following statement:

"In its initial meeting with the Office of War Information, this afternoon, the Radio Advisory Committee carefully reviewed the past operations of the Radio Bureau of the Domestic Branch and considered suggestions pointing toward a closer and more effective cooperation between the government, the broadcasting industry and the OWI. The Advisory Committee commended the Radio Bureau for the efficient functional cooperation rendered to the industry by coordinating the needs and requests of the various governmental agencies and budgeting these requests in a form that could best be handled by the industry, with due evaluation of the needs of the government. The Radio Advisory Committee requested that all future requirements of governmental agencies for radio facilities in their various drives and campaigns, be cleared exclusively through the OWI so that full advantage could be taken of the coordinating functions provided by the OWI.

"The Radio Advisory Committee also commended the OWI for the recent improvement and expansion of its activities in facilitating the release of war news and recommended a continuation and expansion of such material because the broadcasters are acutely aware of the desire of the listeners of America for all of the war news, whether it is good or bad, that it be released to them factually at the earliest possible moment that the exigencies of military and naval strategy will permit."

The following were present: Martin Campbell, WFAA; Leo Fitzpatrick, WJR; Neville Miller, NAB; Frank Mullen, representing Niles Trammell, NBC; William Paley, CBS; Herbert Pettey, WHN; Lewis Allen Weiss, Don Lee; Mark Woods, Blue. Miller McClintock, Mutual was unable to be present.

PEABODY AWARDS STATION CLASSIFICATION OUTLINED

For purposes of the 1943 George Foster Peabody Radio Awards, regional stations will include both medium and large stations—all those of 1,000 watts or above. Local stations will signify those of less than 1,000 watts.

This announcement was made today by John E. Drewry, dean of the Henry W. Grady School of Journalism, which administers these awards.

All types of radio stations are both eligible and invited to participate in this year's awards, Dean Drewry emphasized, explaining that "regional" was used in a general sense and was not meant to exclude clear channel stations from the awards.

Awards will be made in the following categories:

1. That program or series of programs inaugurated and broadcast during 1943 by a regional station (any station of 1,000 watts power or above) which made an outstanding contribution to the welfare of the community the station serves.
2. That program or series of programs inaugurated and broadcast during 1943 by a local station (any station of less than 1,000 watts) which made an outstanding contribution to the welfare of the community the station serves.
3. Outstanding reporting of the news.
4. Outstanding entertainment in drama.
5. Outstanding entertainment in music.
6. Outstanding educational program (adult or child).
7. Outstanding children's program.

Any radio station or network is eligible to receive the award for news reporting, drama, music, or education. Only local and regional stations are eligible to receive the community welfare programs.

Entries may be submitted by individual stations, networks, radio editors of newspapers and magazines, listener groups, or any person or organization wishing to direct the attention of the Peabody Board to a special program or programs. The Board in its selections will not necessarily be restricted to entries, but will consider the reports of its own listening-post committees, and may on its own initiative select a program or a station for an award. The Board also reserves the right to make more or less than seven awards, depending upon the entries and the circumstances at the time of the awards.

December 10 is the closing date for the 1943 entries or recommendations, which should be sent to the Dean, Henry W. Grady School of Journalism, The University of Georgia, Athens. Forms if desired may be secured from that address. Each may be accompanied by one transcription. If more are necessary to give the board members a fair understanding, special arrangements can be made.

Listener Activity

MRS. DOROTHY LEWIS IS ON ANNUAL FALL TOUR

The annual fall tour taken by Mrs. Dorothy Lewis, NAB coordinator of listener activity, is underway with Mrs. Lewis covering 23 cities in the west, middle west and northwest on the first "section."

Purpose of the tour is to stress radio's strategic war services, to study women's organization programs and work, to study children's programs and radio education projects, and to develop by conference and through scheduled talks a better understanding of American radio.

Due to war conditions no major conferences are scheduled in some cities, but small round table meetings have been arranged. Times of planned arrivals and departures by train are stated, but allowance must be made for late arrivals on long runs.

To date, Mrs. Lewis has covered Chicago and Rockford, Ill., and Minneapolis, Minn., having left New York October 4.

Balance of Mrs. Lewis' itinerary is as follows:

Mon. 11—Ar. Des Moines, 8:00 AM (RI), Fort Des Moines Hotel, Des Moines Radio Council, Station Headquarters KSO % Mr. Craig Lawrence, Leader: Mrs. Hazel Hillis, 1625 6th Ave., Des Moines, Iowa.

Tue. 12—AM to Iowa City, Lev. 7:15 AM, Ar. 9:15 AM (RI) Iowa University, Station Headquarters WSNO % Mr. Carl Menzer, Leader: Mrs. Pearl Bennet Broxam, University of Iowa.

PM to Cedar Rapids by Electric, Station Headquarters WMT % Mr. William Quarton, Leader: Mrs. Margaret Stoddard, 2212 Country Club Parkway, Cedar Rapids.

Wed. 13—Cedar Rapids, Cedar Rapids Radio Council Conference, Address Dinner Iowa State PTA Convention at Hotel Roosevelt, Lv. Cedar Rapids PM to Iowa City by Electric, Sleeper to Omaha 1:35 AM October 14th.

Th. 14—AM Ar. Omaha 8:25 AM (RI), Fontanelle Hotel, Conferences, Station Headquarters WOW % Mr. John J. Gillin, Jr., Leader: Mrs. W. F. Ottmann, 2425 Mary Street, Omaha.

Fri. 15—Lv. Omaha 8:15 AM, PM En route to Salt Lake City.

Sat. 16—AM En route, PM Ar. Salt Lake City 7:20 PM (UP), Hotel Utah, Station Headquarters KSL % Mr. Earl J. Glade, Sr., Leader: Mrs. Irma Bitner, 173 S. 12th East, Salt Lake City.

Sun. 17—Rest, Address Salt Lake Tabernacle Choir.

Mon. 18—Salt Lake City, Conferences, Lv. Salt Lake City 8:00 PM (UP).

Tue. 19—En route to Missoula, Butte, Luncheon, PM Lv. Butte 12:49 PM (Milwaukee RR), Ar. Missoula 3:39 PM (Milwaukee RR), Hotel Florence, Station Headquarters KGVO % Mr. Art Moseby, Leader: Mrs. D. J. Reed, President PTA Council, Missoula.

Wed. 20—Missoula, Florence Hotel, Radio Conference, Lv. to Spokane 11:15 PM (Mil).

Thu. 21—Ar. Spokane 8:00 AM (Mil.), Hotel Davenport, Station Headquarters KQA % Mr. Harvey Wixson, Conferences, Leader: Mrs. A. V. Overman, 1007 W. 19th, Spokane, Lv. to Seattle 10:45 PM (Mil.).

Fri. 22—Ar. Seattle 8:00 AM (Mil.), Olympic Hotel, Conferences, Washington Education Association, Station Headquarters KJR % Mr. Bert Fisher, Leader: Mrs. Dale Marble, 8316 Dayton Avenue, Seattle.

Sat. 23—Seattle, Olympic Hotel, Radio Conferences, Lv. to Portland 11:30 PM (Gr. No.).

Sun. 24—Ar. Portland 8:00 AM (Gr. No.), New Heathman Hotel, Station Headquarters KEX % Mr. Arden Pangborn, Leader: Mrs. B. C. Taylor, 2793 S. W. Roswell Avenue, Portland, PM Evening Conferences Civic Theatre.

Mon. 25—Portland, New Heathman Hotel, Radio Council Conferences.

Tue. 26—Portland New Heathman Hotel, Radio Conferences, Lv. to Sacramento 7:00 PM (SP.).

Wed. 27—AM, En Route, Ar. Sacramento 6:00 P. M. (SP.), Hotel Senator, Station Headquarters KROY % Mrs. Royal Miller, Leader: Mrs. George M. Struve, Courtland (near Sacramento).

Thu. 28—Sacramento, Hotel Senator.

Fri. 29—Radio Conferences.

Sat. 30—Lv. to Oakland 7:35 AM (SP.), Lv. to Fresno 11:30 P. M. (Sp.).

Sun. 31—Ar. Fresno 5:40 AM, Hotel Fresno, Rest.

November:

Mon. 1—Fresno Hotel, Radio Conferences, Station Headquarters KMJ % Mr. Keith Collins, Leader: Mrs. J. Ross Bowler, 4475 Inyo St., Fresno, Lv. to Los Angeles 12:15 AM (Nov. 2nd) (SP.).

Tue. 2—Ar. Los Angeles 9:30 AM (SP.), Address: % Mr. William Lee Woollett, Franklin Avenue, Hollywood, or % Mr. Don Gilman, V.P. Blue Network, Sunset & Vine, Hollywood, Leader: Mrs. R. H. Marvin, 211 E. Illinois St., Anaheim.

Wed. 3—Radio Conferences, Wilshire Ebell Club.

Thu. 4—West Coast Regional Conference, New England Women.

Sun. 7—Tea, All Patriotic Societies.

Thu. 11—Lv. Los Angeles 8:30 PM (SP) to Phoenix.

Fri. 12—Ar. Phoenix 9:50 AM (SP), Westward Ho Hotel, Radio Conference, Station Headquarters KOY % Mr. H. A. Safford.

Sat. 13—Phoenix, Westward Ho Hotel, Lv. Phoenix 4:00 PM (SF) to Albuquerque.

Sun. 14—Ar. Albuquerque 8:50 AM (SF), Francescan Hotel, Rest, Station Headquarters KOB % Mr. Frank Quinn, Leader: Mrs. G. D. Ruoff, 318 Grand Avenue, Albuquerque.

Mon. 15—Albuquerque, Francescan Hotel, Radio Conference, Lv. Alburquerque 8:10 PM to Denver.

Tue. 16—Ar. Denver 12:30 PM (SF), Albany Hotel, Radio Conference, Station Headquarters KOA % Mr. J. R. McPherson, Leader: Mr. Robert Hudson, Rocky Mountain Radio Council, 509 17th St., Denver.

Wed. 17—Denver, Albany Hotel, Lv. to Wichita 3:30 PM (SF).

Thu. 18—Ar. Wichita 1:10 PM (SF), Lassen Hotel, Station Headquarters KFBI % Mr. Roy Linton, Leader: Dr. Forrest Whan, University of Wichita, Lv. to Kansas City, Mo. 11:59 PM (SF).

Fri. 19—Ar. Kansas City 6:30 AM (SF), Mail: % Mrs. George P. Truitt, 6124 Walnut Street, Kansas City, Mo., Conference, Station Headquarters KCKN % Mr. Ellis Atteberry, Leader: Mrs. R. O. Baker, 820 E. 43rd Street, Kansas City.

Sat. 20—Lv. Kansas City 8:45 AM (Wabash) to Columbia, Ar. 11:55 AM Centralia (to Columbia by car), Daniel Boone Hotel, Conference, Stephens College, Leader: Dr. Sherman Lawton, Radio Director.

Sun. 21—AM Columbia, Stephens College, Lv. Columbia 6:45 PM, Ar. Centralia 7:30 PM, Lv. Centralia 7:47 PM, Ar. St. Louis 10:25 PM.

Mon. 22—Lv. St. Louis 9:25 AM for New York.

Tue. 23—Ar. New York 9:00 AM.

BMI REACHES ALL-TIME HIGH OF 831 STATIONS

Carl Haverlin, vice president of BMI in charge of Station Relations, has announced additional stations have joined BMI, bringing the total to the all time high of 831 stations, leaving only 73 stations which do not have a BMI license. This shows a remarkable industry-wide support of BMI.

GMC EXECUTIVE PRAISES WAR ADVERTISING COUNCIL

The following letter was sent to Chester J. LaRoche, chairman, War Advertising Council, from Don U. Bathrick, of the New York office of General Motors Corp.:

> "Just want to drop you a line to tell you that from many sources I hear of the fine work being done by the War Advertising Council. It is apparently very much appreciated down here by many different departments of the government, and I think that you, the Board of Directors and all members of the Council should be told that your efforts are bearing fruit. The swell work you are doing is not being overlooked and, in my opinion, it is a great compliment to advertising and will do much to quiet the element down here who feel that all advertising is unnecessary."

BARTLEY ON DECK

Robert T. Bartley, new NAB War Director, is installed in Washington headquarters and is pitching into headquarters' activities with the rest of the staff. He already has made many contacts with government bureaus and departments and is taking over some of the duties relinquished by Russell Place, former NAB counsel now with OSS.

WHO; HERB PLAMBECK AND THE 336TH CORN BELT HOUR

Woody Woods, war program director of WHO, has sent NAB headquarters a couple of letters recently on the activities of Herb Plambeck, WHO farm editor who just returned from an overseas trip to war fronts, and a report on the WHO 336th Corn Belt Farm Hour and the Third War Loan Drive. We give you Woody's reports as is:

"Herbert Plambeck, WHO farm editor and U. S. war correspondent, returned last week from a two months' tour of the British Isles, arranged by the British Broadcasting Corporation.

"He was a guest of the Ministry of Information at the invitation of the British Embassy to observe the agricultural war efforts of farm families in England, Scotland, Wales and Ireland. Appointed as a U. S. war correspondent for WHO by Headquarters, U. S. European Theatre of War, Mr. Plambeck visited many of the American army camps.

"Each Saturday noon, he broadcast a quarter-hour report of his impressions and observations by short-wave from the BBC studios in London through GSP on 15.31 megacycles which was rebroadcast simultaneously by WHO whose signal in turn was picked up and rebroadcast by other Iowa stations. To insure reception in Iowa, the same program was broadcast by other English short-wave stations on 9.58 and 11.68 megacycles during evening hours, transcribed by WHO and rebroadcast at 10 P. M. each Saturday night.

"On August 14th, the regular Corn Belt Hour (a half-hour musical and interview farm program) was originated in the BBC studios with English farm men and women as talent, broadcast by short-wave from GSP and rebroadcast with remarkable clarity by WHO, WOC, KICD, KBUR, KBIZ, and WOI. One of the Saturday programs on August 7th was arranged through NBC by short-wave to New York and by line to Des Moines.

"An additional series of programs specially arranged for WHO through BBC short-wave from London is being planned. Mr. Plambeck will continue his series of talks from WHO as a regular feature.

"The 336th Corn Belt Farm Hour was on the air Saturday, September 25 for the Third War Loan Drive in 100% cooperation with the Iowa War Finance Committee. It has been broadcast 336 consecutive Saturdays over WHO. From time to time, other radio stations have carried the broadcasts as special events justified; but last Saturday broke all records when 14 Iowa stations and one South Dakota station carried Plambeck's special farm program. They were WOC, KSO, KMA, WNAX, WMT, WOI, KBUR, KICD, KTRI, KSCJ, KROS, WSUI, KGLO, KFJB and the originating station, WHO. Program content consisted of talks and interviews by county chairman of Greene County, first Iowa county to reach its quota in the Third War Loan drive; state president of state 4-H Club girls, a seven-year-old schoolboy from Polk City, Iowa, and the superintendent of his school; a member of the Iowa AAA, a farmer veteran of World War I, a farm woman (a widow who operates and personally manages a four hundred acre farm), a U. S. Navy Petty Officer with 24 years of service who said among other things, that the personnel of the Navy Recruiting Station in Des Moines was allocating 22% of the payroll to War Bond purchases; and the executive manager of the Iowa War Finance Committee. The broadcast was produced and directed by Mr. Plambeck."

RADIO NEWS CURRICULA WILL BE DISCUSSED

(Released by NAB News Bureau)

Standards of radio news writing and radio news broadcasting curricula in schools and colleges will be discussed Friday, October 15, by a sub-committee of the Radio News Committee of the National Association of Broadcasters in New York City.

Paul White, director of news broadcasts at CBS, and Bill Brooks, NBC director of special events, are working with Walt Dennis, news committee secretary, as the sub-committee.

Lyman Bryson, director of education for CBS, and Dr. James R. Angell and William Burke Miller of NBC's public service division will meet with the news committee sub-committee as advisors and counsellors.

It is proposed to set up curricula standards for radio news writing and radio news broadcasting courses, modeled after those now in effect at such universities as Northwestern, Columbia and Minnesota. Principal end in view is to help alleviate the serious manpower shortage in broadcasting newsrooms.

Engineering

PRIORITY REVISIONS

Preference rating order P-133 has been revised by WPB to make it the exclusive controlling order for obtaining maintenance, repair and operating supplies for radio broadcasting and communication. CMP regulations 5 and 5A, governing expenditures up to $500 for capital equipment under the MRO rating, do not apply to these industries.

The amended order continues the AA-2 rating and the MRO symbol to broadcast stations for obtaining maintenance repair and operating supplies.

For operating supplies the rating of AA-5 with the MRO symbol is specifically assigned for the businesses of sound recording for commercial, educational and industrial purposes and in the operation and maintenance of public address, intercommunication, plant sound and similar electronic systems, including systems for the controlled distribution of musical programs.

Recording blanks to be used exclusively for broadcast purposes may be purchased by broadcast stations under the preference rating AA-2. Blank discs to be used for purposes other than broadcasting are assigned the preference rating AA-5 by the modified order.

Other changes in order P-133 include a clarification of tube inventory restrictions. Use of ratings and allotment symbol to buy or repair a tube is prohibited unless a person has in stock less than one new and one rebuilt tube, or two rebuilt spare tubes per active socket. However, no important change in the average radio station stock is likely to result from this restriction. Another added restriction bars use of the ratings to obtain supplies for War Emergency Radio Service, the amateur operators group under the Office of Civilian Defense.

Service repair shops doing maintenance and repair work for persons engaged in radio communication may use the rating and symbol of the customer to do such work, and the restriction on use of ratings apply as to the customer.

Tin and Fat Salvage

In an attempt to make salvage broadcasts more efficient, NAB asked all stations on September 29 how fat and tin collections were going. The idea was to discover any cities where fats were being destroyed after collection or not being collected; and cities where tin cans were not being properly cared for.

Helpful replies are acknowledged from stations listed below. Several observations in the incoming letters bear repeating because they point to situations that need correcting.

Tin Cans in Virginia, Minn.

"The tin cans are piling up on the grocery stores so that grocers no longer have room for additional cans and many are refusing to accept them," says Greg Rouleau, manager, WHLB, Virginia, Minn.

Dick Redmond, WHP, Has Point

"To the best of our knowledge, the stuff isn't being thrown into the river, but we do have plenty of reason to know that all is not well in the scrap pile. Reason being that we are frequently subjected to calls from listeners who wish to register a vast variety of complaints over the situation. Most of these complaints can be classed as being 'petty' but the one which is the most constant source of trouble is that 'the butcher on the corner refused to take our waste fats.'

"Trouble is, the complaint doesn't stop there. The listener is usually extremely resentful and demands an explanation as to 'whether the scrap drive is on the level,' and some tell us in no uncertain terms that they are 'beginning to doubt everything they hear over the air.' The latter remark is of course a spur of the moment impulse, (at least we hope it is), but it's an indication of something that can become extremely unhealthy.

"In an attempt to smooth things out, in cases where we can get the listener's name, we call the scrap drive authorities and report the matter. They in turn call the butcher. Then the butcher gets sore at us for butting in and before it's all over, everybody is annoyed with everybody and we're in the middle of the scrap . . . (and I don't mean the kind you can salvage).

"I do want to say in closing, that the authorities are also extremely cooperative and only too anxious to smooth the thing out, but it is our feeling that a thing of this kind can't be corrected once it has started. It's bound to find its way into the more serious phases of the war.

"That's how it is in Harrisburg and vicinity, and here's wishing you success in any steps you may take to correct the situation."

The above is from Dick Redmond, WHP, Harrisburg, Pa. Mr. Redmond attached a typical letter from a listener which follows.

Typical Listener Complaint

"So many of your broadcasts are to housewives to save fates. It would be wise to broadcast to the stores and butchers to accept the fats. I find, after saving it, the worst job is to get rid of it. Last Saturday my daughter took some to two different butchers. The last one, at 6th and Boas, even used profane language and was not going to take it. She told him she was going to let it sit, then he took it. There are also butchers in the Broad street market who will not take it."

Junior Commandos Collect Fat

The success of fat collection in Roanoke, Va., according to Jack Weldon, program director, WDBJ, is due in a large part to the activities of the Junior Commandos.

> NOTE TO MANAGERS
>
> Since fat and tin collections are important to the war effort, stations can make a further contribution by being sure that these products are collected and handled properly. Dick Redmond, in letter below, clearly points out what happens to radio unless the entire operation is clean cut.
>
> Paul Morgan, government man, said that he will make every attempt to clean up bad situations which are reported by stations to NAB. We will appreciate your help.
>
> Sincerely yours,
>
> ARTHUR STRINGER

They call on housewives every Saturday and deliver the collected fat salvaged to the schools. There it is picked up by a local renderer.

Campfire Girls Collect Fat

LeRoy Stahl, program director, KFBB, Great Falls, Mont., is sure that every pound of fat collected locally gets into the proper channels.

"The campaign locally," he said, "is under the sponsorship of the Campfire Girls. They collect it twice a month on regular routes, or individual donations can be made at any time at their headquarters. The girls pay the housewives in War Stamps although many housewives donate the fats without other consideration. All proceeds from the sale of the fat by the Campfire Girls go into the funds of the various Campfire Groups.

"Personally, we think this is superior to having the butcher do it. It's a big proposition for the girls, one they really work at, while for the butchers it's only an added pain in the neck."

Fats Thrown in River

The letter which caused this investigation came from Harper M. Phillips, general manager, KYUM, Yuma, Arizona, and is as follows:

"It has been revealed that due to the lack of proper collection, the waste fats from the vicinity of Yuma are being dumped into the Colorado River!

"Because so much stress has been placed on this particular drive by the OWI Allocation Plan, we at KYUM feel that this condition reflects on the part radio is playing in the war effort.

"But what I would like to know is whether or not similar situations exist in other parts of the country? And if so, isn't there something more that we as an industry can do in this regard?

"We use the OWI announcements for the waste fats drive, and get results. But should our job stop at that point? Should we continue our efforts even further and see that these fats are packed and shipped to the proper agency"

Paragraph from newspaper clipping relating to dumping fats into river:

> "Mayor Ingall asked Supt. of Streets Haupt how the tin can drive was getting along. Haupt replied that only about 50 pounds of the cans had been collected and that the reason for the lack of response apparently was that the people were

disgusted with the way previous drives had ended, notably the scrap iron campaign, most of the iron still standing on the Madison Ave. lot more than a year after the drive. *Also the waste fat drive, with the butcher shops full of jars of waste fats which had not been collected as promised. Consequently the butchers will accept no more waste fats and the street department has to dump the waste fat into the river.*"

Thanks to the Following

WCOV, Montgomery; WFOY, St. Augustine; WHO, Des Moines; WAVE, Louisville; WFBR, Baltimore; WHLB, Virginia; KMBC, Kansas City; KFBB, Great Falls; WSNY, Schenectady; WHP, Harrisburg; WMBS, Uniontown; WJHL, Johnson City; WRNL, Richmond; WRVA, Richmond; WDBJ, Roanoke.

FEDERAL COMMUNICATIONS COMMISSION

NOBLE'S STATEMENT TO FCC ON BROADCAST POLICY

FCC Chairman James Lawrence Fly has announced receipt of a statement from Edward J. Noble, who recently purchased, subject to Commission approval, the stock of The Blue Network, Inc., from the Radio Corporation of America, outlining the policies he plans to follow in allocating time on the air.

The statement was requested by the Commission in a public hearing on the proposed transfer on September 20. The statement has been placed in the public record of that proceeding and will be considered by the Commission in its decision on the transfer.

Mr. Noble's statement follows:

"Federal Communications Commission,
Washington, D. C.

DEAR SIRS:

At the adjourned hearing on September 20, 1943 regarding the proposed transfer of the ownership of The Blue Network, Inc. to American Broadcasting System, Inc., of which I am the sole stockholder, I was requested to submit to your Commission for inclusion in the record a written statement of general policy with respect to the sale of broadcasting time for other than the advertisement of commercial goods and services which would be put into effect in event of approval by the Commission and consummation of such transfer.

After careful consideration of the matter and with realization, which I am sure the Commission shares, of the difficulties and perplexities involved in actual practice and administration, I am prepared to say that my policy, stated in general terms, will be to refrain from adopting any restrictions which will automatically rule out certain types of programs on the basis of the identity or personality of the individual, corporation, or organization sponsoring or offering them. I propose to meet each request for time with an open mind and to consider such requests strictly on their individual merits and without arbitrary discriminations. More particularly, I think that the operation of a national network should follow a policy whereby all classes and groups shall have their requests, either for sponsored or sustaining time, seriously considered and network time determined in accordance with true democratic principles and with the aim of presenting a well-rounded and balanced broadcast service in the best interests of the public and of the Network.

With regard to the sale of time in addition to the sustaining time already provided for the discussion of controversial issues, consideration will be given to the use of a limited amount of time for this purpose insofar as consonant with the maintenance of listener audience and interest and thereby of the usefulness of the Network as a medium of public discussion.

At the above hearing I was also asked to advise regarding instances in which station WMCA has sold time to organizations other than business organizations, and in that connection wish to advise that time has been sold by that station to the following non-business organizations:

*Gospel Broadcasting Ass'n, Los Angeles, Calif.
*Young Peoples' Church of the Air, Phila., Pa.
*Lutheran Laymen's League, St. Louis, Mo.
First Baptist Church, New York City
Sunday Morning Meditations, New York City
St. Christopher's Inn, Gramoor, N. Y.
Society of Jewish Science, New York City
Unity School of Christianity, Kansas City
Political parties during campaigns.

(* Fed to WMCA by Mutual Broadcasting)

In this connection I may add that station WMCA under my direction has recently accepted from the Greater New York Industrial Union Council of the C.I.O. one minute "spot announcements" under its sponsorship urging voters to register for the Fall elections.

Very truly yours,
/s/ EDWARD J. NOBLE."

FREE SPEECH

An Exploration of The Broadcaster's Duty

(Address by Chairman James Lawrence Fly, FCC, before the Radio Executives Club, New York City, October 7, 1943.)

Two weeks ago in Boston, and again Tuesday night over the Columbia Broadcasting System, I outlined what seems to me one of the important goals to be achieved in the post-war settlements—freedom to listen. As you know, the Axis-dominated portions of the world have no such freedom today. Nazi radio receivers are limited in range and frequency so that only the outpourings of domestic propaganda transmitters are audible. Broadcast signals from outside the Axis sphere of influence are on occasion jammed. And listening to such broadcasts is made a criminal offense, punishable in some instances even by the death penalty.

Such conditions, it seems to me, are intolerable anywhere on the face of the earth if we are to build a sound and peaceful post-war world. For freedom to listen is in some respects as important as the other freedoms for which we fight, and must be similarly guaranteed. In the modern world, freedom of speech is not enough if it is not complemented by freedom to listen—which can be defined broadly as access for the general public to what is said by means of the mass medium for the dissemination of ideas and opinion—the radio.

Here in the United States, we today have freedom to listen in an almost absolute degree. Our radio receivers have free-turning dials and band-switches, and there is no law which hinders listeners from tuning in the program of their choice—or from turning off the radio altogether.

The listeners, however, are shackled by a few outmoded conventions which in reality the industry should never have inflicted on its audiences. Radio is the greatest medium thus far created for the dissemination of information. Those entrusted with the facilities of radio cannot impair the freedom to listen by restrictions imposed at the transmitter end.

One such restriction is the ban imposed by some stations and networks on the sale of time to groups and organizations and the discrimination against such groups or organizations imposed by others. Thus cooperatives, small business men's associations, labor organizations, and all sorts of other groups find it either difficult or impossible to buy time on the air.

This restriction on free speech arises from the fact that radio has been tremendously successful in promoting the sale of merchandise and services. Because of this success, some elements in the industry argue that time should be sold *exclusively* to vendors of merchandise and services.

Narrow and Confining

To my way of thinking, that sort of talk is altogether too narrow and confining for a free people, proud in its freedom and prepared to fight to the death to maintain its liberty. Of course, the sale of merchandise is an essential ingredient in our way of life, and one to be defended. But to say that America means nothing more than that, to forget our glorious heritage of *ideas* as well as worldly goods, is to betray a considerable portion of all that has made our nation great. By all means let American radio continue to be the greatest medium for the advertising of goods and services that the mind of man has yet devised. But to restrict broadcasting to this single function—or to any other single function—is to betray the very foundations of a free radio.

This is a democracy. Radio can function truly as an effective mechanism of free speech only if it serves the people as a whole. In our entire social and economic structure there are many important segments of people. In one such segment are the big industrial concerns with commodities for sale. But by what logic can we conclude that only this one segment can adequately reflect the viewpoint of all the other important facets of our society? Can broadcasting, while restrained to carry the voice of the one group and only the one group lay claim to being an effective instrument of democracy? Programs should not be banned because they are intended to convey messages. Nor should they be banned because of the identity of certain groups that request the necessary time for projecting their programs on the airwaves. There is no danger in allowing all responsible groups in a democracy to be heard.

A second restriction on free speech over the radio is the new but widespread ban against permitting the solicitation of memberships over the air. Listeners can be urged by radio to enjoy romance through sparkling teeth or to correct faulty elimination, but they cannot be urged to join a cooperative, a labor union, a business men's association, Kiwanis, the Knights of Columbus, or even the Society of Conservative Philosophers. There is a sheer arbitrary nature about the ban against soliciting memberships over the air. Time can be bought for the sale of shoes and soap and sealing wax, cigarettes, beer, institutional goodwill, and cathartics. But time can't be bought or received gratis for the solicitation of memberships—except, of course, by mutual insurance companies. The very nature of the exception emphasizes the censorious quality of the rule.

Not long ago I asked a witness before the Commission substantially this question

> Here in Washington, D. C., we suffer from taxation without representation. Would you sell time to the District of Columbia Association against Taxation without Representation for the purpose of getting members for that organization?

The answer was, "No."

I next asked

> Suppose the year were 1776. Would you then have sold time to the Massachusetts Bay Colony Association against Taxation without Representation for the solicitation of memberships?

I got no answer.

What Would Sam Adams Say?

I sometimes wonder what Samuel Adams and Tom Paine would have said, what scorching phrases their pens would have devised, to describe a restraint on free speech which would have prevented them from soliciting members for their libertarian organizations before the American Revolution. I wonder what Margaret Fuller and Susan B. Anthony would have said to a ban preventing them from using radio to advocate their cause or even procure members for their women's suffrage leagues.

Yet this is the very ban which the Samuel Adamses, the Tom Paines, the Margaret Fullers and the Susan B. Anthonys of our own generation must suffer on the radio.

A democracy is not only a group of merchants with products to sell. This democracy is rich above all others in the variety of its groups. We need never be bored by a lack of diversity in points of view. Since the sum total of these points of view is democracy, radio, a force in this democracy, should reflect an adequate cross-section.

This is a democracy—in every crisis which has faced us as a nation, we have relied again and again on free debate for decisions upon which our salvation has depended. Perhaps the prime barrier to free speech on the air is the ban imposed by many stations and networks on the sale of time for the discussion of controversial issues. (And what is a "controversial issue" if not merely a current issue?) No matter how worthy the cause, no matter how important the issue, and no matter how eager a wide listening public may be to hear such discussion, a rule followed by many stations and networks prevents the purchase of time. This ban as well as the restriction against the sale of time to certain groups or persons is so wholly out of keeping with American traditions of free speech which we have maintained for more than a century and a half, that arguments in its favor must be examined with the greatest care.

One argument urged in favor of banning the sale of time for discussing controversial issues is that the radio is not merely a vehicle for free speech; it is also a means of amusement and entertainment, an advertising medium, a musical instrument, and many things besides. If time is sold for controversial discussions, it is asked, how can radio continue to fulfill these other functions?

The answer, of course, is that selling time for the discussion of controversial issues does not mean selling all the time on the air for such discussion, or selling time for more discussion than the public wants to hear. If there is one principle more firmly established than any other in American radio, it is the principle of a well-balanced program structure. If radio were overloaded with *any* particular kind of program—opera, dance bands, soap operas, or symphony music—it would quickly lose its universal popularity. Station managements are perfectly familiar with this fact, and adhere to the principle of a well-balanced program structure with a fair degree of success. And this principle would continue unimpaired even if a reasonable amount of time were sold for the discussion of controversial issues.

A second argument frequently raised against such sale of time is that the best financed groups would buy the most time, and hence that radio would become an instrument serving only one side of each issue—the side with the most money. In the early days I joined in the expression of such apprehension of the devastating effect of sheer economic power. However, economic power has well nigh taken over under the present system and we are left with no alternative but to insist that management perform its duty to the public. I know we can, and indeed we must, rely upon the basic principle of fair and well-rounded discussion which I am sure radio is attempting to accomplish. Selling time for the discussion of controversial issues does *not* mean making of radio a common carrier, willing to sell every prospective purchaser as much time as he will buy. The station licensees, in whose hands control of programming properly and necessarily belongs, must inevitably exercise discretion, in order to ensure that radio shall become the tool of no special group or interest. Indeed, there is no denying that radio management today does *not* sell time for the selling of products to all who request it. Likewise the same management, whose judgment comes at high prices, ought to be able to exercise it in this field. The Federal Communications Commission summed up this aspect of radio in its Mayflower opinion, when it stated

Licensee Assumes Obligation

> Freedom of speech on the radio must be broad enough to provide full and equal opportunity for the presentation to the public of all sides of public issues. Indeed, as one licensed to operate in a public domain the licensee has assumed the obligation of presenting all sides of important public questions, fairly, objectively and without bias. The public interest—not the private—is paramount. These requirements are inherent in the conception of public interest set up by the Communications Act as the criterion of regulation . . .

This statement by the Commission is frequently misunderstood. The frame of reference is the licensee and not the independent commentator or the particular kind of program the licensee permits on the air. The licensee's duty is evenhanded treatment of all sides of an issue and should be firmly imbedded in our system of radio. It should continue to govern even when time is sold for controversial discussion. In the future as in the past well-financed groups will be prevented from securing more than their share of radio time by the proper exercise of the licensee's discretion. Although the licensee himself must not abuse the facilities with which he is entrusted, still he must not set up easy rules so that he need not face squarely the problem of delivering to the public a full public service.

A third point frequently made is that we are opening the door for a re-establishment of the continuing harangues of so-and-so. That is simply not true. We are interested in free speech on current lively issues. The long continued sale of time to an extremist with an axe to grind is in itself an effective way to bar the door to those who would present discussions of current issues, and thus would be a restraint on the speech mechanism in terms of its over-all duty to the public.

A fourth and final argument against the sale of time for controversial discussion is that such time is now freely given. It is true that radio has given vast quantities of time for this purpose, and has thereby gained the esteem of millions of listeners. I know of no one who would want to end unsponsored discussions. But if the American radio is to remain dedicated to the fundamental principles of free speech, mere handouts of time are not enough for a variety of reasons.

A purchaser of time has many advantages over a mere recipient. First of all, he can choose his hour—subject of course to the station's or network's prior commitments. The recipient, on the other hand, must take whatever hour the donor chooses to hand out—and I need not tell this audience what a tremendous difference there is between one hour and another.

Also, with respect to network programs, a purchaser of time can procure the broadcasting of his programs over specified stations, while the recipient of time cannot find out even after the show is over which stations have carried his program. Unlike purchasers of time, their network may consist of 15 stations instead of 150. And that, I venture to suggest, is not the kind of restraint on free speech which the Founding Fathers, were they alive today, would view with any complacency.

Revenue Enters In

Finally, the ban against selling time for controversial discussion serves to limit the time available for such discussion. When station managements—and advertisers—determine how much classical music and how much jazz, how much news and how much comedy to weave into their balanced program structure, building up a wide listening audience is their sole concern. But when they must determine how much time shall be *donated* for free discussion, another element necessarily enters in—the need of revenues. Advertising revenue is the rock upon which the American system of broadcasting is built. Revenues must be broad enough and firm enough to support the entire broadcast system. The maintenance of broad, firm revenues necessarily limits the time which can be donated free of charge to discussion or to anything else; it especially limits the choice hours which can be donated. Thus, if discussion is to be permitted only during donated time, it will necessarily be hemmed in by considerations of revenue. Clearly the best way to eliminate this restraint on free discussion is to remove the ban on time sales. This need not mean, of course, that free time is to be refused for controversial discussions. This type of program is desirable and lack of broadcast income should not be a reason for denying listeners.

At present the problem is especially pressing because, as you know, some networks and stations are either approaching or have reached that happy haven of the radio industry—"standing room only" during the evening hours. The year 1943 is by a considerable margin the most profitable year in radio history; during some hours and over some stations and networks there is in fact an acute shortage of available time. Under such circumstances it is especially unfortunate, and especially irksome, to limit controversial issue broadcasts to the scarce and less desirable periods which remain unsold.

The cuffing about that certain of the best forum or roundtable programs are now taking is clear evidence of the shortage of time for commercial users. I cannot conceive American listeners turning away from the forum or roundtable type of programs; their popularity is too firmly rooted in the hopes and aspirations of the people. There are other dangers to these programs which should be discussed quite freely.

One danger lies in the suggestion that the hour-long forums be reduced in time to 30 minutes. An obvious difficulty with this suggestion is that it would reduce by half the amount of time devoted to each discussion, and thus halve the program's effectiveness. But the true objection, it seems to me, lies deeper than that. A half-hour forum program, in which each disputant squeezes in his edgewise word to beat the threatening time signal, would be killed as effectively as the babe in Solomon's court. After all, history does not record that the great historic town meetings at Concord and Lexington and in Faneuil Hall in Boston were stopped in half an hour by the sounding of a gong.

Somewhat subtler than the proposal to cut the town-meeting-type programs in half is the proposal to change their times to less desirable hours or to book them temporarily and to be shuffled again. Those of you who are advertisers know what that means. When effort has been invested and audiences built up over the years for a particular program at a particular time, certainly no advertiser engaged in selling his wares would take a change of hour without protest. In the case of the forum programs, there is no advertiser to complain about the "bump," but there are listeners. Public debate during the hours when housewives listen with one ear would be as inappropriate as a farm and home hour after midnight.

A third proposal—and this one was publicly confirmed before the Commission two weeks ago—is the plan to sell one or more of the programs of this type to a sponsoring advertiser. However, it is somewhat ironical that not poverty but the greatest prosperity in radio history is the source of this plan to sell what has never been bartered since 1776—the town meeting and the free round-table discussion.

Who Does Selecting?

If there be a sponsor, one may wonder who is to be permitted to select the subject and the speakers? I think it is to the credit of at least one network that they contemplate no sale, at least for the present, of this type of program. One warning that is present is that selling the forum may well add to the burden of the broadcasters own prejudices, the further burden of at least considering the prejudices of the sponsor.

In addition to the obvious danger I perceive in the treatment forum programs are likely to receive, there is an additional danger in the hand-outs of free time. The poor relation who gets the free time cannot hope to attract the attention that the time buyer builds up—with his day-by-day bombardment. Furthermore, admitted to this inner sanctum because he has a product to sell, the buyer of time has in some cases injected his own philosophy into his program. At times it is subtly done; at other times it is quite obvious; at all times such propaganda should be properly labelled. We, as Americans, believe that to judge the validity of anyone's arguments we have the right to know for whom he speaks. A symphony program with fifteen minutes of sponsored philosophy is objectionable to a good many listeners who have tuned in for the symphony. So clumsy an attempt at indoctrination, undesirable as it is, does not equal the more insidious tactics of injecting the sponsor's ideas into a news broadcast as "news." The stealth with which some so-called commentators can move from the field of legitimate news into an appeal to the great virtues of the company and its principles and its ideas leaves all but the critically-minded unaware of what has overtaken them. It is arguable that the time buyer who has managed to get on the air with a product to sell perhaps ought to be allowed his bit of philosophizing. The newspaper, however, labels advertisements as such. And radio can and ought to do the same thing. For example, note the confidential manner in which Gabriel Heatter moves from his news comments and calls you over to the side to tell you how awful your hair looks today. The essential thing, however, is that he be identified and the philosophy identified at the moment in order that it can be properly evaluated in the light of its source. One of the most certain methods of destroying the poison of false propaganda is frankly to expose it to the sun and air of informed criticism. If one of the ills to which a democracy is heir is that all may speak, then the cure is more democracy.

David Lawrence explored some of the foregoing principles the other day in his column, he said: "It so happens that Mr. Fly is absolutely right in his criticism and he takes the sound position this correspondent took." Naturally, as a wholly objective commentator I will not take up all the various irrelevancies in the remainder of Mr. Lawrence's article. But he did go on to say I might make a speech to this effect. So who can say that left is left and right is right and ne'er twain shall meet?

Mr. Fly Moves In

Now I want to move in and further stir up the current healthy ferment regarding commentators. Still another question in regard to free speech is raised by the recent discussion of the policies of one network regulating the expression of the views and opinions of its news analysts. Personal opinions should not, of course, be aired in the guise of news; but, assuming competency, if the statements are properly labelled as opinion, I can hardly see the reason why they should not be aired.

The arguments for restricting news analysis to factual presentations are no secret; no doubt you have seen them competently set forth in full-page advertisements. Also, and here we have an example of American radio at its best and freest—they have been debated on the air, over the very network which takes the restrictive view. Certainly, it is a matter to which radio can point with pride, that a network is willing to afford equal time for discussion to the most outspoken opponents of its own position.

I, myself, find several difficulties, however, with limitations on commentators. The first is our old friend, free speech. It is a little strange to reach the conclusion that all Americans are to enjoy free speech except radio commentators, the very men who have presumably been chosen for their outstanding competence in this field. Facts, construction or analysis of words dealing with facts, and opinions tend to blend one into one another indistinguishably.

The censorship of news commentators is in fact a two-way process, if some materials be selected out, other materials are selected in. What tremendous power is wielded by the single man who exercises this breadth of discretion for a great broadcasting system. In lodging that power over the whole output of news analysis and opinion, are we not well nigh setting up both a censorship and the very Company editorial policy which some have sought to avoid by curbing independent commentators? And with such a scheme if one man falls, all must fall. And who, after all, in the field of opinion can be wholly objective? I am not, and sometimes I even suspect you are not.

The ban on free comment by news analysts places them, and the radio industry, at a serious disadvantage vis-a-vis the newspapers and other media. Let me give an actual example taken from the script of a commentator whose network limits him to factual statements. This commentator could not state his own views, but he could, of course, announce as a fact that so-and-so held such-and-such a view. So radio listeners the other night heard the following from one of our most competent commentators.

> As Drew Middleton, the very able correspondent of the New York Times in London reported today. . . . And this isn't just Mr. Middleton's view. He says it's the view of Allied military observers in London. . . . But Mr. Middleton points out. . . . And his military sources in London conclude . . . and Mr. Middleton indicates the military men in London are thinking. . . . According to the Washington correspondents. . . . In the New York Times of August 29 there was an article . . . which stated flatly that . . . The Atlantic Monthly says . . . An AP correspondent reports tonight . . . All the Washington correspondents agree . . .

and so on, all those phrases taken from a single 15-minute script.

Let Public Be Given Opinions

I venture to suggest that listeners want to know what radio analysts themselves think. The listeners can get AP and UP opinion from the newspapers, the Atlantic

Monthly's opinion from the Atlantic Monthly. But where, under the new dispensation, can they get the opinions of Bill Shirer and Ed Murrow? For my money, I will take Bill Shirer and Ed Murrow and give them serious thought. The London newspaper correspondents whose opinions are quoted in the text above are certainly outstanding men whose views are worth hearing; but are they so very much superior to radio's own correspondents? And if they are, why doesn't radio employ them and give them as much freedom to comment as a crack newspaper man has under his own by-line?

The fact is, of course, that radio does have some of the most competent commentators and analysts on earth; and it would be a pity if the rules of the very medium which brings their *voices* to the people prevents their *opinions* from reaching the people. Any policy that requires these men to mouth second-hand opinions serves no purpose. The public is looking to these men at that moment. I wonder if it is not the best method to select the most competent men and give them their rein, bearing in mind, of course, there should be an over-all general balance?

The job of proper labelling of news comment and analysis should not present insurmountable difficulties. A noteworthy statement of the principles which properly govern news commentators was contained in an editorial in the St. Louis Post Dispatch for September 24, 1943, from which I quote:

> First of all, the public has a right to be told the facts, . . . with nothing important withheld, nothing added. This is *news* . . . It is . . . an image still to be brought into sharp focus, . . . News is not opinion, but it is a basis of fact upon which opinion is formed.
>
> . . . Second . . . the public has a right to know the meaning of the facts in the opinion of specialists who are in a particularly favorable position to see the facts and to form accurate opinions concerning them. This is *editorializing*. . . .
>
> . . . Of recent years, there has been found to be a place for analytical opinion in news accounts, through the medium of signed articles; . . .
> The public needs all three of these services; . . .
> Radio should have a place for all three, and should keep them sharply distinguishable.

In *Broadcasting Magazine* for October 4, 1943, the same thought was driven home; they properly pointed out that:

> There lies the solution—news must be so labeled, clearly and plainly. Analysis and comment should be slugged as such and by-lined. . . .
>
> It is important to remember that radio is a news medium. It publishes by means of the electrical printing press—the microphone. As a medium more intimate and more sensative than the printed page, it must sharply delineate and define its services. The intelligence and the know-how of radio, evidenced in its two decades of meteoric growth, are available. The issue, now that it has been provoked, must be met head-on; not avoided.

Broadcasting Magazine is right. The industry has these things right out in the open and it must deal with them. You can no longer sweep them under the bed. But remember CBS and the other nets have much on the asset side of the ledger. Here we have the most intelligent news service and the most capable people in the business. Press and motion pictures are far behind. We can, if we will, capitalize on this great reservoir of talent, radio's own great power and its broad tolerant management.

Under the present restrictions on types of programs, groups who may be heard, and radio's own commentators, the industry is frozen to a policy that does not allow healthy growth and expansion in the field of free speech. This great young and progressive industry must not be frozen at any status quo.

John Milton said:

> Though all the winds of doctrine were let loose to play upon the earth, so Truth be in the field, we do ingloriously, by licensing and prohibiting, to misdoubt her strength. Let her and Falsehood grapple; who ever knew Truth put to the worse in a free and open encounter?

Now Milton may be a bit off on his statistics. John Kieran will undoubtedly know more precisely. And I own that at least in a seeming free competition truth may lose an occasional battle. But her seasonal average is tops. And hers is the system to which a democracy must pin its faith.

Industry Is Responsible

There are some no doubt who will urge that a democratic control of radio will bring a great many problems to management; that the discretion of management will be heavily taxed. There is no question that management will be harassed considerably—isn't this why management talent comes high? They are the ones who must undertake this responsibility if we are to have a free radio. The transmitters and mechanics of radio are efficient. This is a democracy and just as it will not work itself without the efforts of its people so, too, in the broadcasting industry transmitters will not operate themselves in the public interest. Licensees must have discretion and they must use discretion. Licensees must become aware that starting right now management should take stock of itself and re-explore the whole significance of free speech applied to radio. We can no longer operate under dodge clauses. No precedents ought to be allowed that will make this industry automatically stagnate. Any dodges similar to those intricate clauses employed in a corporate indenture to enable a trustee to duck his responsibility must be weeded out fast. Management has a public trust, and it cannot be dodged.

One point should be clear—these are not government problems in the first instance. They are primarily problems for the industry itself to face and to solve in the best traditions of American free speech. There must be intelligent re-exploration and there should follow appropriate industrial self-regulation. It is the industry on whom responsibility lies, and it is the industry which must answer for having maintained or having subverted our fundamental principles of freedom.

It is to you especially, therefore, that I say: in the world of darkness American radio shines forth. In this world of movement let us see to it that American broadcasting continues to move as a living thing, a vital thing in the onward march of democracy, emitting meanwhile no radiation reminiscent of the dead mackerel in the moonlight.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, October 11th. They are subject to change.

Monday, October 11

Broadcast
Consolidated Hearing

To Be Held in the Federal Court Room, Federal Building, Miami, Florida

Ralph A. Horton (Assignor), The Fort Industry Company (Assignee), Fort Lauderdale, Fla.—Voluntary assignment of C. P., and license of WFTL; and licenses of relay stations WAAD and WRET; **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA night.

Ralph A. Horton, Fort Lauderdale, Florida.—License to cover C. P., and authority to determine operating power by direct measurement; **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA night.

The Fort Industry Company, Fort Lauderdale, Florida.—Modification of license to move main studio from Fort Lauderdale, Florida. (Contingent upon granting of B3-APL-15). **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—Granted construction permit (B3-P-3535) for authority to increase power from 100 to 250 watts, necessitating changes in the transmitter.

KWFT—Wichita Broadcasting Co. (a corporation), Assignor; Wichita Broadcasters, a partnership, Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, Trustee; P. K. Smith, Mrs. Claude M. Simpson, Jr., Assignee; Wichita Falls, Texas.—Granted consent to assignment of license of station KWFT, from Wichita Broadcasting Company (a corporation) to a newly formed partnership consisting of the stockholders of the present licensee (B3-AL-381).

WSAV—E. E. Murray, Sr. (Transferor), Harban Daniel and Catherine Murray Daniel (Transferees), Savannah, Ga.—Granted consent to transfer of control of WSAV, Inc., licensee of station WSAV, from E. E. Murray, Sr., to Harban Daniel and Catherine Murray Daniel. No monetary consideration involved (B3-TC-332).

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted construction permit (B1-P-3538) to install equipment to replace equipment destroyed by fire on April 28, 1943, subject to whatever action may be taken upon application for renewal of license.

WINS—Hearst Radio, Inc., New York City.—Granted modification of construction permit (B1-P-3026 as modified) to change frequency from **1000** to **1010 kc.**, all other terms of construction permit to remain the same, and make changes in directional antenna system (B1-MP-1720).

The Ohio State University, Columbus, Ohio.—Granted position for reconsideration of application for new relay broadcast station, and granted same in conformity with relaxation policy of August 28, 1943 (B2-PRY-286).

Houston Printing Corp., Houston, Texas.—Granted petition for reconsideration of application for new relay broadcast station, and granted same in conformity with relaxation policy of August 28, 1943 (B3-PRY-274).

WHEC, Inc., Rochester, N. Y.—Granted petition for reconsideration of application for new relay broadcast station, and granted same in conformity with relaxation policy of August 28, 1943 (B1-PRE-427).

DESIGNATED FOR HEARING

KQW—Pacific Agricultural Foundation, San Jose, Calif., Ltd.—Designated for hearing application for modification of license to move main studio to San Francisco (B5-ML-1172).

FCC AUTHORIZES CONSTRUCTION OF RELAY BROADCAST STATIONS

The Commission announced adoption of a Decision and Order (B-191), granting the application of Larus and Brother Company, Inc., licensee of station WRVA, Richmond, Va., for construction permits to establish two new relay broadcast stations. Both of the low-powered transmitters needed for the stations were acquired by WRVA in April, 1942. When set up, the two relay stations will be used for emergency purposes only, upon failure of the normal wire lines connecting the transmitter and studios of Station WRVA.

In granting the applications, the Commission noted that any obstacle in the granting of WRVA's petition because of the Commission's Memorandum Opinion of April 27, 1942, with respect to the use of critical materials, had been removed by the FCC's later statement of policy made August 28, 1943, authorizing the construction of new relay broadcast stations under certain conditions.

PROPOSED FINDINGS ADOPTED

At the same time the Commission adopted Proposed Findings of Fact and Conclusions (B-192), proposing to deny application of the Black Hills Broadcast Company (KOBH), Rapid City, So. Dakota, for construction permit to install new transmitting equipment, change transmitter location, install a directional antenna system for both day and night use and change operating assignment from **1400** to **610 kc.**, increase power from 250 watts to 5 KW, unlimited time.

The change in operation sought by station KOBH, the Commission held, would be inconsistent with the terms of the North American Regional Broadcasting Agreement (NARBA), as it would cause interference to Canadian station CJAT, and Mexican station XEBX.

MISCELLANEOUS

Stephen A. Vetter, Miami, Fla.—Denied petition to intervene in the hearing on applications of WFTL for assignment of license, license to cover construction permit and modification of license; exceptions noted by counsel for petitioner.

KWOC—Radio Station KWOC, Poplar Bluff, Mo.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1550).

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1548).

KGBK—Helen Townsley, area of Great Bend, Kans.—Present license for relay broadcast station further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending December 1, 1943.

WAEA—WAPO Broadcasting System, area of Chattanooga, Tenn.—Present license for relay broadcast station further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending December 1, 1943.

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Continued hearing now set for October 4 to November 4, in re application for modification of license to increase power to 5 KW, unlimited time.

Washtenaw Broadcasting Co., Inc., Ann Arbor, Mich.—Denied petition requesting reinstatement of petitioner's application for new station to operate on **1050 kc.**, 1 KW power, daytime only (B2-P-3307, Docket No. 6231).

Rock Island Broadcasting Co., Rock Island, Ill.—Placed in the pending files without action at this time, pursuant to the policy adopted on February 23, 1943, application (B4-PH-138), for new high frequency (FM) broadcast station to operate on **44500 kc.**

WCLE—United Broadcasting Co., Cleveland, Ohio.—Granted motion to dismiss without prejudice application for modification of license to operate on **640 kc.**, 500 watts, limited time.

WHKC—United Broadcasting Co., Columbus, Ohio.—Granted motion to dismiss without prejudice application for construction permit to operate on **610 kc.**, 1 KW, DA-night, unlimited time.

APPLICATIONS FILED AT FCC

1450 Kilocycles

KVAK—S. H. Patterson, Atchison, Kans.—Construction permit to make changes in transmitting equipment and increase power from 100 watts to 250 watts.

1460 Kilocycles

KGNF—Great Plains Broadcasting Co. (a corporation), North Platte, Nebr.—Voluntary assignment of license to radio station WOW, Inc.

1490 Kilocycles

KNOW—Frontier Broadcasting Co., Austin, Texas.—Authority to determine operating power by direct measurement of antenna power.

1340 Kilocycles

WWPG—Lake Worth Broadcasting Corp., Palm Beach, Fla.—Modification of license to change corporate name of licensee to Palm Beach Broadcasting Corporation.

WEIM—Ruben E. Aronheim, Fitchburg, Mass.—Voluntary assignment of license to Mitchell G. Meyers, Ruben E. Aronheim and Milton H. Meyers, d/b as radio station WEIM.

1370 Kilocycles

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Modification of construction permit (B1-P-2924 as modified), which authorized change of frequency, increase in power, installation of directional antenna for day and night use, and new transmitter and move, for extension of completion date from 11-1-43 to 2-1-44.

1390 Kilocycles

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Voluntary assignment of license to Gene T. Dyer, Vivian I. Christoph, Gene T. Dyer, Jr., F. A. Ringwald, Louis E. Moulds, Grace V. McNeill, William F. Moss, doing business as radio station WGES.

1230 Kilocycles

KVEC—Christina M. Jacobson, trading as The Valley Electric Co., San Luis Obispo, Calif.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

KGNF—Radio Station WOW, Inc., North Platte, Nebr.—Construction permit to make changes in transmitting equipment, change frequency from **1460** to **1240 kc.**, change power from 1 KW to 250 watts and hours of operation from daytime to unlimited.

MISCELLANEOUS APPLICATIONS

NEW—Burns Avenue Baptist Church, Detroit, Mich.—Extension of authority to transmit programs from Burns Avenue Baptist Church, Detroit, Mich., to radio station CKLW, Windsor, Ontario, Canada.

NEW—WFAM, Inc., area of Lafayette, Ind.—Construction permit for a new relay broadcast station to be operated on **30820, 33740, 35820, 37980 kc.**, 15 watts power and A3 emission.

NEW—Matheson Radio Company, Boston, Mass.—Construction permit for a new high frequency (FM) broadcast station to be operated on **46100 kc.**, with coverage of 3,600 square miles.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Ancestral Survey and as Professional Collection Association, 333 State Street, Detroit, engaged in the collection of delinquent accounts, is charged in a complaint issued with unfair and deceptive acts and practices in commerce. (5056)

Continental Forwarding System, and as Southern Michigan Collection Service, 404 Dwight Bldg., Jackson, Mich., engaged in the collection of delinquent accounts, is charged in a complaint with unfair and deceptive acts and practices in commerce within the meaning of the Federal Trade Commission Act. (5058)

Dip Net Smelt Fishermen's Association, its committee, V. G. Davis, Kris Pedersen and C. W. Fisher and members, Walter Dixon, A. A. Fisher, Philip Plebuch and Lloyd Dixon; Columbia River Smelt Corporation; Cowlitz Smelt Co., and Olie Soleim, trading as Central Smelt Co, all of Kelso, Washington, are charged in a complaint with unfair methods of competition and monopolistic practices and policies having a tendency to increase the cost of food. (5055)

Irving's, 10th and E Sts., N. W., Washington, D. C., engaged in the sale of women's apparel and furnishings, is charged in complaint with misrepresentation. (5057)

STIPULATIONS

During the past week the Commission announced no stipulations.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Andrew J. Lytle and Richard Carl Lytle, 221 Everett Bldg., Akron, Ohio, and William Edgar Spicer, 302 Bond Bldg., Washington, D. C., have been ordered to cease and desist from falsely representing that, in the operation of a business designed solely to locate delinquent debtors, they are connected with the United States Government or any of its agencies. (4829)

Milwaukee Importing Co., 2039 North 34th St., Milwaukee, Wis., selling and distributing Malt Cereal, a coffee substitute, has been ordered to cease and desist from falsely representing that he has been unable to fill orders or ship merchandise due to war conditions, shortage of labor, or raw materials, or to any other causes which do not exist. (4980)

Montgomery Ward & Company, Inc., Chicago, has been ordered to cease and desist from certain misrepresentations in the sale of fabric garments. (4638)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 42, October 15, 1943

PHILIP COHEN NAMED TO HEAD OWI RADIO BUREAU

As this issue of the REPORTS went to press, Palmer "Ep" Hoyt announced that Philip Cohen had been appointed chief of the radio bureau, domestic branch, OWI, to succeed Don Stauffer, who is resigning to return to the advertising agency business.

KESTEN ANSWERS FLY

At the conclusion of a prepared address given by FCC Chairman James Lawrence Fly before the Radio Executives Club of New York at the Hotel Shelton, October 7, the club extended an invitation to CBS to reply to Mr. Fly at an early meeting. In accepting this invitation for CBS, Paul W. Kesten, executive vice president, replied briefly as follows:

Text of Mr. Fly's speech was printed in the NAB REPORTS of October 8.

Mr. Kesten's Statement

"CBS is just as vigorous a champion of free speech as is Mr. Fly. We believe, however, that freedom of speech does not mean freedom for a privileged few. We do not believe that such freedom is achieved by giving a small group of men, broadcasting in regular news periods, any encouragement to use this time to advance their personal prejudices or to pulpiteer for their own point of view. The real essence of our news policies is to keep our news broadcasting and news analysis as objective as humanly possible, rather than to let it degenerate into partisan propaganda. There is plenty of space on the air for special pleading. We merely say that news broadcasts are not the place for it."

Mr. Kesten gave two examples of news copy to illustrate the point. Both dealt with a journalist's impressions on a two-week visit to the troops in North Africa. In the one, the hypothetical journalist did careful reporting and factual analysis. In the other, he used the facts only as a sounding board for his personal bias. They are, in order:

Eye-Witness

1.

I've just returned from two weeks with the troops in a quiet sector of the front and I've eaten with them, slept with them, dived into fox-holes with them when Stukas came over—and I've talked with them. Mostly the talk—American soldier talk—was about home and girls and the usual grousing about Army life. But one thing struck me as strange. Unless I brought up the subject, there was never any talk about what we Americans are fighting for, never anything said about the conflict in political ideas behind this war. Whenever I asked a soldier, "Are you fighting Fascism?", he'd blink as though this were some original thought. Remember that I'm talking about hundreds of conversations, not just a few. I'd ask these soldiers what they thought of Darlan and Badoglio and they hadn't much to say. The consensus seemed to be that we should treat with anyone we could in order to get the war over in a hurry so that everybody could call it a day and go home. It seemed to me there was a world of difference in the political education of the American soldiers and the British soldiers whom I visited last month. The British Command has prepared a complete course of instruction for its troops in regard to the differences between democratic and Fascist ideas. I couldn't help wondering whether our own high command is making adequate plans to train the minds, as well as the bodies, of our fighting men.

NAB DIRECTORS' MEETING

The next meeting of the NAB Board of Directors has tentatively been set for either November 10-11 or November 17-18. Definite dates will be announced shortly.

Eye-Witness

2.

American soldiers in this theatre of war don't have the slightest idea of why they are fighting. I've just come from the front where I talked with them and I know. They don't realize that they are on a holy crusade to stamp out Fascism and that the only way you can do that is to exterminate Japs and Germans. They don't know or care how our government has betrayed them by dealing with a Darlan and a Badoglio. They don't realize that this is a people's war, that what is happening is a world revolution and that the only way we can preserve the four freedoms is to crush our enemies completely and that the only way we can save our democratic integrity is to treat solely with democratic elements in the countries we liberate. Well, our soldiers just don't know those things. And the High Command is to blame. They should educate the troops. Last month I visited British soldiers and found out that they were getting thorough political education. We're supposed to be quick and bright and the British dull and slow-witted. Well, the British are a lot quicker and brighter than we are in this kind of training. Our soldiers shouldn't spend their spare time sitting around grousing and talking about girls and what they will do when they get home. No, they should be taught the meaning of the conflict in terms of ideology—they must be made to see that Fascism must be stamped out in every root and branch and that they are fighting for the world's little people. Otherwise, they may win victories on the field of battle, but they will lose the peace.

REP. LEA REOPENS FCC INVESTIGATION

Representative Clarence Lea held a hearing on Thursday in connection with the FCC investigation at which time testimony of four witnesses taken in New York City recently was introduced into the record. Following this, Representative Lea said that these hearings will now be resumed from time to time to take specific evidence.

Thursday's hearing was adjourned subject to the call of the chair.

In reopening the hearings, Chairman Lea said:

"The hearings of the Committee now contain a large volume of information. The object of this meeting this morning is to place in the record additional information which has been assembled in order that the hearings up to date may be placed in permanent form for more convenient study and analysis.

"It is expected that further progress of the investigation will result in much information yet to be furnished and assembled. The evidence so far presented embraces a large number of accusations against the conduct of the commission and its personnel which are within the scope of the investigation as directed by the House of Representatives.

"The ultimate performance of the duties of the Committee requires the determination of the facts as to each substantial accusation. It is assumed that the report finally made to the House by the Committee will include its findings as to those accusations together with such recommendations as may be found appropriate.

"In order to aid the Committee to assume their responsibilities after the hearings are completed it has been arranged to obtain a study and analysis of all the information presented so that the facts for and against each accusation may be conveniently assembled for the use of the Committee members. That work will begin immediately with a view of bringing such an analysis of the testimony up to date and hereafter continuing it concurrently until the hearings are completed.

"Further hearings will proceed as promptly as the work of the Committee will permit and the plans of the Committee will be announced as the occasion may seem to require."

CENSORSHIP RELAXES CODE WEATHER CLAUSE

Following is a letter received at NAB headquarters from the Office of Censorship:

Note to Broadcasters:

On October 11th, Director Byron Price of the Office of Censorship announced that effective at 12:01 A. M., Eastern War Time, October 12th the weather clause of the Code of War Time Practices for American broadcasters would be relaxed.

This relaxation permits the broadcast of official forecasts issued by the Weather Bureau; reports of current and past weather, as long as wind directions and barometric pressure are deleted.

This is formal notification to radio station managers that the Code of War Time Practices for American Broadcaster's Weather Clause should be amended immediately, as follows:

On pages 1 and 2, strike out all of Section 1 (a) and substitute the following:

"Weather forecasts other than those officially released by the Weather Bureau. Mention of wind direction or barometric pressure in current or past weather (including summaries and recapitulations) except when contained in emergency warnings released specifically for broadcast by the Weather Bureau authorities.

(Signed) J. H. Ryan,
Assistant Director of Censorship in Charge of the Broadcast Division.

PALEY ACCEPTS OWI CALL; KESTEN GETS PROMOTION

William S. Paley, president of CBS, has accepted a special assignment for a limited period from the Office of War Information, Elmer Davis has announced.

Mr. Paley will join C. D. Jackson, director of all OWI operations in Italy, North Africa, and the Middle East. He will operate with the Army's Psychological Warfare Branch at General Eisenhower's headquarters.

"Mr. Paley is going overseas to help in the radio phase of psychological warfare in the Mediterranean area," Mr. Davis said. "As president of the Columbia Broadcasting System since its organization, Mr. Paley is one of the outstanding men in American radio. We are gratified to have a man of his experience and ability in our Overseas operations."

CBS directors have granted Mr. Paley a leave of absence to accept the war area assignment.

Paul W. Kesten has been named executive vice-president of the network.

TEXT OF SENATOR WHEELER'S INTERNATIONAL COMMON CARRIERS RESOLUTION

We print the following verbatim text of Senate Resolution No. 187, submitted by Senator Wheeler (for himself, Senator White and Senator McFarland) in the Senate on October 12, for your information: (The resolution was referred to the Committee on Interstate Commerce, which Thursday ordered a favorable report.)

RESOLUTION

Whereas efficient communication by wire and radio between the United States and foreign countries is important to the diplomatic, military, and commercial interests of the United States; and

Whereas such international communications by wire and radio and the facilities and personnel employed therein are in substantial measure subject to the jurisdiction, control, and influence of foreign governments and foreign nationals; and

Whereas it is necessary in the interests of the United States that a national and an international policy of the United States with respect to international communications should be determined and declared, and that the highest practical standards of operations and of service should be made effective at fair and just rates: Now, therefore, be it

Resolved, That the Interstate Commerce Committee of the Senate or a subcommittee thereof appointed by the chairman be, and it hereby is, authorized and directed to make a thorough study and investigation of international communications by wire and radio, and in particular of such communications from and to the United States; to receive and hear evidence as to (1) the ownership, control, the services rendered, the rates charged therefor, and the methods of operation, of United States carriers engaged in such communications; (2) the extent and nature of the control and influence, direct or indirect, of foreign governments over communication carriers authorized by them, the extent to which foreign governments own and operate such foreign communication services, whether such operation by government is direct or otherwise, the character and extent of the competition between foreign companies, whether owned by governments or privately, in communications to and from the United States, and in particular the nature and degree of competition of such foreign companies with American companies in such communication services; (3) the character and adequacy of services furnished by American companies now engaged in international communications to the people and the diplomatic, military, and commercial interests of the United States; (4) the developments and improvements in the art of communication by wire or radio affecting, or which may be expected to affect, such international communications; (5) whether there should be competitive services between American companies in particular areas or circuits in international communications; (6) desirable forms and standards of organization of American communication companies, and in particular whether such companies should be permitted or required to merge or consolidate and the general terms, conditions, and obligations which should be imposed in the event of such permitted or required merger or consolidation; (7) the form and authority of the regulatory body of the United States to be charged with carrying out the policies in international communications declared by the Congress; and (8) generally to consider and to make recommendations to the Congress as to all other matters and things necessary in its judgment in meeting the purposes of the studies herein specifically set forth.

WIP LAUNCHES NEW PUBLIC FORUM PROGRAMS

Beginning Sunday, October 17th, at 2:30 to 3:00 EWT, WIP, in co-operation with the University of Pennsylvania, will present the first of a new series of public discussion programs featuring members of the University faculty, together with specially invited guests who are expert authorities in their particular fields.

The series is titled: "The Forum of Public Opinion" and is to be broadcast from WIP studios.

First topic is "Juvenile Delinquency". Moderator for this broadcast will be Dr. E. Scully Bradley, professor of English at the University.

Participating will be Dr. J. S. Shalloe, assistant professor of Sociology at the University, Robert C. Taber, director of Pupil Personnel and Counseling, of the School District of Philadelphia; Thomas A. Merryweather, executive director, Crime Prevention Association of Philadelphia; James D. Paige, of the Committee on Merit System, Municipal Court; Dr. Tanner G. Duckrey, principal of the Paul Lawrence Dunbar Public School, and Captain Gibbons, officer assigned to Crime Prevention Division.

The Radio Committee of the University of Pennsylvania co-operating with Station WIP, plans to invite important persons brought to the city by conventions and for other reasons to appear on these programs of "The Forum of Public Opinion."

NAB APPROVES ARBITRATION ASSOCIATION

The NAB recommends that selection of arbiters in labor contracts be left to the American Arbitration Association.

The work of this association has been endorsed not only by leading business organizations, but also by most of the principal labor unions. It has offices throughout the country; has standardized rules for arbitration, and has an excellent panel of arbiters.

The American Arbitration Association recommends the following arbitration clause for labor contracts:

> Any dispute, claim, grievance or difference arising out of or relating to this agreement shall be submitted to arbitration, upon notice of either party to the other party, under the Voluntary Labor Arbitration Rules, then obtaining, of the American Arbitration Association and the parties agree to abide by the award, subject to such rules and regulations as any Federal agency having jurisdiction may impose. The parties further agree that there shall be no suspension of work when such dispute arises and while it is in process of arbitration.

This may be modified, of course, to suit individual circumstances.

Further information can be obtained at the NAB or at any of the AAA's branch offices listed below.

NATIONAL EDITORIAL ASSOCIATION RESOLVES ON RADIO LEGISLATION

(The following resolution was passed by the Advisory Council of the National Editorial Association at a meeting in Chicago on October 10, 1943:)

WHEREAS, There are now pending in the United States Senate a Bill introduced by Mr. White and Mr. Wheeler on March 2, 1934 (S. 814) and in the House of Representatives a Bill introduced by Mr. Holmes on July 2, 1943 (H. R. 3109), both of which propose the amendment of the Communications Act of 1934, As Amended, and

WHEREAS, It now appears that, among other things, the question of freedom of speech over the air waves and the extent to which it is to be limited by governmental regulation through an administrative agency is properly before the Congress of the United States and should receive the immediate and complete consideration of the Congress,

NOW THEREFORE BE IT RESOLVED:

That the officers and directors of the National Editorial Association urge the Congress and the proper committees thereof to give immediate and careful consideration to this legislation so as to insure the fundamental right of freedom of speech.

WORKING PLAN OF PUBLIC RELATIONS SENT COMMITTEE AND DISTRICT CHAIRMEN

Personal copies of the Working Plan of Public Relations for the National Association of Broadcasters are now in the mails to members of the Public Relations Committee and District Public Relations Chairmen. The Plan will serve as a permanent guide and reference.

The completed roster of District Public Relations chairmen is published here with apologies to Irvin G. Abeloff, WRVA, chairman District 4, whose name was omitted from the list in NAB REPORTS of September 24.

DISTRICT 1—Edward E. Hill, director, Radio Station WTAG, Worcester Telegram Publishing Co., Inc., Worcester, Mass.

DISTRICT 2—Michael R. Hanna, manager, Radio Station WHCU, Cornell University, Ithaca, New York.

DISTRICT 3—George D. Coleman, general manager, Radio Station WGBI, Scranton Broadcasters Inc., Scranton, Pennsylvania.

DISTRICT 4—Irvin G. Abeloff, program director, Radio Station WRVA, Larus Brother & Company, Inc., Richmond, Virginia.

DISTRICT 5—W. Walter Tison, general manager, Radio Station WFLA, The Tribune Company, Tampa, Florida.

DISTRICT 6—W. H. Summerville, manager, Radio Station WWL, Loyola University, New Orleans, Louisiana.

DISTRICT 7—Vernon H. Pribble, manager, Radio Station WTAM, 815 Superior Avenue, Cleveland, Ohio.

DISTRICT 8—Clarence Leich, manager, Radio Stations WGBF-WEOA, Evansville on the Air, Inc., Evansville, Indiana.

DISTRICT 9—Edward E. Lindsay, manager, Radio Station WSOY, Commodore Broadcasting Inc., Decatur, Illinois.

DISTRICT 10—Merle Jones, general manager, Radio Station KMOX, Columbia Broadcasting System, St. Louis, Missouri.

DISTRICT 11—Clarence T. Hagman, vice-president and general manager, Radio Station WTCN, Minnesota Broadcasting Corp., 115 East Grant Street, Minneapolis, Minnesota.

DISTRICT 12—Robert D. Enoch, general manager, Radio Station KTOK, Oklahoma Broadcasting Company, Inc., Oklahoma City, Oklahoma.

DISTRICT 13—Karl O. Wyler, manager, Radio Station KTSM, Tri-State Broadcasting Company, Inc., El Paso, Texas.

DISTRICT 14—Mrs. C. G. Phillips, manager, Radio Station KIDO, Boise Broadcast Station, Boise, Idaho.

DISTRICT 15—John W. Elwood, general manager, Radio Station KPO, National Broadcasting Company, San Francisco, California.

DISTRICT 16—J. G. Paltridge, director of public relations, Earle C. Anthony, Inc., Radio Stations KFI-KECA, 141 North Vermont Avenue, Los Angeles, California.

DISTRICT 17—Harry Buckendahl, director of commercial relations, Radio Station KALE; KALE, Incorporated, Portland, Oregon.

MORE ON THE FAT CAMPAIGN

"Butcher shops in our whole coverage area complained because they bought up waste fats and then had to throw it out," so states F. E. Mayhew, supervisor, KASA, Elk City, Okla. "In other words," he said, "we find conditions out here in the remote sections of the country the same as described by Harper M. Phillips, general manager, KYUM, Yuma, Ariz., in his letter." Mr. Phillips reported that waste fat was collected and thrown in the Colorado river.

Peoria

Vernon A. Nolte, program director, WMBD, Peoria, says the waste fat salvage program is inefficient in Peoria. "There is a campaign in Peoria," he said, "to collect waste fat and grease. However, this campaign does not always operate smoothly. It depends on the Girl Scouts in the community calling at each home once each month, on one collection day. This is a big order and the girls do not get around to every home. As a matter of fact, it has been my personal experience they have not picked up the waste fat in my home for four months.

"The station has received many complaints about this situation and I have talked repeatedly to the chairman of the drive and she has promised to do what she can. I know this committee is working hard and trying to do a good job but the organization is not as good as it should be.

"I believe that the government agencies in charge of these salvage programs should make a periodic check, not only on the results, but on the system of organization because that is where we can have the most trouble. If the organization set-up is not correct the government agency should be in a position to make suggestions and to give any possible assistance in a reorganization so that the job can be done properly."

Greensboro

The research department of WBIG, Greensboro, conducted a thorough investigation in that city. Among leading merchants three stores collected no pounds of waste fat per week; one collected 1 pound; one collected 5 pounds; one collected 6 pounds; one collected between 40 and 50 pounds per week; one collected between 100 and 130 pounds; while one collected between 100 and 150 pounds per week.

Grocers say the price is too low to offer any incentive to the housewife and that the housewife makes use of many fats she might otherwise turn in because of rationing of lard and butter. Grocers in "better" neighborhoods said that most customers regard the collection of waste fat as not worth the trouble. Grocers in "poorer" neighborhoods said that most customers have so few waste fats that collection is almost useless. No difficulty in handling waste fats turned in was reported.

Public apathy to waste fat collection, it was found, results in much trouble and work for small grocers handling insignificant amounts of waste fats.

Suggested Remedy for Situation

Manager Frank, of the Carolina By-Products Company, said that since price provided no incentive for housewife to turn in collection, that the awarding of meat ration points for waste fat collection or any other plan whereby housewife would receive privilege of buying edible fats in return for collection of inedible fats would furnish incentive.

He further suggested that shortage of soap, particularly toilet soap, be explained to the public as a result of the shortage of fats with which to make soap. Public should understand that waste fats are used to make soap and that glycerine is a by-product of the soap manufacturer. Explanation, he said, should make the housewives more anxious to cooperate with the grocer, not only to increase the available supply of soap but also glycerine for war.

St. Paul, Minneapolis

Kenneth M. Hance, vice president, KSTP, surveyed the situation in the Twin Cities. The WPB regional director told him that "our trouble is not getting fats to the renderers but in not receiving enough fats from the housewives."

WCCO also checked and reported that, "complaints had been made in this territory that butchers would not accept fats. Every complaint received is followed through by WPB."

Sarasota-Bradenton

According to John B. Browning, manager, WSPB, Sarasota, "butchers are complaining about the delay in collecting fats and greases though people are turning them in to local butchers fairly satisfactorily." Because the renderer collects fats in five week periods, merchants must keep a large part of their refrigerators full of fats in containers received from housewives.

Portland, Ore.

H. J. Foster, war program manager, KGW-KEX, Portland, reported by enclosing a recent release by the Oregon State Salvage Committee. This report pointed out that housewives have been reusing their fats for cooking purposes in their own kitchens, and that there is now no such thing as "waste" fats. The Salvage Committee is now asking for "used" household fats to emphasize that these reused fats are entirely satisfactory.

Sault Ste. Marie

How additional fats are gathered in Sault Ste. Marie was reported by Stanley R. Pratt, general manager, WSOO. In this city not only does a soap company send trucks to pick up local fats, but also fats from all boats on the Great Lakes passing through the locks.

Jackson, Miss.

At one time during the past summer markets were not taking fats and housewives discontinued saving them. When this became known to W. P. Harris, director, WJDX, Jackson, local dealers were contacted and an agreement secured from them to receive waste fats in 100 pound quantities. Widespread promotion re-established the fat saving habit and today the plan in Jackson is working out to the satisfaction of all concerned.

Other Cities

Reports of satisfactory fat collection are acknowledged from W. O. Talbot, Jr., operations & commercial, KSLM, Salem; Earl Williams, station manager, KFAB-KFOR, Lincoln; L. W. Trommlitz, manager, KORE, Eugene; Mel D. Marshall, general manager, KYOS, Merced; "Red" Cross, commercial manager, WMAZ, Macon; G. O. Shepherd, general manager, WAYS, Charlotte; H. W. Wilson, manager, KPRO, Riverside; KCMC, Texarkana, and WRAL, Raleigh.

STATION COVERAGE RECOMMENDATION

In a communication from the American Association of Advertising Agencies received Thursday, October 7th, NAB is invited to confer with AAAA Committees on methods for determining station coverage.

The NAB Membership approved a recommended station coverage method at the War Conference in Chicago last April. This was prepared by the NAB Research and Sales Managers Executive Committees in consultation with agency time buyers. The resolution approving the method incorporated an instruction to submit the recommendation to the AAAA's for review and for permission for stations to use some sort of "official stamp of approval" of that association if the method were found acceptable. The AAAA's research and time buyers' committees considered the proposals in a meeting Thursday, September 30th.

The details of the method appear on pages 194, 195 and 196 of the April 30 NAB "Reports." Progress of the conferences will be published in NAB "Reports."

Statement on the Use of the Name and Emblem of the American Red Cross in Advertising Approved by the Administrative Committee, August 11, 1943

Section 4 of the Act of Congress incorporating the American Red Cross, approved January 5, 1905, as amended June 23, 1910, and quoted completely hereinafter, prohibits the use of the name or emblem of the Red Cross "for the purpose of trade or as an advertisement to induce the sale of any article whatsoever." The only exceptions relate to cases where the name or emblem was used commercially prior to 1905.

Many advertisers have expressed a desire to assist the American Red Cross in its wartime services by calling public attention to some of its special needs, financial or otherwise, by preparing and paying for advertisements devoted to these special messages to the public, either in the form of newspaper and magazine advertisements, or commercial time over the radio. The Red Cross appreciates the generous motives which inspire these offers but advises that the acceptance of advertising, limited to the above three fields, should be restricted by the general and specific conditions set forth below:

I. That such advertising must be in complete harmony with the humanitarian purposes of the American Red Cross and consistent with its policies and broad responsibilities to the public;

II. That advertisements appealing for *funds* for the Red Cross must be restricted exclusively to the period immediately prior to and during national campaign for funds;

III. That other advertisements must be devoted to approved Red Cross statements or messages concerning one of its recruitment, enrollment, or service programs, except in the case of advertisements of benefits authorized under the Red Cross benefit policy.

Subject to the above *general* conditions it is permissible to accept offers of advertising space or radio time which conform to the following *specific* requirements:

a) If the entire advertisement is exclusively devoted to the Red Cross, only the corporate name and address but not the trade-mark, product, or service of the advertiser may be printed modestly in a byline to indicate the sponsorship at the bottom of the advertisement or briefly announced at the opening and/or at the conclusion of the radio program.

b) If only a portion of space within a particular advertisement or a part of the time on a commercial radio program is to be devoted to the Red Cross, the Red Cross message must be so placed as to make it distinctly separate and apart from the rest of the advertisement or radio program. On radio programs the Red Cross in certain instances may request the inclusion of a sentence to the effect that "the mention of the American Red Cross and/or the appearances of Red Cross personnel on this program does not constitute an endorsement of our products or services by the American Red Cross since the American Red Cross does not endorse any products or service."

c) If the name or emblem of the Red Cross is to be used in an advertisement which is to appear in more than one city or on a radio program to be carried by more than one station, advertisers are invited to submit proofs of text and art for the advertisement and script for the radio program in advance of publication or use to the director of Publicity, American Red Cross, Washington, D. C., for helpful review. This is unnecessary where the material used has been reviewed or issued previously by the American National Red Cross.

d) In cases of advertising of purely local character in one city where the name or emblem of the Red Cross is to be used, the advertising copy or radio script may be submitted to the local chapter for review and will be approved only if it conforms to the conditions listed above.

e) If an advertisement is to be illustrated by Red Cross uniformed personnel care should be exercised to see that the proper uniform is depicted.

In connection with advertising it should be noted that the American Red Cross neither adopts nor endorses any article of merchandise as an "official" item of its equipment. Where particular commercial articles are purchased by the national organization or its chapters, it is a violation of the law for the manufacturers of such articles to advertise the fact that they are furnishing them to the American Red Cross.

Section 4 of the Act of Congress, mentioned earlier reads as follows:

> "Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section four of the Act entitled 'An Act to incorporate the American National Red Cross,' approved January fifth, nineteen hundred and five, is hereby amended to read as follows:
>
> 'Sec. 4. That from and after the passage of this Act it shall be unlawful for any person within the jurisdiction of the United States to falsely or fraudulently hold himself out as or represent or pretend himself to be, a member of or an agent for the American National Red Cross for the purpose of soliciting, collecting, or receiving money or material or for any person to wear or display the sign of the Red Cross or any insignia colored in imitation thereof for the fraudulent purpose of inducing the belief that he is a member of or an agent for The American National Red Cross. It shall be unlawful for any person, corporation, or association other than The American National Red Cross and its duly authorized employees and agents and the Army and Navy sanitary and hospital authorities of the United States for the purpose of trade or as an advertisement to induce the sale of any article whatsoever or for any business or charitable purpose to use within the territory of the United States of America and its exterior possessions the emblem of the Greek Red Cross on a white ground, or any sign or insignia made or colored in imitation thereof, or of the words "Red Cross" or "Geneva Cross," or any combination of these words; *Provided, however*, That no person, corporation, or association that actually used or whose assignor actually used the said emblem, sign, insignia, or words for any lawful purpose prior to January fifth, nineteen hundred and five, shall be deemed forbidden by this Act to continue the use thereof for the same purpose and for the same class of goods. If any person violates the provision of this section he shall be deemed guilty of a misdemeanor, and upon conviction in any federal court shall be liable to a fine of not less than one or more than five hundred dollars, or imprisonment for a term not exceeding one year, or both, for each and every offense.' "

TELEVISION AIDS POLICE

This month, for the first time, television was used to broadcast photographs of missing persons in the New York area by the New York police department. The broadcast ran 10 minutes and was beamed over Station W2ZWV, covering a 50-mile radius. Seven likenesses were transmitted.

FEDERAL COMMUNICATIONS COMMISSION

BLUE NETWORK TRANSFER IS APPROVED BY FCC

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

In the Matter of
RADIO CORPORATION OF AMERICA, *Transferor*
and
AMERICAN BROADCASTING SYSTEM, INC., *Transferee.*
Docket No. 6536

DECISION AND ORDER

This is an application pursuant to Section 310(b) of the Communications Act for the Commission's consent to the transfer of 100% of the stock of the Blue Network, Inc., from Radio Corporation of America to American Broadcasting System, Inc. The Blue Network, Inc., is the licensee of Stations KGO, San Francisco, WENR, Chicago, WJZ, New York, and 48 relay stations. In addition, it operates a nation-wide network consisting of 163 affiliated stations besides the three stations it owns. The consideration for the transfer is $8,000,000 cash.

Radio Corporation of America, the transferor, besides owning 100% of the stock of the Blue Network, Inc., also owns 100% of the stock of the National Broadcasting Company which is the licensee of five standard broadcast stations and likewise operates a nation-wide network.

American Broadcasting System, the transferee, is wholly owned by Edward J. Noble who has diverse business interests including the ownership of Station WMCA in New York. Accompanying the application is an affidavit of Mr. Noble that he intends to dispose of WMCA upon approval by the Commission of the Blue Network transfer, and at the hearing he testified that he has executed a contract for the sale of the station, contingent upon Commission approval.

There are at present four nation-wide network organizations, two of them wholly owned by Radio Corporation of America. Our investigation into chain broadcasting (Docket 5060) established that the ownership of two networks by a single organization operated as a restraint on competition, handicapped the Blue Network, gave RCA a competitive advantage, and resulted in an undue concentration of control in a field where because of physical limitations on the number of available radio facilities the public interest imperatively demanded the elimination of restraints on competition and as wide a dispersion of control as possible. As a result we promulgated Regulation 3.107 directed against multiple ownership of networks serving substantially the same area. The regulation was suspended indefinitely,[1] after RCA had freely conceded desirability of disposing of one network and had indicated its intention of selling the Blue at an early date, in order to make possible the orderly disposition of the network without a time deadline which would unduly depress the price. The transfer of the Blue Network will result in four independent nation-wide networks. This will mean a much fuller measure of competition between the networks for stations and between stations for networks than has hitherto been possible. In addition, the transfer should aid in the fuller use of the radio as a mechanism of free speech. The mechanism of free speech can operate freely only when the controls of public access to the means for the dissemination of news and issues are in as many responsible ownerships as possible and each exercises its own independent judgment. The approval of the transfer will promote such diversification.

Our investigation into chain broadcasting similarly concluded that the control of two stations in any area by one network organization is not in the public interest. At present RCA, through its two network subsidiaries, controls two stations each in New York, Chicago, and San Francisco. The effect of the present transfer will be to separate control of these pairs of stations, and thus in that respect effectuate the policy of Regulation 3.106.

We find that the American Broadcasting System, Inc., and Mr. Noble, the owner of its entire stock, are legally, financially and technically qualified to operate the stations being transferred. All the stockholders and officers of the transferee are citizens of the United States. The transferee has sufficient funds to effect the purchase and it is apparent from the balance sheet of the Blue Network that its finances after the transfer will be such as to permit continued operation. Mr. Noble testified that he saw the need of raising additional capital for expansion of the public service of the Blue Network, and he stated that this capital could be secured either from his own resources or from sale of stock to interested persons.

Mr. Noble also testified that he intended to continue to employ the operating personnel of the Blue Network and those present officers and directors of the Blue Network who are not employees of RCA. Hence, the transferee will be technically qualified to operate the stations being transferred.

At the hearing Mr. Noble was requested to submit a written statement as to the policies with respect to the allocation of time on the air which would guide him in the exercise of his discretion as a licensee. This statement has now been submitted. In it Mr. Noble declares in part:

> "I am prepared to say that my policy, stated in general terms, will be to refrain from adopting any restrictions which will automatically rule out certain types of programs on the basis of the identity or personality of the individual, corporation, or organization sponsoring or offering them. I propose to meet each request for time with an open mind and to consider such requests strictly on their individual merits and without arbitrary discriminations. More particularly, I think that the operation of a national network should follow a policy whereby all classes and groups shall have their requests, either for sponsored or sustaining time, seriously considered and network time determined in accordance with true democratic principles and with the aim of presenting a well-rounded and balanced broadcast service in the best interests of the public and of the Network."

At the hearing it appeared that under present practice, which is quite general in the industry, requests for the sale or furnishing of time tend to be disposed of on the basis of rules-of-thumb and fixed formulae. Mr. Noble's commitment to consider each request with an open mind on the basis of the merits of each request and without any arbitrary discrimination is, in our view, the type of discretion which all licensees must retain under the Communications Act. Only under such flexibility is the fullest utilization of radio in the public interest made possible.

In view of the entire record it is our opinion that the transfer of the Blue Network is in the public interest.

It is, therefore, ordered, this 12th day of October, 1943, that the transfer of control of the Blue Network, Inc., from Radio Corporation of America to American Broadcasting System, Inc., be and the same is hereby, approved.

BY THE COMMISSION.

T. J. Slowie,
Secretary.

FLY SAYS NETWORK RULES ARE WORKING ALL RIGHT

The industry has not yet had enough experience with the new network regulations for FCC to know how they are working out, but up to now they have worked for the betterment of both stations and listeners FCC Chairman James Lawrence Fly said at a press-radio conference October 11.

The Commission, Mr. Fly said, must keep an open mind in connection with the regulations and modify them if it deems necessary at any time. The record on the new rules he said is pretty good insofar as reports reaching the Commission are concerned.

The Chairman has been making a number of remarks recently about listener interest and he said at the conference that this subject is up to the industry.

Mr. Fly told newsmen he has had a conference with Representative Lea of California since he has been appointed chairman of the Select Committee of the House but, Mr. Fly refused to discuss his talk with Representative Lea. Mr. Fly said that when the committee is ready to hear him it will not have to subpoena him.

Reverting to the sale of the Blue network and the new network regulations the Chairman said that on the whole the regulatory rules have aided network broadcasting generally. He said that since January, 1942, the Blue has added some 50 stations to its network. In January, 1942, he said the Blue had 116 stations while it now has 166. He said that this is partially due to the reduced line charges made possible through FCC action, which has undoubtedly resulted, he said, in bringing more stations to the networks.

---

[1] Simultaneously with this order, we are making Regulation 3.107 effective six months hence.

Answering questions about news commentators, Mr. Fly said that he is not yet sure whether the Commission has the right under the law to regulate them and he suggested that for the time being this is a matter up to the industry. He indicated that he had not looked up the law on this point.

FCC ASKS COMPLETION AND RETURN OF EMPLOYEE FORM

Prompt Action Requested

The FCC on October 9th sent a letter and forms to networks and licensees of standard, international and television stations to obtain information on employees and compensation for broadcast stations and networks. The information is to be furnished for the week beginning October 17th.

It will be recalled that NAB last year asked the commission that since the employee data required in the annual report was to be given for a week in October that the information be collected in October and tabulated as soon as possible. In former years the information has been required by the FCC as one schedule of the Annual Financial and Employee Data Report filed in the spring. Tabulations from these reports have not been available until the fall or early winter following the date of filing. Thus the employee data gathered had been at least a year old before it was available for use.

The employee data derived through these reports is of paramount importance to the industry in labor negotiation and for that reason the proposal was made to the FCC to collect the information early, to tabulate it quickly, and to make the information available to the industry at the earliest possible moment.

FCC cooperated in the matter last year and has given every indication it will do so this year. The procedure last year was not altogether satisfactory because some stations were slow in returning the forms. Please see that your form is returned at the earliest possible time.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, October 18th. It is subject to change.

Monday, October 18

KWSC—State College of Washington, Pullman, Wash.—Modification of license, **1030 kc.**, 1 KW night, 5 KW day, unlimited. Request facilities of KOB.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WCSH—Adeline B. Rines, Executrix of the Estate of Henry P. Rines, Deceased (Transferor), Adeline B. Rines, William H. Rines, Mary R. Thompson, Trustee (Transferees), Portland, Maine.—Granted consent to transfer of control of Congress Square Hotel, licensee of station WCSH, from Adeline B. Rines, Executrix of the Estate of Henry P. Rines, Deceased, to Adeline B. Rines, William H. Rines, and Mary R. Thompson. No monetary consideration involved (B1-TC-329).

KFJI—John A. Kincaid, Deceased (Transferor), George Kincaid, Executor of the Last Will and Testament of John A. Kincaid, Deceased (Transferee), KFJI Broadcasters, Inc. (Licensee), Klamath Falls, Ore.—Granted involuntary transfer of control of KFJI Broadcasters, Inc., from John A. Kincaid, Deceased, to George Kincaid, Executor (B5-TC-334).

WMVA—Martinsville Broadcasting Co., Inc., Martinsville, Va.—Granted modification of license to change location of main studio from Church and Bridge Streets, Martinsville, to 1.3 miles north of city (B2-ML-1173).

Burns Avenue Baptist Church, Detroit, Mich.—Granted extension of authority to transmit programs to station CKLW, Ontario, Canada, from Detroit, Mich.

KFI—Earle C. Anthony, Inc., Los Angeles, Calif.—Granted motion for leave to take depositions in connection with hearing set for October 26, on application of Iowa State College of Agriculture and Mechanical Arts, licensee of station WOI, Ames, Iowa, for special service authorization to operate on **640 kc.** from 6 a. m. to local sunrise, CST, with 1 KW power.

MISCELLANEOUS

WSAY—Brown Radio Service & Lab. (Gordon P. Brown, Owner), Rochester, N. Y.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1540).

WHJB—Pittsburgh Radio Supply House, Greensburg, Pa.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1551).

W9XBK—Balaban & Katz Corp., Chicago, Ill.—Granted license (B4-LVB-42) to cover construction permit for new experimental television broadcast station; frequencies **60000-66000 kc.**, 2 KW aural and 4 KW visual power.

W49D—John Lord Booth, Detroit, Mich.—Granted extension of special temporary authority to operate an RCA 10 KW transmitter on **44900 kc.**, using a temporary antenna, for the period October 9 to December 7, 1943, pending action on application for license to cover construction permit in part.

The Commission has adopted an order affirming the action of the motions Commissioner denying the petition of Stephen A. Vetter for leave to intervene in the hearing on the applications of Ralph A. Horton (assignor) and The Fort Industry Company (assignee) for voluntary assignment of construction permit as modified, of license of station WFTL and relay stations WAAD and WRET; Ralph A. Horton (WFTL) for license to cover construction permit and authority to determine operating power by direct measurement; and The Fort Industry Company (WFTL) for modification of license to move main studio from Ft. Lauderdale, Fla., to Miami, Fla. (Dockets 6542, 6543, 6544, respectively.)

KTRH—KTRH Broadcasting Company, Houston, Texas.—Dismissed application for special service authorization to operate on **740 kc.**, with 50 KW day and 25 KW night, employing temporary DA night, for period ending February 1, 1944, and authority to determine operating power by direct measurement (B3-SSA-85 and B3-Z-1547).

Sikeston Community Broadcasting Co., Sikeston, Mo.—Denied petition for reinstatement of application for construction permit for new station to operate on **1300 kc.**, as the Commission's policy of August 11, 1943, limits reinstatement of applications to those involving authorizations for local channels, whereas applicant requests a regional channel assignment.

KWSC—State College of Washington, Pullman, Wash.—Granted petition to dismiss without prejudice application for modification of license to operate on **1030 kc.**, 1 KW night, 5 KW day, unlimited time.

WJBW—Charles C. Carlson, New Orleans, La.—Granted petition to continue hearing on application for renewal of license from October 25 to November 8.

Head of the Lakes Broadcasting Co., Superior, Wis.—Granted motion to accept amendment to application for new FM station to specify equipment now used at W9XYH, and application removed from hearing docket.

The Commission announced adoption of Proposed Findings of Fact and Conclusions (B-194), proposing to deny the application of The Voice of the Orange Empire, Inc., Ltd., licensee of station KVOE, Santa Ana, Calif., for construction permit to change operation assignment from **1490 kc.**, with 250 watts, unlimited time, to **1480 kc.** with 1 KW power, unlimited time.

This action is in conformity with the policy announced by the Commission in its Memorandum Opinion of April 27, 1942, with respect to the use of critical materials during the war period.

At the same time the Commission adopted Orders making final the Proposed Findings of Fact and Conclusions denying without prejudice the following cases:

Intermountain Broadcasting Corp., Station KDYL, Salt Lake City, Utah, for construction permit to change frequency from **1320** to **880 kc.**, increase power from 5 to 10 KW, make changes in directional antenna system for both daytime and nighttime use, and change the transmitter. (B-171)

Beauford H. Jester, et al., Waco, Texas, for construction permit to establish a new station to operate on **1230 kc.**, 250 watts power, unlimited hours of operation (B-176), and

Eastern Broadcasting Co., Inc., Long Island, New York, for construction permit to establish a new station to operate on **1520 kc.**, with 1 KW power limited to station WKBW, Buffalo, N. Y. (B-181)

APPLICATIONS FILED AT FCC

560 Kilocycles

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Extension of special service authorization to operate on **560 kc.**, 500 watts night, 1 KW day, unlimited time, using transmitter authorized by B5-P-3150 as modified for the period ending 2-1-44.

WQAM—Miami Broadcasting Co., Miami, Fla.—License to cover construction permit (B3-P-2597 as modified), which authorized installation of new transmitter and increase in power.

WQAM—Miami Broadcasting Co., Miami, Fla.—Authority to determine operating power by direct measurement of antenna power.

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—License to cover construction permit (B4-P-3288 as modified), which authorized increase in power and installation of directional antenna for night use.

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Authority to determine operating power by direct measurement of antenna power.

710 Kilocycles

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Modification of license to change location of the main studio from 9631 Wilshire Blvd., Beverly Hills, Calif., to 5939 Sunset Blvd., Los Angeles, Calif.

850 Kilocycles

WRUF—University of Florida, Gainesville, Fla.—Special service authorization to operate unlimited time, with power of 100 watts after sunset at Denver, Colo., and 5 KW prior to sunset at Denver, Colo., for the period ending 2-1-44.

930 Kilocycles

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Construction permit to change frequency from **910 kc.** to **930 kc.** and power and hours of operation from 500 watts daytime to 250 watts night, 500 watts daytime, unlimited hours of operation.

1040 Kilocycles

WHO—Central Broadcasting Co., Des Moines, Iowa.—Voluntary transfer of control of licensee corporation from Daniel David Palmer to B. J. Palmer, Mabel Palmer, Daniel David Palmer and William M. Brandon, Trustees.

1240 Kilocycles

WGOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Involuntary transfer of control of licensee corporation from Jean B. Couture, Deceased, by Clara Couture, Executrix to Faust O. Couture, 350 shares of common stock.

1290 Kilocycles

WKNE—WKNE Corporation, Keene, N. H.—Acquisition of control of licensee corporation by M. S. Wilder and H. C. Wilder through issuance of preferred stock.

1330 Kilocycles

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Construction permit to move transmitter from 8581 West 18th St., Los Angeles, Calif., to intersection of Rodeo Road and Santa Barbara Ave., Los Angeles, Calif., and install a new antenna.

1490 Kilocycles

KBKR—Baker Broadcasting Co., Baker, Oregon.—Transfer of control of licensee corporation from Glenn E. McCormick and Paul V. McElwain to Marshall E. Cornett and Lee W. Jacobs, 170 shares.

MISCELLANEOUS APPLICATIONS

W6XIA—Television Productions, Inc., Los Angeles, Calif.—Modification of construction permit (B5-PVB-87 as modified, which authorized new television relay broadcast station to be used with W6XYZ) for extension of completion date from 11-1-43 to 2-1-44.

NEW—Voice of Longview, area of Longview, Texas.—Construction permit for a new relay broadcast station to be operated on **1622**, **2058**, **2150**, and **2790 kc.**, 20 watts power and A3 emission.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

James G. Exum—A complaint has been issued charging James G. Exum, Snow Hill, N. C., with misrepresentation in connection with the sale of a preparation known as "Happy Jack Mange Lotion," advertised as a remedy for mange and other skin diseases of dogs and other animals. The preparation also is sold under the names "Happy Jack Sarcoptic Mange Medicine" and "Happy Jack." (5060)

Hutchings Brokerage Company—Violation of the brokerage section of the Robinson-Patman Act is alleged in a complaint issued against Norman Webb Hutchings, trading as Hutchings Brokerage Co., 120 North Water St., Mobile, Ala. (5059)

STIPULATIONS

During the past week the Commission announced no stipulations.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist order last week:

Superior Humus & Peat Moss Corp., 137-165 Queens Blvd., Jamaica, Long Island, N. Y., selling a commercial peat to wholesalers and retailers for resale, and direct to nurserymen, florists, farmers, poultrymen, and others in agricultural industry, has been ordered to cease and desist from misrepresentation of its product. RETAIL PROMOTION PLAN

A full account of the showings of the Retail Promotion Plan is given in Retail Promotion Committee bulletin No. 8, accompanying this issue of the NAB REPORTS.

NAB BOARD TO MEET

President Neville Miller has called a meeting of the NAB Board of Directors to be held at the Hotel Statler, Washington, D. C., Wednesday and Thursday, November 17 and 18. The agenda will cover the many problems now confronting the industry.

BMI STOCKHOLDERS HOLD ANNUAL MEETING IN NYC

Annual meeting of the stockholders of BMI was held on Tuesday, October 19th at the BMI offices in New York. In a report, as president of BMI, Neville Miller called attention to the steady progress made by the company. The number of BMI licensees is at the all time high of 800 commercial amplitude modulation stations, 33 FM and short wave stations, and 15 national and regional networks in the United States, as well as all the broadcasting stations and networks of Canada. BMI licensees represent in excess of 99% of the dollar volume of the broadcasting industry in the United States. The publishers affiliated with BMI have similarly increased and are now 480 in number.

During the year license fees were reduced by more than 26% thus effecting a reduction which has benefited broadcasters to the extent of more than $400,000. This reduction to licensees was made while at the same time the rate of payment to publishers and composers was increased. Mr. Miller called especial attention to new activities of the company, such as the meetings of program managers, the increased personnel in the program relations department, the new BMI index and the activity of the program script department. All officers and directors were reelected for the ensuing year.

They are: directors: Walter Damm, WTMJ; John Elmer, WCBM; William Hedges, NBC; Leonard Kapner, WCAE; Neville Miller, NAB; Paul W. Morency, WTIC, and Frank White, CBS. Officers: Neville Miller, president; Sydney Kaye, first vice president; Merritt Tompkins, second vice president; Carl Haverlin, vice president in charge of station relations; Charles Lawrence, treasurer, and Claud Boydston, comptroller.

Labor

AFL CONVENTION CALLS FOR RADIO LEGISLATION

The recent American Federation of Labor convention in Boston unanimously adopted a resolution calling for amendment of the Federal Communications Act to "assure preservation of Freedom of Speech on the airways."

The text of the resolution:

Resolution #102—Delegate Richard J. Gray—Building and Constructions Trades Dept.

Whereas, in its 1942 report the Building and Construction Trades Dept. pointed out in detail the vast potential possibilities of post war building trades employment in the indicated development of the Television, Frequency Modulation and electronic industries, and

Whereas, the expansion of radio broadcasting, television Frequency Modulation facsimilie and allied electronic services can best be furthered through the broadest possible application of the traditional American free enterprise principle, and

Whereas, the U. S. Supreme Court in its decision of May 1943 has so interpreted the present Federal Communications Act as to empower the commission to take practically any action it chooses with reference to radio program material and the business relationships of broadcasters with a resulting serious threat of Governmental domination of Broadcasting content.

Therefore Be It Resolved that the American Federation of Labor urge that the Congress of the United States should at the earliest possible date assure the preservation of Freedom of Speech on the airways by enacting changes in the present Communications Act prescribing the limits of Government supervision of the radio and allied industries and definitely safeguarding broadcasting from any actual or implied government censorship authority over program content. By such reconsideration of the Act we believe a secure foundation would be laid for the post war expansion of the radio, television and other new electronic industries upon a free and constructive competitive basis.

SAFEGUARDING MANPOWER; SEE ENCLOSED PAMPHLET

"Safeguarding Essential Manpower" is the title of an official War Department publication, a copy of which is enclosed with this issue of NAB Reports. Selective Service procedure and policy are outlined in a general way, and the patriotic necessity for securing deferment of key employees in essential industries who cannot be replaced is stressed.

Additional copies are available upon request from NAB if it is desired to use this publication as an exhibit attached to applications for occupational deferment.

EMPLOYER RIGHT TO GIVE UNION ELECTION VIEWS UPHELD

The Supreme Court this week upheld the right of an employer to voice his views on the advisability of his employees voting for a union in an NLRB election (NLRB v. American Tube Bending Co.).

The Court refused to review a decision written by Judge Learned Hand in the Second Court of Appeals (New York) in which Judge Hand said the employer had that right under the First Amendment provided it was unaccompanied by actual coercion banned by the Wagner Act. This question has often been raised in connection with proposed NLRB election campaign speeches on the air.

INTERNATIONAL COMMUNICATIONS RESOLUTION PASSES SENATE

The Senate last Tuesday (19) passed with no opposition S. Res. 187 dealing with international communications by wire and radio. The Senate Committee on Interstate Commerce, in favorably reporting the resolution this week, had the following to say:

"The Committee on Interstate Commerce, to whom was referred the resolution (S. Res. 187) authorizing and directing a study of international communications by wire and radio, having considered the same, report thereon with the recommendation that it do pass.

"The study and investigation proposed by Senate Resolution 187 is the direct and logical outgrowth of the consideration and enactment of the so-called Domestic Merger Act (Public Law 4, 78th Cong).

"During consideration of the latter act, which authorized the merger of domestic telegraph carriers, serious consideration was given in both the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to the complex problems affecting United States carriers engaged in international communications by wire and radio. In fact, in one of the early drafts of the domestic merger bill (S. 2445, 77th Cong.) a provision was included to permit merger of United States Communication carriers operating in the international field; and such a provision was included in a merger bill reported in the House of Representatives in the Seventy-seventh Congress.

"A number of factors made inadvisable any final congressional consideration of the international communication problem at the time of the enactment of the Domestic Merger Act.

"One important objection was that the congressional committees considering the problem required far more information on the subject than was then available to them. Questions of ownership, foreign controls, control of subsidiary manufacturing entities, agreements with foreign governments, corporations, and nationals, rates, services, and many others were necessary to be answered before correct legislative action could be taken.

"Of equal importance to the committee was the viewpoint on communication problems expressed at that time by military agencies in a formal report.

"The Navy, in formal testimony by Rear Admiral Hooper who was authorized to express the official Navy viewpoint, opposed legislation which would have permitted merger of United States carriers engaged in international communications. Thereafter several members of the Committee on Interstate Commerce conferred with Secretary of the Navy Knox on the question. It may be noted here that the Navy has a long and continuing interest in the problem of United States international communications. The Navy was not only better informed than other Government agencies on the background and immediate problems, but presented cogent and convincing reasons against final legislative action which would have permitted merger of international communication carriers at that time and on the same terms which had been proposed for domestic carriers. The Navy Department explained that studies on the subject then under way were proceeding rapidly; that it was desirable, even vital, that any final Navy viewpoint be implemented by the wartime conditions and experiences which were even then being observed and correlated. Incidentally, these studies and findings, the committee believe, will assist greatly in the fact-finding investigation which the committee believe should now be undertaken by the Congress itself.

"The Committee on Interstate Commerce, when apprised of these facts, eliminated the international merger provisions from the Domestic Merger Act. During the sessions of the conference committee of the two Houses on the Domestic Merger Act, the international question was discussed and there was informal agreement among conferees that the Congress should not long delay in conducting a comprehensive study of international communication problems.

"Continuing developments and recent observations make it imperative that such a study, looking toward legislative recommendations, not be further delayed.

"Deserving particular consideration are recent confidential reports on international communication matters made to the Senate by some of its members who have completed an extensive survey of the war fronts. These reports, while admittedly fragmentary, buttress certain important facts well known to cognizant military leaders concerning the restrictions under which United States communication carriers in the international field operate; their inadequacy in serving United States interests; their inability under present organization to break into powerful cartel-dominated communication empires.

"A further consideration is the fact that there can be no comprehensive and clear-cut international post-war planning without the fullest consideration of the communication problem.

> **"Still another factor of present and immediate concern to the Congress is the problem of regulation of international communication carriers. Admittedly, existing law is inadequate to cope with the communication problems that will face this country in the post-war world. The inadequacies of the law are further complicated by frequent and growing criticism of the administrative agency and its personnel—criticism which no longer can be ignored by Congress. That administrative agency is an arm of the Congress, and, as such, is responsible to it. It is the duty of the Congress to ascertain in advance whether its creature is competent and experienced enough to undertake duties which inevitably must be thrust upon it; or whether a different method of selecting administrators for technical duties must be advocated.**

"For these reasons, the Committee on Interstate Commerce recommend that Senate Resolution 187 be adopted."

NATIONAL HOUSING APPLIES 'PRESSURE'; NAB PROTESTS

The following example of pressure methods is presented below so that all stations will recognize the various techniques that may be employed.

NAB protested to OWI, and its government liaison man is investigating with the idea of eliminating repetition of such incidents.

Here Is the Story

This is how the matter was reported by a California member, affiliated with MBS:

"Today, October 4, Mr. Blanford, head of the National Housing, spoke over Mutual from 6:16 to 6:30 Pacific War time with the broadcast originating from station WOL. In connection with this speech, all National Housing center managers received a directive concerning it.

"Inasmuch as we happen to be working with such matters locally as an individual citizen, the contents of said directive came to our attention. Because the wording is rather interesting, we herewith pass it along to you.

> "'Contact your local radio station to be sure that this address is broadcast. If the time has been sold by the station, see that there is a change in program or that the speech is recorded and broadcast at another time. This is imperative. It is not necessary to clear such arrangements with OWI. We want maximum coverage and an immediate report from you as to what stations will carry the talk and which will record it and broadcast it later.' That was signed by the National Housing Agency, Region X. It was sent 'To all War Housing Center managers from Donold B. Kerby' under date of September 20, 1943.

"The local manager of the agency answered said directive but due to time delay in the mail the answer did not reach Kerby as soon as he wanted it to and he immediately dispatched a wire again requesting said report."

A RADIO FIRST; SHOWS GET SCHOOL CREDIT

For the first time in the history of broadcasting, the Board of Education of New York City has approved for full credit two courses for teachers based on radio programs, it has been announced by James Rowland Angell, NBC public service counsellor.

The programs are "Lands of the Free" and "Music of the New World," both presentations of the NBC Inter-American University of the Air.

Recognition for these programs follows a six-month experimental period during which both courses were accredited as approved In-Service courses for teachers but without credit. Under today's approval, teachers satisfactorily completing these courses will get full credit toward annual salary increments.

"Lands of the Free" is a historical series dealing with the growth and development of the American nations and is broadcast over NBC Sundays at 4:30 p.m., EWT. "Music of the New World" is a series dealing with the growth of music in the Americas, featuring an orchestra under the direction of H. Leopold Spitalny, and is broadcast Thursdays at 11:30 p.m., EWT.

The NBC Inter-American University of the Air programs will be supplemented by the teachers by visits to NBC's Radio City studios and lectures. The courses are the only ones which can be attended, in part, at the teacher's home.

Simultaneously with the announcement of the New York City Board of Education action came word from Belmont Farley, director of public relations for the National Education Association, of plans for an extension of this type of in-service training of teachers by radio on a nationwide basis.

Dr. Farley announced the formation of a Committee on Use of Radio in Supervision to study the plan. Those invited to serve on the committee are: Jacob Greenberg, associate superintendent of schools, New York, N. Y., chairman; John K. Norton, professor of education, Columbia University; Ruth Cunningham, secretary, department of supervision and curriculum development, NEA; Hilda Maehling, secretary, department of classroom teachers, NEA; Roscoe L. West, president, New Jersey State Teachers College, Trenton, N. J., and president of the American Association of Teachers Colleges; George D. Stoddard, commissioner of education of the State of New York; Alexander J. Stoddard, superintendent of schools, Philadelphia, Pa.; Ruth Henderson, State Department of Education, Richmond, Va.; Herold Hunt, Superintendent of Schools, Kansas City, Mo., and Dr. Farley.

THE BEAM

Third issue of THE BEAM, publication of the Association of Women Directors of NAB, is enclosed with this issue of the REPORTS.

CHURCH CANVASS DATES SET

Dates for the forthcoming nation-wide campaign, the United Church Canvass, are November 21 to December 12. This campaign will call the attention of the country to the importance of institutions of religion in these war days.

Major faiths are joining, as last year, in its sponsorship. All churches, Jewish, Catholic and Protestant, are invited to participate in the campaign locally. In some cases the churches use the period to raise their annual budget; in others the purpose is to call the work of the churches to the attention of the public.

It is anticipated that many stations will assist in the campaign. Network broadcasts are now being scheduled.

President Roosevelt has endorsed the campaign and leading businessmen are joining in it as sponsors. Charles E. Wilson, former president of General Electric, is national chairman of the sponsors. Others on the committee include: John Stewart Bryan, Richmond, Va.; William H. Danforth, St. Louis; William Green, president, American Federation of Labor; Herbert Hoover; James L. Kraft, Chicago; Former Governor Herbert H. Lehman, New York; Philip C. Nash, Toledo; Stanley Resor, New York; Justice Owen J. Roberts, Washington; Governor L. V. Saltonstall, Massachusetts; Governor Charles A. Sprague, Oregon; Former Governor Harold E. Stassen, Minnesota; Edgar T. Welch, Westfield, N. Y.; William Allen White, Emporia; Judge Curtis B. Wilbur, San Francisco, and Wendell L. Willkie, New York.

FURTHER NOTES ON THE SALVAGE SITUATION

Reports on the efficiency of fat collection technique were received from a widely separated area since last issue of NAB Reports. Only one more area reports refusal of butchers to handle fats collected by housewives. Elsewhere, the principal disturbing factor was a falling off in receipts. The situation in reporting areas at a glance are indicated below.

Boise

"I know, however, that small outlying and remote towns of Idaho often do not have fat and tin can collection service and that merchants will no longer receive salvage material," reports Mrs. Georgia Phillips, manager, KIDO, Boise.

This situation is in contradistinction to the excellent situation prevailing within the city of Boise, "In our particular valley fat and tin are being collected promptly and the whole campaign well taken care of," Mrs. Phillips said.

Spokane

E. W. Jorgenson, special features editor, KFPY, surveyed the fat situation in Spokane. He found that housewives were delivering fat to butchers from whence it reached the rendering plants all OK.

His investigation did, however, locate a different waste of fat. Packing house men told him that they were forced to lose fat from the intestines and other portions of the carcass of slaughtered animals because they did not have enough manpower to handle it. Another reported loss was the use of too much fat in meat meal, also due to lack of labor, according to Mr. Jorgenson.

Shreveport

John C. McCormack, general manager, KWKH-KTBS, reports a falling off in fat collections. He said that during the month of August one large renderer collected only 12% of last April's figure. Collections rose to 21% of the April take in September.

Granted that seasonal influences are involved, it also seems apparent that other factors have become operative to decrease fat collections—the factor of re-use of fats within the home, perhaps a lack of incentive and the high point value of meats and fats.

Omaha and Nebraska

Soren Munkhof, WOW's director of news, has investigated the salvage situation in the state of Nebraska. Fats shipped for the account of Nebraska in August were 78,000 pounds. Movement to renderers is expedited to avoid spoilage.

Tin cans are collected on the first Wednesday of each month, school children taking them to school. Next day Army and WPB trucks transported them to railroad sidings and about four railroad cars are immediately dispatched to refiners.

Scrap iron moves out as rapidly as needed and no public scrap piles are left. "Whenever an order for a car load or a train load of scrap comes in it is filled immediately. 35,000 tons moved out of Nebraska in September."

Binghamton

Nina A. Fenson, WNBF, indicates that, "fat collections in this area are satisfactory,"—due to wide cooperation of civic organizations.

Greenfield

Ann Erickson, program director, WHAI, Greenfield, reports that, "fats in this locality have been collected and taken to a rendering plant," about 20 miles distant.

Yakima

C. H. Carlson, KIT, Yakima, writes, "as the result of a number of calls on local meat dealers, we find that the drive has been well supported," and satisfactorily handled.

OFFER NEW RED CROSS ETS

"Service Unlimited" is title of the new American Red Cross transcribed, 52-week series.

Programs for November 1 and 8 should be in the hands of chapters for the inspection of stations by October 25. NAB auditioned the first two shows and found them surpassing advanced billing.

MORE ABOUT PHIL COHEN

(This story supplements the brief bulletin in last week's "REPORTS.")

Philip H. Cohen, deputy chief of the Radio Bureau of the Office of War Information, has been appointed chief of that Bureau, Palmer Hoyt, director of OWI Domestic Operations, announced today. Mr. Cohen succeeds Donald Stauffer who resigned recently.

In his new position, Mr. Cohen will supervise all Government contacts with the radio industry in matters relating to the war effort. In addition to scheduling and allocating the time made available by radio stations for Government information programs, Mr. Cohen will handle all requests by Government agencies and officials for unsponsored radio time. He also will work with the War Advertising Council in presenting Government information themes on sponsored programs.

Mr. Cohen has been with the OWI Radio Bureau since its inception in 1941. In April of this year, he was appointed deputy chief of the Bureau. Following the resignation of Mr. Stauffer last month, Mr. Cohen took over as acting chief.

During six years as a producer in the radio industry, Mr. Cohen has produced more than a thousand programs on the major networks. He has lectured on radio at Northwestern, Harvard and New York Universities. A few years ago he carried out two projects for the Rockefeller Foundation, the first was a study of British Broadcasting methods, and the second a series of experimental programs produced in cooperation with the Library of Congress.

Mr. Cohen, son of Major Lee Cohen, USA, ret., was born in Fort Shafter, Hawaii. He obtained his early schooling in Hawaii, Panama, Virginia and New Jersey. He was graduated from Harvard in 1932.

DENNIS TO LEAVE NAB

Walt Dennis, NAB news bureau chief, will leave NAB November 1 to become public relations director of station WHN. Dennis came to NAB last March from KVOO.

KEITH TYLER NAMED OHIO U. RADIO CHIEF

Dr. I. Keith Tyler, director of the radio division of Ohio State University's bureau of educational research, has been appointed acting director of radio education for the university.

Howard L. Bevis, Ohio U president, announced the appointment, and said the move was made to coordinate all of the university's radio resources and activities into a more effective program.

Doctor Tyler is known widely in radio education circles and is director of the annual Institutes for Education by Radio held in Columbus each May.

YOUNG & RUBICAM AD SENT INDUSTRY BY MILLER

Proof of one of three Young & Rubicam advertisements dealing with the part American radio, newspapers and magazines are playing in the war was sent recently to all broadcasting stations in America by Neville Miller, NAB president.

The ad proof sent was the one on radio and it was entitled: "How America is using one of its greatest war weapons." Mr. Miller, in a message sent with the ad proof, suggested to station managers that: "there is much good material contained therein for a public service program, for a talk before your Rotary club or other civic group, for a newspaper advertisement and for use in many other ways . . ."

Mr. Miller further explained that the ad tells a story which radio stations can well retell in their communities many times.

The ad was featured in the New York Times, Time, Newsweek, Fortune, Broadcasting and an appropriate group of trade papers.

WROK BOOSTS PROGRAMS

In the last several months WROK, Rockford, has been engaged in sharply increased local promotion with special emphasis on programs. Bill Traum, promotion director, has forwarded a collection of pieces which include: Mailings to dealers on "The Breakfast Club," "Breakfast at Sardi's," "What's New?," Morton Salt, Fitch "Bandwagon," Coca-Cola's "Victory Parade of Spotlight Bands," and "Four Boys and a Song" for Grove's Cold Tablets. An off-set piece headed, "Your program makes news when it's on WROK," containing reproductions of advertisements in Rockford newspapers and of news stories was given wide distribution.

KIEM FARM MERIT AWARDS HELP SPUR PRODUCTION

William B. Smullin, president, KIEM, Eureka, thinks that production of food products can be increased by recognizing individual contributions of farmers. What Mr. Smullin has in mind is an "Award of Merit," to be presented to individual farmers by broadcast stations which operate in agricultural areas. He has taken a dose of his own medicine and found it good.

At the time the Army-Navy "E" award was available for food processing plants KIEM presented an "Award of Merit" to each farmer producing milk for the Golden State Tulare plant. Messrs. Nielson and Larson, in charge of the Golden State ice cream mix plant, whose product is going to the armed forces, felt very strongly that some type of award would assist materially in the farmer maintaining highest possible production. And they were right. Such awards as KIEM has given well might aid production elsewhere.

In this connection it should be recognized that the "A" awards, starting next November, will be limited to a relatively few counties, probably fewer than two hundred, and seasonal food processors with outstanding production records.

This agricultural achievement award was made known on September 18 by the War Food Administration. Recipients will be: (1) *counties* in which farmers have achieved exceptional production and (2) *seasonal food processors* with outstanding production records.

Nominations for the "A" award to counties will be made by State Agricultural War Boards, while regional directors and commodity branches of the Food Distribution Administration will nominate seasonal processing plants for the award, with final selection by the War Food Administration.

The "A" award flag shows a blue "A" surrounded by a white wreath composed of a head of grain and a half a gear wheel, symbolic of farm and food plant production, all on a green field symbolic of agriculture. A white star indicates the first season's award and others may be added as earned.

"Food is a decisive weapon of war," President Roosevelt said in a message designed to accompany presentation of the "A" awards. "Victory depends as much on our ability to produce food as on our ability to manufacture guns, planes and ships. Our army of farmers and processors are fighting an important battle on the food front. Working diligently and skillfully, they are speeding this Nation and our Allies to victory."

New Priority Instructions

As first reported in NAB REPORTS (page 414, October 8, 1943), Preference Rating Order P-133 has been revised by WPB to make it the exclusive controlling order for obtaining maintenance, repair and operating supplies for radio broadcasting. The amendment continues the AA-2, MRO-P-133 symbol and preference rating to broadcast stations.

Recording blanks to be used exclusively for broadcast purposes may be purchased by broadcast stations under the preference rating AA-2, MRO-P-133. Blank discs to be used for purposes other than broadcasting are assigned the preference rating AA-5 by the revised order.

Section (e) (1) is a clarification of tube inventory restrictions. The language of this section has been interpreted to allow the use of these ratings or allotment symbol only if a similar tube has first been operated to failure and the purchaser has in stock less than one new and one rebuilt tube, or two rebuilt spare tubes per active socket. General instructions for the purchase of materials in accordance with P-133 as amended October 8, 1943, are as follows:

1. Read Preference Rating Order P-133 as amended October 8, 1943, and become familiar with the provisions of the order.

2. Operate all tubes and parts to absolute failure, before installing replacements, in order to bring inventory within the limits of the order.

3. Hold best spare tubes for last use in the equipment thus minimizing the chance of failure while procuring replacements. In order to check the condition of spare tubes and to insure their immediate availability without conditioning, use all spares not less than one day every three months and not more than one day of each month. This practice is preferable to the rotation of spare tubes on an equal use basis.

4. Immediately upon the failure of tubes which will reduce the spare inventory to less than the maximum permitted, place a purchase order with your supplier. This purchase order should bear the required certification as-

PART 3289—RADIO AND RADAR
[Preference Rating Order P-133, as Amended Oct. 8, 1943]
ELECTRONIC EQUIPMENT

Section 3289.41 *Preference Rating Order P-133* is hereby amended to read as follows:

§ 3289.41 *Preference Rating Order P-133*—(a) *What this order does.* This is a complete revision of Preference Rating Order P-133. It gives preferences ratings to persons engaged in certain businesses. It also entitles some of them to use the allotment symbol "MRO". The ratings and symbol can be used only to get materials for maintenance, repair and operating supplies; and there are also certain special restrictions set forth in paragraph (e). The businesses, and the ratings and symbol assigned to persons engaged in them are:

(1) Radio communication—AA-1. Persons engaged in this business are also entitled to use the allotment symbol "MRO".

(2) Radio broadcasting—AA-2. Persons engaged in this business are also entitled to use the allotment symbol "MRO".

(3) Sound recording for commercial, educational or industrial purposes—AA-5.

(4) Operation and maintenance of public address, intercommunication, plant sound or other similar electronic systems. such as systems for the controlled distribution of musical programs—AA-5.

(b) *What is meant by maintenance, repair and operating supplies.* These terms include whatever is necessary to keep a person's business property and equipment in sound working condition, or to fix it when it has broken down or is about to break down. They also include those things which are normally used in the day-by-day operation of any of these businesses, being as a rule things which are consumed in use. On the other hand, there are some things which these terms do not include, and to which the benefits of this order do not extend. These are production materials, capitalized repairs, capital equipment, capital replacements, plant expansion, addition of facilities, and the construction and remodeling of buildings.

(c) *Relation of this order to War Production Board regulations and other orders.* This order and all things done under it are subject to the provisions of all applicable regulations and orders of the War Production Board, except that persons who are engaged in the businesses listed in this order to that extent are entitled to none of the benefits, and are subject to none of the restrictions, contained in CMP Regulations No. 5 and No. 5A. Any one using this order should read particularly Priorities Regulation No. 3, which tells how to apply and extend ratings, and which contains a list of things which blanket MRO ratings (such as those assigned by this order) cannot be used to get (Priorities Regulation No. 3, paragraph (f) and List B).

(d) *How to use the ratings and allotment symbol.* (1) Persons entitled to use these ratings and the allotment symbol "MRO" under this order may do so by placing on their purchase orders either the form of certificate provided in Priorities Regulation No. 3, or that provided in CMP Regulation No. 7. In every case those persons entitled under this order to use the allotment symbol "MRO" must place on their purchase orders in addition to the certificate the symbol "MRO-P-133".

(2) Any purchase order for controlled materials which bears such a certificate and symbol is an authorized controlled material order, and on such orders the preference rating should not be shown. The preference rating must, of course, be shown on orders for anything but controlled materials.

(e) *Restrictions on the use of the ratings and allotment symbol.* No person shall use these ratings or allotment symbol:

(1) To buy or to repair a tube unless a similar tube has first been operated to failure, or unless he has in stock less than one new and one rebuilt, or two rebuilt spare tubes for each active tube socket. All power tubes of 250 watts or more (plate dissipation), which have been operated to failure and are not to be repaired, shall be returned to the manufacturer.

(2) To replace in stock any spare parts except parts which are subject to frequent failure or rapid deterioration, or parts which are of such special design that their failure would cause a lengthy interruption of operations unless they could be immediately replaced from stock.

(3) To replace in stock a new part (other than a tube) if the old part can be repaired.

(4) To replace equipment which has not been used within the ratings specified by the manufacturer of the equipment.

(5) To increase the value of a person's inventory of repair parts (not including tubes) above the value of such inventory on October 5, 1942.

(6) To increase a person's inventory of operating supplies (not including tubes) above a ninety-day requirment.

(7) To get aluminum if the use of any other material is practicable, or to get more than five hundred pounds of aluminum in any calendar quarter in any event.

(8) To get materials for the maintenance, repair or operation of equipment for the account of War Emergency Radio Service.

(f) *Persons who service these businesses.* Any person (such as a service repair shop) who does maintenance or repair work for anyone engaged in any of the businesses described in this order may use the rating and symbol to which his customer would be entitled in order to get materials to do that work for his customer. In such a case the restrictions of paragraph (e) apply as to the customer and the customer shall be responsible if they are violated.

(g) *Special rule for international, point-to-point, radio communication carriers.* Any person engaged in international, point-to-point radio communication, as a commercial operation, may use the rating and allotment symbol given by this order to rearrange, modify or expand existing facilities and equipment (but not buildings) either to maintain his regularly established services, or to provide whatever new or modified service may be necessary to render services required by or for the account of the United States Army, the United States Navy, any agency of the United States Government, or any agency of any foreign government.

The cost of materials for any one project undertaken under this paragraph (g) must not exceed $1,500.00, in which case the restrictions of paragraph (e) of this order, and the rules of Conservation Order L-41 shall not apply, and an authorization to begin construction shall not be necessary.

(h) *Penalties for violating this order.* Any person who wilfully violates any provision of this order or falsifies the certificate prescribed in paragraph (d), or who conceals any material information or furnishes false information to any department or agency of the United States is guilty of a crime. If convicted, he may be punished by fine or imprisonment. He may also be deprived of any or all priorities assistance. For example, he may be prohibited from getting, delivering, processing, or using anything which is subject to priority control by the War Production Board.

(i) *How to appeal from any provision of this order.* Any person may appeal for relief from any provision of this order by writing a letter which explains fully what provisions he is appealing from and why he thinks he should be relieved from those provisions so far as they relate to him or his business. He should send this letter with two signed copies to the War Production Board.

(j) *Letters and reports about this order.* Any letters about this order, or any reports which persons subject to this order may be required to file, should be addressed to the War Production Board, Radio and Radar Division, Washington 25, D. C., Ref: P-133.

Issued this 8th day of October 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

signing the preference rating AA-2, MRO-P-133. When placing the purchase order request delivery prior to a definite date and ask your supplier to advise you immediately if for any reason the order cannot be filled on or before the required date. If notice is received from supplier that delivery cannot be made by the date specified, immediate *inquiry* should be made to all other known sources of supply concerning their ability to fill the order in accordance with your requirements. If these inquiries result in a satisfactory delivery promise from another supplier, the original order *should be cancelled* and another order placed with the new supplier (WPB Regulation 3, amended June 26, 1942, Section (b), paragraph 3. This regulation forbids duplicate orders.)

5. The following certification form should be placed on all orders:

CERTIFICATION

The undersigned purchaser hereby represents to the seller and to the War Production Board that he is entitled to apply or extend the preference ratings indicated opposite the items shown on this purchase order, and that such application or extension is in accordance with Priorities Regulation No. 3, as amended, with the terms of which the undersigned is familiar.

.... Name of Purchaser
.... Address

By.. (Signature and title of duly authorized officer)
.... Date

6. If after following the procedure outlined in paragraph 4 a satisfactory delivery promise is not obtained, an order should be placed with the supplier offering the best delivery promise. At the same time a 541 form should be filed with the War Production Board, Director of Industry Operations, Washington, D. C. Be sure to furnish all required information, including your purchase order number or the vendor's order number, on the WPB-541 (formerly PD-1A) and outline in the covering letter the substance of your correspondence under paragraph 4.

7. If capital equipment, such as turntables, microphones, amplifiers, monitors, transmitters, antennas, etc., is destroyed by fire, accident or other causes, it is suggested that the problem of obtaining proper authorizations for the replacement of the lost equipment be referred to the regional WPB office for instructions. A directory of regional WPB offices will be found in this issue of NAB Reports and Broadcast Engineering Bulletin No. 3.

8. If your station is actually off the air due to the failure to obtain spare tubes or parts or if the tubes or parts in use (for which no replacements are available) appear to be approaching failure communicate immediately by telephone or telegraph with the WPB Emergency Branch, Washington, D. C. The telephone number is REpublic 7500, extension 75052. This communication should refer to your 541 application, if previously filed.

To avoid confusion, it is suggested that Broadcast Engineering Bulletin No. 1 dated February 5, 1943, be removed from your files and this bulletin substituted. The complete text of the new order as amended October 8, 1943, is printed herewith.

REPAIRED TUBES

Many stations have been able to maintain adequate tube inventories through the use of repaired tubes. When difficulties are encountered in obtaining new tubes (250 watts or more) it may be well to investigate thoroughly the repair facilities now available. A directory of firms engaged in this work will be found in NAB Reports of October 2, 1942, page 580, and October 23, 1942, page 611. If additional information is desired concerning either tube repairing facilities or the dependability of repaired tubes, communicate with the NAB Engineering Department.

FEDERAL COMMUNICATIONS COMMISSION

FCC NETWORK RULE

The FCC has ordered that Regulation 3.107 relating to the ownership of more than one network serving substantially the same area by a single network organization, which had been indefinitely suspended, should become effective on April 12, 1944.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, October 25th. It is subject to change.

Tuesday, October 26

WOI—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa.—For special service authorization; 640 kc., 5 KW, 6 a. m. to local sunrise.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KRKO—The Everett Broadcasting Co., Inc., Everett, Wash.—Granted modification of license (B5-ML-1174) to increase night power from 100 to 250 watts.

KWFC—Clyde E. Wilson & Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—Granted renewal of license for the regular period (B3-R-1072).

KWFC—Clyde E. Wilson & Howard A. Shuman, d/b as Hot Springs Broadcasting Co. (Assignor), Clyde E. Wilson (Assignee), Hot Springs, Ark.—Granted consent to involuntary assignment of license (B3-AL-377) from Clyde E. Wilson & Howard A. Shuman, d/b as Hot Springs Broadcasting Co., licensee of Station KWFC, to Clyde E. Wilson, personally. The station was sold at public auction for a consideration of $49,000.

WDSM—WDSM, Inc., Superior, Wisc.—Granted construction permit (B4-P-3526), to make changes in transmitting equipment and increase power from 100 to 250 watts.

The Blue Network Company, Inc.—Granted authority to transmit recorded programs to all broadcast stations under the control of the Canadian authorities that may be heard consistently in the United States (B1-FP-118).

WDSU—WDSU, Inc., New Orleans, La.—Adopted Order (B-178) granted application for renewal of license of station WDSU; also granted reinstatement of application for construction permit for increase in power, installation of new transmitter, directional antenna and change site.

WMIS—Natchez Broadcasting Co., Natchez, Miss; WGRM—P. K. Ewing, Greenwood, Miss.—Adopted Order (B-178) extending outstanding temporary licenses for a period of one month from October 21 to November 21, 1943, for stations WMIS and WGRM.

KCMC—KCMC, Inc., Texarkana, Texas.—Granted construction permit (B3-P-3413) to change frequency from 1450 to 1230 kc., and make changes in transmitting equipment.

DECISIONS GRANTED

The Commission adopted a Decision and Order (B-187) granting the application of WRDO, Inc., licensee of Radio Station WRDO, Augusta, Maine, for construction permit to relocate transmitter and antenna site, install a new transmitter, and increase power from 100 to 250 watts.

This action is consistent with the Supplemental Statement of Policy issued by the Commission on August 11, 1943, permitting increases in power in the case of local broadcast stations, under stated conditions.

DESIGNATED FOR HEARING

WNAC—The Yankee Network, Inc., Boston, Mass.—Designated for hearing application for construction permit (B1-P-3537) to move auxiliary transmitter from Dorchester Street, Quincy, Mass., to corner of Vershire St. and Harriett Ave., Quincy, Mass.

KTHS—Radio Broadcasting, Inc., Hot Springs, Ark.—Designated for hearing application for construction permit (B3-P-3525) to increase power from 5 KW day, 10 KW night, to 50 KW; change hours of operation from sharing KRLD to unlimited time; install new transmitter, new DA for night use, and move studio and transmitter to Little Rock, Ark.

MISCELLANEOUS

WWPG—Lake Worth Broadcasting Corp., Palm Beach, Fla.—Granted modification of license to change corporate name of licensee from Lake Worth Broadcasting Corp. to Palm Beach Broadcasting Corp. (B3-ML-1177).

WLBZ—Main Broadcasting Co., Inc., Bangor, Maine.—Granted license to cover construction permit as modified, for increase in power, and installation of new equipment and directional antenna for day and night use (B1-L-1773); granted authority to determine operating power by direct measurement of antenna power (B1-Z-1552).

The Commission has adopted an Order denying petition for intervention of Ira Chase Koehne in behalf of himself and of others indicated as creditors of Blue Network Co., Inc., et al., in the matter of Radio Corp. of America (transferor) and American Broadcasting System, Inc. (transferee), (Docket No. 6536).

WJNO—WJNO, Inc., West Palm Beach, Fla.—Denied petition requesting Commission to reconsider its action of December 15, 1942, in designating for hearing application to use formerly licensed composite transmitter (250 watts) and install vertical antenna as an auxiliary unit, and grant same without hearing.

West Allis Broadcasting Co., West Allis, Wisc.—Adopted order denying petition to reinstate application (B4-P-3045, Docket 6098) for new station.

The Times Herald Company, Port Huron, Mich.—Placed in pending files pursuant to Commission Order No. 79, application for construction permit (B2-PH-141) for new FM broadcast station.

APPLICATIONS FILED AT FCC

850 Kilocycles

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Modification of license to operate with directional antenna after sunset at Gainesville, Florida, instead of after local sunset.

990 Kilocycles

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Special service authorization to make changes in transmitting equipment and operate with 500 watts power for emergency purposes only during power line failures, for the period ending 4-1-44.

1230 Kilocycles

WAYX—Jack Williams, Waycross, Ga.—Authority to determine operating power by direct measurement of antenna power.

1280 Kilocycles

WKST—WKST, Inc., New Castle, Pa.—Acquisition of control of license corporation by S. W. Townsend and Wanda E.

Townsend, through purchase of 80 shares of stock from Joseph Thomas by Wanda E. Townsend.

1480 Kilocycles

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—License to cover construction permit (B3-P-3521), which authorized move of auxiliary transmitter.

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Authority to determine operating power by direct measurement of antenna power of auxiliary transmitter.

MISCELLANEOUS APPLICATIONS

NEW—National Broadcasting Co., Inc., area of Chicago, Ill.—Construction permit for a new relay broadcast station to be operated on **1606, 2074, 2102** and **2758 kc.**, 25 watts power and A1, A2 and A3 emission.

NEW—National Broadcasting Co., Inc., Hollywood, Calif.—Construction permit for a new relay broadcast station to be operated on **1606, 2074, 2102** and **2758 kc.**, 500 watts power and A1, A2 and A3 emission.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Quick Mfg. Company—Misrepresentation of the quality, merits and price of gauze and latex bandages is alleged in a complaint issued against John W. Kellogg, trading as Quick Manufacturing Co., Quick Prophylactic Co. and Sealtex Co., 2012 Wabansia Ave., Chicago. (5061)

Research Mfg. Corp.—A complaint has been issued charging Research Manufacturing Corp., Portland, Conn., and its president, Harold S. Guy, and its former president, J. L. Seat, with misrepresentation in connection with the sale of an antifreeze solution designated "Fre-Zex." (5063)

Charles W. Wolf, Inc., 22 Cortlandt St., New York, engaged in the sale of handbags, leather goods, luggage, and other merchandise, is charged in a complaint with misrepresenting the character of its business and the sales prices of its products. (5062)

R. C. Miller & Co., and Marie Leiblinger & Co., 2416 McNally St., Altadena, Calif., manufacturing and distributing a medicinal preparation designated "Nonat," is charged in a complaint with false advertising and misrepresentation. (5064)

CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Calhoun Poultry Farm and Hatchery, Montrose, Mo., have entered into a stipulation to cease and desist from certain misrepresentations in connection with the sale of baby chicks. The Potts-Turnbull Co., 912 Baltimore Ave., Kansas City, Mo., an advertising agency which disseminated advertisements on behalf of the Calhouns, also signed the stipulation. (03152)

Dermatological Products Corp., 110 Observer Highway, Hoboken, N. J., engaged in selling Seborol Scalp Lotion and Seborol Scalp Ointment, stipulated that it will cease representing that the mark "Seborol" is a registered trade-mark in the United States Patent Office unless it is so registered. (03151)

L. M. Kupersmith & Company, et al.—Two New York City firms engaged in the sale and distribution of furs and fur garments, L. M. Kupersmith Co., Inc., 350 Seventh Ave., and Samuel Kanik and Moe Greenberg, trading as Kanik & Greenberg, 305 Seventh Ave., stipulated that they will discontinue the use of the words "Asiatic Mink" or "Asiatic" as descriptive of coats or garments manufactured from the peltries of Japanese mink, and will cease selling, invoicing or branding any fur product in any manner which is or may be deceptive or misleading as to the geographical origin of the animal from which the peltry has been obtained. (3732-3733)

V. E. Michael, Ashtabula, Ohio, has entered into a stipulation to discontinue misrepresenting the therapeutic value of a medicinal preparation he sells under the names "Vi-Mins" and "Vita-Food." (03150)

F. H. Noble & Company—Stipulations to discontinue fictitious price marking of their merchandise have been entered into by F. H. Noble & Co., 559 West 59th St., Chicago (3735), and Presidential Silver Co., Inglewood, Calif. (3736), both engaged in the manufacture and sale of trophies, emblems and similar merchandise. They agree to cease and desist from the use of any false, fictitious or misleading price representation which purports to be the retail sales price of an article but which is actually in excess of the price for which it is customarily sold in the usual course of retail trade. (3735-3736)

Paramount Remnant Co., Lexington, N. C., entered into a stipulation to cease and desist from representing, in connection with the sale of quilting materials, that all money is refunded to dissatisfied purchasers when actually reimbursement is not made for all charges sustained by the purchasers including cost of the goods, transportation charges, and C.O.D. fees. (07149)

Pretorius Approved Products, 1115 South Glendale Ave., Glendale, Calif., entered into a stipulation to cease and desist from certain misrepresentations in connection with the sale of food products designated "Alfamint" and "Minrich," and an electric mixing device known as the "Pretorius Liquifier." (3731)

H. H. Robertson Co., Farmers Bank Bldg., Pittsburgh, manufacturer of a monolithic floor surfacing designated "Robertson Hubbellite," entered into a stipulation to cease and desist from representing that the product is inherently sanigenic or provides self-sanitizing floor surfaces without regard to conditions of use and continuously disinfects the surface; that it is capable, under conditions of ordinary use, of destroying micro-organisms generally and may be relied upon to prevent the spread of disease; or that it prevents, to any effective degree, the growth on its surface of such micro-organisms as are associated with athlete's foot, wounds and abscesses, boil, typhoid fever, paratyphoid fever, and hog cholera. (3734)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 44, October 29, 1943

NEWLY FORMED NAB MUSIC COMMITTEE TO MEET SOON

Music in its many aspects plays a most important part in broadcasting. Not only must the industry take steps to insure an adequate supply of music as was done by the creation of BMI, not only must it protect itself against the actions of James Caesar Petrillo, but it must study the whole field of music, learn more about its possible and varied uses, anticipate the problems which the industry will face over a term of years, and adopt a constructive program.

Too long have our battles in the music field been defensive. The more the industry learns about music, and puts that knowledge to good use, the greater will be the public response and the greater will be the listening audience.

For the purpose of studying the whole field of music as it relates to broadcasting, the following Committee has been appointed:

Chairman, Campbell Arnoux, WTAR, Norfolk, Va.; James P. Begley, KYW, Philadelphia, Pa.; Arthur Church, KMBC, Kansas City, Mo.; Robert Enoch, KTOK, Oklahoma City, Okla.; C. W. Myers, KALE, Portland, Ore.; Elliott Sanger, WQXR, New York City; Frank R. Smith, Jr., WWSW, Pittsburgh, Pa.; John Wahlstedt, WHB, Kansas City, Mo.; Warren Williamson, WKBN, Youngstown, O.; Thomas Belviso, NBC, New York City; Frank White, CBS, New York City.

ASCAP Claims To Be Studied

The ASCAP audits, and the proper interpretation of the ASCAP contracts in the light of the consent decree present an immediate problem. Many stations which have recently been audited by ASCAP have written the NAB regarding demands made by ASCAP as the result of the audits. We believe that rather than have each station argue these claims with ASCAP, a real service could be rendered both to the industry and to ASCAP by a meeting of the Music Committee with ASCAP whereby the subject could be handled on an industry-wide basis. ASCAP has indicated an interest in meeting with the Committee.

There are other problems which the Committee can well consider and in connection with which the Committee can render service to broadcasters. The work of the Committee will in no way duplicate or overlap upon the work of the Program Managers Committee or of the Advisory Committee on the Recording Ban, both of which Committees are active in related but different fields.

The first meeting of the Committee will be held on December 1st-2nd at the Hotel Roosevelt, New York City. Following the meeting, a report will be made to the industry.

$12,000,000 CONTRIBUTION TO THIRD WAR LOAN BY STATIONS AND ADVERTISERS

"The donations to the Third War Loan of more than $12,000,000 in time and talent, by the radio industry and its advertisers, is one of the great achievements of this campaign," writes Ted R. Gamble, national director war finance division of the Treasury Department, to Neville Miller, confirming an estimate supplied by NAB.

In the same mail, Gamble thanks the radio industry for its cooperation, as follows:

> "Now that the Third War Loan Drive has come to a successful conclusion, I should like to tell you how much we in the Treasury Department have been encouraged by the generous and wholehearted response of the American people. The unprecedented results of this drive will undoubtedly strengthen our united efforts for speedy victory.
>
> "A large part of this splendid achievement was due to the complete and patriotic cooperation of members of the radio industry. Your valuable help in contacting radio stations throughout the country and encouraging their participation in the campaign was a most important part in bringing the War Bond message home to all the American people.
>
> "Such generous assistance is deeply appreciated by myself and my co-workers, and particularly, by our troops who depend on the contributions of the home front to bring about the victory we all desire."

Vince Callahan, director of advertising, press and radio, supplied significant statistical information:

> "When the Third War Loan sales were tabulated a total of $18,943,000 in War Bonds had been sold. I know that you share with us our pride in this achievement, for your faithful assistance in the campaign was a vital contribution to its success.
>
> "Not only was the national quota of fifteen billion dolars exceeded by almost twenty-five per cent, but sales to individuals mounted to $5,377,000,000, against a quota of five billion dollars. Here again we are indebted to you, for it was in this most crucial phase of the drive—the effort to reach as many people as possible with the War Bond message—that your services were an invaluable aid.
>
> "Knowing that we can rely upon your continued support of the war financing effort, we approach the prospect of the Fourth War Loan in January with renewed assurance.
>
> "Once again, my sincere thanks for your splendid cooperation."

K. C. CHAMBER AIDS RADIO LEGISLATION

The Kansas City Chamber of Commerce is on its toes. KMBC has just reported that the Kansas City Chamber of Commerce sent the following letter signed by its President, Ward C. Gifford, to all Missouri Senators and Representatives.

> "The Directors of this Chamber of Commerce recently discussed the Supreme Court's interpretation that the Communications Act not only confers upon Federal Communication Commission the power to superview the traffic of radio broadcasting, but also puts upon the commission the burden of determining the composition of that traffic.
>
> "This interpretation would imply that the legislation goes far beyond the field of radio. The freedom of the press and in fact, the freedom of all forms of communications are apparently placed in jeopardy. Under this interpretation, all advertising media and the contents of advertisements themselves would be embraced in this line of reasoning.
>
> "Is there any consideration being given to the amendment of the Communications Act so as to remove any and all threat against the freedom of the press and the freedom of various kinds of communications? We are strongly of the opinion that Congress did not intend to place the freedoms in jeopardy when it enacted the law and that the Court ruling to the contrary would indicate the need of some amendment."

Labor

WMAL AND WCOV LABOR ACTIVITIES

Station WMAL, Washington, and AFRA have submitted to the War Labor Board a dispute as to whether the station should pay staff announcers extra fees for all local commercials.

Station WCOV, Montgomery, Ala., and the IBEW have submitted to arbitration a dispute as to whether nonmembers of the union can handle studio controls. The American Arbitration Association is to name the arbiter.

TALENT EXCHANGE

The WMC has advised the NAB that the exchange of free lance talent among various stations and networks under job freezing orders is being worked out by the New York regional office since the problem centers there. The NAB had asked the commission for an exemption for free lance talent.

48-HOUR WORK WEEK ORDERED IN 31 CITIES

The War Manpower Commission has ordered a 48-hour work week by November 15 in all Group I cities where the longer work week has not yet become effective. These are:

Meriden, Conn.
New Bedford, Mass.
Newport, R. I.
Massena, N. Y.
Allentown, Pa.
Elizabeth City, N. C.
Petersburg, Va.
Spruce Pine, N. C.
Adrian, Mich.
Muskegon, Mich.
Anderson, Ind.
Fort Wayne, Ind.
Racine, Wis.
South Bend, Ind.
Indianapolis, Ind.
Columbus, Ga.
Jacksonville, Fla.
Spartanburg, S. C.
Oklahoma City, Okla.
Pine Bluff, Ark.
Dallas, Tex.
Galveston, Tex.
Butte, Mont.
Brice, Utah
Rock Springs, Wyo.
Wallace-Kellogg, Idaho
Eureka, Calif.
Spokane, Wash.
Stockton, Calif.
Sturgeon Bay, Wis.

Radio stations in these cities should immediately get in touch with their local WMC officials to explain:

(1) What their present schedules are.

(2) Whether an increase in any of these schedules would permit the release of any manpower.

(3) What schedules they propose.

Remember, the purpose of the longer work week is to release manpower. If putting in a longer work week would not accomplish this purpose, the WMC will approve present schedules.

RADIO MARKET DATA HANDBOOK OFF THE PRESS

The Radio Market Data Handbook prepared by the NAB Research Department under the direction of the NAB Research Committee is today being prepared for mailing. The book is a 260-page collection of market data of value to radio stations and users of broadcast time.

One copy of the handbook will be sent without charge to each member station and each associate member organization. Also a complimentary copy will be sent to a selected list of advertisers and agencies actively interested in national spot radio advertising. The cost of the publication has necessitated our keeping the number of complimentary copies to a minimum. Therefore, the agency and advertiser lists have been confined to those placing substantial national spot business.

Member stations may desire to present copies of the handbook to local agencies and possibly advertisers. A limited number of copies will be available at NAB Headquarters at printing cost—$1.50 per copy.

Numerous orders have been received in advance of publication for copies of the handbook. NAB members are urged to order early if additional copies are desired.

AMERICAN THEATRE WING ASKS HELP OF STATION MANAGERS; PROGRAM DIRECTORS ON MUSIC

(The following letter sent to Neville Miller by Oscar Hammerstein, 2nd, chairman of the American Theatre Wing Music War Committee is self-explanatory.)

"The American Theatre Wing Music War Committee was created to marshal the forces of music to help, as we can, in winning the war. As its chairman, I welcome this opportunity to inform the membership of the National Association of Broadcasters concerning our reasons for being and the things we are trying to do.

"The Committee is a division of the American Theatre Wing set up to coordinate the wartime efforts of the music industry. It includes the country's leading songwriters, publishers and music men, who are all working,

ENGINEERING COMMITTEE

The NAB Executive Engineering Committee met in the Hotel Roosevelt in New York on Friday, October 29. Full details of the meeting will appear in the next issue of the NAB "Reports."

without thought of profit, to make music serve our country's war effort.

"Songwriters have, from the beginning of this war, been conscientiously and industriously trying to supply the civilian population and the armed forces with songs to sing, and during this time some very good songs have been written. Each one of these had its own applicability at the time it was popular. "The Last Time I Saw Paris" was a sentimental tribute to the tragic fall of that city, but its resigned acceptance of the defeat was appropriate only to the time that the song was written, and such a song today would be out of key with our aggressive spirit and our determination not to remember Paris as it was but to restore it to its former glory.

"'When the Lights Go On Again All Over the World' was a very popular song, its propaganda value, however, being extremely dubious. A great many of the Music War Committee members feel that it is a mistake to emphasize wishful thinking about the end of the war. It is better to sing about how we are fighting to end it and what we are going to do about a peace when we win it.

"This critical approach shows an important part of what the Music War Committee is trying to do. It is not enough to find a song relative to the war that has the elements of popularity; we must consider also whether that song *should* be popular, whether its popularization would tend to increase or whether it would tend to diminish the vigor and forcefulness with which an American approaches his job in winning the war.

"On the other hand, the Music War Committee tries to remember that a war song gets no virtue from its high purpose or patriotic intent alone. To justify itself it must stand on its feet as a really good *song*. A fairly good war song is of no more use to the war effort than a fairly good egg is to a breakfast.

"The American Theatre Wing Music War Committee has found its work divided into two main channels. One is the job of creating songs to help the war effort and the other is the job of getting those songs heard once we have ferreted them out. It is in this second phase of our work that we call for your help.

"The songs selected for recommendation by the Music War Committee are referred to its Catalogue Committee. If a song is published the sub-committee obtains copies from the publisher; if not, it has lead sheets or piano copies printed.

"Our catalogue as it stands at present is listed below. It includes songs of all kinds, from corn to cantata, and after careful consideration we are ready to say that each one, in its own way, can help to carry forward our war effort. We also say that this listing eliminates songs that might encourage complacency, idleness, or wishful thinking.

"We ask that station managers and program directors study this list of songs, listen to them on network broadcasts or on records, use them as much as possible on their own stations and use their influence to have them used in their communities. We urge all to write for copies to the American Theatre Wing Music War Committee, 730 Fifth Avenue, New York 19, N. Y. In doing this I believe they will get not only a group of good songs, but an opportunity to help in what we feel is an important service in wartime America.

With sincere good wishes,

OSCAR HAMMERSTEIN, 2nd, Chairman
American Theatre Wing
Music War Committee."

BYRON PRICE; HAROLD RYAN PRAISE FOREIGN LANGUAGE RADIO WARTIME CONTROL

Letters from Byron Price, director, and Harold Ryan, assistant director of the Office of Censorship, to Arthur Simon, WPEN, chairman of the foreign language radio wartime control, are reproduced herewith:

> "Mr. Ryan has told me of the progress that has been made by you and your fellow-representatives in tightening up the censorship procedures of foreign language broadcasting stations.
>
> "I wish to add to Mr. Ryan's comment my own commendation. I have never felt that the broadcasting industry, or any part of it, would fail the government when called upon to help in the prosecution of war. Censorship is a wartime measure and a wartime weapon. Properly administered, it can deal direct blows against the enemy which cost him heavily. It can and does, at the same time, save the lives and conserve the materials of our own armed services. That the broadcasting industry has recognized this fact and has acted upon that recognition is a testimonial to its public spirit and patriotism.
>
> Sincerely,
>
> BYRON PRICE,
> *Director.*"

> "I believe the time has come when you, as chairman of the Foreign Language Radio Wartime Control and special liaison officer between the Office of Censorship and our field representatives, should have a report regarding the status of voluntary censorship in the foreign language broadcasting industry.
>
> "As you will recall, Mr. Price and I met with you and other foreign language broadcasters in Chicago during the conference of the National Association of Broadcasters. On that occasion we lamented the fact that a large percentage of foreign language broadcasters had failed to install censors and monitors in their stations, as suggested in the Censorship Code.
>
> "Acting in behalf of the Foreign Language Radio Wartime Control, you volunteered that organization's services to attack the problem on an industry basis and to recommend men in the field who could represent this Office in correcting the situation.
>
> "Under the impetus of this voluntary offer, 20 men in the foreign language broadcasting segment of the industry accepted the invitation of this Office to represent it in meeting personally with broadcasters in their respective areas. Those who accepted this task and performed it without compensation and at considerable sacrifice of time were: Mr. T. F. Allen, Radio Station WFCI, Pawtucket, Rhode Island; Mr. Howard W. Davis, Radio Station KMAC, San Antonio, Texas; Mr. Charles Lanphier, Radio Station WEMP, Milwaukee, Wisconsin; Mr. Milton Meyers, Radio Station WEIM, Fitchburg, Massachusetts; Mr. William T. Welch, Radio Station WSAR, Fall River, Massachusetts; Mr. J. Fred Hopkins, Radio Station WJBK, Detroit, Michigan; Mr. N. Pagliara, Radio Station WEW, St. Louis, Missouri; Mr. Walter C. Bridges, Radio Station WEBC, Duluth, Minnesota; Mr. Lumir Urban, Radio Station KORN, Fremont, Nebraska; Mr. Harry Burdick, Radio Station KGGM, Albuquerque, New Mexico; Mr. Joseph Lang, Radio Station WHOM, Jersey City, New Jersey; Mr. O. E. Richardson, Radio Station WJOB, Hammond, Indiana; Dr. O. J. H. Preus, Radio Station KWLC, Decorah, Iowa; Mr. John C. Libby, Radio Station WOCU, Lewiston, Maine; Mr. Lee Little, Radio Station KTUC, Tucson, Arizona; Mr. S. H. Patterson, Radio Station KSAN, San Francisco, California; Mr. W. L. Gleeson, Radio Station KPRO, Riverside, California; Mr. C. Glover DeLaney, Radio Station WTHT, Hartford, Connecticut; Mr. Gene T. Dyer, Radio Station WGES, Chicago, Illinois.
>
> "I am delighted to tell you now that through the efforts of these men and by virtue of the patriotic response with which those efforts were met by the foreign language broadcasters of the country, all of these broadcasting stations are now operating within the recommendations contained in the Code of Wartime Practices for American Broadcasters.
>
> "This Office is indebted to you and your fellow broadcasters who represented us in this undertaking. It is indebted, as well, to all foreign language broadcasters who have met a difficult situation and solved it with no thought of their own problems, but with consideration only for the security of their nation at war.
>
> "This is meant to convey to you our good wishes and our sincere thanks, and to urge upon you and all of your colleagues renewed and unrelenting vigilance in observing the tenets by which wartime censorship operates. Officially the specific assignment given to the field representatives has been fulfilled. We shall continue to think of you, however, as friends in the field to whom we can turn in the event of need.
>
> Cordially,
>
> J. H. RYAN,
> *Assistant Director.*"

PAPER SHORTAGE SERIOUS

Paper mills have started closing down because of shortages of pulp and waste paper. Civilians can't do anything about pulp shortage but they can do everything about bringing waste paper to collection centers.

The shortage is serious because of the effect on our food supply. Carton stocks of all kinds are critical and carton stocks are needed for hundreds of uses, including getting processed foods to consumers.

What Has Been Done

Paper Consuming Industries, Inc., according to government sources, have appropriated $44,000 a month for advertising.

The Olian Advertising Agency, St. Louis, will spend 60% in radio and 40% in newspapers. One hundred and fifty network shows will carry paper salvage messages for three weeks, October 18 to November 8. This is over and above their prior acceptances of allocated war copy.

It may be two weeks after the end of the network campaign before OWI releases any material to the full list of U. S. broadcast stations.

Let's Start Something Now

Because of the critical nature of this emergency, NAB War Committee suggests that stations, of their own volition, jump into the situation locally. Put on a real merchandising job. Work with the local salvage committee if there is one; alone if necessary. This is a real opportunity and one where leadership counts.

Prices Guaranteed

For your protection ceiling prices have been guaranteed by eastern and mid-western mills. Such mills have agreed to pay ceiling prices through February 15, 1944, for prepared and graded waste paper. This will prevent the bottom falling out of prices as occurred before.

What To Do With Paper

Paper may be disposed of in any one of the following ways: (1) sell to junk dealers; (2) donate to charitable organizations, which will pick up; (3) check through local salvage committee which may have other constructive ideas.

RADIO RECRUITS SEAMEN FOR U. S. MARITIME COMMISSION

D. Thomas Curtin, chief, radio section, division of public relations, United States Maritime Commission, reports that he is appreciative of the help received from radio stations.

On Oct. 26, Mr. Curtin supplemented his letter, appearing below, with a telephone call, that approximately 1,100 of the 2,126 men responding to the two MBS announcements (last paragraph), during the World Series, are already at work aboard ships.

Maritime Commission Letter

"From September 8 to 18, 1942, we put on a radio drive for the Recruitment and Manning Organization of the War Shipping Administration. This was a selective drive, aimed only at men with sea experience to return to the sea. Most of it was on the OWI network allocation plan.

"The success was so great that RMO again asked us to appeal through radio for aid in the spring of 1943. America's rapidly expanding volume of cargo ships made the manning problem a serious one. Although excellent training schools were being established, experienced personnel was the first need. Again we put on a radio campaign, from June 1 to August 22. During June the medium was OWI's special assignment plan. Then the medium shifted to the MEN AT SEA series presented by the National Broadcasting Company in cooperation with the United States Maritime Commission and the War Shipping Administration.

"We kept a check-up by using a special address for responses to these one-a-week June-August radio appeals. From them the Washington office alone received 1857 telegrams and 4753 letters.

"The figures given in this summary are significant in that the broadcasting appeals could be answered only by a limited group. Except tankers, the American Merchant Marine had faded sadly for many years; therefore the number of experienced men was relatively small.

"During September no radio plugs for seamen were used because of the Third War Loan Drive. Toward the end of the month, RMO informed us that in spite of their recruiting exhibits in several cities, the recruitment curve was falling rapidly.

"Was this due to the discontinuance of radio appeals, or had the dwindling supply of former seamen reached bottom?

"Two announcements by Gillette over Mutual on the World Series gave us the answer—448 telegrams and 1678 letters accepted the challenge to come back to the sea. This left no doubt in our minds of the power of radio to reach all the people and cause them to act."

Lambdin Kay Writes NAB

(Neville Miller received the following letter just recently from Lambdin Kay, formerly of WSB, Atlanta, and we print it as a matter of information to friends of Mr. Kay who might wish to know his present activities.)

"It looks like I have hired out to Mr. Morgenthau for the duration, and beyond, handling publicity in Georgia under his plan for a continuous, year-round War Bond selling effort.

"We have just closed our drive in which Atlanta, and Georgia, did themselves proud.

"I have never worked any harder, enjoyed it more, or saw greater opportunity for useful service.

"I simply want to say that in my opinion, broadcasting did an unprecedentedly conspicuous job of backing up the Third War Loan effort. Those all-day network ballyhoos sold more bonds than I dreamed was possible and our local and Georgia stations outdid themselves in practical, intelligent support.

"Hoping all is well with you and that you may be heading south before long.

"Lambdin Kay,
"Georgia Publicity Director,
"War Finance Committee."

AMERICAN EDUCATION WEEK

American Education Week, sponsored jointly by the National Education Association, the American Legion, U. S. Office of Education and National Congress of Parents and Teachers, will be observed November 7-13.

Principal effort of the week is to get parents to visit schools to see what their children are doing and to get acquainted with teachers. Other information may be obtained from the NEA, 1201 16th St., N. W., Washington 6, D. C.

SCHOOL BROADCAST CONFERENCE

Radio's role in the war-time classroom, and at home and abroad in education after the war, will be the considerations of the seventh annual School Broadcast Conference, which George Jennings announces will be held at the Morrison Hotel, Chicago, Nov. 28, 29, and 30.

Program plans now being formulated call for special network broadcasts originating from the Conference, outstanding speakers from educational and commercial broadcasting, and demonstrations of the use of radio in both elementary and high schools. Emphasis will be placed on radio in national and international affairs during and after the war.

As in the past four years, the Executive Committee will cite an individual for outstanding service in the field, and announcement of the award will be made at the annual conference banquet.

Entries are now being received at the headquarters of the School Broadcast Conference, 228 N. LaSalle St., Chicago 1, Ill., in the fourth annual Utilization Competition. There are no restrictions or entry fees connected with entering the competition, and application blanks are available from Conference headquarters.

NEW MICROPHONE ADOPTED BY ARMY

A midget microphone, worn on the upper lip, which eliminates outside noises and leaves the hands free, has been adopted for use by the Army Ground Forces and is now in production under the supervision of the Signal Corps, Army Service Forces.

Sustained in position by bands around the ears, the "lip mike" fits easily under gas masks and dust respirators and gives clear and intelligible reproduction with little distortion.

The microphone operates on a new noise-canceling principle and intensive tests under the supervision of the Armored Command have demonstrated that the instrument is capable of superior performance in high noise levels.

To increase clearness in reproduction the microphone is provided with breath shields in front and back, acting as buffers against puffs of air from the mouth which would otherwise cause confused or unintelligible sounds. Outside noises enter at both sides of the microphone's diaphragm in equal volume, and thus cancel themselves, while speech enters the opening nearest the mouth with much greater intensity than on the opposite sides. The frequency response is from 200 to 4000 cycles at normal altitude.

FEDERAL COMMUNICATIONS COMMISSION

NOTES FROM FLY'S NEWS CONFERENCE

Study of post-war frequency allocations will take a year to make, FCC Chairman James Lawrence Fly told a press-radio conference early this week. Commissioner T. A. M. Craven is representing the Commission in this study, cooperating with I. R. A. C., which is composed of representatives of all Government Departments interested in radio.

Chairman Fly, without going into any details, told the conference that the Commission has received a request to check up and complete action on newspaper-owned broadcast stations.

The Chairman said that he had understood that the Lea Committee was drawing up written charges which had been made during the course of the hearings before the Committee. Questioned about the Commission's answers, Fly said that he thought they would be made in writing, but he felt sure that the Committee would give the Commission a full and fair hearing in addition to the written answers.

FTC MAKES AD ANALYSIS

In connection with its regular continuing survey of radio and periodical advertising, the Federal Trade Commission recently made special analyses of advertisements dealing with war related subjects and reported to the Office of Censorship and the WPB.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 1st. They are subject to change.

Wednesday, November 3

Oral Argument Before the Commission

REPORT NO. B-189:

WGAR—The WGAR Broadcasting Company, Cleveland, Ohio.—C. P., **1220 kc.**, 5 KW, unlimited, DA-day and night.

WHBC—The Ohio Broadcasting Company, Canton, Ohio.—C. P., **1480 kc.**, 1 KW, unlimited, DA-night.

WADG—Allen T. Simmons, Akron, Ohio.—C. P., **1220 kc.**, 50 KW, unlimited, DA-day and night.

Wednesday, November 3

Further Consolidated Hearing

WFTL—Ralph A. Horton (Assignor), The Fort Industry Company (Assignee), Fort Lauderdale, Fla.—Voluntary assignment of C. P., and license of WFTL; and licenses of relay stations WAAD and WRET. **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA-night.

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—License to cover C. P. and authority to determine operating power by direct measurement. **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA-night.

WFTL—The Fort Industry Company, Fort Lauderdale, Fla.—Modification of license to move main studio from Fort Lauderdale, Florida. (Contingent upon granting of B3-APL-15.) **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA-night.

Thursday, November 4

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Modification of license. **1480 kc.**, 5 KW, unlimited, DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WTBO—Leon E. Pamphilon, Transferor, Aurelia S. Becker, Transferee, Associated Broadcasting Corp. (Licensee), Cumberland, Md.—Granted acquisition of control of Associated Broadcasting Corp., licensee of station WTBO, by Aurelia S. Becker, for a consideration of $10,484, representing 50 additional shares of capital stock (B1-TC-333).

KFMB—The First National Trust and Savings Bank of San Diego, Trustee under Declaration of Trust for Warren B. Worcester (Transferor), O. L. Taylor and Jack O. Gross (Transferees), Worcester Broadcasting Corp. (Licensee), San Diego, Calif.—Granted transfer of control of Worcester Broadcasting Corp., licensee of station KFMB, from The First National Trust and Savings Bank of San Diego, to O. L. Taylor and Jack O. Gross, for a consideration of $95,000 (B5-TC-331).

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Granted construction permit (B1-P-3542), to change frequency from **820** to **1450 kc.**, and hours of operation from limited to unlimited, subject to engineering condition.

WJBW—Charles C. Carlson, New Orleans, La.—Adopted order transferring hearing now scheduled to be held in Washington on November 8, to New Orleans, and authorized the Presiding Officer at said hearing to adjourn the same to such other points as he deems necessary for the expedition thereof and to serve the ends of justice.

Frontier Broadcasting Co., Cheyenne, Wyo.—Granted petition for reinstatement of two applications for construction permits for new relay broadcast stations (B5-PRY-283, and B5-PRE-430), and granted same.

WBKB—Balaban and Katz Corp., Chicago, Ill.—Granted modification of construction permit for changes in aural transmitting equipment and extension of completion date to date of grant of license application (B4-MPCT-16).

WBKB—Balaban and Katz Corp., Chicago, Ill.—Granted license (B4-LCT-16) to cover construction permit for new commercial television station, in part. Conditions.

DESIGNATED FOR HEARING

Charles Swaringen, Alex Teitlebaum, Myer Wiesenthal, Jack N. Berkman, Richard Teitlebaum, John J. Laux, Louis Berkman, Joseph M. Troesch, John L. Merdian, partners, d/b as Buckeye Broadcasting Co., Akron, Ohio.—Designated for hearing application for construction permit (B2-P-3539) for a new station to operate on **1240 kc.**, with 250 watts power.

WOCB—Harriet M. Allemon and Helen W. MacLellan, d/b as Cape Cod Broadcasting Co., West Yarmouth, Mass.—Designated for hearing application for renewal of license of station WOCB.

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Adopted order designating for hearing application for renewal of license of station WGKV, upon issues to be determined by the Commission.

LICENSE RENEWALS

WJW—WJW, Inc., Akron, Ohio.—Present temporary license extended until November 16, 1943, or such earlier date as WJW goes on program tests at Cleveland.

WMIS—Natchez Broadcasting Co., Natchez, Miss.—Adopted Order granting renewal of license for the regular period (Docket No. 6333).

WGRM—P. K. Ewing, Greenwood, Miss.—Adopted Order granting renewal of license for the regular period (Docket No. 6334).

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted petition for postponement of hearing now set for November 4, continuing same to December 6, in re application for modification of license (Docket 6522).

WOKO—WOKO, Inc., Albany, N. Y.—Granted petition for extension of time within which to file proposed findings now due November 9; extension granted to December 9, in re application for renewal of license (Docket 6486).

MISCELLANEOUS

KVEC—Valley Electric Company, San Luis Obispo, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1555).

KNOW—Frontier Broadcasting Co., Inc., Austin, Texas.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1554).

WMEJ—The Metropolis Co., area of Jacksonville, Fla.—Cancelled license for relay broadcast station in accordance with Administrative Order No. 2, as revised, pursuant to request by applicant (B3-RRY-249).

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—License to cover construction permit (B4-P-2827 as modified), which authorized change in hours of operation, installation of directional antenna for night use and move of transmitter.

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Authority to determine operating power by direct measurement of antenna power.

620 Kilocycles

WAGE—Sentinel Broadcasting Corp., Syracuse, N. Y.—Voluntary assignment of license from Sentinel Broadcasting Corp. to WAGE, Inc.

1240 Kilocycles

WSNY—Western Gateway Broadcasting Corp., Schenectady, N. Y.—Authority to make changes in automatic frequency control equipment.

1250 Kilocycles

KPAC—Port Arthur College, Port Arthur, Texas.—License to cover construction permit (B3-ML-956), which authorized increase in power and changes in directional antenna system.

KPAC—Port Arthur College, Port Arthur, Texas.—Authority to determine operating power by direct measurement of antenna power.

1400 Kilocycles

NEW—Truett Kimzey, Greenville, Texas.—Construction permit for a new standard broadcast station to be operated on **1400 kc.,** 250 watts power, unlimited time. Amended: re transmitter site and change in type of transmitter.

MISCELLANEOUS APPLICATIONS

NEW—Head of the Lakes Broadcasting Co., Superior, Wis.—Construction permit for a new high frequency broadcast (FM) station to be operated on **44500 kc.** with coverage of 2,754 square miles. Amended: to change coverage to 407 square miles and change type of antenna and equipment.

NEW—Matheson Radio Co., Inc., Boston, Mass.—Construction permit for a new high frequency broadcast (FM) station to be operated on **46100 kc.** with coverage of 3,600 square miles. Amended: to change requested frequency to **47700 kc.**

W2XWV—Allen B. DuMont Laboratories, Inc., New York, N. Y.—Construction permit to change from experimental to commercial operation and make changes in antenna system.

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—License to cover construction permit (B3-P-3535), which authorized change in transmitting equipment and increase in power.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Celcure Wood Preserving Corp.—A complaint has been issued charging Celcure Wood Preserving Corp., 1040 E. 8th St., Jacksonville, Fla., with misrepresentation in the sale of Celcure, a preparation designed to preserve wood against rot, termites, marine borers and other destructive agencies. The respondent corporation also sells lumber, treated with the preparation which is known as "Celcure Processed (Impregnated) Lumber," and it operates wood-treating plants at Columbia, S. C., Atlanta, Ga., and Miami and Jacksonville, Fla. (5067)

E. J. Goodier, trading as Universal Laboratories and as Goodier Company, 321 North Bishop St., Dallas, Texas, is charged in a complaint with disseminating false advertisements concerning some 60 medicinal and cosmetic preparations he sells in interstate commerce. The products are sold principally by house-to-house canvassers and are advertised by the respondent in catalogs, circulars and other advertising literature, distributed by the respondent's agents and canvassers to the purchasing public. (5069)

James Jebaily, Inc., 36 E. 31st St., New York, manufacturer of women's wearing apparel, is charged in a complaint with misrepresenting the fiber content of certain of its products, in violation of the Federal Trade Commission Act, and with misbranding others, in violation of the Wool Products Labeling Act. (5066)

National Assn. of Blouse Mfg., Inc., et al.—A complaint has been issued charging the National Association of Blouse Manufacturers, Inc., the Greater Blouse, Skirt & Neckwear Contractors Association, Inc., and the Blouse and Waist Makers Union, Local 25, all of New York City, with participating in a combination and conspiracy to restrain trade and promote a monopoly in the interstate sale of clothing such as blouses, blousettes, waists, gilets, vestees and tunic blouses. The complaint also is directed against the officers and members of the Manufacturers Association and the Union and against the officers of the Contractors Association. (5068)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

M. E. Lee, et al.—An order to cease and desist from misrepresentation of the therapeutic value of a mineral water designated "Merlek" has been issued against Michael E. Lee, Myron E. Lee and Kenneth L. Lee, trading as Lee-Sons and as Merlek, Alameda, Calif. (4868)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Ache-Knock Company, Honolulu, T. H., engaged in the sale of a preparation known as "Ache Knock Tablets," entered into a stipulation to discontinue representing that the product will relieve or cure rheumatism, sciatica, lumbago or neuritis; that it will cure or prevent the recurrence of headache or toothache; that it will relieve all pain or excessive acidity; and that it is safe and will produce no ill effects. (03159)

Wilbur Adams, 114 E. 32nd St., New York, stipulated that he will cease and desist from certain misrepresentations in connection with the sale of their Nostradamus Chart and Forecast and Tarot Card Chart. (03156)

Alba Bio-Products Co., 4620 No. Leamington Ave., Chicago, engaged in the sale of a preparation designated "Vita-Rex Capsules," stipulated that it will cease and desist from representing that the preparation possesses therapeutic value in the treatment of poor assimilation, constipation, indigestion, gaseous conditions of the stomach or intestines, functional weakness or nerve disorders; that it will enrich the blood, improve appetite, correct gastro-intestinal disorders, increase systemic resistance or produce better health; that it will protect individuals against colds, aches or a tired-out feeling and supply the body with ample nutritional substances, and that it possesses value as an iron preparation. (03158)

American Hardware Co., Inc., and its wholly owned subsidiary, Totty Trunk and Baggage Co., both of Petersburg, Va., have stipulated that, in connection with the sale of luggage, they will cease using as trade names, brands or labels, or in trade literature or advertising, the words "Tweeds," "Flextwood," "Tweedcraft" or "Cordurette" to describe products not composed of cloth or textile or corded fabric, or the words "Flexhyde," "Black Polar Shark Grain Flexhyde" or similar terms as descriptive of products which are not composed of leather or sharkskin, as the case may be. (3738)

By-Chemical Products Co., 750 Natoma St., San Francisco, engaged in the sale of a shoe dubbing preparation used principally as a leather preservative and water repellent, stipulated that in the sale of the product she will cease representing that it has been made in accordance with Army specifications or any other indicated specification or formula when actually it is not so compounded or prepared. (3737)

Farrand Chemical Co., Tyrone, Pa., has entered into a stipulation to discontinue certain misrepresentations in connection with the sale of formulas for compounding various cleansing, cosmetic, medicinal and other types of preparations; bulletins and pamphlets containing information as to where to buy and sell sundry products and services; and a cleansing preparation, insecticides, polishes and perfume. (03154)

Herb Juice-Penol Co., Inc., Danville, Va., has entered into a stipulation under which it agrees that, in connection with the dissemination of any advertisement of its medicinal preparation designated "Pow-O-Lin," it will reveal that the preparation should not be used in cases of abdominal pain or other symptoms of appendicitis, provided, however, that the advertisements need contain only the statement: "CAUTION, Use Only As Directed," if the directions for use on the labeling contain a warning to the same effect. (03153)

Ideal Optical Service, Inc., 802 F St., N. W., Washington, D. C., has stipulated that it will cease and desist from representing that it sells eyeglasses for "one price only," which covers everything; that the price is $7.50 and no more for either single or double vision glasses of any style; that the price of any spectacles complete is $7.50; or representing in any other manner, by assertion or implication, that no more than $7.50, or any other fictitious maximum price, will be charged for the complete sets of eyeglasses it offers for sale. (3739)

Jeri Yarn Company—A stipulation to cease and desist from misbranding knitting yarns sold in interstate commerce has been entered into by Herman Rosenberg, trading as Jeri Yarn Co., 345 Grand St., New York. (3740)

Wilson Industries, Inc., 545 West Lake St., Chicago, has entered into a stipulation to cease and desist from representing that its preparation called "Athygienic Foot Powder" or its device designated "Athygienic Foot Glove" is a remedy for corns or foot ailments generally. (03157)

Yoghurt Products, Inc., 108 Denny Way, Seattle, Wash., has entered into a stipulation to cease and desist from representing that the laxative preparation which it sells under the name "Yog-A-Lax" is a stomach or bowel corrective or non-habit forming. (03155)

FTC DISMISSES CASE

The Federal Trade Commission has dismissed its complaint against Continental Baking Co., New York, engaged in the manufacture and sale of bread and allied products. The company was charged with using unfair methods of competition and unfair and deceptive acts and practices in commerce in violation of the Federal Trade Commission Act, and with discriminating in price between different purchasers of its products of like grade and quality, in violation of section 2 (a) of the Robinson-Patman Act.

In this proceeding hearings were held before a trial examiner of the Commission, and witnesses subpoenaed by the Commission and by the respondent were heard. Counsel for the respondent filed briefs and appeared before the Commission and argued the case orally.

After consideration of the record the Commission entered an order of dismissal upon the ground that the allegations of the complaint were not sustained by the evidence.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 45, November 5, 1943

PETRILLO HEARING CONTINUES

The National War Labor Board's Petrillo panel resumed its hearings Wednesday in New York on the merits of the recording dispute.

The only remaining party strictly speaking, is NBC Thesaurus, although the panel has before it petitions for intervention by RCA Victor and Columbia Recording.

The panel has submitted to the WLB an intermediate report on the settlement between the A. F. of M. and the other transcription companies, as well as the Decca Record settlement. To date, the WLB has taken no action on the intermediate report.

LEA OUTLINES FCC INVESTIGATION PLANS

The House Committee investigating the Federal Communications Commission will be "thorough, fair and without playing favorites," Representative Lea, of California, chairman of this special committee, said over Station WWDC, Washington, D. C., on Wednesday night in a short broadcast.

Mr. Lea spoke briefly of the Radio Act and of the creation of the FCC and its duties. He said that 3,000 pages of testimony were taken by the special committee under the chairmanship of Mr. Cox but that "there is a lot yet to be done."

Chairman Lea said that one of the first things he asked to be done when he became chairman was to have the testimony already taken analysed and that citations be made on charges against the commission. The Commission, he said, will be given an opportunity to answer these charges and make its own citations.

EDGAR BILL ASKS STATION MANAGERS TO TAKE PUBLIC RELATIONS RESPONSIBILITY

(Released by NAB News Bureau Nov. 2.)

Station managers are being asked to recognize their responsibility in the conduct of public relations by "signing up" with the Public Relations Committee of NAB, Edgar Bill, Chairman, announced today.

A printed pamphlet entitled: "There Is an Indispensable Man!" has been mailed to the personal attention of each station manager. The return card requests the signature of the manager as the party primarily responsible for the conduct of public relations at his station. This, the pamphlet points out, is not only a pledge but provides a personal contact for the NAB Public Relations Committee and District Public Relations chairmen, seventeen in number.

"We know," said Bill, "that some stations have full time directors of public relations, but they are not many. These men are doing a fine job and are perhaps several years ahead of the industry. We are already working with them and will expect their names to come back to us on the return cards. The great majority of stations, however, do not have such people on a full time basis and cannot be asked to provide them in these times. That's where the manager comes in; because he has been actually responsible for public relations, delegating authority to various members of the staff, as required."

The pamphlet asks station managers to acknowledge their responsibility for the following basic reasons: (1) Because he controls station policy, (2) Because he can commit the station to cooperation in public projects, (3) Because he can direct the expenditure of funds for staff memberships in civic and social clubs and other organizations, (4) Because he can delegate responsibility, (5) Because he is a "public symbol" of the station itself, (6) Because he is permanent.

"Many public relations projects are in the mill for local action," Bill concluded, "awaiting the returns from station managers throughout the industry."

Engineering

NAB COMMITTEE CONSIDERS TECHNICAL PLANS

The NAB Executive Engineering Committee met in New York City on Friday, October 29. Those present were

(Continued on page 452)

ERRATA

An unfortunate typographical error appears in Special Legislative Bulletin No. 20 of October 29, 1943. The error gives an entirely erroneous meaning to the position of the NAB Board on paid government advertising. As it appeared in Bulletin No. 20 it read:

> "Now, Therefore, Be It Resolved that the Board of Directors of the National Association of Broadcasters, reaffirms its former actions but does *not* take the position that if Congress contemplates such legislation every effort should be made to see that there be no discrimination as between the press and radio or any other media of communications, and * * *"

The italicized word "not" should have been "now". It will be seen that with this change, the resolution has an entirely different import.

NAB COMMITTEE CONSIDERS TECHNICAL PLANS

(Continued from page 451)

John V. L. Hogan, Chairman, WQXR; William B. Lodge, CBS, representing E. K. Cohan; F. M. Doolittle, WDRC; O. B. Hanson, NBC; Arthur C. Stringer and H. S. Frazier. G. Porter Houston, WCBM, was unable to be present but telegraphed his comments on the various agenda items.

The meeting convened at 1:00 P.M. with a full agenda and adjourned after 5:00. The discussion included the following items—Selective Service and Probable Effect on Technical Operating and Supervisory Personnel, NAB Training Course for Women, NAB Technician Pool, Home Receiver Service Conditions, Scope and Functions of District Engineering Committee and Post War Planning.

Arthur C. Stringer, NAB Promotion Director, reported on the present situation concerning the availability of tubes and batteries for civilian home receivers. The news about batteries was good. Stringer reported that one large manufacturer would increase his production of farm battery packs by fifty thousand units during the fourth quarter. Another manufacturer, previously a minor factor in the production of farm batteries, has been persuaded to substantially increase his production of batteries for farm radios. He also reported that during the third quarter more than one million farm packs reached dealers in this country.

Most of the Committee's time was devoted to post war planning problems. O. B. Hanson and H. S. Frazier reported to the Committee on the organization and present status of the Radio Technical Planning Board. NAB is a contributing sponsor of the Radio Technical Planning Board and is represented on the Administrative Committee of the Board by H. S. Frazier, Director of Engineering. Frazier will also be the chairman of Panel Number 4 on Standard Broadcasting of RTPB. The Committee recommended that NAB should be represented on the following RTPB panels:

1. Panel on Spectrum Utilization
2. Panel on Frequency Allocation
4. Panel on Standard Broadcasting
5. Panel on VHF Broadcasting
6. Panel on Television
7. Panel on Facsimile
9. Panel on Relay System

It was further recommended that NAB, while not participating actively, should review the work and recommendations of the following panels:

3. Panel on High Frequency Generation
8. Panel on Radio Communications
10. Panel on Radio Range, Direction and Recognition
11. Panel on Aeronautical Radio
12. Panel on Industrial, Scientific and Medical Equipment
13. Panel on Police and Emergency Service

It was the Committee's opinion that Panel 4 of RTPB should consider the long range technical objectives of the standard broadcaster and the possibilities for improvement of interference and coverage conditions that may be possible through engineering development. It was also proposed that the Standard Broadcast Panel, through subcommittees, review the standards for broadcast receivers with the objective of securing improvement in audio fidelity, selectivity, and nonradiating receivers. All members of the Executive Engineering Committee will be appointed to various panels of RTPB for which they are best qualified.

John V. L. Hogan has been appointed by RTPB Chairman Dr. W. R. G. Baker to the chairmanship of Panel No. 7, Facsimile. Mr. Hogan has been prominently identified with facsimile development for many years. H. S. Frazier, NAB Director of Engineering, was authorized to proceed with the organization of the Panel on Standard Broadcasting with further recommendations to be secured from the members of the Committee as the organization progresses.

No date was fixed for the next meeting of the Committee, but it is believed that the rapid progress of the Radio Technical Planning Board will require another meeting in the near future.

CONFERENCE ON TECHNICAL FUTURE OF RADIO SET

The Federal Communications Commission has called a conference in Washington, beginning November 17, between government agencies and the industry to discuss the technical future of radio, Chairman James Lawrence Fly announced at a special news conference on Thursday.

Those who will take active part in this conference, which will consist of thirty or forty people, will be members of the FCC, the Board of War Communication, IRAC, (Government Interdepartmental Committee on radio frequency allocations) and the Radio Technical Planning Board. The Chairman explained that the discussions will be of post war frequency allocation, and he called attention to the fact that the responsibility for these allocations rests with the FCC for the general public, and with IRAC for government departments.

Mr. Fly spoke of the various developments in radio which will open up higher frequencies, and he called special attention to the fact that the present broadcast band is a small part of the frequency band which has a range, he said, from ten to thirty million kilocycles. He predicted international television service after the war, but he does not expect this service to begin in the near future. In order to put such a service into action and to take care of the hundreds of new uses which will come through further radio developments, it will be necessary to open up many new frequencies.

In further discussing the forthcoming conference, he said there would be complete cooperation between the government agencies and the industry, and he expected it to be in the nature of a get-together meeting to discuss organization, procedure and exploratory matters.

FIRE INSURANCE

Many stations are carrying "loss of use" insurance coverage on fire, tornado, and other hazards to plant and equipment. Under peace time conditions, the destruction of essential equipment, such as transmitters, monitors, speech input equipment and microphones, ordinarily did not make the stations inoperative over a long period. Generally speaking, replacement items were then readily available. For this reason "loss of use" insurance coverage, covering a period of ten to thirty days, was normally adequate.

However, at the present time most capital equipment replacement items are almost unobtainable. Even with assistance from WPB the replacement cycle may be measured in months instead of days. This matter is brought to the attention of broadcasters so that they may review existing insurance coverage, particularly "loss of use" indemnity, in order that steps may be taken to increase the amount of such coverage when this seems desirable.

AMATEUR LIMITATION AMENDED

In order to permit radio amateur operators under direction of the War Emergency Radio Service of the OCD to make or transfer radio sets and electronic equipment for civilian defense emergencies, Limitation Order L-265 has been amended by the WPB.

The amendment provides that restrictions of the order shall not apply "to gratuitous transfers of electronic equipment to or for the account of the War Emergency Radio Service by any person; and to the manufacture or transfer of electronic equipment for the account of the War Emergency Radio Service by any individual who is not a commercial producer or supplier of electronic equipment."

PEABODY AWARDS ENTRY BLANKS MAILED OUT

Official entry forms for the 1943 George Foster Peabody Radio Awards have been mailed to the some 900 broadcasting stations in this country from Athens, Ga.

At the same time, report blanks are being sent to the chairmen of the listening-post committees which have been set up in approximately 23 universities and in approximately 118 cities in more than 40 states.

December 10 is the closing date for this year's entries. In addition to awards for news, drama, music, education, and children's programs, there will be two awards for meritorious public service by large and small stations. Large stations will include clear channel broadcasters and all of those having power of 1,000 watts or above. Small stations will include broadcasters of less than 1,000 watts.

Any radio station or network is eligible to receive the award for news reporting, drama, music, children's programs, or education. Only local and regional stations are eligible to receive the community welfare programs.

Entries may be submitted by individual stations, networks, radio editors of newspapers and magazines, listener groups, or any person or organization wishing to direct the attention of the Peabody Board to a special program or programs. The Board in its selections will not necessarily be restricted to entries, but will consider the reports of its own listening-post committees, and may on its own initiative select a program or a station for an award. The Board also reserves the right to make more or less than seven awards, depending upon the entries and the circumstances at the time of the awards.

FEDERAL TRADE COMMISSION SAMPLING REQUESTS CLARIFIED

The following statement was obtained from P. B. Morehouse, director of Radio and Periodical Division, Federal Trade Commission, with respect to requests for sampling of commercial continuities:

(See NAB "REPORTS" of May 7, 1943, p. 203)

"The Radio and Periodical Division of the FTC is in receipt of frequent letters and telegrams from individual station broadcasters making urgent request for information about current or forthcoming calls for their respective samplings of commercial continuities.

To relieve them of concern through lack of knowledge of coverage procedure, they should be advised that July 6, 1943 the Commission adopted a policy for the duration of procuring copies of commercial radio continuities from individual station broadcasters at the reduced rate of twice yearly per station, commencing July 1, 1943.

Pursuant thereto, the usual fifteen-day sampling of commercial script is desired only in response to specific requests which will be issued by the Commission on a staggered basis as to groups of broadcasters, scheduled in a manner that will assure complete coverage of all such stations twice during the fiscal year.

Due to the reduction in its rate of coverage, the Radio and Periodical Division has had to adopt a new schedule, substantially different from the former coverage which was at the rate of four times yearly. Consequently, the fifteen-day sampling periods which may be specified in the current and forthcoming requests for script will seldom fall within the same calendar period with respect to the same station, as may have occurred on occasions in previous years. Selections of stations have been realigned for reporting purposes with consideration given to transmittal power, geographic location, population centers, etc., in arranging the staggered groups.

The continued cooperative responses of broadcasters generally in submitting commercial script is appreciated."

NATION NEEDS ALL WASTE PAPER

This nation needs waste paper in tremendous quantities. Mills have already shut down because they do not have a sufficient supply.

Waste paper is ammunition. Give your listeners the story. Take the lead. You can't get too much paper.

It may happen, that listeners with paper to give do not know how to dispose of it. Chief avenues are 1) junk dealers and 2) charitable organizations.

Will Pick Up Paper

Consistent with local gas and tire regulations, both agencies will pick up waste paper. In many locations, stops will be made for as little as 100 pounds of paper; perhaps more will be required where tires and gas are short. But there is absolutely no reason for dealers refusing to pick up paper in less than 1,000 pound lots. Yet such a case was reported this week in a large Georgia city.

Notify State Secretary and NAB

Should other stations encounter a similar situation they should immediately report the fact to their State Executive Secretary for Salvage (see list below), and send a carbon of the reporting letter to NAB.

NAB will consult with WPB here. This will have a constructive effect on the national field force.

OWI is cooperating with the WPB in the waste paper collection program. William Spire, deputy radio chief, stated Thursday that initial inertia had been overcome. From now on it is anticipated that radio will roll up an impressive amount of waste paper.

List of State Executive Secretaries for Salvage

B. G. Waters, Jr., Executive Secretary
Massachusetts State Salvage Committee
17 Court Street, Boston (8), Mass.

Bice Clemow, Executive Secretary
Connecticut State Salvage Committee
119 Ann Street, Hartford, Conn.

Clifford Somerville, Executive Secretary
Maine State Salvage Committee
142 High Street, Portland, Me.

E. J. Soucy, Executive Secretary
New Hampshire State Salvage Committee
State House, Concord, N. H.

Lawrence Lanpher, Executive Secretary
Rhode Island State Salvage Committee
530 Industrial Trust Building, Providence, R. I.

John O. Baxendale, Executive Secretary
Vermont State Salvage Committee
120 State Street, Montpelier, Vt.
Paul W. Zeckhausen, Executive Secretary
New York City Salvage Committee
45th Floor, Empire State Bldg., New York (1), N. Y.
William Arnoldy, Executive Secretary
New York Salvage Committee
112 State Street, Albany (7), N. Y.
Joseph F. Devane, Executive Secretary
New Jersey State Salvage Committee
20 Washington Place, Newark (2), N. J.
Colley S. Baker, Executive Secretary
Pennsylvania State Salvage Committee
State Museum Building, Harrisburg, Penn.
Lt. Col. R. G. Rust, Executive Secretary
Delaware State Salvage Committee
G-7 Nemours Building, Wilmington, Del.
James F. Solley, Jr., Executive Secretary
Maryland State Salvage Committee
1025 Baltimore Trust Bldg., Baltimore (2), Md.
Carl H. Luebbert, Executive Secretary
Virginia State Salvage Committee
701 E. Franklin Street, Richmond, Va.
Horace Walker, Executive Secretary
District of Columbia Salvage Committee
1100 H Street, N. W., Washington (1), D. C.
Thomas H. Hall III, Executive Secretary
Georgia State Salvage Committee
1427 Candler Building, Atlanta (1), Ga.
J. Leon Gilbert, Executive Secretary
Alabama State Salvage Committee
612-13 Shepard Building, Montgomery, Ala.
C. G. Campbell, Executive Secretary
Florida State Salvage Committee
314 West Monroe Street, Jacksonville, Fla.
J. K. McDowall, Executive Secretary
Mississippi State Salvage Committee
Tower Building, Jackson, Miss.
James B. Vogler, Executive Secretary
North Carolina State Salvage Committee
803 Capitol Club Building, Raleigh, N. C.
Lewis A. Emerson, Executive Secretary
South Carolina State Salvage Committee
Waters Bldg., Sumter and Senate Sts., Columbia (56), S. C.
Everett R. Jones, Executive Secretary
Tennessee State Salvage Committee
314 Stahlman Building, Nashville, Tenn.
Robert O. Weible/Ralph H. Stone, Executive Secretary
Ohio State Salvage Committee
101 North High Street, Columbus (15), Ohio
John J. Rice, Executive Secretary
Kentucky State Salvage Committee
Old State Capitol Building, Frankfort, Ky.
Burman T. Mitchell, Executive Secretary
West Virginia State Salvage Committee
1814 Washington Street, Charleston (30), W. Va.
Thomas J. McHugh, Executive Secretary
Illinois State Salvage Committee
226 West Jackson Boulevard, Chicago, Ill.
F. G. Thompson, Executive Secretary
Indiana State Salvage Committee
308 Board of Trade Bldg., Indianapolis, Ind.
Herbert C. Plagman, Executive Secretary
Iowa State Salvage Committee
327 Liberty Building, Des Moines, Ia.
Charles F. Kuepper, Executive Secretary
Wisconsin State Salvage Committee
7038 Plankinton Building, Milwaukee (1), Wis.
Harold A. Trowbridge, Executive Secretary
Missouri State Salvage Committee
State Office Building, Jefferson City, Mo.
Wallace Cowan, Executive Secretary
Arkansas State Salvage Committee
318 Pyramid Building, Little Rock, Ark.
Harry W. Woods, Executive Secretary
Kansas State Salvage Committee
509 National Reserve Bldg., Topeka, Kansas
Fred S. Larkin, Jr., Executive Secretary
Nebraska State Salvage Committee
915 City National Bank Bldg., Omaha (2), Neb.
A. S. Patrick Flood, Executive Secretary
Texas State Salvage Committee
701 Scarbrough Building, Austin (22), Texas
Basil B. Cobb, Executive Secretary
Louisiana State Salvage Committee
216 Triad Building, Baton Rouge (6), La.
H. L. Eddy, Executive Secretary
Oklahoma State Salvage Committee
411 Key Building, Oklahoma City, Okla.
T. R. Ellis, Executive Secretary
Colorado State Salvage Committee
535 Continental Oil Building, Denver (2), Colo.
Edward J. Kelley, Executive Secretary
Montana State Salvage Committee
212 Power Block, Helena, Mont.
W. B. McCollum, Executive Secretary
New Mexico State Salvage Committee
103½ W. Central Avenue, Albuquerque, N. M.
B. L. Wood, Executive Secretary
Utah State Salvage Committee

ATS AND N. Y. AD CLUB TO HOLD JOINT TELEVISION MEETING

American Television Society and the Advertising Club of New York will hold a joint dinner meeting in New York City next Wednesday evening, Nov. 10, in order to achieve the objective described in the following statement:

"Appreciating the fact that, in the American system of broadcasting, commercial sponsorship is a basic factor, adequate preparation should be made to supply advertising agencies, sponsors and other users of television, with such information as may be helpful in enabling them to form plans for the utilization of television as an advertising medium.

"There should be a central clearing house through which all knowledge and experience in television programming and technique can be exchanged, and whose business it will be to stimulate interest in television on the part of those we believe will be instrumental in its future economic structure."

NAB will be represented at this meeting. Speakers include: Allen B. Dumont, Allen B. DuMont Labs.; Thomas Joyce, Radio Corporation of America; Robert L. Gibson, General Electric Co.; Thomas Hutchinson, Ruthrauff & Ryan; and John Southwell, Batten, Barton, Durnstine & Osborn.

DEDICATE MOODY BIBLE'S FM STATION

WDLC, FM station of Moody Bible Institute, Chicago, was dedicated November 1. It is now operating with 1,000 watts but will go to 50,000 watts after the war. The station is one of five FM stations in the Chicago area.

Wendell P. Loveless, program director, WMBI and WDLM, and Robert Parsons, assistant program director, directed the dedicatory program. Dr. Will H. Houghton, president, Moody Bible Institute; Dr. William Culbertson, dean; and H. Coleman Crowell, vice-president and radio station manager, participated prominently in the program.

FRIED TELLS BUSINESS MEN ABOUT RADIO

Adriel Fried, general manager, KLX, Oakland, was the principal speaker at the monthly luncheon meeting of the Emeryville Industries Association, Oct. 26, at the Claremont Hotel, Berkeley.

His subject was "The Broadcasting Industry in War Time,"—a timely discussion of radio censorship, the Petrillo ban, radar, television, and short wave.

SALVAGE OKAY IN ASHEVILLE

Lee Chadwick, program director, WWNC, Asheville, N. C., reports that three carloads of tin cans have already been shipped and two more are about ready for shipment. Despite this substantial collection, an additional drive is to be undertaken within a short time in and around Asheville.

Regarding fats, Mr. Chadwick said that butcher shops are cooperating satisfactorily.

NEW SONGS FOR SCHOOLS AT WAR AVAILABLE

The Treasury Department has just published a sixteen page book of New Songs for Schools at War, in cooperation with the Music Educators National Conference, for use by music teachers and supervisors in elementary schools.

Thirty thonsand members of the association will soon receive the song book but it is available to others in the education field. Copies will be sent to radio stations upon request. Address Education Division, War Finance Division, Treasury Department, Washington 25, D. C.

RADIO TODAY IS VITAL TO VICTORY

"Radio today is vital to victory," asserts John C. McCormack, general manager of KWKH-KTBS, in a letter accompanying a large folder depicting radio's role in the war.

Since Pearl Harbor, these two stations have donated toward the war more than $280,000 in radio time alone, the folder points out. Illustrations show the many fields of war in which radio is playing an important part.

The folder's center section is a reprint of a double page spread in the Shreveport *Times*.

KFI IN SPECIAL SALUTE TO MEXICAN GOVERNMENT

In a special broadcast from the Biltmore Hotel on Wednesday, October 27, KFI's Noon Farm Reporter saluted the Government of Mexico and the Mexican National Harvesters who are aiding in California's wartime agricultural program, with high governmental officials from south of the border participating.

Nelson McInnich, the Noon Farm Reporter, was in charge of all the arrangements and emceed the program.

W. B. Ryan, KFI General Manager made the opening address and welcomed Colonel Vicente Peralta, Consul General of Mexico; Senor Manuel Aguilar, Mexican Consul, and several others prominent in the National Harvesters movement.

By special arrangement, Governor Earl Warren of California spoke on the broadcast by transcription. A luncheon was held following the program.

The Noon Farm Reporter is a public service feature of Clear Channel station KFI and is heard at high noon Monday through Saturday.

Transcriptions of the program were made for shipment to Mexico, where re-broadcasts will be arranged by Mexican radio stations.

IOWA GOVERNOR SPRINGS SURPRISE ON WHO

Without previous warning, Bourke B. Hickenlooper, governor of Iowa, used his regular broadcast time over WHO to swear in the new state treasurer, John Grimes, newspaper publisher of Osceola, for the remainder of the term of Willis G. C. Bagley, deceased.

Woody Woods, war program manager of WHO, hastily reconstructed the scene of the ceremony for a photograph which made the news deadline.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, November 8th. It is subject to change.

Monday, November 8

To Be Held in Court Room 223, Post Office Building,
600 Camp Street, New Orleans, Louisiana

WJBW—Charles C. Carlson, New Orleans, Louisiana.—Renewal of license, **1230 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KROY—Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney, Will Thompson, Jr., a partnership, d/b as Royal Miller Radio (assignors); Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney, d/b as Royal Miller

Radio (assignees); Sacramento, Calif.—Granted consent to voluntary assignment of license from Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney, Will Thompson, Jr., a partnership, doing business as Royal Miller Radio, licensee of Station KROY, to Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney, doing business as Royal Miller Radio. The transaction involves the purchase of the five percent interest of Will Thompson, Jr., by Marion Miller (2½%) and Gladys W. Penney (2½%), for a total consideration of $2,854 (B5-AL-383).

KVGB—Helen Townsley (assignor), KVGB, Inc. (assignee), Great Bend, Kans.—Granted consent to assignment of license of Station KVGB from Helen Townsley, an individual, to KVGB, Inc. No cash consideration is involved (B4-AL-357).

KGY—KGY, Inc., Olympia, Wash.—Granted construction permit to increase power from 100 to 250 watts and make changes in transmitting equipment (B5-P-3548).

W49D—John Lord Booth, Detroit, Mich.—Granted modification of construction permit, as modified, for extension of completion date (B2-MPH-115); granted license to cover construction permit, in part, subject to the condition that licensee shall, when required materials and personnel become available, take immediate steps to comply fully with the Rules, Regulations and Standards of the Commission (B2-LH-42).

DESIGNATED FOR HEARING

KGGF—Hugh J. Powell, Coffeyville, Kans.—Designated for hearing application for renewal of license of Station KGGF; hearing to be consolidated with hearing on applications of KOMA, Oklahoma City, Okla., for construction permit to change frequency from **1520** to **690 kc.**, increase power from 5 to 10 KW, install new transmitter and directional antenna for day and night use, and of KGGF for construction permit to increase night power on **690 kc.** from 500 watts to 1 KW, install directional antenna for day and night use, and new transmitter and change transmitter location (B4-R-710).

LICENSE RENEWALS

WBLK—Charleston Broadcasting Co., Clarksburg, W. Va.—Granted renewal of license for regular period (B2-R-923).

WPAR—Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—Granted renewal of license for regular period (B2-R-858).

KVGB—Helen Townsley, Great Bend, Kans.—Granted renewal of license for regular period (B4-R-920).

W47R—WHEC, Inc., Rochester, N. Y.—Granted license to cover construction permit for new high frequency (FM) broadcast station, subject to the condition that licensee take immediate steps to comply fully with the Rules, Regulations and Standards of the Commission when materials and personnel become available (B1-LH-43).

MISCELLANEOUS

WSAY—Brown Radio Service & Lab. (Gordon P. Brown, owner), Rochester, N. Y.—Granted modification of construction permit as modified, which authorized change in frequency, increase in power, installation of directional antenna for day and night use and new transmitter, and move of transmitter, for extension of completion date from November 1, 1943, to February 1, 1944 (B1-MP-1726).

WFAM, Inc., Mobile, area of Lafayette, Ind.—Granted construction permit for new relay broadcast station; frequencies **30820, 33740, 35820, 37980 kc.**, 15 watts (B4-PRE-437).

The Commission granted the petition of August G. Hiebert, licensee of Class I experimental facsimile Station K7XSB, Fairbanks, Alaska, for authority to operate that station as a relay broadcast station until January 1, 1944, for transmitting special programs for broadcast by a domestic radio network and for test purposes in connection therewith. This temporary authorization is granted subject to conditions re censorship, non-interference, and that no charge shall be made for the transmissions. Frequencies are **12862.5** and **17310 kc.**, A3 emission.

APPLICATIONS FILED AT FCC

560 Kilocycles

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Modification of construction permit (B5-P-3150 as modified, which authorized change of frequency, increase in power, installation of new transmitter and directional antenna) for extension of completion date from 12-1-43 to 2-1-44.

570 Kilocycles

WMCA—WMCA, Inc., New York, N. Y.—Voluntary assignment of license from WMCA, Inc., to Cosmopolitan Broadcasting Corporation.

770 Kilocycles

WCAL—St. Olaf College, Northfield, Minn.—Authority to determine operating power by direct measurement of antenna power.

1270 Kilocycles

WSPR—WSPR, Inc., Springfield, Mass.—Construction permit to increase power from 500 watts to 1 KW, employing directional antenna day and night, and make changes in transmitting equipment.

1340 Kilocycles

WTAL—Capital City Broadcasting Corp., Tallahassee, Fla.—Authority to determine operating power by direct measurement of antenna power.

1400 Kilocycles

KLUF—The KLUF Broadcasting Co., Inc., Galveston, Texas.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATIONS

NEW—Durham Radio Corp., Durham, N. C.—Construction permit for a new high frequency (FM) broadcast station.

NEW—North Jersey Broadcasting Co., Inc., Paterson, N. J.—Construction permit for a new high frequency (FM) broadcast station to be operated on **49900 kc.**, with coverage of 4,928 square miles.

TELEVISION APPLICATION

NEW—Don Lee Broadcasting System, San Francisco, Calif.—Construction permit for a new commercial television broadcast station to be operated on frequency of **50000-56000 kc.**

MISCELLANEOUS APPLICATION

NEW—Karl L. Ashbacker and Grant F. Ashbacker, d/b as Ludington Broadcasting Co., Ludington, Mich.—Construction permit for a new standard broadcast station to be operated on **1490 kc.**, 250 watts power, unlimited hours of operation. Amended: to change frequency to **1450 kc.**

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Dietaids Co., Inc.—A complaint has been issued charging American Dietaids Co., Inc., 176 South Broadway, Yonkers, New York, and its officers, Joseph G. Spitzer and

Marvin Small, with disseminating false advertisements concerning the therapeutic, nutritional or other properties of certain preparations advertised and sold under the names Enrich, Stamina, Souplets, Ritamine, Joyana, Sorbex, Vitalets, Nyce Special Soap, Nyce Cream, and Tam. (5070)

Brooks Appliance Co., Marshall, Mich., and its officers Harold C. Brooks and Louis E. Brooks, are charged in a complaint with disseminating false advertisements in connection with the sale of a truss designated as Brooks Rupture Appliance and as Brooks Automatic Air Cushion, and a device called Natural Uterine Supporter intended for use by women. The company maintains branch offices at 500 Fifth Ave., New York, and 5 North Wabash Ave., Chicago. (5072)

Tea Bureau, Inc., 500 Fifth Ave., New York, is charged in a complaint with disseminating false advertisements in connection with its business of increasing the consumption of tea in the United States. The complaint also is directed against William Esty & Co., Inc., New York City, advertising agency which participated in the preparation and dissemination of the advertisements in question. (5071)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Beacon Milling Co., Inc., Cayuga, N. Y., selling dry dog food preparations designated "Beacon Dog Pellets" and "Beacon Dog & Puppy Meal," referred to generally in its advertising as Beacon Dog Foods, has stipulated to cease and desist, in its advertising from using the unqualified terms "meat" or "beef" and representing, directly or by implication, that its preparations contain meat or beef. (03161)

Buxton Medicine Co., Abbot Village, Maine, selling a medicinal preparation designated "Buxton's A Special Compound," has stipulated to cease representing that the preparation has been approved by a Federal agency; that it is a remedy or cure for sciatica, arthritis, neuritis or rheumatism, or for diseased liver, stomach or kidneys; eliminates uric acid from the system; is a treatment for indigestion or stomach trouble; is a blood purifier; or that it overcomes acidity, strengthens the heart or normalizes the kidneys or bladder. (03160)

Gardner Nursery Company, Osage, Iowa, and Clark E. Gardner, Robert E. Gardner and G. B. Gardner, individually and as officers of the company, engaged in the sale of nursery products, have stipulated to cease and desist from representing that 50 cents or any other specified amount of money is the maximum assessment made to cover shipping or delivery expenses when charges over and above such specified amount of money are assessed before delivery of the advertised article. (03162)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Thomas E. Collins Co., 5036 Geary Boulevard, San Francisco, selling and distributing a medicinal preparation designated "Ailmentone" has been ordered to cease and desist from misrepresentations of his product. (4816)

Louis Ulrich, trading as J-Bee Distributing Company, and Julius Weinfelt, both of 37 West 20th St., New York, engaged in the sale and distribution of novelty merchandise, have been ordered to cease and desist from the use of lottery methods in the sale and distribution of their products. (4500)

World's Medicine Company, whose mailing addresses are post office boxes in Columbus, Ohio, and Indianapolis, has been ordered to cease and desist from misrepresentation in the sale of a medicinal preparation designated "World's Tonic." (4817)

WHITE-WHEELER HEARINGS

A full report of the White-Wheeler hearings is contained in a separate Legislative Bulletin, enclosed with this REPORT.

LEA TO ASK ADDITIONAL APPROPRIATIONS

Following a recent executive session of the Special House Committee investigating the FCC, Representative Lea of California, Chairman, announced that his committee would ask the House for an additional $75,000 to carry on this investigation. Those who have been in close touch with the situation feel that the House will allow this or some other amount. It will be recalled that orginally the House made an appropriation of $60,000 for this purpose.

Mr. Lea said also that his committee had not yet decided whether it will continue to retain Eugene L. Garey, the special investigator, who began work when Representative Cox of Georgia was chairman.

Chairman Lea has announced that hearings will be resumed at 2:30 p. m. Monday, November 15.

The session will be devoted to a continuation of the New York hearings with respect to Short Wave Research, Inc.

COMMISSION PLEDGES COOPERATION

Chairman James Lawrence Fly of the Federal Communications Commission, speaking during the News Conference held in Washington on November 4, pledged the Commission's cooperation with industry in the solving of technical planning problems. Said Chairman Fly:

"The radio spectrum can not be indefinitely and permanently divided up. So at any time there is a problem of reassignment of the various available frequencies it is very essential that we make a cooperative approach. There will be complete cooperation with the industry as the industry is represented by the Radio Technical Planning Board. But of course the *ultimate assignments* and the *responsibility* for those assignments must be carried out by the IRAC working under the Board of War Communications in the one field, and by the Commission in the other. I think we have in the making here a successful cooperative undertaking and the only purpose of the suggested conference (joint meeting of FCC, BWC, IRAC and RTPB on Nov. 17th) is that the groups get together and get organized and get their bearings and their directions and dig in for some hard and useful and significant work."

RTPB Panel Organization

Rapid organization of RTPB, including thirteen technical panels, has been effected. Mr. L. G. F. Horle of New York, manager of the RMA Data Bureau, has been chosen as "Coordinator" of the panel organization and work. W. B. Cowilich, assistant secretary of IRE, has been named secretary of RTPB, and Bond Geddes, executive vice president of RMA, is the RTPB treasurer.

Following are the RTPB panels which have been organized and their respective chairmen and vice chairmen:

Panel #1 on Spectrum Utilization

Scope—The analytical study of the factors pertinent to the most effective use of the transmission medium.

Dr. A. N. Goldsmith, Chairman 580 Fifth Avenue New York, N. Y.	Dr. R. H. Manson, Vice Chairman Stromberg-Carlson Mfg. Co. Rochester, N. Y.

Panel #2 on Frequency Allocation

Scope—The allocation of frequency bands to services on basis of propagation and equipment characteristics with due respect to military requirements, public interest, and past practices.

Dr. C. B. Jolliffe, Chairman RCA-Victor Division Camden, N. J.	Mr. F. M. Ryan, Vice Chairman American Telephone & Telegraph Co. 195 Broadway New York, N. Y.

Panel #3 on High Frequency Generation

Scope—The present status and probable progress in the development of electronic tubes and the necessary associated equipment for increasing frequency of generation and operation.

Mr. R. M. Wise, Chairman Sylvania Electric Products, Inc. 500 Fifth Ave. New York, N. Y.	Mr. H. F. Argento, Vice Chairman Raytheon Production Company Waltham, Mass.

Panel #4 on Standard Broadcasting

Scope—The review and further development of standards with reference to broadcasting on medium frequencies.

Mr. Howard S. Frazier, Chairman National Association of Broadcasters 1760 N Street, Northwest Washington, D. C.	Mr. Burgess Dempster, Vice Chairman Crosley Corporation Cincinnati, Ohio

Panel #5 on VHF Broadcasting

Scope—The review and further development of standards with reference to broadcasting in the frequency band of 30 to 300 mc.

Mr. G. E. Gustafson, Chairman Zenith Radio Corp. 6001 Dickens Avenue Chicago, Illinois	Mr. C. M. Jansky, Jr., Vice Chairman Jansky & Bailey National Press Building Washington, D. C.

Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Arthur C. Stringer, *Director of Promotion.*

RTPB PANEL ORGANIZATION

(Continued from page 459)

Panel #6 on Television

Scope—The review and further development of standards with respect to television.

Mr. D. B. Smith, Chairman
Philco Corporation
Philadelphia, Pa.

Mr. I. J. Karr, Vice Chairman
General Electric Company
Bridgeport, Conn.

Panel #7 on Facsimile

Scope—The review and further development of standards with respect to facsimile.

Mr. J. V. L. Hogan, Chairman
730 Fifth Avenue
New York, N. Y.

Mr. C. J. Young, Vice Chairman
RCA-Victor Division
Camden, N. J.

Panel #8 on Radio Communication

Scope—The review and further development of standards with reference to radio communication.

Mr. Haraden Pratt, Chairman
% Mackay Radio and Telegraph Co.
67 Broad Street
New York 4, N. Y.

Panel #9 on Relay Systems

Scope—The review and further development of standards with reference to radio relay systems.

Mr. E. W. Engstrom, Chairman
RCA Laboratories
Princeton, N. J.

Dr. Ralph Bown, Vice Chairman
Bell Telephone Laboratories
463 West Street
New York, N. Y.

Panel #10 on Radio Range, Direction, and Recognition

Scope—The development of standards with respect to radio range, direction finding, recognition, and locating systems.

Mr. W. P. Hilliard, Chairman
Bendix Radio Corporation
Baltimore, Maryland

Mr. C. G. Fick, Vice Chairman
General Electric Company
Schenectady, N. Y.

Panel #11 on Aeronautical Radio

Scope—The review and further development of standards with reference to aeronautical services.

Mr. J. C. Franklin, Chairman
Director of Communications
Transcontinental Western Airlines
Kansas City, Mo.

Panel #12 on Industrial, Scientific, and Medical Equipment

Scope—The study of the necessary characteristics of industrial, medical and scientific equipment with particular reference to potential radio interference and the development of appropriate standards therefore.

Mr. C. V. Aggers, Chairman
Westinghouse Elec. & Mfg. Co.
Baltimore, Maryland

Mr. H. B. Marvin, Vice Chairman
General Electric Company
Schenectady, N. Y.

Panel #13 on Police, Emergency Services

Scope—The review and further development of standards with respect to police and emergency services.

Professor D. E. Noble, Chairman
Galvin Manufacturing Corporation
4545 Augusta Blvd
Chicago, Illinois

Mr. Frank Walker, Vice Chairman
International Association of Chiefs of Police
% Michigan State Police
Detroit, Michigan

Organization of RTPB now includes these six contributing sponsors: American Institute of Electrical Engineers, American Radio Relay League, FM Broadcasters, Inc., Institute of Radio Engineers, National Association of Broadcasters, and Radio Manufacturers Association.

ROCHESTER FALL MEETING

The annual joint meeting of the Radio Manufacturers Association and the Institute of Radio Engineers was held in Rochester, New York, on November 8 and 9. There was a record attendance of engineers and manufacturers. Of particular interest to broadcasters were the following papers presented during the meeting:

"Demountable Versus Sealed-off Tubes,"
I. E. Mouromtseff, Westinghouse Electric & Manufacing Company.
"Twenty-Eight Volt Operation of Electron Tubes,"
Walter R. Jones, Sylvania Electric Products, Inc.
"Message of RMA Director of Engineering,"
Dr. W. R. G. Baker.

Dr. Baker outlined the organization, procedure and objectives of the Radio Technical Planning Board, of which he is the chairman. More than three hundred radio engineers attended the Tuesday morning session, many of whom will become active in the studies to be made by RTPB, heard from Dr. Baker a detailed report on RTPB activities.

Among the broadcast engineers present were Edward Content, WOR; Howard S. Frazier, NAB; Kenneth Gardner, WHAM, and A. C. Heck, WPIC.

The United States Army Signal Corps exhibited captured enemy radio equipment which was examined with much interest by those present.

COMMITTEE DISCUSSES RADIO TUBES

Plans whereby the present and future output of nonmilitary radio receiving tubes would be made available from manufacturers to distributors on an equitable basis and thus receive wider distribution among owners of household radio sets for maintenance and repair were discussed by the Electronics Distributors Industry Advisory Committee meeting in Washington yesterday. A plan proposed by Frank H. McIntosh, chief of the Domestic and Foreign Radio Branch of the Radio and Radar Division, War Production Board, who was Government Presiding Officer at the meeting, was recommended by the committee.

Under this plan, each of the half dozen manufacturers first would offer for sale to the other manufacturers a certain minimum percentage of each type of tube he manufactures, in order that all manufacturers would have a supply of all types of tubes. The manufacturers then would offer to the electronics distributors with whom they deal a supply of tubes based on a percentage of the amount of tubes by type which the distributors purchased in 1941. In this way, the distributors would have a more balanced stock with which to supply their dealers who attempt to keep the public's radio sets functioning.

The plan would not necessarily bring about any additional supply of radio tubes for civilians, Mr. McIntosh emphasized, but would result in a more balanced distribution based on distributors' business in 1941. Some manufacturers have been following this practice voluntarily, but others have been filling orders for tubes on the basis of precedence of orders, members of the Electronics Distributors Industry committee said.

The Radio and Radar Division's proposal provides that manufacturers would set aside a suitable quantity of their production for export purposes.

The program would leave to distributors the decision on how their stocks were to be pro-rated among dealers in order that the public would be best served.

Although supplies of receiving tubes for household sets are still short of demand because of military requirements, the program seeks to correct unbalanced situations in which one distributor or a dealer has a large stock of one type of tube and none of others or another lacks minimum supplies of any type. It is expected to permit the average owner of a radio set to obtain a replacement tube at the first store to which he applies, instead of having to shop over an entire city for the required tube.

INFORMATION PLEASE

Information is desired concerning Leonard Wyatt, radio entertainer last on "air" as "Whitey and the Pine Ridge Boys", playing at Knoxville. Also played fiddle with old time music at dances. Anyone having information as to the whereabouts of this party, please send information to NAB, 1760 N Street, N. W., Washington 6, D. C.

VACATION TRAVEL

Joseph B. Eastman, Director of the Office of Defense Transportation, has requested the executives of all trade associations to call to the attention of the membership the necessity for curtailing holiday travel. Mr. Eastman points out that war impelled passenger traffic is severely taxing the facilities of both rail and bus, as well as air lines, and that every effort should be made to minimize travel, especially between December 17 and January 10.

Employers are requested to refrain from giving employees vacations during that period and to limit business travel to only the most essential occasions.

4 RADIO QUESTIONS IN CONSUMER SURVEY

A nationwide consumer survey is currently being conducted for the Office of Civilian Requirements by the Bureau of the Census according to information from Arthur D. Whiteside, WPB vice chairman. Census enumerators will visit with 7,000 households to ask about the availability of 115 types of goods and services used in homes and on the farms.

Items in which broadcasting has a special interest are tubes, radio batteries, radio repair facilities and new sets excluding auto sets.

The following committee has approved the technique being employed:

T. M. Brown, professor of business statistics, Harvard Business School; A. M. Crossley, Crossley, Inc.; George Gallup, director, American Institute of Public Opinion; Paul Lazarsfeld, research professor, Columbia University; Elmo Roper, Elmo Roper, Inc.; and S. M. Wilks, professor of mathematical statistics, Princeton University.

Questions will be asked in the following areas: rural farm; rural nonfarm; 2,500-25,000 cities; 25,000-100,000 cities; and in cities 100,000 and over.

Hope for the Best

Since the survey is being conducted by the Bureau of the Census it is expected that those interviewed will respond to the best of their ability. However, the size of the data sheets used by the enumerators is somewhat formidable.

With regard to the questions of special interest to broadcasters it is sincerely hoped that usable information will be obtainable. There is a possibility, though, that the fatigue element involved in asking 8 questions concerning each of 115 types of goods and services may render the radio information obscure.

Of the radio questions, radio tubes stand as No. 49, radio batteries, No. 71, new radio sets, No. 86 and radio repair No. 112 in the list of goods and services.

SALVAGE REPORTS

L. W. Trommlitz, manager, KORE, Eugene, Ore., has stimulated the local salvage committee to greater action in behalf of tin can collection.

F. H. Booton, program manager, WDZ, Tuscola, Ill., reports that fat collection is now "pretty fair."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 15th. They are subject to change.

Monday, November 15

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license, **920 kc.**, 1 KW night, 5 KW day, unlimited.

Wednesday, November 17

Further Consolidated Hearing

To be held in Room 582, U. S. Court House, Chicago, Illinois.

WFTL—Ralph A. Horton (Assignor), The Fort Industry Co. (Assignee), Fort Lauderdale, Fla.—Voluntary assignment of C. P., with license of WFTL; and licenses of Relay Stations WAAD and WRET; **1400 kc.**, 250 watts, unlimited under C. P.: **710 kc.**, 10 KW, unlimited, DA-night.

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—License to cover C. P. and authority to determine operating power by direct measurement. **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA-night.

WFTL—The Fort Industry Company, Fort Lauderdale, Fla.—Modification of license to move main studio from Fort Lauderdale, Fla. (contingent upon granting of B3-APL-15). **1400 kc.**, 250 watts, unlimited. Under C. P.: **710 kc.**, 10 KW, unlimited, DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

W. J. Harpole and J. C. Rothwell, a partnership, Plainview, Texas.—Adopted order granting petition to reinstate and grant application for construction permit for a new station to operate on **1400 kc.,** 250 watts, unlimited time. This grant is subject to the condition: "Prior to the issuance of a construction permit, the applicant shall obtain approval of the Commission of the exact transmitter and studio location and antenna system to be used. Application for such approval shall be filed within two months after the effective date of this order. If for any reason such application cannot be submitted within the time allowed, an informal request for extension of time must be submitted stating the necessity therefor." (B3-P-3420)

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted petition for authority to identify Station WLOL with St. Paul as well as with Minneapolis in making station identification.

DESIGNATED FOR HEARING

WJAX—City of Jacksonville, Fla.—Designated for hearing application for construction permit to install a 100 watt transmitter for auxiliary purpose only (B3-P-3541).

LICENSE RENEWALS

Granted renewal of following station licenses for period beginning December 1, 1943, and ending not later than December 1, 1945:

KGKY, Scottsbluff, Nebr.; KPLC, Lake Charles, La.; KTBI, Tacoma, Wash.; KYCA, Prescott, Ariz.; KYOS, near Merced, Calif.; WDNC, Durham, N. C.; WGAL, Lancaster, Pa.; WJBK, Detroit, Mich.; WMRC, Greenville, S. C.; WMRF, Lewistown, Pa.; WOMI, Owensboro, Ky.; WSTP, Salisbury, N. C.; WWSW, Pittsburgh, Pa. (and auxiliary); KNOW, Austin, Tex.

DOCKET CASE DECISION

The Commission announced the adoption of its Findings of Fact, Conclusions and Order (B-189) granting the application of the WGAR Broadcasting Co., WGAR, Cleveland, Ohio, for construction permit to change frequency from **1480** to **1220 kc.,** increase nighttime power from 1 to 5 KW, make changes in directional antenna for nighttime use, and move transmitter site locally. This grant is subject to the condition that (a) applicant shall take whatever steps are necessary to improve the signal of WGAR over the Cleveland business district to comply with the Commission's Rules and Regulations when materials and equipment again become available for construction of broadcast facilities; and (b) that applicant shall submit proof that the proposed radiating system is capable of producing a minimum effective field of 175 millivolts per meter at one mile for 1 KW power (or 392 millivolts per meter for 5 KW power). (Docket No. 6309)

Grant was also made of a construction permit to the Ohio Broadcasting Co., WHBC, Canton, Ohio, to make changes in transmitting equipment, install directional antenna for nighttime use, change frequency from **1230** to **1480 Kc.,** and increase power from 250 watts to 1 KW. (Docket No. 6310)

In the same action, the Commission denied the application of Allen T. Simmons, WADC, Talmadge, Ohio, for construction permit to install new transmitting equipment and a directional antenna for both day and night use, change transmitter location, and to change the operating assignment from **1350 kc.** with 5 KW power, unlimited time, using a directional antenna, to **1220 kc.** with 50 KW power, unlimited time, using a directional antenna. (Docket No. 6311)

MISCELLANEOUS

WQAM—Miami Broadcasting Co., Miami, Fla.—Granted license to cover construction permit as modified, for installation of new transmitter and increase in power (B3-L-1776); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1557).

WGRC—North Side Broadcasting Corp., Louisville, Ky.—Granted license to cover construction permit for move of main studio and transmitter (B2-L-1778); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1559).

WJOB—O. E. Richardson, Fred L. Adair and Robert C. Adair, d/b as Radio Station WJOB, Hammond, Ind.—Granted license to cover construction permit for increase in power and change in type of transmitter (B4-L-1774); granted authority to determine operating power by direct measurement (B4-Z-1553).

WAYX—Jack Williams, Waycross, Ga.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1538).

WNAX—WNAX Broadcasting Co., Yankton, S. D.—Granted license to cover construction permit as modified for increase in power and directional antenna for night use (B4-L-1775); granted authority to determine operating power by direct measurement of antenna power (B4-Z-1556).

WAHL—Paducah Broadcasting Co., Inc., area of Paducah, Ky.—Granted modification of license to change area of operation to permit use with Station WSON, Henderson, Ky., and WPAD, Paducah, Ky. (B2-MLRY-46).

W6XLA—Television Productions, Inc., Los Angeles, Calif.—Granted modification for construction permit, as modified, for extension of completion date of new experimental television relay station to February 1, 1944 (B5-MPVB-106).

United Automobile Workers, Congress of Industrial Organizations, Washington, D. C.—Denied petition requesting informal hearing on alleged censorship and operation contrary to public interest by station WHKC, Columbus, Ohio.

Pottsville News and Radio Corp., Pottsville, Pa.—Adopted an order denying petition for reinstatement of application for new station to operate on **580 kc.** with 250 watts daytime. (Docket 4402)

APPLICATIONS FILED AT FCC

750 Kilocycles

WHEB—WHEB, Inc., Portsmouth, N. H.—Transfer of control of license corporation from R. G. LeTourneau, to Charles M. Dale, 100% or 750 shares of common stock.

1070 Kilocycles

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Voluntary assignment of license and construction permit to H. G. Wall, Margaret B. Wall and Thelma M. Lohnes, d/b as Indiana Broadcasting Company.

1390 Kilocycles

KSIM—Oregon Radio, Inc., Salem, Oregon.—Transfer of control of licensee corporation from H. B. Read to Paul C. McElwain and Glenn E. McCormick (150 shares of common stock).

1410 Kilocycles

WKBH—WKBH, Inc.—Relinquishment of control of licensee corporation by Harry Dahl through transfer of 400 shares of stock to Howard Dahl, Kenneth Dahl, Dorothy Dahl and Catherine Dahl Wood—100 shares each.

1490 Kilocycles

NEW—Birney Imes, Jr., Tupelo, Miss.—Construction permit for a new standard broadcast station to be operated on **1490 kc.,** 250 watts, unlimited time.

NEW—Granite District Radio Broadcasting Co., Murray, Utah.—Construction permit for a new standard broadcast station to be operated on **1490 kc.,** 250 watts, unlimited time. Amended to specify studio site, changes in transmitting equipment and antenna and change in corporate structure.

NEW—Kingston Broadcasting Corp., Kingston, N. Y.—Transfer of control of licensee corporation from Benjamin F. Feiner, Jr., Morris S. Novik and Louis J. Furman, to Myer

Wiesenthal, Charles C. Swaringen, John J. Laux, Richard Teitlebaum, Jack N. Berkman, Alex Teitlebaum, Louis Berkman, Louis J. Furman and Morris S. Novik.

FM APPLICATION

Standard Broadcasting Company, Los Angeles, Calif.—Construction permit for a new high frequency (FM) broadcast station to be operated on **45300 kc.** with coverage of 7,000 square miles.

MISCELLANEOUS APPLICATION

NEW—Great Trails Broadcasting Corp., area of Dayton, Ohio.—License for a new relay broadcast station to be operated on **1606, 2074, 2102** and **2758 kc.**, 125 watts power, A3 Emission.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Harry Fischer & Company, 315 North 12th St., Philadelphia, manufacturing and selling men's topcoats, overcoats and other articles of clothing, is charged in a complaint with violation of the Wool Products Labeling Act of 1939 and the rules and regulations issued thereunder. (5073)

E. R. Squibbs & Sons—A complaint has been issued charging E. R. Squibbs & Sons, 745 Fifth Ave., New York, with disseminating false advertisements in connection with the sale of a laxative preparation designated "Granaya with Cascara," which it advertises as an effective treatment for chronic and stubborn cases of constipation. (5075)

Susquehanna Woolen Mills, New Cumberland, Pa., engaged in manufacturing and selling blankets and other products, is charged in a complaint with violation of the Wool Products Labeling Act and the rules and regulations promulgated thereunder. (5074)

Tiger Yarn Company, et al.—Misrepresentation of the fiber content and origin of knitting yarn is alleged in a complaint issued against Benjamin Goldman, 1643 Bathgate Ave., The Bronx, New York, who trades as Tiger Yarn Co., Minnette Yarn Co., Bengo Yarn Shop and Goldman's Yarn Shop. (5077)

Victory Coal Saver Mfg. Company—A complaint has been issued charging Eugene Clement d'Art, 32 North Pearl St., Albany, N. Y., with falsely advertising that a chemical preparation which he sells under the name "Victory Coal Saver," and which contains 90% common salt, is effective in reducing coal consumption. The respondent trades as Victory Coal Saver Mfg. Co. (5076)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Benedict Manufacturing Company, East Syracuse, N. Y., manufacturing and selling plated silverware, has stipulated to cease and desist from the use of any false, fictitious or misleading price representation which purports to be the retail sales price of its products but which is in fact in excess of the price for which such merchandise is customarily sold at retail; and to discontinue directly or inferentially representing, through the use of a fictitious or marked-up price, that the price for which its merchandise is offered for sale is an exceptional price, a low price or a discounted price when in fact the price is that for which the merchandise is customarily sold in the usual course of retail trade. (3742)

C. A. Briggs Co., trading as H. B. Sales Co., 418 Main St., Cambridge, Mass., has stipulated that in connection with the sale of H-B Cough Drops it will cease and desist from use of the term "Hospital Brand" as descriptive of its cough drops, the effect of which may tend to convey the belief that they are made in accordance with a formula prescribed or endorsed by a hospital; and from representing that the cough drops contain vitamin A, that their use will impart the benefits derived from the consumption of vitamin A, or that they purify and soften all hardened places in the throat. (3745)

Lewis-Howe Co., Fourth & Spruce Sts., St. Louis, Mo., selling a drug product designted "NR Tablets" or "Nature's Remedy," has stipulated to cease disseminating any advertisement which fails to reveal that the product should not be used when abdominal pain, nausea or other symptoms of appendicitis are present; provided, however, that such advertising need contain only the statement, "CAUTION: Use Only As Directed," if the directions for use on the label or in the labeling contain a caution or warning to the same effect. (03163)

National Neckwear Manufacturing Co., 359 Broadway, Brooklyn, has entered into a stipulation to discontinue certain misrepresentations in connection with the advertising and sale of neckties. (3746)

Paramount Dress Company—Under a stipulation entered into Joseph Kravitz and Louis Duboff, copartners trading as Paramount Dress Co., 302 South Market St., Chicago, agree to discontinue advertising or selling women's dresses or other products composed in whole or in part of rayon without disclosing such fact by use of the word "rayon"; and when such fabrics are composed in part of rayon and in part of other fabrics or materials, they shall be designated in immediate connection with the word "rayon" in letters of at least equal size and prominence which shall truthfully describe such constituent fiber or material. (3747)

Paramount Yarn Company, 362 Grand St., New York, selling and distributing knitting yarns, has stipulated to cease and desist from use of the words "Scotch," "Saxony" or other words connoting any foreign geographical origin as designations for or as descriptive of products which are not imported from the country or locality indicated by the use of such geographical designations. (3743)

Superior Shirt Co., 1216 Arch St., Philadelphia, selling and distributing men's shirts, has stipulated to cease representing by use of brands or labels such as "U. S. Pat. No. 2,156,704," "Miracle Weave" or "Guaranteed Miracle Weave," or in any other way that collars not actually constructed in accord with the specifications of such patent or made thereunder, are of the quality indicated, are rightfully or truthfully designated as "Miracle Weave," or that such collars have the same attributes and features as those previously sold under such labels and brands; that a collar made of the same or similar material or of the same threads or ply as the body of the shirt is "Guaranteed for life of the Shirt," or otherwise implying that such collar equals in wearing quality or will outwear the rest of the shirt. (3744)

Utica Textile Co., 138 Eldridge St., New York, wholesale distributor of dry goods and piece goods, has entered into a stipulation to cease and desist from use of the term "full size" as descriptive of a blanket or quilt cover the finished size of which is less than 72 inches by 84 inches, the figures "80 80" as applied to a product the finished size of which is less than 80 inches square, or any other terms or expressions which do not accurately indicate the true dimensions of the finished articles; and from use of the terms "80 square" or "80 80" as descriptive of the fabric from which such products are made, when in fact the thread count either way per square inch is other than 80, or any other expressions or representations indicative of the thread count which do not accurately inform purchasers with respect thereto. (3741)

Ward & Sons, 10534 Vincennes Ave., Chicago, selling a medicinal powder designated "Dr. Gray's Foot Bath Powder," has stipulated to cease representing that the preparation is used by doctors, hospitals or sanitariums; that it is the result of scientific research or a study of foot ailments; that statements in his advertising have been made by or are quotations from the literature of the U. S. Public Health Service, or that the U. S. Public Health Service or any other agency of the Government has endorsed or recommended the use of the product; that a package of the powder has a greater value than the price at which it is regularly sold or that its price is limited as to time; or that the powder draws poisons from the feet, has curative or healing powers or destroys germs. (03164)

Zimmerman-Scher, Inc., 150 West 30th St., New York, engaged in the sale of fur garments, stipulated that it will cease and desist from using the words "camel's hair" to designate garments not made of camel's hair; from using the word "lapin" to describe products made from rabbit or other peltries, unless such word is compounded with the word "dyed" or the word "processed" and when so compounded is immediately followed by the true common English name of the fur; and from describing furs or fur garments in any manner other than by using the true name of the fur as the last name of the description, and, when any dye or process is used in simulating any other fur, the true name of the fur appearing as the last word of the designation or description shall be immediately preceded in equally conspicuous type by the word "dyed" or the word "processed" compounded with the name of the simulated fur, as for example, "Seal-dyed Muskrat." (3748)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Dickson Weatherproof Nail Co., 1515 Sherman Ave., Evanston, Ill., with a branch office and factory in Birmingham, Ala., manufacturing and selling various kinds of roofing nails, including a nail designated "Dickson Lock Screw Shank Lead Head Nail," has been ordered to cease and desist from misrepresentation of the product. (4700)

Embalmers' Supply Co., Westport, Conn., manufacturing and distributing embalming fluids and chemicals, including a product designated "San-Veinio Spray," has been ordered to cease and desist from misrepresentations of the product. (3936)

Fox Studios—An order to cease and desist from misrepresenting the quality, price and terms of sale of photographs, particularly colored enlargements and miniatures, has been issued against John C. Lucas, Boise, Idaho, trading as Fox Studios and formerly as United Studios, and Isla Fineman Lucas. (4807)

Miracle Manufacturing Co., Conshokocken, Pa., manufacturing and selling mechanical devices designed as attachments for radio receiving sets, has been ordered to cease and desist from misrepresentations of the devices designated "Miracle Radio Control" and "Miracle Aerial Loop." (4623)

FTC DISMISSES COMPLAINT

The Federal Trade Commission has dismissed without prejudice its complaint charging Pakula and Co., trading as L. W. Ring Co., Chicago, with misrepresentation in connection with the sale of jewelry and novelties.

The respondent corporation has been dissolved. The Commission in its order dismissing the complaint reserves the right to institute further proceedings should conditions warrant.

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 47, November 19, 1943

BOARD OF DIRECTORS MEETING

The NAB Board of Directors held its regular fall meeting in Washington on Wednesday and Thursday. At the time these REPORTS go to press, the meeting had not yet adjourned. A full report of the sessions will be contained in next week's REPORTS.

LA GUARDIA-FLY EXCHANGE

Chairman Fly of the FCC today made public the correspondence between himself and Mayor Fiorello H. LaGuardia of New York, regarding the Mayor's broadcast November 7, 1943 over Radio Station WNYC. Mayor LaGuardia wrote Mr. Fly as follows:

"As you know, WNYC, owned and operated by the City of New York, is a non-commercial station. It is under my direct supervision. I have made it an unalterable rule to keep it non-political. This year we tried an interesting experiment that was to give equal time to the major parties as well as independent candidates.

"As Mayor I have a scheduled program every Sunday in which I talk on matters of interest to the people of the city concerning their welfare, health and safety. Last Sunday I made an analysis of the results of this year's election. I am now charged with having made a political talk. If so, I am guilty of a violation of my own rule. I did not intend to make a political talk and limited myself to an analysis of the results the same as any commentator would do. Be that as it may, the statement made by me, which I enclose herewith, speaks for itself. The enclosed copy is a verbatim record of my statement on this subject made extemporaneously. The background in reference to the election of a Supreme Court Judge is as follows:

"(1) The Supreme Court Judges in this State are nominated by judicial convention of the respective political parties. The Republican and Democratic parties nominated Magistrate Thomas Aurelio.

"(2) The Democratic Judicial Convention took place on August 23, 1943, at 8:30 P. M. and nominated said Aurelio.

"(3) The following morning, Tuesday, August 24th, 1943, at 8:25 A. M. during a telephone conversation to one Frank Costello, an underworld character, whose telephone was lawfully being tapped by the police department of this city in the course of official duties investigating a violation of the law, a voice was recognized as that of Mr. Aurelio, expressing his thanks, gratitude and undying loyalty to the said underworld character. The matter was immediately brought to the District Attorney of New York County.

"(4) That same evening the Republican Judicial Convention met and at about ten o'clock nominated said Aurelio.

"(5) Under the laws of the State of New York, as only recently construed by the highest Appellate Tribunal of this State, the Convention, having performed its duty and adjourned, lost all control and jurisdiction of the nomination for such office. Under the law of this State, the candidates have a right to decline the nomination within a certain time fixed by law.

"(6) Mr. Aurelio refused to decline the nomination. Thereupon both the Democratic and Republican parties repudiated the nomination. In the meantime, as soon as the information had been imparted to the leadership of the American Labor Party, one of its candidates for this office immediately declined the nomination and the Committee on Vacancies, pursuant to the provision of the State law, nominated one Matthew M. Levy.

"(7) Thereafter the Democratic Party, though unable to remove Mr. Aurelio from the ballot, endorsed Mr. Matthew M. Levy and urged its voters to support said Levy and not the candidate on its ticket. On September 1st, after Mr. Levy had been nominated by the American Labor Party and endorsed by the Democratic Party, the Republican Party designated their candidate whose name was placed on the ballot by independent petitions.

"(8) It was known as a mathematical certainty that a division of the anti-Aurelio vote would result in the election of Mr. Aurelio whose name appeared as candidate on both the Democratic and Republican Parties.

"(9) Every effort was made to obtain endorsements and support for Mr. Levy who had the advantage of being on a regular party ballot, which gave him a basis and a start of some 80,000 votes. The Republican Party leadership insisted upon keeping the third candidate on the ballot although it had until September 4th to withdraw and decline the nomination, and then center all efforts on the one candidate who had a regular party designation in addition to strong endorsements of the bar associations and an independent petition. In all fairness, it must be said that the third candidate, too, received approval as to his character and fitness by the same bar associations.

"The vote cast, and the mathematics, you will find in my analysis as given over the broadcast in question.

"Charge is also made that in analyzing the vote along party lines, I gave my opinion concerning the present political feeling toward President Franklin D. Roosevelt. I need not point out that there is no presidential campaign this year and that my analysis referred to the political situation as of today.

"If any one individual demands time to speak for the Republican Party, the station would have to accord a like privilege to any other Republican. In fact, there are many factions of Republicans in our City. It would also start a political pressure on the station which would destroy its very usefulness.

"I would concede that if my analysis and comment on the situation is considered political within the meaning of the law and your regulations, that someone should be entitled to the use of the station for a time equal to that consumed by me on the subject. It can be easily timed. You must also bear in mind that I deserve less consideration than perhaps anyone else because, if you followed the debate in the House, I took quite a part in insisting upon the free and proper use of the radio in the early days of radio legislation.

"I want to be fair to all concerned, but, inasmuch as I am personally involved and am of the firm belief that I did not abuse the use of the station and that my statement was not of the character intended by the law and the

(Continued from page 465)

FCC regulations requiring the opportunity now demanded, I am hardly in a position to judge the matter with an open mind.

"I enclose herewith

"(1) Statement made by the Chairman of the Republican County Committee on Sunday morning, November 7th;

"(2) His letter to the Director of WNYC asking for time;

"(3) Statement made by the County Chairman following my broadcast.

"I know it is an imposition to ask you to advise on this matter, but I feel that it is of sufficient importance to bring it to your attention for, after all, if I have erred, I want to know of it from a source in whom I have confidence and for whom I have great respect. It will also be helpful as a guide to our own station as well as to others similarly situated. It will also establish the limits and latitude of a commentator or an analyst giving his own deductions and opinions on political as well as other subjects.

"I would greatly appreciate your cooperation and of course will abide by your decision."

Following is the excerpt from Mayor LaGuardia's broadcast of November 7 which Chairman Fly of the FCC discussed in his letter to the Mayor dated November 12:

> "We had one interesting contest, that was the election of a Supreme Court Judge who was charged with having obtained his nomination with the help of an underworld character. I think it has been established that Thomas Aurelio was nominated because of the help he got from the racketeer, Frank Costello. But, he owes his election to the Republican Party. I can't make that any too strong. I believe, too, that if the Bar Association had been more vigorous and less inclined to divide along party lines, Mr. Aurelio would have been defeated. There is one thing that I want to say, and one thing which I shall continue to say to the entire country, the electorate in your city is intelligent and a greater number of voters voted against Mr. Aurelio than voted for him. He was elected because of the insistence of the Republican Party in putting up a third candidate.
>
> "As I stated Monday evening before election, if all the Republicans in the Bronx and in Manhattan voted for Mr. Frankenthaler, Mr. Aurelio would still have been elected. Now, I'll give you another mathematical instance. Taking the Frankenthaler vote and adding the 92,000 votes which Mr. Aurelio received on the Republican ticket, Aurelio would still have been elected. It was very simple, Mr. Levy was on the American Labor Party Line. Mr. Aurelio was on the Republican Line and Mr. Frankenthaler was put in afterwards, but the vote was given to Mr. Aurelio on the Republican line. I repeat, if every Republican in New York and Bronx County had voted for Mr. Frankenthaler, Mr. Aurelio would still have been elected.
>
> "The Republicans only have 24 per cent of the vote in Manhattan and they have only 14 per cent of the vote in the Bronx. They couldn't elect anybody. Oh, yes, I won on the Republican ticket, but that's different. Even when I won on the Republican ticket, I had the Republican organization in Queens and in the Bronx against me. That was back in 1919 when I was elected President of the Board of Aldermen to succeed the distinguished Governor, Al Smith, who had been elected Governor. That year I ran on the Republican ticket, as I say, with the opposition of the Republicans in the Bronx and Queens and was elected, but we'll come back to that in just a minute.
>
> "Now, I'm going to repeat this because I think it is manifestly unfair to get the idea abroad in this country that the majority of the people in this City are callous or not intelligent enough to vote. They are. A manifestly unfair statement appeared in the *Herald Tribune* this morning by Mr. Thomas Curran, Chairman of the New York County Republican Committee. He says, 'further, I believe it noteworthy to point out that whereas Matthew M. Levy (the A. L. P. Candidate) polled a meager 38,456 votes on the Integrity and Justice line, a total of 140,000 were recorded for Mr. Frankenthaler on his single Judiciary party line.'
>
> "Wouldn't that make it appear that Frankenthaler got 140,000 votes and that Levy got only 38,456. Well, that is not true. Levy got 217,577 votes; Frankenthaler got 140,000 and add the 92,000 that Aurelio got on the Republican ticket, and Aurelio would still have been elected. Now, that ought to be clear.
>
> "I mentioned the Bar Association. First, I must say that Mr. Wardwell, President of the Bar Association and Dean Embree of the New York County Bar Association did give every possible help. This is what happened: The Aurelio telephone conversation, expressing his undying loyalty to the racketeer was at 8:25 in the morning. The Republicans had not yet nominated anyone. They met after nine o'clock at night and nominated Aurelio. When District Attorney Hogan made known this conversation, Mr. Allen Wardwell, Mr. Dean Embree and Mr. John G. Jackson made every effort to get a joint candidate under the circumstances. They realized that the American Labor Party had withdrawn a candidate in order to put one in who could fight this situation. They gave whole-hearted and unstinted support to Matthew Levy, as did other leaders of the bar, but then when it went to the committee of the bar, both candidates were endorsed. Members divided on giving support, all to the confusion of the voters. Some members of the bar—outstanding lawyers—when the matter was called to their attention frankly stated, 'Well, the Republican Party is our first love,' and they let it go at that. The result you have.
>
> "I've been asked to comment on the statement that this is a defeat of the New Deal. Well, again I say I can only talk for New York City and it is not a defeat for the New Deal. The forces that were supposed to be for the New Deal were generalled by Mr. James Farley and who said that James Farley is for the New Deal? In fact, when did James Farley ever win an election in New York City? Well, let us see, in '33 he commanded the campaign of the candidate against me. We licked him. In 1940, he was not for the President. In 1941 he again assumed command of the Mayoralty campaign and was defeated. In 1942, he again assumed the command for the governorship and was defeated; in 1943, you know the results. I can only speak for New York City and I've repeated that four times now, and I say if Mr. Roosevelt were to run tomorrow in New York he would carry this city by over 750,000 votes. And that's the situation as far as the vote in New York has any significance to the national question. True, Mr. Hanley got a very good vote. Mr. Dewey has given an excellent administration and other factors entered into it, but the fact remains that insofar as New York City's vote is concerned, it has no bearing whatsoever with either President Roosevelt's following or the support of the New Deal."

Mr. Fly's response follows:

"This will acknowledge receipt of your letter of November 10 in which you ask for my opinion in regard to the request of the Chairman of the Republican County Committee for time on Radio Station WNYC to answer remarks made by you over the Station on last Sunday.

You understand, of course, that the responsibility for the programming of the Station rests upon the licensee. The discretion exercised by the licensee is not reviewable by the Commission except at a time when the over-all conduct of the station over the long stretch is brought up for general review. The mandatory provision of the statute requiring equal facilities for candidates for public office is not applicable in this instance. I shall, therefore, assume that you have asked for an expression from me as to my own appraisal of the broadcaster's duty in the operation of this vital mechanism of free speech.

I doubt if there is any substantial divergence of opinion between us as to the general philosophy which ought to apply to radio broadcasting. I assume that when any speaker enters the field of controversy on any current problem, or where any speaker, political or otherwise makes charges of a serious nature against responsible persons or organizations, the least the opposition should have is equal opportunity to present to the public its own answer to any charges made. Nor, in my view, is it essential to the application of this principle that the original broadcast in question be political or non-political. The ideal toward which my own thinking aims is that the public is entitled to a balanced presentation on all lively, current issues. I should think that this principle is only accentuated when there is something accusatory in the original broadcast.

I have reviewed your entire speech, a copy of which covers ten and one-half mimeographed pages. Surely, most of that speech can properly be deemed a report from the Mayor to the electorate of his own City on non-controversial matters of current interest to the public. I assume that the material in question covers a little over two pages from near the top of page 2 through the middle of page 4.

I do not think this material is of the greatest current political interest, but I do think that it may have some-long-range impact in the political realm. In this way it may affect the local Republican organization. Of somewhat greater significance, however, is the fact that your language appears to me to be somewhat accusatory in nature in that you lay the blame for the Aurelio election, which is assumed to be unwholesome, on the doorstep of the Republican organization. You may well be right in doing this, and the array of facts presented by you without countervailing evidence point in the direction of this responsibility. Indeed, at a distance, I had already been inclined to assume that the election of Aurelio was made both possible and probable by the failure of the appropriate organizations to concentrate in support of one qualified opponent. Thus, the upshot of my own thinking on the subject at a distance is that I tend to come off with the feeling that you are right.

But therein lies the danger. In terms of the over-all operation of the mechanism of free speech in the broad public interest, it is ever so essential that the public be not, through one-sided presentation, led to think on any subject as either or both of us may think. The question of fact is serious, the blame sought to be placed upon the Republican organization is serious, and that organization raises a responsible voice seeking to be heard. This leads me to the thought that the public is entitled to hear them and that the Republican County Committee should be enabled to express its view. The time and facilities extended to the Republican organization should be no less desirable or effective than that enjoyed by you. I would assume that you spent about six minutes on this general subject. If I may be specific, I would suggest that you extend to them ten minutes of this same period on Sunday, November 14, or at such other time as may be mutually arranged.

With every assurance of my kind regards."

BANKHEAD BILL PASSES SENATE

S. 1457 (The Bankhead Bill on Newspaper Advertising) passed the Senate by the close vote of 37-35 and was sent to the House for concurrence. It was there referred to the House Committee on Ways and Means.

The membership of the House Committee on Ways and Means is as follows:

Robert L. Doughton, N. C.
Thomas H. Cullen, N. Y.
Jere Cooper, Tennessee
Wesley D. Dingell, Mich.
A. Willis Robertson, Virginia
Milton H. West, Texas
James P. McGranery, Penna.
Wilber D. Mills, Ark.
Noble J. Gregory, Ken.
A. Sidney Camp, Georgia
Walter A. Lynch, New York
Aime J. Firand, Rhode Island
Thad. F. Wasieleski, Wis.
Paul H. Maloney, Louisiana
Allen H. Treadway, Mass.
Harold Knutson, Minn.
Daniel A. Reed, New York
Roy O. Woodruff, Mich.
Thomas A. Jenkins, Ohio
Donald H. McLean, New Jersey
Bertrand W. Gearhart, Calif.
Frank Carlson, Kansas
Richard M. Simpson, Pennsylvania
Charles S. Dewey, Illinois.

BROADCASTING NOW AA-1

The Radio and Radar Division of WPB has again amended Preference Rating Order P-133 as of November 17, 1943. The new order authorizes the preference rating AA-1 instead of the former rating AA-2. This change now places radio broadcasting on an equal basis with other branches of the radio communications industry. The preference rating applicable to commercial sound recording has also been raised from AA-5 to AA-2. Section (e) (1) has been clarified.

We are printing below the portions of the order amended on November 17. All other sections of the order as amended October 8, 1943, remain unchanged. As only a small portion of the order has been modified, the new order will not be printed in its entirety. It is therefore suggested that the previous order published by NAB in Broadcast Engineering Bulletin No. 3, October 22, 1943, and NAB Reports, page 438-439 of October 22, 1943, be corrected as shown below.

(1) Radio communication—AA-1. Persons engaged in this business are also entitled to use the allotment symbol "MRO."

(2) Radio broadcasting—AA-1. Persons engaged in this business are also entitled to use the allotment symbol "MRO."

(3) Commercial sound recording—AA-2. Persons engaged in this business are also entitled to use the allotment symbol "MRO."

(4) Operation and maintenance of public address, intercommunication, plant sound or other similar electronic systems, such as systems for the controlled distribution of musical programs—AA-5.

(e) *Restrictions on the use of the ratings and allotment symbol.* No person shall use these ratings or allotment symbol:

(1) To buy or repair a tube, unless he has first operated a similar tube to failure, and has in stock less than one new and one rebuilt spare tubes for each active tube socket. All operable tubes which have not been rebuilt shall be counted as new tubes. All power tubes of 250 watts or more (plate dissipation), which have been operated to failure and are not to be repaired, shall be returned to the manufacturer.

TECHNICAL PLANNERS MEET

The necessity for complete cooperation between government and industry groups for the early study of technical problems involved in the future of radio, was generally agreed upon at a meeting held in Washington Wednesday which was attended by members of the Radio Technical Planning Board, representing industry; the Interdepartment Radio Advisory Committee, the Board of War Communications and the Federal Communications Commission.

Subject to priorities of work related to the war, the studies should start as quickly as possible, it was felt.

Government departments concerned with radio work have been invited to appoint observers to work with the Radio Technical Planning Board.

There will be an exchange of information between the government departments and the RTPB so that all concerned in this field can coordinate their work.

The various panels of the RTPB and the government groups will study such problems as (a) Major changes which may be required with respect to each service, i.e., standard broadcasting, FM broadcasting, television, aviation (domestic and international), police and emergency services, international point-to-point, maritime and government; (b) Changes to be made in the Federal Communications Commission's present standards of good engineering practice and other technical rules, and (c) The possibilities of utilizing frequencies above 300 megacycles.

It was suggested that studies should be completed at the earliest possible date to determine the best frequencies for television, FM broadcasting, aviation and other services so that manufacturers can be ready with plans to produce equipment when materials are again made available.

It was brought out that if no change in allocation of frequencies for television is made and large numbers of sets are sold under the present commercial standards, the effect would be to freeze the service without giving the public the benefit of new war time developments.

A need was expressed for more information to determine the lowest and highest frequencies which are actually useful for television and other services.

The meeting was told about studies the FCC is conducting to determine the possibility of long distance skywave interference in the present FM and television bands.

In a discussion of the radio problems in aviation it was reported that some of the technical difficulties from the standpoint of maximum use of frequencies are attributable to the extreme high speeds of modern aircraft.

Chairman of the Radio Technical Planning Board is Dr. W. R. G. Baker, vice-president of the General Electric Co. The Interdepartment Radio Advisory Committee is headed by T. A. M. Craven who is also a commissioner of the FCC. James Lawrence Fly is chairman of the Federal Communications Commission and also of the Board of War Communications.

The group met in response to an invitation issued by the Federal Communications Commission.

Members of the Radio Technical Planning Board who attended the meeting included:

Dr. W. R. G. Baker (Chairman), Vice Pres., General Electric.
L. C. F. Horle (Coordinator), 90 West Street, New York City
Bond Geddes (Treasurer), RMA, Washington, D C.
George W. Bailey, American Radio Relay League, 1530 P St., N. W., Washington, D. C.
Kenneth B. Warner, American Radio Relay League, West Hartford 7, Conn.
Walter J. Damm, FMBI, Milwaukee, Wisc.
G. E. Gustafson, V. Pres., Eng. Dept., Zenith Radio, Chicago, Ill.
Frank Walker, International Assn. Chiefs of Police, Detroit, Mich.
D. E. Noble, Galvin Corp., Chicago, Ill.
H. F. Argento, Raytheon Co., Waltham, Mass.
David B. Smith, Philco Corp., Philadelphia, Pa.
F. J. Bingley, Philco Corp., Philadelphia, Pa.
Burgess Dempster, Crosley Corp.
Howard Frazier, NAB, Washington, D. C.
H. H. Beverage, RCAC, New York City
E. W. Engstrom, RCA Labs., Princeton, N. J.
H. B. Marvin, General Electric, Schenectady, N. Y.
J. M. Constable
Charles J. Young, RCA Labs., Princeton, N. J.
John V. L. Hogan, Faximile Inc., 730 Fifth Ave., New York City
Ralph Brown, Bell Tel. Labs., New York City
Ray H. Manson, Stromberg Carlson Mfg., Rochester, N. Y.
F. M. Ryan, A. T. & T. Co, New York City
C. M. Jansky, Jr., Jansky & Bailey, Washington, D. C.
George T. Harness, American Institute of Electrical Engineers
Haraden Pratt, Mackay Radio and Telegraph Co.
Dr. C. B. Jolliffe, RCA Labs., Princeton, N. J.
Fred Guthrie, RCAC, Washington, D. C.
Herbert A. Friede, International Municipal Signal Assn.
Dr. Alfred N. Goldsmith, 580 Fifth Ave., New York City
R. M. Wise, Sylvania Electric Products, 500 Fifth Ave., New York City
Thomas Streibert, FM Broadcasters, Inc.
Philip Louchs, FM Broadcasters, Inc., Washington, D. C.
W. B. Lodge, Columbia Broadcasting System
Fred D. Williams, Philco Corp.
H. W. Holt, NIB
Frank J. Martin, National Electric Mfgrs. Assn.
D. W. Rentzel, Aeronautical Radio
Walter Murray, Aeronautical Radio

Government Officials who attended were:

Commander Franz O. Willenbucher, Navy Department
Lt. Commander Paul Segal, Navy Department
J. H. Dellinger, National Bureau of Standards
Lt. Commander Paul D. Miles, Navy Department
E. C. Wagner, Agriculture Dept.
Lt. A. L. Budlong, Coast Guard
Ensign E. J. Brumbaugh, Coast Guard
Capt. E. M. Webster, Coast Guard
L. H. Simson, C. A. A.
A. G. Simson, Lt Col., Signal Corps.
John S. Timmons, WPB

Chairman James Lawrence Fly; Commissioners T. A. M. Craven; C. J. Durr; Paul A. Walker; Ray C. Wakefield, of the Federal Communications Commission.

Federal Communications Commission Staff Members: E. K. Jett, Chief Engineer; Charles Denny, General Counsel; P. F. Siling; Rosel Hyde; Dr. L. P. Wheeler; George Sterling; William H. Bauer; George Adair; George Turner; James P. Veatch; Harry Plotkin; William N. Krebs.

The Lea Committee met this morning with Commissioner Craven on the stand in his capacity as chairman of Interdepartment Radio Advisory Committee (IRAC). The session was largely devoted to the reading into the record of the minutes of IRAC relating to the Committee's recommendations that the chairmanship of IRAC be rotated and that the recommendations and proposals of IRAC be submitted to the president through its own chairman rather than through the chairman of the FCC.

The afternoon session followed along the same lines with Counsel Garey asking Commissioner Craven whether or not one of the main complaints by members of IRAC to FCC representatives on IRAC was that they come to the meetings unprepared to vote and had to take so many questions back to the Commission. Commissioner Craven pointed out that in many instances he could think of the representative of the FCC could not vote without going back to the Commission for reactions in view of the necessity in case of the removal of a licensee from his frequency without first going through a hearing.

In this connection Mr. Garey asked whether the Commission had ever revoked a license without a hearing. Commissioner Craven said that he felt that since it was a statutory requirement that no such action had ever been taken. Mr. Garey asked him about the Watertown, New York case in which a construction permit had been issued, some several thousand dollars spent in construction and finally the construction permit had been rescinded by the Commission by telegram.

Commissioner Craven said he would be glad to look up the details and report back to the Committee later on. He called attention to the fact, however, that at the Sanders hearing he had made recommendations to the committee of the necessity for legislation regarding Commission procedure and that he still felt that remedial legislation along these lines was needed. He indicated that he was preparing recommendations for submission to the Senate Committee which is now holding hearings on the Wheeler-White Bill regarding the establishment of a conference group on the allocation of frequencies which should include the various interested government departments and also members of the House Interstate and Foreign Commerce Committee and of the Senate Interstate Commerce Committee.

The hearings were recessed until 10:00 a. m., Monday, November 22.

Labor

CHRISTMAS BONUSES

The National War Labor Board has announced that regular Christmas bonuses may be paid this year without approval of the Board if they do not exceed bonuses given last year.

The Board reaffirmed its General Order No. 10, issued November 6, 1942, which authorized the payment of bonuses if they do not amount to a greater fixed sum than previously paid, or, if computed on a percentage basis, the same rate and method of computation is used. Greater amounts may be given in instances where the same percentage and method are used to compute the bonus.

Bonuses in excess of amounts paid previously, or otherwise contrary to General Order No. 10 require approval by the Various Regional War Labor Boards.

Such applications, the Board said, will be approved only in exceptional cases where failure to pay the bonus would be manifestly unjust to the employees involved.

COMMISSION INCREASES

The National War Labor Board has decided that the "Little Steel" formula, as a general rule, will not be applied to those employees under the Board's jurisdiction who receive their wage payments by the commission method.

In a resolution drawn up after a careful investigation into all phases of the problem, the Board also said that each commission case would "be considered upon its own merits in the light of all the facts." Each decision made in any of the 12 Regional War Labor Boards or industry commissions will be submitted promptly to the National Board to be summarized. Reports will be made and submitted to all the regions and commissions, the resolution said.

It is estimated that more than 5 million workers are paid by the commission method in some form. The Board's resolution applied to all the workers, but particularly to salesmen in the distribution and service industries.

The "Little Steel" formula permits an increase in the hourly rates of employees up to 15 per cent above the rate paid on January 1, 1941 to compensate workers for the increased cost-of-living.

The Board found that the "Little Steel" formula, as a rule, was inapplicable to commissions because of the complexity of the types of commissions, and because, generally, no record of the number of hours worked is kept. The "Little Steel" formula is based on the hourly rate. In some instances, virtually all earnings are pure commission earnings while in other cases the commission constitutes only a very small proportion of the total earnings. Commission plans, even within a single industry or bargaining unit, may vary between these two extremes. In some instances, very complex plans are in effect, providing for a complex rate schedule, a salary, and/or a guaranteed rate.

For example, taxi cab drivers may receive a flat percentage varying with the volume of business. A driver may receive 35 per cent of the first $36 collected in a week and 50 per cent on all collections over $36. Another may receive an hourly rate plus 40 per cent commission on all bookings over $10 a day.

A laundry driver salesman may receive a flat percentage of gross business or he may receive $20 a week as a guarantee based upon a $15 per week salary plus a 5 per cent commission on all sales; that is, if the $15 and 5 per cent do not yield at least $20 per week the driver salesman nevertheless will receive the $20 guarantee.

The National Board's resolution was passed after a public hearing on the question October 23, 1943. The Board also received briefs from approximately 30 interested labor and employer organizations. Organizations in the Driver-Salesman and Insurance fields were most actively interested in presenting material to the Board.

The text of the resolution follows:

"By unanimous vote the Board today resolved with reference to the commission method of wage payment particularly for distribution and service industries:

1. As a general rule the Little Steel formula shall not be applied.

2. Each case shall be considered upon its own merits in the light of the detailed facts of each case.

3. Every decision in a dispute or voluntary case shall be promptly reported to the National Board (Wage Stabilization Division) to be summarized and reported to all regions and commissions."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, November 22d. It is subject to change.

Monday, November 22

WJNO—WJNO, Incorporated, West Palm Beach, Fla.—C. P., **1230 kc.**, 250 watts. For emergency purposes only.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WQAM—Miami Broadcasting Co., Miami, Fla.—Granted modification of license in part to permit operation of formerly licensed 1 KW RCA main transmitter for emergency auxiliary purposes (B3-ML-1176).

KMPC—The Station of the Stars, Inc., Beverly Hills, Calif.—Granted modification of license to move main studio from 9631 Wilshire Blvd., Beverly Hills, to 5939 Sunset Blvd., Los Angeles, Calif. (B5-ML-1178).

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted application for modification of construction permit authorizing extension of completion date to December 31, 1943 (B4-MP-1728).

APPROVE SALE OF WMCA

The Commission has authorized the transfer of control of Radio Station WMCA in New York City from WMCA, Inc., wholly owned by Edward J. Noble, to the Cosmopolitan Broadcasting Corporation. Mr. Nathan Straus and the Davega-City Radio, Inc., own approximately 59% and 41% respectively of the voting stock of the Cosmopolitan company.

The Commission's Decision and Order found that "the Cosmopolitan Broadcasting Corporation is legally, financially and technically qualified to operate Station WMCA and that the proposed assignment is in the public interest."

At the same time, the Commission denied the petition of Donald Flamm, owner of WMCA prior to 1941, to intervene in the proceeding.

Mr. Noble, recent purchaser of the Blue Network, is sole stockholder of the American Broadcasting System, Inc., licensee of the Blue Network's key station WJZ in New York City. Mr. Noble's sale of WMCA is in accordance with the prohibition in the Commission's rules against multiple ownership by a network organization of stations covering substantially the same service area.

DESIGNATED FOR HEARING

WNBZ—Upstate Broadcasting Corp., Saranac Lake, N. Y.—Designated for hearing application for renewal of license of station WNBZ.

MISCELLANEOUS

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—Granted license to cover construction permit which authorized change in transmitting equipment and increase in power (B3-L-1781).

WCAL—St. Olaf College, Northfield, Minn.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1562).

KHTA-KHTB—The Telegraph-Herald, area of Dubuque, Iowa.—Cancelled relay broadcast license authorizations in accordance with written request of licensee (B4-RRY-255; B4-RRY-256).

WGST—Georgia School of Technology, Atlanta, Ga.—Granted motion for continuance of hearing now scheduled for November 15 to November 29, in re application for renewal of license.

Chattahoochee Broadcasting Co., Columbus, Ga.—Denied petition requesting reinstatement of application for construction permit for new station.

The Commission approved a power of attorney for the affairs of Albert S. and Robert A. Drohlich, sole owners and licensees of station KDRO, Sedalia, Mo., to be handled by Mrs. Shirley Wagner as their attorney-in-fact to operate the station and execute papers concerning matters pending or contemplated before the Commission, during licensees' services in the armed forces.

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Granted petition to dismiss without prejudice the application of modification of license to operate on **740 kc.**, 5 KW, unlimited time (DA-night and day), (B5-ML-1172).

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Modification of construction permit (B4-P-2827 as modified), which authorized change in hours of operation and installation of directional antenna for night use, requesting extension of completion date from 11-18-43 to 2-18-44.

630 Kilocycles

KOH—The Bee, Inc., Reno, Nevada.—Modification of license to change corporate name of licensee to McClatchy Broadcasting Company of Nevada.

850 Kilocycles

WEEU—Berks Broadcasting Co., Reading, Penna.—Special service authorization to operate from 6:45 a. m., EST, to local sunrise during the months of November and December, 1943, and January, February, March and October, 1944.

1010 Kilocycles

WINS—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3512 as modified), which authorized increase in power from 1 KW to 10 KW, change in hours of operation, installation of new transmitter and directional antenna and move of transmitter, requesting a change in frequency from **1000 kc.** to **1010 kc.**, and changes in directional antenna system and extension of commencement and completion dates.

1180 Kilocycles

WHAM—Stromberg-Carlson Telephone Manufacturing Co., Rochester, N. Y.—Modification of license to change corporate name of licensee to Stromberg-Carlson Company.

1220 Kilocycles

KTBI—Tacoma Broadcasters, Inc., Tacoma, Wash.—Construction permit to change frequency from **1490 kc.** to **1220 kc.**

1230 Kilocycles

WDSM—WDSM, Inc., Superior, Wis.—License to cover construction permit (B4-P-3526), which authorized changes in transmitting equipment and increase in power.

WHLN—Blanfox Radio Company, Harlan, Ky.—Construction permit to change frequency from **1450 kc.** to **1230 kc.**, and make changes in antenna and ground system.

1240 Kilocycles

KROY—Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney & Will Thompson, Jr., d/b as Royal Miller Radio, Sacramento, Calif.—Construction permit to install a new transmitter and increase power from 100 watts to 250 watts. Amended: to change name of applicant to Royal Miller, Marion Miller, L. H. Penney and Gladys W. Penney, d/b as Royal Miller Radio.

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Acquisition of control of licensee corporation by L. M. Kennett through purchase of 500 shares of stock (499 shares from Roy E. Blossom and 1 share from Daisy B. Blossom).

1400 Kilocycles

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Acquisition of control of licensee corporation by Milton L. Greenebaum through transfer of 35 shares of stock from Adolph Greenebaum, deceased.

1450 Kilocycles

KNET—Palestine Broadcasting Corp., Palestine, Texas.—Voluntary transfer of control of licensee corporation from Bert Horswell, Beverly Gordon Horswell and the Pauline Mayer Gordon estate to Billy A. Laurie, Leita Moye Laurie and Ben A. Laurie (100 shares capital stock).

1460 Kilocycles

KINY—Edwin A. Kraft, Juneau, Alaska.—Modification of construction permit (B-P-3089 as modified), which authorized increase in power, installation of new transmitter and changes in antenna for extension of completion date from 11-11-43 to 12-11-43.

FM APPLICATIONS

NEW—KRIC, Inc., Beaumont, Texas.—Construction permit for a new high frequency (FM) broadcast station to be operated on **43100 kc.**, with coverage of 6,650 square miles.

NEW—Green Bay Newspaper Co., Green Bay, Wis.—Construction permit for a new high frequency (FM) broadcast station.

MISCELLANEOUS APPLICATIONS

WRRB—WHEC, Inc., Rochester, N. Y. (area of).—License to cover construction permit (B1-PRE-427), which authorized construction of a new relay broadcast station.

W9XMB—The Moody Bible Institute of Chicago, Chicago, Ill.—Modification of construction permit (B4-PST-4 as modified), which authorized construction of a new ST broadcast station for extension of completion date from 11-16-43 to 2-16-44.

WHFM—Stromberg-Carlson Telephone Manufacturing Co., Rochester, N. Y.—Modification of license to change corporate name of licensee to Stromberg-Carlson Company.

WJEN—Stromberg-Carlson Telephone Manufacturing Co., area of Rochester, N. Y.—Modification of license to change corporate name of licensee to Stromberg-Carlson Company.

WJEP—Stromberg-Carlson Telephone Manufacturing Co., area of Rochester, N. Y.—Modification of license to change corporate name of licensee to Stromberg-Carlson Company.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

National Bureau of Missing Heirs, Keen Hotel Building, Omaha, engaged in the sale of reply postcards to creditors and collection agencies for their use in obtaining information concerning debtors, is charged in a complaint with falsely representing that her business is conducted for the purpose of locating heirs to estates. (5081)

House of Royalsun, 5 West 36th St., N. Y., engaged in the sale of various grades and types of knitting yarn, is charged in a complaint with misrepresenting the fiber content and the origin of the products they sell. (5078)

C. I. Togstad Company, Kokomo, Ind., and L. O. Williams, general manager of the business, are charged in a complaint with falsely representing in advertisements that the preparation they sell under the name "Dip-Clean," formerly known as "Wonder-Kleen," is a substitute for soap and effective and harmless for cleaning garments and other fabrics. (5080)

Sidney H. Wilcox, who during the past year has had business addresses in Washington, Detroit, Cleveland, Toledo, and Oakland, Ill., is charged in a complaint with misrepresenting the nature of his business in connection with the sale of reply postcards designed and used by creditors and collection agencies in obtaining information concerning debtors. Wilcox conducts his business under the names Board of Employment Research; Division of Employment Research; The Toledo Foundation, Division of Employment Research; and Bureau of Statistics, Division of Employment. (5079)

STIPULATIONS

During the past week the Commission announced no stipulations.

CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

FTC CLOSES CASE

The Federal Trade Commission has closed the case growing out of the complaint against William I. Miller, trading as Miller Manufacturing Co., Camden, N. J. The complaint had charged the respondent with misrepresentation in the sale of a compound designated "Wonderweld," recommended for use in repairing water jackets, cylinders or other metal parts of machinery.

The Commission has ordered the case closed without prejudice to its right, should future facts so warrant, to reopen the case and resume trial thereof in accordance with the regular procedure of the Commission.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 48, November 26, 1943

CRAVEN URGES CONGRESS ACT NOW

Appearing before the Select Committee of the House, headed by Chairman Lea of California on Wednesday (24), FCC Commissioner T. A. M. Craven urged Congress to act now to get the Commission out of the program and business field of broadcasting.

He recommended that the Interdepartment Radio Advisory Committee be "legalized" and permitted to directly present to the President its recommendations respecting the allocation of wave lengths for government departmental use instead of following the present procedure of going through the FCC.

He also proposed the creation of a Presidential Advisory Board on communications to be composed of members of the House and Senate and departmental and agency heads affected by radio.

A complete report of the Select Committee's proceedings will be covered in an early Legislative Bulletin.

MULTIPLE OWNERSHIP OF STATIONS ORDERED ENDED

The Federal Communications Commission Thursday (23) adopted Order 84-A which promulgates Regulation 3.35 setting forth the Commission's policy with respect to multiple ownership of standard broadcast stations. In a press release, the Commission stated that this policy has been adopted after extensive consideration of the problem raised by concentration of control over standard broadcast stations serving substantially the same area.

The regulation is effective immediately with respect to all applications for construction permit, or for assignment of license or transfer of control. With respect to existing stations, the regulation is to take effect midnight May 31, 1944; provision is made, however, for further postponing, upon a proper showing, enforcement of the regulation in any case where it is necessary to permit the orderly disposition of properties.

Any application for construction permit, or for assignment of license or transfer of control now on file or hereafter filed which may result in a situation of multiple ownership as stated in the regulation will be designated for hearing.

As to existing stations, no action will be taken until midnight May 31, 1944, except where individual licensees request an early hearing in order to secure a determination of the applicability of the regulation to them. Licenses which expire between November 23, 1943, and midnight May 31, 1944, will be extended to midnight May 31, 1944. Promptly after termination of the suspension period, it is contemplated that in each case where the regulation may apply, applications for renewal of license of the stations involved, will be designated for hearing, regardless of the date when the then current license expires; where necessary, the Commission will call for the early filing of such applications. Any determination that the regulation is applicable in a particular case, however, will not become effective until the then current license of the station involved expires.

At the hearings a full opportunity will be afforded for showing that a multiple ownership situation as stated in the regulation does not exist, or that if such a situation does exist, public interest, convenience, or necessity will nevertheless be served by a grant.

The text of the order follows:

"ORDER NO. 84-A

"In the Matter of: Commission's Order No. 84—Multiple Ownership of Standard Broadcast Stations	Docket No. 6165

"WHEREAS, The Commission on August 5, 1941, adopted Order No. 84 announcing a proposed regulation (Section 3.35) with respect to the multiple ownership of standard broadcast stations;

"WHEREAS, Pursuant to the opportunity afforded by said order interested persons filed briefs and on October 6, 1941, argued orally before the Commission as to why the proposed regulation should not be adopted or why it should not be adopted in the form proposed;

"WHEREAS, After due consideration, the Commission is of the opinion that public interest, convenience and necessity will be served by adopting the policy set forth in the following regulation;

"NOW THEREFORE, IT IS HEREBY ORDERED, That the following regulation BE, AND IT HEREBY IS ADOPTED:

"Sec. 3.35 *Multiple Ownership*—No license shall be granted for a standard broadcast station, directly or indirectly owned, operated or controlled [9b] by any person [9c] where such station renders or will render primary service to a substantial portion of the primary service area of another standard broadcast station, directly or indirectly owned, operated or controlled by such person, except upon a showing that public interest, convenience and necessity will be served through such multiple ownership situation.

"IT IS FURTHER ORDERED, This regulation is to take effect immediately, Provided, however, That with

---

[9b] The word "control," as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

[9c] The word "person," as used herein, includes all persons under common control.

respect to persons who now directly or indirectly own, operate or control a standard broadcast station which renders primary service to a substantial portion of the primary service area of another standard broadcast station, directly or indirectly owned, operated or controlled by such person, the effective date of this regulation shall be midnight May 31, 1944; *Provided, further*, That with respect to such persons the Commission may, upon proper showing, extend the licenses of the stations involved in order, in any particular case, to determine the applicability of this regulation or to permit the orderly disposition of properties.

"Adopted this 23rd day of November, 1943."

NAB BOARD MEETING

The Board of Directors met in Washington last Wednesday and Thursday (17-18). All members were present except Directors Fetzer and Russell who were prevented by illness from attending, and Shouse, who was absent on a foreign mission.

The legislative situation was thoroughly reviewed with particular reference to the presentation being made to the Senate Interstate Commerce Committee in the hearings on the White-Wheeler Bill. It was agreed that the over-all results of the hearings thus far had been quite satisfactory and there seemed an apparent determination on the part of the members of the Senate Committee to recommend some important changes in the Communications Act.

Due to the fact that the hearings were under way each morning many of the Directors were able to attend and hear the industry's case presented by Neville Miller, Leonard Reinsch of WSB, Nathan Lord of WAVE, James W. Woodruff, Jr., of WRBL, and Don S. Elias of WWNC.

The report on NAB membership disclosed that the all time high point has been reached with 566 active and associate members. An interesting aspect of the report was the fact that there has been a net gain of 52 in membership since January 1, 1943. It was the sense of the Board that every effort should be continued by member stations to enroll those stations not yet in membership.

After a thorough discussion of radio's participation in the forthcoming Fourth War Loan campaign, the Board adopted the following resolution:

"WHEREAS the radio industry and its advertisers have provided material contributions of time and talent to previous War Loan campaigns, notable for their success, and

"WHEREAS it is the desire of the industry to devote its efforts to the Fourth War Loan campaign in the most productive manner,

"THEREFORE, BE IT RESOLVED that the National Association of Broadcasters hereby enthusiastically pledges its all-out support of the Fourth War Loan campaign and offers to the Treasury Department, in the interest of greater effectiveness, the following suggestions:

"1. Complete array of quarter-hour and five-minute programs and announcements of various lengths for local sponsorship.

"2. Portfolio describing the programs and containing samples of the announcements.

"3. Certificate signed by the Secretary of the Treasury for radio advertisers who support the Fourth War Loan.

"4. Samples of the transcribed programs to be sent to each radio station well in advance of the campaign for auditioning to local prospects.

"5. Local bond day, similar in intent to the network feature of the Third War Loan, but to take place near the end of the campaign.

"6. Appointment of a special committee of radio station farm editors to counsel with the Treasury Department on the most effective approach to the farm audience."

President Miller and Sydney Kaye, counsel in the AFM recording ban matter, reviewed the relations of the industry with the AFM and the history of the negotiations respecting the recording ban. They reported with respect to the latter that the panel appointed by the War Labor Board still had the matter under advisement and that it will be some time before a final report is made to the WLB and an ultimate decision on the subject is reached.

On recommendation of President Miller, Edward A. Allen of WLVA and Stephen R. Rintoul, WSRR, were added to the committee working upon this matter.

The matter of the Post War Planning Committee was discussed at some length. Pursuant to a prior resolution of the Board, President Miller recommended an addition to the committee of Eugene Carr, J. Leonard Reinsch, and Lewis Allen Weiss, and also the Chairman of the News and Small Market Stations Committees. Thus the full committee is now made up as follows:

Chairman, Neville Miller, NAB President; John J. Gillin, Jr., WOW; Nathan Lord, WAVE; G. Richard Shafto, WIS; William B. Way, KVOO; James W. Woodruff, Jr., WRBL; John V. L. Hogan, WQXR; J. Harold Ryan, WSPD; Edgar L. Bill, WMBD; Harold Fair, WHO; Dietrich Dirks, KTRI; George M. Burbach, KSD; William B. Quarton, WMT; Karl Koerper, KMBC; Marshall Pengra, KRNR; Eugene Carr, WGAR-WJR-KMPC; J. Leonard Reinsch, WSB, and Lewis Allen Weiss, KHJ.

Paul W. Morency, Chairman of the Retail Promotion Committee, gave a summary of the activities of that Committee with particular reference to the initial showings of "Air Force and the Retailer." This disclosed that over 100 showings have been made to date and the over-all impact has been extremely gratifying.

Mr. Morency suggested the need for careful consideration of proper follow up to secure the full benefits of the Plan and President Miller was authorized to appoint a committee of three to consider this matter and recommend ways and means to the Board of Directors.

The subject of the effect of the NAB Code provisions on controversial public issues and solicitation of membership on organized labor was discussed at some length. Mr. Miller was authorized to confer upon this subject with the proper representatives of the unions.

The Board's Finance Committee reported on the financial situation of the Association and was instructed to prepare a detailed budget for the future consideration of the Board.

The matter of District meetings and annual convention was considered and the District Directors were asked to advise of their plans for District meetings to be held in the spring and the Board indicated a tentative desire for a membership meeting to be held sometime between April 1 and May 15, 1944, at a point to be later determined.

U. S. CHAMBER BACKS CHANGE IN LAW

The following item appears in the "Washington Review," a publication of the Chamber of Commerce of the U. S., under date of November 13:

"Delimitation by Congress of Federal Communications Commission's powers over broadcasting happily is in prospect. The need for it arises from a Supreme Court decision interpreting certain very general provisions of the Communications Act as giving the Commission sweeping powers over radio stations.

"The National Chamber strongly believes that when statutory authority is given by Congress, it should be by legislation dealing substantially with the problems involved and setting forth clear and definite standards to guide administrative agencies. Regulation of radio should not invade the proper responsibilities of management, and there should be no attempt to force on the public undesired program matter. Station owners, like newspapers and magazines, should be free to select and edit their program material."

NAB ENGINEER HEADS RTPB PANEL

The Administrative Committee of the Radio Technical Planning Board met in New York on November 18. Dr. A. N. Goldsmith was elected Vice Chairman. The National Electrical Manufacturers Association was admitted as a contributing sponsor. The Committee also approved a budget to cover expenditures during 1943.

Panel 4, Standard Broadcasting, of RTPB is now in process of formation. Howard S. Frazier, NAB Director of Engineering, is the Chairman; Burgess Dempster, Manager of Engineering for the Crosley Corporation, is Vice Chairman; and J. R. Poppele, Chief Engineer of WOR, is Secretary. Membership on the Panel will consist of broadcast operation, consulting allocation, receiver design and transmitter design engineers. R. D. Cahoon of Montreal, Canada, has been designated the official observer for the Canadian Broadcasting Corporation. It is anticipated that the Federal Communications Commission will also designate an observer within the next few days.

Approximately forty engineers have been asked to accept membership on the Panel. When a sufficient number of acceptances have been received, an organizational meeting will be held for the purpose of establishing subcommittees within the Panel and assigning specific study tasks to these groups.

WMAL CASE

Royal Montgomery, hearing officer for the War Labor Board took testimony November 18 in the controversy between Station WMAL and AFRA as to whether staff announcers should receive extra compensation for all local commercials.

Joseph L. Miller, NAB Director of Labor Relations appeared for Station WMAL, to testify that extra compensation for all local commercials was not a prevalent practice in the industry.

Mr. Montgomery will make a report, with recommendations, to the War Labor Board.

PETRILLO HEARING

The protracted hearings before a War Labor Board panel on the Petrillo-Recording dispute closed Monday with final arguments by attorneys for the Union and the three companies still participating in the case.

Arthur Meyer, chairman of the panel, was reported to have said that it would take the panel from five to eight weeks to draft its report and recommendations to the War Labor Board.

Only RCA-Victor, Columbia Recording and NBC Thesarus are still participating.

PARTS SHORTAGE RELIEVED

Since the first of November a sharply increased supply of radio parts has been available to the trade by the Philco Corporation, manufacturers of radio receivers and other products.

Under the direction of C. E. Gerhard, manager, parts sales, a catalog containing 11,000 parts items was prepared and distributed throughout the United States. All items were offered for immediate delivery.

At the month's end Philco has taken stock of the situation and reports a sharp upturn in the morale of radio repairmen. Many had been convinced, apparently, that they would have to do without wanted parts for the emergency.

Included in the listings were 354 types of volume controls; 238 types of electrolytic condensers; 175 types of tubular condensers; 185 types of transformers; 159 types of output transformers and 21 types of audio transformers.

NAB PARTICIPATES IN SCHOOL BROADCAST CONFERENCE

"The Listener's Stake in American Radio," is the subject sponsored by the National Association of Broadcasters at the opening session of the School Broadcast Conference, Chicago, November 28, 29, 30.

Dorothy Lewis, NAB Coordinator of Listener Activity, will preside over this session, assisted by a panel of broadcasters consisting of Lyman Bryson, Columbia Broadcasting System, chairman; Edgar Bill, WMBD; John Gillin, WOW; Charles Myers, KOIN; William Quarton, WMT, and two Quiz Kids, providing the Quiz Kids broadcast over the Blue Network is made from Chicago.

Late advices were uncertain as to the point of broadcast. If from Chicago, James Lawrence Fly, Chairman of the Federal Communications Commission, is to be a guest on the program.

The motion picture, "America Takes to the Air," is also scheduled for this session.

The School Broadcast Conference in its seventh annual meeting will feature leading educators and broadcasters in speeches, panels and open discussions.

Col. Edward M. Kirby, A.U.S., Chief, Radio Branch, War Department, Washington, D. C., formerly NAB Director of Public Relations, will be heard at the Monday luncheon, speaking on the subject, "Radio Fights on All Fronts."

Willard D. Egolf, Washington, will also represent NAB at the Conference.

STATION MANAGERS "SIGNING UP" WITH PUBLIC RELATIONS COMMITTEE

Response to the folder, "There IS an Indepensable Man!" has brought in the signatures of more than two hundred station managers who agree to take active part in station and industry public relations.

Returns also indicate the number of stations with full time public relations executives, whose names are expected in place of station managers' where those jobs exist.

A wind-up of the campaign is needed soon, however, and station managers are requested to send in the return blank from the folder as quickly as possible.

"It will be necessary for district public relations chairmen to contact personally station managers from whom we do not hear," Edgar Bill, WMBD, chairman of the public relations committee, stated. "We hope to have very little follow-up work of this sort, as it will take time from the real job ahead. The folder is self-explanatory and the return blank gives opportunity for clear response."

EGOLF PRESENTS A. F. A. CHARTER TO WOMEN'S ADVERTISING CLUB OF WASHINGTON

"In the field of organization activities I must say that women are more social, more responsive than men," said Willard D. Egolf, NAB assistant to the President and Vice-President of the Advertising Federation of America, in presenting the A.F.L. charter to the Women's Advertising Club of Washington recently.

"Perhaps nature imbued them with a greater feeling of interdependence, nevertheless they are jewels in the crown of organized advertising, always willing to take on responsibilities, head committees and work for the success of any project. My experience as president of an advertising club with men and women members taught me to rely on the women considerably. In the work of the Federation I have found them exceptionally faithful and appreciative of the problems which confront advertising as a part of the national economy. The Women's Advertising Club of Washington provides the latest and most forceful example in that, almost simultaneously with its organization, plans were laid for affiliation with the Advertising Federation of America."

The presentation ceremony was held in a Washington hotel from which station WINX originated a twenty-five minute broadcast.

DUNCAN REPLACES BUCKENDAHL AS 17TH DISTRICT P. R. CHAIRMAN

Chet Duncan, Director of Public Relations for KALE, has replaced Harry H. Buckendahl, of same station, as public relations chairman for NAB District Seventeen.

NATIONAL WAR FUND THANKS RADIO

The following communication signed by Prescott S. Bush, National Campaign Chairman of the National War Fund, has been received by President Miller:

"On behalf of the National War Fund, I want to take this opportunity of expressing our deep appreciation to the radio stations and networks for the extraordinary cooperation accorded to our 1943 campaign. Without a single exception the local stations vied with the chains in giving all out in publicizing our aims and needs.

"The special bulletin devoted to the Fund which you distributed to the stations was most informative and helpful. And, the active support and interest of the Radio Committee you headed contributed to the success of the radio effort."

MILLER HEADS PARALYSIS CAMPAIGN RADIO DIVISION

Neville Miller, NAB President, has been advised by Basil O'Connor, President of the National Foundation for Infantile Paralysis, the organization which sponsors the celebration of the President's birthday, of his appointment as chairman of the National Radio Division. This is the post which Mr. Miller held in the last campaign and he has accepted the assigned. Very shortly complete information regarding the campaign will be sent to all stations.

FCC STAFF CHANGES

Ervin James, assistant to Commissioner Clifford J. Durr, has been appointed assistant secretary of the FCC. Mr. James is a graduate of George Washington Law School and a member of the District of Columbia and Alabama Bars. He has been with the Commission since December, 1941. From November, 1939 to December, 1941, he was on the staff of the Administrative Management Section of the Department of Commerce. From September, 1934 to November, 1939 he was office manager in the employment division of the Federal Work Projects Administration in Washington. Mr. James was born in Montgomery, Alabama, is married and lives in Alexandria, Virginia.

Nathan H. David, an Assistant General Counsel of the FCC, who recently volunteered for induction, expects to report for duty with the U. S. Navy Saturday, November 27.

Mr. David, who is 30 years old, is married, has two children, and lives at 4737 36th Street, N.W. He is a native of Cambridge, Mass.

HARMAN OVERSEAS WITH MARINES

USMC Sgt. James M. Harman, Sr., former program director, (1941) WGOV, Valdosta, Ga., has gone overseas with the 25th Replacement Battalion. His address is:

James M. Harman, Sr., Sgt. USMC,
25th Replacement Battalion,
c/o Fleet Post Office,
San Francisco, Cal.

FUTURE OF TELEVISION DISCUSSED

A significant and important meeting to all those engaged in the radio industry was held early in November in New York. It was under the auspices of the American Television Society and the Advertising Club of New York. In opening the meeting Norman Waters, President of ATS, pointed out that the idea of the joint meeting of the Advertising Club of New York and the ATS in calling the meeting had been to afford an opportunity to discuss the future of television as an advertising medium. He said that television broadcasting would depend for its establishment and development upon the success which it might achieve in securing sponsors.

He pointed out that many agencies are now working upon the technical phases of the problem but said, "Advertisers and advertising agencies will wield as great an influence in television programming as they have in radio broadcasting. That is why it is high time for them to realize their responsibilities, if they are to share in the golden opportunities that lie ahead in commercial television. Television needs them, and it is only right for them to take a leading part in program experimentation, at this early stage."

Mr. Waters then introduced R. L. Gibson, assistant to the manager of General Electric's broadcasting and publicity division, who spoke as follows:

"During four years of broadcasting experience at WRGB, the General Electric television station in Schenectady, our regular checks on program popularity indicate a strong preference for program where seeing is more of a factor than hearing," he said. "Our audiences clearly favor boxing and other sports events, plays and light opera, news commentators making use of war maps and similar programs involving action."

Among other types of programs favored by the Schenectady-Albany-Troy area audience served by WRGB Mr. Gibson named newsreels, puppets, quiz shows and educational presentations. One day last week, he pointed out, the G-E motion picture section took files in the afternoon, dubbed in a commentary, and presented the completed reel on the television program that night. Because puppeteers can read their lines, as in radio, and because puppets show up well, this type of program, he indicated, rates high. Quiz programs in which members of the studio audience are required to answer with some action along with words have proved popular. As an example of an educational program, he cited sewing demonstrations sponsored by McCALLS MAGAZINE.

"Children are likely to be a bigger factor in television programs than in radio," he added. "Children of all ages love it, will look at anything, and in many homes can tune the sets better than grown-ups."

Mr. Gibson mentioned television's first net-work, the relay station in the Helderberg mountains near Albany which links WRGB with NBC in New York, and said that it proved networks are not only practical but highly desirable program-wise. Thus sporting events in Madison Square Garden, the eclipse of the sun seen from the top of the Empire State building and other events have been brought to the up-state audience. Where mobile units are not available, he added, such sports as boxing can be staged in the studio, as at WRGB, and future television studios may be built as sports arenas.

"Television networks are highly desirable because television programming costs are higher than radio and must be spread over the largest possible audience," he said. "Expensive studio programs may be repeated. New shows may not be put on the air on every program any more than is now being done in a motion picture house.

"Humor may have a large place in programs and commercials; sight can help sound in creating humorous situations. The absence of mob psychology in small home audiences may call for a different kind of humor than is now found on the stage and in motion pictures.

As for advertising potentialities, agencies and advertisers who know the potentialities, and the limitations, will probably obtain preferred times over those who know little about the new medium and merely seek to "make over" radio shows, Mr. Gibson said.

"In organizing the program staff at WRGB, we deliberately tried to bring together men with different training—motion pictures, radio, music, the stage—in order to have a balanced staff," he said. "We consider WRGB a laboratory engaged in learning all we can about the operation of a television station, both technically and in programming, and we hope that our experience will be helpful to the industry."

The remarks of the next speaker, Mr. Thomas H. Hutchinson, Supervisor of Television for Ruthrauff & Ryan, follow:

"The other day a representative of one of the advertising publications in New York, called me on the telephone regarding our future plans on experimental television programs. I outlined briefly to him how I felt on the subject and he remarked "so you really are one of those people who believe that television has a future," and I am here this evening in that same state of mind.

"It seems to me that during the last two years too many of us have lost sight of the fact that television is really here right now, not as we would like to have it perhaps, but in a way that can't be ignored.

"It is perfectly true that up to this time advertisers in general have done very little about television, but if we stop for a moment and realize the potential possibilities of this new medium we can't help but be impressed with what it can do and what we as advertisers must do in the very near future if we are going to hold the position in television that the advertising industry now holds in radio. My feeling is that the majority of advertising agencies fail to realize what they are going to be called upon to do to make television programs what they must be if we are to handle the accounts of manufacturers in a way that will make the public accept advertising over this new medium.

"In July of 1941, there were approximately five thousand television sets in the hands of the public in the New York Metropolitan area. On that date a commercial television schedule went into effect with a minmum of fifteen hours program per week per station.

"This program schedule was required by the FCC to enable a station to hold a television license. Television licenses were then and still are very much at a premium and this rule meant that to protect a channel that was assigned to a television station, that station must deliver to the viewing public fifteen hours of television a week.

"On our entry into the war the FCC dropped the broadcast requirements of each station to a minimum of four hours a week, and that is the program requirement of a commercial television station as of today. In New York, the National Broadcasting Company and the Columbia Broadcasting System, both have been assigned commercial television channels. Du Mont Television Laboratories has been assigned an experimental channel and several other groups in the Metropolitan area have applied for licenses. Because of the war nothing has been done with those applications as it is impossible to secure material to start construction. But, this means that at the present time over NBC, Columbia and Du Mont, there are television programs every night in the week except Saturday. NBC broadcasts four hours of television on Monday, Du Mont an hour on Tuesday, and an hour and a half on Wednesday. CBS broadcasts two hours on Thursdays and Friday nights, and Du Mont does an hour and a half on Sunday. The four hours that are being presented by CBS are composed entirely of film. NBS's programs are for the most part film, although they have recently installed a camera in Madison Square Garden and are planning to present programs from Madison Square two or three evenings a month. At the moment, Du Mont is the only station where studio programs are being presented.

"Of the original five thousand television receivers that were sold, probably somewhere in the neighborhood of twenty-five hundred are in operation today and if the potential television advertiser realizes it this fact instead of being a detriment is a very great asset.

"I don't think that any of us realize what we are going to have to do in program experimentation before we find out what the final formula of a successful commercial television program is going to be. Naturally, no advertiser can expect to sell products by means of television to the small audience that exists at this time. But this small audience should prove invaluable if we use it as a guide to try to find out what we are going to have to accomplish. In July of 1936, the first experimental television program using the present electronics system was broadcast by the National Broadcasting Company. Television program experimentation was carried on for four years and during that period over two hundred hours of television programs were broadcast. They consisted of everything that might serve as test programs and in the main those experiments were highly successful. We found that a television audience would sit home and give their undivided attention to television programs from somewhere in the neighborhood of from two to three hours a day. And it was only natural that out of all those hours of programs several basic types were found that met with over all audience approval. Those of you who have followed the progress of television in the U. S. know that all the sporting programs are very good television material. Dramatic programs produced in the studio were highly successful. Personalities when properly presented were more than acceptably received. Musical comedy proved that it has a value in television that it has never reached in radio. The opera took on new meaning, for with the camera directly in front of a great singer, it gave one a close-up picture of an operatic performance that they had never seen on the stage of the theatre.

"But out of all the hours of experimental programs that were put on the air to date, the number of hours that have been devoted to commercial television have been so small that virtually nothing has been accomplished.

"Nobody knows how we should present the sales picture over this new medium, and if advertisers are going to take their rightful place in this new medium, they can't begin to find out what they are going to be up against too soon. So far my experience has been that potential television advertisers who see the programs that are being broadcast today criticize them unmercifully which is quite understandable in view of the fact that practically no money at all is going into television programs. Many of these same critics see the tremendous possibilities that this new medium opens up, but they fail to take into consideration the problems that must be faced by anyone who attempts to produce a first class television program. As you all know on a radio program you must have an engineer and a director in the studio and many successful radio programs are being produced with only these two men, but the minute you attempt to produce a television program the entire picture changes. Instead of one engineer, it is necessary to have somewhere in the neighborhood of fifteen men in the studio, and with the television equipment we have now and will probably have with us for many years to come, there is no way of cutting down on the personnel that is going to be necessary to produce a television program. In the Control room you must have your sound engineer—a picture engineer and some sort of an electronics supervisor to coordinate the output of the studio from an electronic point of view. In the studio you must have a man on each camera, a man on the sound pickup, a man on dollies to move the camera, stage hands, scenic artists, makeup men, video effects man. Aside from all these men who serve in an operational capacity you must have a director and one or two assistants. Every successful television program requires that all the men in the control room and the studio plus the actors, singers, and musicians must know exactly what the other fellow is going to do and when he is going to do it.

"Any man who has an active part in the production of a television broadcast can mar that broadcast irreparably. Actors must be at the right place at the right time. The camera must be in the correct position, and the switches from one camera to another must be made at a precise moment to get the utmost in picture value out of any given scene. There are no retakes in television. All of us know that approximately three times as many feet of film are exposed in making the average motion picture as are ever used. This means that after fifteen years experience in the production of sound movies they still have a three to one percentage of loss. Television has to eliminate this loss right at the jump. A television director has no three to one margin of error. Every mistake that he makes or that is made by any actor or member of the studio crew, is broadcast to the television audience, and when we have a television audience that justifies the expenditures that must be made to successfully produce a big television program, those mistakes just cannot be made, and they can only be avoided through experience. All of us realize that the war is going to be over some day. No one knows exactly when, but whether the end of the war comes in one, two or three years, there is still so much to be done in the way of commercial television program experimentation that many of us will probably not know all the answers to the problems that we are going to be faced with if we start experiments right now. There are many products that are going to be television naturals. I can see how we might very easily visualize the sales appeal of a pair of stockings, but I am very much at a loss to know how we should glamourize a whole host of useful articles. If we want to put across a sales message for tooth paste for instance, is our only problem going to be simply to show someone brushing their teeth? Can we put across a visual sales message by doing that week after week?

"In the few experiments that I have seen, I am convinced that radio sales copy is not going to be successful over television. It has been said many times that one picture is worth a thousand words. I don't think anyone will argue that point. But what is the picture that we are going to show week after week that replaces the thousands of words that we have been using on radio. And the only way we are going to know is to experiment with television commercials until we find the answer. It is quite possible that the delays that have beset television in the United States may prove a blessing in disguise for American advertisers, if we take advantage of the present situation to find out what we are going to have to eventually present. With our present small television audience we can make the mistakes now that we are bound to make without paying through the nose for them. Here we have a small television audience that has seen four years of television programs, that knows what it likes, and is in a very critical mood. Right now is the time for advertisers to take advantage of that situation and find out what they are going to have to do to use this new medium in a way that will dwarf anything that has ever been accomplished in radio. The medium can do it—if we use it correctly. The job is up to us and the longer we wait the costlier our experience is going to be."

Still another aspect of the possible post war commercial use of television was discussed by Thomas F. Joyce, Manager of Radio, Phonograph and Television Department, RCA Victor Division of Radio Corporation of America, in his address. "The Development of the Television Market in the Postwar Period". His remarks follows:

"First, I would like to express a word of appreciation for the great contribution which has been made to the cause of television by Norman D. Waters, President of the American Television Society. The past two years have been discouraging years for the ardent friends of television. But not for Norman Waters. He has continued to work for, and in the interest of, commercial television —even when the outlook was the darkest. The American Television Society, of which Norman Waters has been the moving spirit, has been instrumental in keeping television in the public eye. The regular meetings of the Society have served as a rallying point for those men and women in the New York area who have a keen personal interest in the future of this great art and industry.

"This meeting, tonight, brings together the members of the American Television Society and the Advertising Club of New York. These two organizations both have a vital interest in television and both will play important roles in its future development. The fact that the members of the Advertising Club of New York are meeting here tonight to listen to discussions on the future of television by representatives of two great advertising agencies and by representatives of television equipment manufacturers and television broadcasters, is in itself sufficient reason to put the spotlight on one new industry which holds great possibilities for postwar expansion.

"Others, tonight, have discussed the power of television as an advertising medium. It will be my purpose to try to outline what I consider will be the probable rate of market development for television.

"Television broadcasting, obviously, cannot become a substantial, self-supporting, profitable advertising medium until television receivers are in hundreds of thousands—yes, millions of homes. There are many different views concerning the speed with which television will go forward after the war. The technical and economic problems of building stations in key cities, of interconnecting those stations by network facilities, and of making available audience-building television programs are problems that constitute a real challenge to the engineering, manufacturing, business management. entertainment, and advertising brains of the United States.

"There are some who say that the problems are so vast that they are virtually insoluble. There are others who are more optimistic—and look forward to the day when television broadcasting programs will be as common in the home as radio broadcasting programs are today. It is the views of the latter group that I present tonight.

"To make television a nation-wide broadcasting service will involve the investment of millions of dollars in studios and transmitters to be located in the key cities of the United States; and more millions of dollars for the building of network facilities and the production of suitable television advertising programs. Television cannot succeed without these services—but the answers to these problems would rapidly develop if the biggest problem of all were solved—namely, *an acceptable low-cost radio television receiver*. This is the number one problem of the postwar television industry.

"Given a good low-cost television receiver that is within the buying range of the average American home, then broadcasting facilities and program service will develop with a speed which will amaze even the most ardent friends of television.

"Why do I say this?

Because:

"1. Existing radio station owners are smart enough to know that if acceptable television receivers can be produced for the mass market, television audiences will build at a rapid rate. This means that the operators of a television station will not have to wait an indeterminate number of years before they have television audiences large enough to produce substantial advertising revenue with which to pay operating costs and show some profit.

"2. The application for television licenses by 100 or more prospective operators across the United States, which I believe the advent of an acceptable low-cost television receiver would bring forth, would have a salutary effect on the price of television transmitters and studio equipment. It would mean that manufacturers—instead of building one, two or three transmitters at a time—would build, possibly, 20 to 25 at one time. The lower prices made possible by this semi-quantity production as compared with the cost of tailor-made equipment would encourage still more enterprising businessmen to go into the television broadcasting business. Lest you think that this estimate of 100 or more television transmitters is over-optimistic, may I call your attention to the fact that the number of television broadcasting stations in existence, plus the applications on file with the Commission for experimental and commercial television broadcasting permits, total about 50.

"3. The business interests erecting television transmitters in the key cities of the United States, would create a tremendous pressure for the development of network facilities. Again, some enterprising organization will see that the combination of the rapid development of television facilities in a number of key cities of the United States, and a mass market price for the television receivers, would in the course of two or three years create an economic foundation for the profitable operation of network facilities, thus firmly establishing chain network television. These network facilities will also be available for frequency modulation programs and facsimile.

"4. The big national advertisers would recognize that the existence of low-price television receivers would assure the rapid development of a vast home television audience. Future television advertisers will want to get in on the ground floor with television programs. The programs put on by these sponsors will be good programs—even though in the first two or three years the cost of television advertising per unit of circulation may be greater than advertising in already established advertising media. These marketing leaders know that television will be not only the greatest advertising force in the world—but the greatest sales force as well. For the first time, it will be possible for the manufacturer or distributor of merchandise actually to demonstrate his product or products in millions of homes simultaneously and at extremely low cost. That is more than effective advertising. That is effective selling.

"Is there any foundation for believing that this is the way that television is going to develop in the postwar period? I believe that there is.

"Recently, we made a survey in 11 cities of a cross-section of the public by age, income and sex. Among the questions we asked were:

"Would you or your family consider buying a radio and television receiver if the price were $400.00?
10.3% answered 'yes.'
"To those who said 'No,' we asked:
"Well, would you buy if the price were $300.00?"
"The cumulative percentage became 19.9%.
"To those who still said 'No,' we asked:
"Well, would you buy if the price were $250.00?"
"The cumulative percentage became 34.3%.
"To those who still said 'No,' we asked:
"Well, would you buy if the price were $200.00?"
"The cumulative percentage became 61.3%.

"From the foregoing, the conclusion seems inescapable that when, in the postwar period, the radio industry produces *a good television receiver in the $200-price range*, a very high percentage of the homes of the United States will be ready to buy television receivers as soon as service is available to them. Such a receiver, I believe, is possible —based on 1940 labor and material costs, and assuming no excise taxes. Of course, the postwar price would be increased by the factors of inflation and excise taxes.

"We have prepared some estimates of the probable postwar rate of market development for television once there has been a complete agreement on standards approved by FCC which would give the industry the 'green light' without any 'ifs.' It has been assumed for estimating purposes that there will be no charges in the standards or in the place which television occupies in the broadcasting spectrum, which might substantially delay the start of television or bring about more complicated engineering and manufacturing—thus making improbable, at least in the immediate postwar period, a $200.00 television receiver as previously described.

"I have followed with interest all of the statements by the Chairman of the Federal Communications Commission, James Lawrence Fly, on postwar television. I believe that I am correct in interpreting his thinking as being in favor of the rapid postwar development of television. Mr. Fly, who has given careful thought and study to television has been quoted in the public press as saying at the joint meeting of I.R.E. and R.M.A. in Rochester, New York, in the fall of 1942 as follows:

> 'We can confidently predict a great expansion of the television and frequency modulation broadcast and general communications services, and planning for their proper development is definitely in order.'

The report in RADIO AND TELEVISION WEEKLY, of October 6, 1943 on a talk given by Chairman Fly before the Advertising Club of Boston is as follows:

> Largely because of the development of television and frequency modulation, the radio industry 'will not be a postwar problem child that we shall have to worry over.' The industry will take up 'no small amount' of the unemployment slack after the war, he forecast.

"The estimated postwar television market projections that follow are based on television as we know it today and assuming that it can go forward without undue delay in the postwar period:

"Television broadcasting facilities exist in New York, Philadelphia, Albany-Schenectady, Chicago and Los Angeles. I believe that a television station in Cincinnati could begin broadcasting shortly after the war when the needed equipment to complete this station is made available.

"The foregoing cities, assuming no radical change in broadcasting standards or allocations, would logically be the first television market. This first television market has 25,907,600 people, 7,410,922 wired homes and 28.46% of the U. S. buying power. Television coverage of only 10% of these homes would in itself constitute a very important new advertising medium, particularly when one considers that the effectiveness of television advertising per unit of circulation will undoubtedly be many times greater than that of any other form of advertising. Ten per cent would represent 741,000 homes with television, or a probable postwar audience of over 7,000,000 people. In my opinion this could be attained approximately two to three years after the full commercialization of television. Three of these markets, New York, Philadelphia and Albany-Schenectady, have already broadcast television programs originating at a central source—that is, NBC, New York. Thus, the nucleus of television network operation has already begun.

"We can assume further that within three or four years after the commercial resumption of television, Washington, D. C.; Baltimore, Maryland; Hartford, Connecticut; Providence, Rhode Island, and Boston, Massachusetts, will have television transmitters. These cities, together with Philadelphia, New York, Schenectady and Albany, could be interconnected with a television network circuit about 600 miles long. This network circuit would make television broadcasting service available to 33,336,000 people, 9,379,039 wired homes, representing 36.62% of the total U. S. buying power.

"An additional 1,300 miles of network circuits could link the Middle West with the Atlantic Seaboard, bringing television service to Pittsburgh, Cleveland, Cincinnati, Detroit, Chicago, St. Louis and Milwaukee. This would make television broadcasting service available to an additional 10,725,400 people living in these key cities—bring the total market served by about 2,100 miles of network facilities to 44,061,500 people and 47% of the U. S. purchasing power.

"The trunk line television network just outlined, with the secondary networks that would be offshoots from it, would serve the 19 state-area bounded by Illinois and Wisconsin on the west and Virginia and Kentucky on the south. There are approximately 70,000,000 people in this area. It represents approximately 62% of the purchasing power of the country. All of this development can be expected to take place approximately five years after the full commercialization of television.

"In approximately five years after the commercial resumption of television, television transmitters located in 157 key cities of the United States should be making television program service available to a primary market consisting of 72,159,000 people, 17,252,000 wired homes, or 59.6% of the total and 61.5% of the United States purchasing power. An additional ten million people should have television available to them by secondary television network developments. When television service is available to this area, television receiver sales should be at the rate of approximately 2,500,000 units per year at an average retail price, *based on 1940 costs*, of about $200.00.

"It would also be reasonable to expect that by the end of the fifth year, after the full commercialization of television, the engineers of the industry should be able to develop a low cost automatic rebroadcasting television transmitter which could be located in the areas which are outside the broadcasting scope of the television transmitters located in the 157 key cities of the United States. This transmitter would be automatically turned on at the beginning of the network broadcasting day and automatically turned off when the program service for the day was completed. Once a month, or as often as required, a service engineer would visit such an automatic rebroadcasting transmitter to keep it in peak operating condition.

"Such a development will make it economically feasible to bring television service ultimately to practically every home in the United States. Assuming such a development takes place, and we have every reason to be confident that it will, then it would not be unreasonable to assume that within ten years after the full commercialization of television, television service would be available to 23,700,000 wired homes or 80% of the wired homes of the United States. This would represent a population of about 100,000,000 people and approximately 82% of the total U. S. buying power. Television industry sales at this point should be, approximately, 3,500,000 units per year for a total retail billing of between six hundred million and seven hundred million dollars ($600,000,000 and $700,000,000). This billing together with replacement tubes for existing receivers, service, transmitter sales, television advertising revenue, etc., will make television the billion dollar industry that many have prophesied it will be.

"There have been many predictions concerning all of the great new things which will be available to the American public when the war is over. Television will not spring forward as an industry the day the fighting ceases. It may be a year, or two or three years, after the war before television is ready to go forward on a commercial basis. That depends upon the character of the recommendations made by the Radio Technical Planning Board and the action taken by the Federal Communications Commission on the recommendations by that Board. Of this, though, we can be certain—that the generations that come after the war will take home television service just as much for granted as the present generation takes for granted the radio set which, at the push of a button, makes available the finest entertainment and educational programs of the United States and, instantaneously, brings us voices and music from across the seven seas. Today, we only hear those programs. Tomorrow, we will see them as well as hear them.

"That is the promise of television."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 29th. They are subject to change.

Monday, November 29

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license, **920 kc.**, 1 KW night, 5 KW day, unlimited.

Wednesday, December 1

KDRO—Albert S. and Robert A. Drohlich, d/b as Drohlich Brothers (Assignor), Milton J. Hinlein (Assignee), Sedalia, Mo.—Voluntary assignment of license, **1490 kc.**, unlimited.

APPLICATIONS GRANTED

WKST—Joseph Thomas (Transferor), Wanda E. Townsend (Transferee), WKST, Inc. (Licensee), New Castle, Pa.—Granted consent to acquisition of control by Wanda E. Townsend and S. W. Townsend, of WKST, Inc., licensee of Station WKST, through the transfer of 80 shares (36%) of stock from Joseph Thomas to Wanda E. Townsend, for a total consideration of $8,300 (B2-TC-341).

KGNF—Great Plains Broadcasting Co. (A Corporation) (Assignor), Radio Station WOW, Inc. (Assignee), North Platte, Nebr.—Granted consent to voluntary assignment of license to Radio Station KGNF, from Great Plains Broadcasting Co. to Radio Station WOW, Inc., for a consideration of $40,000 (B4-AL-386).

KGNF—Radio Station WOW, Inc., North Platte, Nebr.—Granted construction permit to make changes in transmitting equipment, change frequency from **1460** to **1240 kc.**, change power from 1 KW daytime to 250 watts unlimited time (B4-P-3549).

WAGE—Sentinel Broadcasting Corp. (Assignor), WAGE, Inc. (Assignee), Syracuse, N. Y.—Granted consent to voluntary assignment of license of Station WAGE from Sentinel Broadcasting Corp. to WAGE, Inc., a newly formed corporation (B1-AL-389).

WINS—Hearst Radio, Inc., New York, N. Y.—Granted modification of construction permit (B1-P-3512, as modified) for change of frequency from **1000** to **1010 kc.**, make changes in directional antenna system, and extend commencement and completion dates; grant is conditional on the satisfactory adjustment of all legitimate blanketing and cross modulation complaints (B1-MP-1729).

KOIN—KOIN, Inc., Portland, Ore.—Granted special service authorization to operate transmitter of Station KALE as a special auxiliary transmitter during the period from 12 midnight to 6 a. m., PST, for the duration of the war or so long as KOIN is classified as a key station, but in no event beyond the period of license.

Charles P. Blackley, Staunton, Va.—Granted petition to reinstate application for new station to operate on **1240 kc.**, 250 watts, unlimited, and designated said application for joint hearing with applications of WCHV and WFVA listed above (Docket No. 6215).

DESIGNATED FOR HEARING

WCHV—Charles Barham, Jr. and Emmalou Barham, d/b as Barham & Barham, Charlottesville, Va.—Designated for hearing application for modification of license to change frequency from **1450** to **1240 kc.**, to be heard with applications of WFVA and Charles P. Blackley (see following two items) (B2-ML-1162).

WFVA—Fredericksburg Broadcasting Corp., Fredericksburg, Va.—Designated for hearing application for modification of license to change frequency from **1290** to **1240 kc.**, and change hours of operation from daytime to unlimited except on Sunday when WBBL, Richmond, Va., operates; to be heard with applications of WCHV (listed above) and Charles P. Blackley (listed below) (B2-ML-1169).

LICENSE RENEWALS

Granted following applications for renewal of relay broadcast station licenses for the period beginning December 1, 1943, and ending not later than December 1, 1945:

WEGA, WEGB, WEGC, Agricultural Broadcasting Co.; KEGA, Earle C. Anthony, Inc.; KEGE, A. H. Belo Corp.; KEGH, KEGI, Carter Publications, Inc.; WBIN, WEGT, Central New York Broadcasting Corp.; WEKT, City of St. Petersburg, Fla.; KEGJ, KEGK, KRCO, WALO, WALP, WEHG, WEHH, WEHI, WEHJ, WEHK, Columbia Broadcasting System, Inc.; WLWC, WLWD, WLWE, WLWF, WLWG, WLWH, WLWI, The Crosley Corp.; KEGR, Fisher's Blend Station, Inc.; WEHP, WEHQ, The Fort Industry Company; WEIA, WEIB, WEIC, WOEI, WOEJ, General Electric Company; WJRL, James Broadcasting Co., Inc.; KEIF, KEIG, KGKO Broadcasting Co.; WEIX, Memphis Publishing Co.; KEJD, KEJE, National Broadcasting Co., Inc.; KEIY, KEIZ, Oregonian Publishing Co.; KEGY, Southwestern Sales Corp.; WEDK, WEKV, WEKW, The Travelers Broadcasting Service Corp.; KEHP, Airfan Radio Corp., Ltd.; KAOU, Arizona Broadcasting Co., Inc.; WEPA, Edwin H. Armstrong; KEHA, The Associated Broadcasters, Inc.; WEGP, Berks Broadcasting Co.; KFBR, KFBT, Frontier Broadcasting Co.; WEID, Harrisburg Broadcasting Co.; WEIE, Havens & Martin, Inc.; KEHT, The KANS Broadcasting Co.; KEGD, KRIC, Inc.; KSEH, KSTP, Inc.; KEJJ, KEJQ, WEJF, WEJG, WEJP, WEJQ, WNEQ, National Broadcasting Co., Inc.; WEOF, WNRB, The National Life and Accident Insurance Co.; KEJM, Perkins Brothers Co.; KEJO, The Pulitzer Publishing Co.; WEHZ, WEKL, WEKM, Reading Broadcasting Co.; KEHF, Tri-State Broadcasting Co., Inc.; WELB, WELC, WAVE, Inc.; WELK, WCBS, Inc.; KEHI, WEOE, WDAY, Inc.; WELQ, WDZ Broadcasting Co.; WAHA, WEGR, WEMA, WEMB, WEMN, WEMO, WEMQ, WEMS, WEMT, WKWR, Westinghouse Radio Stations, Inc.; WELV, West Virginia Broadcasting Corp.; WELW, WELX, WFIL Broadcasting Co.; KEHL, WKY Radiophone Company.

KBKR, Baker, Ore.; KNEL, Brady, Tex.; KOVC, Valley City, N. D.; KRNR, Roseburg, Ore.; KSAM, near Huntsville, Tex.; KWEW, Hobbs, New Mexico; WDBC, Escanaba, Mich.; WIGM, near Medford, Wisc.; WKBZ, Muskegon, Mich.; WKRO, Cairo, Ill.; WMIS, Natchez, Miss.; WMRN, Marion, Ohio; WNLC, New London, Conn.; WOLF, Syracuse, N. Y.; WOPI, Bristol, Tenn.; WOSH, Oshkosh, Wisc.; WRGA, Rome, Ga.; WTMV, East St. Louis, Ill.; KTOH, Lihue, Hawaii; WBTA, Batavia, N. Y.; WKBV, Richmond, Ind.; WMOG, Brunswich, Ga.; KBIX, Muskogee, Okla.; KBST, Big Spring, Tex.; KPLT, Paris, Tex.; KPQ, Wenatchee, Wash.; KVWC, Vernon, Tex.; WKBB, Dubuque, Iowa; WTMC, Ocala, Fla.

Granted extension of following station licenses upon a temporary basis only, pending determination upon application for renewal of license, in no event later than February 1, 1944:

KBUR, Burlington, Iowa; KDB, Santa Barbara, Calif.; KDRO, Sedalia, Mo.; KEYS, Corpus Christi, Tex.; KFFA, Helena, Ark.; KGKB, Tyler, Tex.; KOTN, Pine Bluff, Ark.; KXO, Centro, Calif.; WBAB, Atlantic City, N. J.; WDAN, Danville, Ill.; WERC, Erie, Pa.; WGTC, Greenville, N. C.; WHBB, Selma, Ala.; WKNY, Kingston, N. Y.; WMJM, Cordele, Ga.; WSAP, Portsmouth, Va.

KBPS, Portland, Ore.; KSAN, San Francisco, Calif.; KWAL, Wallace, Idaho; WABI, Bangor, Maine; WAOV, Vincennes, Ind.; WATL, Atlanta, Ga.; WAZL, Hazleton, Pa.; WELL, Battle Creek, Mich.; WGPC, Albany, Ga.; WIBM, Jackson, Mich.; WILM, Wilmington, Dela.; WING, Dayton, Ohio; WKEU, Griffin, Ga.; WMAS, Springfield, Mass.; WPAD, Paducah, Ky.; WTEL, Philadelphia, Pa.; WWDC and synchronous amplifier, Washington, D. C.

W2XWE—WOKO, Inc., Albany, N. Y.—Granted further extension of license upon a temporary basis, pending determination upon application for renewal of license, in no event later than February 1, 1944 (B1-SFB-18).

MISCELLANEOUS

National Broadcasting Co., Inc., Hollywood, Calif.—Granted construction permit for new relay broadcast station (B5-PRY-293).

National Broadcasting Co., Inc., Portable mobile (area of Chicago, Ill.).—Granted construction permit for new relay broadcast station (B4-PRY-294).

W8XCT—The Crosley Corp., Cincinnati, Ohio.—Granted modification of construction permit, as modified, which authorized new experimental television station, for extension of completion date only from October 28, 1943, to April 28, 1944 (B2-MPVB-105).

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Adopted an order granting petition to dismiss without prejudice application for modification of license to move main studio from San Jose to San Francisco, Calif. (Docket No. 6552).

KVOE—The Voice of Orange Empire, Inc., Santa Ana, Calif.—Scheduled for oral argument on December 15, 1943, the matter in the proceeding in Docket No. 6421 for construction permit to change operating assignment (B-194).

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted modification of construction permit which authorized increase in power, installation of new transmitter, and changes in equipment and antenna, for extension of completion date from November 11 to December 11, 1943 (B-MP-1730).

KLUF—The KLUF Broadcasting Co., Galveston, Texas.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1564).

WAHJ—The Champaign News-Gazette, Inc., area of Champaign, Ill.—Canceled relay broadcast station license in accordance with written request of licensee (B4-PRY-98).

The Commission placed in pending file the following applications for construction permits for new commercial television broadcast stations, in accordance with Commission policy adopted February 23, 1943:

Don Lee Broadcasting System, San Francisco, Calif. (B5-PCT-22); National Broadcasting Co., Inc., Philadelphia, Pa. (B2-PCT-20).

The Commission placed in pending file the following applications for construction permits for new high frequency (FM) broadcast stations, in accordance with Commission policy adopted February 23, 1943:

North Jersey Broadcasting Co., Inc., Paterson, N. J. (B1-PH-145); Matheson Radio Co., Inc., Boston, Mass. (B1-PH-142); Ashbacker Radio Corp., Muskegon, Mich. (B2-PH-143); Durham Radio Corp., Durham, N. C. (B3-PH-144).

WJNO—WJNO, Inc., West Palm Beach, Fla.—Granted motion to dismiss without prejudice application for construction permit to operate on **1230 kc.**, 250 watts, for emergency purposes only. (Docket No. 6478)

KTHS—Radio Broadcasting, Inc., Hot Springs, Ark.—Granted motion to dismiss without prejudice application for construction permit to operate on **1090 kc.**, 50 KW, unlimited, directional antenna night. (Docket No. 6556)

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Granted motion for leave to withdraw modification of construction permit to operate on **1240 kc.**, 250 watts, unlimited. (Docket No. 6488)

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, Co-partners, d/b as Red Lands Broadcasting Assn., Lufkin, Tex.—Granted motion for extension of time to file proposed findings in Docket 6491; time extended to December 14, 1943.

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker (assignor), Darrell E. Yates (assignee), Lufkin, Tex.—Granted motion for extension of time to file proposed findings in Docket 6492; time extended to December 14, 1943.

KOBH—Black Hills Broadcast Co. of Rapid City, S. Dak.—Referred to full Commission motion to reconsider and permit amendment of application for construction permit to operate on **610 kc.**, 5 KW, directional antenna night, unlimited. (Docket No. 6430)

WGST—Georgia School of Technology, Atlanta, Ga.—Adopted order denying petition requesting grant without hearing of application for renewal of license. (Chairman Fly and Commissioner Craven dissenting.) A hearing on this application is scheduled for November 29.

APPLICATIONS FILED AT FCC

790 Kilocycles

KVOS—KVOS, Inc., Bellingham, Wash.—License to cover construction permit (B5-P-3237 as modified), which authorized change in frequency from **1230 kc.** to **790 kc.**

KVOS—KVOS, Inc., Bellingham, Wash.—Authority to determine operating power by direct measurement of antenna power.

850 Kilocycles

WJW—WJW, Inc., Cleveland, Ohio.—License to cover construction permit (B2-P-3263 as modified), which authorized change in frequency, increase in power, move of station and installation of new transmitter and directional antenna.

WJW—WJW, Inc., Cleveland, Ohio.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

KGY—KGY, Inc., Olympia, Wash.—License to cover construction permit (B5-P-3548) which authorized increase in power and changes in transmitting equipment.

KGY—KGY, Inc., Olympia, Wash.—Authority to determine operating power by direct measurement of antenna power.

1340 Kilocycles

WTAL—Capital City Broadcasting Corp., Tallahassee, Fla.—Modification of license to increase power from 100 watts night, 250 watts daytime to 250 watts day and night.

KGEZ—Donald C. Treloar, Kalispell, Mont.—Voluntary assignment of license from Donald C. Treloar to A. W. Talbot.

1450 Kilocycles

NEW—Robin Weaver, Sr., Clarksdale, Miss.—Construction permit for a new standard broadcast station to be operated on **1450 kc.**, 250 watts and unlimited time.

1460 Kilocycles

KEVE—Cascade Broadcasting Co., Inc., Everett, Wash.—Voluntary transfer of control of licensee corporation from Dr. J. R. Binyon and L. E. Wallgren to A. W. Talbot (125 shares common stock).

KEVE—Cascade Broadcasting Co., Inc., Everett, Wash.—Construction permit to move transmitter and studio from Everett, Wash., to Yakima, Wash.

TELEVISION APPLICATION

NEW—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Construction permit for a new experimental television broadcast station to be operated on **50000-56000 kc.** with power of 100 watts for visual and 200 watts for aural. A5 and special emission.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Americana Corp., et al.—A complaint has been issued charging the publishers of Encyclopedia Americana with misrepresentation of their publication and with unfair disparagement of competing encyclopedias, particularly the Britannica.

Respondents named in the complaint are Americana Corporation, 2 West 45th St., New York, and its officers, Fred P. Murphy, president; Joseph C. Graham, Jr., vice president and treasurer, and Thomas J. Kirk, secretary.

Typical of the false representations allegedly made to prospective purchasers by the respondents in advertisements, circulars and sales manuals, or by means of sales talks by their salesmen, are the following:

That the Americana is the only American encyclopedia and that other encyclopedias, including the Britannica, have a foreign origin, background and viewpoint; that Americana has been published continuously for more than 100 years and contains more articles and more information than any other encyclopedia; that it is preferred by all the leading educational and governmental institutions in the United States and is the best known and most authoritative encyclopedia published; and that the Britannica is not up to date and not revised by means of annual supplements as is the Americana. (5085)

Cookware Associates, Bucyrus, Ohio, are charged in a complaint with the use of misleading and deceptive practices in connection with the sale of cooking utensils. The complaint alleges that the respondents have attempted to compel purchasers to accept inferior glass or ceramic utensils in lieu of aluminum or aluminum alloy cookware ordered by them, under penalty of forfeiting deposits paid or of awaiting the termination of wartime restrictions on the sale of aluminum and aluminum alloy products. (5084)

Davenport Candycrafts, 168 South Division Street, Spokane, Wash., are charged in a complaint with the use of lottery methods in the sale and distribution of their products. The complaint charges that the respondents who are engaged in the sale and distribution of candy for dealers have sold certain assortments so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes when sold and distributed to the consuming public. (5083)

Rodin Novelty Co., 814 Pierce Street, Sioux City, Iowa, selling and distributing cigarette lighters, clocks, leather goods, and other merchandise to retail dealers, clubs and other organizations, is charged in a complaint with the use of lottery methods in the sale and distribution of its products. (5082)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Bouquet Formals, Inc., et al.—Thirteen manufacturers of formal evening dresses, all located in New York City, have been ordered to cease and desist from entering into or continuing any combination or conspiracy to fix prices for their merchandise. The respondents named in the order are:

Bouquet Formals, Inc., 1359 Broadway; Clover Dance Frocks, Inc., 1359 Broadway, and its representative, Meyer Schatzberg; Debonair Dance Frocks, Inc., 1359 Broadway; Gaytime Frocks, Inc., and its representative, Jack Levy, 1359 Broadway; Hollywood Formals, Inc., 1359 Broadway; Patio Dress Co., Inc., 218 West 37th St.; Penelope Frocks, Inc., 491 Seventh Ave.; Seville Dress Manufacturing Co., Inc., 134 West 37th St., and its representative, Mike Reiter; Studio Dance Frocks, Inc., 1359 Broadway, and its representative, Murray E. Gottesman; Tango Formals, Inc., 134 West 37th St.; S. Wicha, Inc., 491 Seventh Ave.; Joseph Scafuri, trading as Adorable Dance Frocks, 1357 Broadway; and Harry Goodman and Herman Goodman, a copartnership, 134 West 37th St. (4751)

Stanley J. Remus & Company, et al.—An order to cease and desist from violation of the brokerage section of the Robinson-Patman Act in connection with sales and purchases of canned fish has been issued against Stanley J. Remus, trading as Stanley J. Remus & Co., 437 West Ontario St., Chicago, and P. E. Harris & Co., and Oceanic Sales Co., both of Seattle. (4833)

Winterine Manufacturing Co., 105 Wazee Market, Denver, Colo., has been ordered to cease and desist from misrepresentation in connection with the sale of "Antarctic," a so-called antifreeze solution advertised for use in the cooling systems of automobiles and other combustion type engines. (4945)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Bannock Food Company, Inc., West Chester, Pa., selling dog foods designated "Bannock Dog Biscuits" and "Bannock Body Builder," has stipulated to cease and desist from representing that its dog food products contain meat or beef, or that Bannock Dog Foods are the only dog foods containing a vitamin concentrate. (03169)

Bill Baker's Products, Ojai, Calif., selling a food designated "Bill Baker's Original Soya Bean Brand Bread," has stipulated to cease representing that the product will be of any therapeutic benefit in the treatment of acidosis or stomach acidity. (03167)

Cluett, Peabody & Co., Inc., 40 Worth St., New York, manufacturing and distributing shirts, collars, ties, underwear and handkerchiefs, has stipulated to cease and desist from branding, labeling or advertising Sanforset treated rayon garments or fabrics as "Sanforized-Shrunk," "Sanforized-Shrunk Sanforset," or in any other way indicating or implying that such goods have been treated by the Sanforized shrinkage process, and from any presentation conveying the impression or belief that the residual shrinkage remaining therein is no more than the public has been educated to understand by the legend or expression "Sanforized-Shrunk." (3756)

Columbia River Woolen Mills, Portland, Oreg., engaged as jobbers in the sale and distribution of wearing appparel, bedding, piece goods and similar merchandise, has stipulated to cease and desist from use of the word "Mills" as part of their firm or trade name, and from use of other words or terms of similar implication that may convey the belief or impression that they make or manufacture the merchandise sold by them or that they actually own and operate or absolutely control a plant or factory wherein is made the merchandise sold or offered by them under such representations. (3757)

Conway Studios, Inc., and William E. Singer, Ben Sirlin and Paul Adelman, its officers, also trading as Affiliated Photo News Service, 558 Madison Ave., New York, making and distributing photographic prints, have stipulated to cease using the words "Affiliated Photo News Service" to describe or designate their business; using the terms "News Service" or the word "News" or any other words of similar import to describe a business which is principally that of selling photographic prints to persons photographed; representing in any manner to prospective customers that the respondents or any of their sales representatives are news or press photographers, or that any photograph solicited by them is for press or publicity purposes, unless such photograph is for immediate news or press use; describing or referring to Conway Studios, Inc., as the portrait division of Affiliated Photo News Service, or representing that miniatures or photographs offered for sale are made from negatives found by their artist to be so attractive and unusual that he selected them for exhibition purposes. (3758)

Feshbach & Ackerman Fur Corp., 333 Seventh Ave., New York, manufacturing and selling ladies' fur garments, has entered into a stipulation in which it agrees to cease and desist from use of the word "mink" or any word of like meaning to designate or describe furs or fur garments made from muskrat peltries or peltries other than those of mink unless such word or term is compounded with the word "dyed" immediately followed in equally conspicuous type by the true name of the fur; from the use of the words "Persian Lamb," "Persian Paw," or "Persian" as descriptive of coats or garments made of peltries other than those of true or pure breed Persian lambs; from use of the word "Polar" or other terms connoting origin characteristic of a particular geographic region as descriptive of a fur or garment material which has not come from the locality indicated; or from designating or describing furs or fur garments in any manner other than by the use of the true name of the fur as the last word of the designation or description thereof; and when any dye or process is used in simulating any other fur, the true name of the fur appearing as the last word of the description shall be immediately preceded in equally conspicuous type by the word "dyed" or the word "processed" compounded with the name of the simulated fur as, for example, "Mink-dyed Muskrat." (3753)

Merrell's, Inc., Clarksburg, W. Va., selling and distributing stationery, has stipulated to cease and desist from representing, directly or inferentially, that it is the only manufacturing engraver in West Virginia. (3749)

Harry Myers & Co., Inc., trading also as Styleplus Factory Salesroom, 110 South Paca St., Baltimore, selling and distributing men's clothing, has stipulated, whether trading under such names or under any other trade name or style, to cease and desist from representing by pictorial delineation or otherwise that its factory or sales or showrooms occupy an entire building or buildings in excess of that which it actually occupies. (3754)

Olan Mills Portrait Studios, 112-116 East Columbia St., Springfield, Ohio, making and distributing photographic portraits, has stipulated that in connection with the sale and distribution of their products they will cease and desist from use of the terms "photo etching," "photo (etching) portrait," or the word "etching," or words of like import as descriptive of portraits or other pictures where an etching process is limited to the background and not used on the portrait or other subject matter of such photograph. (3750)

Orjene Company, 100 Fifth Ave., New York, selling and distributing cosmetic preparations designated "Orjene Pure Shampoo," and "Vi-Vu Scalp Treatment," "V-Kol" and "Couleur de Ton," has stipulated to cease representing that Orjene Pure Shampoo is a cure or remedy for dandruff or has any therapeutic value in the treatment of dandruff in excess of the removal of dandruff scales, or that it will provide a strong, healthy growth of hair or that it is new and different; that Vi-Vu will promote or restore a healthy growth of hair, will remove local scalp irritations, or renew life-giving nutriment or that it will improve the metabolism of the scalp or grow hair whenever the follicles are alive; or that V-Kol is a cure for itching scalp or skin or eczema, or is a cure for dandruff or that it will aid nature in growing healthy hair. (03165)

Perel & Lowenstein, with places of business at 144 South Main St., Memphis, and Jackson, Tenn., selling and distributing jewelry and associated commodities, have stipulated to cease and desist from use of the words "natural yellow gold," "yellow or rose gold" or similar terms as a description or designation for watch cases not made wholly of gold or which are gold-filled, gold-plated or have backings of metals not gold; from designating, or referring to, rings or other merchandise of less than 24-karat quality as "solid gold," "solid natural gold" or "solid yellow or white gold"; from describing or referring to premium dolls as a "$7.50 doll" or by other words or terms representing that such dolls are equal in value or quality to those ordinarily sold in the retail trade for $7.50, or that they have any worth in excess of their real market value; from using the words "free," "gift" or terms of like import to describe merchandise that is not given free or as a gratuity when the recipient of such merchandise is required, as a consideration, either to pay in whole or in part the price thereof, to purchase some other article or to render some service in order to obtain it. (3755)

Science Laboratories, Inc., and Sperti Electric Co., Inc., 4242 East 4th St., Cincinnati, engaged in the manufacture of electric lamps, including ultraviolet ray lamps, have stipulated that in connection with the sale and distribution of their models IC-77 and HI-41 lamps, or lamps of substantially similar construction, they will cease and desist from representing that conditions of the modern age are such that we are deprived of most of the benefits of sunlight, or by inference that it is essential for health to obtain such radiation by artificial means; that the low death rate in summer as compared with the high death rate in winter is an index to the deficiency of ultraviolet light in wintertime; that the lamps offered for sale without adequate filter equipment produce ultraviolet rays or that such radiation is comparable to sunshine. (3752)

C. F. Simonin's Sons, Inc., Tioga and Belgrade Sts., Philadelphia, selling and distributing edible or cooking oils, including a preparation designated "Olio Simonini" or "Simonini Oil," has stipulated that it will cease and desist from representing that 20 percent of the content of its product consists of virgin olive oil unless and until 20 percent thereof does consist of virgin oil; and from any representation which may convey the belief or impression that the olive oil content of its edible or cooking oils is greater than, in excess of, or other than the actual olive oil content thereof. (3751)

Spors Co., Le Center, Minn., selling a medicinal preparation designated "Lax-Aid," has stipulated to cease disseminating any advertisement which fails to reveal that the product should not be used when abdominal pain, nausea or other symptoms of appendicitis are present; provided, however, that such advertisements need only contain the statement, "CAUTION: Use Only As Directed," if and when the directions for use, whether appearing on the label or in the labeling, contain a caution or warning to the same effect. (03168)

Stomar Products Co., 715 Linwood Blvd., Kansas City, Mo., selling a medicinal preparation designated "Foster's Wonder 30 Minute Corn and Callous Remover," and I. B. Wasson, trading as I. B. Wasson Advertising Co., Manufacturers Exchange Bldg., Kansas City, Mo., an advertising agency disseminating advertisements for the product, have stipulated to cease and desist from representing that the preparation promotes healing, and from disseminating any advertisement which fails to reveal that care should be taken not to allow the preparation, full strength, to remain in contact too long, as otherwise its corrosive action may extend beyond the callous or corn and corrode the underlying tissue; provided, however, that such advertisement need only contain the statement, "CAUTION: Use Only As Directed," if and when the directions wherever they appear in the label or labeling contain a caution or warning to the same effect. (03166)

FTC CASE CLOSED

The Federal Trade Commission has closed the case growing out of its complaint against Monte Carlo Hats, Inc., 39 West 37th St., New York. The complaint charged the respondent with failing to properly label old, previously used women's hats, which it sold to retail dealers, as not being new or unused.

The Commission finds that the respondent has gone out of business, with no indication that it will be resumed. The case was ordered closed without prejudice to the right of the Commission to reopen it and resume trial should future facts so warrant.

FCC PAYROLL AND EMPLOYMENT DATA

The FCC reports that more than 100 stations have failed so far to return their payroll and employment data requested two months ago. This data, when compiled, can be of invaluable help to all stations in labor negotiations, War Labor Board proceedings, and in other ways. For their own benefit, all stations should act promptly on the Commission's request.

PEABODY AWARDS

Some five thousand listening-post committee members, from coast to coast, will on December 10 report their selections in the George Foster Peabody Awards of 1943 to Dean John E. Drewry of the Henry W. Grady School of Journalism, University of Georgia, through whose office the awards are made.

The reports of these listening-post committee members will be consolidated and passed along to the Peabody Advisory Board, headed by Edward Weeks, editor, *Atlantic Monthly*, which will make the final selections of the winners. This group will meet in New York in January for a preliminary canvass of the 1943 entries.

Bing Crosby's name appeared along with others of the Los Angeles area in a list provided by Mrs. Dorothy Lewis, New York, who as Coordinator of Listener Activity of the National Association of Broadcasters has quietly but effectively gone about the creation of these listening-post committees in some two hundred principal cities in most of the forty-eight states. Similar committees have been established through Dean Drewry's office in most of the state universities having accredited schools or departments of journalism.

"I am quite thrilled to know that some five thousand people will have worked on this listener evaluation project for the Peabody Awards this year, among them outstanding people in many areas," Mrs. Lewis recently wrote Dean Drewry. "Letters keep coming in telling me of the great interest of the community and of local stations in this whole project as it has been set up with the listening groups."

Although December 10 is the closing date for 1943, entries have been arriving in Athens for some weeks, Dean Drewry reports.

EDUCATION BY RADIO INSTITUTE SET

I. Keith Tyler, Director of the Institute for Education by Radio, Ohio State University, announces the Fifteenth Institute for Education by Radio to be held at the Deshler-Wallick Hotel in Columbus, May 5-8, 1944. As in past years, the annual exhibition and citations of educational radio programs will be made in connection with the Institute. The closing date for entries in this exhibition has been set as March 15, 1944. Specifications and entry blanks may be obtained by stations, educational organizations and regional networks on request to Dr. Tyler at the Ohio State University, Columbus 10, Ohio.

EDUCATIONAL RADIO LISTING SERVICE

The Federal Radio Education Committee and the United States Office of Education have inaugurated a monthly Educational Radio Program Listing Service as an aid to teachers throughout the nation. On the first list, which has already been forwarded to all State Superintendents of Schools for distribution to local schools, 27 network programs are listed.

FREC, which is composed of 14 representatives of the radio industry and education, is convinced that many educationally valuable programs are not being fully utilized. An advisory committee of 4 educators has been set up to make the selections which will go onto the lists and the basic standards have been agreed upon by FREC. Each network recommends educational programs for selection. Following selection, the list is mimeographed and sent to State Departments of Education with the caution that it should be carefully revised to fit local needs and should be supplemented by local and regional educational programs. Many radio stations will be interested in cooperating with educators in their community in making this program effective.

A. E. R. REGIONAL CONFERENCE

The regional conference of the Association for Education by Radio was held at Stephens College, Columbia, Missouri, November 19, 20 and 21. The central theme was "The Responsibility of Radio in the New World." At the close of the sessions B. Lamar Johnson, Stephens College Dean of Instruction, presented the following summary:

"As I open my remarks I wish to express on behalf of Stephens College our pleasure in having had you guests on our campus during the past three days. You have brought much to us in both inspiration and information.

"Just this afternoon, in conversation with Major Kent, he remarked that this conference is the outstanding regional conference in the country and that it has more than justified its sponsorship by the Association for Education by Radio. I mention this because you have made this conference the success it has been.

"At the close of one of yesterday's panels the chairman stated, 'I have been asked to summarize this panel, but we have had so many ideas presented, so many suggestions

(Continued on page 486)

Neville Miller, *President* C. E. Arney, Jr., *Secretary-Treasurer*

Robert T. Bartley, *Director of War Activities;* Lewis H. Avery, *Director of Broadcast Advertising;* Willard D. Egolf, *Assistant to the President;* Howard S. Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Arthur C. Stringer, *Director of Promotion.*

A. E. R. REGIONAL CONFERENCE

(Continued from page 485)

made, that I hesitate to attempt a summary. The meeting is adjourned.'

"After having attended meetings for three days I must say that I share the feeling of yesterday's panel chairman as I consider attempting a summary of the conference. I am almost tempted to announce now as we did yesterday, 'Meeting adjourned!'

"During this conference I observed one technique that I thought was notable—the use of a tea room as a part of seating space for the audience. I have attended the Boston 'pops' and listened to symphonic music as I enjoyed refreshments; I have seen the floor show at a night club as I ate a so-called supper; but never before have I attended a conference where a major part of the audience ate a late breakfast while listening attentively to a panel discussion—and where conferees sipped afternoon tea while listening to a speech. This technique might well be considered by other conference planners.

"In summarizing the conference I shall make no attempt to summarize each meeting separately. That will be done in the proceedings. Rather I shall mention five areas of discussion which have been of common concern and interest during the conference:

"First, *Should radio give the public what it likes or should radio give the public what it ought to have?*

"Throughout the conference this issue has been discussed—in relation to children's programs and daytime serials, in relation to international relations and planning for the postwar world here at home. There seems to have been general agreement on this: 'Give the people the facts; the people can be trusted with the truth.' *But* repeatedly the point has been made different people interpret facts differently.

"As I leave this conference I am conscious of no clear-cut agreement on answering this question. The suggestion has been made that we should do both—give the public what it likes and what it should have. Time after time the point has been made that if we wish to present educational programs on postwar issues, for example, we must use the best showmanship possible, otherwise we shall have no listeners.

"Second, *Should training for careers in radio stress general education or specific training in radio techniques?*

"Employers in radio want everything. They demand a sound general education including citizenship understanding, health, ability to communicate effectively, ability to get along with people; they want some technical training in the field of radio; they recommend the ability to type and take dictation; and some suggest the value and need for home economics training. The student who seeks a career in radio may be perplexed by the multiplicity of demands placed on her. Essentially, however, this conference has said to the student, 'If you are interested in radio get a good general education, work hard. You will need to work hard when you begin your career. You must work hard now to get a sound general education, some technical training and, if possible, stenographic training.'

"Third. *Is there opportunity for employment in radio?*

"On the one hand we have had reports of the immediate need for workers in radio. On the other hand, we have learned that in normal peacetime there are throughout the nation only 500 openings a year in radio—and not all of these offer opportunities for new workers in radio, for some of these openings simply represent personnel changes within the industry. Against this background of possible positions in radio we must consider the future possibilities of FM and of television. Expansion in these fields may well offer significant employment opportunities in the New World.

"In speaking of education for radio we need to recognize that education for a career in radio is only an aspect—and that a small aspect—of radio education. We need to teach boys and girls to understand the place of radio in America and world life. We need to educate our boys and girls in radio listening, just as we aim to teach them reading habits in our Literature courses. I have a feeling that this point on the importance of radio in general education may have been underestimated in the sessions of this conference.

"Fourth, *The local radio station is the basic unit of radio. Community cooperation is necessary if radio is to make its maximum contribution.*

"Among the agencies which can best cooperate with radio, and with which radio can best cooperate, is the newspaper. The press can do much in the education of listeners. In a panel discussion yesterday I feared a conflict between a representative of journalism and a member of the clergy. An agreement was, however, reached that both radio and the newspapers have important functions to serve and that cooperation between them is essential. During the conference regret has been expressed over the fact that in some sections of the country newspapers fail to list radio programs. On the other hand, and more frequently, examples of splendid radio-newspaper cooperation have been cited, as in Omaha, for example.

"Listening groups in cooperation with the local station can actually produce programs which fill a local need. This morning, for example, we heard of a junior league group in Oklahoma which is producing some outstanding children's programs.

"Throughout the conference I have been impressed by the growing importance of radio councils as a means of providing community cooperation. The suggestion has been made that the radio council can educate listeners, can advise the station management regarding the improvement of the programs, and can publicize selected programs.

"Fifth, *Is television just around the corner?*

"The presentations of Commander Eddy and of Mr. Shayon both point forward to a not distant day when television will be a reality. Mr. Shayon predicts that: 'Ten years from today large scale commercial color-vision television will be as normal a part of our lives as are films or sound broadcast now.'

"Commander Eddy emphasized the value of television to education and suggested the possibility of centralized education from central stations. Though there was at the conference some disagreement on the future of television, I should say that there was general optimism regarding the development and the importance of television.

"If I were to select two quotations which best give contrasting spirits of this conference I should first quote Mrs. Miller who in a panel yesterday stated: 'It is later than we think.' In that sentence Mrs. Miller summarized the concern which has motivated our consideration of postwar issues; the need for building a lasting peace; our recognition that we live in a world united by radio, by aviation and by the aspirations of mankind; our concern about breakdowns on our home front; juvenile delinquency; our wonderings about radio's role of leadership in the new world; our controversies regarding the interpretation of facts; our fears that we may win the war on world battlefronts and lose the peace. Yes, it seems to me that Mrs. Miller has uttered a warning we need to heed—as educators, as broadcasters: 'It may well be later than we think.'

"On the other hand there has been in our conference a spirit of optimism. Our conference has promised us new and improved tools with which to fashion the New World. Perhaps this hope was best represented by Mr. Shayon's address of last evening: 'In the new world radio will be a superior instrument. A servant of man—freed from physical limitations—endowed with sight as well as sound, serving still the spirit of enterprise but serving still more the public welfare—making all men neighbors—and enriching their days and nights with entertainment, information, and enlightenment—this is the vision in the New World to which radio looks ahead.'

"These sentences and the entire conference fill us with both a feeling of hope and of responsibility. Before we have quite learned to utilize to its utmost the tool of radio, civilization is having placed in its hands a new tool—a new art—television.

"As I leave this conference I feel that those of us in education, those of us in radio, and those of us in the united field of radio education face new opportunities which we dare not fail to recognize. Radio needs education; education needs radio. America and the world need radio and education."

HOUSE SELECT COMMITTEE APPROPRIATION

Acting upon the request of the House Select Committee to investigate the Federal Communications Commission, the House last week passed an additional appropriation of $50,000 with which to carry on investigating activities. The bill was passed without debate.

MAKE SURE OF WAR DEPT. OK

When approached by an outside party on a deal to broadcast a military program from a distant point, with costs including line charges to be paid by donations from local merchants, stations should make sure that the Radio Branch, Bureau of Public Relations, War Department, Washington, D. C., has given approval in writing.

In such cases—pickup from a distant point, costs to be defrayed by donations and involving a third party—there is more than a possibility of embarrassment to the broadcast station.

If in doubt about any such deals communicate directly with the Radio Branch, War Dept., Washington, or with NAB.

The suggestions above do not apply when the station itself develops such a program.

KLAUBER TO OWI

Edward Klauber, for thirteen years a prominent figure in the broadcasting industry when he served as Executive Vice President of CBS, has been appointed Associate Director of the Office of War Information. This post has been vacant since the resignation of Milton S. Eisenhower who assumed the presidency of Kansas State College.

Mr. Klauber, a veteran newspaper and radio man, began his career on the New York *World* in 1912. In 1916 he joined the staff of the New York *Times* where he remained for nearly thirteen years as reporter, re-write man and news executive. He resigned as night editor of the *Times* in 1928 and then went into the advertising and public relations field before joining CBS in 1930.

Mr. Klauber is a native of Louisville, Kentucky. He assumed his new post December 1.

MINNESOTA BROADCASTERS MEET

Representatives of Minnesota radio stations and some from surrounding states are meeting in Minneapolis today (3). While the meeting will be general in character, its prime purpose is a means whereby closer contact between the Northwest Radio Council and the radio stations of that area may be established.

Mrs. George B. Palmer, Chairman of the Radio Committee of the Minnesota Federated Women's Clubs and prominent in the General Federation of Women's Clubs radio affairs, will outline the aims and objectives of the Radio Council.

Dorothy Lewis, NAB Coordinator of Listener Activities, will also speak upon the functions of radio councils and a number of women program directors will be on hand. An interesting meeting is expected. A full outline will be given in next week's NAB REPORTS.

DISTRIBUTE INCOME TAX FORM W-2

The Bureau of Internal Revenue has asked NAB to remind stations of the importance of early distribution of Form W-2 to employees. This form is a statement showing total wages paid during the calendar year 1943 and the amount of income and victory tax withheld from such wages under the provisions of the new "pay-as-you-go" income tax plan.

January 31 is the deadline for distribution of the forms to employees and for the filing by the employer of duplicates, together with the employer's quarterly report of taxes withheld (W-1), with the Collector of Internal Revenue in the employer's district.

Early distribution helps employees determine their personal income taxes.

1944 ELECTRONIC NEEDS CONSIDERED

Reports on electronics equipment since January 1 and the program to meet increased requirements for 1944 were discussed at a recent meeting of the Radio and Radar Industry Advisory Committee with WPB representatives. Progress of scheduling operations on vacuum tubes, test equipment and electrical indicating instruments were outlined by representatives of the WPB Radio and Radar Division. Ray C. Ellis, Division Director, was government presiding officer.

BOOK ON RADIO REPAIRS ISSUED

"Radio Listeners Guide, an Aid to Better Reception," is the title of a 62 page booklet written by Fred D. Rowe. Mr. Rowe has been associated with the Pacific Radio Institute in the San Francisco Bay area for the past 14 years locating various types of interference on receiving sets.

Mr. Rowe has covered such subjects as how broadcasting is done, installation notes, tuning of radio, determining causes of radio set noises, how to locate interference sources, simple service problems and questions and answers. Under present conditions when many listeners find it difficult to obtain the services of a competent radio repairman, it is believed this publication may be particularly helpful to radio listeners.

A. E. Rowe and Company, Inc., 660 Mission Street, San Francisco 5, California, is the publisher. Broadcasters may purchase individual copies at $1.00 each. Quantity discounts to broadcasters are as follows: two to ten copies—70 cents each, eleven to one hundred copies—60 cents each, over one hundred copies—50 cents each. The retail price is $1.00.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, December 6th. They are subject to change.

Monday, December 6

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Modification of license; **1480 kc.**, 5 KW, unlimited, DA-night.

Wednesday, December 8

Further Hearing

To Be Heard in the Offices of the Commission, Washington, D. C.

WFTL—Ralph A. Horton (Assignor), The Fort Industry Co. (Assignee), Fort Lauderdale, Fla.—Voluntary assignment of C. P., and license of WFTL; and licenses of relay stations WAAD and WRET. **1460 kc.**, 250 watts, unlimited. Under C. P., **710 kc.**, 10 KW, unlimited, DA-night.

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—License to cover C. P., and authority to determine operating power by direct measurement. **1400 kc.**, 250 watts, unlimited. Under C. P., **710 kc.**, 10 KW, unlimited, DA-night.

WFTL—The Fort Industry Company, Fort Lauderdale, Fla.—Modification of license to move main studio from Fort Lauderdale, Florida (contingent upon granting of B3-APL-15). **1400 kc.**, 250 watts, unlimited. Under C. P., **710 kc.**, 10 KW, unlimited, DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KFAR—The Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Granted special service authorization to operate station on **660 kc.** with 10 KW power, unlimited time, for the period ending no later than June 1, 1944, on condition that if objectionable interference is caused to the FCC monitoring station, the CAA radio system, Alaska Communications System, Army, Navy, Coast Guard, or other communications systems, and is not promptly eliminated, KFAR will return to its present assignment of **610 kc.**, with 5 KW power.

WWDC—Capital Broadcasting Co., Washington, D. C.—Granted extension of authority for waiver of Sections 2.53 and 13.61 of the Commission's Rules so as to permit operation of the synchronous amplifier by remote control from the main transmitter location, for the period December 1, 1943, to February 1, 1944, upon the same terms and conditions as the existing authorization for such operation.

WFNC—W. C. Ewing and T. K. Weyher, d/b as Cumberland Broadcasting Co. (Assignor), Cape Fear Broadcasting Co. (Assignee), Fayetteville, N. C.—Granted consent to voluntary assignment of license from W. C. Ewing and T. K. Weyher, d/b as Cumberland Broadcasting Co., licensee of station WFNC, to Cape Fear Broadcasting Company (B3-AL-380).

WSNY—Western Gateway Broadcasting Corp., Schenectady, N. Y.—Granted authority to make changes in automatic frequency control equipment (B1-F-254).

WRUF—University of Florida, Gainesville, Fla.—Granted special service authorization to operate unlimited time with power of 100 watts after sunset at Denver, and 5 KW until sunset at Denver, for the period ending February 1, 1944 (B3-SSA-87).

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted extension of special service authorization to operate on **560 kc.**, 500 watts night, 1 KW LS, unlimited time, for the period ending February 1, 1943 (B5-SSA-86).

LICENSES GRANTED

Granted renewal of following relay broadcast station licenses for the period beginning December 1, 1943, and ending in no event later than December 1, 1945:

WODJ, Adirondack Broadcasting Co., Inc.; WEGD, WEGE, American Broadcasting Corp. of Ky.; WEOB, Ashland Broadcasting Co.; WEGG, The Atlantic Journal Co.; WBAR, WBAS, WEGM, WEGN, Bamberger Broadcasting Service, Inc.; WALM, WALN, WAUJ, WHAE, Courier-Journal and Louisville Times Co.; WAUY, WEQG, Evansville on the Air, Inc.; WEHN, Evening News Assn.; WHHC, Hampden-Hampshire Corp.; WEIF, Hildreth and Rogers Co.; WEIN, WEIO, WEIP, The Journal Co. (The Milwaukee Journal); KEJS, KGKO Broadcasting Co.; KEIH, KEII, KLZ Broadcasting Co.; KEIM, KTAR Broadcasting Co.; WALB, Larus and Brother Co., Inc.; KAOY, KEGL, KEGN, KEGO, KEGQ, Don Lee Broadcasting System; WEIT, WEIU, Loyola University; WEIY, Miami Broadcasting Co.; WEIZ, Miami Valley Broadcasting Corp.; KAOH, KEIS, KEIT, Midland Broadcasting Co.; WENU, WENV, Monumental Radio Co.; KEIW, KEIX, Eugene P. O'Fallon, Inc.; WIPP, Pennsylvania Broadcasting Co.; WEKI, WPEO, Peoria Broadcasting Co.; WERB, Pinellas Broadcasting Co.; KRQC, Queen City Broadcasting Co., Inc.; WEHT, WELT, Racine Broadcasting Corp.; KEGU, Radio Service Corp. of Utah; KEGV, Radio Station KFH Co.; WENP, WENQ, WENS, Radio Station WSOC, Inc.; WEKN, Rockford Broadcasters, Inc.; KEGX, Salt River Valley Broadcasting Co.; WEKO, WEKP, Scranton Broadcasters, Inc.; WEKQ, Allen T. Simmons; WEKR, South Bend Tribune; WEOC, South Carolina Broadcasting Co., Inc.; WJSN, The Sun Publishing Co., Inc.; KEGT, Tarrant Broadcasting Co.; KEHB, KEHD, Topeka Broadcasting Assn., Inc.; WEHU, WEHX, WJSM, WRPM, United Broadcasting Co.; WAUW, WLAC Broadcasting Service; WRBC, WELE, WBNS, Inc.; WELN, WDRC, Inc.; WEIJ, WEIK, WFBM, Inc.; WELY, WGAL, Inc.; WEMU, WEMW, The WGAR Broadcasting Co.; WAIF, WAIG, WELZ, WQHF, WGN, Inc.; WHPB, WHPR, WHP, Inc.; WENF, WENG, WJRB, WJR, The Goodwill Station; WENN, WENO, WPTF Radio Co.; WEOD, The Yankee Network, Inc.; WCZR, Zenith Radio Corp.; WAUH, Atlantic Coast Broadcasting Co.; WEGS, Donald A. Burton; WEGV, The Champaign News-Gazette, Inc.; WEGW, WEGX, Charleston Broadcasting Co.; KEHO, Intermountain Broadcasting Corp.; KDAS, KARM, The George Harm Station; WEOH, Richmond Radio Corp.; KEHS, WDAY, Inc.

Granted extension of following relay broadcast licenses upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event later than February 1, 1944:

WRET, Ralph A. Horton; KEIQ, KEIR, Ben S. McGlashan; WEKF, Paducah Broadcasting Co., Inc.; WBLQ, Piedmont Publishing Co.; KIDN, Redwood Broadcasting Co., Inc.; WENL, Surety Life Insurance Co.; KEGZ, Symons Broadcasting Co.; KEHR, Donald C. Treloar; WBCZ, WHEB, Inc.; WMWA, WOKO, Inc.

WAEA—Joda Patterson, Ramon G. Patterson and Louise Patterson Pursley, d/b as WAPO Broadcasting Service, area of Chattanooga, Tenn.—Granted renewal of license for the period ending not later than October 1, 1944 (B3-PRY-132).

MISCELLANEOUS

A. H. Belo Corp., Dallas, Texas.—Granted construction permit for new relay broadcast station (B3-PRE-438).

Great Trails Broadcasting Corp., area of Dayton, Ohio.—Granted license for new relay broadcast station (B2-LRY-291).

KNBC—National Broadcasting Co., Inc. (area of San Francisco, Calif.).—Granted construction permit to install new transmitter and to reduce power of relay station from 100 to 75 watts (B5-PRY-290).

KEJK—National Broadcasting Co., Inc. (area of San Francisco, Calif.).—Granted construction permit to install new transmitter (B5-PRE-434).

Voice of Longview (Portable-Mobile), (area of Longview, Tex.).—Granted construction permit for new relay broadcast station (B3-PRY-292).

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted modification of construction permit as modified, which authorized change of frequency, increase in power, installation of new transmitter and directional antenna for night use, for extension of completion date from December 1, 1943, to February 1, 1944 (B5-MP-1727).

WEKX-WEKZ—The Yankee Network, Inc., area of Boston, Mass.—Granted renewal of relay broadcast station license for period December 1, 1943, to not later than December 1, 1945; to operate with WNAC, Boston, Mass., instead of WNAC and WAAB, Boston, Mass. (B1-RRE-91), (B1-RRE-245).

WEKY—The Yankee Network, Inc. (area of Mt. Washington, N. H.).—Granted renewal of license for relay broadcast station WEKY for the period December 1, 1943, to not later than December 1, 1945; to be designated as a special relay broadcast station to be operated with high frequency broadcast station WMTW, Mt. Washington, N. H., instead of relay broadcast station to be operated with WNAC and WAAB, Boston, Mass. (B1-RRE-244).

The Commission placed in pending file the applications of Standard Broadcasting Co., Los Angeles, Calif., for construction permit for new FM station (B5-PH-146) and Allen B. DuMont Labs., Inc., to change from experimental to commercial operation its television station W2XWV (B1-PCT-21).

WEMZ—WHEC, Inc., area of Rochester, N. Y.—Cancelled license for relay broadcast station license in accordance with written request (B1-RRE-257).

KOBH—Black Hills Broadcast Co., Rapid City, So. Dak.—Denied petition requesting leave to amend its application for construction permit (B-192, Docket 6430) so as to substitute the frequency **1380** for **610 kc.**

KEEW—Eagle Broadcasting Co., Brownsville, Texas.—Granted renewal of license for the period December 1, 1943, to December 1, 1945.

KVOE—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Granted renewal of license for the period December 1, 1943, to December 1, 1945.

KBON—Inland Broadcasting Co., Omaha, Neb.—Present license extended upon a temporary basis only, pending determination upon application for renewal, for the period ending February 1, 1944.

KPAB—Laredo Broadcasting Co., Laredo, Texas.—Present license extended upon a temporary basis only, pending determination upon application for renewal, for the period ending February 1, 1944.

WDAE—Tampa Times Company, Tampa, Fla.—Denied special service authorization to operate on **770 kc.** with 5 KW power, unlimited time, employing DA-night, for the period ending August 1, 1944 (B3-SSA-84).

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich. —Dismissed application (B2-P-3531) for construction permit to move formerly licensed 500 watt transmitter to site of new main transmitter to be used as an auxiliary transmitter, with power of 500 watts, employing DA-night.

WOCB—Harriet M. Alleman and Helen W. MacLellan, d/b as The Cape Cod Broadcasting Co., West Yarmouth, Mass.—Adopted order denying as in default the application for renewal of license of station WOCB. Applicants failed to appear at hearing designated on October 26.

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted petition for postponement of hearing, now scheduled for December 6, 1943, to January 7, 1944, in re application for modification of license to operate on **1480 kc.,** directional antenna night, 5 KW, unlimited. (Docket No. 6522)

Charles Swaringen, et al., d/b as Buckeye Broadcasting Co., Akron, Ohio.—Denied petition for leave to amend application for construction permit for new station, to request frequency **1260 kc.** (instead of **1240 kc.**) and daytime hours (instead of unlimited). Exception noted by counsel. (Docket No. 6559)

APPLICATIONS FILED AT FCC

580 Kilocycles

WIAC—Enrique Abarca Sanfeliz, Hato Rey, Puerto Rico.—Voluntary assignment of license to radio station WIAC, Inc.

1280 Kilocycles

WDSU—WDSU, Inc., New Orleans, La.—Voluntary assignment of license and construction permit to E. A. Stephens, Fred Weber and H. G. Wall, d/b as Stephens Broadcasting Company.

1310 Kilocycles

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—License to cover construction permit (B1-P-3538) which authorized installation of a new transmitter.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Authority to determine operating power by direct measurement of antenna power.

1340 Kilocycles

KAND—Navarro Broadcasting Association, J. C. West, President, Fort Worth, Texas.—Construction permit to move transmitter and studio from Corsicana, Texas, to Fort Worth, Texas.

1430 Kilocycles

KWKW—Southern California Broadcasting Co., Pasadena, Calif.—Voluntary assignment of license to Marshall S. Neal, Paul Buhlig, E. T. Foley and Edwin Earl, d/b as Southern California Broadcasting Co.

1450 Kilocycles

KLBM—Ben E. Stone, La Grange, Oregon.—Modification of license to change the location of the main studio to transmitter site (U. S. Highway #30, 1.3 miles from La Grande, Oregon).

1470 Kilocycles

WCBA—WSAN Lehigh Valley Broadcasting Co., Allentown, Pa.—Relinquishment of control of licensee corporation by Allentown Call Publishing Company through sale of 495 shares of stock to Royal W. Weiler, J. Calvin Shumberger, Sr., David A. Miller, Fred W. Weiler, Samuel W. Miller, Donald P. Miller and Miller Associates.

MISCELLANEOUS

KPAK—Wichita Broadcasting Co., area of Wichita Falls, Tex.—Voluntary assignment of license to Wichita Broadcasters, a partnership, Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, Trustee, P. K. Smith, Mrs. Claude M. Simpson, Jr.

KWFR—Wichita Broadcasting Co., area of Wichita Falls, Tex.—Voluntary assignment of license to Wichita Broadcasters, a partnership, Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, Trustee, P. K. Smith, Mrs. Claude M. Simpson, Jr.

KTRG—KTRH Broadcasting Co., area of Houston, Texas.—License to cover construction permit (B3-PRY-291) which authorized construction of a new relay broadcast station.

W2XCB—Columbia Broadcasting System, Inc., area of New York, N. Y.—Modification of construction permit (B1-PVB-46 as modified), which authorized construction of new television relay station for extension of completion date from 1-7-44 to 7-7-44.

NEW—Spartanburg Advertising Co., Spartanburg, S. Car.—Construction permit for a new high frequency (FM) broadcast station to be operated on **43500 kc.,** with coverage of 26,600 square miles.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Master Engravers Guild, et al.—A complaint has been issued alleging that Master Engravers Guild and Master Engravers Service Corporation, both of Paterson, N. J., and their 20 member engraving companies, have entered into an agreement and combination to suppress and eliminate competition in prices and otherwise among and between themselves, and to monopolize for themselves the production, sale and distribution of etchings and engravings to be used for stamping and printing cloth, oilcloth and other like materials. Two individual respondents, Duncan C. McAllister, secretary of the two organizations of engravers, and George Stone, president of the respondent Guild, are named in the complaint. (5088)

Washington Civilian Institute, 129 W. Saratoga St., Baltimore, selling courses of study and instruction for preparing students for examinations for Civil Service positions, is charged in a complaint with misrepresentation. (5086)

Stacy Williams Company, Inc.; Claude Bennett, individually and as an official of Bennett Brokerage Company, Inc.; Bennett Brokerage Company, Inc., and Stacy Williams Company, Inc., all of Birmingham, Ala., are charged in a complaint with violation of the brokerage section of the Robinson-Patman Act. (5087)

STIPULATION

During the past week the Commission has announced the following stipulation:

DeLong Hook & Eye Co., Inc., Clearfield and 21st St., Philadelphia, manufacturing and distributing metal fasteners, has stipulated to cease and desist from representing that its hooks and eyes, or its other products made of steel, are composed of brass or that they will not rust. (3759)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

S. Buchsbaum & Co., 243 East Huron St., Chicago, manufacturing and selling men's accessories under the trade name "Elasti-Glass," has been ordered to cease and desist from misrepresentation of the products. The Commission finds that the respondent, whose products include belts, garters and wrist watch bands made from a resinous material, a derivative of vinyl which is sold under the trade name "Vinylite," to which a plasticizer has been added, has represented that the products are made of glass, through the use of the trade name "Elasti-Glass." Use by the respondent of the term "Elasti-Glass," the Commission finds, conveys to members of the purchasing public the impression that such articles consist of common glass processed in such a manner as to give it elastic properties. (4450)

FTC CASE CLOSED

The Federal Trade Commission has closed without prejudice the case growing out of the complaint against Retonga Medicine Co., Atlanta, Ga., which had been charged with misrepresenting the therapeutic properties of a medicinal preparation designated Retonga.

The Commission also vacated and set aside the findings of fact and order to cease and desist which it had issued in the proceeding.

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 50, December 10, 1943

NEW CENSORSHIP CODE

Byron Price, Director of Censorship, issued today (Friday) the third revision of the Code of Wartime Practices for American Broadcasters. This new edition replaces the one of February 1, 1943. Copies of the Code will be sent to all broadcasting stations by the Office of Censorship.

Several important changes have been made in Section I relating to News Broadcasts and Commentaries. The following paragraph is significant:

"Caution is advised against reporting, under the guise of opinion, speculation, or prediction, any fact which has not been released by appropriate authority."

The provision with respect to weather has been materially changed and some minor changes have been made with respect to news concerning the armed forces in the United States and outside the United States. The weather request now provides that unless made available for broadcast or specifically cleared by the Office of Censorship, weather forecasts other than those officially released by the Weather Bureau should not be mentioned. Mention of wind direction or barometric pressure in current or past weather should not be made except when contained in emergency warnings released specifically for broadcast by the Weather Bureau authorities. A note of caution is also sounded to special events reporters covering sports or outdoor assignments such as fires, floods, storms, etc., against mentioning wind directions.

Section (b)(1), which is the exception to the Armed Forces provision has been changed. This exception now reads:

"(1) Armed forces in the United States.—Those in training camps and units assigned to domestic police duty, as regards names, addresses, location and general character."

The language which prohibits the mention of an air raid in the United States during its course "by stations OUTSIDE the zone of action unless especially authorized by the War Department" has been eliminated and the new Code provides that mention of such raids can be made only on "appropriate authority of the designated representatives of the Defense Commander in whose area the raid occurs or the War Department."

Several important changes have been made in respect to broadcasts on production. A new provision with respect to war news reads as follows: "Any recordings or information for broadcast gathered in any form that is sent across the United States-Canadian border should contain nothing that will conflict with the censorship of the country in which the information originates." This provision will necessitate broadcasters acquiring a copy of the Canadian code in order that they may conform.

No significant changes are made in Section II of the Code with respect to Programs, but the foreign language section contains a new provision, reading as follows:

"(c) Censors and monitors.—In order that these functions can be performed in a manner consistent with the demands of security, station managers are reminded that their staffs should include capable linguists as censors and monitors whose duty it will be to review all scripts in advance of broadcast and check them during broadcast against deviation."

The former provision that requests from the Office of Censorship to submit specified scripts in the original language, as well as English translations thereof, has been deleted.

It is felt that the new Code will relieve broadcasters of some of the restrictions heretofore applicable.

MUSIC COMMITTEE MEETING

A special Music Bulletin will be issued shortly giving results of conferences with ASCAP regarding audits and other information in connection with various phases of the music field.

The NAB Music Committee met Wednesday and Thursday, December 1-2, at the Roosevelt Hotel in New York City. The following members were present: Campbell Arnoux, WTAR, Norfolk, Virginia; James P. Begley, KYW, Philadelphia, Pennsylvania; Thomas Belviso, NBC, New York City; Arthur Church, KMBC, Kansas City, Missouri; Robert Enoch, KTOK, Oklahoma City, Oklahoma; C. W. Myers, KALE, Portland, Oregon; Elliott Sanger, WQXR, New York City; Frank R. Smith, Jr., WWSW, Pittsburgh, Pennsylvania; John Wahlstedt, WHB, Kansas City, Missouri; Frank White, CBS, New York; and Neville Miller, NAB, Washington, D. C. Warren Williamson, WKBN, Youngstown, Ohio, was unable to attend.

Neville Miller, in outlining the purpose of the meeting, stated that music in its many aspects played a most important part in broadcasting and the committee had been appointed to study the whole field of music as it related to broadcasting, to anticipate the problems which the industry would face in the future and to outline constructive approaches to the various problems and carry on educational work within the industry in connection with the use of music by broadcasters.

Various phases of the legal side of the copyright problem were discussed by Robert J. Burton, of BMI, who emphasized the importance of maintaining BMI as an aggressive and active competitor rather than merely as an organization devoted to the maintenance of supplementary or alternative supply of music.

General discussion of the various problems brought out the fact that ASCAP at present was attempting to frus-

MUSIC COMMITTEE MEETING

(Continued from page 491)

trate true competition in the field of music licensing in violation of the terms of the consent decree. It had succeeded in obscuring the legal status of the various rights of its authors, composers and publisher members; it was consistently attempting to prevent composer members of ASCAP from exercising their rights under the ASCAP consent decree to grant performing rights licenses direct to broadcasters and appeared to have adopted a policy in connection with the auditing of stations designed to drive stations from per program licenses to blanket licenses.

It was pointed out that the cost for music licenses paid to all the licensing organizations was today less than that formerly paid to ASCAP alone, and that the industry, due to its determined stand in the ASCAP controversy, would save approximately $50,000,000 over the period of the present ASCAP contracts.

It was the opinion of the Committee that BMI was rendering the industry excellent service. It was pointed out that tunes licensed by BMI consisted of more than 25 per cent of the tunes listed on the various lists of most popular tunes and for four consecutive weeks had had the top tune on the Hit Parade. The industry was urged to support the management of BMI in the constructive work which it was doing.

Late Wednesday afternoon the committee witnessed a demonstration of logging of station performances at BMI and later met informally with representatives of the licensing organizations and the trade press.

Thursday morning was devoted to the consideration of the musical needs of stations and formulation of suggestions to licensing agencies.

Roy Harlow and Ralph Wentworth of BMI reported to the Committee their views formed as the result of recent trips to stations. Clint Finney, William Reddick and Ben Selvin of AMP outlined plans of that organization; Leonard Callahan and Gus Hagenah gave a detailed account of SESAC's operations; John Paine and Herman Greenberg discussed ASCAP's plans, policies and audits; Sydney Kaye, Merritt Tompkins and Carl Haverlin outlined BMI's activities, and Claude Mills spoke on the work of SPA.

The Committee pointed out to the ASCAP representatives that several years ago at the time the new contracts were signed, ASCAP had advertised the fact that for the future it would adopt a policy of cooperation with the industry which announcement had met with much approval by broadcasters. However, it was the opinion of the Committee that ASCAP was not following that policy and that it hoped ASCAP would give serious consideration to the suggestions which the Committee had to offer to the end that greater cooperation would be forthcoming in the future.

In connection with the ASCAP audits, it was pointed out that in spite of the consent decree which provided that ASCAP should not require a license fee in respect of commercial programs upon which no ASCAP music was performed, and in spite of explanations given by ASCAP representatives at district meetings and at numerous other times and places at the time ASCAP was urging stations to sign the present contracts, ASCAP now had adopted interpretations under which it claimed fees on spot announcements and completed quarter hour programs containing no ASCAP music but adjacent to programs which contain such music, government programs which had been granted clearances, and inter-company business all of which clearly were not subject to fee under the per program type of contract.

It was also pointed out that ASCAP evidently had adopted a policy of making no written reply to NAB's request for rulings on such matters and that it was absolutely necessary for good relations between the industry and ASCAP that such a policy be abandoned and that these matters be discussed and ironed out at an early date. It was stated that NAB did not propose to attempt in any way to assist chiseling on the ASCAP contract, but it did propose to oppose ASCAP's present policy for harassing the stations holding per program contracts.

The NAB plans to present to ASCAP a memorandum outlining the various problems which have arisen in the hope and expectation that ASCAP will discuss and arrive at a mutual understanding concerning the interpretation of the ASCAP contract in the light of the consent decree. This memorandum will be presented to ASCAP in the immediate future and the industry will be advised of developments.

Plans for development of educational material for use by music directors were discussed. A special music bulletin will be issued shortly giving detailed information concerning the various items considered by the Committee.

The Committee enjoyed two very interesting talks at the luncheons from well known authorities in the radio music field. Paul Whiteman of the Music Department of the

ATT: STATION MANAGER

Re: "There IS an Indispensable Man!"

A folder with the above title was sent to all station managers requesting their signatures on the return blank.

Station managers were requested to assume the responsibility of directing public relations activities or designate someone with similar authority, particularly any full time Public Relations Directors.

Response has been very satisfactory, but there are still some stations unheard from.

If you have not sent in the return blank, please do so.

Edgar Bill, Chairman of the NAB Public Relations Committee, says: "It will be necessary for District Public Relations Chairmen to contact personally all station managers who have not replied. We should like to minimize this job in the interest of the greater work ahead."

Please Send NAB the Return Blank

Blue Network, the luncheon speaker on Wednesday, spoke on the need for music written especially for radio. Dr. Ernest LaPrade, of the Music Department of NBC, the luncheon speaker on Thursday, spoke on symphonic music.

The Committee will give further consideration to the various subjects discussed and keep the industry advised of developments.

LEADING BROADCASTERS PARTICIPATE IN SCHOOL BROADCAST CONFERENCE, CHICAGO

A panel of "Quiz Kid" broadcasters, attired in caps and gowns, featured the Sunday night session of the School Broadcast Conference, November 28, 29, 30, in Chicago. Miller McClintock, MBS; Mark L. Haas, WJR; James W. Sterton, Blue Network; John J. Gillin, Jr., WOW; William Quarton, WMT, and Mike Hannah, WHCU were "quizzed" by two of the genuine Quiz Kids on American radio.

Willard D. Egolf, Assistant to the President, and Dorothy Lewis, Coordinator of Listener Activity, represented NAB at the Conference and supervised the NAB both which provided information on the membership of the Association and pamphlets of educational and general interest.

Following is a story of the Chicago meeting as released by the SBC News Bureau.

The Seventh Annual meeting of the School Broadcast Conference opened Sunday evening, November 28th in Chicago with a joint NAB-SBC special session considering the subject of "The Listener's Stake in Radio." The session was chairmaned by Mrs. Dorothy Lewis, Listener Coordinator for NAB and the feature of the program was a panel of station managers as Quiz Kids, with two Quiz Kids asking questions concerned with American Radio. Commissioner James L. Fly spoke from Washington on the regular Sunday evening Quiz Kid show, saying, "Even more important, the Quiz Kids prove that the entertainment and educational functions of radio are not opposed to one another."

In his talk of welcome to the conference Mayor Edward J. Kelly of Chicago stated that "radio is a tool of science that, of necessity must be made an adjunct of education if you, as educators are to train our children properly to face the responsibilities which they must assume as adults in a troubled world." Dr. William H. Johnson, Superintendent of Chicago Public Schools, stated, "In American radio the modern classroom teacher has at hand an educational device for the furtherance of democracy which is more powerful than any yet given him," and continued by saying, "Broadcasters and teachers in the schools of America have assumed their responsibilities. Out of such meetings as this will grow a stronger understanding between classroom and studio, teacher and broadcaster, to the end that radio will play the part in modern education that the leaders in both fields see for it."

Keynotes of Monday's session were an address by Colonel Edward M. Kirby, chief of the Radio Branch, Bureau of Public Relations, U. S. Army and the awarding of the annual scroll of merit to Major Harold W. Kent, Director of the Radio Council of the Chicago Public Schools, on military leave of absence. Colonel Kirby said in part that, "The mission of army radio is to convey the military facts of the war to the American people." In praising the effectiveness of radio in the war effort, Colonel Kirby said, "The Army has sought the cooperation of American Radio both at home and abroad, and it has never failed to receive it. For this, the salute of the Army."

Miller McClintock, president of MBS, in a panel devoted to the educational aspects of radio said, "American radio, after only twenty years of growth, is the most potent educational influence for the masses of our people which has ever been developed." The educator and radio executive are both coming to understand the problems of the other, and both have agreed that, "Together the schoolmen and the broadcasters of the nation can build educational influences assuring a perpetuation of individual freedom of thought and a guarantee of democratic processes for the future of our country."

General sessions of the conference were attended by teachers, school administrators, and radio executives who saw demonstrations of the classroom use of radio. Special workshops were held in Radio Script and Production for Schools; University Broadcasting; Radio and the Vocational School, and Training the Radio Worker.

Radio Station KOA, Denver, Colorado College, and the Rocky Mountain Radio Council were cited by the SBC in the annual station-promotion of a public service program for "Let's Make Music." A number of teachers were cited for their classroom use of radio. Series cited included programs from the School of the Air of the Americas; the Canadian Broadcasting Corporation; stations KEX, KOIN, WJR, WJJD, and WIND.

George Jennings, Acting Director of the Radio Council-WBEZ for the Chicago Public Schools, and Director of the School Broadcast Conference announced that the eighth annual meeting will be held in Chicago during the month of November, 1944.

SEABEE COMMANDER AIRS RECOGNITION OF WRVA

For many weeks WRVA broadcast a studio show for Camp Peary, Naval Construction Training Center, sixty miles from Richmond, because the camp had no building suitable. At the station's suggestion, however, a building was located, equipment purchased and installed under the guidance and supervision of the station's remote staff.

On the first broadcast from the Camp, November 20, Commander H. F. Ransford, Civil Engineers Corps, United States Navy, made the following remarks:

"We are grateful to the members of the staff of Station WRVA for their valuable and generous help. A great deal of hard work went into the arrangements for the installation of these facilities which will bring about radio broadcasting direct from Camp Peary. Those who contributed their time and their efforts did so with a will and a determination to make broadcasting from this point a successful reality. Now the men in camp can witness and enjoy seeing as well as hearing them. From camp will come our weekly "Builders for Victory" series which brings you behind-the-scenes stories of the Seabees in action with music by the Seabee Orchestra and chorus. Here you will meet the members of the United States Naval Construction Battalions, as their voices come to you over the air waves. It will be the Seabees' own program.

"Music and entertainment of the clean type is most beneficial to the well being of the men. And I take this opportunity to commend those entertainers and famous personalities who have appeared at this camp and have given so freely of their time and talents. Their numbers are legion . . . to mention one would be to neglect the others, but the people of the stage, the screen and the radio have made contributions to the morale of the men in service that will have one of the brightest chapters in the history of this war. Yes, thanks to Broadway, Hollywood and the other theatrical centers of America. To all you splendid American men and women we can only say we're grateful, but the fruits of your work can be found in the smile on the face of the fighter overseas who is going into battle, his morale at its highest through your fine efforts.

"As Commanding Officer of the thousands of Seabees in training here, I dedicate these new radio facilities to the continuance of radio programs which will help the men in their time of relaxation from the arduous tasks of training. I also dedicate these facilities to the fond recollections of the many thousands of Seabees now in action overseas who have trained here. To all responsible for the opening of radio facilities at this point, I greet you with the traditional Navy commendation . . . 'Well Done' . . . 'Carry On.'"

(NAB welcomes promotion stories of this type for use in the REPORTS.)

LOCAL RADIO NEWS NEGLECTED SAYS PRINTERS' INK ARTICLE

A Manhattan murder, grabbing New Yorkers' news interest away from important war-front developments, is used as an illustration by Charles P. Fitzpatrick, of Philadelphia, in November 26 *Printers' Ink*, to prove that local news deserves more attention from radio stations. His story is backed up by a spot survey made among several hundred adults selected as average newspaper readers and radio listeners, which disclosed that they gave the Manhattan murder a huge chunk of their reading time.

"That's the way it always has been and always will be," says Fitzpatrick. "Men and women who sincerely and honestly regret the passing of fighting men in far-away, unfamiliar places will give such news but a fraction of the time they eagerly devote to accounts of the wedding of the girl next door, the fire around the corner, the robbery in a prominent local store."

Listeners cannot remember details of world-wide news, the article states, whereas they can name names, quote figures and specify locations with surprising accuracy when the story is local.

A swing to local news after the war is over will pay dividends to stations, Fitzpatrick claims. Local news departments must be properly staffed, however, unless there is a newspaper connection which can be utilized.

(*NAB comment. Local news, news staffs and news handling were set down as one of the primary activities of the NAB Radio News Committee, which held its first meeting in September. The Committee, now also studying the inauguration of radio news curricula in universities, plans to meet again early in 1944, under the chairmanship of Karl Koerper, KMBC.*)

WJR, WGAR STAFF TEAMS VISIT OTHER STATIONS

"Believing that an exchange of ideas within the radio industry is not only worthwhile but essential to the development of the industry," writes Mark L. Haas, Educational Director of WJR, "stations WJR and WGAR are sending teams of their respective staffs to study the operation of stations throughout the middle west and east."

"The WJR and WGAR representatives will carry the story of the operation of their respective stations to those stations visited and in return hope to obtain ideas that can be applied to WJR or WGAR."

"The study will include the entire scope of station activity, with emphasis on programming, promotion, selling functions, inter-department routine and post-war planning. The teams will be on the lookout for ideas of all kinds, ideas on how radio is being used in the war effort, on what is being done to promote listening, selling practices, etc."

An elaborate questionnaire is used as a guide for the teams and these will be studied by department heads and program personnel of WJR and WGAR when the tours are completed.

(*NAB welcomes information of this type for inclusion in the* REPORTS.)

LISTENER WANTS NAME OF TOWN FIRST IN NEWS

James Campiglia, Jr., of Ventura, California, says that it will make for better news listening if the name of his town precedes the name of a person who is listed, for example, among the casualties of a wreck or other accident.

Here is a portion of his letter to NAB: "The name of the killed or injured party is given out—the listener listens half-heartedly—then follows the name of the person's city or state and the listener hears his home mentioned—immediately he is all ears—but alas too late because the person's name has already been mentioned and he missed it. This is very disconcerting."

To use the writer's own name to complete the example, the listener would hear: "From Ventura, California, James Campiglia, Jr."

"This makes the listener more attentive if even for a few seconds," Campiglia states. This is what you are striving for, is it not?"

The letter has been turned over to the NAB Radio News Committee.

RADIO EDUCATION IN IOWA

On December 1st, Governor Bourke B. Hickenlooper of Iowa, in cooperation with the Des Moines Radio Council, called a conference of significance to radio education. Meeting in the Senate Committee Room at the State House, outstanding educators representing the Board of Education, the Department of Public Instruction, Iowa University, Iowa State College, Drake University, State Teachers Association, Iowa Parent-Teachers Congress, and leading Iowa broadcasters explored the subject exhaustively. Plans were perfected for a four-point campaign, as follows:

1) A survey of all urban and rural schools in Iowa will be conducted as to the radio and sound equipment of classrooms, utilization of radio, teacher interest, libraries of recordings, etc.

2) Lists of recommended national programs provided by the Office of Education, recently compiled by leading radio educators, together with lists of local programs heard in the state, will be distributed to teachers.

3) Next summer attempts will be made to augment the courses in local universities and colleges to train teachers in the utilization of radio in the classroom.

4) Effort will be made to develop more radio workshops in local colleges and high schools.

Iowa has taken leadership in this field through two outstanding radio stations operated by Iowa University and Iowa State College. Both their radio students and their programming are nationally accepted.

The Des Moines Radio Council, numbering some 70,000 persons, is composed of leaders in all fields of civic, club and educational life. Radio Education is one phase of their activities.

Those broadcasters present at the conference included:

Craig Lawrence—KSO-KRNT, Des Moines
Ralph Evans—Woody Woods, WHO, Des Moines
Buryl Lottridge—WOC, Davenport
Merritt Milligan—KGLO, Mason City
Deane Long—KXEL, Waterloo
Sumner Quarton—WMT, Cedar Rapids
Carl Menzer—WSUI, Iowa City
W. I. Griffiths—WOI, Ames
Earl J. Glade—KSL, Salt Lake City
Dorothy Lewis—NAB, New York

Mr. Craig Lawrence moved that a report of the recommendations be adopted and presented to the Governor, the Right Honorable Bourke B. Hickenlooper.

The following persons will serve on the Committee on Radio Education for the State of Iowa:

Mrs. Cyrus B. Hillis, Director, Des Moines Radio Council, 1625 Sixth Avenue, Des Moines 14, Iowa—Chairman.

Mrs. F. R. Kenison, President, Iowa Congress of Parents and Teachers, Madrid, Iowa.

Dr. Bruce E. Mahan, Director, Extension Division, University of Iowa—member of Federal Radio Education Committee, University of Iowa—Iowa City, Iowa.

Mr. Ralph Evans, Director, Public Relations, Central Broadcasting Co., 1002 Brady Street, Davenport, Iowa.

Mr. Craig Lawrence, Vice-President, Iowa Broadcasting Company—General Manager, KSO-KRNT—Register & Tribune Building, Des Moines, Iowa.

Mr. Edwin G. Barrett, Director Department of Radio, Drake University, 25th and University, Des Moines, Iowa.

Miss Agnes Samuelson, Executive Secretary, Iowa State Teachers Assn., 415 Shops Building, Des Moines, Iowa.

Mrs. R. K. Stoddard, Regional Director, Listener Activities, National Association of Broadcasters, 2212 Country Club Parkway, Cedar Rapids, Iowa.

Mr. W. I. Griffith, Director, WOI—President, Iowa Council for Better Education—Iowa State College, Ames, Iowa.

Mr. William Quarton, Chairman Code Committee, National Association of Broadcasters—Radio Station WMT, Cedar Rapids, Iowa.

Mr. Thomas M. Clark, Secretary, Iowa Assn. of School Boards, Elkhart, Iowa.

Mr. Roger Fleming, Secretary, Iowa Council for Better Education—Iowa Farm Bureau Federation, 1005 Valley Bank Building, Des Moines, Iowa.

Mrs. I. H. Hart, member National Committee A.A.U.W.

Mr. William S. Rupe, member Iowa Board of Education—Publisher Ames Tribune, Ames, Iowa.

Mr. Forrest B. Spaulding, Librarian, Des Moines Public Library, 1st and Locust, Des Moines, Iowa.

Mr. Frank Frost, President, Trades and Labor Assembly, 2nd and Locust, Des Moines, Iowa.

Jessie Parker, State Superintendent, Public Instruction; Mrs. Raymond Sayre, Chairman, Women's Committee, Iowa Farm Bureau, Ackworth; Lee H. Campbell, President, Iowa State Teachers Association; Spencer B. C. Berg, Superintendent Schools, Newton; Grenn Pringre, Principal, Junior High, Muscatine; Hazel V. Thomas, Superintendent Schools, Gerrogordo County, Mason City; H. C. Englebrecht, Superintendent Schools, Nevada; B. R. Miller, Principal, Junior High, Marshalltown; Myron S. Olson, Principal, Junior High, Fort Dodge; Wallace Wood, Principal, Grant Elementary School, Oskaloosa.

PEABODY AWARDS

On Tuesday, December 7th, the New York sub-committee for the George Foster Peabody Radio Awards met at the Women's City Club. Mrs. Harold V. Milligan, President of the National Council of Women, is chairman and her distinguished committee of leading New Yorkers include:

Dr. Harry D. Gideonse, President, Brooklyn College
Dr. Paul Dawson Eddy, President, Adelphia College
Dr. Ralph Sochman, Christ Church, New York
Mrs. Sidney Borg, New York
Mrs. Henriette Harrison, Radio Director, YMCA, New York
Mr. Edwin Hughes, pianist, New York
Mrs. Joseph E. Goodbar, New York City Federation of Women's Clubs
Mr. George Hecht, Parents' Magazine
Miss Dorothy Gordan, National OCD, New York

WOMEN DIRECTORS MEET

Dorothy Lewis, Coordinator of Listener Activity of the National Association of Broadcasters, spent December 10th in Philadelphia, where she met with the Philadelphia Regional Group of the Association of Women Directors—of which Ruth Chilton, WCAU, is National President. Mrs. Lewis made a report on her recent tour. During the day she met with station executives and Radio Council officials.

RTPB TO STUDY FACSIMILE

Panel 7 on Facsimile of the Radio Technical Planning Board is now in process of organization. John V. L. Hogan, Chairman of the NAB Executive Engineering Committee and a nationally known consulting radio engineer, is Chairman of the Panel. Mr. Hogan has conducted facsimile research work for many years and his contributions to this art are important.

Mr. Hogan asks that broadcast engineers having experience or an interest in facsimile communicate with him for the purpose of securing membership on this panel. Those who are unable to take an active part in the work may keep abreast of the panel's activities by becoming observers.

Further information can be obtained directly from John V. L. Hogan, President of WQXR, 730 Fifth Avenue, New York.

IRE WINTER TECHNICAL MEETING

On Friday and Saturday, January 28 and 29, 1944, the Institute of Radio Engineers will hold its winter technical meeting at the Hotel Commodore, New York City. This meeting will be of great interest to all engineers working with electronics and radio.

Many highlights have been planned for the two days of the session covering a large sphere of activities. Under the chairmanship of Dr. L. P. Wheeler, retiring president of the IRE, a general conference will be held on the morning of January 28, at which technical papers will be presented and open discussions held. Dr. W. R. G. Baker, head of the Radio Technical Planning Board, will address a meeting at which Howard S. Frazier, Chairman, Panel 4, Standard Broadcasting, and several other chairmen of the panels will discuss problems and technical activities upon which the panels will be engaged.

E. K. Jett, Chief Engineer of the Federal Communications Commission, will head a discussion by engineers of the FCC covering police, aviation, and maritime service; international point to point problems and allocation problems; and matters of general interest to the Commission as of the time of the convention. Other interesting sessions will be held during the two days of the convention.

A President's luncheon will be given, as well as a banquet at which the presentation of Institute awards will be made and the inauguration of Prof. H. M. Turner of Yale University, President-Elect of the IRE for 1944, will take place.

The American Institute of Electrical Engineers are holding their technical meeting beginning in the early part of the same week. They are reserving their communications papers for presentation on Thursday afternoon, January 27. In this way the participants of the IRE convention may have the opportunity to hear them. On Thursday evening, Major General Colton will speak on "Enemy Communication Equipment" at a joint AIEE-IRE session. Exhibits of the equipment will be shown. Both of these meetings will be held at the Engineering Societies Building, 29 West 39th Street, New York City.

EARPHONES WANTED

The Atlantic County Chapter (New Jersey) of the American Red Cross is now engaged in a project to furnish radio service to the England General Hospital. This is the hospital located in Atlantic City to which many of the overseas wounded are being sent.

NAB is informed that the central radio unit has already been installed, but additional earphones are needed to provide service at the bed of each veteran. Broadcasters who have surplus earphones available are urged to forward them promptly to Monroe L. Mendelsohn, Business Manager, Station WBAB, Atlantic City, New Jersey.

PLAY SAFE

One of our highly reputable member stations advises that a party conducting a rodeo is securing radio time in a manner not consistent with good business practice. Any station approached by a person wanting spot announcements in connection with a rodeo is asked to consult NAB for further information.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, December 13th. It is subject to change.

Wednesday, December 15

Oral Argument Before the Commission

Report No. B-194:

The Voice of The Orange Empire, Inc., Ltd., Santa Ana, Calif.—C. P., **1480 kc.,** 1 KW, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Granted construction permit for new FM station; frequency **46100 kc.;** service area: 4,465 square miles. This action is taken without prejudice to determination of the issues in the hearing on Commission Order No. 79, and is subject to the application of any rules and regulations that may be adopted by the Commission as a result of such hearing; also subject to the condition that compliance with the rules, regulations and standards of the Commission be required when necessary materials become available. (B1-PH-29).

KVAK—S. H. Patterson, Atchison, Kans.—Granted construction permit to increase power from 100 to 250 watts, and make changes in transmitting equipment (B3-P-3550).

DESIGNATED FOR HEARING

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Designated for hearing application for construction permit to change frequency from **910** to **930 kc.,** and authorize nighttime operation with power of 250 watts, day power of 500 watts, unlimited time (B5-P-3552).

WSPR—WSPR, Inc., Springfield, Mass.—Designated for hearing application for construction permit to increase power from 500 watts to 1 KW, employing directional antenna day and night and make changes in transmitting equipment (B1-P-3554).

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Designated for hearing application to move formerly licensed RCA 250-D transmitter to the site of main transmitter to be used as an auxiliary transmitter with power of 250 watts, employing a non-directional antenna both day and night (B3-P-3513).

LICENSE RENEWALS

KXO—Valradio, Inc., El Centro, Calif.—Granted renewal of license for the period ending December 1, 1945.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted renewal of license for the period ending December 1, 1945.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Granted renewal of license for the period ending October 1, 1945.

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Granted renewal of license for the period ending October 1, 1945.

WMAS—WMAS, Inc., Springfield, Mass.—Granted renewal of license for the period ending October 1, 1945.

The Commission granted request of attorney for licensee of station KGNF, North Platte, Nebraska, authorizing change in call letters from KGNF to KODY.

MISCELLANEOUS

WHAM—Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y.—Granted modification of license to change corporate name of licensee to Stromberg-Carlson Company (B1-ML-1160).

WTAL—Capital City Broadcasting Corp., Tallahassee, Fla.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1563).

KTBC—State Capital Broadcasting Assn., Inc., Austin, Tex.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1549).

WJEN-WJEP-WHFM—Stromberg-Carlson Telephone Mfg. Co., area of Rochester, N. Y.—Granted modification of license to change corporate name to Stromberg-Carlson Co. (B1-MLRY-47), (B1-MLRY-48), (B1-MLH-3).

KOH—The Bee, Inc., Reno, Nevada.—Granted modification of license to change corporate name to McClatchy Broadcasting Co. of Nevada (B5-ML-1175).

WDSM—WDSM, Inc., Superior, Wis.—Granted license to cover construction permit which authorized change in power and changes in transmitting equipment (B4-L-1782).

WRRB—WHEC, Inc., area of Rochester, N. Y.—Granted license to cover construction permit for new relay broadcast station (B1-LRE-427).

Placed in pending files the following applications: Green Bay Newspaper Co., Green Bay, Wis. (B4-PH-147); W59 NY, Interstate Broadcasting Co., Inc., New York, N. Y. (B1-MPH-111); KRIC, Inc., Beaumont, Tex. (B3-PH-148); WTZR, Zenith Radio Corp., Chicago, Ill. (B4-MPCT-19).

KGBK—Helen Townsley, area of Great Bend, Kans.—Granted further extension of relay station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than February 1, 1944 (B4-SRY-240).

Granted extension of following relay broadcast station licenses upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event later than February 1, 1944:

WJOT, The Birmingham News Co.; WEIH, WEII, Indianapolis Broadcasting, Inc.; KEID, KEIE, KCMO Broadcasting Co.; KEIV, Nichols and Warinner, Inc.; WRGG, Rome Broadcasting Corp.; WEMV, The WGAR Broadcasting Co.; WEIQ, Cosmopolitan Broadcasting Corp.

KPAK—Wichita Broadcasting Co., area of Wichita Falls, Tex.—Granted voluntary assignment of license to Wichita Broadcasters, a partnership, Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, Trustee, P. K. Smith, Mrs. Claude M. Simpson, Jr. (B3-ALRE-29). Also granted renewal of relay broadcast station KPAK for the period December 1, 1943, to not later than December 1, 1945 (B3-RRE-384).

KEJN—Puget Sound Broadcasting Co., Inc., area of Tacoma, Wash.—Granted extension of relay broadcast station license for station KEJN, upon a temporary basis only, pending determination upon application for renewal of license, in no event later than February 1, 1944 (B5-RRE-83).

WENI—WJW, Inc., area of Cleveland, Ohio.—Granted renewal of license for relay broadcast station WENI for the period ending no later than December 1, 1945, in exact accordance with the present license except to be operated with WJW, Cleveland, Ohio, instead of WJW, Akron, Ohio (B2-RRE-186).

WOKO—WOKO, Inc., Albany, N. Y.—Granted petition for extension of time (to December 20, 1943), within which to file proposed findings in re application for renewal of license.

KOBH—Black Hills Broadcast Co. of Rapid City, Rapid City, S. Dak.—Granted motion to dismiss without prejudice application for construction permit (B4-P-3339, Docket 6430).

Charles Swaringen, et al., d/b as Buckeye Broadcasting Co., Akron, Ohio.—Granted petition to dismiss without prejudice application for construction permit (B2-P-3529, Docket 6559), requesting facilities of WJW.

APPLICATIONS FILED AT FCC

560 Kilocycles

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Extension of special service authorization to operate on **560 kc.**, 500 watts power night, 1 KW daytime, unlimited hours of operation using transmitter authorized by B5-P-3150 as modified for the period 2-1-44 to 5-1-44.

780 Kilocycles

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Extension of special service authorization to operate synchronously with station WBBM from sunset at Lincoln, Nebr., to 12 midnight, CST, for period ending 2-1-46.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Extension of special service authorization to operate synchronously with KFAB from sunset at Lincoln, Nebr., to 12 midnight, CST for the period ending 2-1-46.

790 Kilocycles

KFQD—Wm. J. Wagner, trading as Alaska Broadcasting Co., Anchorage, Alaska.—License to cover construction permit (B-P-3506) which authorized installation of new transmitter and increase in power from 250 watts to 1 KW.

KFQD—Wm. J. Wagner, trading as Alaska Broadcasting Co., Anchorage, Alaska.—Authority to determine operating power by direct measurement of antenna power.

KFQD—Wm. J. Wagner, trading as Alaska Broadcasting Co., Anchorage, Alaska.—License to use old 250 watt composite transmitter as an auxiliary.

1230 Kilocycles

WRBL—The Columbus Broadcasting Co., Inc., Columbus, Ga.—Construction permit to install a synchronous amplifier near Ft. Benning, Georgia, to be operated with **1230 kc.**, 250 watts power and synchronized with WRBL.

1240 Kilocycles

NEW—Charles P. Blackley, Staunton, Va.—Construction permit for a new standard broadcast station to be operated on **1240 kc.**, 250 watts power, unlimited time. Amended: re change in type of transmitter and antenna and change in studio location.

NEW—E. Anthony & Sons, Inc., near Hyannis, Mass.—Construction permit for a new standard broadcast station to be operated on **1240 kc.**, 250 watts power and unlimited hours of operation—facilities of formerly licensed station WOCB.

1340 Kilocycles

WHAT—Independence Broadcasting Co., Inc.—Voluntary transfer of control of licensee corporation from Philadelphia Record Company to William A. Banks—200 shares of common stock, 100%.

1410 Kilocycles

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Modification of license to change corporate name of licensee to American Broadcasting Corporation.

1420 Kilocycles

NEW—Broadcasting Corporation of America, Brawley, Calif.—Construction permit for a new standard broadcast station to be located S. W. of Brawley, Calif., and operated on **1420 kc.**, 1 KW power, unlimited hour of operation.

MISCELLANEOUS

WSOH—The Ohio State University, area of Columbus, Ohio.—License to cover construction permit (B2-PRY-286) which authorized construction of a new relay broadcast station.

NEW—The Crosley Corp., Mason, Ohio.—Construction permit for a new international broadcast station to be operated on **6080, 9590, 11710, 15250, 17800** and **21650 kc.**, 200 KW, A-3 emission. Amended: re transmitter site.

NEW—The Crosley Corp., Mason, Ohio.—Construction permit for a new international broadcast station to be operated on **6080, 9590, 11710, 15250, 17800** and **21650 kc.**, 200 KW, A-3 emission. Amended: re transmitter site.

NEW—The Crosley Corp., Mason, Ohio.—Construction permit for a new international broadcast station to be operated on **6080, 9590, 11710, 15250, 17800** and **21650 kc.**, 200 KW, A-3 emission. Amended: re transmitter site.

W2XMT—Metropolitan Television, Inc., New York, N. Y.—Modification of construction permit (B1-PVB-40 as modified, which authorized construction of a new experimental television broadcast station) for extension of completion date from 12-31-43 to 6-30-44.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

William H. Howe, 122 Jewett St., Lowell, Mass., engaged in selling Lady Ashton Foot Ease, is charged in a complaint with misrepresenting the effectiveness of the preparation. (5089)

F. H. Noble & Co., 535-559 West 59th St., Chicago, manufacturing and selling jeweler's findings and gold solders, is charged in a complaint with the use of unfair acts and practices in commerce. (5092)

Olive Tablet Company, 29 East Fifth Ave., Columbus, Ohio. selling and distributing a medicinal preparation designated "Dr. Edwards' Olive Tablets," and Erwin, Wasey and Co., Graybar Bldg., New York, an advertising agency which prepares, edits and places all advertising material used by The Olive Tablet Co., are charged in a complaint with false advertising and misrepresentation. In advertisements in newspapers, periodicals and other media, the complaint alleges, the respondents represented. among other things, " 'Nudge' Your Lazy Liver Tonight!" and "Olive Tablets are simply wonderful, not only to relieve constipation, but also to stir up liver bile secretion and tone up intestinal muscular action." (5090)

Wakita Herb Co., 110 West 42nd St., New York, is charged in a complaint with false advertising and misrepresentation in connection with the sale of a medicinal preparation designated "Indian Herbal Roots." (5091)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Church & Dwight Co., Inc., 70 Pine St., New York, selling a bicarbonate of soda designated "Arm & Hammer Baking Soda," and "Cow Brand Baking Soda," and Brooke, Smith, French & Dorrance. Inc., 347 Madison Ave., New York, an advertising agency disseminating advertisements for the products, have stipulated to cease and desist representing that the products will prevent shipping fever; that Church & Dwight Co., Inc., now manufactures Arm & Hammer Baking Soda or Cow Brand Baking Soda; that the products possess any therapeutic value in the treatment of "off feed," colds, scours or acetonemia in cattle in excess of that which may result from the action of any such products on any acidity or flatulence which may exist; that the products are general conditioners for hogs or poultry, or possess any therapeutic value in the treatment of influenza. scours or diarrhea in swine in excess of that which may result from the action of such products on any acidity or flatulence; or that the products alone will relieve or cure azoturia, or relieve colds or roup in poultry. (03170)

Dodge, Incorporated, an Illinois corporation with its principal place of business in Chicago, and Dodge, Incorporated, a California corporation with its principal place of business at 401 East Sixth St., Los Angeles, each engaged in the manufacture and sale of trophies, consisting of plaques, medals, statuettes and cups, have entered into separate stipulations in which they and Ray E. Dodge, of Los Angeles, president of both corporations, have agreed to cease and desist from use, in connection with the sale of their merchandise, of any false or misleading price representation which purports to be the retail sales price but which in fact is in excess of the price for which such merchandise is customarily sold, and from directly or inferentially representing, through the use of a fictitious or marked-up price, that the price for which such merchandise is offered for sale is an exceptional price, a low price or a discount price, when the price is that for which such merchandise is customarily sold in the usual course of retail trade. (3761-3762)

Filmland Studios and Film Studios, P. O. Box 1109, Hollywood, Calif., selling and distributing photo enlargements, has stipulated that in connection with the advertisement of his products he will cease and desist from representing that 16 prints and 2 enlargements of developed exposures, or any stated quantity of merchandise, will be furnished to a customer upon receipt of 25 cents, or other amount, unless delivery of such merchandise is made in strict conformity with the offer, and from use of the word "free" or any word of similar meaning as descriptive of an enlargement or any item which forms a part of a combination offer of merchandise for which an inclusive charge is made. (3766)

Geo. C. Gordon Chemical Co., 1100 Hickory St., Kansas City, Mo., selling and distributing a preparation designated "Gordon's Boiled Oil Blended" for use as a vehicle in preparing paints. has stipulated to cease and desist from use of the terms "Boiled Oil Blended" or "Boiled Oil" as a designation for or as descriptive of a preparation other than boiled linseed oil, and from use of any words or terms implying that a preparation containing ingredients other than linseed oil is linseed oil or a blend of linseed oils. (3764)

Green United Stores, Inc., et al.—Nine corporations engaged in the sale and distribution of wearing apparel have stipulated to cease and desist from representing that certain underwear they sell has been manufactured under the supervision of a doctor and has therapeutic value. The stipulation was entered into by the following corporations:

Green United Stores, Inc., 902 Broadway, New York; E-Z Mills, Inc., and its selling agent, A. S. Haight & Co., Inc., 57 Worth St., New York; Carmi-Feature Underwear, Inc., Carmi, Ill., and Century-Beverly Corp., Pottstown, Pa., and their selling agent, the Campe Corp., 85 Franklin St., New York; Brown Knitting Mills, Warsaw, N. Y.; P. H. Hanes Knitting Co., Winston-Salem, N. C., and Appalachian Mills Co., Knoxville, Tenn. (3760)

Lee Products and as Chemi-Culture Laboratories, 4730 Sheridan Rd., Chicago, selling and distributing feminine hygiene preparations, has stipulated to cease and desist from use of the word "Periodic" or other similar connotation as a part of the trade designation of pills or capsules heretofore offered for sale as "Lee's Periodic Pills" or "Lee's Periodic Capsules," or reference to the menstrual period in any way which may indicate that such a preparation has predictable or reliable influence upon such period; from representing that either of the preparations is a well-known formula that has been used successfully for such purpose; from use of symbols or legends such as "XXX" or "triple strength" as indicative of the extra strength or unusual potency of the preparations, and from use of the word "Laboratories" as a part of his trade name until such time as he may actually own or operate a laboratory in connection with his business. (3763)

Skrudland Photo Service, 6444 Diversey Ave., Chicago, engaged in selling photo enlargements, and United Advertising Companies, Inc., 205 North Michigan Ave., Chicago, an advertising agency disseminating advertisements for the products, have stipulated to cease and desist from representing that the offer to sell framed photographic enlargements for 49¢ is a limited offer; that the prices of their enlargements are lower than those at which similar or comparable photo enlargements can be obtained anywhere else; that the dyes used in coloring the products never fade, and that the hand coloring of the photo enlargements is done by an artist. (03171)

United States Beauty Products Corporation, 421 Seventh Ave., New York, selling and distributing beauty and barber supplies, has stipulated that it will cease and desist from the use of any statement or representation conveying the impression or belief that the resources available to the corporation, or employed by it in the interests of its customers, are in excess of what is a fact; that its customer trade is of a magnitude which is an exaggeration of the true facts; that its customers enjoy dividends or benefits which are the result of its merchandising policy, when such representation is not capable of substantiation or that the prices of its merchandise generally are lower by any indicated amount than prices charged by competitors, unless such price representation is true. (3765)

O. B. Whitaker Mfg. Co., 529 Joplin St., Joplin, Mo., selling drug preparations designated "Sar-Tol Cough Syrup," "Sar-Tol Nose Drops" and "Sar-Tol Cough Drops," and Joplin Broadcasting Company, which operates Radio Station WMBH, Joplin, Mo., and which disseminated advertisements for the products on behalf of O. B. Whitaker Mfg. Co., have stipulated to cease and desist from representing that the preparations used alone or in combination prevent or cure colds or have any curative effect on the underlying factors which cause colds, or alone or in combination prevent or cure throat irritations; that alone or in combination they will prevent fatigue, maintain health or maintain or aid in building body resistance; or that Sar-Tol Cough Drops neutralize tobacco, onion, or other odors. (03172)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Chemicals of the South, Tennessee Valley Associated Marketers, Bond Anti-Freeze Factory, Lo-Temp Chemical Works, and Lo-Zone Chemical Works, with offices and principal place of business at 117-119 Ninth Ave. North, Nashville, Tenn., manufacturing and distributing products designated "Lo-Temp Anti-Freeze," "Lo-Zone Anti-Freeze" and "Bond Top Line Anti-Freeze," intended for use in the cooling systems of automobiles and other combustion types of engines, have been ordered to cease and desist from misrepresentation of the products. (4999)

McFadden 3 Sisters Springs, with their principal place of business at Hot Springs National Park, Ark., have been ordered to cease and desist from misrepresentation in connection with the sale and distribution of mineral waters. (4940)

J. Silverman and Associates, General Forwarding System, and Commercial Pen Co., 821 Market St., San Francisco, selling and distributing post cards intended for use by creditors and collection agencies in obtaining information concerning debtors, has been ordered to cease and desist from false and misleading representations and unfair and deceptive acts and practices in commerce. (4846)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 51, December 17, 1943

PRICE OUTLINES CODE CHANGES

In last week's NAB Reports (p. 491), a brief outline of the new Censorship Code was given. The following press release from the Office of Censorship more completely covers the subject:

Revised Codes for press and radio, designed to encourage a more liberal presentation of war news in publications of all classes and on the air, have been completed and will become effective immediately.

Numerous restrictive requests of the Government have been eliminated. Others have been modified. Not a single new request has been added.

The changes are expected to open the way for more news regarding, among other things, war production; operations of the Merchant Marine; diplomatic negotiations not directly connected with military operations; and weather conditions. The weather modification was previously announced but now is incorporated formally in the Codes for the first time.

In addition, by amendment of a basic clause of the Codes, the Office of Censorship announces its intention to assume wider responsibility in clearing material of all classes for publication and broadcast, whether or not such material has been announced officially by other agencies of the Government.

Director of Censorship Byron Price said:

> "These revisions are the result of discussions which have been in progress for several weeks. On October 12 when the Weather clause was modified, it was announced that further relaxations were under consideration. Since then every part of the Codes has been examined in detail in consultation with all other interested agencies. The revisions reflect the studied opinion of the Government that more information can now be published and broadcast without danger to national security.
>
> "This conclusion in no way presupposes an early end of the war. It does take account of the fact that the war has taken an important turn from the defensive to the offensive.
>
> "Unfortunately it still is necessary to retain in the Codes restrictive requests touching many fields of war activity, and the need for unrelenting vigilance in those fields remains as great as ever."

The first edition of the Codes, under which broadcasters and editors of newspapers, magazines, books, and all other classes of publications have loyally cooperated in voluntarily withholding information at the Government's request, appeared on January 15, 1942. A second edition was issued on June 15, 1942, and a third on February 1, 1943.

The present edition is based, like all of its predecessors, on a single consideration,—the withholding of information having to do with national security. That one purpose alone is the basis of every remaining request. The Codes make no incursions into the fields of editorial opinion, criticism of the Government, or newspaper or broadcasting ethics.

The principal changes in the Codes, in order, are:

1. Heretofore the preamble has asked that certain information, listed in detail, be withheld unless made available officially "by appropriate authority." The revised clause has the effect of making the Office of Censorship itself an appropriate authority. It asks that the specified information be withheld unless it is made available by appropriate authority *"or specifically cleared by the Office of Censorship."* Thus the standing invitation to appeal doubtful cases to this Office is given added emphasis.

2. The suggestion that APO or FPO addresses be used for servicemen at sea or overseas is eliminated. The Army mail system is undergoing changes, so that APO and FPO addresses, without unit identifications, *are no longer effective for the delivery of mail.* The Codes continue to ask that unit identifications and ship names not be published for servicemen at sea or overseas.

3. The request to withhold unit identifications for servicemen on duty on anti-aircraft, coastal, or invasion defense within the United States is eliminated as no longer necessary.

4. The language making the Navy the only appropriate authority for information concerning the sinking or damaging from war causes of merchant vessels is eliminated. Both the Navy and the War Shipping Administration will be recognized hereafter by the Office of Censorship as appropriate authority for information concerning the movements, sinking or damaging of merchant vessels in any waters. This will allow the story of the vital and heroic part of the Merchant Marine in winning the war to be told more fully by the War Shipping Administration.

5. The restriction on information concerning civilian defense communication control centers is eliminated as no longer necessary.

6. The clause concerning military installations outside the United States is clarified.

7. Restrictions against Nation-wide summaries of war production, progress of production, plant details and capacity, and movements of Lend-Lease material are eliminated. An entirely new production clause restricts only secret weapons and detailed breakdowns for specific types, such as 155 m.m. guns, etc. The restricted list of critical materials is reduced by almost one-half, the following being eliminated: aluminum, artificial rubber, zinc, magnesium, silk, cork, copper, optical glass, and mercury. Restrictions are retained with respect to tin, natural rubber, uranium, chromium, tantalum, manganese, quinine, tungsten, platinum and high octane gasoline. War production in general has now reached so great a volume that there is no need to hide it under a bushel.

8. The sabotage clause is shortened.

9. Relaxations in the weather provisions of the Codes, announced some weeks ago, are incorporated in the revised editions. The Broadcasters Code revision contains a special note concerning handling of outdoors events under the new weather provisions.

10. The Notes on Rumors clause is eliminated as no longer necessary.

11. The Military Intelligence clause is shortened.

12. All requests concerning resettlement centers and location of war prisoner camps are eliminated. The

PRICE OUTLINES CODE CHANGES

(Continued from page 499)

FBI, as well as the War Department, is recognized as appropriate authority for information about escaped prisoners of war, in order to speed up the handling of these stories.

13. The clause dealing with war news coming into the United States is shortened. Broadcasters will find new language concerning handling of broadcasts from Canada that parallels the Press Code on this point.

14. The request against premature disclosure of diplomatic discussions is amended and narrowed to conform more closely to the administrative interpretation which has been applied heretofore in actual practice. This clause has been coupled with the request concerning war plans so that the new version reads: (No disclosure of) "Secret war plans, or diplomatic negotiations or conversations which concern military operations."

15. The clause dealing with forest fires is eliminated as no longer necessary.

Except for slight differences in handling weather, news sections of the Press and Broadcasters Codes parallel each other in every respect.

The Program Section of the Broadcasters Code is unchanged, with all present provisions for handling of request, quiz, man-on-the-street programs, forums, etc., continued. The Foreign Language Section has been clarified so as to emphasize the duties of station censors and monitors and to omit the request for English language translations.

The Office of Censorship constantly is seeking to keep the Codes related to changes in the Nation's situation in the war, and will act speedily to make additional relaxations as they are possible.

The continued excellent cooperation of the press and broadcasters in observing the Codes' provisions is earnestly requested.

STANDARD BROADCAST PANEL TO MEET

The first meeting of Panel 4 (Standard Broadcasting) of the Radio Technical Planning Board will be held on Wednesday, January 5, at the Hotel Pennsylvania, New York City. The meeting is called for ten A. M. and, according to the announcement by Chairman Howard S. Frazier, it is anticipated that the meeting will last all day and into the early evening. Many of the members will travel a considerable distance and it is therefore desired to utilize the time of the membership to the fullest extent possible.

A tentative agenda of the meeting, including topics proposed for study by the Panel, is now in preparation. Broadcasters having suggested topics for study and recommendation by the Panel should communicate immediately with the Chairman at NAB headquarters.

The complete membership and representation of the Panel as of December 15, 1943, is as follows:

INDUSTRY'S SERVICE TO PUBLIC HEALTH REPORTED

With 204 NAB stations reporting, public health programs reaching a total of 197 weekly were described by Willard D. Egolf, Assistant to the President of NAB, in an address this week before the Health Conference of the New York Academy of Medicine entitled "Does Radio Owe a Doctor Bill?" These were local shows, network programs being mentioned in addition. 137 stations account for these 197 public health features weekly, the remainder concentrating their service on special projects, control of epidemics and periodic requests from health departments of medical associations, in which news periods, commentators, forums, interviews and other established features are utilized.

"Does radio owe a doctor bill? I use that phrase symbolically," Egolf stated, "because a broadcaster's obligation to serve the public health is primarily an obligation to the medical profession which is guardian of that precious commodity. Only through the cooperation of the medical profession and its designated organizations can a station achieve a public health service. Only at the instance of the medical profession or its representatives can machinery be set in motion which will accomplish public health education."

Many of the local health programs reported by stations have been on the air longer than five years, a surprising number longer than ten years.

Network reports show that during the past year the four major networks originated 902 programs dealing with the public health.

83% of the local health shows were broadcast in daytime hours, between 9:00 and 6:00 P. M. Approximately 95% of the network shows were in that time bracket.

"Guardianship of the public health by the medical profession is a labor of love," Egolf concluded, "whereas a broadcaster's obligation in that respect is induced by law. The law, however, does not define the manner in which stations shall discharge this responsibility. If definitions are needed, let us find them through the medium of friendly discussions reflecting the needs of every city, town and cross-roads community—in those communities, for those communities—throughout the land."

Dorothy Lewis, NAB Coordinator of Listener Activity, also attended the sessions and participated in the discussions.

SEEK TO IMPROVE TUBE DISTRIBUTION

The development of a program to provide dealers with more balanced stocks of radio tubes for civilian use was urged by the Electronics Distributors Industry Advisory Committee at a meeting with War Production Board representatives in Washington, WPB announced today.

The committee was of the opinion that wider distribution of non-military receiving tubes for household sets would be accomplished if the interchange of various types of such tubes between manufacturers and the pro-rating of tube supplies among distributors on the basis of their 1941 deliveries could be accomplished. This would not increase the number of tubes available for civilians, but would improve distribution. Some manufacturers now supply tubes to distributors on the basis of precedence of orders, although others have been using the proposed prorata distribution system voluntarily.

The committee recommended that a task group be appointed to make suggestions to WPB on the redistribution of excess stocks of electronic components no longer required in military programs.

ANOTHER JOB WELL DONE

Radio went "all out" for the National War Fund in its campaign to raise $125,000,000 for the USO, United Seamen's Service, War Prisoner's Aid and fourteen Allied war agencies, according to Joseph R. Busk, Chairman of the Radio Advertising Committee. This Committee, together with the Radio Committee, headed by Neville Miller, President of the National Association of Broadcasters, served in two USO campaigns, prior to the organization of the National Far Fund.

"Without a single exception every radio station and network contributed time generously to the Fund," Mr. Busk said. "Radio advertisers, both national and local, cooperated to the fullest with the OWI Allocation Plan and the War Fund's Radio Department."

A total of 398 top flight commercial network programs projected the story of the agencies in the War Fund and the need for support, during the October-December 7th period, Mr. Busk continued. The Hollywood Victory Committee contributed a star studded special program and Sandra Michael, Peabody Award Winner, wrote an original radio drama for the Fund, entitled "Who is Charlie," which was staged by CBS with Orson Welles in the lead.

"Mr. Miller's Committee enlisted 100% cooperation from local stations in playing a series of transcriptions built around five minute entertainment features with Gracie Fields, Dick Hayms, Yvette, Helen Twelvetrees, Norman Lloyd, Raymond Massey and Alec Templeton", Mr. Busk said. "We distributed also recorded talks by Prescott S. Bush, National Campaign Chairman, John D. Rockefeller, Jr., Eric Johnston, President of the United States Chamber of Commerce, William Green, American Federation of Labor head, and Philip Murray, President of the CIO."

Describing the work of his Committee, Mr. Busk said that together with the OWI, the members contacted the producers of commercial shows contributing participation to the Fund to develop the best way the story of the campaign could be unfolded. In some instances, the stars made personal pleas, in many dramatic programs the War Fund was incorporated into the script, Mr. Busk explained.

"The time and effort devoted by some of the leading copywriters in the advertising agency business to the development of several hundred individual National War Fund commercials is deserving of especial praise", Mr. Busk said.

He also wished to acknowledge the active interest and cooperation of Don Stauffer, Director of Radio, and William Spire, Chief of the Allocation Division of the Office of War Information.

CALLAHAN LEAVES TREASURY

Vincent F. Callahan, radio executive and former newspaperman, has resigned as Director of Advertising, Press and Radio of the War Finance Division of the Treasury Department. He leaves the Treasury to return to private business.

In 1941, Mr. Callahan was appointed Chief of Radio for the Defense Savings Staff. Later he was placed in charge of all advertising, press and radio in connection with the promotion of the sale of War Bonds.

WICHITA NAMES PEABODY GROUP

Professor Forest Whan of the University of Wichita, Chairman of the George Foster Peabody Radio Award sub-committee for Wichita, Kansas, has submitted the names of those people, selected because of their varying interests and experiences, who have served on his committee. They are:

Mrs. O. A. Beech, President of Beech Aircraft.

Mrs. Justus Fugate, Past President of the Board of Regents of the University of Wichita.

Judge W. F. Lilleston, Attorney at Law.

Mr. Sylvester A. Long, President of S. A. Long Electric.

Dr. William Jardine, President of University of Wichita, formerly Secretary of Agriculture, President of Kansas State University.

Senator Henry J. Allen, President of British Children Relief.

Dr. Earl Davis, Music Critic.

Mr. Sid A. Coleman, Radio Editor of the Beacon.

Mrs. Clarence Swallow, President of Twentieth Century.

FCC APPROVES THREE YEAR LICENSE

The Federal Communications Commission today announced the adoption of an amendment to its rules and regulations looking toward the issuance of standard broadcast licenses for a normal license period of three years, the maximum period authorized under the Communications Act of 1934. The present license period is two years.

Initial renewals will be for staggered periods, ranging from one year to two years and nine months. Thereafter, all regular licenses will be for the full three-year period. In this way the plan will be placed in operation in such a manner as to spread the work load incident to examination of applications for renewals over the full three-year period. Stations are grouped in order of the different license expiration dates in such manner as to include in each group a fair cross-section of the entire industry. This will automatically accomplish a fair distribution of the work load on renewal applications.

"This action is in line with the policy of the Federal Communications Commission and its predecessor, the Federal Radio Commission, to extend the length of licenses whenever the advancement of the radio art and the growth of the radio industry seemed to warrant such extension," Chairman James Lawrence Fly said.

"In deciding the matter of extending the normal term of licenses, the Commission has always had to consider the concept of a license as a public trust and the need of the industry for all the assurance and stability that seemed consistent with the public trust concept."

In 1927, when the Federal Radio Commission was first organized, licenses were issued for sixty days. In 1928, the normal license of a broadcast station was a three-month period. This was increased to six months in 1931. In 1939, the Federal Communications Commission authorized the issuance of licenses for one-year periods, and in October, 1941, increased the period to two years.

(A copy of Section 3.34 of the Commission's Rules and Regulations, as amended, is attached.)

Report No. 75—(RULES AND REGULATIONS)

The Commission on December 14, 1943, adopted the following amendment of Section 3.34 of the Rules and Regulations, to become effective with respect to licenses granted on and after December 15, 1943:

Sec. 3.34 *Normal license period.*—All standard broadcast station licenses will be issued for a normal license period of 3 years. Licenses will be issued to expire at the hour of 3 a.m., Eastern Standard Time, in accordance with the following schedule, and at three-year intervals thereafter:

(a) For stations operating on the frequencies 640, 650, 660, 670, 680, 690, 700, 710, 720, 730, 740, 750, 760, 770, 780, 800, 810, 820, 830, 840, 850, 860, 870, 880, 890, 900, 940 kilocycles, November 1, 1946.

(b) For stations operating on the frequencies 990, 1000, 1010, 1020, 1030, 1040, 1050, 1060, 1070, 1080, 1090, 1100, 1110, 1120, 1130, 1140, 1160, 1170, 1180, 1190, 1200, 1210, 1220, 1500, 1510, 1520, 1530, 1540, 1550, 1560, 1570, 1580 kilocycles, May 1, 1945.

(c) For stations operating on the frequencies 550, 560, 570, 580, 590, 600, 610, 620, 630, 790 kilocycles, May 1, 1946.

(d) For stations operating on the frequencies 910, 920, 930, 950, 960, 970, 980, 1150, 1250 kilocycles, May 1, 1947.

(e) For stations operating on the frequencies 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, kilocycles, November 1, 1945.

(f) For stations operating on the frequencies 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, 1600 kilocycles, November 1, 1947.

(g) For stations operating on the frequency 1230 kilocycles, February 1, 1946.

(h) For stations operating on the frequency 1240 kilocycles, February 1, 1946.

(i) For stations operating on the frequency 1340 kilocycles, February 1, 1947.

(j) For stations operating on the frequency 1400 kilocycles, August 1, 1947.

(k) For stations operating on the frequency 1450 kilocycles, February 1, 1948.

(l) For stations operating on the frequency 1490 kilocycles, August 1, 1948.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

No broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, December 20th.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WKZO—WKZO, Inc. (Assignor), John E. Fetzer and Rhea Y. Fetzer, d/b as Fetzer Broadcasting Co. (Assignee), Kalamazoo, Mich.—Granted consent to voluntary assignment of license of Station WKZO, from WKZO, Inc., to John E. Fetzer and Rhea Y. Fetzer, d/b as Fetzer Broadcasting Co. (No monetary consideration involved.) (B2-AL-287).

KWG—McClatchy Broadcasting Co., Stockton, Calif.—Adopted an order granting petition to reinstate and grant application for construction permit to make changes in the transmitter and antenna system and increase power from 100 to 250 watts (B5-P-3498; Docket No. 6427).

KROY—Royal Miller, Marion Miller, L. H. Penney and Gladys W. Penney, a partnership, d/b as Royal Miller Radio, Sacramento, Calif.—Adopted an order granting petition to reinstate and grant application for construction permit to install new transmitter and increase power from 100 to 250 watts (B5-P-3497; Docket No. 6428).

The Commission granted request of Bamberger Broadcasting Service, Inc., licensee of high frequency (FM) broadcast station WOR-FM, to change call letters from WOR-FM to WBAM.

LICENSE RENEWALS

WBAB—Press-Union Publishing Co., Atlantic City, N. J.—Granted renewal of license for the period ending December 1, 1945.

WDAN—Northwestern Publishing Co., Danville, Ill.—Granted renewal of license for the period ending December 1, 1945.

WKNY—Kingston Broadcasting Corp., Kingston, N. Y.—Granted renewal of license for the period ending December 1, 1945.

KWAL—Silver Broadcasting Co., Wallace, Idaho.—Granted renewal of license for the period ending October 1, 1945.

KOMA—KOMA, Inc., Oklahoma City, Okla.—The Commission, pursuant to Section 1.362, of its rules, directed that KOMA, Inc., licensee of Station KOMA, be asked to submit an application for renewal of license so that it may be set for hearing on the question of continued operation on **1520 kc.**, on the question of interference to Guatemala, and whether or not operation should be changed to prevent such interference to Guatemala. (Applications of KOMA to change frequency from **1520** to **690 kc.** and related applications of Hugh J. Powell (KGGF), Coffeyville, Kans., for renewal of license and for increase of power from 500 watts to 1000 watts on **690 kc.** were heretofore set for hearing.)

MISCELLANEOUS

KGY—KGY, Inc., Olympia, Wash.—Granted license to cover construction permit which authorized increase in power from 100 to 250 watts, and changes in transmitting equipment (B5-L-1783); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1565).

Granted renewal of following relay broadcast station licenses for the period ending in no event later than December 1, 1945: KEIQ, KEIR, Ben S. McGlashan; KEGZ, Symons Broadcasting Co.; WBCZ, WHEB, Inc.

David Ashton Brown, Marion, Ohio.—Granted request to dismiss without prejudice application for new experimental relay station.

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted motion to dismiss without prejudice application for construction permit to move present auxiliary transmitter to site of main transmitter and use 250 watts power.

APPLICATIONS FILED AT FCC

570 Kilocycles

WMCA—Cosmopolitan Broadcasting Corp., New York, N. Y.—Modification of license to change corporate name of licensee to WMCA, Incorporated.

1230 Kilocycles

NEW—American Colonial Broadcasting Corporation, Arecibo, Puerto Rico.—Construction permit for a new standard broadcast station to be operated on **1230 kc.**, 250 watts power, unlimited hours of operation.

1240 Kilocycles

WBIR—J. W. Birdwell, Knoxville, Tenn.—Voluntary assignment of license to American Broadcasting Corporation.

1490 Kilocycles

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Relinquishment of control of licensee corporation by Worth Kramer through sale of 28 shares of common stock to Eugene R. Custer and Richard M. Venable.

1520 Kilocycles

NEW—Calumet Broadcasting Corp., Hammond, Ind.—Construction permit for a new standard broadcast station to be operated on **1520 kc.**, 5 KW power, daytime hours of operation.

FM APPLICATION

NEW—Columbia Broadcasting System, Inc., Hollywood, Calif.—Construction permit for a new high frequency (FM) broadcast station to be operated on **43100 kc.** with coverage of 34,000 square miles.

MISCELLANEOUS

KNBC—National Broadcasting Co., Inc., area of San Franscisco, Calif.—License to cover construction permit (B5-PRY-290), which authorized installation of new transmitter and change in power.

KEJK—National Broadcasting Co., Inc., area of San Francisco, Calif.—License to cover construction permit (B5-PRE-434), which authorized installation of a new transmitter.

WEIQ—Cosmopolitan Broadcasting Corp., area of New York, N. Y.—Modification of license to change corporate name of licensee to WMCA, Incorporated.

WIEH—Cosmopolitan Broadcasting Corp., area of New York, N. Y.—Modification of license to change corporate name of licensee to WMCA, Incorporated.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Federal Military Equipment Corporation and Harry Drath, Max Schwartz and Al B. Wolf, individually and as officers of the corporation, all of 33 Union Square, New York, are charged in a complaint issued with misrepresentation. The respondents are engaged in the sale and distribution of military insignia, clothing and novelties. (5096)

Globe Trading Company, Inc., Leon Shutz and Rothermel Wise, individually and as officials of the corporation, and Theodore E. Ullman, Maxwell M. Ullman and Herman Ullman, all of 119 North 8th Street, Reading, Pa., manufacturing and distributing wool products and other merchandise, are charged in a complaint issued with violation of the Wool Products Labeling Act of 1939 and of the Federal Trade Commission Act. (5098)

Grand Rapids Furniture House, 600 West Manchester Blvd., Los Angeles, selling and distributing furniture, is charged in a complaint with misrepresentation. (5095)

Gulf & West Indies Co., Inc.—A complaint charging misrepresentation in connection with the sale of chamois skins has been issued against Gulf & West Indies Co., Inc., 23 Murray St., New York, and its officers, Milton Cohn, Victor Lambiase and Isidore Faitt. (5093)

Imperial Drug Exchange, Inc., trading as Dupree Medical Company, and Abraham Parodney, individually and as an officer of the corporation, all of 20 East 17th Street, New York, are charged in the complaint with false advertising and misrepresentation. (5094)

STIPULATIONS

During the past week the Commission announced no stipulations.

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Bernard Engineering Company, 709 Market Street, Camden, N. J., its president, Lionel Bernard, and William I. Miller, trading as Miller Manufacturing Co., 1100 North 32nd Street, Camden, N. J., have been ordered to cease and desist from misrepresentation of a preparation designated "Wonder-Solv," recommended by them for use in the cooling systems of automobile and other combustion type engines. (4979)

Gladstone Bros., 110 Fifth Ave., New York, and also doing business as Aaron Leonard Company at the same address, have been ordered to cease and desist from violation of the Wool Products Labeling Act of 1939 and the Federal Trade Commission Act. (4960)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS

1760 N STREET, N. W. WASHINGTON 6, D. C. Vol. 11, No. 52, December 24, 1943

MERRY CHRISTMAS
AND
A HAPPY NEW YEAR

INDUSTRY EMPLOYMENT AND PAY DATA

The Federal Communications Commission in a press release December 22, presented employment and compensation data for standard broadcasting stations and networks covering the week of October 17, 1943. The forms for reporting such information to the FCC were sent out October 9 and the NAB Reports of October 15 carried an appeal to stations to complete the form and return it as quickly as possible. On December 3rd, the NAB Reports carried another appeal pointing out that 100 stations had, at that time, failed to return reports.

The release by the FCC shows that responses were received from 815 standard broadcast stations and 10 networks. Approximately 52 stations failed to return their forms in time to be included in the compilation.

The 815 stations and 10 networks, during the week of October 17, 1943, employed 24,515 persons full-time and 4,862 persons part-time. Total compensation for the week to all full-time employees was $1,366,687. The weekly average for full-time employees was $55.75. This represents an increase of 6.6% over the average of $52.32 reported for a week in October 1942. The average weekly compensation for full-time employees excluding executives was $49.50, an increase of 7.3% over the 1942 average of $46.12.

The FCC in its press release expressed appreciation for the cooperation of the great majority of stations and networks which fulfilled its request promptly.

The interest of the NAB in these data is based upon their informational value to the industry in labor negotiation. It was upon NAB request that the Commission last year sent out the employee data forms in advance of its annual report forms and released employee data prior to the close of the year. The Commission is rendering a real service to the industry in following this procedure and in preparing a comprehensive report at an early date.

In the following table employment and compensation figures are presented for full-time employees for the total industry reporting, for networks and their key stations and for 806 broadcast stations. This represents summary information. In its release of December 22, the FCC made available like information for station employees by geographic districts and regions for both full-time and part-time employees. Figures for individual districts and regions will be made available upon request.

The Commission will release additional tabulations by class of station, by city size and by metropolitan districts at some future date. As these data become available NAB will undertake to furnish upon request the particular information which compares in employee data with the station classification, city size and geographic location of the inquiring station.

NAVY WARCASTS

Cooperating with the Industrial Incentive Division of the Navy Department, NAB is endeavoring to enlist the cooperation of broadcast stations located in selected centers of war production in a plan to carry news of the war to workers at their machines.

Termed "warcasts" the Navy's plan calls for a special kind of news broadcast to be sent from the radio station's news room over leased wire to war plants having public address systems. For the past several months this warcast plan has been in operation in several cities and the techniques have been perfected.

Assured of the feasibility of the plan, the NAB War Committee has agreed to cooperate in every possible way with the Navy Department in promoting it in other production centers. On next Monday (December 27) full details of the plan, documented with certain facts, will be sent out to the manager of one radio station in 30 selected cities. He will be asked to secure the cooperation of other radio stations in the community in getting the plan in operation.

The cost, including leased lines and additional personnel, if any, would be defrayed by the plants receiving the warcasts. This plan presents a splendid opportunity for radio stations in the selected communities to render a direct and genuine service to the war effort and NAB heartily commends it for favorable consideration.

SUMMARY OF FUNCTIONAL EMPLOYEE DATA OF 10 NETWORKS AND 815 STANDARD BROADCAST STATIONS AS REPORTED TO THE COMMISSION

FULL-TIME EMPLOYEES—FOR THE WEEK BEGINNING OCTOBER 17, 1943

NOTE: Data in this release, with the exception of columns (2), (3), (4) are not exactly comparable with similar releases for prior years, because the network reports include the employees of eight 50kw stations and one 5kw station. In prior years, an apportionment of these employees and their compensation had been made by the Commission between the networks and stations.

RADIO STATIONS HELPED LIFT WASHINGTON, D. C., NEWS BLACKOUT

(Reprinted from Washington *Times-Herald*, Dec. 21)

Washington radio stations yesterday and last night cooperated with local newspapers to bring news to the public during the work stoppage caused by a "continuous meeting" of the Columbia Typographical Union, involving printers on the four Washington newspapers.

With the presses of the District dailies halted for the first time in their history, all local broadcasting stations devoted special periods to programs of news gathered by the newspapers.

WOL Has Four Newscasts

Among the first to offer its cooperation was station WOL, which set up four special newscasts by its featured commentator, Billy Repaid.

Local news prepared by the *Times-Herald* was broadcast by Repaid at 11 a. m., 12:45, 4:15 and 10:30 p. m., and by a news announcer over WRC at 1 and 6 p. m.

Other WOL newscasts were introduced with the statement:

"This special news program is brought to you as a public service in cooperation with the Washington *Times-Herald*, *Evening Star*, *Washington Daily News*, and the *Washington Post*."

Besides its regularly scheduled news programs, Station WMAL broadcast six special newscasts. Peoples Drug Stores, during the "Pin Money from Peoples" period, devoted 15 minutes to local happenings, and Commentator Clark Mahoney gave special attention to the progress of negotiations between the printers, WLB, and the publishers.

Stations WTOP, WWDC, and WINX donated periods of their regular broadcasts.

All local stations returned to regular schedules late last night, when it was learned the printers would return to their jobs.

KATE SMITH AND TED COLLINS RECORD "REPORT ON RADIO"

Based on an advertisement written by Raymond Rubicam highlighting radio's accomplishments in the war, Kate Smith, Ted Collins and cast have recorded a graphic fifteen minute presentation entitled "Report on Radio" which is now being distributed to CBS affiliates, according to Paul Hollister, Vice-President, CBS.

The program features the dramatic interruption of America's peacetime pursuits on Sunday, December 7, 1941, when radio brought the astounding news from Pearl Harbor, and follows with an impressive re-enactment of radio's important role in the war since that date.

Widespread acceptance is expected for this show, in which radio's top flight talent tells radio's story to the listening audience. Kate Smith and Ted Collins are supported by an excellent cast and expert production.

Reprints of the Rubicam full page newspaper advertisement, source of much comment this fall, were distributed to all networks and stations with a letter from Neville Miller, President of NAB, urging that the material be given full publication and developed into radio programs.

The CBS response, evident in the Kate Smith, Ted Collins show, opens a new phase in the long range effort

to tell radio's story over the radio. NAB is proceeding with fore-laid plans to get maximum distribution for the pressings. It is hoped that the format will be adopted by all elements of the broadcasting industry.

SOME TUBE RELIEF IN SIGHT

A definite program for the production in the first quarter of 1944 of at least 4,500,000 radio tubes of critical types for civilian receiving sets was announced today by the WPB Radio and Radar Division.

These tubes for household type radio sets are being scheduled for production in sizable quantities by plants best equipped to produce them, the Domestic and Foreign Radio Branch of the Radio and Radar Division said.

It is expected that tubes will continue to reach civilian outlets in increasing quantities as the new program gets under way.

The cooperation of radio servicemen and dealers is expected in seeing that the tubes first reach householders who have no sets in operation because of lack of tubes.

Editor's Note:

While NAB is gratified by the foregoing announcement of first quarter tube production for receivers, it is not in agreement on quantity.

The announced production, while helpful, represents only approximately one-half the number of tubes needed.

4,500,000 tubes is regarded as a "token production," in recognition of the need, but far from a quantitative solution of the problem.

RADIO TUBE BLACK MARKET?

These headlines appear at the top of the front page of NAB *Swap Bulletin* dated December 24, 1943.

Station managers are urged to read this front page in detail and to make reply. Just two facts are wanted: (1) Whether there is a black market; (2) how it works. Findings will be relayed to Office of Civilian Requirements.

INFANTILE PARALYSIS CAMPAIGN

On Monday, December 27, NAB President Miller, chairman, National Radio Division, The National Foundation for Infantile Paralysis, will mail all stations a letter soliciting their cooperation in the 1944 campaign.

Shortly thereafter stations will receive, from the Radio Division, various suggestions and types of material, both live and transcribed. Mr. Miller pointed out that the broadcast industry had accepted an ever increasing part in the struggle for the cure and prevention of infantile paralysis. He expressed confidence that a new high mark in achievement would result in the forthcoming campaign.

During the summer of 1943 the infantile palaysis epidemic in the several states claimed 12,000 Americans.

ATT: STATION MANAGER

Public Health Reports May Still Be Sent In

By December 13 204 stations returned the questionnaire covering local program service to the public health.

This material was the basis of an address made to the Health Conference of the New York Academy of Medicine on December 14 by Willard D. Egolf, Assistant to the President, NAB.

More stations have replied since that time. Final figures will be revised to include all stations replying. Please let us have your answer, so that the final record will be as comprehensive as possible. If you prefer, send a letter, giving title of show or shows, length, days and hours of broadcast, how long on the air, source of material, remarks, etc.

IRE WINTER TECHNICAL MEETING

The winter technical meeting of the Institute of Radio Engineers is to be held in New York on Friday and Saturday, January 28-29, 1944. Hubert M. Turner, Associate Professor of electrical engineering at Yale University, will be installed as president, succeeding Dr. Lynds E. Wheeler, head of the Engineering Department's Information Division of FCC.

At the Friday session (28), W. R. G. Baker, Chairman of the Radio Technical Planning Board, and several panel chairmen will discuss the work of RTPB. At the banquet that evening, the medal of honer awarded by IRE in recognition of distinguished service in radio communication, will be bestowed upon Harraden Pratt.

The Morris Liebmann Memorial Prize will be awarded to W. L. Barrow. In addition, Fellowship Awards will be bestowed upon S. L. Bailey, C. R. Burrows, M. G. Crosby, C. B. Feldman, Keith Henney, D. O. North, K. A. Norton, S. W. Seeley, D. B. Sinclair, Leo Young and Harry Diamond.

The Saturday session will be featured by a symposium discussion in which E. K. Jett, Chief Engineer of the FCC, will discuss "Engineering Work of the Federal Communications Commission," and G. P. Adair, Assistant Chief Engineer of the FCC, will talk upon "Timely Broadcast Matters." W. N. Krebs, Chief of the Safety and Special Services Division of FCC, will lead a discussion on "Police, Aviation and Maritime Services," while P. F. Siling, Chief of the International Division, FCC Engineering Department, will discuss "International Point-to-Point and Allocation Problems."

Saturday evening there will be a joint session between the IRE membership and the American Institute of Electrical Engineers.

These sessions are of great significance to those interested in radio engineering matters.

WHO BARN DANCE PLAYS TO $138,300.00 WAR BOND HOUSE

A year ago WHO discontinued the public performance of its celebrated Barn Dance, to cooperate with ODT and cut down on fan travel, moving the show to the studios.

On November 6, however, announcement was made that the WHO Barn Dance would show at the Shrine Auditorium in Des Moines three weeks from that time, November 27, one night only. Seats would go only to those who bought war bonds through WHO.

The house was scaled at $100.00, $50.00 and $25.00 to get the "little fellows."

Heavy promotion followed for three weeks and when the show went on the air the Shrine Auditorium was filled with 3,680 Iowa Barn Dance Frolic fans, 2,544 at $25.00, 778 at $50.00 and 358 at $100.00 for a total of $138,300.00 in Series E War Bonds, all purchased through WHO.

(*NAB welcomes stories from stations for* NAB REPORTS)

NOW 912 STATIONS

During the month of November, the FCC granted one new construction permit and cancelled one construction permit. One operating station was also deleted. No changes in the number of stations were made during August, September and October. There follows a comparative table of the number of stations by months:

	1942	1943											
	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

No broadcast hearings are scheduled before the Commission for the week beginning Monday, December 27.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WEIM—Ruben E. Aronheim (Assignor), Mitchell G. Meyers, Ruben E. Aronheim & Milton H. Meyers, d/b as Radio Station WEIM, Fitchburg, Mass.—Granted consent to voluntary assignment of license for station WEIM, from Ruben E. Aronheim to Mitchell G. Meyers, Ruben E. Aronheim, and Milton H. Meyers, copartners, doing business as Radio Station WEIM, a newly formed partnership, for a consideration of $12,788.88, which is the book value of 66-2/3 percent interest in the license (B1-AL-388).

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Upon consideration of the petition of John H. Stenger, Jr., the Commission further extended the temporary license of station WBAX from December 27, 1943, to March 26, 1944.

KWBW—William Wyse and Stanley Marsh, d/b as The Nation's Center Broadcasting Co. (Assignor), William Wyse, Stanley Marsh and Bess Wyse, d/b as The Nation's Center Broadcasting Co. (Assignee), Hutchinson, Kans.—Granted consent to assignment of license of station KWBW from William Wyse, Stanley Marsh, a partnership, d/b as The Nation's Center Broadcasting Co. to a newly formed partnership of William Wyse, Stanley Marsh and Bess Wyse, d/b as The Nation's Center Broadcasting Co. (No monetary consideration is involved.) (B4-AL-382).

WADC—Allen T. Simmons, Akron, Ohio.—Adopted order denying petition for rehearing filed by WADC, directed against the Commission's Findings of Fact, Conclusions and Order, adopted November 3, granting applications of WGAR and WHBC for construction permits.

DOCKET CASE ACTION

The Commission has announced adoption of Proposed Findings of Fact and Conclusions (B-186), proposing to deny the application of Station WROL, Knoxville, Tenn., to modify its license and increase its nighttime operating power from 500 watts to 1 kilowatt on the ground that the proposed operation would not tend toward a "fair, efficient and equitable distribution of radio service" as contemplated in Section 307 (b) of the Communications Act.

The increased nighttime power sought by WROL would result in interference to Station KWFT at Wichita Falls, Texas, the Proposed Findings note. The radio listeners in Knoxville who would have benefited from the proposed new operation of Station WROL already have service available from another radio station covering that area. On the other hand, radio listeners in the Wichita Falls, Texas, area would be adversely affected by the proposed operation of WROL in that they would lose service from Station KWFT—the only radio station assigned to Wichita Falls.

Proposed Findings of Fact and Conclusions (B-193) were also adopted in re application of Martin R. O'Brien (WMRO), Aurora, Illinois, for modification of license to operate unlimited time on 1280 kilocycles with daytime power of 250 watts and nighttime power of 100 watts, denying said application without prejudice to the right of applicant to file an application requesting unlimited time operation on 1490 kilocycles, since it appears that the use of the local frequency 1490 kilocycles may be available for unlimited time use in Aurora. Operation of Station WMRO at night on the frequency 1280 kilocycles would be inconsistent with the Commission's Standards of Good Engineering Practice as severe nighttime interference would be imposed upon the proposed service of Station WMRO, the Proposed Findings conclude.

In the same action the Commission adopted Proposed Findings of Fact and Conclusions (B-196) denying the application of Roy L. Albertson (WBNY), Buffalo, N. Y., for modification of license to change frequency from 1400 to 680 kilocycles with 250 watts power.

The operation of Station WBNY as proposed in the application would result in an extremely high nighttime interference limitation and would offer no improvement over the existing nighttime service of the station. Objectionable interference would also be caused to Stations WLAW, WPTF and WISR. The service which WBNY would be able to offer daytime in areas where service is already available from other stations would be more than offset by losses in service in areas where only one service is now available.

The change in operating assignment would also involve use of critical radio materials contrary to the policy announced in the Memorandum Opinion of April 27, 1942.

The Commission also adopted an Order making final the Proposed Findings of Fact and Conclusions granting application of J. C. and E. W. Lee (Lee Brothers Broadcasting Co.), KFXM, San Bernardino, Calif., for modification of license to change operation from sharing with Station KPPC, Pasadena, to unlimited hours of operation on the frequency 1240 kilocycles, using 250 watts power (B-197).

MISCELLANEOUS

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted license to cover construction permit to install new transmitter (B1-L-1786); granted authority to determine operating power by direct measurement of antenna power (B1-Z-1568).

KWFR—Wichita Broadcasting Co., area of Wichita Falls, Tex.—Granted authority for voluntary assignment of license of relay broadcast station KWFR from Wichita Broadcasting Co. to Wichita Broadcasters, a partnership, Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, Trustee, P. K. Smith, Mrs. Claude M. Simpson, Jr. (B3-ALRY-21).

WBAE—L. B. Wilson, Inc., area of Cincinnati, Ohio.—Cancelled relay broadcast license in accordance with written request of licensee (B2-RRY-235).

Granted renewal of following relay broadcast station licenses for a period ending in no event later than December 1, 1945:

WEIH, WEII, Indianapolis Broadcasting, Inc.; WENL, Surety Life Insurance Co.; WEMV, The WGAR Broadcasting Co.

L. J. Duncan, Lelia A. Duncan, Josephine A. (Keith) Rawls, Effie H. Allen, d/b as Valley Broadcasting Co., West Point, Ga.—Granted petition to accept amendment to its application so as to specify new transmitter site; hearing date to be unchanged (Jan. 4, 1944). (Application is for construction permit for new station to operate on **1490 kc.**, 250 watts, unlimited.) (Docket No. 6549).

APPLICATIONS FILED AT FCC

750 Kilocycles

KXL—KXL Broadcasters, Portland, Oregon.—Special service authorization to operate unlimited time, employing directional antenna day and night for the period ending 2-1-46.

1240 Kilocycles

NEW—WARC, Inc., Rochester, N. Y.—Construction permit for a new standard broadcast station to be operated on **1240 kc.**, 250 watts power, unlimited hours of operation. (Facilities of WSAY when relinquished by WSAY operating on **1370 kc.** as authorized by construction permit.)

KODY—Radio Station WOW, Inc., North Platte, Nebr.—License to cover construction permit (B4-P-3549), which authorized change in equipment, frequency, power and hours of operation.

NEW—Charles P. Blackley, Staunton, Va.—Construction permit for a new standard broadcast station to be operated on **1240 kc.**, 250 watts, unlimited time. Amended: re change in type of transmitter, antenna and change studio site.

KODY—Radio Station WOW, Inc., North Platte, Nebr.—Authority to determine operating power by direct measurement of antenna power.

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—Modification of license to increase power from 100 watts to 250 watts.

1450 Kilocycles

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Modification of license to change corporate name to American Broadcasting Corporation.

1490 Kilocycles

NEW—Birney Imes, Jr., Tupelo, Miss.—Construction permit for a new standard broadcast station to be operated on **1490 kc.**, 250 watts power, unlimited time. Amended: re equipment changes.

TELEVISION APPLICATION

NEW—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Construction permit for a new experimental television broadcast station to be operated on Channel #1 **(50000-56000 kc.)**, emission A5 and special power of 3 KW.

MISCELLANEOUS

WKRB—American Broadcasting Corp. of Kentucky, area of Lexington, Ky.—Modification of license to change corporate name to American Broadcasting Corporation.

WEGD—American Broadcasting Corp. of Kentucky, area of Lexington, Ky.—Modification of license to change corporate name to American Broadcasting Corporation.

WEGE—American Broadcasting Corp. of Kentucky, area of Lexington, Ky.—Modification of license to change corporate name to American Broadcasting Corporation.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Alberty Foods Products, et al.—A complaint has been issued charging Ada J. Alberty, 729 Seward St., Hollywood, Calif., engaged in the sale of food and drug products, including vitamin preparations, with disseminating false advertisements concerning such products in newspapers, periodicals and other advertising media. The respondent trades under the names The Alberty Food Products, Alberty Products, Alberty Products Sales Co., The Cap-Lone Co., and Cheno Products. (5101)

Atlantic Commercial Agency, Inc., Gerald H. Strickland, G. Russell Walsh and S. Mortimer Hirshorn, all of 101 North Third Street, Camden, N. J., and Dorothy Boyden, trading as Secretarial Service, 6 North Michigan Avenue, Chicago, are charged in a complaint with the use of unfair and deceptive acts and practices in the operation of a collection agency. (5100)

Decker Products Co., Pelham, N. Y., selling and distributing an exhaust muffler attachment designated "Vacudex," designed to save gasoline and effect other economies in the operation of automobiles and trucks, are charged in a complaint with misrepresentation. (5097)

Dri-Kleen Co., 325 West Huron St., Chicago, is charged in a complaint with misrepresenting the cleansing properties of a product designated "dri-kleen" which, when in solution, is recommended for use in the cleaning of all fabrics, including wearing apparel, drapes, rugs and upholstery. (5103)

Milton S. Kronheim & Son, Inc., Washington's largest liquor wholesaler, is charged in a complaint issued with engaging in "unfair, coercive and oppressive practices" which tend to give it a monopoly in the sale of whiskies, wines and brandies to retailers in the District of Columbia. The respondent, which has its principal place of business at 1425 New York Ave., N. E., is said to have an annual volume of sales in excess of $4,000,000. (5102)

Mary Muffet, Inc.—A complaint has been issued charging Mary Muffet, Inc., 1136 Washington Ave., St. Louis, with misrepresentation of the fiber content of fabrics and wearing apparel. (5104)

New Jersey Service Company, Inc., 819 Cooper Street, Camden, N. J., and Dorothy Boyden, trading as "Secretarial Service," 6 North Michigan Avenue, Chicago, are charged in the complaint with the use of unfair acts and practices in commerce in connection with the operation of a collection agency. (5099)

CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

STIPULATIONS

During the week the Commission has announced the following stipulations:

Austin Technical Institute, and now doing business as Austin Technical Publishers, 275 Seventh Ave., New York, selling a home study course designated "A.T.I. Home Study Course in Blueprint Reading," has stipulated to cease representing, by use of the word "Institute" as a part of his trade name or by other means, that he conducts an institution of learning with a staff of competent, experienced and qualified educators for the purpose of promoting learning; that his home study course is an invention or that articles of merchandise, the cost of which is included in the purchase price of his course, are free, either by use of the term "free" or any other term of similar meaning, or that a person, as a result of the completion of the course, would be a trained expert in blueprint reading. (03174)

Bechard Manufacturing Company, 700 Hudson Ave., Chicago, manufacturing and selling plated base metal trophies, prize cups and silver plated hollow ware, has stipulated to cease and desist from the use of any false, fictitious or misleading price representation which purports to be the retail sales price of a product but which is in excess of the price for which such merchandise is customarily sold, and from representing, through the use of a fictitious or marked-up price, that the price for which such merchandise is actually offered for sale is an exceptional price, a low price, or a discounted price when in fact the price is that for which such merchandise is customarily sold in the usual course of retail trade. (3773)

Cramer Chemical Company, Gardner, Kans., selling and distributing athletic trainers' supplies and first aid preparations, has stipulated to cease and desist from representing that a product sold by it designated Nitrotan is the best known or most universally used germicide in the United States, that it gives complete sterilization in 90 seconds, checks or stops bleeding other than capillary bleeding from superficial skin lesions, draws the torn, jagged edges of a wound together, stops sore throat or assists in the prevention of influenza, or that its use may be relied upon to give quick and safe recovery from all such conditions; that Cramer's Athletic Stringent for Gargle is effective in the checking or prevention of influenza, tonsillitis or like afflictions; that Cramer's Athletic Liniment has special penetrating powers or that it penetrates into muscular or other tissues to any significant degree; that Cramer's Dextrose Tablets will produce quick energy in the sense of capacity for more intense physical exertion, will stimulate an athlete to greater performance, enable athletes to win more games, or may be relied upon to afford immediate relief from hay fever or asthma. (3772)

Joseph Gluck, 469 Seventh Ave., New York, selling and distributing textile fabrics, has stipulated to discontinue use of the terms "Jer-Zee" or "Jerzette" as designations for fabrics other than jersey fabrics and from use of such terms or words simulating or connoting "Jersey" in any manner so as to imply that it is a jersey fabric when the product is not a jersey fabric; advertising, branding, labeling, invoicing or selling any products composed in whole or in part of rayon without clearly disclosing, by use of the word "rayon," that such products are composed of or contain rayon; and when a product is composed in part of rayon and in part of fabrics or material other than rayon, from failing to disclose, in immediate connection with the word "rayon," and in equally conspicuous type, each constituent fiber of the product in the order of its predominance by weight, beginning with the largest single constituent. (3769)

J. P. Hoft, Post Office Box 137, Berwyn, Ill., selling a medicinal preparation designated "Amisogen," and A. N. Baker Advertising Agency, Inc., 189 West Madison St., Chicago, an advertising agency which disseminated advertisements for the product, have stipulated to cease representing that the preparation will have any effect upon asthma except to the extent that it may afford palliative relief from the paroxysms of asthma; that it will relieve hay fever or the symptoms of hay fever, or that the preparation is free from opiates, narcotics or dope of any kind. (03175)

Jersey Oil Heating, Inc., Irvington, N. J., manufacturing and selling a device designated "Convert-O-Grate," for use in converting oil-burning furnaces to coal-burning furnaces, and Anchor Post Fence Company, Baltimore, also selling and distributing the device, have entered into stipulations in which both agree to cease and desist from representing that the device can be installed for one-half or less than one-half the installation cost of similar devices; that it "saves 65% of former cost" or that the installation cost is 65 percent less than that of competitive products, or that the cost or comparative cost of the device or of its installation is other than is actually a fact. Both respondents further agree to cease representing that the device can be installed in eight minutes; that a furnace in which it has been installed can be converted from oil to coal or from coal to oil in eight minutes; that the time required to install the device or to convert a furnace equipped with it from oil to coal or from coal to oil is less than is actually a fact, or that the device is an "amazing wartime invention" or that it embodies any amazing principle. (3767 and 3768)

Metzger & Cohen, 500 Seventh Ave., New York, selling and distributing merchandise including women's coats, have stipulated that they will cease and desist from using the terms "Krimkurl," "Broadtel" fabric, "Persianlece" fabric, "Cana-Curl" fabric or other terms of similar import to describe any fabric which is not made from the fur or hair of the fur-bearing animal indicated; provided, however, that in designating a textile fabric which is made in such manner as to resemble the peltry of a fur-bearing animal there may be used such terms as "fur-like fabric," "fabric made to simulate fur" or similar terms which clearly disclose that the fabric is not made of fur but merely resembles the peltries of a fur-bearing animal. The respondents agree to discontinue using the designations indicated to describe any coat or garment which is not made from the peltry of the animal so indicated, provided that when used to designate a textile fabric garment resembling fur, such words may be used if immediately accompanied by other words printed in equally conspicuous type disclosing that the fabric of which the garment is made is merely an imitation of the peltry of the animal indicated as, for example, "Imitation Persian Lamb." (3774)

Miller & Company, 225 North Michigan Ave., Chicago, selling and distributing spyglasses, have stipulated to cease and desist from representing that any spyglass offered for sale by them is a fine telescope, is precision made, has precision ground lenses, combines the convenience of a field glass with the power and range of a telescope, was developed by its manufacturers to replace or serve as a substitute for binoculars or field glasses, or will serve the purpose of field glasses or similar instrument; that such instruments bring objects which may be far beyond the range of the naked eye into sharp, easy vision; that the price of $1.49 for thin spyglass is amazingly low, when actually the normal retail price for such an article is $1; that the purchaser would anticipate a charge of $3, $4 or $5 for such an instrument, or by inference that the spyglass is in a class or can perform the same functions of an article costing $10, $15 or any sum above that charged for those of like kind and quality. (3775)

T. L. Miller Manufacturing Co., 3716 South Clairborne Ave., New Orleans, selling a cosmetic preparation designated "Presto Face Cream," has stipulated to cease representing that use of the preparation will produce a clear, smooth skin, or, by use of the word "Manufacturing" or similar words in its trade name or otherwise, that he owns, operates or controls a company engaged in the business of manufacturing or compounding the preparation. (03177)

A. C. Rehberger Company, 2134-38 North Magnolia Ave., Chicago, manufacturing and selling trophies, medals and charms, has stipulated to cease and desist from the use of or in connection with its merchandise of any false, fictitious or misleading price representation which purports to be the retail sales price thereof but which is in excess of the price for which the merchandise is customarily sold in the usual course of retail trade, and from representing, through the use of a fictitious or marked-up price, that the price for which such merchandise is actually offered for sale is an exceptional price, a low price or a discounted price, when in fact it is the price for which such merchandise is customarily sold. (3776)

Rupture-Guard Company, Marshall, Mich., selling a truss designated "Elastic Rupture-Guard," and Ralph L. Wolfe & Associates, Inc., 76 Adams Ave. West, Detroit, an advertising agency which disseminated advertisements for the product, has stipulated to discontinue representing that the device may be properly fitted to one's personal requirements when ordered through the mails; that it will hold the rupture securely or comfortably in any position of the body; that it will assist nature in strengthening the muscles or in closing the hernia opening, or that it is the only device of its kind. (03178)

Silver Cup Beverage Company, 2948 West Grand Ave., Chicago, manufacturing and selling soft drinks, including so-called root beer and other carbonated bottled beverages, has stipulated that, in connection with the sale of its bottled carbonated beverages, it will cease and desist from use of the word "draft" in connection with the trade name or as descriptive of such beverage and from use of the word "draft" or any other word or term, either alone or in connection with the picturization of a wooden keg or container, or with the words "Old Style," so as to imply that the product is drawn or dispensed from a keg or container to the consumer or that it possesses flavors such as are associated with draft beverages as distinguished from those which are bottled. (3771)

Emmett J. Smith & Daughter, Elmhill-Murfreesboro Hi-Way, Nashville, Tenn., selling and distributing chicks, have stipulated to cease and desist from using the statements "U. S. Approved," "U. S. Certified," "U. S. Approved and Banded," or other statements or representations of like meaning, as descriptive of or in connection with chicks not U. S. approved, U. S. certified or U. S. approved and banded in accordance with the provisions of the National Poultry Improvement Plan; from representing that they are members or participants in the National Poultry Improvement Plan until they actually are participating members; from representing by use of statements such as "Absolutely Pullorum Free" or "Pullorum Free," or in any other manner, that chicks can be depended upon to be pullorum free; and from representing that they are poultry breeders and are engaged in the poultry breeding business or that they operate a hatchery or hatcheries, unless and until they actually are engaged in the poultry breeding business and operating hatcheries as represented. (3770)

Power Fence Co., Darlington, Wis., selling a kit designated "Power Electric Fencer Kit," which, when constructed with the use of other parts not supplied with the kit, makes an electric fence controller, has stipulated to cease and desist from representing that his product can be made into an electric fence controller capable of rendering service equal to that given by commercial electric fence controllers costing up to $15; that his kit is an electric fence controller or that its use when made into an electric fence controller with a single wire enclosure, confines all livestock or any animal of a size which would enable that animal to readily pass under or over that wire without coming in contact with it, or any animal whose natural covering or coat would serve to insulate it from electric shock at the probable point of its contact with the wire, or that the electric fence controller made with his kit can be used in remote places or distant pastures, without disclosing that the unit must be protected from the weather. (03173)

Mamie Wilson, 1313 East 33rd St., Los Angeles, selling a medicinal preparation designated "Mamie's New Discovery Scalp Ointment," has stipulated to cease representing that the preparation will prevent loss of hair or baldness, counteract conditions causing hair loss, or is a cure for dandruff or other scalp ailments except to the extent that it may mitigate itching of the scalp; that it will nourish or stimulate the hair roots or make the hair grow or take on new life, or that it will tone or have any other effect upon the blood corpuscles or will tone the oil glands of the scalp. (03176)

FTC CLOSES CASE

The Federal Trade Commission has ordered the case growing out of a complaint against Reed Drug Company, Inc., West Frankfort, Ill., closed without prejudice to the right of the Commission to reopen it, should future facts so warrant. The respondent had been charged with misrepresentation in the sale of an alleged remedy for delayed menstruation.

Important Notice
NAB REPORTS INDEX

Early next week a special mailing of a consolidated index for the complete 53 issues of the 1943 NAB REPORTS will be made. Stations planning to bind their REPORTS should await the receipt of this index so that it can be incorporated as a part of the volume.

"1943 SHOWED RADIO WHAT IT IS FIGHTING FOR"—MILLER

(Released by NAB News Bureau)

Washington, D. C., December 30: "The year 1943 showed radio what it is fighting for," Neville Miller, President of the National Association of Broadcasters, said today. "A powerful instrument of free speech, operated in the interests of the people and doing its full share in the valiant battle to win the war, found itself threatened with the loss of the very freedom it was championing. A Supreme Court decision in May, giving a new and hitherto unsuspected interpretation to the Communications Act, made possible government control of radio through the Federal Communications Commission. Immediately the radio industry sought new legislation from Congress to restore its freedom. Passage of the White-Wheeler Bill, already introduced in the Senate, was sought by every branch of the industry. Pronounced unity was achieved by the broadcasters in the hearings on the White-Wheeler Bill before the Interstate Commerce Committee, in which they were joined by a member of the Federal Communications Commission. The final bill is now in preparation and is expected to go to the floor of the Senate early in 1944. Hope is expressed that new legislation will bring to the people of the United States a firm safeguard of freedom of speech by radio.

"While fighting its own battle for freedom, the radio industry and its advertisers in 1943 devoted to the cause of the war time and talent exceeding two hundred million dollars in value."

JOE MILLER TO NAVY

Joseph L. Miller, NAB Director of Labor Relations, has resigned his position effective December 31 to enter the Navy.

Mr. Miller is, in point of service, one of the oldest members of the NAB staff, having assumed his position as Director of Labor Relations in May 1938.

With Mr. Miller's entry into the armed services, the NAB service flag now carries 8 stars. Ed Kirby, now an Army Colonel, heading the Radio Bureau of the Public Relations Division of the War Department, was the first to enter the armed service. He was followed very shortly by Lynne Smeby, Director of Engineering who is connected with the Radio and Radar Branch of the Signal Corps. Next to leave was Frank E. Pellegrin, Director of Broadcast Advertising, who is now a major in service in Italy. In June of this year, Russell Place, NAB Counsel, resigned to assume a position in the Office of Strategic Services. Simultaneously Everett E. Revercomb, for 9 years NAB Auditor, was commissioned an Ensign in the Navy. Two NAB messengers, George Many and Elliott Irving, went into the armed service, the former, in the Army Air Corps, is now stationed in England; and the latter, in the Navy, is stationed at Sampson, New York.

TRANSMITTER TUBE SITUATION EASES

If you use any of these tubes, here is good news! The NAB Engineering Department has been informed that the following tube types will shortly be available on a thirty-day delivery basis. Tubes affected are 893, 893R and 889. Further information is available upon request to NAB.

WIRE RECORDER MAKES DEBUT IN BATTLE DESCRIPTION

When the Marines hit Empress August Bay Beach, Bougainville, radio history was made, according to a delayed Associated Press release written by Technical Sergt. Harold Azine, formerly of WLS, Chicago, and WBAL, Baltimore, now a Marine Corps Correspondent.

In this engagement, according to Azine, a man and a microphone for the first time recorded a long operation against the Japanese.

The man was Marine Sergt. Roy A. Maypole, former producer at CBS, New York, whose equipment consisted of a sound-on-wire recorder.

Verbally identifying the ship sounds, gun salvos and bomb explosions, while trying to keep his feet against the concussions, when landing parties started down the rope nets, Roy rushed his mike to the rail of the ship to get several 10-second "man on the move" interviews.

He then followed ashore and continued recording the engagement although the source of electrical power furnished an obstacle. Abrupt end to his recording came when an enemy bomb landed ten yards from the equipment and caved in the side of its amplifier cover plate, but the wire and its precious story were unaffected. Its

PUBLIC RELATIONS SUB-COMMITTEE MEETS IN NEW YORK, JANUARY 5-6

The NAB Public Relations Sub-committee, under the chairmanship of Dr. Frank Stanton, Vice-Pres., CBS, will meet in New York City on January 5th and 6th to make plans for a book defining public relations activities for the radio industry.

Edgar Bill, Chairman of the Public Relations Committee, announced the appointment of the following sub-committee members: Charles P. Hammond, Director of Advertising and Promotion, NBC; Edward E. Hill, Director, WTAG; Vernon E. Pribble, Manager, WTAM; Irvin G. Abeloff, Program Service Manager, WRVA. Willard D. Egolf, Assistant to the President, NAB, will meet with the sub-committee. Hill, Pribble and Abeloff are public relations chairmen for NAB districts, 1-7 and 4, respectively.

NAB has been preparing preliminary material for the book for several months.

FCC LEGAL STAFF CHANGES

Harry M. Plotkin has been named assistant general counsel in charge of the Litigation and Administration Division of the Federal Communications Commission. Mr. Plotkin, a resident of Chicago, graduated *magna cum laude* from the Harvard Law School in 1937.

He joined the Commission staff in January of 1940 and has been chief of the Litigation and Administration Division since 1942. Prior to joining FCC, Mr. Plotkin was associated with Topliff and Horween, Chicago law firm. He is a native of Athol, Massachusetts, married and has two children.

At the same time the appointment of Peter Shuebruk as assistant to the general counsel was announced. He fills the vacancy created by the naval enlistment of Nathan H. David which occurred last month.

Mr. Shuebruk is likewise a *magna cum laude* graduate from the Harvard Law School in 1937. During his undergraduate days he was editor of the Harvard Law Review. Following graduation he served with the Boston law firm of Ropes, Gray, Best, Coolidge and Rugg. He came to the FCC on June 1, 1942, as assistant to the chairman. He is a native of Hull, Massachusetts, married and has two children.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, January 3. They are subject to change.

Tuesday, January 4

Consolidated Hearing

WGPC—J. W. Woodruff and J. W. Woodruff, Jr., d/b as Albany Broadcasting Company, Albany Ga.—C. P. to move transmitter and studio to West Point, Ga., **1490 kc.,** 250 watts, unlimited.

NEW—L. J. Duncan, Leila A. Duncan, Josephine A. (Keith) Rawls, Effie H. Allen, d/b as Valley Broadcasting Company, West Point, Ga.—C. P., **1490 kc.,** 250 watts, unlimited.

Wednesday, January 5

WPAT—Frank Falknor and Rex Schepp (Transferors), Donald Flamm (Transferee), Paterson, N. J.—For Transfer of Control of New Jersey Broadcasting Co., Inc. (WPAT), **930 kc.,** 1 KW, daytime.

Friday, January 7

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Mod. of License, **1480 kc.,** 5 kilowatts, unlimited; DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WGES—Oak Leaves Broadcasting Station, Inc. (Assignor), Gene T. Dyer, Vivian I. Christoph, Gene T. Dyer, Jr., F. A. Ringwald, Louis E. Moulds, Grace V. McNeill, William F. Moss, d/b as Radio Station WGES (Assignee), Chicago, Ill.—Granted consent to voluntary assignment of license of Station WGES from Oak Leaves Broadcasting Station, Inc., to Gene T. Dyer, Vivian I. Christoph, Gene T. Dyer, Jr., F. A. Ringwald, Louis E. Moulds, Grace V. McNeill, William F. Moss, a newly organized partnership, d/b as Radio Station WGES. No monetary consideration involved (B4-AL-385).

WLB—University of Minnesota, Minneapolis, Minn.—Granted request to waive Commission rules so as to permit identification of Station WLB as "Minneapolis and St. Paul."

KGKB—East Texas Broadcasting Co., Tyler, Texas.—Granted renewal of license for the period ending not later than December 1, 1945 (B3-R-728).

KPAB—Laredo Broadcasting Co., Laredo, Texas.—Granted renewal of license for the period ending not later than December 1, 1945 (B3-R-966).

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted modification of construction permit, as modified, for changes in directional antenna system, and granted authority for program tests under Section 2.43 (B4-P-2827), subject to the condition that proof of separation of common ownership of Stations KGBX and KWTO be made to the Commission on or before December 31, 1943 (B4-MP-1725). Dismissed applications for temporary modification of license (B4-ML-1153) and for authority to determine operating power by direct measurement of antenna power of 310 ft. vertical antenna (B4-Z-1523).

MISCELLANEOUS

KPAC—Port Arthur College, Port Arthur, Texas.—Granted license (B3-L-1779) to cover construction permit which authorized increase in power to 1 KW and changes in directional antenna system; also granted authority to determine operating power by direct measurement. The license is granted subject to condition that no interference will be caused in contravention of the terms of the NARBA.

Spartanburg Advertising Co., Spartanburg, S. C.—Placed in pending file application for high frequency (FM) broadcast station, **43500 kc.,** 26,200 square miles; transmitter to be located on Hogback Mountain, S. S. (B3-PH-149).

W2XCB—Columbia Broadcasting System, Inc., Portable-Mobile; Area, New York, N. Y.—Granted modification (B1-MPVB-107) of construction permit for experimental television relay station, authorizing extension of completion date from 1-7-44 to 7-7-44.

W2XMT—Metropolitan Television, Inc., New York City.—Granted modification (B1-MPVB-108) of construction permit for experimental television broadcast station, to extend completion date from 12-31-43 to 6-30-44.

KTRG—KTRH Broadcasting Co., Portable-Mobile, Area of Houston, Texas.—Granted license (B3-LRY-292) to cover construction permit for new relay broadcast station; frequencies 1606, 2074, 2102, **2758 kc.,** 50 watts, to be used with applicant's standard station KTRH.

KFI—Earle C. Anthony, Inc., Los Angeles, Calif.—Adopted Order granting motion filed by Earle C. Anthony, Inc., (KFI) requesting that the time for filing its Proposed Findings of Fact and Conclusions in the matter of the application of Iowa State College of Agriculture and Mechanic Arts (WOI), Ames, Iowa, for special service authorization, be extended from December 27 to December 31, 1943 (Docket No. 6541).

WGPC—J. W. Woodruff and J. W. Woodruff, Jr., d/b as Albany Broadcasting Co., Albany, Ga.; L. J. Duncan, Leila A. Duncan, Josephine A. (Keith) Rawls, Effie H. Allen, d/b as Valley Broadcasting Co., West Point, Ga.—Granted motion for continuance of hearing now set for January 4, until February 3, 1944, in re applications of WGPC for construction permit to move transmitter and studio to West Point, Ga. (Docket No. 6548), and Valley Broadcasting Co. for construction permit for new station to operate on **1490 kc.,** 250 watts, unlimited time (Docket No. 6549).

APPLICATIONS FILED AT FCC

610 Kilocycles

WHKC—United Broadcasting Co., Columbus, Ohio.—Construction Permit to change frequency from **640 kc.** to **610 kc.,** increase power from 500 watts to 1 KW, increase hours of operation from limited to unlimited, and install directional antenna for night use (facilities of WCLE).

640 Kilocycles

WCLE—United Broadcasting Co., Cleveland, Ohio.—Construction Permit to change frequency from **610 kc.** to **640 kc.,** increase power from 500 watts to 1 KW, and hours of operation from Daytime to Limited time (facilities of WHKC) and move transmitter and studio to Akron, Ohio.

850 Kilocycles

WRUF—University of Florida, Gainesville, Fla.—Extension of Special Service Authorization to operate Unlimited time with power of 100 watts after sunset at Denver, Colo., for the period beginning 3 a. m., EST, 2-1-44, and ending 3 a. m., EST, 11-1-46.

930 Kilocycles

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Modification of Construction Permit (B3-P-3114 as modified) which authorized move of transmitter, increase power and installation of directional antenna, for extension of completion date from 1-20-44 to 7-20-44.

950 Kilocycles

KPRC—Houston Printing Corp., Houston, Texas.—Authority to determine operating power by direct measurement of antenna power.

1320 Kilocycles

KXYZ—Harris County Broadcast Co., Houston, Texas.—Authority to determine operating power by direct measurement of antenna power.

1460 Kilocycles

KINY—Edwin A. Kraft, Juneau, Alaska.—License to cover construction permit (B-P-3089 as modified), which authorized increase in power, installation of new transmitter, changes in antenna.

KINY—Edwin A. Kraft, Juneau, Alaska.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

NEW—L. J. Duncan, Leila A. Duncan, Josephine A. (Keith) Rawls, Effie H. Allen, d/b as Valley Broadcasting Co., West Point, Ga.—Construction permit for a new standard broadcast station to be operated on **1490 kc.,** 250 watts power, unlimited time. Amended: to change transmitter site to Cherry St., Lanett, Ala.

FEDERAL TRADE COMMISSION DOCKET

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

International Distributing Corp., 1119-14th St., N. W., Washington, D. C., said to be one of the largest wholesale liquor dealers in the city, with annual sales of more than $4,000,000, is charged in a complaint with refusing to sell whiskies to District of Columbia retailers unless they purchase a stipulated quantity of wine or brandies or both. (5105)

Vawne Foundations—A complaint has been issued charging Arthur R. Lewis and Ben A. Hensler, trading as Vawne Foundations, 302 Fifth Ave., New York, with misrepresentation in connection with the sale of "Wispese" girdles. The respondents advertise the girdles in newspapers and magazines, and in catalogs, circulars and other advertising media distributed among the purchasing public and to dealers in women's apparel. (5106)

CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Beau Brummell Ties, Inc., Cincinnati, has entered into a stipulation to cease and desist from labeling, advertising or in any other manner designating as "Burton's Poplin," neckwear or other merchandise not made of the cotton fabrics converted by Burton Brothers & Co., Inc., New York, and widely known to the trade and the public as "Burton's Poplin"; or representing by use of the trade designation "Burton's Poplin Ties," or by similar statements, that neckwear made of materials obtained from other sources has been processed or treated by the converters of Burton Poplins, or that such cotton converting firm has contributed something of value thereto. (3778)

Earp Laboratories, and Earp-Thomas Laboratories, Inc., both of Bloomfield, N. J., have stipulated to discontinue certain misrepresentations in connection with the sale of bacteria cultures, variously designated as Silogerm, Humogerm, Farmogerm and Acidofilac, also known as Bloomfield Culture Lactobacillus. (3777)

Imperial Brands Co., 537 South Dearborn St., Chicago, have entered into a stipulation to cease and desist from representing that their medicinal preparation designated "Imperial Lax-101" is a gentle or mild laxative and will move the bowels easily without irritation to the intestinal walls; that it will change an unhealthy to a healthy evacuation; that it contains no habit-forming drugs; that delayed evacuation will poison the system and lower bodily resistance and that Imperial Lax-101 will remedy such conditions. (03179)

Roycemore Toiletries, Inc., trading as Shy Products Co., 180 North Wacker Drive, Chicago, has stipulated to cease and desist from false and misleading representations concerning a preparation it sells under the name "Diopreen," recommended for the "promotion of personal hygiene." (3779)

Solinger & Sons Co., Inc., 349 Broadway, New York, has entered into a stipulation under which the corporation agrees to cease and desist from representing that certain mattress ticking it sells, which is treated with a preparation known as "Aseptex," possesses such bactericidal, germicidal or fungicidal properties as to make the fabrics resistant to germs, bacteria, fungi or vermin. (3780)

FTC CLOSES CASE

The Federal Trade Commission has closed without prejudice the case growing out of the complaint issued against Nacor Medicine Co., Indianapolis, which had been charged with misrepresenting the therapeutic properties of medicinal preparations sold under the designations "Nacor" and "Nacor Kaps."

National Association of Broadcasters
1760 N STREET, N. W. ★ ★ ★ ★ ★ ★ ★ WASHINGTON, D. C.

January 22, 1943 SPECIAL A. F. of M. BULLETIN No. 15

Petrillo Hearing Before Senate Sub-Committee

This issue contains excerpts from the official record of 515 typewritten pages of testimony given by James C. Petrillo, President of the American Federation of Musicians, and Joseph A. Padway, counsel for the Union, at the hearing before the Subcommittee of the Interstate Commerce Committee of the United States Senate on January 12, 13 and 14th. While the record has necessarily been shortened, every effort has been made to have the excerpts accurately reflect the testimony as a whole, and a reading of these excerpts will reward every broadcaster.

Informed broadcasters will also find in the testimony numerous misstatements and inaccuracies which, in the interest of expeditious circulation of this bulletin, the NAB is not at this time attempting to point out or to contradict. The NAB has been assured by the Senate Committee that it will be afforded an opportunity to set forth its side of the controversy, and at this time the industry's position with respect to Mr. Petrillo's ban and to his "unemployment problem" will be made known.

Mr. Petrillo frankly admitted that he called a strike and withdrew the services of all his musicians from recordings without ever having formulated or made demands, and that, if the affected people had sought to find out what he wanted, all that he could have said to them was that he wanted more employment and it was up to the affected industries to find some way of giving that employment. For this, and for his ignoring of the public position in the controversy, Mr. Petrillo, as the record shows, was strongly criticized by members of the Committee.

The basic theory which underlies Mr. Petrillo's action was indicated by his testimony. He admitted that he had no information as to what percentage of the members of his union were primarily engaged in crafts and occupations other than musicianship, although he admitted that the number was substantial. He admitted that radio had furnished employment opportunities for musicians, and was unable to give any concrete examples of musicians who had been displaced or supplanted as a result of radio. Under these circumstances, his claim would appear to be that the broadcasting industry has an obligation to men whom it does not employ, never employed, and did not supplant. Obviously, the members of Mr. Petrillo's union today are not the same persons who were members of the union when the phonograph was invented over fifty years ago. Mr. Petrillo's union has grown since that date from a membership of less than 10,000 to 138,000; and the membership has increased by 20,000 during the last decade when commercial broadcasting made its greatest strides.

The Committee pointed out that the demand for more employment came with particularly bad grace at a time when our nation is struggling with a shortage of manpower. Mr. Petrillo himself admitted that if the war continued for only a few months more, his union would be unable to meet even the present basic needs of broadcasters for musicians, and that 18% of his union membership was already in the armed forces.

In the course of his presentation, Mr. Petrillo made a number of concessions:

1. He agreed to formulate his demands in writing after meeting with his Executive Committee on February 1st, and to deliver a copy of these demands to the Senate Subcommittee, as well as to make

them available to any parties who might be named in the demands. Mr. Padway pointed out that these demands would be addressed to specific users of music, including members of the NAB, and that the union would not deal with the NAB as an association.

2. He conceded that there were many small stations which could not be expected to employ musicians.

3. He admitted that his present order excluding all amateurs from the air required modification so that amateur organizations could be heard on the air, albeit on a basis satisfactory to the A. F. of M.

4. He stated that he might have been mistaken in the tactics he pursued and agreed that there was some justice in the position of employers.

5. He agreed that certain practices of the union in connection with standbys had gone too far and conceded that such practices as demanding the employment of union musicians as "pancake turners" were basically unsound.

6. He admitted that in issuing his order against recordings he had not given full consideration to the effects of this order on private, educational and commercial use.

Despite these admissions, Mr. Petrillo maintained his basic position without substantial change. He reiterated his refusal to permit records to be made and refused a request of the Committee that he withdraw the ban even for a short time. He charged that the public feeling against him was due to an "expensive publicity campaign composed of nothing but false issues and personal abuse" initiated by the National Association of Broadcasters, overlooking the fact that the widespread editorial condemnation and news comment which followed Mr. Petrillo's actions, and which were reflected in thousands of newspaper items, preceded the earliest date upon which the NAB took any action whatsoever with respect to this matter.

Readers of the excerpts from the testimony will note how Mr. Petrillo shifted his position on what he wanted during the course of questioning.

It may be of interest to broadcasters to note that Judge Barnes has set January 25th as the date for hearing arguments on Mr. Petrillo's motion to dismiss the government's new complaint against him, and that a date in February will be set for hearing the Government's argument for a preliminary injunction against Mr. Petrillo and his union.

Senator Clark's Opening Statement

When this order was first published on the 25th of July, 1942, it excited the alarm of the War Department, the Navy Department, the Marine Corps, the Office of Civilian Defense, the Treasury Department, and the Office of War Information. Consequently a staff meeting was held, or at least a meeting was held, at which representatives of each of these departments were present. Among others attending that meeting there was present Mr. Elmer Davis, who was the director then and is now of the Office of War Information, one of the functions of which office is to disseminate throughout the United States and throughout the personnel of troops abroad, all information pertinent to the war and therefore vitally interested in maintaining a free, open and efficient communications system in the United States.

Consequently, three days after this meeting, namely, on July 28, 1942, Mr. Davis, speaking for himself and for the Army, the Navy, the Marine Corps, the Treasury Department, and the Office of Civilian Defense, addressed a letter to Mr. James C. Petrillo, President of the American Federation of Musicians, in which letter he, first, set out a letter which Mr. Petrillo had previously written to the President of the United States. That letter was written shortly after Pearl Harbor, namely, on December 27, 1941.

Mr. Davis called Mr. Petrillo's attention to the fact that in that letter he had stated that each and every member of the American Federation of Musicians and its officers:

> "pledge themselves on this occasion to do everything possible to aid in the fight for freedom."

There are other quotes, but the letter of Mr. Petrillo to the President ended up with this new slogan, and I quote him again:

> "To this new slogan, this new theme for the New Year, then, the Federation dedicates itself: Music For Morale."

After Mr. Davis had quoted the letter of Mr. Petrillo to the President which I have adverted to, he then stated in his letter to Mr. Petrillo:

> "Despite this public and published pledge you sent a communication on June 25, 1942, to all companies engaged in the making of phonograph records, electrical transcriptions, and other forms of mechanical recording of music, advising them as follows:"

And then he set out the order of June 25, 1942. He further called Mr. Petrillo's attention to the fact that if this order remained in force and effect three serious consequences would ensue, all as he viewed it detrimental to the morale of the people at home and to the morale of the armed forces on the far-flung battle-fronts of the world.

Mr. Davis ended up his letter to Mr. Petrillo with this paragraph:

> "Therefore, on behalf of the people of the United States and on behalf of the War Department, the Navy Department, the Marine Corps, the Coast Guard, the Treasury Department, the Office of Civilian Defense, and the Office of War Information, I sincerely urge that you consider it your patriotic duty to stand by your pledge of December 27, 1941, and withdraw your ultimatum of June 25, 1942."

On July 31, 1942, three days after the dispatch of the letter I have just referred to, Mr. Petrillo replied to Mr. Davis at some length. He set out that the American Federation of Musicians would make recordings directly for the armed services; that is, if the Army put on a show or wanted a recording of its own band or something of the sort, the American Federation of Musicians would permit the making of recordings of such music. He further stated that they would make recordings, and I quote from his letter:

> "at the request of the President of the United States."

As far as I know there has been no such request made directly by the President of the United States. In any event, after some explanatory material in which he set out the part that the American Federation of Musicians was playing in the war effort, he ended up his letter as follows:

> "I cannot grant your request to cancel the notice that the American Federation of Musicians' members will not play for transcriptions or records."

Then he again mentions the two other exceptions. So the ban went into effect but certain exceptions were made for about a month, and certain special permissions given to make recordings during the month of August. Later, without notice so far as I know, these special permits were refused further. So that with the exception as I say of two or three specially permitted recordings we have had to subsist on cold storage music since the first day of August, 1942.

* * * * *

Mr. James Lawrence Fly, Chairman of the Federal Communications Commission, addressed a letter to Mr. Petrillo in which he too asked that the ban be lifted, and was met with a rather lengthy letter explanatory, neither of which I will read now because both will be made a part of the record; but the substance of it was a refusal to lift the ban or to rescind or modify the order of June 25th.

Naturally this ban excited considerable comment in the press and considerable apprehension among many persons whose financial investments and one thing and another depended upon a continuous flow of free music to the American people.

* * * * *

I personally do not care who is to blame. If the blame does not attach either in full or in part to Mr. Petrillo and his American Federation of Musicians, then it is the purpose of this subcommittee if possible to find out to whom it does attach. I do know this, that I am willing to take the word of Mr. Davis and the representatives of our armed services, and the Federal Communications Commission, and the Department of Justice, that this ban is going to become progressively detrimental, and probably suicidal, to our American communications system and to the morale on the home front as well as on the battlefront.

* * * * *

Mr. Fly's testimony is replete with charts and graphs and figures showing very conclusively and beyond dispute that a large number of the radio stations of this country are absolutely dependent upon the continuous and free flow of commercial recordings for their very existence. I think he held no particular brief for the network stations, who probably can take care of themselves, because the networks, as a rule, rely upon live musicians for their programs. But there are several hundreds of little stations, with no network affiliations, that depend for as much as 80 to 100 percent of their music time on recorded music, who will unquestionably, in his judgment, be forced to the wall if this ban stays in effect.

Mr. Petrillo. Mr. Chairman and members of the committee, my name is James C. Petrillo. I am President of the American Federation of Musicians, an affiliate of the American Federation of Labor. I was elected to the office of President in June, 1940.

I am pleased to respond to your invitation to appear before this Committee and give you such help as I can.

Let me say at the outset that in order for the Committee to be properly and fully informed on the subject of the Resolution, it is necessary to make a full investigation of the industry. Only by such investigation can the tremendous control of the entire music industry, including record making, radio broadcasting and the like, be shown to be in the hands of a few giant corporations who have become powerful and prosperous on the original work, and at the expense of, the live musician. The American Federation of Musicians respectfully requests this Committee to look into the charges frequently made, and which we believe to be true, of monopoly, interlocking arrangements and large profits.

This information can only be obtained by a thorough inquiry by this Committee into the inner workings of the industry and a complete examination and cross-examination of the higher officials managing the industry, as well as a full and complete examination of all records, data, and information gathered by the FCC.

Much has been written and said about this controversy by those whose interests are opposed to the interests of the American Federation of Musicians and its members. What has been said has not been for the purpose of enlightening the public, but for the purpose of abusing and insulting the American Federation of Musicians and its officers, on the theory that "if you cannot answer a person's arguments, you can still call him dirty names".

The worst offender in this regard has been the National Association of Broadcasters and some of its officials. The American Federation of Musicians has not adopted similar methods by way of defense. I hardly think that the members of this Committee can be unaware of the fact that the National Association of Broadcasters has engaged in an expensive publicity campaign composed of nothing but false issues and personal abuse.

In so far as the American Federation of Musicians is concerned, we welcome an investigation, providing it is full and complete and will investigate the entire industry in all its operations. Unless this is done, the Committee cannot obtain a thorough understanding of the problem.

I believe that I can be of most service to this Committee by dealing with the practical side of the question, and I think that this can best be done by answering such questions as you may desire to put to me. I shall try to answer such questions to the best of my ability. In so far as legal and economic information is concerned, our Counsel, Judge Padway, will present a full statement on these matters.

Mr. Petrillo's Testimony

Senator Wheeler. I would like to ask Mr. Petrillo a question. What proposal have you got for the settlement of the problem? WHAT DO YOU WANT?

Mr. Petrillo. Senator, this is not a problem, in our opinion, that can be settled by the American Federation of Musicians by itself. This is a problem, Senator, that can only be settled by the recording and transcription companies and the American Federation of Musicians sitting around a table and both being fair with one another. Then and then only can this problem be settled.

Senator Wheeler. What do you want and whom do you want it from? The committee is entitled to know that.

Mr. Petrillo. I will give the committee whatever information I can, Senator.

Senator Wheeler. You ordered a strike of your men, or it amounted to a strike. First of all, I have not seen any place just what you are striking for and what you want. The committee is entitled to know, first, what you want and from whom you want it.

Senator Tobey. Mr. Chairman, may I put in a word?

Senator Wheeler. Certainly.

Senator Tobey. I was interested in Mr. Petrillo's partial reply to the question. In his answer he said, "This can only be settled if the musicians' union and the broadcasters sit around a table together."

I think he is laboring under a false and incomplete premise. That is not all there is to it, as I understand it. There is a person in this country to whom we refer as John Q. Public. We are interested in Mr. Public in this matter and we propose to study it from that standpoint also and have something to say about what is coming out of the situation. That is why you are here and why we are here today. So, please bear in mind that it is not only the musicians' union and the broadcasters, but the public of America, the armed forces, individuals and radio stations, that we are representing, as well as you.

Mr. Petrillo. Senator, I did not know that the committee would like to sit around the table; I did not know that.

Senator Tobey. The interests of all the people have to be taken care of.

Mr. Petrillo. We understand that; and the American Federation of Musicians is going to do nothing to take away music from the public.

Senator Wheeler. But you have taken it away from the public; and that is the problem that this committee is interested in. After all, it seems to be the philosophy of some of the labor leaders and some of the leaders of industry in this country that all they have to do is to get together, and to hell with the public. The public has an interest in all these matters, just the same as the industry and just the same as labor. What I want to know—and I will repeat it—is, what do you want? Why did you go on strike? What do you want and from whom do you want it?

Mr. Petrillo. That is sort of a hard question to answer. I will do the best I can. Up until this moment, Senator, we have not been asked why we have gone on strike against the machine. That is what it amounts to.

* * * * *

Senator Clark of Idaho. When you call a strike, do you not think that the American people are entitled to know what you want?

Mr. Petrillo. The American people we always keep in mind. But we have an economic problem here. When a musician makes a machine that destroys himself it is a question of who is going broke first, the radio stations, the recording companies, or the American Federation of Musicians. We say that we do not believe that anybody should go broke. We say we do not believe that the radio stations should dry up, and we will not, gentlemen, make canned music under conditions formerly made by our people, because to continue, I dare say there would be no livelihood for the professional musician in two years.

* * * * *

Senator Wheeler. What do you want?

Mr. Petrillo. We want more work.

* * * * *

Senator Clark of Idaho. The very fact that those transcriptions go out through the country and that tune is plugged and plugged and plugged in every phonograph and coin-operated phonograph and on every radio program in the country by electric transcriptions, enables him (Paul Whiteman) to clean up, he and his musicians and other musicians playing that same tune.

Mr. Petrillo. You are right; but we are not interested in making Paul Whiteman richer than he is. We are interested in using Whiteman as a club to put some of our unemployed people to work.

Senator Clark of Idaho. But the fact that he makes this recording which is plugged, because people will listen to it because it was made by Paul Whiteman, puts thousands of other dance bands playing that tune. The other dance bands could not put it over themselves unless it was put over in this way.

Mr. Petrillo. I cannot agree with you there. Partially, yes. But that is the trouble with the industry. There are only a few bands doing all the jobs.

* * * * *

Senator Clark of Idaho. Why are they (the musicians) not in defense industries?

Mr. Petrillo. They do not want to go into defense industries. They want to be musicians. We will all get into defense industries if Uncle Sam sends for us.

Senator Clark of Idaho. You mean, they would rather walk the street?

Mr. Petrillo. After all, these people practiced music for ten or fifteen years and they have a right to make a living in their profession. But if Uncle Sam said, "You are all going to make munitions and get off the street"—

Senator Clark of Idaho. The automobile dealers have gone out of business.

* * * * *

Senator Wheeler. But I do want to know, and I think the public wants to know, because nobody has stated what you want and from whom you want it. You have given a great deal of thought and study to the subject, and your organization ought to have something in mind so that you could tell the committee. I think you owe it to yourself, because, frankly, whether it is propaganda or whatever it is, the fact is that the American public is very much disturbed and a great many people feel that by your actions you are doing a great disservice to the labor movement in this country. Can you not give us just exactly what your solution is? It may not be one that will be accepted by the industry or the broadcasters or somebody else; but you ought to have in mind what your views are as to what the solution of the problem is, what you want and from whom you want it. Tell us that, if you will.

Mr. Petrillo. Of course, Senator, I believe you know by this time in the few minutes that I have been sitting here that I am not trying to duck anything; I don't want to say anything that I will have to retract. That I don't want to do. I told you in the beginning that it is a hard question to answer. It seems to me that the people we have got to do business with are the recording companies. But the radio companies have taken on the fight instead of the recording companies. Of course I can understand that they will be hit indirectly if the recording companies don't make any records because of the action of the American Federation of Musicians. Naturally it is going to hurt the radio stations, and I can understand why they are in this fight. But if the recording companies come to the Musicians' Union and ask us the same question that you just asked me, Senator, the only thing I can say would be that under the conditions that those records were formerly made by the musicians, they will not be made in the future unless the recording companies and the musicians can get together with the public, like Senator Tobey said, or anyone else that would like to sit in. I believe that the problem could be solved. You know, Senator, there is work involved in this thing. There is no use in beating around the bush, as far as I am concerned. We want more work. We are the only labor organization that makes the instrument that destroys itself. Everybody has been fighting machinery, but mostly everybody who has attempted to fight machinery has been unsuccessful because they have no control over the situation, any more than the ice man who delivered the ice found himself out of business because the Frigidaire was installed in the home. But the ice man had nothing to do with the making of the Frigidaire. I feel sure that if the ice man had had something to do with it, knowing that he would be put out of business, I don't think he would have made it.

Senator White. Do you mean that you are against the recording instruments and electrical transcriptions because they compete with the live musicians, as you call them?

Mr. Petrillo. That is right.

Senator White. Is that the only reason you have?

Mr. Petrillo. Because it competes with us and takes our work away; yes.

Senator White. Is that the only reason?

Mr. Petrillo. Yes.

* * * * *

Senator Wheeler. We have got to the point where you stated that they were putting your people out of business. How many men in that union also work on the side, throughout the country?

Mr. Petrillo. Senator, that is a pretty hard question to answer. We have lawyers, doctors, and what not who play their violins or other instruments and earn a few dollars and go to school, and after they get their diplomas they drop their instruments; but some remain in the union.

* * * * *

Senator Wheeler. I have represented a lot of unions and have been attorney for a lot of unions, and if a union goes on strike it has some idea in mind about what it is asking for. It is asking for higher wages or shorter hours or for some specific thing, so that there will be something upon which they can bargain. The company says, "We don't want to give you shorter hours," or they say, "We can't give you higher pay." You ought to have some plan formulated in your mind so that you can sit down with people and tell them what your plan is. Do you want more money? Do you want shorter hours? Do you want these recording companies to pay a royalty on all of these recordings to the Musicians' Union, or just what is it you do want?

Mr. Petrillo. We are in a very peculiar position. We had a man here by the name of Thurman Arnold who has been after me ever since I have been president of this Federation, and he has been attacking me, since I have been president, in most of his speeches around the country. * * * Anything we put in writing, Mr. Thurman Arnold says is a secondary boycott; it can't be done. You can't do this, you can't do that. We had a $3,000,000 contract with broadcasting companies signed in 1937, and on the expiration of the contract we were told, not by Mr. Arnold, but by the broadcasting company, that Mr. Arnold said, "If you do that we will put you in the can for five years." And we had to drop the contract.

* * * * *

Mr. Petrillo. If you want me to make a direct answer, the only thing I can say is that we want more work or we will not make the recordings.

Senator Clark of Idaho. More work from whom?

Mr. Petrillo. From the recording companies.

Senator Wheeler. How are they going to give you more work?

Mr. Petrillo. That is up to them.

Senator Wheeler. No. That is where you are making a serious mistake. You are simply saying to the industry, "You have got to make more work." You do not tell them how. You are going on strike and you say, "We want more work." But you do not tell them how you are going to get it. You put yourself in a perfectly untenable position, in my judgment, before the American public. When you put yourself in that position you are not only doing yourself a disservice and your union a disservice, but you are doing the labor movement in the United States a real disservice, in my judgment, because you are putting it in bad. If you do not know you ought to know that there is at the present time, because of certain situations that exist in this country, a feeling not only on the part of business people, but on the part of farmers in this country against labor. There is a tremendous sentiment growing against labor unions. I am not one of those in favor of destroying labor unions. But if some of these labor leaders keep on in the way they have been doing in the past they are going to destroy themselves. I do not want to see the labor movement destroyed simply because temporarily they feel they are in a position of power. That is no reason to create public sentiment to such an extent that labor unions are going to be destroyed.

Mr. Petrillo. Let me see if I can't answer you this way. I have a note here that says we have 201 stations in the United States today that receive chain programs. They receive our finest symphonies and orchestras over the air without any cost. They receive our name bands from the hotels and cafes without any cost. They buy and play all the recordings.

They not only get all this free of charge from the musicians, but the chain companies pay them for taking commercial programs. Now, in 201 stations in the United

States we haven't got one live musician on the pay roll, and certainly not one of these 201 stations could live without the American Federation of Musicians. Now, we haven't got one man in the radio stations. Now, gentlemen, certainly that is not fair.

Senator Wheeler. Well, now, you are getting away from the proposition that you made a while ago. Now you are saying, as I gather it, that you want these 201 stations in the United States to employ musicians. Is that all you want?

Mr. Petrillo. Yes.

Senator Wheeler. Well then, you are not asking that the recording companies put more men to work, are you?

Mr. Petrillo. The thing is so complicated, Senator, that a direct answer is nearly impossible, because they are all together, the recording companies, the transcription companies, and the radio stations.

* * * * *

Senator Clark of Idaho. Have you asked either the recording companies or any representatives of the radio broadcasting institutions or the coin phonograph industry to meet with you and discuss terms?

Mr. Petrillo. No.

Senator Clark of Idaho. Have you ever heard of a strike, in all your experience in the labor movement, that has been called without previously making certain demands upon the people against whom you struck?

Mr. Petrillo. No, but we are in a unique position.

Senator Clark of Idaho. Why are you in a unique position?

Mr. Petrillo. Because we make the instrument that destroys the musician.

* * * * *

Mr. Petrillo. Suppose we have in mind not making recordings at all any more.

Senator Clark of Idaho. Do you have that in mind?

Mr. Petrillo. No, but suppose we did.

Senator Clark of Idaho. Well, I do not think we are interested in hypothetical cases.

Senator Wheeler. Let me say, if I may interrupt, if you did have that in mind, if you simply said that you would, you would soon find your labor organization out of business in this country—do not make any mistake about that—because you would get legislation in Congress to take care of that situation.

* * * * *

Senator Wheeler. So, Mr. Petrillo, the American public is not going to stand for any union, I do not care what it is, what union it is, or how powerful it is—the American public is not going to stand by and simply say or let a union come in and say, "We are going to stop industry; we are going to stop the manufacture of this particular thing; we are going to stop progress in this country."

Mr. Petrillo. I agree with you.

Senator Wheeler. I think that your first obligation, not only to your own union, but to the people at large, is to have some formula that you can submit and say "This is what we want," and then see if it cannot be worked out upon a practical basis so that your union won't suffer and so that the industry won't be put out of business and so that the general public can get the benefit of good music throughout the United States.

* * * * *

Senator Tunnell. Mr. Petrillo, what percentage of the musicians of the country belong to your union?

Mr. Petrillo. Senator, I will say right now that every professional musician in the United States and Canada belongs to the American Federation of Musicians.

Senator Tunnell. Every one does?

Mr. Petrillo. Yes, sir.

Senator McFarland. Now, is not that your unique position that you are talking about?

Mr. Petrillo. I will say yes.

Senator McFarland. Now, if that is correct, following up Senator Wheeler's question, is it not absolutely necessary that you stop all recordings in order to accomplish your purpose?

Mr. Petrillo. Yes.

Senator McFarland. And that is the only answer?

Mr. Petrillo. That is right.

Senator McFarland. That is all.

* * * * *

Senator Clark of Idaho. Now, the fact of the matter is, your strike was called without giving anybody, either the industry or this Congress or the public any intimation of what demands you were after, was it not?

Mr. Petrillo. Well, I didn't think, in the beginning, we were going to run up against like this, to be frank with you.

* * * * *

Mr. Petrillo. We made demands on the recording companies in 1937.

Senator Clark of Idaho. What were those demands?

Mr. Petrillo. The same kind of demands that we would probably make now if we got into a meeting, and that was to try and solve the problem whereby the musician was committed to be destroyed in making these records.

* * * * *

Senator Clark of Idaho. But now, in your 1942 ban, did you make any demands on the recording companies or any member of the industry affected, before you struck?

Mr. Petrillo. Not as yet.

Senator Clark of Idaho. Not as yet. So, since August 1st you have had in force and effect a ban here, which all of the officers of the Government charged with conducting this war say is injuring the national morale, and as yet you have not told either the public or the industry what you want; is that not true?

Mr. Petrillo. That is true.

* * * * *

Senator Tobey. One of the incidents which has aroused widespread hostile comment to your order is in that instance where you prohibited the broadcasting by a high school orchestra at Interlochen, Michigan, and my mind is not quite clear as to that situation. I have seen some justification and some adverse comment.

* * * * *

Mr. Petrillo. It is also necessary for the self-protection of the professional musician. Since the outbreak of the war, Army and Navy bands are on the air any number of times each day. This of course you can easily understand has taken up much music time on the air, so much so that the American Federation of Musicians was beginning to wonder whether there was going to be any work left for the professional musician. It is easy to understand that the more free music the radio stations receive, the less need for the professional. That was the primary reason for opposing the broadcasting of the concerts from Interlochen. It will be a sorry day for the professional musician if two-thirds of the air time is taken up by nonprofessionals. You must remember that this already is an overburdened profession.

* * * * *

Mr. Petrillo. In some of our locals unemployment reaches 60 percent; in some 75 percent; and in other locals as high as 90 percent. If this continues, there will be no incentive for our children to become professional musicians, because after having studied for many years they will find themselves in a starving profession.

* * * * *

Let us see what the American Federation of Musicians has done for the happiness of the home in supplying good music. Today, as in the past, its symphony orchestras are permitted to go over the air without any charge to the broadcasting companies. Its name bands are also permitted to go over the air without any extra charge to the broadcasting companies. The final result is that the public gets the benefit. I can truthfully say that for every dollar the broadcasting companies pay for musicians they receive $4 worth of music gratis.

* * * * *

Senator White. An amateur band is not a broadcasting band.

Mr. Petrillo. But all the music they give free of charge is still music to the radio stations, and the more music they can get free the less work there is going to be for the professional musician.

Senator Clark of Idaho. Does that follow at all? I think it would help the professional musician, by keeping up listener interest in music.

Mr. Petrillo. Senator, if they get a lot of music free of charge and our musician sits there in the studio and has nothing to do, then the time comes when the broadcasting company says, "We don't need those men any more. They are sitting around all year doing nothing." That is what we are worrying about.

Senator Clark of Idaho. Well, a lot of your men are sitting around doing nothing and getting paid too, aren't they?

Mr. Petrillo. That is because the broadcasting company is going to use that against us as a club some day and say, "We don't need those men; we can't use them."

Senator Clark of Idaho. That is highly speculative.

* * * * *

Senator Wheeler. You have control over your musicians, do you not?

Mr. Petrillo. Yes; I do.

Senator Wheeler. Why do you not work it out with your union so that the musicians would have to divide up their time, so as to help support the poorer people or see that they get a larger share of the business?

Mr. Petrillo. Senator, I don't think that can happen, because these people play for advertising agencies. An advertising agency won't go on the air unless he can get Whiteman's band, and if he can't get Whiteman's band, he will probably go and advertise in the magazines or the newspapers.

* * * * *

Senator Tunnell. I would like to ask about this. I am getting, and I suppose every other member of the committee is getting letters along this line: when he bars children, educational institutions and even service bands from the air—what does that mean? How can you bar them from the air?

Mr. Petrillo. Well, as I stated before, Senator, we have a closed shop contract with the chain broadcasting companies.

Senator Tunnell. You just won't let them use the facilities?

Mr. Petrillo. We simply say to the broadcasting companies that if these bands play, we withdraw our services.

* * * * *

Senator McFarland. Going back to Senator Wheeler's original question just a few moments ago, you stated a little bit ago that the real, unique position that you were in was the fact that you do control the musicians of the country. In that way you have prevented the recording of music; that is right, is it not?

Mr. Petrillo. That is right.

Senator McFarland. And you state, as I understand your position, what you want is more work and more money; is that true?

Mr. Petrillo. I won't say more money. I will say more work.

Senator McFarland. Well, you cannot work without money, can you?

Mr. Petrillo. That is right.

Senator McFarland. You can do plenty of work without money. It is the money you want.

Mr. Petrillo. What I mean is this: We don't want more money and more time on top of it.

Senator McFarland. Well, coming back to this question that I wanted to ask you, this ban—and I will call it "ban" instead of "strike"—this ban that you have made upon recording of music has been in effect about six months, has it?

Mr. Petrillo. Since August 1st.

Senator McFarland. Has that helped your organization up to the present time?

Mr. Petrillo. No.

Senator McFarland. Are you satisfied with your position at this time?

Mr. Petrillo. No.

Senator McFarland. Well, what are you doing about that situation?

Mr. Petrillo. Well, by the time we get through with the Federal Courts and the Senate investigation and another Federal Court case Monday, we don't know where we are at.

Senator McFarland. Well, the ban has been in effect for six months. Now, the people have suffered during that time, have they not?

Mr. Petrillo. I don't know whether they have suffered or not, Senator, because the live musicians are giving the people over the radio and over the chains all the popular tunes that they desire.

Senator McFarland. But you know, do you not, Mr. Petrillo, that there are a large number of stations that do not even have hook-ups with these broadcasting companies?

Mr. Petrillo. Yes, I know that.

Senator McFarland. They are little stations. And the only type of music that they can get, good music, is from the chain broadcasting companies. Now, you would not want one of your good orchestras barred from the little towns out in the country, to those people, would you?

Mr. Petrillo. I don't know whether there is a station or city in the United States that hasn't got chain broadcasting.

Senator McFarland. Well, I can tell you that there are lots of them.

Senator Wheeler. Oh, yes, lots of them.

Senator Clark of Idaho. Lots of them.

Senator McFarland. Now, you would not want one of your good orchestras barred from one of those little stations, would you? They probably could not afford to hook up now.

Mr. Petrillo. They could not afford to pay it.

Senator McFarland. Did you stop and take into consideration that you were depriving the people in that little community of good music?

Mr. Petrillo. That may be so.

Senator McFarland. And do you think, Mr. Petrillo, really, now, that that is helping the cause of music, to deprive those people that happen to live in those localities, who are doing important work, mind you, in the United States of America, to help win this war right now—do you think that depriving those people of the benefit of good music that you put out is doing your cause any good?

* * * * *

Mr. Petrillo. It isn't doing any good, no, not for the musicians nor the community. But now, let me say this: Are we to continue making records, knowing that we are going out of business? How about that angle of it? Are we to be considered at all as the makers of the music?

Senator McFarland. Now, I will answer you that question in this way: As has been said here many times, ordinarily when a man goes on a strike and he says, "Well, we are not going to do this", he has some object in mind. Now, that is what Senator Wheeler was trying to find out, what you are driving at; what you expect to accomplish. Now, you have admitted here that you haven't helped your cause by just putting the ban on. Where are you going? Where are you headed for? Maybe you are headed for a pitfall. Did you ever stop and figure that?

Mr. Petrillo. That may happen.

* * * * *

Senator McFarland. I was trying to find out your position, because if you won't help, how in the world can you expect anyone to help you if you don't know what you want? That is what I am trying to get down to.

Mr. Petrillo. Senator, I might say this to you. If it was not for the Senate investigation, for the Federal courts, and certain department heads didn't interfere with this controversy, I believe we would have had a settlement by this time.

Senator McFarland. All right. If you had started to try to get a settlement before you put the ban on, maybe you would have gotten a settlement, but you did not do it. And, you stated a minute ago that you never made your wants known up to this date.

* * * * *

Senator Wheeler. But, Mr. Petrillo, I did send for you and suggested that you and the industry get together, with some of the members of this committee, and see if we could not work out some program, and you sent word back to us that you did not want to meet with us, because of the fact that you felt you were going to get together. However, you never showed up. Now, it was not this committee, because I personally tried to get the industry and you together to try to work out something rather than have an investigation, or pass some law, because I do not want to see laws passed which are going to put labor organizations out of business. But, unless labor unions can work out their problem on a fair basis, you are very apt to get some laws which will be a great detriment to the labor organizations. Now, as the Senator said, you have not as yet stated what you want or how you expect to get it. Now, take your recordings. What arrangements can you work out with the recording companies that will give your men more work? Can you work out anything? Is there any possible way that the recording companies can give your men more work, if you suggest that that is what you want?

Mr. Petrillo. I think so.

Senator Wheeler. Tell us how.

Mr. Petrillo. Well, if we take the instance here of the 201 stations who employ no musicians—

Senator Wheeler. We are talking about recording companies now.

Mr. Petrillo. But the recording companies get the records and we make the records for them, and they push them out.

Senator Wheeler. All right, they push them out. But, you suggest, first, that the recording companies ought to be the ones to settle it. Now, as to the matter of the recording companies giving more work to your people, that is not possible, is it? They are giving all the work that they can give and using all the recordings that they can use, aren't they, so they cannot use more men. Now, that was your first proposition.

Secondly, you say that the local stations ought to use more musicians. Now, in the first place, a lot of these small stations cannot afford it. For instance, I know a station in Montana that had to move from one locality to another because of the fact that it could not make enough in that community to keep it going. I know other little stations just hanging on by a thread. Some of these stations could not hire more musicians if they wanted to and, in the second place, if they hired more musicians, the musicians in some of these communities would not be anything that would be satisfactory to the general public, like Paul Whiteman's orchestra or some of the other orchestras that are on the air. Now, I do not know just how you are going to do it, unless you make the stations employ some men, regardless whether they want to use them or not, or can use them.

You might go to a station and say, "Now, you have to employ so many musicians, whether you can use them or not, and let them sit around," but I do not believe the general public would stand for it.

Mr. Petrillo. I am in agreement with you, Senator, that there are many stations that can't afford any more of a payroll, whether it be musicians or anybody else. Those are not the stations we are after; I mean, if there is no money there, you certainly can't get it, and we know there are a lot of them that can't pay. I am in agreement with you.

* * * * *

Senator Wheeler. Here is the President's Report, 1940, in which he says: Our membership consists of fully one-half of non-professionals who are not entirely dependent on music for a livelihood but are of exceedingly high value to the American Federation of Musicians as a whole, that is, very valuable to the Musicians Union, because they pay dues to it, I presume. But, he says: Our membership consists of fully one-half of non-professionals who are not entirely dependent on music for a livelihood.

Mr. Petrillo. Now, there is probably thirty thousand of those men, whom we don't question as professionals now, that can't get a job in the music business. They just can't get a job. For instance, Senator, when the Movietone and the Vitaphone were installed in the theatres, we had twenty-two thousand professional men working in the theatres. Of those twenty-two thousand, today we probably have four thousand. Now, there are about eighteen thousand men who were thrown out on the streets, and I would say that most of those men today are working at something else, but still hold a card in the Federation, because they can't get a job in the music business.

* * * * *

Senator McFarland. Mr. Petrillo, you admit that people out in outlying places who dicker around radio broadcasting stations, where they are deprived of this music it is a detriment rather than a benefit to your industry, do you not?

Mr. Petrillo. Well, I say that, Senator McFarland, for the reason that we do not want to deprive these people in such neighborhoods as have been discussed here so much all morning, of popular music.

* * * * *

Senator McFarland. I understand that various schools, in order to teach students to appreciate music, particularly good music, play records for their benefit in classes. I am quite sure that is done.

Senator Tobey. Of course it is done. It is the common practice.

Senator McFarland. Mr. Petrillo, you by this ban have deprived such schools of that privilege. Do you not think that injures the music industry rather than helping it?

Mr. Petrillo. Frankly speaking, we never went into that. But we have never had any requests since the ban for the making of such records.

Senator McFarland. Then you will admit that before you issued your order placing a ban upon such recordings you did not carefully consider the far-reaching effect it might have upon your own industry as well as upon the people of the United States.

Mr. Petrillo. Of course, primarily we were thinking of the musician himself. I want to be fair with you about it, and will say, that that is what we had in mind.

Senator McFarland. But you have to have an audience, do you not?

Mr. Petrillo. Yes, we have to have an audience.

* * * * *

Senator McFarland (continuing). Really I cannot understand the situation. I am trying to determine in my own mind where you are headed for. What is it really that you are asking for?

Mr. Petrillo. Let us indulge in this supposition: Suppose the musicians' union has made a mistake in not making a demand and the people are suffering for want of music. Now, do two things that are wrong make a right? Does that mean that the recording companies can say: If you don't make a demand we will not talk to you, but will go on about our business.

Senator Clark of Idaho. They have not said they would not talk to you, have they?

Mr. Petrillo. They have not said they would.

Senator Clark of Idaho. And you call a strike without asking them.

Mr. Petrillo. That is right, but what I am trying to get at is this, that if there has been a mistake made here, two mistakes do not make a right. I will tell you why these people do not come to see me. They are depending upon Congress to take care of them. They are depending upon the courts to tie us up. This is big business.

Senator Clark of Idaho. Haven't you got to the point of pretty big business by this time?

Mr. Petrillo. The workingman should get a part of the profits, surely. For instance, the violinist is entitled to a reasonable return for all of his efforts. He has practiced for 15 or 20 years to get a job.

Senator McFarland. I do not know what they are depending on. This much is sure, that you placed a ban upon the recording of music, which you yourself admit has hurt some people. You admit that some people have suffered by reason of it. You also admit that it has not gotten you anywhere, that you have not accomplished anything by it. It may be that we will have to find out from someone else what you want, but it seems to me you are the man from whom we should learn what you are asking for and what you expect to accomplish.

Mr. Petrillo. We expect to get more work.

Senator McFarland. And yet you admit that you have not gotten it by what you are doing.

Mr. Petrillo. I am satisfied we will get it if there is no interference.

Senator McFarland. You have not had any interference up to date.

Mr. Petrillo. Oh, yes, we have.

Senator McFarland. From whom do you hope to get work?

Mr. Petrillo. Well, it is a combination of people. For instance, the recording man says, "We cannot give you any more work because you make a record and it is put on the market and anybody can buy it." The radio fellow says, "You cannot work for us because you make a record and it goes on the market." So it is just a vicious circle. We do not know where to go.

Senator Clark of Idaho. And in the meantime you call a strike without knowing what you want.

Mr. Petrillo. That is our prerogative. We are not going to make canned music, and that is what it is called, under former conditions unless the Government makes us do so. I do not think the Government will do that because there is the musicians' side of the question. I told you this morning and I tell you now again, and repeat it and repeat it, that we do not want to put anybody out of business because that is neither sound practice nor good business. However, we do want to live, and we do want industry to live.

Senator McFarland. But you do say that as far as the record goes up to the present time, the only solution is to stop making records so that people in the various localities will have to hear musicians personally?

Mr. Petrillo. We did that because we felt the recording companies would come in and ask, "What do you want?" which is just what you gentlemen are asking me here today.

Senator McFarland. And, I take it, you would not be able to tell them, just as you seem unable to tell us.

Mr. Petrillo. I would say, "Gentlemen, we need your help." I would say, "We would like to have you solve this problem with us."

* * * * *

Senator Clark of Idaho. Mr. Petrillo, there are three major industries involved, apart from the public, with whom you are going to have to negotiate or they negotiate with you, if you make your demands known. There is the immediate objective of your ban, the transcription or recording companies. Next comes the people who buy records for radio use, the radio industry; and, third, is the coin phonograph industry. Now, I am not mentioning the home record industry, which is the right of the public to use records, but let us take these three seriatim: What do you want the transcription companies to do in order to change the conditions under which you have refused to make records?

Mr. Petrillo. We now come back to the same question that Senator McFarland asked me.

Senator Clark of Idaho. Whose question remains unanswered. In the hope of facilitating an answer I am trying to break it up into three parts. Under present conditions how can the transcription companies give more employment to members of your union?

Mr. Petrillo. The first thing a transcription company makes is the master record, and then they make thousands of additional transcriptions. But if they are able to say to a small radio station, such a station as we are trying to help here: You may have this transcription for a show tomorrow afternoon but it is going to cost you $100, and after you are through with it for that use you must ship it back to us so we may put it back in our library service, you can see where you are. Well, right there is one fee, and they probably get a thousand fees out of that record. Why is it that we cannot make a thousand fees out of the record? We make the record in the first place.

Senator Tobey. Is it not possible that a plan can be developed whereby those who produce the music, your union members, through the medium of recording, can have some licensing plan or some rental plan, may receive some increment more commensurate with their services as professional musicians?

Mr. Petrillo. We think that should be done.

Senator Tobey. Can you accomplish that?

Mr. Petrillo. I think so.

Senator Tobey. And some such plan would please you?

Mr. Petrillo. Yes, sir.

Senator Tobey. And would please your musicians?

Mr. Petrillo. Yes, sir.

Senator Tobey. And would please the recording companies?

Mr. Petrillo. Yes, sir.

Senator Tobey. And out of some such plan you would all be able to live?

Mr. Petrillo. Yes, sir.

* * * * *

Senator Clark of Idaho. Then I take it you are willing to state to this subcommittee that at the request of the President of the United States you will lift the ban which you have heretofore imposed.

Mr. Petrillo. After explanation to the President of the United States of our position in the matter and he finally decides, especially now, in wartime, that it should be done, to lift the ban and continue the making of transcription recordings for the duration of the war, yes, I say the request will be granted.

* * * * *

Mr. Bingham. What survey was made by the American Federation of Musicians to determine the extent of unemployment, either in June of 1941, or June of 1942, or July of 1942, before the ban went into effect?

Mr. Petrillo. Well, the only survey we have is that of resolutions that came in at every convention, and the introducer of a resolution will always start off by saying "You know, we have to go back home, and we must bring something back home to our boys. We cannot sit idly by in convention and merely pay bills and reelect officers. We have so many men out of work." For instance, we are every year taking so much money out of our treasury to feed the unemployed. In New York City in the last three years the treasury spent something like $900,000 to feed unemployed musicians in that jurisdiction. In Chicago we spent $90,000 for the same purpose last year. That is our survey. But we have some figures here if you would like to have them.

Mr. Bingham. I should like to have whatever your survey may show. As I understand the situation no survey has ever been made; that all that you have done is to take resolutions introduced at conventions and used those as a basis for unemployment.

Mr. Petrillo. That is right.

Mr. Bingham. Then you have no definite idea as to the extent of unemployment among your members?

Mr. Petrillo. Yes, we have an idea, such as speeches made in conventions, and so on.

Mr. Bingham. Of your 138,000 members, how many are permanently unemployed?

Mr. Petrillo. That is a hard question to answer.

Mr. Bingham. I mean, not engaged in any gainful occupation.

Mr. Petrillo. That is hard to answer.

Mr. Bingham. In other words, you do not know?

Mr. Petrillo. I could make a guess, but you do not want that.

Mr. Bingham. You have no survey?

Mr. Petrillo. We have a survey made in the last three days.

Mr. Bingham. Then, I take it, you made a survey in January, 1943, to substantiate a guess on your part that would justify you in placing a ban on all recording of music in general, effective as of August 1, 1942.

Mr. Petrillo. I will say, if it will do you any good, that at one time we had 16,000 musicians on W. P. A.

Mr. Bingham. When was that?

Mr. Petrillo. About 1938. Then it went down to 12,000, and 9,000, and 6,000, and I think the last figure showed 4,000 because the budget was being cut.

Mr. Bingham. What is it now?

Mr. Petrillo. It is 4,000 musicians working for W. P. A.

* * * * *

Mr. Petrillo. We have many such musicians who play Saturday night and Sunday. They have a job of work in the daytime and use music as a sideline.

Senator Clark of Idaho. On your own statement of this morning over 50 percent of your membership is comprised of musicians of that kind.

Mr. Petrillo. I do not think that was my statement. I think perhaps that was the statement of the former president, in 1940.

Senator McFarland. Perhaps a great many of those people would use it as a sideline, but not by choice.

Mr. Petrillo. No, not by choice, and a great many of them—and I want to be perfectly fair with you, so I will say, a great many of them do use it by choice.

* * * * *

Mr. Bingham. Was anybody benefited by your ban of the Interlochen orchestra?

Mr. Petrillo. No.

Mr. Bingham. Will you tell me who did benefit?

Mr. Petrillo. As I told you this morning, it is the employers' idea of getting as much free music as possible, so that the day will come when they will say to Petrillo or his executive board, we have 75 men in the New York studio. They haven't worked 14 days out of 52, and we are not going to pay them any more, and we don't need them any more.

Mr. Bingham. That is the fear that you have?

Mr. Petrillo. Yes.

Mr. Bingham. But nobody has made that statement to you, that this is the proposal of N. B. C.?

Mr. Petrillo. No. But I have been dealing with employers too long not to know that they do not pay for nothing.

* * * * *

Senator White. If you are applying the principle you enunciated and which you said dictated your action in the Interlochen case, that you took them off the air because they interfered with professional musicians, why wouldn't the application of that rule take off the air all these thousands of school and Legion orchestras and bands?

Mr. Petrillo. There are no more amateur school bands on the air. They are all off. That is an answer to your question if I understand you correctly.

Senator White. Do you mean to say there are no school bands now broadcasting at all?

Mr. Petrillo. None today. They are all off the air.

Senator White. When did that happen?

Mr. Petrillo. In the past four or five months.

Senator White. Was that at your instigation?

Mr. Petrillo. Yes, sir.

* * * * *

Mr. Petrillo. There are no amateur bands or orchestras on the air today.

Senator White. And they are off the air because of your orders or representations or whatever you may choose to call them?

Mr. Petrillo. That is right.

Senator White. And you have taken them off the air because you do not want them to interfere with professional musicians?

Mr. Petrillo. That is right.

* * * * *

Mr. Steeper. There are 11,059 out of these twenty Locals that are represented, who are employed full-time. Then there are 3,972 employed part-time. The balance is 48,245 unemployed. We took 15 per cent off for men in service, leaving a balance of 41,209.

Mr. Bingham. Unemployed as musicians?

Mr. Steeper. Yes, sir.

Mr. Bingham. Mr. Petrillo, your position is that anybody who joins your Union is entitled to earn his living as a musician?

Mr. Petrillo. No. We have some bad musicians.

Mr. Bingham. How many?

Mr. Petrillo. Well, I don't know how many.

Mr. Bingham. You have been doing some guessing, could you make a guess?

Mr. Petrillo. I could only answer that question by telling you what I told you this morning, that a musician is listed according to his ability by the employer and his director and not by the Union.

* * * * *

Mr. Bingham. With reference to the Detroit Symphony Orchestra which you talked about this morning, I again quote Variety of October 28 to the effect that musicians are good mechanics, that their expert fingers are valuable in war work; and the next item mentions the names of members of the Detroit Symphony Orchestra who are now working in war plants, and it is estimated that 60 percent of Motor City musicians are doing full time defense work in war plants.

Mr. Petrillo. Don't we come back to music culture again? What is going to happen to our music culture?

Senator McFarland. Music culture is going to disappear if we do not win this war. That is the first and most important thing.

Mr. Petrillo. I agree with you. That is the first. I will not argue with you there.

* * * * *

Senator Clark of Idaho. Of course the impact of the war has dislocated our economy in many respects. For instance, automobile salesmen, who would like to remain at that profession which they have followed during a period of years have also been injured. I think all industry, probably, and professional and business men have been injured, with a few exceptions, by the war. I am just wondering if musicians can be obtained today; that is, good musicians, musicians that would measure up to the standards that would be required of them and which you require of them.

* * * * *

Senator White. I wondered if there was anything to show what number of live musicians had been displaced at any given time by records and electrical transcriptions.

Mr. Petrillo. The only way I can answer that question is that wherever a musician is put out of work, canned music comes in as a substitute. If the public don't want any more music, we are out of business, like anybody else. But canned music always comes in, always shows up when a musician is put out of a job.

* * * * *

Senator McFarland. Perhaps it would be a good thing if you told us what those (movie) "tones" are. What kind of recording is the vitaphone?

Mr. Petrillo. It is put on a film and played with the picture, put in the operator's booth with the picture, and as the picture is shown on the screen music is played.

Senator Tobey. It is synchronized?

Mr. Petrillo. Yes.

Senator Tobey. Have you put a ban on that, too?

Mr. Petrillo. Not yet. You would bring that up!

Senator Stewart. Are you opposed to that method of producing music, the synchronization method?

Mr. Petrillo. Yes; very much opposed to it.

Senator Stewart. You think they ought to have live musicians playing in the orchestra?

Mr. Petrillo. Or they should at least put back 22,000 men they put out of jobs.

Senator Clark of Idaho. That is, the moving picture industry?

Mr. Petrillo. Yes.

Senator Stewart. How many moving picture theaters are there in the United States?

Mr. Petrillo. About 17,000.

Senator Stewart. How many in small towns would be unable to perhaps afford live musicians?

Mr. Petrillo. We would leave them out. Even in the heyday, when we had plenty of musicians working, we did not have musicians in those 15 or 25 cent theaters. What they had in those days was an organ.

Senator Stewart. Do you want to put them back to that?

Senator McFarland. You would not want to put them back to the organ again, would you? I come from one of those little towns.

Mr. Petrillo. I will give you special permission.

Senator McFarland. Seriously, you would not want to put those theaters back to where they were, would you?

Mr. Petrillo. But I do think that the first class theaters, where they charge anywhere from 50 cents to 85 cents or $1 or $1.25 admission could certainly afford an orchestra.

Senator Stewart. That charge how much?

Mr. Petrillo. Fifty, 75, 85 cents, $1 or $1.25 admission.

Senator Stewart. Do you know of any small towns that charge that much?

Mr. Petrillo. No; but I say that is the kind of theaters I am speaking about which could certainly afford an orchestra. We permit 300 of our people in Hollywood to play all that music that you hear in all the theaters in the United States; and we are again depriving ourselves of work.

* * * * *

Senator White. What increases have been brought about by that ban since you put it into operation?

Mr. Petrillo. I might put it this way, Senator, that there are more commercial programs on radio today, by far, played by canned music than by live musicians. If you will listen in on the stations every morning—

Senator White. That has been true always with respect to certain stations, has it not?

Mr. Petrillo. That was because we were very lenient and permitted them to do it; but now we find ourselves in a position where we need that work.

Senator White. Can you give us any figures on which we can rely?

Mr. Petrillo. No; I cannot.

Senator White. Have you a hope as to the number which will be added, of live musicians, if your ban is continued? Have you anything on which to base an estimate?

Mr. Petrillo. I would say that if the recording companies and the radio companies, if you please, are willing to sit down with the Federation—

Senator White. That is not what I asked.

Mr. Petrillo. Then I misunderstood you.

Senator White. I want to know if you have any present judgment or any present estimate that you could give us as to the number of live musicians added to the previously existing number of live musicians as a result of your ban?

Senator McFarland. I think he answered this morning that the ban had not done any good so far; that it had done harm.

Senator White. I wanted to know to what extent this ban was absorbing and making use of the 138,000 musicians which make up your organization; whether it was a really effective instrument in your own behalf or whether it was chiefly an annoyance to the public.

Mr. Petrillo. Why, there is one case in particular, now, of "Singing Sam." He sings for Coca-Cola, I believe. He was on transcriptions, but since the transcriptions have been shut down he is on a live program. I know of a few cases in Chicago where the house band comes down a little bit earlier to play some popular tunes because they can't get them on the records. I don't think it is enough of a gain to speak about.

Senator White. It does not seem to me to be enough of a gain to compensate the public for the loss of the service they have been enjoying.

Mr. Petrillo. Not as far as we have gone; I agree with you.

* * * * *

Mr. Bingham. While we are talking about commercial transcriptions, you said, I believe, in your letter to Mr. Elmer Davis, that you had no objection to the making of the commercial transcription that was used one time and one time only?

Mr. Petrillo. Yes.

Mr. Bingham. You told Mr. Davis that you would permit that to be done, and then on September 3 you placed that under the ban also; is that correct?

Mr. Petrillo. Yes.

Mr. Bingham. Why?

Mr. Petrillo. Because up to that time I was of the opinion that only one master record was made of a recording, so that if they turned the master over to the American Federation of Musicians and they would not make any more transcriptions, only the original—play it once and break it—I could see no harm. But after I sent that letter I found that they could make five or six or ten master records, so that the one they sent to the American Federation of Musicians did not make any difference. They could still go out and press those transcriptions, which I was ignorant of when I sent that letter to Mr. Davis.

* * * * *

Mr. Bingham. And that is the type of record you were talking about when you wrote to Mr. Davis in July, when you stated that electrical transcriptions used as intended, once only, are not detrimental to the American Federation of Musicians if destroyed after such use?

Mr. Petrillo. That is right.

Mr. Bingham. And then you repudiated that on September 3?

Mr. Petrillo. That is right; because they make transcriptions with music only and no name of the musician on the transcriptions. Those are the records that I have been telling you about that they send out and print.

Mr. Bingham. Let us get back to this one-use-only advertising message that is on a wax disk, and used once only. You say that somebody violated that provision?

Mr. Petrillo. I say they could.

Mr. Bingham. Did they?

Mr. Petrillo. No; they did not.

Mr. Bingham. How do you know that they could?

Mr. Petrillo. They could, because any record, even a Singing Sam Record, even though it is played for Coca-Cola—they can dub the music out of that record and leave Singing Sam out.

Mr. Bingham. And you thought that was sufficient reason to repudiate your statement?

Mr. Petrillo. I thought it was a good reason. I had no guarantee that they would not do it.

Senator Clark of Idaho. After saying you would permit it, do you think it was at all fair to arbitrarily withdraw your permission because they could do it and had not done it?

Mr. Petrillo. I was ignorant of the fact that they could do it. Had I known that I would have told Mr. Davis the same as I am telling the committee.

* * * * *

Mr. Petrillo. I am in hopes that very shortly we will be able to show this committee, or the Congress or whoever wants the record, that many of the small stations now make records of our orchestras coming over the air and sell those records to smaller stations. They go farther. We will give them a remote control band out of a hotel, which we give them free of charge, and while you listen to that band some fellow down in a small town, or in a large town, will say, "Don't forget to buy your drugs at So and So's drug store on the corner"—commercializing the band that we give them free of charge.

Senator Stewart. Does not somebody pay for the band?

Mr. Petrillo. No, no one. They pick it up at the hotel.

Senator Stewart. It is paid up at the hotel, is it not?

Mr. Petrillo. They pay the hotel price, but not the radio price.

* * * * *

Mr. Bingham. It is a fact, is it not, Mr. Petrillo, that you just issued this ban without knowing anything about the impact on your musicians or the impact on the public at large, without having made a survey of unemployment or a survey of the effect on the war effort? That is a fact, is it not?

Mr. Petrillo. Frankly speaking, we didn't know that we were going to be crushed by newspaper publicity and a lot of speeches and court proceedings and all that. I thought we were just striking against a machine, and let it go at that. But I am a much wiser man now. I see that everybody is taking exception, or most people have. But I believe that is only because they do not understand our problem.

* * * * *

Mr. Bingham. I am talking about radio putting a musician out of work, a radio broadcasting station putting a musician out of work somewhere.

Mr. Petrillo. I say we can prove that. Of course you must understand that I didn't come here fully prepared for everything. I didn't know what the questions were that I was going to be asked.

* * * * *

Mr. Bingham. Let me ask you this. Is it not a fact that at the 1941 convention in Seattle a chart was prepared showing the income of musicians from recordings and transcriptions from 1935 down to the estimated income of 1941? That is correct, is it not?

Mr. Petrillo. That is right.

Mr. Bingham. And did it not show that in 1935 the income to musicians from recordings and transcriptions was some $600,000, and that in 1941 it was about $3,000,000?

Mr. Petrillo. That is right.

* * * * *

Mr. Bingham. Do you see any distinction between putting on Singing Sam alive over a network and transcribing the same program and sending it by United States mail to 30 or 40 or 100 stations?

Mr. Petrillo. Only that we prefer the entertainment in the flesh rather than in the can.

Senator McFarland. While you are right on that subject, how efficient is the recording of this music?

Mr. Petrillo. It is very good.

Senator McFarland. Is it sufficiently efficient so that you would say there would be no difference between the recording and the live music?

Mr. Petrillo. There is only one thing I have got against it—it is too good.

* * * * *

Senator Clark of Idaho. I have a theory. I do not know whether it is accurate or not, and I want to get your slant on it. My theory has been, without knowing the official figures, that the widespread dissemination of music by recordings, if you please, and by the phonograph, both in the home and commercially, has of itself so popularized and plugged music that the musicians must be better off, by and large, as regards employment because of it. Does that gibe with your thought at all in the matter?

Mr. Petrillo. You see, Senator, on that phase of it most people would think as you are thinking. But it is in the hands of a very few bands. I don't suppose—I am just guessing now—I don't suppose there are more than twenty name bands that have made records and transcriptions. Of those twenty name bands you probably had a membership of, we will say, twelve to a band. That would be 20 times 12 or 12 times 20. That is 240 musicians, all told, doing this job for all this recording.

Senator Clark of Idaho. I follow you there, but I guess I did not make my point quite clear. These comparatively few name bands make recordings; one hundred million of them a year, I think?

Mr. Petrillo. About 120 million.

Senator Clark of Idaho. And about 120 millions are circulated throughout the length and breadth of the country. They are played on home phonographs, coin-operated phonographs, they are played on the smaller radio stations which use recorded music. Consequently these bands through that medium do what is called, I believe, plugging a tune?

Mr. Petrillo. That is right.

Senator Clark of Idaho. Take a tune like "Praise the Lord and Pass the Ammunition." If that had only circulated by sheet music throughout the country I cannot conceive of its being a popular tune. My only thought was this, that by popularizing it they get everybody to hum it. They hear it on the radio, and hear it not once but ten times, and pretty soon they get into the rhythm and the spirit of it, and then little dance bands throughout the country that employ musicians pick it up. They not only pick up that tune, but they pick up other tunes that have been plugged largely through canned recordings of that music, and people go to dance and they want the band to play "Praise the Lord and Pass the Ammunition" or, say, "Sleepy Lagoon" or some other popular thing that these bands have popularized.

I am wondering if the very plugging of such a tune does not popularize it so that it gives employment to musicians throughout the land who would not otherwise be employed, because it makes the thing attractive for people to hear.

What is your thought on that, if I make myself reasonably clear?

* * * * *

Mr. Petrillo. Suppose we put it this way: a symphonic record is made by the Chicago Symphony Orchestra. I would say that 98 per cent of those records are for home consumption. In my talk with the manager of the Chicago Symphony Orchestra once, he said that he thought he would see the day when they would stop making records because it didn't increase the attendance at the symphony hall. While it did give them some revenue to maintain the orchestra, he said, "There is three and a half million people in Chicago and five million within the suburbs, and the actual people out of the five million who hear the Chicago Symphony Orchestra, in all these years, is not more than eight thousand." I wonder if that doesn't clear your question up a little bit.

* * * * *

Mr. Padway. If we sit down with these companies around the table—it doesn't merely involve the radio companies alone, it doesn't merely involve the record maker because the record maker, perhaps, hurts us the least and employs musicians—but as Mr. Petrillo said in his statement this morning, if you look at the interlocking directors you will find, exclusive of Decca, they are all tied up together. Their stock interests and all are owned by the radio companies. The recording companies and the radio companies are one.

Now, we find that by the combination of the record manufacturer and the sale of these records to the companies, that our economic interests are hurt. The whole answer to this question is not a simple one. You asked questions this morning and Senator Wheeler asked questions this morning, and when you put questions and you have just an isolated answer, you don't get the situation. It is a very simple story, once you get the whole answer. You asked Mr. Petrillo this morning to answer it, but by disconnected questions you did not get the complete answer.

What is it we want and whom do we want it from? The answer of Mr. Petrillo was: We want more employment and more money spent on that employment. Mr. Petrillo said he didn't want more money. He didn't mean more money in the sense of more money spent. We want more money. We don't want more money on the scale. That is either made now, or we can sit down on a collective-bargaining basis.

Senator Tobey. What you mean is, you want more money to go into the hands or pocketbooks of the musicians themselves?

Mr. Padway. Exactly. In 1937 and 1938 the problem was up. Now, to say that unemployment is the result of or, rather, whether unemployment is the result of recording records, is something not to be questioned, because we will show you by the contracts made at that time, the acknowledgement of the companies themselves, that unemployment is the result of these records.

* * * * *

Mr. Padway. I want to leave one thought with you. What we want is more men employed and more money spent on everyone of those unemployed. That can be done. That is not an impossibility.

You say: Why haven't you made that proposition or those demands on the company before you issued the ban? Now, let us not kid ourselves. Let us not be youngsters. These companies knew what we wanted all the time, because in 1938 that was the solution of the problem. We entered into contracts. We entered into contracts for two years. Then, at the end of that time the companies themselves said that you can't renew those contracts. Why not? Because Mr. Thurman Arnold said it was a violation of the antitrust laws so therefore that proposition, if made again, we believe, would be confronted with that answer.

Now, it is not a question of Mr. Petrillo going to the company or the company to us. They know what we want and they know we will sit down and discuss these things, but we believe there has not been any good faith on the part of these companies. They would rather engage, as the ASCAP engaged in with the National Broadcasters Association, in a war of attrition, to beat us down. Maybe, they will beat us down. But, every time they want to sit down with us, we will sit down, if they show good faith, and listen to their problem. And it means money to them. If they spend $15,000,000—and I can show you that they would spend that very easily—do you know what they can do with $15,000,000? They can put 15,000 musicians to work at probably from twelve- to fifteen-hundred dollars a year. Look what a tremendous thing that would be.

Mr. Bingham. Just a moment. Just so the record will be straight, I think we ought to have the companies identified. You mean the radio broadcasting companies, the record companies, the transcription companies, or all of them?

Mr. Padway. Radio broadcasting, to some extent records.

* * * * *

Mr. Padway. And, to answer the small-station unfairness, we eliminated every station earning $20,000 or less, and every dependent that first didn't gross $15,000, we eliminated them entirely from any demand for live musicians. And, we are willing to do that now. We are not desiring to put the small station out of business.

* * * * *

Mr. Padway. We want to get employment, but we do believe that an industry that is probably grossing a hundred million or more and spending but little for musicians should see to it that more of our musicians, more than are now employed, will be employed and that some of that money should lead to us.

* * * * *

Senator Clark of Idaho. At the outset of this morning I wish to say that a book was called to my attention yesterday evening entitled "America's Symphony Orchestras and How They Are Supported," written by Margaret Grant and Herman S. Hettinger. There are two or three things of interest in this book, but at the moment I wish to call the subcommittee's attention, and Mr. Petrillo's attention for such comment as he may desire to make, to the following, found on page 22, under the title of "Periods of Development."

I understand that this work is authoritative; that is, that Mr. Hettinger is a professor at the University of Pennsylvania and an excellent research man, and that Margaret Grant occupies an outstanding position in the field of music:

> "Although the development of symphony music in the United States has exhibited its most spectacular phases during the last 20 years, its roots go deep into the past."

Then there are two or three sentences going back to 1842, which I will not read, and I quote again:

> "Then followed three fairly distinct periods, each representing an accelerated tempo of development. From 1900 to 1920, 29 orchestras, six major and 23 secondary, were organized. The next decade produced 55, only two of which rank as major orchestras; and, finally, the decade since 1930 has witnessed the formation of 84 orchestras, or nearly as many as were founded during the entire previous century."

And then there is a table setting out all major orchestras and the dates of their establishment. If that statement is correct, and it seems to be borne out by the table, it would indicate that even up to now and despite canned music and all technological developments in the music field, the symphony orchestras of the country have prospered and increased. Would you care to make any comment on that, Mr. Petrillo?

Mr. Petrillo. No.

Senator Clark of Idaho. It would seem on its face to indicate that canned music perhaps, even if it were not a factor in so popularizing music as to make people desirous of forming these symphony orchestras in increasing numbers, at least was not a deterrent; and that is the reason I asked if you cared to make any comment, Mr. Petrillo.

Mr. Petrillo. No.

Senator Clark of Idaho. Also on page 47, under the title "Forces Underlying Recent Expansion," and I presume referring to music, it goes into the matter of amateur musicians in high schools throughout the country, and in grade schools, particularly contests among high school bands and orchestras, whereby the winners would go to Interlochen and such camps as were established. That is fairly lengthy and I will not read that part of it, but assure you it shows the organization of various bands, and how they have increased tremendously throughout high schools and grade schools of the country under this system. And then, on page 37, it says:

> "The national high school orchestra and band camp at Interlochen, Michigan, is the outgrowth of the largest movement. This camp, offering young students courses in the playing of band and orchestral instruments under expert instruction, has been so successful that it has led to the organization of similar camps throughout the country. The effect of school music education upon symphony orchestra development has been two-fold. Hundreds of professional musicians have come up through high school orchestras and summer camps, and are now in regular symphony orchestras throughout the country. Probably no major symphony orchestra is without one or more graduates of the Interlochen Camp alone. For years such developments in high schools have been even more important in the hundreds of secondary orchestras."

Then I skip a little because it need not be repeated here, and quote the following:

> "Out of this process come a very considerable supply of symphony orchestra players. Equally important, however, was the unprecedented number of young people who had become acquainted with symphony music, under continuing and stimulating circumstances, and representing a great new audience to support the professional and semi-professional symphony orchestras which were being formed."

Would you disagree with that, Mr. Petrillo?

Mr. Petrillo. No.

* * * * *

Senator Andrews. Mr. Petrillo, the greatest number of objections I find to the course you have taken is from music clubs in the United States. There are thousands of music clubs in this country. They are organized for the purpose, as you doubtless know, of cultivating a taste for music, and for better music. The membership of such clubs approximate 450,000, and they are very much opposed to the course you have taken in prohibiting playing over the radio—and, I presume, the use of other means of getting the benefit of recordings—records which have been made, particularly by professionals. That applies not only to instrumental music but to vocal music as well. Frankly, I do not understand the theory behind this prevention of advancement in music, or how it could possibly help your cause. If you could get all the people of the United States, the children of high schools, educated to the point where they appreciate fine music, you would lay the foundation for an even greater desire for first-class orchestras.

* * * * *

Mr. Petrillo. Senator Andrews, I stated yesterday that we were not opposed to amateur boys and girls going on the air.

* * * * *

It is just a question of whether or not we are going to lose our means of livelihood. If we could get guarantees from the broadcasting companies, the chains, I should say, and there are four chains, that they will not discharge our people, then we would be getting some place.

But I do not think the sacrifice should come entirely from the American Federation of Musicians. If we are going to have these children play in a manner whereby there will be no loss of a means of earning a livelihood to musicians, then there can be no harm.

* * * * *

Senator McFarland. You do not know what you want, and therefore you could not ask for any help.

Mr. Petrillo. Well, we know what we want, and so do they.

Senator McFarland. Well, we do not know what you want, or at least I do not know. I have been unable to find out.

Senator Clark of Idaho. What do you want?

Mr. Petrillo. More work.

Senator Clark of Idaho. From whom?

Mr. Petrillo. From the whole crowd—from radio, from the recording and transcription companies. If we all got together we would find a way.

* * * * *

Senator Andrews. What I am getting at is that the people of the United States, and particularly the young people in the schools—and there is a music club in practically every high school—are the people who will listen to the future orchestras of the country, and they are the ones who are going to be your support if they are satisfied, and if dissatisfied they will turn down the instrumentality through which it is given to the public.

* * * * *

Senator Andrews. Can it properly be contended that whenever a person chooses a profession he or she may say, "I am going to stick to that profession and the public owes me a living"? Is it not a fact that the person has to take the risk? Perhaps half the men on this subcommittee started out to teach school to pay their way through college. I taught school for about six years. I found that I could not make a living at teaching school, but I could not go on strike. So I studied law and took up the practice of law. In other words, the people of America do not owe anybody a living. That is a matter for him to work out. If a person finds he cannot earn a living by following the line he first chose, then the duty is upon him to seek other or supplemental means toward earning a living.

Now, this question arises: Must this subcommittee, whose members represent the public and represent you and your organization as well as other organizations, enact legislation that will prohibit what you have been doing, or shall we take the other viewpoint?

* * * * *

Senator Tunnell. As I understand it, you are not asking for any relief. You do not expect any relief from Congress, do you?

Mr. Petrillo. From who?

Senator Tunnell. From Congress, or this committee.

Mr. Petrillo. No.

Senator Tunnell. This order of yours is simply a part of your strategy to accomplish your purpose.

Mr. Petrillo. That is right.

Senator Tunnell. Do you now think that you need any assistance from Congress or this committee?

Mr. Petrillo. Well, we would like to have assistance, yes. If the Congress of the United States can do a job for everyone concerned and the public, we certainly would welcome it.

Senator Tunnell. Well, what is it that you want them to do?

Mr. Petrillo. Well, we want more work.

Senator Tunnell. Well, I know, but do you want an Act requiring that you be given more work; an Act of Congress?

Mr. Petrillo. Well, I would like to have an Act that would permit me to make demands on the recording companies and the broadcasting companies, whereby I won't be indicted for secondary boycott, or something. That is what put us in this position. That is why you gentlemen keep hammering away here, "What do you want? You have made no demands." Now, it is some of the laws that put me in the position that I couldn't make any demands.

* * * * *

Senator Tunnell. Well now, coming back to the same proposition that Chairman Wheeler asked about, is there nothing that you want us to do here?

Mr. Petrillo. Well, as I said before, of course, there is something that you could do.

Senator Tunnell. Well, what is it?

Mr. Petrillo. If you could pass some laws, like the ASCAP organization has, whereby we would get some kind of revenue from every record that was sold, that was made by the musicians, that would be a great help.

Senator Tunnell. But, would that not be a matter of contract?

Mr. Petrillo. Between the recording companies?

Senator Tunnell. Yes, and the musicians.

Mr. Petrillo. They won't sit down with us and won't talk to us about it.

Senator Tunnell. But, you say you did not attempt that.

Mr. Petrillo. In 1937, Senator, we did.

Senator Tunnell. That was six years ago. Well, there was a long time between that request and your order.

Mr. Petrillo. Well, they are much tougher now than they were then, because they have got more money, and the more money they make, the tougher they get.

* * * * *

Mr. Petrillo. Senator, if this ban stays on for two or three years, which I am satisfied it won't, we would have plenty of work.

Senator Tunnell. Just how do you arrive at that conclusion?

Mr. Petrillo. Because, as Chairman Fly stated to this committee, the new records, the popular records, dry up, and the advertising agencies will not go along on the old records unless they can get the new ones, and if they can't get the new ones, I am satisfied that they will hire musicians in the flesh instead of the can. But, I think that is too drastic. I think we should get to the point whereby all of us could live; the recording companies, the radio companies and the musicians.

* * * * *

Senator Tunnell. You simply want more work. That is what you mean by that, is it not; you want more money for your people?

Mr. Petrillo. Well, more work, I suppose is more money.

* * * * *

Senator Clark of Idaho. Would you give the survey (showing musicians unemployed as musicians) by the AFM to the reporter so that it can be made a part of the record?

Mr. Petrillo. Sure.

Local Number	Membership	Full Time	Part Time	Unemployed

* * * * *

Senator Tunnell: How many are out of employment, would you say, in the whole membership?

Mr. Petrillo. Well, this survey shows 41,000 out of 63,000.

Senator Tunnell. Well, how many out of 138,000 is what I am trying to get at.

Mr. Petrillo. Well, if there is no more than 41,000 out of 138,000, that is a great number of musicians out of work.

Senator Tunnell. Well, there are more, though, are there not?

Mr. Petrillo. Yes; there are.

Senator Tunnell. That is, two-thirds of your survey are out of employment, from what you say; 41,000 out of 63,000, or about two-thirds. Now, would you say that runs throughout your whole membership, of the 138,000?

Mr. Petrillo. Yes.

Senator Tunnell. You cannot long retain your membership under that condition, can you?

Mr. Petrillo. Well, it would not be a healthy condition, no.

Senator Tunnell. It is your idea that by preventing the use of records for two or three years, that this condition can be remedied, but in the meantime, what is going to become of your so-called unemployment?

Mr. Petrillo. Well, as I said before, the unemployed would go to work in two or three years, but we are in hopes that this thing would be settled, and the sooner, the better, so far as we are concerned. We don't want to hold this thing up for two or three years. We want these records to go on, but we want these gentlemen to share their profits with us.

* * * * *

Senator Tunnell. As I understand it, you have a tremendous unemployed membership now, but certainly they cannot remain unemployed for two or three years and live, can they?

Mr. Petrillo. Well, they have no alternative. They probably will have to go to work in the factories. Some of them are doing that now.

Senator Tunnell. Well, that is an alternative now, is it not?

Mr. Petrillo. As I told you yesterday about the Detroit Symphony Orchestra, one hundred men are out, with no finances. Ninety-five per cent of those men are out of work. Where are they going? They are all professional musicians.

Senator McFarland. Do you not think that factory work is more important now than music? We have a war to win now, and this is no time for people to be striking and saying, "We have to have work along a certain line," when we need men to turn out planes and ammunition to win a war with.

Mr. Petrillo. We are not objecting to that, but we have been pushed and pushed around for twenty years.

Senator McFarland. But, we must have manpower in the United States. We are short of manpower, and you are trying to make it shorter.

Mr. Petrillo. No, that is not so.

Senator McFarland. Well, why is it not? You are complaining because you say too few people are doing the job; that you want to spread that work out and make more people do the same work that the few are doing now, when they are crying for men in the United States, and our boys over on the other side are crying for ammunition and crying for planes. That is the reason this public sentiment has built up against you, Mr. Petrillo; because our boys are dying on the other side; because we are not giving them sufficient planes and we are not giving them sufficient ammunition. The reason why the people have built up sentiment against this ban is because of the boys on the other side.

Mr. Petrillo. The people didn't build up the sentiment. The National Association of Broadcasters, with their hundreds of thousands of dollars, built up the sentiment.

Senator McFarland. Well now, that is going back to the old proposition. You are assuming that the people are not intelligent, and I do not agree with you.

Mr. Petrillo. No; I won't say that, but they have only heard one side of it; one side of the question.

Now, these people have got hundreds of thousands of dollars to advertise me and my organization as a czar, but they won't sit down and give the musician what he has rightfully coming to him.

Senator McFarland. Now, Mr. Davis argued for the sake of the war effort and for the sake of our country. He asked you to lift this ban, as I understand it, for the duration of the war, and then you could do anything you pleased. But, you have chosen a time right here in the midst of a conflict when we are needing every ounce of manpower that we have, to put this ban into effect.

Mr. Petrillo. Senator, the President said in his speech that this year it would cost one hundred and nine billion dollars to operate this war. Every union is in that one hundred and nine billion dollars but the musicians. The Government every day is asking our men to play gratis, and every day our people are playing gratis.

Senator McFarland. Well, what I am saying to you is, you have not asked for money.

Mr. Petrillo. Today, Senator, I will say to you that the American Federation of Musicians is spending for the Government, in services of its musicians, anywhere from twenty-five to $50,000 a week.

Senator McFarland. Well, we are not complaining about what you are doing and what you are not doing.

Mr. Petrillo. Well, now, Senator, there you go. Now, the American Federation of Musicians hasn't got a good side here at all. Everything we do don't mean nothing. I say it does. The minute a soldier gets on a train, you pay his transportation, you buy his uniform, you buy his shoes, you buy his food, you buy everything from A to Z, but when it comes to the musician, for the selling of the bonds, for the entertainment of the soldiers, not one dollar. And, by God, men, I want to tell you the musicians are working men. They studied their violins, not to be pushed around, and they have been pushed around for forty years. We want to stop it. Why put the burden on us? Let us get these fellows together here. They got the money. They are making the money. Let them share some of their profits with our boys, which we are entitled to. We are not burglars. We are not racketeers.

Senator McFarland. Well, I do not know what you are, because we have not been able to find out what you are.

* * * * *

Senator McFarland. And I am telling you that all over the United States they are crying for people to do work. They are crying for them to put out planes. They are crying for them to put out ammunition. They are crying for them to put out everything. And, it is not the money, you say. We have not been able to pin you down here and find out just what you want. You said, "No; we want more work." What we need in the United States is more men right now to do the work, but you want to do the work, the same work, with more men, and therefore increase the shortage of manpower in the United States.

Mr. Petrillo. Senator, you know as well as I—

Senator McFarland. Pardon me. Now, the chances are that Mr. Davis and a lot of people who are criticising you are familiar with this situation. I do not know what your problems are. I am not a musician. And, do not misunderstand me that I am taking any sides in this thing. But, the proposition is that you have come here and you have put out a proposition of wanting to increase the shortage of manpower by making it necessary to have more musicians do the same amount of work than are doing it now, when we need men and are crying for men to win a war.

Mr. Petrillo. Senator, the American Federation of Musicians is second to none in patriotism, and if any of our people are needed for the factories, including myself, we are ready at any time.

Senator McFarland. Well, you are needed.

Mr. Petrillo. Well, if we are needed, we will go. You know that as well as I do.

Senator McFarland. But, that was not the tone of your testimony yesterday. You said, "No; we are musicians."

Mr. Petrillo. Well, no. If we are going to lose this war, we are not musicians. And, we are not going to lose this war. Now, we will throw the fiddles away and the trumpets away to do that.

Senator McFarland. We do not want you to throw the fiddles away or the trumpets away. We want you to use them, but we do not want anything to occur in the midst of the war which would in any way hinder the war effort. And, you have had the people who are responsible, I repeat, placed in charge of the responsibility, to tell you that you are hindering the war effort.

Mr. Petrillo. Well, I am certainly sorry to hear that.

Senator McFarland. Well, that is what Senator Clark explained to you yesterday. You are not hearing it now for the first time.

* * * * *

Senator Andrews. The musicians are professionals. The Government is not guaranteeing a living to hundreds of other professionals.

Mr. Petrillo. That is right.

Senator Clark of Idaho. Mr. Petrillo, all we are able and have been able to elicit from you is that you have not made any demands known either to this committee or to the public or to the industry up to this time. And, when pressed, your response is that you want more work. Now, there are only three people, three groups, that can give you more work. One is the recording companies. Do you want more musicians hired by the recording companies?

* * * * *

Mr. Petrillo. I will answer your question in this way: We are ready now to make demands, if that will clarify the situation, and go into negotiations and settle this thing as fast as possible.

Senator Clark of Idaho. I think that would immeasurably aid in clarifying the situation.

Mr. Petrillo. Will that clear up the thing?

Senator Clark of Idaho. That will.

Mr. Petrillo. That is fine.

Senator Clark of Idaho. That will. It will clear it up. Would you mind presenting those demands in the course of the day?

Mr. Petrillo. Well, I will have to get my executive board together. They all have ideas.

* * * * *

Senator Clark of Idaho. Now, of course, I do not blame you, because you are in a fight with the National Association of Broadcasters, by continually saying, "Well, they have got all the money." I think I explained the situation last night for this committee, which has had no connection with the National Association of Broadcasters, either in the introduction of the resolution or in the prosecution of these hearings, and I think that that should be perfectly clear. But, on the other hand, your Union has plenty of money too, does it not?

Mr. Petrillo. Well, I don't like to go into the Treasurer's department, but I think we have about two and a half million dollars.

Senator Clark of Idaho. Well, that is quite a substantial sum of money. And, I am glad you got it; I mean, I think you probably will handle it wisely. I do not think the condition in that respect is so unfair, but this committee is not interested in that condition. We are interested in the musicians and in the industry. It is a great industry. And, we are interested in the public, which does not belong to either of those groups.

Could you give this committee now, then, any idea of approximately when you would be able to formulate some specific demand, something that the industry can work on and something that we can work on, along the lines of what you think you ought to have?

Mr. Petrillo. That is right. If it is the consensus of opinion of this committee that we get together and negotiate immediately, I will assure this committee that we will make our demands.

Senator Clark of Idaho. Well, I do not want to speak for the committee, but I know for my part I think it would be immeasurably helpful.

Senator McFarland. As far as I am concerned, Mr. Chairman, I would be willing to quit and let them make their demands and see what they can work out.

Mr. Padway. Senator, may I interject one remark, and that is on the subject of demands. We are not going to get away from that point. Now, you probably wonder when we sit here and tell you we can't tell you what we want. Now, we have thought of the problem, because it affects us, and yet there is a good deal of truth in it, and I will show you why, because we don't want you to think we are sparring with you or not acting in good faith. You ask one question: Do you want more money from the people you want money from? Do you want more money from the recording companies? Do you want more employment from them? Yes. Then you say: How do you expect to get it? They are employing everyone that they need for the making of records. That is true. So, the increase in personnel in the record-making industry itself is not available, or would not be received.

Well now, you have to sit down with these record makers and figure something like this out. Senator Tobey at a point yesterday said it may be good or it may be bad. We don't know whether it ought to be accepted or discussed. Suppose these record makers would by law, or be able to by agreement, or agree to put a cent on a record, or two cents. They make 120,000,000 records. Suppose we say that is allocated to some general fund in the hands of the American Federation of Musicians, or someone else; we don't care, and that you were taking up that fund from these record makers and put a little band in the town where you live, where people will come to the park, families, with their lunch baskets, and listen to live musicians. That will give us some employment.

So, while the record-maker himself may not be able to take into his organization an additional man, he will nevertheless be setting up a fund whereby through the record-maker and through the profits he makes, he will be able to furnish employment. And, we will show you he is making plenty of profits; tremendous profits. I don't know of an enterprise that compares with it.

* * * * *

Senator McFarland. My idea or my thought was this, and I think this was the thought of the committee, that before you call a ban or strike, whatever you want to call it—I call it "ban" because I think that is a little less offensive to you—before you put a ban on the making of this music, you ought to first sit down and work out a program which you are going to try to put into effect, the thing that you want to try to accomplish, and not just put a ban on and say, "We are going to quit."

Why did you not first work out what you wanted to accomplish, if you had something in mind? Of course, if it was just an idea, and that is what a lot of people thought that you were trying to accomplish, you would just say, "We will do away with the making of records altogether. We will just stop it, and that is what we intend to try to accomplish." Now, if that is what you intended to accomplish, well, you have done a pretty good job of it, but if you had something else in mind, it seems to me that you should have worked out your program before you put your ban into effect.

Mr. Padway. Now, let me say this in answer to that, Senator. This problem of canned music is not one of the date of the ban. The problem of canned music goes far back. We will show you that the organization spent millions of dollars in advertising and encouraging the public to treat with live music rather than with canned music, which has been going on. Now, the problem has been discussed as a problem with the organization, with the radio broadcasting companies, with the record makers and management and with their officials, all along the years. It has been discussed. They know what we have in mind as a solution for the problem. Whether it is agreeable to them or not or whether it is a practical one, they know it. Now, they have unofficially let us know that will never go.

For instance, if we ask the record maker to put two cents additional price on a record, whereby a fund can be created for musicians, we don't need to sit down to the conference with them to know that they won't go for it.

In 1937, when they gave us an increase of a million and a half dollars and guaranteed three million additional dollars on staff bands—I wasn't in the other conferences, but I was told at the time they talked for months and months, and finally they were able to add a million and a half extra. In truth, it was only a million, and then, of course, guaranteed three million extra. Now, we know that they have stated unofficially, time and again, if Petrillo comes around and asks for a dime more, we won't accept it. Now we know that the proper plans we have had in mind they won't go for. And, the only way to do that was to let them know in 1941, not in 1942, "Gentlemen, you have got to sit down and you have got to work out this problem with us. You know there is a problem. You recognize there is a problem. You wrote it into your preamble in 1937." And yet we got no rights, except we were told, "You will get nothing. We will do nothing for you."

What happened then? In 1941, at the Seattle convention, they let it be known from the rostrum, and it was heralded throughout the papers, and they knew it, because they were out there that sometime we would put a ban on records. Did they come to us and endeavor to solve the point? Unofficially there were conversations back and forth. Now since this ban has been on, representatives of the large companies have unofficially spoken to President Petrillo and myself. Now, that is true. But, we got nowhere.

* * * * *

Senator Clark of Idaho. Mr. Petrillo, when do you think you can get your executive board together to present to this committee your demands?

Senator McFarland. He is going to present it to the other people, as I understand it.

Senator Tunnell. Senator Clark asked him to present it to us.

Senator Clark of Idaho. Well, to both.

Senator McFarland. Pardon me for interrupting. I misunderstood him. I thought he was going to start negotiating with them and try to settle the proposition.

Mr. Petrillo. That is what I thought, Senator. I thought we would negotiate with these people, and then if we couldn't get together, why, then I could come back here and tell you that I kept my word with you and we can't get anywhere.

Senator Clark of Idaho. Very well.

Mr. Petrillo. But I am in hopes we will get somewhere if we sit down. I am satisfied now during the investigation here and the court procedures, that these men will finally get down to their level and finally will talk about the matter in a manner that I think the time has come that we have got to do business with these boys, because there is a problem to be solved. And, they have some justice on their side. I am beginning to feel now that this investigation is going to do the job.

* * * * *

Senator Clark of Idaho. Let me read you just one sentence from this book which I quoted from a minute ago. It says, "The influence of the phonograph"—this is under the title "Recorded music",—"in widening the general audience for classical music began to be felt even before the use of records in education became widespread."

It goes on to say that recorded music, along the theory I was commenting on yesterday, has been a great thing for the live musician. I know you disagree, but it says here also on page 50, "The development of recorded music has been another important force in the growth of symphonic orchestras and their audiences."

This, apparently, is an impartial book.

Then it says, "The greatest agency available for the dissemination of fine music, however, is radio." That is found on page 53, and contains considerable dissertation on that.

* * * * *

Senator Tobey. I have two or three questions that I want to ask Mr. Petrillo. In the first place, there is an article in the United States News of the current issue under "Labor" on page 29:

> "Chicago and St. Louis radio stations are required under their contracts to hire members of the musicians' union as 'pancake turners.' This job consists of changing and turning phonograph records. Actually the work is done by technicians and the AFM members are used as errand boys to bring records from the files. The scale in these cities is $90 for a 25-hour week."

I read that, with no prejudice, as a news item, and it raised a few questions in my mind, which I would like to ask. In the first place, is the article substantially correct?

Mr. Petrillo. That is correct.

Senator Tobey. Now, here is what comes to a layman's mind, as he reads it, the familiar John Q. Public, that we have to have a group of men particularly charged with the duty of changing records in the radio stations, and nothing else.

Mr. Petrillo. Because the record is made of music.

Senator Tobey. Is made of what?

Mr. Petrillo. Music is on the record.

Senator Tobey. That is right.

Mr. Petrillo. And we feel if there is music on the record, that the man who puts the record on the machine should be a member of the musicians' union. Now, there is only two Locals that have that kind of an agreement, as that particular statement says.

Senator Tobey. Chicago and St. Louis.

Mr. Petrillo. Chicago and St. Louis, that is right. Now, the scale in St. Louis doesn't run $90. I think it is about forty-five, something along that line. In Chicago it is $90 a week, for 25 hours' work, five days a week.

Senator Tobey. Now, the turning of records is not a laborious job, is it? I am not talking about you now.

Mr. Petrillo. No.

* * * * *

Senator Tobey. I could not put the record on myself.

Mr. Petrillo. No, sir.

Senator Tobey. I would have to have a separate employee, a pancake turner, they call them, and pay him from $45 to $90 to do that job; is that correct?

Mr. Petrillo. That is correct.

Senator Tobey. Now, how far does that theory go in the operation of union labor?

* * * * *

Mr. Petrillo. Well, I can only say this to you. In Chicago I happened to negotiate the contract myself, and when I made the demands for the pancake turners, there was no opposition to it. They gave them to me, so I took them.

Senator Tobey. Well now, if it is a good thing for Chicago, why is it not a good thing everywhere else in the country?

Mr. Petrillo. Well, all of the unions are not powerful enough to make those demands, Senator. I probably would have dropped it myself if they said, "You will have to call a strike, because I am not going to give you the pancake turners." But, as I said, I put it in there and they gave it to me, and I couldn't turn it down.

Senator Tobey. But, the principle you believe in. You believe in the principle regardless. It all depends on the size and the power of the labor union.

Mr. Petrillo. Oh, yes.

* * * * *

Senator Tobey. It is not the principle of fairness that you enunciated here to this group of men. It is simply that here is a chance to get this man, because we are powerful enough to get it done that way; is that not it?

Mr. Petrillo. Well, you might put it this way.

Senator Tobey. The point I make is this: if this is sound, then it ought to prevail all over the country, should it not?

Mr. Petrillo. It should.

Senator Tobey. That is, if it is sound economically.

Mr. Petrillo. But we can't get it.

Senator Tobey. But, if you could get them, you would.

Mr. Petrillo. We would love to have them all.

Senator Tobey. And that principle is sound, in your judgment, to do it this way?

Mr. Petrillo. I don't know whether it is sound, but I know it makes for more employment.

Senator Tobey. Now, that raises a question not of metaphysics, but something higher than that, perhaps. How long can we go along in this country with anything that is not sound? How long is it going to endure, whether it applies to music or anything else, provided it is not sound and is not economically feasible and with an expenditure that is not justified by the facts, just because you are powerful enough to do it? How long would you expect to continue in this country by that method?

Mr. Petrillo. Senator, I agree with you, in this particular case it is not sound.

Senator Tobey. I think you are a perfectly fair man. I read this merely as a news item, and I said, "I am going to ask Mr. Petrillo about it."

Mr. Petrillo. I try to be fair, but sometimes I make a mistake.

Senator Tobey. Yes, we all do.

Mr. Petrillo. But, in this case I made a mistake, but they O. K.'d it.

Senator Tobey. All right. Thank you. Now, another thing that troubled me a little bit, because I am only an amateur in these things, is the question of stand-bys. I only read this in Harpers Magazine, which was referred to by one of your men last night, about stand-bys. I don't know what it means. If I am running a radio station and I have an orchestra of 50 men there, and I use probably a large number, call it 30 men, and I put on a program with those 30 men, does that also mean that I have to have an orchestra of 20 men, potential men, that may or may not have their instruments with them, but they have to sit somewhere on these premises, so they are classified as stand-bys, and they are being paid as stand-bys?

Mr. Petrillo. That is right.

Senator Tobey. Now, what is the function of a stand-by beyond that?

Mr. Petrillo. Sometimes a stand-by reports on the job and sometimes he don't. The employer might say, "All right, we will agree to pay the stand-by. We don't want the men hanging around, but we will pay them."

* * * * *

Mr. Petrillo. Now, we will take right now, the Government says that the Army and the Navy bands would not play any commercial engagements. But, they can go over the air as a sustaining program, playing over the air for the Army and the Navy in recruiting.

Now, Montgomery Ward or Coca Cola wants to employ the Navy Band on a commercial basis. We say, "All right, you engaged the band on a commercial basis, and if there is 30 men in the Navy Band, then you pay 30 men the union scale for what you call a stand-by." And, the employer agrees to do that and puts on the Navy Band. Sometimes he won't agree to that and then the program falls through.

Senator Tobey. What is the principle that initiated this so-called stand-by? Where did it come from? What is the thesis or philosophy behind it? Is it the purpose to give more men work?

Mr. Petrillo. Senator, in most cases it is to protect the local musicians. For instance, we will take Chicago again. Paul Whiteman was traveling through the country. He plays a job at the Palmer House at Chicago; probably has a job there for three months. While he is there, some advertising agency will say, "Well, you are going to be here three months. How about playing a program every Tuesday night for half an hour for Wrigley's chewing gum?" Well now, we feel that Paul Whiteman has a job in Chicago. He has already taken a job in the Chicago jurisdiction. Now, he is going on the air in Chicago to take away work from the local musicians. I say to Whiteman, "You have a job and now you are going to take another job. If you want to do that, the employer must pay you the union scale and also a stand-by orchestra."

* * * * *

Senator Tobey. My question is, Why a stand-by?

Mr. Petrillo. Because a man like Whiteman can come into the jurisdiction for three months, playing a hotel job or a radio job, and the local musicians would be just sitting around while one band would be doing all the work.

Senator Tobey. Suppose that my friend Clark were to make a radio speech in Chicago at $300 for expenses, would you think that he would have to get some public speaker from Chicago to stand by?

Mr. Petrillo. No.

* * * * *

Senator Tobey. You believe in the principle of stand-bys?

Mr. Petrillo. Not in all cases. Sometimes an employer will come to my office saying that a local in some town is trying to get more money out of him, supposedly for a stand-by, and he presents his case, and in many cases we turn the local down because we feel it is unfair. In some cases they are justified.

* * * * *

Senator McFarland. You take the position that as to whether a stand-by is a good or bad thing it depends upon the reasonableness of the demand?

Mr. Petrillo. Yes. An employer can always appeal to the president's office from an action of a local, and in many cases we turn the local down. I will have to admit that some of the locals go out and try to put as many men to work as they can.

Senator McFarland. You admit, as I understand it, that there may have been—I will not say that there has been; I will not put you in that position—but you admit that there may have been unreasonable demands in the matter?

Mr. Petrillo: Many times.

* * * * *

Senator Tobey. Is it a fact that the heart of this controversy which is bothering you and bothering us is the old question of whether or not society has an obligation to workmen whose employment is limited by technological improvements? That is true, is it not?

Mr. Petrillo. Yes.

* * * * *

Senator Tobey. I asked you a question yesterday, and you did not answer it satisfactorily to my desires, about union membership in the American Federation of Musicians. I happen to play the piano for my own amusement. Assuming that I wanted to become a member of the Musicians' Union, could I as a very mediocre piano player qualify? Could I join if I had a desire to join a union, without having to go through some examination as to my ability or my wage-earning capacity or whether or not I was a first-class musician?

Mr. Petrillo. There are many locals who take in anyone who has the desire. There is an examination board, but they never turn anybody down. It is only there as a matter of form.

Senator Tobey. In other words, anybody can join who has the desire?

Mr. Petrillo. Of course we can handle them better on the inside than we can on the outside.

* * * * *

Mr. Petrillo. The American Federation of Labor of which Mr. Green is president has no control over any of the laboring people in the country. The only people who have control over the labor movement are the International presidents and their respective executive boards. Green could come to me and say, "Petrillo, I would like to have you do me a favor for Senator So and So or Congressman So and So"—

Senator Tobey. Is that a common practice?

Mr. Petrillo. I can't talk.

Senator Tobey. The power of suggestion is still pretty potent in this world.

Mr. Petrillo. You are all right. You touch on a very vital point there.

* * * * *

Mr. Petrillo. We have what we call a delayed broadcast. We have not interfered with that, because if we did the smaller stations would probably go out of business. Here is where the Musicians' Union did a good job for the radio companies and advertising agencies and the smaller stations. Still taking the Jack Benny show, it goes over 148 stations. Out of that 148 stations there may be twenty stations that cannot accept that show in the locality in which they are situated, because they have another program at that time. So they will take the Sunday show, put it on a record and play it next Tuesday. We permit the radio companies to put that show on a record, transfer it to the small stations, and play that show on Tuesday, Wednesday or Thursday of the following week, without any extra compensation to the musicians. We call that a delayed broadcast. We could stop that, but we can't fight on all fronts.

* * * * *

Senator Clark of Idaho. I want to leave a suggestion with you, Mr. Petrillo, and I want you to think it over during the noon hour and talk it over with your associates and your counsel. I am going to ask you a question upon reconvening, and that is this. Would you consider, at the request of this committee, lifting your ban on recorded music at this time, substantially, and then proceed to negotiate with the industry to see whether or not something cannot be worked out?

I merely ask you to consider that during the noon hour. Here is my reason for so asking you. It is my sincere belief, without holding any brief at all for the industry, because I have not heard their story, and I do not know—but it is my sincere belief that you would put yourself and your people in an infinitely better light all over this country if you would consider that. I do not think it would weaken your bargaining position. My candid opinion is that it might well improve it.

I do not want you to answer it now; I just want you to think it over.

Mr. Petrillo. I can answer it.

Senator Clark of Idaho. Very well, then.

Mr. Petrillo. I am satisfied that this committee wants quick action.

Senator Clark of Idaho. That is right.

Mr. Petrillo. And we do, too. I will tell you now, I have negotiated with these fellows from time to time for twenty years, locally and nationally, and if they are permitted to go back and make records while we are negotiating, the negotiations will go on for two or three years. That is my candid opinion, Senator.

Senator Clark of Idaho. I do not think that this committee or anybody else would require you to keep the ban off. We cannot require anything. You are acting within the law now, and you know it. So we are not investigating you as being a lawbreaker. The courts have held that you are acting within the law. What we are interested in is to find out whether such a situation is in the public interest and, if not, what can be done to change the situation which is having an impact on the people and on the war effort. You would not be required to do any unreasonable negotiating at all. If you cannot settle it in 30 days, put your ban back on, and we will go to work again.

Mr. Petrillo. Senator, there is another point I would like to make in connection with your suggestion, and that is that they could make records in thirty days of all the popular tunes that would last them for another year, and they would not be interested in our negotiations. The ban has been on now for five months, and it certainly won't hurt if we go on another two weeks, inasmuch as we are making all the records that the armed forces need. We are granting all requests every day from the Treasury Department, the Justice Department, and all the departments in Washington, without any charge.

Senator Clark of Idaho. Very well. That is an answer.

* * * * *

Mr. Bingham. Have you made any check with any name bandleaders to ascertain whether or not they are having difficulty to get replacements?

Mr. Petrillo. No.

* * * * *

Mr. Bingham. Referring to Mr. Padway's statement on page 163, he said, "If they spend $15,000,000—and I can show you that they would spend that very easily—do you know what they can do with $15,000,000? They can put 15,000 musicians to work at probably from twelve to fifteen hundred dollars a year. Look what a tremendous thing that would be."

You remember that statement?

Mr. Padway. Yes, sir.

Mr. Bingham. Now, Mr. Petrillo, do you know of any musician in any Local that would work for $100 a month or $125 a month; a union scale in the United States?

Mr. Petrillo. Well, I don't think you would get the good ones to work for that money.

* * * * *

Mr. Bingham. Mr. Petrillo, I assume that you have familiarized yourself with the earnings of radio stations in order to arrive at the conclusion that all these radio stations, of which you have some complaint, have the financial ability to hire musicians; am I correct in that assumption?

Mr. Petrillo. Only what I get in the financial sheets of the newspapers.

* * * * *

Mr. Bingham. You have not familiarized yourself with the reports of the Federal Communications Commission as to the earnings of the radio-broadcasting industry?

* * * * *

Mr. Bingham. Do you have any idea as to the amount of money spent for musicians by the radio broadcasting companies?

Mr. Petrillo. Yes.

Mr. Bingham. How much did they spend in 1941?

Mr. Petrillo. They averaged in 1941 about $13,000,000.

Mr. Bingham. Now, is that by the radio broadcasting stations or by the sponsors?

Mr. Petrillo. No; that is by the stations themselves, This has got nothing to do with the sponsors.

Mr. Bingham. They spent about $13,000,000 in 1941?

Mr. Petrillo. That is right.

Mr. Bingham. That figure, sir, is at variance with the Communications' figure, the Communications Commission's figure, in that your figure is high. The Communications' figure on the basis of one week, which was typical of the survey, showed that on an annual basis, about $8,000,000-plus was spent by the radio-broadcasting stations themselves.

* * * * *

Mr. Bingham. According to the Federal Communications Commission's report, the musicians received more money than any other group of employees, including executives, except the technicians. They received more than the managers, program department, script writers and officers; more than any other group. Did you know that?

Mr. Petrillo. Yes, but they do more work. The musicians are on the air morning, noon and night, especially on the chains.

Mr. Bingham. I thought you said that they worked twenty-five hours a week, five days a week?

* * * * *

Mr. Bingham. So, you have no idea as to whether or not the industry, the broadcasting industry, can stand the burden of additional musicians' wages.

Mr. Petrillo. Well, we all know that the radio industry is not starving to death. I mean, if I knew—

* * * * *

Senator Clark of Idaho. Well, I think the question goes as to whether before you put in effect your ban you had familiarized yourself through the published reports of the Communications Commission or otherwise with the earnings of the broadcasting companies; is that right?

Mr. Petrillo. You see, Senator, it is not hard to get these figures together.

Senator Clark of Idaho. No, but you undertook to take a definite course of action. You called a strike or ban, whatever you want to call it, and I think Mr. Bingham was merely attempting to find out whether at the time you called that strike, you had made any investigation as to the earnings of the radio companies. Now, if you haven't, that is all right. You said you had not, at least.

Mr. Petrillo. That is right.

* * * * *

Mr. Bingham. So that 537 stations of the 796 stations reporting upon which that chart was based, make less than $25,000 a year.

Mr. Petrillo. Those are the stations that were exempted in our last agreement. Any station making $20,000 or under did not come within the agreement of the American Federation of Musicians and the broadcasters.

Mr. Bingham. How many stations did you have signatory to that agreement, both from the chain and from the independent group?

Mr. Petrillo. Oh, about 280.

* * * * *

Mr. Bingham. And did not those contracts have a clause to the effect that you would permit them to use phonograph records and electrical transcriptions, so long as they were in effect?

Mr. Petrillo. At that time, yes.

Mr. Bingham. And some of those contracts were renewed, were they not, and did not expire until the end of 1942?

Mr. Petrillo. No. They all expired in 1940.

Mr. Bingham. And were not some of them renewed to 1942?

Mr. Petrillo. There were a lot of them renewed, but not with that clause in it.

* * * * *

Mr. Petrillo. After reading Mr. Fly's testimony here, I sent out a communication to all the Locals, asking them if they had any stations in their jurisdiction that were receiving chain programs and had no musicians employed in the station. And, the answer I received from the Locals was 2,121 men working in all stations; number of stations employing musicians, 296; number of stations not employing musicians, 201. That is the answer to 497 Locals. Now, I got these figures direct from the Locals in whose jurisdiction these stations are located.

Mr. Bingham. You mean, by not employing musicians, not employing full-time staff musicians?

Mr. Petrillo. That didn't employ anybody; not one musician.

* * * * *

Mr. Bingham. Do you happen to know in how many cities there are broadcasting stations and in said cities there are no musicians' locals and no locals claiming jurisdiction over those cities?

Mr. Petrillo. That is a pretty hard question to answer. We have what we call neutral territory where there is no local in a jurisdiction, and there the Federation takes control of that jurisdiction. Why there is what we call neutral territory I don't know, but you have got to go back many years to our board records. It seems to me that all jurisdictions in the country some place ought to be given exclusive local jurisdiction; but that has never been done.

Mr. Bingham. If there is a broadcasting station in a city which has no local and no local claims jurisdiction over that city, how do you expect that broadcasting station to hire a union musician or union musicians?

Mr. Petrillo. I would say that if the station is in a neutral territory where there is no jurisdiction by any local of the Federation, it certainly would not have any radio station to fight about, because it certainly couldn't afford to pay anything.

Senator Clark of Idaho. Of course they are the ones that are really going to get hit by your ban.

Mr. Petrillo. That is right.

Senator Clark of Idaho. I do not think the big network stations are going to worry about your ban very much. I think it is only these several hundred little stations.

Mr. Petrillo. The smaller fellows.

Senator Clark of Idaho. They never hire musicians anyway.

Mr. Petrillo. It is the small fellow who suffers all the time; and in the canned music situation it is the smaller fellow who would suffer; I can't deny that.

* * * * *

Mr. Petrillo. I would say, roughly speaking, that I believe 95 percent of those stations (in cities where AFM survey was made) in those jurisdictions all employ musicians. I think I am quite safe in saying that.

* * * * *

Mr. Bingham. Just as a matter of record, Mr. Petrillo, according to the provisions of the constitution of the American Federation of Musicians, you as president have the power to set aside or annul or change the constitution if it is not adequate. In fact, you can do anything, under the provisions of Article 1, Section 1-B, of the constitution that you deem necessary to meet a particular situation?

Mr. Petrillo. That is right.

Mr. Bingham. Aside from being the president of the American Federation of Musicians, you are also the president of the Chicago local?

Mr. Petrillo. That is right.

Mr. Bingham. Will you please relate for the record the salary that you receive as president of the Chicago local and any other emoluments of office, anything else that you are entitled to by reason of being president, so far as the American Federation of Musicians is concerned, and also your salary and your emoluments of office as president of the American Federation of Musicians?

Mr. Petrillo. From the Chicago Local I get $26,000 a year. From the American Federation of Musicians I get $20,000 a year and a $3,000 contingent fund of which I make no account.

Mr. Bingham. That is $49,000 in cash?

Mr. Petrillo. Don't bring that up, because I just drew my salary, and the Government has fixed a $25,000 limit.

Mr. Bingham. I thought there was a $62,000 limit.

Mr. Petrillo. Sixty-seven thousand dollars.

Mr. Padway. But when you pay your tax, it leaves you with $25,000.

Mr. Petrillo. As I understand it, all you can make is $25,000.

Mr. Bingham. You have to earn about $67,000 before you are cut back to $25,000.

What else do you get? Do you get a car and chauffeur?

Mr. Petrillo. Oh, yes; I get a car and a chauffeur. I have not engaged the chauffeur since I have been president of the Federation.

Mr. Bingham. Let us talk about the Federation for a moment. You are entitled to a car and a chauffeur as president of the Federation?

Mr. Petrillo. Yes.

Mr. Bingham. Are you entitled to anything else as president of the Federation? A car and a chauffeur and $20,000 a year?

Mr. Petrillo. Expenses.

Mr. Bingham. That is, out-of-pocket expenses, money that you spend for traveling?

Mr. Petrillo. No; the Federation pays for the traveling. The Federation also pays for my room rent while I am in New York.

Mr. Bingham. That is, expense?

Mr. Petrillo. Yes.

Mr. Bingham. As president of the Chicago Local you get $20,000 a year?

Mr. Petrillo. $26,000.

Mr. Bingham. The $20,000 is from the Federation?

Mr. Petrillo. Yes.

Mr. Bingham. What else do you get from the Chicago local?

Mr. Petrillo. I get a contingent fund when I believe it is necessary to have one.

Mr. Bingham. There is no set amount on that?

Mr. Petrillo. No.

Mr. Bingham. And that you spend as you see fit without accounting to the local?

Mr. Petrillo. That is right; and I pay income tax on it.

Mr. Bingham. Do you get a car and chauffeur?

Mr. Petrillo. Yes.

Mr. Bingham. And a residence, a place to live?

Mr. Petrillo. No. I did get a summer home.

Mr. Bingham. But that was a gift?

Mr. Petrillo. Yes. The Government said it was an income, and the tax went up and I could have bought the house out of my own pocket and it would have been cheaper.

Senator Clark of Idaho. Would you trade jobs with one of us?

Mr. Petrillo. Today I would.

* * * * *

Mr. Bingham. Five hundred thousand coin-operated phonographs. That is the statement attributed to you, and it is in your letter. I am informed that only 445,000 have been built since 1932 to date and that of, that 445,000 there are only approximately 332,000 available for use at this time. I am further informed that they used approximately 30,000,000 records in 1942. Do you happen to have any figures on that?

Mr. Petrillo. No, sir.

Mr. Bingham. You do know that they use no symphonic records?

Mr. Petrillo. No; they are all dance records.

* * * * *

Mr. Bingham. You do not find those machines in restaurants and places where they would be likely to employ musicians, do you?

* * * * *

Mr. Petrillo. In some places there are juke boxes where they could employ musicians and where they have already displaced musicians.

Mr. Bingham. Do you know of any instances of that kind?

Mr. Petrillo. Yes. I can give you a record of it.

Mr. Bingham. There are not very many, though, are there?

Mr. Petrillo. Not from the record of it, but if you made a survey you would be surprised how many jobs the juke box has taken away from musicians. Of course I do not mean an orchestra. Most of those places would use a piano player. They would not use a band of six or seven or eight or ten men. But musicians have been displaced from first-class places.

Mr. Bingham. Do you have any idea as to the number of coin phonographs found in or near army camps and naval training stations and what not?

Mr. Petrillo. No.

Mr. Bingham. Do you have any idea as to what the average gross per week per machine is?

Mr. Petrillo. Only what I told you a few minutes ago, what I got out of "Billboard"; and that was that they average about $12 a week.

* * * * *

Mr. Bingham. I am informed that the average is approximately $5 per week, of which the location owner retains $2 and the operator retains $3, and the net income to the operator is approximately 90 cents a week.

Mr. Petrillo. I don't think it would pay at all to have a machine in there for 90 cents a week. I know that if I owned a place I would not want a machine there if I only got 90 cents a week, unless I just wanted to entertain people, and that would be a cheap way to do it. Probably that is what they had in mind.

Mr. Bingham. The location owner gets $2 a week, that is, the man that owns the restaurant or the diner or the tavern; and the operator who owns the machine gets $3 a week and nets 90 cents a week out of the operation after he pays for his records, his needles, servicing, and what not.

* * * * *

Mr. Bingham. Yes. I am informed that there are approximately 8,500 operators who handle approximately forty machines apiece. In other words, it is a small business, and their weekly income is approximately $40 per week, before taxes, on a $12,000 capital investment.

* * * * *

Mr. Bingham. I just wanted the record to show what the scale was. In addition to the scale the contractor makes an agreement, if I am correctly informed, with the recording company whereby he gets a royalty of 2½ cents a record. Is that correct?

Mr. Petrillo. Some of them do; yes.

Mr. Bingham. By some of them you mean the name bands?

Mr. Petrillo. Yes.

Mr. Bingham. They get a 2½ cent royalty?

Mr. Petrillo. Yes.

Mr. Bingham. Do you happen to have any idea as to the number of records that a name band might sell of a particular recording?

Mr. Petrillo. No.

Mr. Bingham. It might well run into thousands or hundreds of thousands?

Mr. Petrillo. I suppose it could. Do you mean the name band or the leader receives the 2½ cents?

Mr. Bingham. I understand that the leader gets 2½ cents, and the band members do not participate in that royalty.

Mr. Petrillo. They get scale, and that is all.

Mr. Bingham. They get the scale and whatever the leader happens to pay them by reason of their exceptional ability with a particular instrument?

Mr. Petrillo. That is right.

Mr. Bingham. So far as the records are concerned, there is a 2½-cent royalty to the leader, and he can make anywhere from $5,000 to $25,000 out of a particular recording, depending on the number of records sold?

Mr. Petrillo. I think it is very rare that he makes $25,000.

* * * * *

Senator Clark of Idaho. I may be wrong, but at this time, in any event, you are not complaining about the scale for musicians, are you?

Mr. Petrillo. No. That comes later.

Senator Clark of Idaho. You mean, when you renegotiate your contract?

Mr. Petrillo. Yes, sir.

* * * * *

Mr. Bingham. I have heard any number of broadcasts which closed with the credit line that "The music has come to you through the courtesy of James C. Petrillo."

Mr. Steeper. "With the cooperation of James C. Petrillo."

Mr. Petrillo. We try to combat some of the publicity. In other words, we want to get a little credit. Everybody has been after us, and we thought, now we are doing a good thing we might as well be given credit for it. Those are mostly bands that put on a program of one hour every Sunday. The entire band plays in the studio free. They go into the studios and entertain soldiers.

* * * * *

Mr. Bingham. I have in my hand page 16 of "P. M." of Monday, December 14, 1942, an article by Edward Angly, who has just returned from Australia, and in his closing paragraph he states (reading):

> "The men at battle stations in the Pacific have little entertainment other than what they create themselves. The canned entertainment that is shipped to them could, I think, be a bit fresher."

That is dated December 14, 1942. Have you had any advice from any member of the armed forces as to the effect of your ban in the far flung battle stations that we are now attempting to man in our fight with the Axis?

Mr. Petrillo. No; I have not.

* * * * *

Mr. Petrillo. I started (negotiations for the Boston Symphony) with the leader, and then I finished up with the treasurer, the fellow with the money, and he showed me a lot of figures.

Senator Tobey. They looked good to you, did they not?

Mr. Petrillo. Those figures were not so good. They were about $180,000 short that year. So I told him that if he joined the union he could make it up. So he did. He joined up with the Blue Network and made a nice piece of change out of that. The deficit will be wiped out. So we did some good to some people.

* * * * *

Senator Clark of Idaho. How about the moving picture industry?

Mr. Petrillo. The moving picture industry too. There we have specific figures; there we can point to a specific number of men we have lost.

Senator Clark of Idaho. It occurs to me that the radio industry as an industry has really created opportunities for musicians, if you look at the overall picture. But the moving picture industry apparently has displaced them without creating any particular work for them. Would not that be about right?

Mr. Petrillo. That is correct, because they started out with a lot of musicians, brought a lot of musicians in the field, and then overnight they were all put out of a job.

Senator Clark of Idaho. Would it be a fair question to ask you why you have not banned sound track recording for the moving picture industry?

Mr. Petrillo. You cannot be fighting on too many fronts. If we started a battle with the moving picture industry at this time I don't know what would happen to us.

Senator Tobey. Is this present method of yours an illustration of the old dogma that coming events cast their shadows before them?

Mr. Petrillo. That is poetry. I don't understand poetry.

Mr. Bingham. Pursuing further that line of thought, Mr. Petrillo, the impact of the moving picture industry was felt by you in 1929, or shortly after that—say, 1930—and that has been something that has been in the back of your mind for some 12 years. The radio industry was not even in existence when the talkies came in.

Mr. Petrillo. Just slightly.

Mr. Bingham. But you moved against the recording industry, the radio industry, and the transcription industry first. Do you care to discuss the reasons for making that selection?

Mr. Petrillo. No. I don't think we have any reasons. We probably should have gone after the moving picture industry first, but we did not.

* * * * *

Senator Clark of Idaho. I want to break in on this. I have been told by people who should know that there are a great many cities in the United States today, including Washington, where live musicians are very difficult to obtain, particularly at night time; that good live musicians sometimes can be obtained for one or two hours during the day, but that most of them, under present circumstances, have other positions and usually accept dance engagements and things of that kind at night. I have inquired about that since this came up. I wanted to get all the information I could and have it either verified or disputed in these hearings. Is that statement correct?

* * * * *

Mr. Petrillo. Maybe the caliber of men they want are men who are working four or five nights a week, and possibly the radio station is only ready to offer these boys one or two sessions a week. So, if they are already making $40 to $50 a week they can't quit the jobs they have in order to go to a station and make $10 or $12 or $14 or $16 a week. You might find that condition. But as to a shortage of musicians that work in radio stations, we can supply all the men they want. They might say they are no good. They are not all Stokowskis and Toscaninnis and Petrillos, but they are all right.

* * * * *

Mr. Petrillo. I would say to you, Senator, that today we can furnish all the musicians that are needed in radio stations, but I doubt, if the war goes on for four or five months, whether we will be able to do that job. That is a fair statement, because the way they are taking them in, I think our total membership now represents about 15 or 20 per cent in the Army.

Mr. Steeper. About 18 per cent.

Mr. Petrillo. About 18 per cent of our membership are in the Army or Navy, 25,000 men.

* * * * *

Senator Clark of Idaho. Do you think it would improve the quality of your union if you had certain standards of musical excellence before membership would be granted?

Mr. Petrillo. We are in a very peculiar position. When I was a kid we went out and played weddings and picnics, and the union was after us all the time. The union was not so strong in those days. Unless we take them all in—I dare say if we stopped taking musicians in unless they are first class, in a period of three years we would have another union start, because you have either got to take those boys in or they are going to scab on the job. They are either going to live or they are going to fight. So we feel that they are better off in the organization. If they are qualified they will make a better living. If they are not qualified they will probably lose engagements they already have.

Senator Clark of Idaho. And pay dues for nothing?

Mr. Petrillo. Yes.

Mr. Bingham. I am going to attempt to summarize, if I may, Mr. Petrillo. So far as the radio is concerned, radio has actually made work for musicians, has it not?

Mr. Petrillo. There is no question about it.

Mr. Bingham. The phonograph was invented before the American Federation of Musicians held its first annual convention, was it not?

Mr. Petrillo. Yes.

Mr. Bingham. So far as the recording companies and the transcription companies are concerned, the musicians have made more money than they ever made before; that is correct, is it not?

Mr. Petrillo. It is only partly correct. Where does the recording go after it is made? Does it go for home consumption? Does it go into a place of business where there would not be any music if the record was not played there, or does it go, like the Ringling Brothers Circus, where they have taken a job away from forty men? That is the question.

Mr. Bingham. I think you will admit that the vast majority of records go into the home.

Mr. Petrillo. The finer records, the symphonic records.

Mr. Bingham. Practically all of the symphonic records?

Mr. Petrillo. Ninety-eight percent, I would say.

Mr. Bingham. And so far as the other records are concerned, I think you will admit that about 70 or 75 percent go into the home?

Mr. Petrillo. And they go elsewhere.

Mr. Bingham. I will come to the rest of them in a minute. But about 75 percent go into the home?

Mr. Petrillo. I would say so.

Mr. Bingham. And as to the balance, there are about 30,000,000 records sold to operators of coin-operated phonographs? And I think you will admit that most of the places where you will find the coin-operated phonographs could not employ a musician if they wanted to. I think you will admit that. That is, the roadside diner, the tavern, the hamburg joint—they could not employ musicians?

Mr. Petrillo. Places like that, no.

Mr. Bingham. Very very few of the 300,000-odd locations could employ a live musician?

Mr. Petrillo. I would not say, very few. You might split that in half.

Mr. Bingham. How many would you say?

Mr. Petrillo. About 50 percent.

Mr. Bingham. You would think, half of them?

Mr. Petrillo. Yes. Not an orchestra.

Mr. Bingham. A live musician, at least one live musician.

Mr. Petrillo. Fifty percent could not afford to put on any musicians. We will push that aside. There are fifty percent that could. Out of the fifty percent that could there are probably 25 percent that would only employ a piano player, anyway. There are 25 percent left. There are about 16 percent that could employ a piano and a violin player, and maybe 15 percent that could employ a four or five-piece orchestra.

Mr. Bingham. That would be 45,000 establishments. Fifteen percent of 300,000 would be 45,000 establishments that could employ a four or five-piece orchestra, that now have a coin-operated phonograph.

Mr. Petrillo. If that is so.

Mr. Bingham. That is on your figures.

Mr. Petrillo. Even according to my figures we could not supply the men, because we do not have that many musicians. There are only 138,000.

* * * * *

Mr. Bingham. So far as the radio broadcasting industry itself is concerned, that has furnished an opportunity for musicians to work, has it not?

Mr. Petrillo. Right.

Mr. Bingham. And since radio has come into existence your membership has grown. Since, we will say, 1934, except in the depression years, your membership has grown until today it approaches the highest figure in its history. Is that correct?

Mr. Petrillo. That is not correct, according to our figures. We probably had 158,000 at one time.

Mr. Bingham. When would you say radio broadcasting came into the big business class?

Mr. Petrillo. About 12 years ago.

Mr. Bingham. About 1930?

Mr. Petrillo. Yes.

Mr. Bingham. And since that time the membership of your union has grown and more musicians have been employed by radio broadcasting companies each year, except I believe Judge Padway said last year there were less employed than in previous years.

Mr. Padway. Yes. In 1939, 1940 and 1942.

* * * * *

Senator Clark of Idaho. I want to clear up this matter that we were on this morning, because I think that maybe we are getting some place; I do not know. Will you do this, Mr. Petrillo? As soon as reasonably possible will you get your executive committee together and formulate a program? I really think that you ought to formulate it in writing; otherwise we are going to get nowhere. This committee is busy and you are busy, and we are perfectly willing to spend such time as is necessary. It may be that we will not have to continue this investigation indefinitely, and that will help everybody. Will you get your executive committee together and formulate a program? It does not have to be an iron-clad program, but some kind of a program as to the basis upon which, from your standpoint, you think this controversy with the industry—and I use that as an overall term—can be settled, and then furnish this committee with a copy of it so that we can get something to start on. Will you do that?

Mr. Petrillo. I certainly will. I happen to have a board meeting beginning February 1. We will be in session two weeks. On account of this investigation I postponed it until February 1, because I didn't know how long I would be here. The board members come from coast to coast. We have one in Los Angeles, one in Texas, one in Des Moines, Iowa, and so on. We will be in session beginning the first of February, and I will promise you that on the first day we will go right into it. We are going to show this committee that we are in good faith in everything I have told you.

Senator Clark of Idaho. If I were you I would give it to the public. But that is up to you. We cannot compel you to do anything. We are going to rely on your formulating something that can be presented to the industry. Please furnish this committee with a copy of it, and I think you will get somewhere.

* * * * *

Mr. Petrillo. Matters that I cannot handle myself I lay over for the board meeting.

Senator Tobey. Has there ever been a case where they did not meet your views in the last analysis?

Mr. Petrillo. Once in a while they get balky, but they come around all right. That is because I try to be reasonable.

* * * * *

Mr. Petrillo. Mr. Chairman, may I at this time thank you and the rest of the committee for the courtesy shown me while I have been here for two days. Also the attorney has been very fair. You have all been very fair. I know that the Board will appreciate it when I tell them at the convention that this committee did nothing but try to be helpful. I am sure that something is going to come out of it. I hope so, anyway.

Testimony of Mr. Padway

Mr. Padway. The refusal of the American Federation of Musicians to make records and transcriptions is part of the fight to maintain the basic rights of labor.

* * * * *

In the present instance workers are engaging in a simple refusal to work—that is all the action of the American

Federation of Musicians amounts to—because the musicians feel that it would be nothing short of suicide to continue, themselves to make the instruments which put them out of jobs.

* * * * *

The attitude of the musicians has been—and is—and that was stated by Mr. Petrillo, too—one of "live and let live." But that is hardly the approach of the corporations that have grown powerful and wealthy on "canned music." Instead of recognizing their debt to the live musician they have completely ignored his plight and have shirked their plain responsibility to the human and economic problem of unemployment in their own industry.

They have preferred, rather, to add the power of the press and of various government agencies to their own great strength and to confuse the simple issue by an expensive—or should I say cheap—campaign composed of personal abuse and false issues.

* * * * *

Mr. Padway. Except this, Senator. You have been wondering why we have not gotten together. You have also been wondering why we have taken the position as explained by President Petrillo. There are two ways of getting together. You get together with people who are reasonable and who formulate an intention of good faith collective bargaining. This indicates that there was no such disposition on the part of the National Association of Broadcasters, or some of its members, not all.

I should, in fairness, say that the officials of the Radio Corporation of America have not been unfair. Usually we disagree with them or they with us. But they have certainly not engaged in any abuse or vilification. The same is true of the president of the Blue Network. We must say that. And that is what Mr. Petrillo meant when he said there is some justice to their side. These people have unofficially made known the injustice of their side.

* * * * *

Senator Clark of Idaho. If we complained about anything we complained about calling a strike or putting on a ban prior to presenting any proposals for negotiation. I do not know what the National Association of Broadcasters have done, but I am wondering if they did anything prior to the time this ban was placed.

Mr. Padway. No, they did not, that I know of; at least not publicly.

* * * * *

Regardless of what the National Association of Broadcasters has done, public resentment has arisen. Look at this file (exhibiting). These are just letters from all over the country, from people who never heard of the National Association of Broadcasters. I do not think Elmer Davis' testimony was predicated upon anything that the National Association of Broadcasters said.

* * * * *

The public got up in arms against a ban which it thought was unjust. The National Association of Broadcasters may be guilty of many sins, but I really think this tremendous building up editorially, if you please, by the press, and these letters from the federations of women's clubs, high school bands, and all of those things, were not controlled by the National Association of Broadcasters, to my way of thinking. But perhaps we could argue on that until doomsday.

* * * * *

Senator McFarland. I am more interested in this offer of Mr. Petrillo to try to get together and settle this matter. That is the thing that I am interested in.

Mr. Padway. I thought Mr. Petrillo made it very clear that he is going to call his board into conference. Senator Clark put it to him by way of direct questions, and I think direct answers were received. His board will be called together on February 1. Correct me if I am not stating that correctly. At that time the board and President Petrillo will formulate demands. Those demands will be presented to the Committee, and he is ready, upon the presentation of those demands, he and his associates, to sit down and confer with whatever representatives the industry chooses to see if they cannot settle this controversy.

* * * * *

Senator Clark of Idaho. Does the American Federation of Labor have a publicity department?

Mr. Padway. It does.

Senator Clark of Idaho. How large is it?

Mr. Padway. It has got a nice active department. It has a director and several assistants, I think.

* * * * *

Mr. Padway. Time and again our members have been called upon to offer their services for benefits for the armed forces, the Red Cross, Allied Relief, and war bond sales; and time and again they have responded generously, giving their talents without charge and often at considerable financial sacrifice.

* * * * *

Senator McFarland. Here is the point that comes to us or, at least, the question comes to me. Let us just assume for the moment that you are entirely right in your controversy with these other people. Here is a ban that was placed in operation in the middle of the war. It at least did this: it caused a lot of confusion among the people, and it came at a time, you see, that you, as I pointed out yesterday, wanted more money and you wanted more employment, and it came at a time when the whole war program called for more employees. People have been forced to quit their jobs that they formerly held.

Take the automobile salesman. He just had to close down. It has been a great hardship. And he has had to go into other lines of work.

Now, the question is whether the musician was justified in having placed himself in this position, in the middle of a conflict, or whether he should have waited until the conflict was over, because there is plenty of work for everyone. There is plenty of work for everyone. Now, maybe that is not in his chosen profession, but take the automobile dealer, he is not able to work in his chosen profession, as well as a lot of others. We have had to inconvenience ourselves on account of the war.

Now, that is the question that is before me. Assuming you are right, you have picked out an inopportune time to place this ban in operation. The question is as to whether it would not have been better for you and been better for the nation, had you waited until the war was over.

Mr. Padway. Senator McFarland, there is certainly much logic and reasonableness in your exposition of the time when the ban was placed. But let me say this to you, sir, that in spite of all the war may do and in spite of all that the manufacturers may absorb, there will be thousands of musicians unemployed.

Now, many of our members are older members. The younger members are being taken away, and that is why some of these bands are being dissolved; not because they can't get musicians, but they can't get the young and attractive musician, the musician that is wanted in a dance hall like, we will say, the blue room of the Shoreham Hotel. Probably you have been there; I don't know. They want young musicians, attractive ones. I suppose, with the glamour of the dance and the sentiment of the song, they want to look at fine-looking young males—like you and me (laughter)—and they don't want the older ones.

Now, there are many of those that will not fit in a factory; they won't be taken, but if they take them, we will be glad to have them take jobs. We want them to take jobs. We will give the Government all the man-power it wants without any compulsion. And, after giving all the men to the draft and thousands that are in these factories, and after taking into the factories all those that are capable of work and willing to go there, still we will have thousands of musicians unemployed in this country.

Well, you say, the problem won't be acute. But, sir, we have to look out for another thing. You know what war did to the country with liquor. It brought prohibition, didn't it? These rules that are instituted as war measures, remain after the war. The principle remains. And it gives the employer of industry a hold to set up an adverse principle that cannot be removed after the war.

* * * * *

Senator McFarland. But, here is one phase of the matter, regardless of what you do for the Army, that you are not doing now, and I do not know how it can be done without the records. There are people out on the little farms and out on the ranges that are producing the meat for the nation, if you please, and other important commodities, that depend entirely, because of their locations, upon the small radio stations.

Now, the city has become attractive to them. Their work is very important in the war program. And, we must try to see to it that they, at least, have all the conveniences that they have had in the past, but this ban is depriving those people of one of the conveniences that they have had, and that is, up-to-date music.

Now, these records, as you said yesterday, or Mr. Petrillo said, become old. Now, as they become older, why people will become more dissatisfied and will say, "Well, I can get out of this little old farm, I can get out of this ranch, I can go to the centers of population, and there I can get good wages and leave this thing and go to work, and I will have the conveniences of life." Now, those people, as Mr. Petrillo admitted, he did not take into consideration when the ban was placed on.

Now, it is things like that, in placing bans and in starting things now and then in the midst of a conflict that just adds to the problems which we already have and that our nation already has. They may seem small, but it is the small things that grow into large things sometimes that make it more difficult, and that is just one example of how this starts a demand for new and different things, in the midst of a conflict, and how it hurts us.

* * * * *

Mr. Padway. I have quite a good answer to that, but it will consume too much time to state it. I put it in two subheadings.

Number one: We will not only protect the small station when we come to a settlement but I assure you there will be no money demand or any demand made on the smaller stations to hire musicians or spend more money than they are spending now. Perhaps they are, as Mr. Petrillo said now, innocent victims of a greater struggle we have with some greater forces, and it is perhaps bad, but that happens in every strike. A strike of the engineers in this building would affect you Senators very much. You would not have any heat.

Senator McFarland. It is striking in the midst of a war, that is the thing we are trying to get away from; having strikes in the midst of the war.

Mr. Padway. We want to settle this strike, because we don't want to have it any longer.

* * * * *

Senator Andrews. What you say in regard to the professional musicians being out of employment, does not that apply to all professions and trades? They are all in that situation.

Mr. Padway. Every one, Senator. Every one, Senator.

Senator Andrews. In other words, there is no exception.

Mr. Padway. No, except degree. Some are not affected as much as others, and then certain times others are affected more than others, but our problem has not been only acute—well, it is chronic, and it has been over a number of years, but it will get worse unless industry helps us find ways and means of solving it.

Senator Andrews. It seems to me that so long as every human being loves music and every human being tries to learn to play an instrument—I have played two or three myself.

Mr. Padway. I am not going to ask you whether you carry a card in the union.

Senator Andrews. It is a universal proposition, music is, and you can never hold it down.

Mr. Padway. We are the last ones to hold it down. We lift it up.

Senator Andrews. I know you do not, but you should not hold it down to any particular persons.

Mr. Padway. There is logic in that. This is not a one-sided affair. There are, of course, arguments on the other side.

Senator Clark of Idaho. Of course, I want to say this, Mr. Padway, and I think you will agree with me, that it has not only been the policy, but the very commendable policy, the popular policy, the stated policy of both the American Federation of Labor and the C. I. O. in their pledges to the President, to hold strikes to a minimum and, if possible, eliminate them for the duration.

Mr. Padway. That is correct. I think our pledge has been lived up to.

* * * * *

Mr. Padway. Well, I think if what we had a right to expect reasonably would have resulted, this strike would not have been enforced. It would have been settled even before the ban came on. That, of course, will cause a debatable subject, whether this side is wrong or that side is wrong. In this instance we maintain, if there had been the proper attitude on the part of the other side, it would have been settled.

* * * * *

Senator Tunnell. How do you keep an amateur, for instance, from making a record and having it put on the air, one who is not a member of your union?

Mr. Padway. Well, in that instance, we keep it off in this way, Senator. We say to the broadcasting company, "You employ our musicians. That amateur's record is in competition with us. Now, instead of playing that, we want you to play live music." All the records were made by our musicians and played by unions of our musicians, but as a penalty for doing so we will say, "You must have live musicians to do that." And that is very effective, and that will keep them off.

* * * * *

Mr. Padway. In some instances they have even done this: They have put amateur bands on the air and said they don't want the stand-by—that is where the employer agrees to the stand-by—saying, "We will pay you just the same." We don't want that. We don't want it for two reasons. First of all, we want to render music for the pay we receive.

* * * * *

Mr. Padway. What must be done in the amateur situation is this: to approach or meet a happy medium. How can we give this talent free sway and opportunity to play and opportunity to cultivate their musical culture and the like, and at the same time not make economic inroads on any professional musician?

* * * * *

Senator Tunnell. I ask you these questions, Mr. Padway, because on the first page of this paper you say:

> "In the present instance workers are engaging in a simple refusal to work—that is all the action of the American Federation of Musicians amounts to."

Well, the resentment that I see reflected in my correspondence is not so much the refusal to work as it is the threat that you will refuse to work if the other fellow works.

Mr. Padway. At the present time that is correct. That is what we say.

* * * * *

Well, I have not Mr. Petrillo's authority or the Board's authority, but from what I know, from general experience in talking to Mr. Friedman, Mr. Cluesmann, and others, who know the specific industry better than I do, I know they neither intend to do that or will do that. I know that amateur bands will be given a fair play on the air. Now, whether it should be twelve played by Interlochen or four or six, we will come to a happy understanding as to the medium, and will approach it with a spirit of liberality, with a spirit of at least giving these youngsters, call them that, a fair opportunity to present their talent by the best mechanical means now available.

Senator Tunnell. In each instance the thing complained about is the threat that you will not permit the union members to work, provided either the record in one instance or the school band in the other, is used, as I understand the complaint.

Mr. Padway. Well, you can take this statement that I now make and excerpt it and send it to your constituents and tell them that you have it under oath. We will not place an absolute ban on amateur music. We will endeavor to reach an agreement with the broadcasting companies, reasonable in its form and extent, to permit amateur broadcasts within fair limitations.

* * * * *

Mr. Bingham. Is it a fact that the musicians who now play in Command Performance have a special grade rate which is paid for by the Government?

Mr. Steeper. No. The American Federation of Musicians hasn't given a special rate. They have given gratis. If a local, in its own interpretation of the law, feels that some of their men are entitled to a remuneration, then it is up to the local, and the local gives authority to work out some problem.

Mr. Bingham. Just so long as this record is straight, as it now stands, there is an unequivocal statement in the record that the musicians are contributing gratis in the rendition of Command Performance.

* * * * *

Mr. Bingham. It may be possible that locals are imposing a charge upon the Government for the Command Performance?

Mr. Steeper. That might be so. That I couldn't say, authoritatively, but as far as we are concerned, we give permission for those musicians to play these performances gratis.

* * * * *

Mr. Steeper. On the Government programs 95 per cent of the music is donated. The name bands are donating their services. Where they are making transcriptions for the Department of Agriculture or Department of the Treasury, where they use an organ for bridge work, over a period of time, for transcriptions, then the organist, as I understand it, receives a remuneration, pay, some scale that is provided for, or in the local's jurisdiction, where he is making these transcriptions. But, that is only in a few instances and it only applies to one man.

* * * * *

Mr. Bingham. I am informed that you have given permission to the musicians in all locals to render their performances gratis.

Mr. Steeper. No, that is not so. That is not so. We cannot step into a local jurisdiction and tell them what they must do in their jurisdiction.

* * * * *

Mr. Bingham. Now, if I may ask Mr. Padway a question. It is your philosophy, as I understand it, as well as the philosophy of the American Federation of Musicians that everyone who becomes a member of the American Federation of Musicians has a right to earn his living as a musician, regardless of his musical ability.

Mr. Padway. No, that is not our philosophy.

Mr. Bingham. Will you please tell me why, then, you say that you have 138,000 members, and you point to the number of unemployed in each one of your locals and say that you must get employment for this number of musicians, whatever the number happens to be, in each particular local?

Mr. Padway. I don't understand that that is even said, that you must give employment for 138,000 musicians. You understand we said a large number of these unemployed are professional musicians who wish to play their professional instruments and earn their living from the profession and don't have employment. And, we add—

Mr. Bingham. Do not have employment as musicians.

Mr. Padway. Do not have employment as musicians. And we add to that, do not have employment at all, many of them, and many of them have other employment.

Mr. Bingham. Let us stick to that point a minute.

Mr. Padway. Yes.

Mr. Bingham. You say they do not have employment at all?

Mr. Padway. Yes, sir.

Mr. Bingham. But yet the American Federation of Musicians has made no survey and has no idea as to the number of musicians who are gainfully employed, at least, part-time, and most of them full-time in some other occupation, other than as musicians.

Mr. Padway. Well, the American Federation of Musicians is not without knowledge on that. The American Federation of Musicians is with this knowledge. First of all, during the W. P. A. period, we could have supplied 50,000 musicians to the W. P. A. He couldn't take that many and wouldn't take that many. They did help us out with 15,000 at times. I think it amounted to 17,000 at one time, or 16,000. Anyway, they helped us out with them. But there were certain regulations concerning which they wouldn't do anything.

Now, the next thing is this: We have had musicians that lived during that time, who were not on W. P. A., on ten or twelve dollars a week. They played here and there at odd jobs. There wasn't any other job to be done or to be had for them.

We have now men—except for the war, which provides general industry for some of them—who could not get a job, because the moment they came to apply for a job and told the truth that they had been musicians for 15 years or 18 years, they would say, "We don't want you," if there is another man who had not been a musician who is eligible for the job. In other words, the very fact that he was a musician made him secondary and third and fourth on the list of being employed as a clerk in a department store or furniture salesman or truck driver, and others were given the job if there were others applying for it.

* * * * *

Mr. Padway. There are, I think, 138,000. A few thousand, probably 10,000, who carry cards and who play sometimes. They are no problem. Cast out about 25,000 of them, we will say, and then we come down to 110,000 or 112,000, and of the 112,000 thousands are only employed part-time and can't get any other work of any kind.

Mr. Bingham. Mr. Padway, you are making statements of fact, and as I understand it, the American Federation of Musicians has made no survey as to how many of their musicians are unemployed at any gainful occupation; not as musicians, but at any gainful occupation.

Mr. Padway. Now, I will tell you why that is. The men are in the office. These men that are sitting around here are so well informed of the truth of this contention that they have not thought it convenient or even necessary to make the survey.

* * * * *

Mr. Bingham. I am further informed that there is not a man available of sufficient competence for engagement in a radio station in Washington, D. C., and, furthermore, that all men who are employed as musicians by radio stations in Washington, D. C., hold more than one job.

Mr. Padway. The radio industry is very technical about the employment of musicians.

Mr. Bingham. What do you mean by "technical"?

Mr. Padway. Well, technical in the sense—probably I should say "particular"; that would be a better word. Thousands of musicians will not be employed by the radio stations, even if they apply. They won't take them. They feel they want the cream and the best. Now, the fact that the radio station won't take them, doesn't mean anything, because the radio industry I don't think employs 2,000 or better all over the country. You mean to say that only 2,000 musicians are competent for the industry? There are 8, 10, 12, 15, 40 thousand that can be selected, and yet they won't take them. They won't take them. I will venture to say—and I don't know much about this, this is only a guess—I will venture to say I can bring any radio station here in the city of Washington 100 musicians that live in Washington or the adjoining territory today, and the radio company will probably turn down 95 percent of them.

* * * * *

Mr. Bingham. All laws, no matter what they may be, shall be referred to a convention committee consisting of the executive board, A. F. of M., and chairmen of all committees, who may sanction or veto same. And the president may annul, set aside the constitution. He may make a new constitution if he so desires, so long as it does not affect finances. That is the only restriction. Do you call that democratic?

Mr. Padway. If you wish to take that standing alone and base your question as you have based it, it is not democratic. There is no use equivocating about it.

* * * * *

Mr. Padway. I do not know of a single instance, and have asked that question and no one was able to point to a single instance where a president of the organization has set aside any fundamental, substantive constitutional provision.

* * * * *

But the fact that the membership have not found that to be a hindrance and it has not been withdrawn would, I think, indicate that it has not interfered with the democracy of the constitution. If they will take my advice about it they will remove it at the next convention.

* * * * *

Therefore I say, you really cannot find in that situation a lack of democracy, certainly not other than it appears in writing and therefore is an undemocratic provision. And in that interpretation, and that interpretation only, I might go along with you. But as to any exercise of it, and the practical effect of it, I say it is in most democratic form because it is not availed of.

* * * * *

Mr. Padway. Technological displacement and unemployment are problems with which trade unions have had to cope for a long period of time. The efforts of trade unions to meet these problems constitute a proper and appropriate field of collective bargaining. To contend that the problem of the introduction and use of machines which displaced labor does not constitute a proper field for collective bargaining and has no relation to the "terms or conditions of employment" is to close one's eyes to the history of the American labor movement for the past one hundred years. The trade union seeks to protect its members against technological displacement.

* * * * *

Mr. Bingham. While we are in the realm of philosophy let me say that admittedly the radio broadcasting industry displaced no musicians when it came into existence. Furthermore, as the radio broadcasting industry grew it employed more and more musicians until I believe in 1939 you said, and since 1939, fewer musicians have been employed. I take it to be your position that the radio broadcasting industry should support all who desire to become musicians, at least in some part, because in the course of their business they use records made by musicians. Is that your contention?

Mr. Padway. No. But I want to say that the factual premises upon which you base your conclusion are wrong, and your conclusion is certainly wrong. Let me tell you this: It is one thing to say that the radio broadcasting industry has not displaced musicians.

Mr. Bingham. Is that right or wrong? Am I wrong in that premise?

Mr. Padway. It is right if you put a period there, but is wrong if you put a semicolon there and continue on. That is the difference. Here is why it is wrong: When there was no radio industry there were no musicians engaged in the radio business. Then along comes the radio business and employs 400 and 600 and up to 2,000. And that is for nights. But here is what happens to us: The musician who would have found work one year after the radio industry came into being, ten years thereafter or twenty years thereafter—or probably it does not go back for a 20-year period—would have continued to have work except for the fact that the radio industry prevents it.

Mr. Bingham. How?

Mr. Padway. I will give you an illustration that parallels the radio industry. Certainly new restaurants and night clubs are opening up right now. There is the Del Rio and the Normandy and so on, and such other organizations as have sprung up as our population increased, and as they get into business they must have music, and would want musicians to play for them. If you take all of the new night clubs that have opened up, outside of the immediate downtown district where they make good money and want an orchestra, other means are employed. You take out-of-town places and instead of employing live musicians they employ wired music or something on that order.

Mr. Bingham. But I am speaking of radio stations.

Mr. Padway. That applies to radio stations.

Mr. Bingham. Do you mean that a radio station pipes music into restaurants downtown?

Mr. Padway. Oh my Lord, yes. If you will spend an evening with me—and I would enjoy nothing better than to spend one with you—I will take you to plenty of dance halls on the outskirts of Washington where soldiers and civilians go and dance around, and where there are large crowds. There are plenty of places where the music is all piped in through radio. And when the radio does not come across with the kind of music they want—and there is plenty of music on the radio—they pipe it in through a record played on a juke box or victrola and they dance.

Mr. Bingham. I have had the experience of seeing the coin-operated phonograph, but do not believe I have ever been in a place where they dance to music on the radio, except in a private home.

* * * * *

Mr. Bingham. That is why I asked you the question as to radio broadcasting, because so far as I know, radio broadcasting, as an industry, has made work for musicians and has not thrown them out of work.

Mr. Padway. We are at issue, as you know, on that. In our experience we find that that is not just the fact. You may be right and I may be wrong. When I say "I," I mean the American Federation of Musicians.

Mr. Bingham. But you spoke from personal experience?

Mr. Padway. Talking about the proof of the pudding, we know it to be a fact from actual experience, and you probably believe it to be otherwise.

* * * * *

Displacement of live musicians by "canned" music started fifteen years ago with the arrival of the sound motion picture, and since then the situation has grown steadily worse. In 1928 and 1929—the first two years of the rapid growth of sound pictures—approximately 10,000 theater musicians lost their jobs.

* * * * *

Mr. Padway. The conditions created by this development were aggravated by the closing of many vaudeville houses and legitimate theaters throughout the country. As a result, instead of the 22,000 musicians employed in theaters in 1927 there are only 4,000 so employed today. Thus, the employment of a few hundred musicians out in Hollywood making mechanized music throws 18,000 other musicians out of work.

* * * * *

Mr. Bingham. There are letters that have come to Senator Clark to the effect that locals make it tough on the traveling band that comes through to the small house, because the small house cannot, they claim, afford to employ an orchestra full time. They can bring in a traveling band that comes through with a radio show, we will say; but if they do that they also have to employ an equal number of local musicians. That is our old friend the "stand-by." They cannot pay for both, so they have neither.

Mr. Padway. All right, Mr. Bingham. I do not want to renege or shirk that question of the stand-by, but I justify the stand-by under certain circumstances and in certain instances. In other instances I think it is unjust. I think the stand-by in the building crafts ought to be abolished. I know Mr. Green feels the same as I do.

We think it is unjust and improper. It is improper in certain places where it is indulged in by the American Federation of Musicians locals.

Mr. Bingham. Have you any control over this?

Mr. Padway. Yes; we do have, and we do control them in certain instances. The control is limited, but there is some control. Where the stand-by is unjust and complaint is made, as was stated yesterday by Mr. Petrillo, and it has been brought to his attention, he passes upon it. He will disallow it and the executive board will disallow it. But in many cases it is just. But I want to say this to you, which may surprise you gentlemen, and I suppose the opponents can either dispute it or otherwise. It was originally brought into play by the employer, not by the unions. Suppose he has a band in a theater here, or a dance hall or a hotel. The Hotel Schraeder in Milwaukee employed a band for a long time. Barney's band has been up at the Shoreham for twelve years. It has never changed. Say Mr. Moore of the Shoreham Hotel suddenly gets a notion that he would like to put 50 cents extra or a dollar on a meal to get a large crowd. He sends for Eddie Duchin or Dorsey or Whiteman. You know what Barney is going to say. Barney will say, "Now, listen. I thought I was going to have regular employment. If you are going to go ahead and bring in Whiteman, what do you intend for me to do? I will lose my musicians. They will go elsewhere and they will play elsewhere, too." Moore says, "I can't keep this big band here and pay them $5,000 a week for 15 or 20 weeks. You stay home and I will pay you."

That is the way it originally started, because the man did not want to lose his permanent employees. We have letters, and we will produce them, showing you where establishments have asked us to enforce the stand-by so they could get substitute entertainment for a short time.

That is one instance. However, that does not answer the problem. Mr. Barney and his musicians are here in this city. They probably bought homes here. They have children and they send them to high school. They probably have insurance premiums to pay on their lives. Regardless of brotherly love and membership cards and fraternalism and all that, primarily his interest is in his family; and when he sees a band come in here from out of town, getting a high price, he resents it in his heart and he complains about it. He says, "I am paying local taxes to the District of Columbia. I am a permanent resident, and here come these fellows." Just as the storekeeper resents the peddler on the street, the pushcart selling oranges and apples, he resents someone coming in and displacing him. As a result of that the stand-by came into existence in its various modifications and ramifications. It was really to make it expensive, just like time and a half under the Wage and Hour law after 40 hours. It is done to make it expensive, to place a penalty and to reduce as much as possible the influx of out-of-town musicians competing with the musicians in town. Yet, in spite of the imposition of this penalty and in spite of everything else, the American Federation of Musicians would like to see less traveling bands and more work go to the local fellow. He is a citizen. He promotes the community welfare. In spite of all that, the establishment wants these traveling bands, and they pass the cost of the traveling band on to the consuming public.

That is the story. There is a keen justification for the stand-by in certain instances. I will admit that it can be abused, and I am not going to sit here and say that some of our locals do not at times abuse it. One abuse reflects itself upon all of our musicians and we are condemned en masse because of the sins of omission and commission by some locals.

I would say that the time is now here for the employers and the American Federation of Musicians to review the whole stand-by question. I would like to see it eliminated in its present form entirely if the employer will consent to it and substitute something on a more equitable basis.

Mr. Bingham. Does that go also for the amateur band?

Mr. Padway. Surely. We want the amateur band to also, as I will soon show you, have some method of control.

Mr. Bingham. There is a standing resolution that the Federation has passed to use its political and economic strength to prevent the encroachment of amateur organizations.

Mr. Padway. That resolution probably was worded by the one who introduced it. Resolutions usually, even though they are adopted, do not express a permanent policy. I have seen some of the resolutions passed by Congress, and that would be true as to them. The truth of the matter is that resolutions do not express our policy by the mere adoption of them, unless they are acted on by the executive board and put into force and effect.

Mr. Bingham. The resolution relating to amateurs has been put into effect by Mr. Petrillo, so far as radio broadcasting is concerned.

Mr. Padway. What is meant by encroachment? Probably the person that used that word meant regulation. I think President Petrillo made it clear yesterday that the elimination of amateur bands is not the objective of the American Federation of Musicians. Control is. Regulation is. I think that if it were left to President Petrillo to say what he would do with the amateur band he would give the educational institutions a much more liberal and better break on the amateur band than even the employers themselves would in certain instances. I am sure of that.

* * * * *

One of the biggest factors responsible for the displacement of live musicians has been the "juke box" industry. We do not contend that all places that operate the 500,000 juke boxes in the United States and Canada could afford to hire musicians, but it is an absolute misstatement to say, as some have said, that the employment taken away by the juke boxes is insignificant.

* * * * *

In thousands of restaurants, taverns and small dance halls which formerly employed live talent the musicians were thrown out of jobs when the juke boxes came in.

We estimate that approximately 15,000 of our members have lost jobs because of the juke boxes. This has become a tremendous industry, bringing in huge profits for the manufacturers and distributors and operators.

* * * * *

Senator Clark of Idaho. I am not disagreeing, but it only tells half the story. Of course the juke boxes cost money, and you have got to figure that that money is not so easily available. In addition to that, the juke box has got to be serviced, and that requires a considerable overhead, and there is depreciation. So that, although what is said is unquestionably factually correct, it has got to be balanced up against the entire operation.

Mr. Padway. I might say this. Suppose they were not making a penny, and losing money. That does not depart from the argument that we are being displaced.

* * * * *

Mr. Padway. Thousands of other musicians are put out of jobs by the use of transcriptions and records in radio broadcasting. In his statement to this Committee, Commissioner Fly pointed out that of the radio stations that had answered his questionnaire at that time more than fifty-eight per cent did not employ a single full time musician. This means more than 500 stations rely entirely on canned music. Approximately one-sixth of all the stations employ only one musician. These figures indicate that in seven hundred of the nine hundred radio stations in the country less than two hundred full time staff musicians are employed. The figures supplied to the Committee by Commissioner Fly also show that between 1939 and April 1, 1942, although there had been a large increase in the volume of business and income of broadcasters there was a decrease of 10.5% of full time musicians employed and of 32.7% part time musicians employed. Is it any wonder that the musicians feel that in continuing to make radio transcriptions and records under present conditions they would eventually destroy themselves?

Commissioner Fly, Elmer Davis, and the broadcasters have made much of the fact that many of the broadcasting stations are too small to afford the employment of a musician. This is no doubt true of some of the stations, but is equally untrue of many others. We know that many of them can afford it, and their refusal to hire musicians results in the loss of jobs to thousands.

However, the American Federation of Musicians recognized the fact that some small stations would not be in a position to employ musicians. When the plan of settlement between representatives of independent non-network stations and the American Federation of Musicians was agreed upon May 6th, 1938, it included, in addition to the general plan "for the solution of the unemployment problem of musicians," limitations so that the hiring and use of services of musicians were to apply only to stations with a gross income from the sale of time in excess of $20,000, and that the amount to be spent by the independent network stations was to be 5½ per cent of the amount of gross income from the sale of time in excess of the $15,000 gross. While mentioning the 1938 plan for the solution of the unemployment problem it might be well to direct your attention to the fact that the contracts contemplated:

a. Actual performance of work;
b. The use of competent and qualified musicians;
c. The existence of a no-strike clause;
d. Effort to obtain regular employment for the musicians; and
e. That the agreement supplemented existing local collective bargaining agreements.

* * * * *

Senator Clark of Idaho. Mr. Petrillo admitted that it was the little fellow that was getting hurt here. But I do not think there is any question, according to Mr. Fly's testimony and that of Mr. Davis, that several hundred radio stations do depend on canned music and are going out of business.

Mr. Padway. Perhaps I have drafted it in a way that would probably accentuate my point. What you have said is the fact. The small station is getting hurt; the small station is being injured.

Senator Clark of Idaho. Progressively injured?

Mr. Padway. Yes.

* * * * *

Mr. Bingham. What do you call a little fellow?

Mr. Padway. I don't know. I don't want to be facetious about it, either. I suppose it would be a fellow who grosses less than $25,000. It is just a matter of your own common sense. Senator Tunnell might think a little fellow would be one that grossed $50,000 or less. I will take $20,000. But it is the fellow who just about covers his overhead and expenses, probably makes a living for himself, not too large a living, and is really at the mercy of slight fluctuations which bring him into the black or the red.

* * * * *

Mr. Padway. What is a little fellow and what is a big fellow is hard to define; but I would like to say this, that the Federal Communications Commission is a very competent agency and gets its figures very well, and so on, but I would like a private, independent accounting system set up to look into the books of these companies and see what picture would be obtained then.

* * * * *

Mr. Padway. Pennsylvania has protected us in the creative genius and art and so on. whereas the Federal courts said no. I think it is something that this committee might look into very carefully.

* * * * *

Mr. Padway. The American Federation of Musicians is willing and anxious to cooperate in the development of amateur musicians. Indeed, many school bands and orchestras, most of which are instructed and conducted by Federation members, broadcast over the radio without any objection on the part of the Federation. The fact that the Interlochen band was on the air for twelve years shows plainly that we are not opposed to these boys and girls broadcasting.

* * * * *

However, our basic reason for raising objections to amateur performances is to prevent unreasonable competition from non-professionals. It is easy to understand that the more free music the radio receives, the less need for the professional. That was the primary reason for opposing the broadcasting of the concerts from Interlochen. It is not a question of being selfish; it is a question of protecting the very livelihood of our members.

* * * * *

Mr. Padway. The musicians do not want to fight for the sake of fighting. They have taken their action only because there was no other resource left, due to the failure of the employers to make satisfactory arrangements.

Everything that has been done has been done in a legal and orderly manner and strictly in accordance with our rights. Every contract has been lived up to. The A. F. of M. has a long and honorable record of living up to its obligations.

We are willing to sit down with any responsible group or groups representing the industry, in an effort to work out a solution that will be fair and equitable to all concerned.

* * * * *

Mr. Padway. Now, gentlemen, we can cease working, and under the Norris-LaGuardia Act, which has now abandoned the common-law doctrine of conspiracy, two or more can refuse to work for the same purpose as one. But, all they will do—and I am not saying this by way of a threat or challenge, but all their hues and cries and resolves will not make our men work when they are believing that they are subjected to improper and unjust conditions. The quicker the N. A. B. and its officers and those that compose it get out of their heads that they are going to drive us into a bargain the way they drove ASCAP into a bargain by a campaign of this type, the quicker results will be produced. The quicker they forget it, the better it will be for them. We are not even harsh enough to say that we won't forgive and forget. It has been a hard crown they have put upon us. We haven't had the millions that they have had, or the hundreds of thousands of dollars to spend to carry on that kind of a campaign, and if we had it, we wouldn't do it, because we would not be justified in using the members' money for that kind of a campaign.

* * * * *

Now, they have to live with us and we have to live with them. We are not going to call them dirty names, but they have got to quit calling us dirty names. That policy has got to stop. They are not going to get anywhere with us unless they do. When I say we won't, yes, we will settle with the industry; we will settle even with the members of the National Association of Broadcasters, but we won't be able to deal with them as an association. We regret it.

They have a right to be an association as much as we have. They are nothing more than an employer of the union, and they have a right to be an employer of the union. They have a right to have their lawyers and their presidents and their officers, just as we have, and the right to express themselves. But, they ought to do it with due courtesy and due respect for a man. The president of this organization, Mr. Petrillo, after all, is doing nothing more than what he is paid to do, what he is asked to do, what the members have commanded him to do, and doing it in the best means he knows how.

Now, involuntary servitude, we realize, could not be imposed. We will work. We will be glad to work. We will be reasonable, but it must be on the basis of a fair approach and fair dealing, and not on the basis of prejudice, insult and calumny.

* * * * *

Senator Clark. I think I can also give you reasonable assurance that no further hearings will be commenced for at least a week or ten days, and probably more than that; maybe two weeks.

Mr. Padway. I wish you would. I wish you could let it go until after February 1st.

National Association of Broadcasters

1760 N STREET, N. W. ★ ★ ★ ★ ★ ★ ★ WASHINGTON, D. C.

February 19, 1943 SPECIAL A. F. of M. BULLETIN No. 16

THE PETRILLO PROPOSALS

On February 11, Mr. Petrillo sent to the major phonograph record companies and to some of the companies engaged in making electrical transcriptions a set of proposals, which, together with the communication which he sent to these companies, is printed in full in this issue.

The proposals included no demands on the radio industry. At a press conference which he held on February 12, Mr. Petrillo said, "This memorandum covers the whole situation. We have no fight with radio". Mr. Petrillo's statement that he has no demands to make on the broadcasting industry will be welcomed by broadcasters who remember:

(1) Mr. Petrillo's original statements quoted in the trade papers and daily newspapers in July and August to the effect that he wanted the recording companies "to find a way to keep the records out of radio stations", and that "it is up to the recording companies to see to it that the records do not get to the stations".

(2) The statements of Mr. Petrillo and his counsel before the Senate Committee which were devoted very largely to claims against radio, including the assertion that broadcasting stations had caused unemployment and should employ many thousands more musicians than they are now doing.

(3) Mr. Padway's arguments before the Federal Court asserting that the union had a controversy with broadcasting stations that could employ musicians, and suggesting that 20,000 to 60,000 more musicians should be employed.

Mr. Petrillo's proposals include one directed to "juke boxes", but Mr. Petrillo stated at his press conference that he had not yet decided how this demand could be enforced or made workable. No representative of the "juke box" industry attended the meeting with Mr. Petrillo.

Representatives of phonograph record and transcription companies had one meeting with Mr. Petrillo and his Executive Board on February 15 and since then have had several meetings among themselves. The latter meetings were so protracted that it was found necessary to postpone to a date not yet fixed further discussions with Mr. Petrillo.

Mr. Petrillo himself stated at his press conference that his demands were entirely new and of a type never before made by a labor union. He stated at the meeting on February 15 that he would not state his dollar demands until the recording industries accepted his basic principle, namely, the making of a contribution directly by them to the union for the purpose of enabling the union to relieve unemployment, to increase cultural interest in music, to give free concerts, etc.

The complexities confronting the record and transcription companies include:

(1) The unsound public policy involved in the acceptance by any industry of an obligation to persons whom that industry does not employ, has never employed and with whom it has no relation.

(2) The unsound public policy involved in permitting any organization to levy taxes upon employers and the public for unemployment purposes instead of leaving such taxing power to the government.

(3) The problem of whether the payment of such a sum would be regarded as an evasion of wage stabilization regulations, since, under the precedent which would be created by the acceptance of the demands, any labor leader could, instead of asking for increased pay for the members of his union, ask for an equivalent amount to be paid directly to the union itself.

(4) The problems relating to income tax and other liability on any industry which made such a payment, especially since the labor union itself would be exempt from taxation on the amounts received.

(5) The conflict between the acceptance of such a principle and the desire of the War Manpower

(Continued on page 2)

THE PETRILLO PROPOSALS

(Continued from page 1)

Commission to draw all citizens not engaged in necessary work into war industry.

(6) The conflict with the anti-inflationary policies of the Office of Price Administration, which has frozen the cost of products and services at the prices charged during March 1942.

(7) The precedents which would be established with respect to other labor unions representing singers, announcers, actors, engineers, etc.

(8) Conflict with the National Labor Relations Act which forbids direct contribution by employers to unions.

(9) The problems involved in the admission, implicit in the acceptance of such a principle, that Mr. Petrillo has a genuine grievance or any real unemployment problem.

The record and transcription manufacturers are having meetings among themselves as this issue of the Bulletin goes to press, and broadcasters will be advised of further developments as information becomes available.

Another development in the situation came on February 15 when the United States Supreme Court, without opinion and without hearing argument, denied the petition of the government to review Judge Barnes' decision in the first of the government's anti-trust suits against the American Federation of Musicians. On Wednesday, however, Judge Barnes refused to grant an A. F. of M. motion to dismiss an amended complaint and gave the union 20 days to answer it. Judge Barnes' memorandum appears in this issue.

Mr. Petrillo's demands upon the recording companies apply to all records made by members of his union. Stations which purchase and use phonograph records would, therefore, be in the same position as the public with respect to phonograph records.

So far as the transcription companies are concerned, Mr. Petrillo acknowledges that no charge should be made on commercial transcriptions which are played only once, but he will not remove his ban on such transcriptions unless transcription companies accede to all his demands. He seeks from the transcription companies a percentage of the rental on library transcriptions. If his demands were acceded to, it is conceivable that the broadcasting industry might be faced with increased cost of library services.

Editorials from the "New York Times" and the "New York Herald-Tribune" are reprinted in this bulletin.

Judge Barnes Memorandum

This cause comes on to be heard on the motion of the defendants to dismiss.

The complaint herein is substantially the same as the complaint in *United States vs. American Federation of Musicians et al.* Decided by this court October 12, 1942 (57 F. Supp. 304) with the following changes, additions and subtractions:

Section 14 of the earlier complaint has been changed by the insertion of a new clause as the second clause of the section, and by the addition of a new paragraph at the end of the section, so that the first two clauses of the section read as follows:

"14. That for the purpose of restraining and destroying all interstate commerce in phonograph records and electrical transcriptions; of destroying entirely independent radio stations depending upon phonograph records or electrical transcriptions for their musical requirements;"

And so that the last paragraph of the section reads as follows:

"(1) To eliminate from the air independent radio stations which depend largely or entirely upon phonograph records or electrical transcriptions for their musical requirements, since no live musicians are available;"

Section 16 of the earlier complaint has been omitted from the new complaint.

Section 17 of the earlier complaint became section 16 of the new complaint, and has been changed to read as follows:

"16. That the effect of the activities hereinbefore described is to destroy independent radio stations which depend upon transcribed music for their musical requirements because no live musicians are available; to destroy completely competing businesses such as manufacturers, jobbers, and retailers of phonograph records and electrical transcriptions, as well as manufacturers, distributors and operators of 'juke boxes'; and of denying to amateurs the right to the air forum for artistic expression."

The prayer of the earlier complaint for a preliminary and a final injunction enjoining the defendants from entering any conspiracy to do certain acts and things, has had added to it, in the new complaint as a last paragraph, the following:

"(1) To eliminate from the air independent radio stations which depend largely or entirely upon phonograph records or electrical transcriptions for their musical requirements;"

The defendants assign three reasons for a dismissal:

(1) The court lacks jurisdiction by reason of the Norris-LaGuardia Act (47 Sta. 70), since the complaint sets forth a case involving or growing out of a labor dispute; (2) The complaint fails to state a claim against the defendants upon which relief can be granted; and (3) The issues presented have all been decided by the court in the earlier case, above referred to.

The defendants, in their arguments in support of their motion to dismiss, make the following points:

(a) The complaint sets forth a controversy involving a labor dispute within the meaning of the Norris-LaGuardia Act, which act precludes the court from granting the relief sought, even assuming that a violation of the Sherman Anti-Trust Act has been alleged;

(b) No violation of the Sherman Act is alleged because the acts complained of are included in the conduct specified in section 20 of the Clayton Act, and, as such, do not violate any law of the United States;

(c) The decision of this court in *United States* vs. *American Federation of Musicians et al*, decided October 12, 1942, is *res adjudicata;*

(d) The defense of *res adjudicata* may be raised by motion to dismiss;

(e) The complaint at bar adds no relevant fact that was not alleged in the earlier complaint, and raises no legal issue that was not raised by the earlier complaint;

(f) The complaint in the earlier case alleged a purpose on the part of defendants to destroy independent radio stations;

(g) Assuming that the allegation of a purpose to destroy independent radio stations is new, nevertheless, it cannot be disassociated from the rest of the complaint and treated as a separate isolated allegation;

(h) If the allegation of defendants' purpose to destroy independent radio stations is treated separately, the court can grant no adequate relief without reversing its judgment in the earlier case;

(i) Even if the allegation of a purpose on the part of defendants to destroy independent radio stations is new and can be isolated from the rest of the complaint, nevertheless, the complaint at bar does not state a violation of the Sherman Act.

The United States, in its argument against the motion to dismiss, in addition to the points made in the earlier case, makes the following points:

(a) Paragraph 14 of the complaint at bar alleges that it is a specific purpose of defendants "to destroy entirely independent radio stations depending upon phonograph records or electrical transcriptions for their musical requirements"; the situation alleged in the complaint at bar is not one wherein small stations are destroyed as a mere incident of achieving another purpose which is legitimate: on the contrary, destruction of such small stations is alleged to be a specific purpose of the defendants.

(b) Paragraph 16 of the complaint at bar alleges that one of the effects of the conspiracy charged will be to drive the independent radio stations out of business.

(c) The complaint at bar specifically prays that the defendants be enjoined from conspiring to achieve the result lastly above referred to.

(d) The complaint at bar raises issues not ruled upon by the court in the earlier case.

(e) The decision in the earlier case is not *res adjudicata.*

(f) The defense of *res adjudicata* cannot be raised by motion.

(g) The new allegation of purpose is only one of four purposes. Since all four purposes are supported by the same elements or means, and since the new purpose is part of a broader plan, it cannot be disassociated from the rest of the complaint and treated as a separate isolated allegation. The new allegation of purpose may make unlawful a plan which the court declared lawful in the earlier case.

Counsel on both sides of the case have indicated to the court their desire that the court dispose of the case on this motion, so that they may speedily take the case to the reviewing courts. The court would be glad to do this but for one consideration, which will hereafter be referred to.

The court is inclined to the view that the complaint at bar raises issues neither raised nor ruled upon in the earlier case.

It may be true, as the defendants substantially contend, that, even if the allegation of a purpose on the part of defendants to destroy independent radio stations is new, nevertheless, the complaint at bar does not state a violation of the Sherman Act.

But for the consideration above referred to, the court would definitely decide these two issues (neither is decided) and permit the losing side to take the case up.

The consideration which the court has now referred to twice is this,—it is not satisfied that the issues of law, which will be made by the evidence when it comes in, will be the same as the issues of law made by the motion to dismiss. In other words, the court is inclined to think that, by ruling on the pending motion and making possible an immediate appeal, it would be sending to the reviewing courts issues which will probably not be in the case after a hearing on the merits.

The court has, accordingly, decided to defer the ruling on the motion to the trial on the merits, which will be granted promptly. The court has this day rendered an order deferring the ruling on the defendants' motion to dismiss to the trial on the merits, and ruling the defendants to answer the complaint within 20 days from this date.

(SIGNED) BARNES, Judge.

February 17, 1943.

Petrillo Proposals

February 11, 1943.

Gentlemen:

Enclosed is a copy of the proposals of the American Federation of Musicians for settlement of the controversy with various branches of the music industry.

We invite you to meet with the Executive Board of the American Federation of Musicians, Monday, February 15th, for the purpose of negotiating respecting these proposals.

The meeting will be held at the offices of the Federation, 1450 Broadway, New York City, at two P. M.

Very truly yours,

JAMES C. PETRILLO.

It is a matter of common knowledge based upon years of experience that the accomplished musician becomes such only after many years of study and training, which study and training he must continue uninterruptedly thereafter in order to maintain the technique necessary for the accomplished musician. He is therefore required for that purpose, to maintain his standard and technique, which of necessity are lost by suspending the period of study and training or by devoting any time to any other field or industry.

It is also a matter of common knowledge that practically none of the symphony orchestras composed of accomplished musicians are self-sustaining and in the past have depended upon voluntary contributions and subsidies, which, because of other current conditions and obligations are continually becoming less and less, thus threatening even the continuance of symphonic and other recognized activities of orchestras necessary for the maintenance of musical culture.

The problem of technological unemployment caused by "canned" music has been with us for many years, resulting in recognized decrease in employment of musicians and their displacement by "canned" music in such places as theatres, hotels, restaurants, dance halls, musical halls and many others of like nature.

The inroads upon employment of musicians by such "canned" music have been ever-increasing with no abatement at any time and no evidence of any abatement, but rather continual increase for the future. Experience has also shown that in the employment of members, preference is always given to the younger musicians, thus making the unemployment situation aggravated for those men who have devoted years in acquiring their talent and skill and who are no longer in a position if they were inclined, to become part of or train for any other field of endeavor. This has resulted in the employment exchanges of the different locals of the Federation being continually filled to overflowing by musicians looking for employment opportunities, many of which were taken away and displaced by "canned" music. Continuance of this situation must of necessity destroy the incentive for the study of music and eventually would destroy the entire music industry and music culture. Therefore, it becomes necessary for the preservation and maintenance of music culture and to alleviate the unemployment situation that means be created for the continued dissemination of music and maintenance of musical culture by employing musicians and furnishing music gratis throughout the United States and Canada, including localities which have not the means financially to provide the advantages of current live music by the use of such fund created for that purpose. Symphony orchestras, bands and other instrumental combinations would be employed and used to furnish live music throughout the United States and Canada for all classes and all communities.

PROPOSALS

A fund shall be created by the payment of a fixed fee to be agreed upon, for each reproduction of records, transcriptions, mechanical devices, and library service, the master of which was made by members of the American Federation of Musicians. This fund shall be used by the Federation for the purposes of reducing unemployment which has been created in the main by the use of the above mentioned mechanical devices, and for fostering and maintaining musical talent and culture and music appreciation; and for furnishing free, live music to the public by means of symphony orchestras, bands and other instrumental musical combinations.

Canned music includes among other things the following branches of the music industry:

1. Records
2. Transcriptions
3. Library Service
4. Wired Music
5. Juke Boxes
   - (a) Common juke box
   - (b) Telephone Music Box
     (Patron through telephone device chooses selection)
   - (c) Soundies
     (Music box with picture accompaniment)

RECORINGS: The Federation shall receive from the manufacturer of recordings a fixed fee for each side of musical recordings made by members of the American Federation of Musicians, such fee to be agreed upon by negotiation.

TRANSCRIPTIONS AND LIBRARY SERVICE OF TRANSCRIPTIONS: Members of the Federation will make commercial or sustaining transcriptions without additional fee to the Federation providing they are played one time only. (The number of copies made of transcriptions to be determined by agreement.) With respect to other transcriptions used on a rental basis, the Federation shall receive from the company engaged in the business of renting-out transcriptions a percentage of the rental charge, such percentage to be agreed upon by negotiation.

WIRED MUSIC: The Federation shall receive from the company engaged in the business of selling wired music a percentage of the price charged, such percentage to be agreed upon by negotiation.

JUKE BOXES: The Federation shall receive annually for each juke box used, a fixed fee, such fee to be agreed upon by negotiation.

Editorial Comment

(*N. Y. Times, Feb.* 16)

Mr. Petrillo's New Demands

Mr. Petrillo is distinguished from his fellow labor leaders by greater audacity and imagination. He realizes clearly the enormous powers of private dictatorship that the present state of the law, the beneficent attitude of the Administration, and the timorousness and vacillation of Congress have placed in his hands.

He has now put forward the demand that the operators of juke boxes, the companies that send music over the wires, the makers of phonograph records and the great radio companies pay a monetary tribute directly to his union for the privilege of doing business. All he asks is a cut-in on every record and every phonograph sold. These fees will be paid into the union treasury. The money will be used, according to Mr. Petrillo, to reduce unemployment, to subsidize symphony orchestras and "to foster and maintain musical talent and culture and musical appreciation."

What Mr. Petrillo is proposing, in brief, is that the recording companies—which must ultimately mean the public that pays for the records—must submit to a private tax so that he can set up his own private system of unemployment relief. What he is proposing is that the members of his own union must submit to a private income tax—in the form of that part of their fees which would, in effect, go to the union instead of to themselves—in order to support this private system of unemployment relief. What he is proposing is that, at a time when war demands have made the shortage of manpower more acute than ever, he shall have the power of levying private tribute in order to create unnecessary jobs for men and women as musicians.

Mr. Petrillo no doubt looks at these matters from so disinterested a standpoint that he has not considered what abuses might develop if this device were also adopted by other unions less single-mindedly devoted to the public weal than his. These unions could insist that every employer pay a special fee to them for the privilege of employing a member of their union. These unions could make themselves rich beyond the dreams of avarice. In one or two cases, no doubt, they might even be tempted to increase the salaries and other emoluments of their officials. For, as Mr. Petrillo knows, nothing but his own high conscience would prevent him from using these enormous fees in ways that did not directly promote the public welfare. There is no law which forces unions to make an accounting of their funds or even to publish financial statements. And though the Wagner Act forces employers to recognize unions, it contains not a word which compels these unions to be in any way responsible.

Mr. Petrillo, in short, can lay down the law to the phonograph companies, the recording companies, the radio companies, and to the members of his own union; but nobody can lay down the law to Mr. Petrillo. The Supreme Court emphasized this fact yesterday by affirming the Chicago Federal court ruling that the Government could not prosecute the American Federation of Musicians under the anti-trust laws because it will not permit new records to be made for juke box and radio reproduction.

As long as Congress acquiesces in the Supreme Court's decision that labor unions enjoy sweeping immunity from the anti-trust acts and from the Federal anti-racketeering act; as long as Congress forces employers to recognize and deal with unions, but does nothing whatever to compel these unions to conduct their affairs democratically or responsibly; as long as Congress retains a law which forces an individual to join a union, whether he wants to or not, because his source of livelihood would otherwise be cut off by boycott of himself or his employer, or by other means—as long as Congress tolerates all this, we shall continue to have private dictators like Petrillo; and they will continue to find further means for enriching their treasuries and extending their powers.

(*N. Y. Times, Feb.* 17)

Why Mr. Petrillo Rules

James Caesar Petrillo has the power to force practically every musician in the country to join his union. He has the power to tell these musicians when and how and whether or not they can make recordings. He has the private arbitrary power to tell the American people what music they can and cannot hear. This has just been confirmed by a decision of the highest court in the land. The Administration must be perfectly satisfied with this condition of affairs, as it has never proposed any revision in the law to change it. Congress must acquiesce in this arrangement, because it has never passed, nor is it now considering, any law to end it.

(*N. Y. Herald Tribune, Feb.* 14)

"Something Absolutely New"

Mr. James Caesar Petrillo, worming his way through the complexities of his battle with mechanical music, has turned up with "something absolutely new." It is not precisely a penalty upon producers of mechanical music in order to find work for Mr. Petrillo's unemployed. Nor is it a change from a flat fee basis of payment for recordings and transcriptions to a royalty system. In fact, it has nothing to do with relations between employer and employed. It is simply a tax, levied by the American Federation of Musicians, to be expended for purposes which Mr. Petrillo believes desirable.

This is, indeed, something absolutely new. James Caesar evolved it in response to a curt request from

Congressional leaders that he produce some concrete statement of the union's desires in the long-drawn-out conflict over recordings and transcriptions. No one expected that Mr. Petrillo would pop up with a super-checkoff. Some have indeed accused the union head of attempting to set up a "private W. P. A." but Mr. Petrillo is following the pattern of government far more closely than any one could have realized. He proposes to collect his taxes and then reduce unemployment among union members by "furnishing free, 'live' music to the public by means of symphony orchestras, bands and other instrumental musical combinations."

Obviously Mr. Petrillo's scheme is inadmissible. The principle of the fees he proposes to collect would set a most injurious precedent, even if the organization collecting them were impeccable and the safeguards over disbursements absolutely perfect. When it is James Caesar Petrillo, the dictatorial, who suggests such a scheme; when the public control over the financial operations of unions and the union control over their leadership is so slight, the whole thing becomes ridiculous. Mr. Petrillo must find another solution for his problem and find it speedily. The country is in no mood for further impertinences.

National Association of Broadcasters

1760 N STREET, N. W. ★ ★ ★ ★ ★ ★ ★ WASHINGTON, D. C.

March 5, 1943 **SPECIAL A. F. of M. BULLETIN** No. 17

A. F. M. Board To Meet

James C. Petrillo, president of the American Federation of Musicians, has advised the recording companies that his executive board will meet March 16 in Chicago to draft an answer to the recording companies' reply to the A. F. of M. "demands."

Here is the text of the recording companies' reply which Mr. Petrillo referred to:

New York, February 23, 1943.

Mr. James C. Petrillo, President,
American Federation of Musicians
1450 Broadway
New York, N. Y.

Dear Mr. Petrillo:

After meeting with you on February 15th, the undersigned companies engaged in various phases of the recording and transcription business met to consider the proposals which you had distributed on February 12th. Considerable time has been spent by us in an effort to find a response which would result in your permitting the re-employment of your members. Any such response must be viewed in relation to these prior facts:

On June 25, 1942, without previous notice or demands, you announced that you would not allow any of your musicians to perform for recordings after July 31st. This meant a complete cessation of recording because we had been operating under a license from you which imposed on us a "closed shop" for your union. Under this license, we had been paying your members at rates which are among the highest for skilled service in any industry. In addition substantial royalties for each phonograph record manufactured and sold have been paid to the musicians or orchestras who made them. Although hours and other working conditions were beyond criticism, you nevertheless called a strike, without previous notice or demands.

While you allege wholesale unemployment of your members (a claim we deny), you have continued this strike and the resulting unemployment for a period of almost seven months, to date. In doing so, you disregarded pleas of Elmer Davis of the O.W.I. on behalf of both military and civil officials, that the strike was harmful to the War effort. During those seven months you at no time offered to return your members to work or even to state the conditions upon which you would do so. This continued until a Senate Committee under the Chairmanship of Senator D. Worth Clark of Idaho insisted that you make some proposal. Even now your proposal is a proposal in form only.

You propose that the recording companies pay an additional sum directly to the union over and above their payments to the musicians employed. You further propose that this sum be accumulated or disbursed in the union's uncontrolled discretion *for the benefit of union members who render no service whatsoever to the recording companies.* The destructive and dangerous fallacy of your proposal is that it assumes that a specific industry owes a special obligation to persons not employed by it,—an obligation based only on such persons' membership in a union. In addition to the inherent unsoundness of such a proposal, the following objections are at once apparent:

(a) *Obstructs Technical Progress*

We are alarmed at the damage which might be done to the whole field of technical and technological improvement if the manufacturer of any new device, of proven value to the people as a whole, were to be saddled with the costs of special industry unemployment relief in addition to the already heavy costs of pioneering research and development, and subsequent promotion.

(b) *Subsidizes Non-Employees*

We do not believe that our companies, who before your ban were employing the maximum number of musicians at the highest wages in the history of the music industry, should be asked to assume responsibility for unemployment, even if such unemployment exists, of such of your union members who are not and cannot be employed by us.

(c) *Penalizes Employment and Use*

We cannot approve a proposal which imposes a private tax upon every phonograph record manufactured and sold when it is obvious that the records used in the home, far from creating unemployment, have been the source of much profitable employment to your members. This

(Continued on page 2)

A. F. M. BOARD TO MEET

(Continued from page 1)

has been publicly and officially proclaimed on more than one occasion at your own union's conventions. Such records used in the home constitute at least eighty percent of the total phonograph record output, and thus, under your proposal, eighty percent of your tax would ultimately fall squarely on the public which buys records for home use and is in no way responsible for whatever unemployment you may claim exists.

(d) *Duplicates Government Relief*

The Government has provided taxes for unemployment relief. A second tax for a new private system aimed at the same relief seems wholly unjustified. Similar proposals could, with no more excuse, be made by singers, engineers and others contributing to the high quality of our products. Any such private and isolated system of unemployment relief within an industry is not only contrary to public policy but would be in direct conflict with the various plans under discussion in Government circles for the expansion of uniform and nation-wide social security measures. No private and limited scheme for the benefit of a few within an industry can be pyramided on top of Federal and State social security plans without creating serious inequities. Certainly mere membership in a union should not entitle a member to special privileges from an industry which does not employ him but happens to employ some of his fellow members.

We recognize that because a social philosophy is new it is not necessarily wrong. What you have proposed is a startling new kind of social philosophy for both industry and labor. While we believe that it is wholly wrong in principle, we doubt that either a single union or a single industry is qualified to be the final judge. Only the people of the United States are qualified to decide whether multiple systems of unemployment relief administered by a variety of private as well as governmental agencies shall now be created. Authority for the application of such basically new social theory should therefore come from the people's representatives in the Congress. Such sanction would necessarily be accompanied by rules and regulations defining the limits, requirements and approved objectives of such union relief funds, and subjecting the union and its administration of such funds to Governmental control and supervision. As in the case of pension and retirement plans created by corporations for the benefit of their employees, the Treasury Department would unquestionably desire to participate in such regulation and supervision.

This is not rhetoric but plain statement of fact because only the Congress should be called upon to answer such fundamental questions as the following:

(a) Would not such a payment directly to a union offer an easy means of evading the "wage freeze" regulations; or, on the other hand, would it not be deemed an indirect increase in compensation to the members employed and, as such, in violation of the regulations?

(b) If, on the other hand, it were ultimately determined that the additional payment directly to the Federation were not additional compensation, direct or indirect, to the employees, would not such a payment be merely a gratuity, and therefore a waste of a company's assets which would subject the company's management to liability under the law?

(c) Would not your proposal be in violation of Section 8 of the National Labor Relations Act which provides that it shall be an unfair labor practice for an employer to "contribute financial or other support" to any labor organization?

(d) What would the Treasury think of your proposal if it resulted in diverting taxable income in the hands of the employer to non-taxable receipts in the hands of your union?

(e) If on the other hand the Treasury Department refused to allow such payments as a deductible expense of the employer, would not the employer be compelled to pay not only the contribution to your fund but also an income tax on the amount of that contribution?

(f) Would not any plan for creating artificial employment for unemployed members of the Federation be contrary to the policy of the Manpower Commission, which is seeking to draw into War industries at least those persons not presently employed?

(g) Would not such a payment as you propose subject both you and us to the charge of a conspiracy to maintain or to increase prices,—and a resulting prosecution by the Government or civil suit by an injured consumer.

Only if you procure Congressional authority for the creation of a fund in accordance with your proposal could such a proposal become operative without raising many presently unanswerable questions.

Pending such Congressional authority for a plan which you yourself have termed "absolutely new", we suggest that you permit your members to return to work immediately and produce phonograph records and transcriptions which are sorely needed for both civilian and military morale.

You know of course, that we stand ready to meet with you at all reasonable times when you have anything further to submit. We want you also to know that the views expressed represent our individual as well as our joint decisions.

Very truly yours,

March 26, 1943 SPECIAL A. F. of M. BULLETIN No. 18

Petrillo Developments

This week's Bulletin contains a letter sent by Mr. Petrillo to members of the recording industry on March 17 and a telegram which members of the recording industry sent to Mr. Petrillo in reply on March 19. Mr. Petrillo's letter charged bad faith on the part of the recording industry, and emphasized the fact that he was seeking compensation from the recording industry not on behalf of persons who are, were or might be employed therein, but for persons who, in his view, have been "displaced" because the phonograph was invented. The recording industry's reply invited Mr. Petrillo to meet with members of the industry in New York on March 24, for the limited purpose of discussing wages, hours and working conditions of the persons actually employed in recording. Mr. Petrillo's answer to this invitation, made by telephone, was a suggestion that representatives of the recording industry should meet with him in Boston on April 12. Neither the American Federation of Musicians nor Mr. Petrillo, nor any recording company which extended the invitation has offices in Boston. The recording industry rejected the idea of meeting at this inconvenient place at so distant a date. Mr. Petrillo's rejoinder was a suggestion that a meeting be held in New York on April 15, three weeks from now. As yet the recording industry has not replied to this most recent suggestion on Mr. Petrillo's part. Also included in this Bulletin are a few of the recent editorials and news items which have appeared in the press concerning Mr. Petrillo's activities.

A. F. of M. Letter to Recording Companies

The A. F. of M. Executive Board, at its Chicago meeting, sent the following letter to the recording companies, dated March 17:

"Gentlemen: The Executive Board of the American Federation of Musicians met to consider your answer to its proposals submitted to you. The members of the Board cannot escape the conclusion that you have failed to consider these proposals in good faith. No other conclusion can be deduced from the many specious arguments presented by you. In short, you have failed to measure up to the test of good faith collective bargaining which requires submission of counter proposals.

"Your letter contains many incorrect assumptions and many misstatements of fact. You incorrectly assume that our proposal is founded on a claim that there is an obligation in any industry to persons belonging to a given union. To begin with, we are dealing with a particular kind of industry, namely, one that has been built up exclusively by a mechanical invention that displaces human labor. In the second place, we are dealing with workers who are not employed in their craft precisely because of the creation, development and expansion of such an industry. We say simply that all those who benefit from the displacement of human labor should share the burden of the cost to the displaced workers. These workers are entitled to relief not because they happened to be members of a union but solely because they happened to be victimized by the same things which benefited others. Their membership in the union does not give them the right, it merely provides for them the means whereby they seek to enforce that elemental right. This *(Continued on page 2)*

A. F. OF M. LETTER TO RECORDING COMPANIES

(Continued from page 1)

principle is recognized by many outstanding economists, among them Dr. Isadore Lubin, U. S. Labor Commissioner, and Professor Sumner Schichter of the Harvard School of Public Administration.

"You state that the proposal is unjustified because it duplicates government relief. The plain fact remains that the many musicians who have been put out of work by canned music are not presently eligible for government relief, and such relief as is accorded under present government plans is wholly inadequate.

"You state further that the proposal we have submitted is one that can only properly come from the 'people of the United States' through the people's representatives in the Congress, and then you say that only Congress should answer certain stated questions. We refuse to accept the suggestion that the time has been reached when any constructive advance in our social devices must be initiated by the government. That suggestion is wholly foreign to our ideals and certainly is completely at odds with history.

"It is an axiomatic historical principle that legislation is never created in a vacuum, but is merely the culmination of the acquired experience of private individuals and private groups, and in labor relations through the process of collective bargaining. It will be a sorry day indeed when and if changes and advances in our social patterns must await governmental initiative and action.

"We are advised by our counsel that a payment directly to the union would not constitute an evasion of the 'wage freeze' regulations. Nor would it constitute a violation of the National Labor Relations Act, whose main objective is encouragement of collective bargaining.

"We are satisfied that the Treasury would not and could not prevent the diversion of this money to the unemployment relief fund contemplated in our proposal, any more so than pensions, insurance, medication or health plans for workers and their families in private industry. The acceptance of our proposal would in no manner contravene the policy of the Manpower Commission. It is unthinkable that anyone of our unemployed members would prefer whatever benefits would flow from the acceptance of our proposal to a job required of him by his government in times of war. Nor is it thinkable that the union would grant to any such person any of the benefits contemplated by our proposal. We are further advised that our proposal does not violate the anti-trust laws. The mere fact that collective bargaining does or may result in an increased price never had been considered a violation of any law.

"There is ample justification in the practices of business itself for the union proposal. Business men customarily set aside funds for depreciation of machinery and equipment, depletion of natural resources, and for obsolescence. All these funds are considered legal charges against the cost of production.

"Especially applicable is the obsolescence fund which compensates the business for the untimely displacement of machinery or equipment, as the result of the introduction of new methods, new machinery and new equipment. The philosophy behind insuring the worker against industrial hazards by funds that would be charged against the cost of production is by no means novel. Under the old judicial precepts of 'assumption of risk,' 'fellow servant,' and 'contributory negligence,' the worker used to bear the full cost of industrial accidents.

"These harsh rules were replaced by more humane doctrines, and now workmen are insured against industrial accidents by workmen's compensation funds which are added to the cost of production and thus spread among all who benefit from the production.

"The same principle lies behind our social security laws in both the funds for payment of unemployment compensation and old age benefits.

"Your suggestion that the American Federation of Musicians permit its members to return to work immediately and produce phonograph records and transcriptions, particularly in view of your failure to make or contribute a single constructive suggestion towards a settlement of this dispute, is as arbitrary as it is audacious. If any of your concerns engaged in this industry was producing a product that was slowly but surely putting you out of business, you would not continue to produce that product, and actuated by the same motives, the members of the American Federation of Musicians will not continue to make a product that is slowly and surely putting them out of jobs.

"There is nothing further we can present until you are prepared to submit in good faith constructive proposals for the solution of this tragic problem."

The letter was signed "The Executive Board, American Federation of Musicians, James C. Petrillo, President."

THE RECORDING COMPANIES' REPLY

The following is a telegram dated March 19 addressed to Mr. Petrillo from the recording industry:

> "In your reply of March 17 to our letter of February 23, you complained that we have failed to measure up to the test of good faith collective bargaining. That complaint is unjustified, since it was you who terminated all prior arrangements without previous complaints or demands. Individually and collectively we have always been and continue to be ready to confer and bargain with you on the question of wages, hours and working conditions which, under both the National Labor Relations Act and universal practice, are the appropriate subjects for collective bargaining, and to enter into a written agreement for a definite term which will provide for the immediate resumption of recording. As tangible evidence of our good faith, we now invite you to meet with us for such purpose at the Hotel Ambassador in New York on Wednesday, March 24th, at 2:30 P. M. Please reply by telegram to Mr. Lawrence Morris, c/o of RCA Victor, Camden, New Jersey."

Editorial Comment

PETRILLO'S ARM IN FLORIDA

Interesting editorial report by The Miami Herald of March 18:

The Kiwanis Club of Delray Beach has felt the long arm of Music Czar James Petrillo. The club has been sponsoring USO dances Saturday nights for service men stationed at Boca Raton Field.

The good folks of Delray Beach did not reckon with Czar Petrillo's brand of patriotism and the stranglehold he has on Washington. Following complaints by the musicians' union, the Adjutant General's Office at Washington ordered the proper Army officials at Boca Raton to stop service men from playing for the weekly dances.

Delray Beach has no professional music organization. The soldiers were not competing with the union. They were playing for service men and their partners only. So to satisfy Petrillo there won't be any more Saturday night hops for the boys. You can't dance without music. The Kiwanis Club has protested to Washington. They'll get a nice letter of acknowledgment. But Jimmy Petrillo will prevail and the armed services be hanged. Who are they, anyway? Sure, it's awful, un-American and cowardly ingratitude to American boys prepared to die for Czar Petrillo and his ilk.

—*New York Times,* 3-24.

"C FOR CAESAR"

James C. (for Caesar) Petrillo did pretty well by himself yesterday. He vanquished the army and navy in the same day.

An army band from Gilroy agreed to play for a dance at San Jose State College. Petrillo wrote a letter to Washington. The band will not play and the kids will dance to phonograph records.

The navy planned to use a naval band at a reception in Chicago in honor of Maj. Gen. Alexander A. Vandegrift, hero of the marine corps forces which stormed Guadalcanal. Petrillo wrote a letter. The navy band did not play.

There are not many men in the world who could push the American army and navy around in the same day and get away with it. Perhaps we ought to put Petrillo in charge of our war with the axis.

In the great mass of cases you can't blame Petrillo for getting all the work he can for his union. However, it seems a little harsh to block the use of a navy band at a reception for the hero of Guadalcanal. Likewise the thing which gripes you about his blacklisting of the college is the utter wrongness of his position and the fact that he is upholding what amounted to a steal. The students say Paul Pendarvis, whom Petrillo upholds, ran in a substitute band instead of his own and did not himself appear until the dance was practically over.

—*San Jose (Calif.) News,* 2-19.

A DANGEROUS PHILOSOPHY

The continuing argument between James Petrillo, czar of the union musicians, and the recording companies brings out a dangerous philosophy set forth by Petrillo.

One of his proposals is that the recording companies pay an additional sum, over and above the salaries of musicians employed by them, directly to the union. This sum would be disbursed by the union at its own discretion for the benefit of union members who render no service whatsoever to the recording companies. Petrillo's plan assumes that an industry owes an obligation to persons not employed by it, simply because they belong to a certain union.

This "second tax" for unemployment relief would set up a system which would not be wrong simply because it was a new social philosophy, but because of its ultimate conflicts and widespread inequities. It is a dangerous philosophy for the union, for business and the public.

—*Tucson Star,* 3-13.

RECORD MAKERS RIGHTLY REJECT PETRILLO SCHEME

James Petrillo, the $46,000 a year czar of the musicians' union, recently offered to rescind his ukase on recorded music—provided the manufacturers paid him a price.

And what a price!

It was to the effect that on every record or transcription made, in addition to paying the musicians employed their full time wages, the manufacturers should donate a specified sum to his treasury.

This sum was to be absolutely under Petrillo's control, although ostensibly for the benefit of unemployed musicians, even though those might be hundreds and thousands of miles away from the place where the records were made.

Such a proposal in others days would have been called blackmail by some, extortion by others.

But autocrats, whether of the pinfeather or the full blown variety, all have this in common:

They thoroughly believe in their divine right to exploit the rest of the human race.

The manufacturers of records, however, did have the backbone to reject so preposterous a proposal.

When has any industry been expected to furnish unemployment relief for persons who never have been and never will be on its payroll?

Further, such an agreement probably would run afoul of the anti trust law so far as the manufacturers are concerned.

So the making of much needed records has become subject to further postponement.

And the wonder grows if this is the land of the free after all.

—*Modesto (Calif.) Bee,* 3-10.

PETRILLO'S WORK RELIEF

Having been in the untenable position of striking for six months without stating his demands, James C. Petrillo now comes forth with a questionable plan under which members of the American Federation of Musicians may again make records.

The plan, which Mr. Petrillo somewhat naively insists is legal because unprecedented, simply provides that recording companies, juke box operators, and others engaged in various departments of the recording industry, pay a stipulated fee, the amount to be arrived at by negotiation, to Mr. Petrillo's union. The Union, in turn, will operate a sort of super WPA, giving work relief to members unemployed presumably because of the general substitution of loud speakers for live musicians.

This is a novel proposal. While one's sympathy must be extended to those individuals whose talent, training and experience is affected by the changes that invention has brought to the musical sphere, it is necessary to remark that this circumstance is not unique. Trades and professions have a high rate of obsolescence and change. Progress is inexorable.

While Mr. Petrillo may be entirely within his proper sphere in insisting that society should provide cushions for the shock, his plan for licenses and fees would only seek to support indefinitely an old system of work at the expense of a new. That is unrealistic for the signs of the moment indicate that while the total number of musicians professionally employed may become fewer, the opportunities for the very highly skilled will be greater and vastly more rewarding financially. The trend is away from quantity and toward quality.

Furthermore, the question will inevitably arise whether this Caesar of music has shown marked capacity for administering such a broad social relief program as he has proposed.

—*Christian Science Monitor,* 2-15.

There is no question that records and radio have created far more jobs—even for musicians—than they have destroyed. Yet James C. Petrillo claims that thousands of members of the American Federation of Musicians are unemployed because of "canned" music; and he has demanded, as a condition of his lifting the present ban on recording, that these unemployed members be provided for by means of a fund to be created by payment to the union of a fixed fee for each reproduction of records, transcriptions, mechanical devices, and library service of which the master record was made by members of the American Federation of Musicians. The recording and transcription companies, needless to say, have turned down Mr. Petrillo's proposal. The companies contend, with logic it seems to us, that such an arrangement would put a penalty on technological improvement, duplicate government relief, and probably be found to violate half a dozen laws, including the National Labor Relations Act. The companies maintain, further, that when Petrillo says a large number of his members are unemployed, he can only mean that they are unemployed as musicians, for a great many of them earn their living otherwise; and Petrillo has practically admitted that union membership is open to anyone who *wants* to earn his living as a musician. Thus a man who works in a factory and also plays the cornet can presumably join the A. F. of M. and qualify as one of the unemployed musicians in whose name Petrillo has prevented recording. Petrillo has done a good job in raising the wages and standards of musicians; but when he attempts to enforce his demand by taking a step which affects the public interest as gravely as the ban on recording he is performing a service, not for his members or for "music culture" in the United States, but only for the enemies of labor unions.

—*The Nation,* 3-20.

USO OPERA IS BARRED

Musician Union Opposes Heavy Camp Schedule

Philadelphia, March 18.—The Philadelphia Opera Company today cancelled performances at Fort Meade and Indiantown Gap and tentatively cancelled a third at the New Cumberland Reception Center, charging the American Federation of Musicians had refused to permit orchestra members to participate in the shows without pay.

The company presented Johann Strauss' "The Bat" before an audience of 1,000 soldiers at Fort Dix last night with only a piano accompaniment. Personnel Manager Max Zehr said the union a few hours earlier stopped the musicians from accompanying the show, saying that a precedent might be set.

Zehr said the men themselves were eager to play and had sent a delegation to union headquarters requesting permission.

"It isn't finally settled yet," Zehr said, "and I believe a hearing will be held on the matter in a day or two. I think part of the trouble arises from the fact that some USO shows now giving performances have paid performers."

C. David Hocker, manager and producer of the company, said the orchestra had accompanied the singers to three other posts during the past two weeks and that the musicians were willing to continue donating their services.

"Nine musicians spent three hours arguing unsuccessfully with officials of the musicians' union yesterday," Hocker said. A spokesman for the union said that "it is not that the musicians are not patriotic but the opera company went ahead and scheduled nine successive performances without consulting the union. It put us in the middle."

"Our men have been playing for all kinds of benefits for the military services and we have donated time worth thousands and thousands of dollars," he added.

—*N. Y. Telegraph,* 3-19.

The Associated Press carried the following story under a Fort Dix date-line:

The Philadelphia Opera Company gave a performance for more than 1,000 soldiers at an Army theater last night with only a piano for accompaniment.

At the start of the program, David Hocker, the producer, announced that union officials in Philadelphia had prohibited the musicians of the company from contributing their services.

Mr. Hocker said the orchestra had gone with the company to three other Army posts during the past two weeks, but union officials ruled yesterday that they did not want to set a precedent by permitting the musicians to perform gratis.

As a result, Mr. Hocker added, he had cancelled a tour of several other Army and Navy stations.

In Philadelphia, Frank Liuzzi, president of the musicians' local, refused to comment, but said that he might have something to say about it later.

The authorities at Fort George G. Meade, Md., said that the opera company had cancelled a performance scheduled there Sunday.

July 15, 1943 SPECIAL A. F. of M. BULLETIN No. 19

Petrillo Defies WLB

James C. Petrillo last week joined John L. Lewis in defiance of the National War Labor Board.

He advised the Board that he would refuse to abide by any order of the Board that musicians should end their year-old strike against radio transcription manufacturers.

Speaking at a Board hearing on the question of whether the Board should take jurisdiction in the strike (and order the Union to call it off), Petrillo's lawyer, Joseph Padway, said "Labor cannot stultify itself to permit any tribunal to violate the Constitution of the United States and impose upon us involuntary servitude. That is where we would have to part ways . . . to maintain the freedom, the democratic rights given to us under the Constitution".

Padway took the amazing position that the controversy between the Union and the A. F. of M. was not a "labor dispute", hence the War Labor Board should keep hands off. Just six months ago Padway was contending for all he was worth that the controversy was a "labor dispute" within the meaning of the Norris-LaGuardia act and hence the Union could not be prosecuted under the Anti-Trust laws.

Walter Socolow, Counsel for the Transcription companies told the Board that the "dispute was a common garden variety strike" and if Petrillo and Padway got away with this fast one every Labor Union in the country could strike as it please and duck the Board merely by contending that it had abandoned jurisdiction.

Below are printed excerpts from the testimony. The Board took the case under advisement. A decision is expected during the week of July 19.

Padway and Petrillo

For the Union

* * *

Mr. Padway: Mr. Chairman and members of the Board.

The position the American Federation of Musicians takes in this controversy, if we can call it that, is that this Board is without jurisdiction to make a decision in this matter, and that is founded on the premise that you do not have here a labor dispute. We take the position that no employment relationship exists and none is sought, and on that premise it is our contention that there is nothing here for this Board to determine.

Until the radio came into existence there was little objection to the making of the record, little objection to the creation and the continuance of this mechanical device. But when the radio came into existence it was apparent to enterprising persons that to synchronize the radio with the use of the disk might create a new business, and a very profitable business. And with the use of the radio and with the use of disks on the radio, this music—and it may have been disks that were not music, but the disk, or whatever was recorded upon it, was transmitted to various areas in the country and, if they so desired, through networks to the entire nation.

That created a problem for the American Federation of Musicians. It created this very simple problem, and I would like you to take cognizance of this. The American Federation of Musicians were confronted with the making of an instrument, or contributing to the making and manufacture of that instrument which destroyed their employment opportunities. Instead of creating work for them, it destroyed work; and instead of increasing their number or maintaining those who were employed, it would, if followed to its logical conclusion, put them out of business.

* * *

The problem became acute when sound pictures came into existence. There were some 22,000 musicians employed in these theatres at the time sound came into existence, and in a little better than a year there were left but 3,000 or 4,000 and 18,000 musicians went out of the theatres, displaced by the use of sound and by a mechanical device.

* * *

Now, that problem became more and more acute when the radio came into existence. The ability to distribute over networks and over stations music to wide areas made a less and less demand for music; musicians were unemployed.

* * *

So then we had an issue between a mechanical device and human labor. The American Federation of Musicians had to solve that problem or attempt to solve it. It conferred with the industry. As a result of that conference the industry recognized that it ought to at least make good some portion of the loss, and after very, very long and arduous conferences and negotiations it agreed to spend three million dollars in addition to what it was then spending on live music.

I think that was in 1937 or 1938. That was just a drop in the bucket, but for the moment it was accepted for the time being by the American Federation of Musicians as at least the establishment of a principle which might go toward the solution of this unemployment problem created by the mechanical device.

Well then, pretty soon the Anti-trust Division, under Thurman Arnold, got busy and he threatened the employers or the industry that if they continued with that contract or renewed it he would prosecute them under the Anti-trust laws. And while this may not be admitted by the industry, it is our opinion, based on some very strong and definite evidence, that the industry was only too happy to have Mr. Thurman Arnold make that rule. And while some of the industry continued to keep faith with the agreement, a large portion of the industry did not.

The fact is that the income on that particular arrangement, after Mr. Arnold's threat, was reduced by 60 percent or better than 50 percent. So that was no longer a solution to the problem.

* * *

In 1942 at Dallas it was definitely decided to cease making the records. We contend, whether it be disputed or not, that the industry showed no warmth or receptiveness to anything that had been discussed before. It made no efforts at cooperation to solve the problem. It was as much their problem as it was ours but they sat by, satisfied in the fact that we will have to continue to furnish that music regardless of the fact that we are dying as a result of the furnishing of these disks and this mechanical music.

To emphasize the fact that there was an absolute cessation of an employment relationship, I want to direct your attention to this significant aspect of history. If these employers recognized us as continuing employees, such as results, perhaps, from strike situations, why did they not call upon us to explain why this notice was sent to them? Perhaps they will say they knew, and I think they did. Why did they not approach us and say "We want to know on what basis you will work for us."?

I make this as a positive statement of fact, that no official communication, no official approach was made by the industry to the American Federation of Musicians from the time this notice was sent to the present day. Let me explain that.

For seven months there wasn't a peep out of them to the American Federation of Musicians.

* * *

We went to the Senate and we told the simple story in probably more elaborate form than I have related it to you at the outset of this argument. We made a simple statement. We cannot live any longer under the conditions that exist now, and as a basis of self preservation, as a basis of creating and remaining in employment instead of destroying it, we had to simply cease to make these records and we have severed the employment relationship; we severed it.

Then, at the suggestion of the Chairman of the Senate—he said, "Will you meet with them?" He said, "Meet with them and see what you can work out."

Now I want to make this very emphatic. The mere fact that we responded to the request of the Chairman of the Senate Committee to meet with them was not an acknowledgment that we still were in their employ; it was not an acknowledgment that a strike existed; it was not an acknowledgment that there was a hiatus or an establishment or a continual relationship. We went there to listen to them as we were asked to do, to see if there was anything they had to offer; and they didn't ask us to meet with them, it was the Chairman of the Senate Committee that asked us to meet with them. They were too proud and haughty, they relied upon their infamous campaign.

We went, sat down, and met with them. We even deigned, if you please, to make certain proposals. We took the initiative, although we were seeking no employment. We severed the relationship; we didn't want to work. They wanted us to come to work for them; it was their duty to say they wanted us to come to work, to state the basis on which they wanted us to come to work. Did they? They did the old employer's trick—now I don't mean all employers, but some of them, those who are responsible for the bringing about of the National Labor Relations Act—of listening and smoking and accepting us very nicely and very amicably, but not a peep out of them about what they would do.

We made them a proposal. They wanted our employment and we didn't want to work for them at all, we had severed relationships. All we got back in response to the proposal that we made was, "Your economic views are entirely contrary to our own. We cannot accept the basis of your philosophy," which was to create some scheme whereby this unemployment might be absorbed. All they said was "This is no good," and "That is no good," and "That is contrary to this," and "This is contrary to that," and bingo, it was shut off.

That should have terminated at least the relationship, if there was any, that existed, and it was through.

* * *

Now then, we are not permanent employees of these recording companies. It is sporadic employment. We have jobs; we have employers, fine jobs, fine employers. Every musician involved in the transcription business as distinguished from the recording business, and that is the only business before you, has a fine job, has never been without work.

* * *

What is this transcription business? I am coming now to one phase that will dwell upon the law. This transcription business as distinguished from recording—if the recorders make an argument that it may interfere with war morale or have something to do with war morale, we can meet that, but as far as we are concerned, all their business of the major, greater portion of it, is just general advertising: "Pepsi-Cola hits the spot," "Use Kreml; it will make bald heads grow hair," "Jergen's Lotion—any woman that uses it will get a beau overnight if she hasn't one."

Now, Mr. Chairman, that is all right, but what contribution is that to the war effort? These are commercial transcriptions if you please, and I cannot see what connection there is between the commercial transcriptions and the war effort.

* * *

Mr. Chairman and members of the Board, I have stated that you have not here a labor dispute, and the first thing that ought to occur to me as a lawyer, having handled this case all the time, is: What about that case in Chicago? What about the Supreme Court? Didn't they hold that it was a labor dispute?

* * *

The entire face or our picture of it when you have a case before the court on the Norris-LaGuardia Act is entirely different than we have in meeting the definition in connection with your jurisdiction.

* * *

And we here have no wages to ask you or to consider or determine. In our controversy we ask nothing of you respecting hours. We have no employment conditions in controversy as to sanitation or health, and we do not seek representation because we do not seek to establish the relationship of employer and employee.

We don't want to work for those employers. Much as they want to stay in business, much as they want our work, much as they want our employees, we want to exercise the constitutional right of refusing to work for them either arbitrarily or for reasons that are best known to ourselves, although I have stated to you the reasons.

* * *

If this business wants to continue, come to us and talk to us about it, we can consider one proposition, one proposition only, and that is this: We will work for them in the flesh. If they want to get "Pepsi-Cola hits the spot," we will give them the dingaling's and all of it, but it will have to be a live one. We are not going to produce a master disc and have them, with that canned music, circulate it all over the world.

It doesn't affect the controversy. I am making a statement to you so that you may know our position of good faith, but I say this, we don't thereby establish the relationship. I am simply telling you, Mr. Chairman, that any time these employers sitting around in this industry want live musicians to fill in these programs anywhere in the United States, we have got the men, we have got the music, and we will give it to them.

* * *

What substantial interference with the war effort is there here? Is there substantial interference if Kreml or Pepsi-Cola or Jergens Lotion isn't advertised through transcriptions? They are not talking about records now.

* * *

There is nothing you can settle for us by collective bargaining because there is nothing we want. We don't want to bargain with them at all. We are not employed by them and we don't want to be employed by them. We haven't a dispute that comes within the terms of collective bargaining. We haven't got to the point of employer-employee relationship to want to collectively bargain with them. However, you must have something here that can be covered or come within the terms of the collective bargaining process in order to have jurisdiction.

* * *

Now I come to the crux of this case, and that is this, Mr. Chairman: Labor will not defy this Board, the President of the United States or any Government agency, but on one thing it will have to differ with the Board, regardless of what your order may be, and this is not said definitely. Labor cannot stultify itself to permit any tribunal to violate the Constitution of the United States and impose upon us involuntary servitude. That is where we would have to part ways, not to compel you to take any certain action, not by way of disrespect, not by way of defiance, but on the contrary, merely to maintain the freedom, the democratic rights given to us under the Constitution. We would not be worthy of existence. Labor unions would have to disintegrate or ought to if they won't stand and protect their members against the imposition of involuntary servitude.

* * *

MR. DAVIS: Mr. Padway, can I ask you a question or two?

MR. PADWAY: Yes, sir.

MR. DAVIS: In the hearings before the Senate Committee, Senator Tobey said, "The interests of all the people have to be taken care of." Mr. Petrillo replied, "We understand that, and the American Federation of Musicians is going to do nothing to take away music from the public."

Later on, in the Senate discussions, I think Senator Wheeler was speaking. I have it here (referring to document). It was Senator Clark; and Senator Clark said, "Mr. Petrillo, all we are able and have been able to elicit from you is that you have not made any demands known either to this Committee or to the public or to the industry up to this time, and when pressed, your response is that you want more work. Now, there are only three people—three groups—that can give you more work.

One is the recording companies. Do you want more musicians hired by the recording companies?".

Mr. Petrillo said, "I will answer your question in this way. We are ready now to make demands if that will clarify the situation, and to go into negotiations and settle this thing as fast as possible."

And again Mr. Petrillo said, "But I am in hopes we will get somewhere if we sit down. I am satisfied now during the investigation here and the court procedures, that these men will finally get down to their level and finally will talk about the matter in a manner that I think the time has come that we have got to do business with these boys because there is a problem to be solved, and they have some justice on their side."

And you in your testimony before the Committee, said: "Well, I think if what we had a right to expect reasonably, would have resulted, this strike would not have been enforced. It would have been settled even before the ban came on. That, of course, will cause a debatable subject whether this side is wrong or that side is wrong."

And you said in another place where Senator McFarland said, "It is striking in the midst of war. That is the thing we are trying to get away from, having strikes in the midst of war;" and you said, "We want to settle this strike because we don't want to have it any longer."

Now, my question is, Has the position of the musicians changed since that time? Are they still desirous of settling the controversy, and are they still desirous of or willing to make suggestions for settlement, and to sit down and work it out?

Mr. Padway: Mr. Chairman and Members of the Board: This is the situation as I understand it—and when I state this, I am responding to your question; if I am incorrect, then I want Mr. Petrillo to answer if he disagrees with what I say, because I am not going to bind him to what I am stating now.

Mr. Davis: What don't you let him answer?

Mr. Padway: Well, I want to answer it this way because of the testimony. I recall the testimony and here is the testimony:

First of all, the use of the word "strike" like my use here of the words "going back to work" every once in a while—"strike" is a colloquial expression. (Laughter.) We use it in the sense that we were employed by somebody, we had an argument with them, and we have quit. That is all—we have quit. Whether we have quit definitely and permanently because we think the employer is a no-good so-and-so, and don't want—we struck and we went. In utilizing that language, we never intended to say that we are recognizing a strike in such a way that we have any rights as workers that we can compel employment or get strike benefits, or get employment compensation benefits, and the like. We voluntarily severed the relationship.

Now, then, with respect to sitting down with them—or rather, that we don't want to prevent music. We don't want to prevent music. We want to give the public all the music it wants, and we will give the public all the music it wants; but we won't give it to them through the can.

* * *

Now, you will say that puts us out of business. Well, as between them going out of business and we going out of business, we say that they should go out of business, that is all. If it is a matter that they shall die or we shall die, we say—not with any Oriental curse—but "Die!" (Laughter.)

* * *

Mr. Davis: Just a minute. You really haven't answered my question.

Mr. Petrillo: What is it? I tried to give you more, perhaps. Go ahead.

Mr. Davis: If you will listen to the question and give me a direct answer, I would appreciate it.

The public interest that was under discussion in the Senate Committee was the public's interest in canned music. The people that were under discussion were—shall I call them the "canners"?

Mr. Padway: Yes.

Mr. Davis: And at that time Mr. Petrillo said that he was willing to enter into negotiations, that he hoped to arrive at a settlement, and he proposed to submit terms and conditions.

Mr. Padway: We did.

Mr. Davis: All right. My question was, Is Mr. Petrillo or the Musicians still of the same mind about these canners, or have they changed their position since the Senate hearing?

Mr. Padway: Whether this is a change of position or not—I contend it isn't a change of position but you may construe it that way—definitely now we do not want, will not sit down to make recordings or transcriptions. We are through. Am I right?

Mr. Petrillo: Yes.

Mr. Padway: I would like Mr. Petrillo to answer.

Mr. Davis: I wish he would.

Mr. Padway: Go ahead, Jimmy, you can do a better job than I can.

Mr. Petrillo: Mr. Chairman and Members of the Board; I am speaking now to transcriptions. The only possible chance for a settlement in this situation is the question as to whether or not these people are willing to recognize that there is a problem here of unemployment for the man who makes the instrument and says, "Here, Mr. Radio Station, now you can sell this instrument to Mr. Lucky Strike; and you can play this, Mr. Radio Station, for six or eight months. But you, Mr. Paul Whiteman, and Kay Kyser, you stay home until such time as we are ready to send for you again."

What we have in the back of our heads if it is at all possible—and we are not ducking any issue—it is either a question of not making the instrument any more or placing musicians with the can in the station. In other words, if Whiteman makes a transcription with 25 men and it is sent out to a station, then we say, "Mr. Station, you must employ 25 men when you play this transcription."

Now, of course, these gentlemen won't listen to anything like that.

Or, you can have Mr. Whiteman in the flesh. You can hire Mr. Whiteman on a chain and Mr. Whiteman while he is playing the Lucky Strike program will deliver that orchestra to a hundred and forty stations in the United States and also in Canada—and also in South America.

Now, that is about the size of the entire picture. We are interested in giving the public the canned music that goes into the home, where primarily and originally it was made for. In the old days canned music was only made for the home and not for commercial purposes; but as it went on, as the radio stations opened up, we found that we were making an instrument that was putting us out of business.

* * *

Mr. Padway: I want to supplement Mr. Petrillo's answer. This clause (from the recording license) just read by Mr. Petrillo was drafted before the court handed down the Paul Whiteman decision. We thought that we could get some control over the record for home use and not prohibit others.

Mr. Davis: If you had consulted me, Mr. Padway, I could have told you that you couldn't.

(Laughter.)

Mr. Padway: If we had done so, it would have been a very fine thing. They spent a lot of money on lawyers, and the like. I am sorry I wasn't one of those lawyers. I would have liked to have gotten some of that money.

But the court in the Whiteman decision, which you in your practice are quite familiar with, held we could have no property right in the creative art of the record and once it went out it could be used by the world.

So, that feature you find there is wholly inapplicable. It was made years ago, and the Whiteman decision has rendered it inoperative.

Mr. Davis: That is precisely what I had in mind, Mr. Padway, and the real question seems to be whether you can substitute for that provision some adequate protection of the musicians in some other form.

Mr. Padway: The best proof we can't is this, that no employer has been willing to even make a suggestion or repeat as to how to do it. That is why we are not employed by them, won't be employed by them, and can't be employed by them.

Socolow

For the Transcription Companies

* * *

Mr. Chairman and members of the Board, I came here this morning prepared to limit myself to the question of jurisdiction, to discuss the question of jurisdiction of this Board.

I didn't think that Mr. Padway would concern himself with the merits of the dispute. I felt, and still feel, that there should be hearing on the merits of the dispute. As far as I am concerned, the hearing of this Board of this labor dispute is transparently clear.

* * *

The connection with the war effort which these products have, it has been established clearly, continuously, since this strike by the officers of our Government who are in charge is with the system of communications of this country and with the maintenance of national morale. It is no laughing matter to say if a radio station in a small town in Iowa, for example, is unable to obtain a program service, unable to obtain live musicians, if you please—and I contend there is an actual shortage of musicians, as Mr. Petrillo has himself admitted—that that station will go out of business and will be unable to serve the people in its community not only for the advertising of commercial shows, not only for general programming, but also for the transmission of messages which our Government must transmit to the public.

I refer you to the testimony of Mr. Elmer Davis and Chairman Fly of the Federal Communications Commission given before the Senate. I refer you to quotations from that testimony appearing in the statement of fact submitted to the Conciliator.

* * *

No contract we have ever had with this Union has obligated any musician to work for us. I say to you gentlemen that the right of an individual worker to refuse to work for a given employer continues. I am not questioning that right.

I say to you that the right of a union to prevent a worker from continuing his employment is an entirely different matter. I say to you that an employer individually may decide to go out of business. Nobody can stop him. But if a group of employers should band together and decide, "We are going to go out of business until we get a lower wage scale for our industry," that is illegal and unconstitutional. By the same token, the union as a group of men cannot band together for the purpose of destroying our business.

* * *

Unfortunately, this industry is not an organized industry. They are competitors in the true sense of the word. They have never dealt with the Union, Mr. Padway says, officially as a group. Each one of these men, to my knowledge, have gone to the union officers, talked to Mr. Petrillo or his assistants in his absence, and discussed the problems of their business. It is normal, and you can expect that we did that.

* * *

The objectives of the Union are—and I contend they are objectives. They have been reiterated this morning by Mr. Padway and his client—getting of more money and creating of more work opportunities for their members. There is no question about that.

This is a technological problem. The War Labor Board has dealt with technological problems before, and the Department of Labor has concerned itself for many years with technological advances which displace or affect employment in all industries.

Mr. Petrillo says everybody else doesn't make the machine which destroys them. I think the machinists make lathes, and you can go down the line with a number of articles which are designed for reproductive purposes and which are made by the people who work at it.

The technological problems are always the proper subject of collective bargaining. I defy anybody to say it is not a working condition which is the subject of discussion between employer and employee.

Mr. Petrillo this morning in answer to a question said, "We didn't want to destroy this business. You asked me if I want to destroy this business. I have a proposition now."

He made a proposition. I am not going to discuss the merits of the proposal, but it definitely indicates and confirms that they are willing to go back and work for us if certain advantages can be obtained by them, and that by its very structure is a labor dispute.

Every strike is a cessation of work. Where will this Board be and where will all labor disputes be if every time a strike is called the Union adopts a new tactic and says, "We don't want to work any more. Nobody can compel us to work. It is involuntary servitude."

That is good negotiations. That is a technique which has been adopted in recent years to gain objectives through coercion, through force, and that is what is being done here.

The history of this strike—and it is a strike. As a matter of fact, Mr. Padway himself had a report to his clients printed in the official journal of the American Federation of Musicians commenting on the decision in the Chicago case which went to the Supreme Court. He says, if I may sum up this decision in a few words, that the right to strike is inviolate.

* * *

When the union sent this letter announcing its termination of employment to the industry, no demand was made by the union. I can tell you of my own knowledge that each and every one of the employers involved called on the union from August 1 and right up to last week in an attempt to negotiate and find a solution to the restoration of the men to work. But no demand was made whatsoever. We were in fact exactly in the same position on August 1 as we are today. Mr. Petrillo himself said that last week. We are right back to August 1.

Sometime in August of 1942 the Department of Justice instituted this action in Chicago in the Federal Court for an injunction under the Anti-Trust Act. The record in that case clearly showed that no demands were made. It was a cessation of work. That Court squarely held that it was a labor dispute. The Supreme Court of the United States affirmed it.

Mr. Padway, in appearing for his clients in that case, argued that this entire controversy grows on a labor dispute. The Court upheld his contention and an injunction was denied. The Court deciding the case made reference to the labor dispute under the Norris-LaGuardia Act, which is the same definition as found in the War Labor Disputes Act.

Mr. Padway stated that the union in fact desired the radio stations to hire more employees—then this entire dispute will be resolved by accession to the demands for greater employment. In other words he did not stick to the letter of the complaint but he acknowledged the truth of those allegations and said it is the truth, not only for purposes of discussion and purposes of a court action, but he admitted the truth of them.

Now, in August of last year and during the entire time this case was pending, although no demands were made by the union, it was acknowledged that their demand was one for greater employment. No specific demands were made, true, but the ostensible, announced purpose of this strike was to get more money and more work. During the entire pendency of this action by the Department of Justice in Chicago and in the United States Supreme Court, and until it was decided, no demands were made by the union, which is exactly the position we are in today.

In January before the Senate Committee, Mr. Petrillo said he would make certain demands upon us. Then he made the demands and when he made them he announced in his official journal that these demands were made voluntarily, not through any pressure or coercion on the part of any Government agency.

In his demands on us originally he stated we should pay him an unspecified percentage of our gross receipts—the amount to be negotiated—pay that to the union treasury, in addition to the regular compensation which we were paying the men. He said he didn't want any more money for the men. We said "no" to that with a lot of reasons. I don't want to go into those now.

But we did come back with a counter proposal. Mr. Padway said we didn't make any at all. We made a counter proposal to increase the rate of pay for the men who work for us. I recall very clearly it was in Mr. Petrillo's office late one Saturday afternoon. Mr. Weber, the ex-president of this union said that he and everybody else were overjoyed and elated at the attitude that we manifested in our proposal to pay more money. He thought we were getting somewhere.

Then he asked for certain figures. He wanted to know what kind of business we were doing, what we were making, so he could see how much this formula would yield to them. When he got those figures he said, "You fellows are small peanuts—not just peanuts, but small peanuts. You only take in $4,000,000 a year, and you make only a quarter of a million in net profits. I want $35,000,000 a year. My board wants me to take $10,000,000 or $12,000,000. Your entire gross income wouldn't be enough for me."

He said, "I'll tell you what. I'll make you a proposal. You give me what I call contract control. You agree not to deliver your products to your customers if I declare some of these customers to be unfair at any time." I asked him how many stations were unfair at that time. "Not many," he said, "one or two. But it is only fair to inform you that if you sign this contract there may be 500 or more declared unfair the day after the contract is signed."

You can't be in a business like ours, making transcriptions, without knowing what your market will be. You can't afford to spend money making transcriptions and not know whether you can sell them and get your money back.

We were obliged to refuse to accept that demand, on practical grounds as well as on legal grounds. We thought of it as a secondary boycott.

We spent the time from February 11 to May 13 in negotiations, when we broke up. We spent many hours in very friendly conversation, telling our problems; pointing out conditions in our business, which he learned about for the first time; telling him how we operate. We disclosed everything and concealed nothing.

The result of those negotiations was that he said it was unfortunate but there isn't anything in this business that attracts him and would solve the problem in terms of large sums of money, so we were obliged to call in a conciliator. I won't go through the steps we took in that, but conciliation was a failure.

The Secretary has certified to this Board, and you have the certification before you, that this is a labor dispute; it could not be conciliated; and that this has a direct effect upon the war effort and comes within your jurisdiction.

I submit to you that under Section 7(a)(1) of the War Labor Disputes Act you have the power and also the duty to exercise your jurisdiction in this case whenever the Secretary certifies to you the statement of facts that you have on your desk at this moment.

You have here, gentlemen, a garden variety strike—nothing else. Maybe the personalities are a little more colorful; maybe the products are a little more interesting and appealing, but this is a strike in every sense of the word. The union has termed it to be a strike and we say it is a strike. It is a strike against our business. We cannot engage in our business if the flow of manpower is being withheld from us by union order.

I am not asking you to take jurisdiction here and order that an individual musician go back to work for us. I don't expect you to do that, but I can ask you—you have done it in every case that you have had before you—to order the union to remove its restraint upon the men so that the proper interplay of labor and employer can be maintained.

There is not a question in my mind of your having jurisdiction. The whole hearing is predicated upon the exercising of that jurisdiction, and I say to you that if this Board does not exercise its jurisdiction in this case you are letting the door wide open for every union to come in and say, "Your order means involuntary servitude. You can't compel us to go to work."

You have done it before and there is no reason why you shouldn't do it now. You are not compelling the individual; you are affecting the union.

* * *

Mr. Padway says that is different from going back to work, but that is all we can ask this Board to do. That is all we can expect from you. These men don't have to work for us if they don't like the conditions. Individually they can refrain from making recordings or anything else.

A musician, if you please, renders his services in a peculiar manner. It is not comparable to that of other industries in most places. A musician derives his livelihood from an aggregate of compensation for part-time jobs. He plays on the radio; in restaurants, cafes, hotels. He also comes into our studios and makes recordings. Some of them also go into the studios of phonograph companies and make their recordings.

* * *

In connection with the proof that this controversy has an effect on the war effort, I would like to read to you brief quotations from Chairman Fly, Federal Communication Commission in the testimony before the Senate Committee in Interstate Commerce. Mr. Fly said, "Wherever emergency messages, news of the world, war information, much propaganda, if you will, cannot reach the people or any great portion of the people a nation at war is seriously handicapped. May I therefore offer this suggestion. Electrical transcriptions are essential. We must have them. There is no alternative."

Mr. Davis, the Director of the Office of War Information in the same hearing said as follows: "Since several hundred small stations, which cooperated whole-heartedly with the Government on the war effort, depend for their major sustenance on electrical transcriptions Mr. Petrillo may well force them out of business and thus seriously interfere with the communication of war information and messages vital to the public security."

Mr. Davis also said—he was making this statement on behalf of the War Department, the Navy Department, the Marine Corps, the Coast Guard, Treasury Department, the Office of Civilian Supply, and the Office of War Information and that his communication to Mr. Petrillo was made and sent only with the consent, after a joint meeting, of their representatives.

Mr. Padway this morning made the statement that the members of the Musicians Union were working free for the war agencies. I want to say to you that that statement is incorrect. I doubt whether Mr. Padway has the facts. The facts are that the Musicians are being paid for their work on behalf of the Government agencies. Certain union rules are held not applicable to the Government agencies, but whenever a musician goes into a studio and makes electrical transcriptions for a Government agency he is paid the scale for that service. That applies to the Army, Navy, the Treasury Department, and your office if you make transcriptions. You check your records. You will find that to be true. The statement that these recordings are made free is incorrect, and when the broadcast appears over the network the union musicians are employed and they are paid at prevailing broadcast wage scales for their services, even if the sponsor is the United States Government.

* * *

The action of this union has had all the characteristics of a strike. Not only have the men ceased to work for my clients, but these tactics, which the Union has employed, are shifted from time to time to suit the opportunities that existed at each moment.

When the Union made its demand in February they said it was done voluntarily. Later on they changed their tactics. They said it was done because of senatorial pressure.

Mr. Petrillo was asked before the Senate Committee by Senator Whitten, I believe, on January 12 of this year, whether he did not have in mind not making records at all any more. He said, "No." He agreed that the American public would not stand the stopping of the manufacture of these products. When he made his demand in February he said, "Those are my total claims. I have no complaints against the broadcasters at all." In July he said, "I am through and I am not going to make transcriptions. I am trying to get at the other fellow, the broadcasters."

In this strike which has been a strike of instrumental musicians only, he has taken action against his own men and has also exercised pressure upon members of other unions—musical recordings using the services of vocalists as well as instrumentalists—singers, members of another union.

Mr. Petrillo in the last few weeks called in and notified various vocal artists that he would consider it uncooperative, if not unfair to them, to render their services for vocal recordings without any musical accompaniment.

Of course, the pressure which he has to bring to bear upon those individuals is very serious. It can make it difficult for them to work on the radio and other engagements with the musicians. They have given that cooperation to Mr. Petrillo. He has effectively cut off other sources of supply for the business; namely, vocalists.

He has told the arrangers and copyists some of whom are members of his union that he would consider it a violation of his union regulations if they make arrangements of purely vocal music.

He has referred to records made in Mexico, I understand, phonograph records in this instance, not transcriptions, as being scab records because they interfere with the strike which he has called.

Music publishers, incidentally, have had a very serious aftermath of this strike. Very few popular tunes have been classified in the hit standing since this strike went on. The exploitation of music through the medium of transcriptions—the medium of mechanized music is essential for the development of that industry.

All of the characteristics which I have just described, all of the concomitants of this strike, indicate without question that this is a labor dispute, and every step taken by this Union is in furtherance of the attainment of the objective they want; mainly, more money and more work for everybody somehow.

* * *

Mr. Padway made some references to constitutional rights against involuntary servitude. I think the rest of the American public has some constitutional rights too—the right of free enterprise. We as business men have a right to conduct our businesses consistent with public welfare and rights of labor in a legitimate fashion.

* * *

I think it is high time we found out what the no strike pledge means. The Union has called this strike. They have said, No, it is not a strike. It is a different type of cessation of work. If it is abandonment, let us know. If it is a strike, let them face the music, such as we have. (Laughter)

* * *

I want to close with the statement that the tactics of the Union are those of a transparent evasion of whatever jurisdicion the Government seeks to exert in order to end this strike.

They have argued no jurisdiction under the Norris-LaGuardia Act. They say this Board has no power. By that they are undermining the very structure of the work and frustrating everything you have been doing on this today.

Questions From the Board

* * *

Mr. Roth: May I at this time complete the record on the decision of the Court you read from by reading the following paragraph:

"The Norris-LaGuardia Act provides 'the term labor dispute' includes any controversy concerning terms or conditions of employment, etc. The Government says that the activities complained of in the case at bar do not involve 'terms or conditions of employment' and that, accordingly, the Norris-LaGuardia Act is not applicable. It has been observed that the union and its members here contend, in a sense, for a 'closed shop' so far as phonograph records, electrical transcriptions and amateur musicians are concerned. The question then is: Is this contention one in respect of a 'term or condition of employment'? Congress itself answered this question quite definitely in the National Labor Relations Act when it said: '. . . to require as a condition of employment membership therein.' Here Congress itself speaks of an agreement for a closed shop as a 'condition of employment.'

"The court is satisfied that the union and its members and the employers of the latter are disputing in respect of a 'condition of employment' and that, accordingly, the dispute involved in this case is a 'labor dispute' within the meaning of the Norris-LaGuardia Act."

I understand, Mr. Padway, that your whole case is predicated on the fact that no employment relationships exist. I think these are your exact words, ". . . and none is sought."

That being true, would your client raise any objection to employment of musicians who are not members of your Union for production of these records?

Mr. Padway: Certainly, we would raise every objection in the world, and it doesn't change our position.

Mr. Roth: You would take whatever measures you could to prevent—

Mr. Padway: We would absolutely expel any member who went ahead and made records. We would, by all peaceful and lawful means, endeavor to get those who are not members not to make records, for the same reason we don't want to make them; namely, it kills our opportunities.

* * *

Mr. Roth: Now, your statement that you had no objection to them (radio stations) playing transcriptions by Paul Whiteman as long as they had—how many, 23 musicians standing by?

Mr. Petrillo: The number of men employed to make that transcription, the same number of men to be employed when the transcription is played.

Mr. Roth: What would they be doing while Paul Whiteman's records are being played?

Mr. Petrillo: Listen to the music.

Mr. Roth: Have you ever heard of the Government's problem of manpower shortage in this country?

Mr. Petrillo: Did I ever hear of it?

Mr. Roth: Ever heard of the problem and what the Government is trying to do? How do you square that with the present situation on manpower?

Mr. Petrillo: They are taking our musicians and they say, "Either work or fight," and our boys are going to the factories, and they are making bullets and dropping their instruments.

Mr. Roth: They can't make bullets while they are listening to Paul Whiteman's records.

Mr. Petrillo: That's all right, but he's got to live. He ain't going to live if he don't stand by his own records. In other words, we are not going to play our own funeral any more. That's what it amounts to. We listen to it being played while we stay home, you see.

* * *

Mr. Roth: One question. If the tables were turned—let us assume this were a stevedoring company which was seeking to use lift trucks, which are a labor saving device. The contract had expired; the parties had contested those provisions in their contract, not come to an agreement. The employer said, "As far as I am concerned, I can find plenty of people who will use lift trucks. I am not concerned any more with hiring you boys." And he proceeded to hire other people and refused to go on with negotiations. Do you consider that would be a breach of the no-strike, no lock-out pledge on the part of the employer?

MR. PADWAY: Well, it all depends whether that would be a breach of the no-strike, no lockout pledge. On the facts and circumstances you have related, the no-strike and no-lockout pledge is ended. You know why? He's got other employees, and he can go out and get them, and he says he can. Consequently, there is nothing further for us to seek. He terminates our employment. He has a right to.

MR. ROTH: The Board took the San Francisco Hotel cases where the strike has not succeeded and the hotels are running, and they held it was a labor dispute.

MR. PADWAY: I don't know what the Board held in that case. I will say this: Where an employer is not willing to pay the price his employees want and he has refilled his establishment with competent employees, or even incompetent employees, and production is at normal the courts have held the strike is over. Now, I can give you many decisions to that effect, where there is a strike called, the employees are out, and then other employees are brought in to replace them and production is at normal, the strike has ended. Except in that strike there the former employees are seeking work. Here we are not seeking to work any longer.

MR. ROTH: But my employer wasn't seeking the services either.

MR. PADWAY: If he has refilled his establishment and wasn't seeking the work—but if the employer threw out all manual labor, or put in all physical labor, and the employees wanted those physical jobs, that is a different situation.

MR. PETRILLO: May I clarify one point, Mr. Chairman?

First of all, there are no non-Union professional musicians. These gentlemen know that any man that don't carry a card of the AFM they couldn't use. They wouldn't want them around. I am sure they would substantiate what I said.

Second, all the musicians in England have pledged through a letter to their organizations that they will not make any such transcriptions or recordings as long as this controversy is on. That also goes for the South American musicians.

MR. DAVIS: Mr. Padway, before we break up I'd like to get back to the question I asked you this morning as to whether the position of the Union had changed since the Senate hearing, at which time it was the position of the Union that they were prepared to negotiate with these people.

Now, you have made it quite clear—I want to be sure I understand it—that the position of the Union now is that they will not make these mechanical recordings or electrical recordings at all. In other words, your purpose is—you say that they will supply live musicians. Of course they supply live musicians, or did, to these recording companies; so that the purpose of the Union is to put these people out of business, isn't it?

MR. PADWAY: That may be the result. Our purpose is to compel any form of music used in connection with electrical transcriptions to be live music and no more mechanical instruments to be used. That is our purpose. If their business depends entirely or to any extent upon mechanical recordings, we are not going to furnish that music. The result will be they will go out of business.

I want to state quite definitely in my parting sentence that the American Federation of Musicians now states that regardless of what negotiations went on after it quit it has not re-established employment relations.

It is in the same position as the NLRA—when the Board rules that when a person even is on strike, but having quit the strike and obtained substantial and equivalent employment elsewhere his employment is terminated. We have substantial, equivalent, and better employment elsewhere. We are all employed so far as this end of the business is concerned. We don't want other employers. We are through.

If they'd like to have us and it's extra time and they want live musicians we will probably give them live musicians. As far as mechanical transcriptions are concerned we are here to say to this Board now: We are never going to make another mechanical transcription.

The National Association of Broadcasters

1760 N STREET, N. W. ★ ★ ★ ★ ★ ★ ★ WASHINGTON 6, D. C.

August 13, 1943 SPECIAL A. F. of M. BULLETIN No. 20

Late Developments in the Petrillo Fight

1. The War Labor Board has appointed a panel to hear and report on the merits of the controversy between the transcription companies and the A. F. of M. This panel consists of the following:

Representative of Labor

Max Zaritsky, President of United Hatters Cap and Millinery Workers

Representative of Employer

Henry S. Woodbridge, Assistant to the President of American Optical Co.

Representative of the Public

Arthur Meyer, Chairman of the New York Mediation Board

Public hearings have tentatively been set to begin in New York City the first week in September. The function of the panel is to report to the War Labor Board what action, if any, should be taken. The War Labor Board denied "at this time" the plea of the transcription companies that the union be ordered to terminate its strike at once, but the form of the order leaves it open for such action to be taken in the future at the recommendation of the panel.

2. Station WSAY in Rochester, which was cut off the Mutual Network as a result of a threat by Petrillo to deprive the entire Mutual Network of all of the services of musicians, has commenced an action for an injunction against James C. Petrillo, individually and as President of the American Federation of Musicians, and Leonard Campbell, individually and as President of Rochester Musicians Protective Association, Local #66, American Federation of Musicians.

The theory of the action is that it constitutes an unlawful labor objective for the union to demand that the station hire five musicians whose services the station does not need and that it constitutes an unlawful method for the union to conspire to put pressure on Mutual to deprive the station of network musicals programs unless the station does the union's bidding. The case is brought in the Supreme Court of the State of New York and will be heard in Rochester. The motion for an injunction is scheduled to be heard on Thursday, August 12th.

Diamond Calls Meeting

3. On August 5th Mr. Milton Diamond, counsel for Decca Records, Inc. and for the World Broadcasting System, Inc. which was recently purchased by Decca, called a meeting in New York City to which R. C. A. Victor,

Columbia Recording, NBC, Blue Network Company, CBS and the NAB were invited. At this meeting Mr. Diamond reported, without recommendation, the result of several months discussions with Mr. Petrillo and his Board which Mr. Diamond had carried on solely on behalf of Decca and not on behalf of any other interests.

Mr. Diamond reported that Mr. Petrillo and his Board would be willing to return the musicians to work in the phonograph record field in consideration of a payment of eighteen million dollars net over the next five years. Such payment would be made to musicians employed by the recording companies, with the understanding that the union would tax the money away from these men and put it in its own coffers. The eighteen million dollars was to be paid by "public users" of records which, after negotiations, boiled down to the broadcasting industry since it was admitted that there was no prospect of receiving any part of the contribution from juke boxes unless and until a new copyright law was passed.

Transcriptions were not specifically mentioned in this connection, but it was Mr. Diamond's understanding that the men would also return to work in the making of transcriptions.

It was part of Mr. Petrillo's proposal, however, that all industries should cooperate in the passage of a new law which would require broadcasters and other users of records to make payment for the use of records, and for the benefit of the union, for all times in the future and at such rate as might be fixed in the future. It was no part of the proposal that any part of the money be paid by the motion picture industry.

Price Goes Up

Discussion brought out the fact that while Mr. Petrillo said that what he wanted for his union was eighteen million dollars net, the discussions were predicated on the fact that there also would be moneys for the recording companies and for the artists who actually made the records. It was suggested that the record companies might receive, in addition to the moneys paid to Petrillo, another eighteen million dollars, which would raise the amount involved to thirty-six million dollars. It was also pointed out that some money would be needed for the collection and administration of funds and that this would amount, perhaps, to another four million dollars. The total amount involved for the first five-year period, therefore, would be from eighteen to forty million dollars, with no limitation placed on what it might be in future periods.

What was involved in the proposal, therefore, was an agreement by the broadcasting industry to pay from eighteen to forty million dollars over the period of five years, and at the same time to agitate for the passage of a new law which would permit the collection of similar or greater amounts in the future.

Broadcasters Not Interested

The NAB was asked its opinion as to whether the broadcasting industry was interested in discussing such a plan. The NAB made it clear that the broadcasting industry would not be. It was pointed out that such plan involved the acceptance of a totally false principle, the imposing of unjustified and crushing charges, and the adoption of a technique of lobbying for new legislation by means of a strike, which was actually a strike against the American people and the Congress, until new legislation was passed.

4. James C. Petrillo announced to the press that the union, as a means of encouraging symphonic music, had appropriated $500,000 for the giving of 570 free concerts by the leading symphony orchestras in smaller communities. The following statement was issued by Neville Miller, President of the NAB, and was widely printed:

Petrillo Symphonic Music Gesture Exposed as Hypocrisy by NAB

"James Caesar Petrillo's announcement that his union intends to give 570 symphonic concerts in small towns is unequalled for hypocrisy. Mr. Petrillo has done more to prevent symphonic music in the United States than any other man in the history of our country.

"Before Mr. Petrillo prevented the making of all recordings of symphonic music last August, the great orchestras could reach all of our people in all parts of the country through the phonograph record. The recordings so made were available for the home, schools, broadcasting stations and for all of our citizens wherever situated and whenever they wanted to hear symphonic music, not merely once each in 570 communities hand-picked by the union. The very orchestras which Mr. Petrillo now wants to bring to the people, are those which, for one full year, have been prevented from making phonograph records. If Mr. Petrillo were sincerely interested in the welfare of symphonic music, he could, by lifting his ban, permit the equivalent, not of 570, but of hundreds of thousands of times 570 concerts.

"All of the symphony organizations are nonprofit institutions. A substantial part of their revenue, in some cases as much as one-third, was derived from royalties on phonograph records, 98 per cent of which, according to Mr. Petrillo's own testimony before the United States Senate, went into the American home and formed a permanent contribution to musical education. Moreover, the musician in the symphony orchestras has been deprived by Mr. Petrillo of the substantial revenue which he previously received from his recording activity. The musicians in symphony orchestras received, in addition to the royalty obtained by the orchestra itself, a minimum fee of $28 per man for no more than 80 minutes playing time.

"Mr. Petrillo has, therefore, stifled the major source of income for the symphonic orchestras, deprived the symphonic musicians of normal compensation and withdrawn from the American people the benefits of recorded symphonic music.

"It should be noted that in making this transparent gesture, Mr. Petrillo drops the last vestige of justification for his ban on recordings. He has contended that records commercially used in the smaller cities deprived local musicians of employment opportunities. Yet, when the union sets aside $500,000 to bring some music to the American people it does not employ local

> musicians, but instead spends it on bringing into the communities the performances of the fully employed musicians who had always made recordings.
>
> "The good faith of Mr. Petrillo's proposal may be attacked not only on these grounds, but on the basis of his own figures. His announcement says that the men in the orchestras will be paid for their services, and he sets the normal personnel of a symphony orchestra at 90 men, although in travelling, the services of baggage men, librarians, etc. are also required. At his own figures, Mr. Petrillo is allotting less than $10 a man per concert to cover salary, railroad fares, hotels, meals, baggage car for instruments, cartage of instruments and music stands to place of performance, and incidental expenses. When a non-profit symphony society wishes to give a concert out of town today, it must pay, in addition to the high union scale, $7.50 a man per day for mere maintenance, and the lowest union scale of symphony concert tours is $100 a week a man, exclusive of the obligation of the orchestra to furnish first-class transportation, including sleepers. It is obvious, therefore, that Mr. Petrillo proposes to pay the men no compensation or only nominal compensation.
>
> "The essence of Mr. Petrillo's gesture, therefore, is that he is going to compel some of his members to render free services and the orchestral societies to lend their names and reputations to his enterprise so that he may take unto himself the credit for their services."

The accuracy of Mr. Miller's figures was later proved when Mr. Petrillo, in a later statement, announced that $250,000 was to be used in order to give 115 concerts, thereby cutting, in more than half the number of concerts, within a week after the first announcement.

On August 7th, Marshall Field, president of the board of directors of the Philharmonic Symphony Society, asked Mr. Petrillo to lift "immediately" his ban on the recording of symphonic music. Mr. Field's appeal has been approved by eleven symphony orchestras, including: the Los Angeles Philharmonic, Rochester Philharmonic, Indianapolis Symphony, Cleveland Orchestra, National Symphony and the Minneapolis Symphony.

Also an estimated 700 members of N. Y. Local 802 signed petitions demanding that Mr. Petrillo execute his project by giving work to totally or partially unemployed musicians rather than to symphony instrumentalists who already were earning high wages.

Details of Marshall Field's appeals and the protest of the 700 members of N. Y. Local 802, A. F. of M., are given in articles from the New York *Times* reprinted below. Also we are printing an editorial from the New York *Times* of August 10:

(N. Y. Times, Aug. 10)

Field Asks Petrillo to Lift Ban On Recordings by Philharmonic

James C. Petrillo, president of the American Federation of Musicians, has been asked by Marshall Field, president of the board of directors of the Philharmonic-Symphony Society, to lift "immediately" his ban on the recording of symphonic music, it was disclosed yesterday.

The society "desires, in fact requires" royalties from its recordings in order that the Philharmonic may continue, and other major symphony orchestras are "similarly situated," Mr. Field told Mr. Petrillo in a letter dated Aug. 6, which sets forth the conditions under which the society will permit the use of its name in the series of free concerts that the union proposes to give in the smaller cities with the union musicians of leading symphonic organizations.

After outlining the conditions—that the society shall approve the cities played, the programs given and the conductors who conduct the orchestra, and that the performances shall neither involve the society in any expense nor be broadcast or recorded—Mr. Field's letter continues:

"I have spoken informally to a number of members of our board and I believe that if these conditions are complied with, you will receive the society's cooperation to your project. They have expressed the hope, in which I join, that if the society cooperates, you will see the importance, for the same ends to which your proposed performances are aimed, to lift the ban which you have placed on recordings by our orchestra."

Acknowledging Mr. Petrillo's professed desire to bring "symphonic music to persons who might not otherwise have the opportunity to hear it," Mr. Field informed the union leader that "the recording of the great symphonic orchestras of this country under their famous conductors is also a means of bringing that symphonic music to persons who might not otherwise hear it."

Mr. Field was "frank to admit," he said, "that the society desires, in fact requires, the royalties from its recordings in order to insure the continuance of the orchestra which you are proposing to borrow. The other great symphonic orchestras of this country are similarly situated. Their very existence is threatened by the loss of recording royalties."

Accordingly, the letter continued, "my plea to you, and I am sure it will be the plea of the management of every symphonic orchestra in America, is that you will immediately lift your ban on the recording of symphonic music and by doing so contribute to the availability of symphonic music throughout this country in a manner that not even your proposed concerts can accomplish. In addition, we have the word of Army and Navy officers, as well as civilian officials in Washington, that the continuance of recording is necessary for the maintenance of military and civilian morale, one of the primary purposes stated by you for your own concerts."

A statement from the Philharmonic-Symphony Society office said that copies of the letter had been sent to other major symphonic organizations, and that by the time the letter was mailed to Mr. Petrillo telegrams "approving Mr. Field's position" had been received from the Philadelphia Orchestra Association, the Chicago Symphony, the Boston Symphony, the Cleveland Orchestra, the National Symphony of Washington, D. C., and the Cincinnati, San Francisco and Minneapolis Symphonies.

Mr. Petrillo announced his free concert plan on July 27, at which time he said that the union had authorized an expenditure up to $500,000 for an estimated total of 570 concerts. The plan was first suggested to him, he declared, by President Roosevelt. The day after its announcement, the proposal was assailed by Neville Miller, president of the National Association of Broadcasters, as "unequaled for hyprocrisy." Through his ban on the making of records, Mr. Miller charged, Mr. Petrillo had "done more to prevent symphonic music in the United States than any other man in the history of our country."

Mr. Petrillo was not available yesterday for comment.

Musicians Oppose Petrillo Concerts

Against Leader's Proposal to Give Free Performances by Symphony Orchestras

WORK FOR JOBLESS SOUGHT

Petitions Point to Fact That Those Affected by Project Already Earn High Pay

Opposition to the plan of James C. Petrillo, president of the American Federation of Musicians, to have the major symphony orchestras give free concerts in smaller cities developed yesterday within Mr. Petrillo's own union.

An estimated 700 members of Local 802 of the federation, covering the metropolitan area, signed petitions demanding that Mr. Petrillo execute his project by giving work to totally or partially unemployed musicians rather than to symphony instrumentalists who already were earning high wages.

The petitions were delivered late yesterday afternoon to Mr. Petrillo's office at 570 Lexington Avenue, where they were accepted by Harry Steeper, assistant to the union leader. Mr. Petrillo was said to be in Chicago.

Circulation of the petitions was done by the faction within Local 802 known as the "Unity Group." The group in recent months has offered increasing strong opposition to the present local administration, headed by Jacob Rosenberg, president, and William Feinberg, secretary.

Mr. Rosenberg declined to comment on the petitions.

Not Fighting Recording Ban

While the petitions represented the first intra-union opposition to Mr. Petrillo since he started his fight against "canned music," Billy Vann of the "Unity Group" emphasized that the signers were not fighting the federation's ban on recordings.

In a letter accompanying their petitions, however, a committee of the "Unity Group" noted that Mr. Petrillo had declared repeatedly that the purpose of the recording ban was to aid needy musicians.

"Last week, in an apparent desire to gain the public good will, the federation announced that it would spend $500,000 on a program designed to bring good music to small communities," the letter continued. "Are the musicians who are to be so used unemployed? No! Famous symphony orchestras have been designated to do this work."

The letter added that the plan as announced by Mr. Petrillo had the effect of "proclaiming that we have no competent unemployed musicians on whom the funds of the organization should be expended."

Suggestion From Committee

The committee suggested that, if the federation were to subsidize music, "new orchestral units be formed using those musicians who are not already fully employed at high wages."

Mr. Vann said that twenty members of the New York Philharmonic-Symphony had signed the petitions but he declined to make public their names.

He reported that some members of the symphony were opposed to working for $10 a concert, the fee proposed by Mr. Petrillo, Committee members said that the commercial scale was $16.

The committee members signing the letter were Nicholas F. Vitalo, recording secretary of the group; Alfred Manuti, Calmen Fleisig, Maurice Benavente, Jack Cohen, Raymond Parker, Frank Morse, Charles Sanchik, Benjamin Berkowitz, Hyman Grossman, Benjamin Margulis and Albert Stanley.

The Philharmonic-Symphony Society of New York meanwhile announced that a total of eleven symphony orchestras in the country had voiced approval of the position of Marshall Field, the society's president, in asking for lifting of the ban on records. The latest adherents were the Los Angeles and Rochester Philharmonic Orchestras.

(N. Y. Times, Aug. 10)

BEGGING MR. PETRILLO

Marshall Field, as president of the board of directors of the Philharmonic-Symphony Society, has asked James C. Petrillo, president of the American Federation of Musicians, to lift immediately his ban on the recording of symphonic music.

Mr. Field is "frank to admit," he declares, "that the Society desires, in fact requires, royalties from its recordings in order to insure the continuance of the orchestra which you are proposing to borrow. The other great symphonic orchestras of this country are similarly situated. Their very existence is threatened by the loss of recording royalties."

"Accordingly," Mr. Field continues, "my plea to you, and I am sure it will be the plea of the management of every symphonic orchestra in America, is that you will immediately lift your ban on recording of symphonic music and by doing so contribute to the availability of symphonic music throughout this country in a manner that not even your proposed concerts can accomplish."

This plea has the merits of understatement. Mr. Petrillo, through the use of irresponsible private power, is denying music to millions by his ban on recording, while he ostentatiously offers "free concerts" as a special favor to a few thousand. Why should the country be placed in the position of pleading with Mr. Petrillo to remove a ban that he ought never to have had the power to impose? Mr. Petrillo has this power only because Congress and the Administration have in effect delegated such power to him. If they will revise our ill-considered labor laws, which give Mr. Petrillo the power to impose ruinous boycotts against individual musicians as well as concert halls, theatres, restaurants, transcription companies and radio stations, nobody will have to appeal to Mr. Petrillo not to abuse his powers. They will no longer be his to abuse.

The National Association of Broadcasters
1760 N STREET, N. W. ★ ★ ★ ★ ★ ★ ★ WASHINGTON 6, D. C.
September 11, 1943 SPECIAL A. F. of M. BULLETIN No. 21

The A. F. of M. Hearings Before The War Labor Board

Hearings with respect to the strike by the A. F. of M. against the transcription companies were held on Tuesday and Wednesday of this week and are continuing as this bulletin is written. These hearings were held before Arthur Meyer, Chairman, and Gilbert Fuller and Max Zaritsky, constituting the Panel appointed by the War Labor Board.

The hearings thus far have been devoted to arguments made by Walter Socolow, counsel for the transcription companies, Henry Friedman and Joseph A. Padway, counsel for the Union, and to a statement by James C. Petrillo. The portion of the presentation which has excited the greatest interest in the press has been Mr. Petrillo's statement.

Mr. Petrillo charged government agencies with having allowed themselves to be used by the industries involved to "crush the A. F. of M." He defied anyone to show him "where there isn't enough music in this country." He said of the industries involved:

> "They have got us on the floor, they have got us punch drunk and I don't mind telling you they have got us punch drunk; they have taken us to every agency and they are not stopping yet and I don't suppose they ever will, but as sure as there is a God and just as sure as there is justice we are right in our fight in principle and we will live in that righteous cause or we won't live."

Mr. Petrillo accused the transcription companies of "pulling millions and millions of dollars out of the pockets of the musicians in the United States." He referred to the "large profits" of the broadcasting and recording industries. He also said:

> "Don't forget, gentlemen, that up until this moment the men who make these transcriptions and recordings have lost in the neighborhood of seven million dollars in wages."

Mr. Petrillo said that the matter would have come to a successful conclusion if it had not been for government interference. He was challenged on this point by Mr. Meyer, the Chairman of the Panel, who said:

> "When you make a remark of that kind it seems to me that it suggests that there must be in mind something which represents that possible settlement. You would be very helpful to the panel, you would be very helpful in this entire proceedings if you would make clear what that 'something' in your mind is."

Mr. Petrillo spoke at some length, and was interrupted by the Chairman who said:

> "When a question is asked it should first have an immediate answer, afterwards you can make any extension of it you please. I would prefer, if you would be so kind as to say what it is you had in mind when you stated that this matter would have been settled had it not been for the interference of government agencies. I am asking what type of settlement you had in mind because there must have been one, otherwise that statement of yours would scarcely have made the amount of sense I feel there must be in it."

Mr. Petrillo continued and the Chairman again said that Mr. Petrillo's speech "doesn't answer what I have in mind and I know you would like to give me that answer."

At that point Mr. Petrillo said:

> "I don't think I can make myself any more clear than I have on this."

In short, Mr. Petrillo just never did answer the question.

The hearings will probably continue for the remainder of this week. Meanwhile, Mr. Petrillo has agreed to call a meeting of his International Executive Board next week and to report to Mr. Meyer its present disposition to advance a proposal looking to a settlement of the dispute. Some time next week, presumably on the basis of the Union's position then, the panel will decide on the future course of the hearings.

It will not be possible to summarize the actual proceedings until they are concluded, at which time members will receive a report. There is appended hereto, however, a statement submitted by Mr. Socolow on behalf of the transcription companies which will act as a good digest of the argument submitted by him.

Statement on Behalf of Electrical Transcription Manufacturers

In repudiation of labor's wartime no-strike pledge, the American Federation of Musicians, on August 1st, 1942, went on an unjustified strike against the seven electrical transcription companies which are parties to this proceeding. The strike is still in effect. No electrical transcriptions have been made for these companies by members of the Union for more than thirteen months.

For six and one-half months the Union made no demands upon the employers. Indeed, even after the labor dispute had endured for more than five months, Mr. Petrillo was unable to state clearly to a Senate Committee what he wanted from whom as a condition for permitting Union musicians to resume the making of transcriptions.

Since February 11th, 1943, a series of proposals have successively been advanced by the Union. These are as follows:

> 1. "Members of the Federation will make commercial or sustaining transcriptions, without additional fee to the Federation, provided they are played one time only (the number of copies made of transcriptions to be determined by agreement). With respect to other transcriptions on a rental basis, the Federation shall receive from the company engaged in the business of renting out transcriptions a percentage of the rental charge, such percentage to be agreed upon by negotiation. . . . This fund shall be used by the Federation for the purpose of reducing unemployment which has been created, in the main, by the use of the above mentioned mechanical device and for fostering and maintaining musical talent and culture and music appreciation and for furnishing free live music to the public by means of symphony orchestras, bands and other instrumental musical combinations."

The employers pointed out that the commercial program type of transcription is used only once on a broadcasting station; but they rejected the remainder of the proposal in advising the Union that "the destructive and dangerous fallacy of your proposal is that it assumes that a specific industry owes a special obligation to persons not employed by it—obligations based only on such persons' membership in a union."

Other objections were that the proposal would destroy technical progress, subsidize non-employees, penalize the use of an invention and contravene established governmental policies.

Since there appeared to be no issue with respect to commercial program transcriptions, the employers attempted to end the strike by offering to pay the musicians employed by them for library transcriptions additional compensation in an amount to be negotiated.

Mr. Petrillo, after studying the figures submitted to him, withdrew his original proposal because no increase in wages was sought, and observed that his Union would not terminate the strike even if it received the industry's entire gross receipts, which he characterized as "small peanuts."

> 2. The Union thereupon demanded "that the transcription companies agree with the Union that they would not permit transcriptions made by them to be used by any radio station which may be placed on a national unfair list by the American Federation of Musicians, such demand to apply both to commercial advertising and to library transcriptions." Mr. Petrillo stated that the Union would determine, in its sole discretion, which stations were or were not unfair in accordance with its views from time to time. He gave the transcription companies notice that upon their acceptance of his proposal, the Union might well put 500 broadcasting stations on its unfair list. The Union made it clear that its criterion of fairness would be the willingness of broadcasting stations to maintain a quota of forced employment of Union musicians satisfactory to the Union.

This proposal was rejected not only as to principle but also because:

(a) As a practical matter, the operation of the transcription business would be impossible if the companies attempted to control the use of transcriptions by advertisers or broadcasting stations since such attempted control would destroy the access of the employers to their market; and

(b) The proposal of the Union would involve illegal boycotts, rendering employers liable to money damages as well as for penalties prescribed by law.

> 3. The Union's latest proposal, embodied in an informal suggestion made by Mr. Petrillo while testifying before the War Labor Board, was that a broadcasting station using an electrical transcription should be compelled by the manufacturer of the transcription to employ local Union members in a number equal to those musicians who performed in the making of the transcription. He declared that the function of these stand-bys would be to listen to the music on the transcription and to get paid.

This proposal is merely an implementation of the second.

All of these demands appear to imply that all the members of the Musicians' Union should be guaranteed a permanent livelihood in the field of music.

The transcription companies do not recognize any obligation to the members of the Union whom they do not employ. They do not concede that a person who chooses a calling can divest himself of the economic risks of his occupation.

In this connection, Sir William Beveridge, in his report 'Social Insurance and Allied Services," significantly notes:

> "Men and women in receipt of unemployment benefits cannot be allowed to hold out indefinitely for work of the type to which they are used or in their present place of residence, if there is work which they could do available at the standard of wage for that work."

And his recommendation is equally revealing. He says:

> "Men and women who have been unemployed for a certain period should be required, as a condition of continued benefit, to attend a work or training center, such attendance being designed both as a means of preventing habitation to idleness and as a means of improving capacity for earning."

The theory of the Union, when analyzed, is applicable, if it be accepted at all, to all industry and to all employers. The Union asserts that the manufacturer of an invention should either go out of business or, in the alternative, agree that every person who uses the invention should hire, or preferably pay the Union for, the same number of men as would be used if the invention did not exist. In other words, the Union would exploit the success of an invention which created a market that could not otherwise have existed.

The industrial progress of this country has been achieved through the increasing and successful use of technology. The proposal advanced by the Union, if accepted, would destroy established industries and thwart new technology. The Union's proposal is the more astounding because recording was invented before any living member of the American Federation of Musicians embarked on his career, and hence he is confronted by no conditions with which he was not familiar when choosing his occupation.

The principle implicit in the Union's demand cannot be accepted by industry generally, and by the electrical transcription industry in particular. Electrical transcriptions utilize not only the service of instrumental musicians, but also that of singers, engineers, actors, announcers, sound effects men, and others. If the position of the American Federation of Musicians be upheld, these other unionized crafts would appear to be equally justified in making similar demands. The manufacturer of electrical transcriptions would then be under the necessity of policing every broadcasting station which used its product in order to insure the employment by the station of members of all of these unions in numbers satisfactory to them. This would be a perversion of the economic function of the transcription industry.

The concept embodied in the position of the Union must be repudiated, even if, in fact, there were broad displacement of workers, serious unemployment and a threatened destruction of the workers' union. However, none of these phenomena exists here; indeed, the precise opposite is true.

There can be no question in this case as to whether the work should be done by transcriptions or by the individual. Either the work will be done by transcriptions or, for the most part, it will not be done at all.

Commercial radio stations are located throughout the United States and in communities of every size. Geographical distribution is one of the factors which governs the Federal Communications Commission in the issuance of licenses. In order to serve the public interest, convenience and necessity, stations are required to be on the air for many hours each day, the average for the country being in excess of sixteen hours. It is impossible for most of these stations to survive by the use of local talent alone, even if it were available. Approximately one-fifth of the stations of the United States are located in cities in which there is no musicians' union. In many communities, there is an insufficient number of capable musicians to make up an orchestra.

Radio itself and all of the inventions in the field of music, motion pictures and network broadcasting, serve the useful social purpose of bringing entertainment from the performer to a widespread audience. The principle espoused by the Union seeks to reverse this process. The musical taste of the public has been developed to a high degree because it has, for years, enjoyed the best music performed by the best singers and instrumentalists. The public will not be satisfied with, nor can it be compelled, by any fiat, to accept, any standard of performance other than that to which it has become accustomed. If the Union succeeds in abolishing the electrical transcription industry, many broadcasting stations will die with it because they could not maintain the program standards required by the public.

Statistics of the Union and of the industry should reveal whether electrical transcriptions interfere with the employment of musicians at broadcasting stations. All of these statistics conclusively demonstrate that there has been no such interference. On the contrary, during the period of the development of electrical transcriptions, the membership of the Union has steadily grown. The wage scale of the musician in broadcasting has steadily increased. The amount spent in the broadcasting industry for the employment of musicians has likewise steadily increased.

In his testimony before the Senate Sub-Committee, Mr. Petrillo cited a list of twenty-nine cities which he said constituted his major unemployment problem. There are 143 commercial broadcasting stations in these twenty-nine cities. All but eight of these stations employ Union musicians on terms and conditions satisfactory to the Musicians' Union. Of the eight stations which do not employ musicians, only one is affiliated with a national network. All eight are on local or regional frequencies; three have only 100 watts power (the lowest power granted by the Federal Communications Commission); two have 250 watts and three have 1,000 watts. It will be remembered that key stations on networks have a power of 50,000 watts.

Mr. Petrillo has himself conceded that the smaller stations cannot be expected to employ Union musicians. If it were true that electrical transcriptions created unemployment of musicians, the evidence should be found in these twenty-nine cities.

Mr. Petrillo also stated, at the Senate hearing, that there are 201 network affiliated stations which do not employ Union musicians. A survey discloses that only 83 such stations did not employ musicians during the past year. Of these, 64 have 250 watts power or less. Four are located in cities which have no local union and over which no local union has claimed jurisdiction. Hence, only 15 network-affiliated broadcasting stations of more than 250 watts power, in all of the cities of the United States having local unions, do not employ Union musicians.

According to the best estimates, Union musicians receive for their services in radio broadcasting not less than $30,000,000.00 a year. The Federal Communications Commission's latest figures show that staff musicians now receive from broadcasting stations and national networks more than $8,000,000.00 a year—the highest amount ever shown by the Commission's statistics. Mr. Petrillo has estimated that broadcasters pay another $5,000,000.00 annually for casual employment of musicians. For services in commercial national network broadcasting alone, musicians receive an additional $12,000,000.00 annually. Finally, a sum of more than $5,000,000.00 yearly is paid to them for services on commercial programs broadcast over individual stations and regional networks. The earnings of musicians from radio broadcasting are greater than those of any other group of radio employees, including engineers and executives. Moreover, the average salary paid by broadcasting stations and networks for staff musicians, the highest in its history, is $67.90 for an average work-week of 18.2 hours. And all of these earnings come from relatively new employment opportunities created by invention.

The facts fail to support any claim which is based on displacement of, or interference with, the employment of Union musicians. Instead, Mr. Petrillo, at the National War Labor Board hearing on jurisdiction, said:

> "Now gentlemen when I say out of business I don't mean that we are starving to death, I don't mean that we are really going to go hungry, but the organization is growing with the population of the country. We had a membership of 18,000, today a membership of 138,000 and when the war is over we will probably have 200,000. . . ."

On January 13th, 1943, in answer to a question by the Senate Committee as to whether the Union could fill the needs of broadcasting stations for musicians, Mr. Petrillo testified:

> "I would say to you, Senator, that today we can furnish all the musicians that are needed in radio stations but I doubt, if the war goes on for four or five months, whether we will be able to do that job."

Not four or five months, but eight months, have passed, and that statement has proved abundantly true. Therefore, if for no other reason, it is absurd to compel the transcription manufacturers to go out of business for failing to force on broadcasters quotas of musicians who are unobtainable.

Other evidence demonstrates also that the Union does not have an unemployment problem. The membership of the New York City Local, the largest in the country, has recently repealed a three percent unemployment tax. The Philadelphia Local has announced that free services cannot be furnished to entertain service men because insufficient musicians are available to fill paid jobs. The San Francisco Local has sought permission to use musicians who are now in the armed forces because it cannot assemble, from civilian life, adequate personnel for bands.

The Union's claims of unemployment are based on a tortuous definition of the word. Joseph N. Weber, upon his retirement as President of the Union in 1940, said:

> "Our membership consists of fully one-half of non-professionals who are not entirely dependent on music for a livelihood."

Recent studies indicate that this estimate was over-conservative, because actually only one-third of the membership consists of professional musicians. A comparison of Union rosters with city directories in 112 cities and covering over one-quarter of the Union's membership, discloses that only 34.8% of the members whose names were found in the directories listed themselves as musicians or music teachers. The remaining two-thirds listed themselves as being engaged in more than 250 occupations having nothing to do with music.

A recent personal interview survey made in four characteristic cities by an independent research agency revealed that there was no unemployment whatsoever among members of the Musicians' Union in those cities. Only 33.8% of those members are employed in the field of music, with the remainder in other gainful occupations.

Yet the strike of the Union has curtailed commercial transcriptions which are the principal avenue to national advertising for non-network broadcasting stations. This source of revenue has become even more important with the scarcity in consumer goods, because local advertisers have less need for product advertising and little inclination towards institutional advertising. Many of these stations operate at a loss even under normal conditions.

These independent stations have been described by Chairman Fly of the Federal Communications Commission as being hardest hit by the musicians' strike. Only recently he said that the effect of the strike on these stations has been that of a "creeping paralysis."

As to library transcriptions, these afford the only means whereby independent stations receive a balanced program service for local use, including the latest music, which is designed especially for radio and created by outstanding writers, singers, instrumentalists and directors. The unavailability of such service increases the discrepancy between network and local programs and weans away from the smaller stations the listeners, upon whom depends the well-being of every station.

That this strike interferes with the war effort has been testified to by the leading officials of the Government who are responsible for morale and communications, certified by the Secretary of Labor, and found to be a fact by the National War Labor Board. The war effort is being hampered and an established industry is faced with destruction.

At the National War Labor Board hearing on jurisdiction, Mr. Petrillo cast aside his original pretext for calling the strike. Mr. Almon Roth had asked:

> "Are there musicians out of work at this time?"

And Mr. Petrillo replied:

> "There are not as many musicians out of work as when the fight started. We are doing what the government is doing and everybody else—we are preparing the way for the boys when they come back so they will have a job."

The Union has thus acknowledged the non-existence of any current valid basis for its strike against the transcription companies. By this admission, the immediate termination of this strike can cause no conceivable hurt to the Union or its membership during the pendency of the war, with which period this Board is solely concerned.

Therefore, the National War Labor Board must, on the merits, order the American Federation of Musicians immediately to terminate its strike against the employers who are parties to this proceeding.

Respectfully submitted,

By A. Walter Socolow,

Contract Between Decca and World With The American Federation of Musicians

A contract, which has been signed by Decca Records and World Transcription with the American Federation of Musicians, forms part of this bulletin. This contract does not call for the making of any payment by broadcasters and Decca and World have already formally announced that they will not attempt to pass on to the consumer any part of their cost. The contract does, however, include a recognition of "the principle of a continued interest which all of the members of the Federation have in the use of records containing instrumental music," and which provides for direct payment by the record and transcription companies to the Union.

This is contrary to the declaration of principle in which all record and transcription companies joined in their rejection of the Union's demands on February 23, 1943. This declaration of principle, it will be remembered, received the commendation of the NAB Convention. Decca and World are recording under this contract. None of the other transcription companies which are parties to the War Labor Board proceedings have as yet assented to the agreement; neither have Victor and Columbia which on September 28 became parties to the War Labor Board hearings.

On its face the agreement is not clear as to whether it is a firm agreement for a fixed period at a stated wage scale or whether the Union reserves the right to strike at any time. Presumably, this question will be clarified when the War Labor Board hearings resume on Monday, October 4. Mr. Petrillo, in urging the other companies to sign the agreement, said that it would end the controversy with respect to records and transcriptions. He said that he did not expect any substantial revenue from the agreement during the war, but expressed the belief that the agreement might yield three to four million dollars a year to the Union after the war was over. This estimate would appear to be predicated on an anticipated sale of ten times as many records as have ever before been sold in the history of the recording industry. The contract follows:

Contract Text

September , 1943, as of September 20, 1943

Decca Records, Inc.
50 East 57th Street
New York, New York

Gentlemen:

This is to advise you that during the term of this contract you and your subsidiary companies may employ members of the American Federation of Musicians upon the following terms and conditions:

1) You shall use only members in good standing of the American Federation of Musicians for the performance of all instrumental music in recording phonograph records and electrical transcriptions (Hereinafter sometimes referred to as "recordings"), and when employing persons who are eligible for membership in the American Federation of Musicians you shall employ only such persons as shall be members thereof in good standing;

2) We shall exercise full authority in order that our locals and members of the Federation engaged in or pertaining to such recording activities shall do nothing in derogation of the terms and intent of this agreement;

3) Immediately upon the making of any recording and prior to its release, you shall advise the Federation of such recording, of the serial or other number thereof, and any additional information in connection with any such recording which we may reasonably require. Upon demand by the Federation you shall promptly furnish to it a copy of any such recording including those made or pressed by you in Canada;

4) Upon the execution of this agreement you shall promptly furnish to the Federation a copy of your current catalogue or recordings, and thereafter from time to time as and when issued, you shall supply a copy of all supplements thereto;

5) You shall not require, request, induce, or in any manner attempt to influence any member of the Federation to play, or perform for recordings, or render services pertaining thereto, except as permitted by this agreement;

6) You shall not dub, re-record, or re-transcribe any recordings except upon previous written notice of any such intention to be given to the member through whom the performers were originally employed, as well as to the Federation; and upon payment to the said member of the full scale for all performers applicable to such new use;

7) You shall not require members of the Federation to make phonograph records containing commercial advertisement or any recordings to

be used by or for actors as accompaniment for or in connection with their performances;

8) No changes in our Constitution and By-Laws will be made during the term of this agreement which shall contravene any of the provisions herein;

9) All laws, rules and regulations of the American Federation of Musicians (a copy of which is herewith submitted) are made part of this agreement;

10) You shall pay our members for the services rendered by them in the making of recordings such sums as you may agree upon with them, but which in no event shall be less than scale;

11) All contracts for recordings between you and members of the Federation shall contain the following provisions:

> "As the musicians engaged under the stipulations of this contract are members of the American Federation of Musicians, nothing in this contract shall ever be construed as to interfere with any obligation which they owe to the American Federation of Musicians as members thereof."

Said contract shall also contain the following paragraph which is part of a resolution adopted by the American Federation of Musicians:

> "That members of the American Federation of Musicians are authorized to accept employment for the purpose of making phonograph records and electrical transcriptions by such phonograph and electrical transcription companies as shall have entered into an agreement with the American Federation of Musicians permitting the employment of its members upon the terms and conditions contained in the standard form of agreement promulgated by the American Federation of Musicians to its members on September —, 1943."

12) In order to give effect to the principle of a continuing interest which all the members of the Federation have in the use of recordings containing instrumental music, you shall pay to the American Federation of Musicians the following:

a) For phonograph records manufactured or produced by you or others from masters hereafter recorded by you containing performances by members of the Federation, and which phonograph records are sold by you or by the lessees of your masters to others a payment equal to the following:

¼-cent for each record, the manufacturer's suggested retail price of which does not exceed 35 cents:

½-cent for each record, the manufacturer's suggested retail price of which is not more than 35 cents but does not exceed 50 cents:

¾-cent for each record, the manufacturer's suggested retail price of which is more than 50 cents but does not exceed 75 cents:

1 cent for each record, the manufacturer's suggested retail price of which is more than 75 cents but does not exceed $1.00:

2½-cents for each record, the manufacturer's suggested retail price of which is more than $1.00 but does not exceed $1.50:

5 cents for each record, the manufacturer's suggested retail price of which is more than $1.50 but does not exceed $2.00:

2½% of the sale price of each record, the manufacturer's suggested retail price of which exceeds $2.00.

You have advised us that the manufacturers' suggested retail prices as referred to in the foregoing schedule are published in your catalogue of records.

b) For electrical transcriptions, manufactured from masters hereafter recorded by you containing performances by members of the Federation, and which are intended for more than one use by your customers, lessees or licensees as part of your library service or otherwise, a payment equal to 3% of the gross revenues derived by you from the sale, lease, license or other disposition thereof.

For spot announcement transcriptions commonly known as "jingles," a like payment of 3% of the gross revenues shall be made.

c) For commercial electrical transcriptions manufactured for commercial broadcasting, intended for a single use and only so used, there shall be no payment pursuant to the terms of this paragraph 12.

d) All payments stipulated in this paragraph 12 shall be made to the Federation pursuant to the resolution referred to in the 11th paragraph hereof within 45 days following each calendar half-year and shall be accompanied by a statement certifying all payments required to be made pursuant hereto.

e) The Federation at its option shall have access and right of examination of your books and records relating to this subject at all reasonable times.

f) It is understood that your obligation to make the payments pursuant to this paragraph 12 hereof shall continue after the expiration of this agreement.

13) You shall not interfere, assign or attempt to interfere or assign your rights pursuant to this agreement.

14) During the term hereof, we will not enter into any agreement with any phonograph rec-

ord or transcription companies upon terms more favorable than those contained in this agreement. In the event, however, that we shall make any agreement with any other phonograph record or transcription company upon any terms more favorable or different from those contained in this agreement, you shall have the right at your option to cause your agreement to be conformed therewith.

15) You shall not make, or permit the use of your facilities for making, or otherwise give aid or assistance in the making of any phonograph recording or transcription which shall utilize instrumental music, for or on account of any other persons engaged in the phonograph recording or transcription business unless authorized in writing by the Federation.

16) You agree not to make recordings or transcriptions of any radio program broadcast from a studio or off the air, without written permission first obtained from the Federation, however, since it has been the practice of the Federation in the past to grant such permission, it is agreed that permission will not be unreasonably withheld and that when granted it shall be upon the payment of transcription scale.

17) The term of this agreement shall be for the period commencing as of September 20, 1943, and terminating December 31, 1947.

The National Association of Broadcasters
1760 N STREET, N. W. * * * * * * * WASHINGTON 6, D. C.
October 29, 1943 SPECIAL A. F. of M. BULLETIN No. 23

The Petrillo Situation To Date

(This bulletin contains the NAB Steering Committee Statement of October 23, 1943; a report by Neville Miller, Steering Committee Chairman, to the broadcasting industry; the latest contract signed by four recording companies with A. F. of M.; the February 23, 1943, letter from the transcription companies to Mr. Petrillo, and recent editorials from the newspapers on the Petrillo situation.)

NAB STEERING COMMITTEE CONDEMNS PAY PRINCIPLE IN AFM RECORDING DEALS

The full statement follows:

"With the signing of contracts with James C. Petrillo by four more transcription companies, it becomes apparent that Mr. Petrillo has established in the recording field a most vicious principle. By the terms of the contract, Mr. Petrillo levies a tax on the companies for the privilege of hiring members of his union, which tax is paid direct to the union. Although an attempt is made to gain public approval of administration of the fund by the appointment as 'advisors' of public representatives, who have no vote, such procedure in no way mitigates the evils of the principle.

"This principle has been condemned as setting up a private system of unemployment relief. In our view its significance is even more appalling. We regard the principle as being as economically and socially unsound as extortion is immoral and illegal. We believe that its widespread application in this country, which has depended for its growth on the development and use of invention, will impair our future prosperity. We hold that its perpetuation will thwart democracy within the labor movement itself, and be destructive of good relations between all labor and all industry. For these, as well as for other cogent reasons, we are certain that most American citizens will join us in condemning and in rejecting this principle.

"The panel which was appointed by the National War Labor Board to hold hearings and report on the merits of the dispute departed from the task assigned to it to assume a mediatory role, and in this capacity its members participated in bringing about the contract which embodies this principle.

Three Continue Opposition

"Columbia Recording Corporation, RCA-Victor, and NBC-Thesaurus, with courage which should call forth the commendation of the entire broadcasting industry, have continued their opposition to the principle of direct payment to the union. These companies now find themselves, however, in an obviously unfortunate position. The merits of the principle which they oppose may now be adjudicated by the very panel which as mediator brought about the making of the contract which embodies the principle the panel is now supposed dispassionately to evaluate.

"Although Mr. Petrillo was the originator of the idea of a direct levy upon the companies, he had made little headway in the hearings before the National War Labor Board panel until Decca Records and its subsidiary, World, deserted the principles set forth in a joint letter which they, with the other recording companies, had addressed to the Union on February 23, 1943. Such action by Decca and World placed four of the other companies under such competitive pressure that they felt obliged to accept the principle, despite the fact that it was thoroughly repugnant to all of them.

"The Committee deplores the making of the contracts which embody the principle of direct payment to the union. It regards the payment of moneys directly to a union as equally destructive of the rights of employers and union members. For unions to collect direct tribute as compensation for permitting their members to render services is not a forward step in unionism, but rather a reversion to a philosophy which regards these members as chattels to be disposed of at the union's option.

"There is no economic or social theory which supports such an exaction. There are no facts which justify its application in the present case. The members of the American Federation of Musicians have profited through the invention of recording, and the union has no unemployment problem."

Members of the Steering Committee are: Neville Miller, chairman; Mark Ethridge, WHAS, Louisville; John J. Gillin, Jr., WOW, Omaha; Kolin Hager, WGY, Schenectady; Harry Le Poidevin, WRJN, Racine; Paul W.

Morency, WTIC, Hartford, and G. Richard Shafto, WIS, Columbia, S. C.

October 27, 1943.

To The Broadcasting Industry:

Fifteen months ago the Board of Directors of the National Association of Broadcasters appointed a Steering Committee in connection with the strike of the American Federation of Musicians against recordings. The recording of phonograph records and electrical transcriptions has been partially resumed upon a basis concerning which the Steering Committee has expressed itself in the public statement which is printed in this bulletin.

When James C. Petrillo announced his strike, he stated that the purpose of the strike was to exact payment from the broadcasting industry. Indeed, in August of this year counsel for Decca Records informed representatives of the industry that the lowest figure which Mr. Petrillo would consider was $18,000,000, to be paid directly to the Union by broadcasters over a five year period. Previously, Mr. Petrillo's counsel had set $15,000,000 a year as his anticipation of the industry's payment, in his testimony before the Senate Committee. In the light of the initial objectives of the Union, the fact that phonograph records, commercial transcriptions and library transcriptions are again being manufactured at no additional cost to the broadcasting industry might be viewed as a victory for broadcasters.

Thoughtful consideration of the implications of the contract which the American Federation of Musicians has signed with a number of companies must, however, temper this judgment.

Payments to Union Called For

The contract calls for direct payments to the union from employers in return for the privilege of permitting the employer to give work to the union's members at mutually satisfactory terms and conditions. The general acceptance of this principle would, it is obvious, be prejudicial to the national interest as well as to our own. The amount all of the transcription companies which have signed the contract will pay during the first year of the contract will probably not be in excess of $10,000 nor will it apparently exceed $30,000 during any year of the contract. The amount which Mr. Petrillo's union would have received if all of the record companies had signed his agreement would be, in addition, several hundred thousand dollars a year. These amounts are not large when viewed in the light of Mr. Petrillo's statement that the members of his Union have lost $7,000,000 in consequence of the strike. A precedent has, however, been established whereby Mr. Petrillo may implement whatever future demands he may wish to assert.

With commendable courage in the face of severe competitive handicaps, three companies, Columbia Recording Corporation, RCA Victor, and NBC Thesaurus, have refused to sign the contract with the Union, and have asked the panel of the National War Labor Board to resume hearings on the merits of the case. The recording situation has not, therefore, been resolved, and it will not be until the panel renders its decision accepting or rejecting the principle of direct payment to the Union.

Broadcasters may be interested in a brief review of the events leading up to the present situation. Mr. Petrillo refused to formulate his demands until, under pressure from the Senate Committee headed by Senator D. Worth Clark, he transmitted them to the recording companies on February 11, 1943. These demands incorporated the principle of direct payment to the Union. The demands were rejected in a letter dated February 23rd, which sets forth the reasons for the rejection so admirably that it is reprinted as a part of this bulletin. It will be noted that Decca and World, which subsequently voluntarily accepted the principle of direct payment, were among the signers of this communication.

WLB Gets Dispute

When independent negotiations between the transcription companies and the Union failed, and when the United States Conciliation Service of the Department of Labor was equally unsuccessful in bringing about agreement between the parties, the dispute was certified to the National War Labor Board. The Board accepted jurisdiction but did not follow its customary procedure of ordering the Union to terminate the strike, despite the fact that Mr. Petrillo had announced his defiance of the Board by stating at the outset of the hearing that he would not obey such an order.

The Board appointed a panel to hear the issues, and the hearings were progressing satisfactorily when, on September 20th, Decca and World signed a contract with the Union. Counsel for the other companies which were parties to the proceeding then asked the panel to issue an order returning the men to work pending a decision in the case, but the motion was denied. Negotiations were then begun, with the panel assuming a mediatory role, and on October 20th Associated Music Publishers, Inc., Lang-Worth Feature Programs, Inc., Standard Radio and C. P. MacGregor signed a contract with the Union. This contract, perforce, contains the objectionable principle, though in other respects it marks an advance over the agreement signed by Decca and World:

'No Strike' Clause New

(1) The Decca and World contract did not contain a "no strike" clause, and Mr. Petrillo stated that under that agreement he felt free to strike at any time. The subsequent contract includes an explicit "no strike" clause with respect to library transcriptions, although the Union remains free to strike at any time with respect to phonograph records and commercial transcriptions intended to be used only once on a broadcasting station.

(2) The Decca contract contained no clause freezing the compensation of musicians. The subsequent contract keeps in effect for two years the rate of July, 1942.

(3) The subsequent contract has a somewhat more explicit description of the use by the Union of the moneys which it will receive under the contract. The funds are to be deposited in what the Union terms an "employment fund" to be used "only for the purpose of fostering and propagating musical culture, and the employment by it (the union) of live musicians, members of the Federation for the rendering of live music." It will be noted that nowhere is there any statement that the money will be used for the benefit of otherwise unemployed members of the Union. Indeed, unemployment is nowhere mentioned in the contract.

(4) The second contract also contains a provision that two persons shall be appointed by the Chairman of the National War Labor Board to advise with respect to the disbursement of the fund, but these persons are given "no power of vote."

Petrillo Changes Position

Throughout the many phases of the recording strike, Mr. Petrillo has constantly changed his position. Most significant among these changes is the abandonment by the Union of the claim of an existing unemployment problem, and reliance, instead, as justification for the Union's actions, on nebulous post-war planning. The main reason for this shift has been the activity of the NAB in gathering information with respect to the American Federation of Musicians, and the employment of the members of that Union by the broadcasting industry. The result of the NAB's factual and legal researches have been made available to all interested parties, and have played a conspicuous role during the duration of the controversy. Indeed, the results of these researches will continue to have usefulness not only in connection with the recording conflict but in connection with any claims which the American Federation of Musicians may choose to assert against the broadcasting industry in the future.

Mr. Petrillo has further succeeded in enmeshing himself in a web of opportunistic contradictions, which the NAB has been careful to bring to public notice.

When Elmer Davis, Director of the Office of War Information, asked Mr. Petrillo to rescind his ban in the interest of the war effort, Mr. Petrillo refused; but he did concede that commercial transcriptions, played only once on a station and then destroyed, were not detrimental to his membership. Shortly, thereafter, he reaffirmed that his Union would no longer permit the making of commercial transcriptions.

When Is 'Strike' Not 'Strike'

In appearing before the Federal Court in Chicago, where the Department of Justice unsuccessfully sought a temporary injunction against Mr. Petrillo and the Union, Mr. Petrillo and counsel argued that the ban was a strike. When the strike was brought before the National War Labor Board, Mr. Petrillo suddenly discovered that no strike existed and that the ban constituted a final refusal on the part of his members to make electrical transcriptions.

When Mr. Petrillo appeared before the Senate Committee, he and his counsel disclaimed any intention permanently to bar amateur bands and orchestras from the air, but even the finest of such groups has not yet been permitted to return to broadcasting activity.

Also, when the Senators asked Mr. Petrillo if he had in mind the destruction of the basic invention of recording, he quickly disavowed any such intention. And yet he told the War Labor Board that his members had forever abandoned the making of electrical transcriptions and would seek to prevent anyone else from engaging in that field—a position from which he has, obviously, again departed.

Mr. Petrillo has vigorously criticized the NAB for its work in bringing his actions before the public. The NAB was active, and we believe effective in this respect. However, it is well to note that many thousands of news items, editorials and cartoons appeared with respect to Mr. Petrillo's activities during the month prior to the formation of the NAB's Steering Committee and before the NAB took any steps with respect to the recording ban. During this month every one of the personal attacks and characterizations to which Mr. Petrillo has so vehemently objected was published by the press on its own initiative and inspiration. It is clear, therefore, that the almost universal disapproval of Mr. Petrillo has resulted from what Mr. Petrillo himself has done. Perhaps the best tribute to the NAB's diligence in the recording matter was paid by Mr. Petrillo when, in January, he charged that the NAB had spent, in a public relations campaign alone, more than ten times what the NAB had spent in connection with the entire A. F. of M. matter.

No Let-Up by NAB

It goes without saying that the continuing problem of the American Federation of Musicians activities will receive constant consideration by the NAB and will be the subject of discussion at the forthcoming meeting of the NAB's Board of Directors. Meanwhile broadcasters will continue to point out that their industry has made a contribution to music and musicians which has been excelled by no other group or organization. Broadcasting has enormously increased the appreciation and understanding of the best music. It has increased the appeal of popular music. It has conferred upon the band leaders unparalleled earning power. Working musicians receive for their services in radio broadcasting in excess of $30,000,000 a year. Staff musicians employed by broadcasting stations receive an average wage of $67.90 per week for an average work week of less than eighteen hours. The broadcasting industry has displaced no musicians. It has, on the contrary, given employment to thousands and opened new employment opportunities to countless thousands more. An industry which has consistently met the highest standards in the treatment of all of its employees will, therefore, continue to resist exactions which are based upon both false premises and unsound principles.

NEVILLE MILLER, *Chairman.*

The 'Latest' Contract

October 20th, 1943.

Gentlemen:

This will confirm our agreement as follows:

(1) You shall use only members in good standing of the American Federation of Musicians as instrumental musicians, conductors, arrangers, and copyists, in recording phonograph records and electrical transcriptions (hereinafter sometimes jointly referred to as "recordings").

(2) We agree that throughout the term of this agreement, so long as you perform your obligations hereunder, our members shall have the right and permission to enter into and continue in your employ and you shall have the right to use their services for the purposes aforesaid upon the terms and conditions hereinafter set forth.

(3) We warrant and represent that we have the right and power to enter into this agreement and to grant you the rights and benefits set forth herein. We shall exercise full authority in order that our locals and members of the Federation engaged in or pertaining to record-

ing activities shall do nothing in derogation of this agreement.

(4) Immediately upon the making of any recording hereunder and prior to its release, you shall advise the Federation of such recording, of the serial or other number thereof, and any additional information in connection with any such recording, which we may reasonably require. Upon demand by the Federation, you shall promptly furnish to it a copy of any such recording, including those made or pressed by you in Canada.

(5) Upon execution of this agreement, you shall promptly furnish to the Federation a copy of your current catalogues of phonograph records and library transcriptions, and thereafter from time to time as and when issued, you shall supply a copy of all supplements thereto.

(6) You shall not require, request, induce, or in any manner attempt to influence any member of the Federation to play or perform for recordings, or render services pertaining thereto, except as permitted by this agreement.

(7) You shall have the right to dub, re-record, or re-transcribe any of your recordings for slide films or as a part of any manufacturing processes by which you make the recordings available for the uses for which they were originally intended. Except as herein expressly provided, you shall not dub, re-record or re-transcribe any recordings containing the services of members of the Federation except on previous written notice of any such intention to be given to the member through whom the musicians were originally employed, as well as to the Federation, and upon payment to the said member of the full scale for all musicians applicable to such new use. Nothing contained in this agreement shall in any way modify any obligation independent of this agreement which you may be under to obtain from our members such individual approval as may be necessary in connection with any dubbing, re-recording, or re-transcribing of records.

(8) You shall not require members of the Federation to make phonograph records containing commercial advertisements; or to make any recordings designed for use as accompaniment by performers for or in connection with their public performances. "Accompaniment" as used in this Paragraph shall not be construed to include signatures, bridges, background and mood music, sound effects and fanfares, incidental music in connection with scripts, etc.

(9) All laws, rules and regulations of the American Federation of Musicians (copy of which is herewith submitted) are made part of this agreement.

(10) We agree that any changes in our Constitution, By-Laws, rules or regulations, which may be made during the term of this agreement or which may conflict with any of the provisions hereof, shall not impose any conditions not herein contained or change your rights hereunder.

(11) You shall pay our members for the services rendered by them in the making of recordings such sums as you may agree upon with them but which, in no event, shall be less than the respective wage scales. We agree that the wage scales for the services of our members, which were in effect July 1942, shall be continued without change for a period of two years from October 20, 1943. Either party may give notice of its desire to change the wage scales for the period from October 20, 1945 to December 31, 1947. Such notice shall be in writing and shall be mailed not later than April 20, 1945. In the event that such notice is sent and that negotiations fail to produce an agreement regarding new wage scales within said six-month period, either you or we shall have the right to terminate this agreement for the services of our members as of October 20, 1945.

(12) All contracts for recordings between you and the members of the Federation shall contain the following provisions:

> "As the musicians engaged under the stipulations of this contract are members of the American Federation of Musicians, nothing in this contract shall ever be construed as to interfere with any obligation which they owe to the American Federation of Musicians as members thereof."

(13) In consideration of the rights, privileges, and permissions granted to you hereunder, you shall pay to the "Employment Fund" of the American Federation of Musicians the following:

(a) For phonograph records manufactured or produced by you or others from masters hereafter recorded by you during the term of this agreement, containing performances by members of the Federation, and which phonograph records are sold by you or by the lessees of your masters to others, a payment equal to the following:

¼ cent for each record, the manufacturer's suggested retail price of which does not exceed 35 cents;

½ cent for each record, the manufacturer's suggested retail price of which is more than 35¢ but does not exceed 50 cents;

¾ cent for each record, the manufacturer's suggested retail price of which is more than 50¢ but does not exceed 75 cents;

1 cent for each record, the manufacturer's suggested retail price of which is more than 75 cents but does not exceed $1.00;

2½ cents for each record, the manufacturer's suggested retail price of which is more than $1.00 but does not exceed $1.50;

5 cents for each record, the manufacturer's suggested retail price of which is more than $1.50 but does not exceed $2.00;

2½ percent of the sales price of each record, the manufacturer's suggested retail price of which exceeds $2.00.

(b) For electrical transcriptions, manufactured from masters hereafter recorded by you containing performances by members of the Federation, and which are intended by you for more than one use by your customers, lessees or licensees as part of your library service or otherwise, a payment equal to 3 percent of the gross revenues derived by you from the sale, lease, license or other disposition thereof.

In the event that at the time the calculation of the first payment due to us hereunder proves to be unduly burdensome or otherwise difficult of computation by you, then and in such an event we agree that we shall endeavor to agree with you upon a new basis of calculating an amount equivalent to the sum payable to us hereunder. If we are unable so to agree within a period of thirty (30) days from the date on which such payment shall be due hereunder, then and in such an event we agree to submit such dispute to Honorable Arthur S. Meyer or any other person designated by the Chairman of the National War Labor Board for determination.

(c) For commercial electrical transcriptions manufactured for broadcasting and intended by you for not more than a single use by any one station, there shall be no payment to us pursuant to the terms of this Paragraph 13. You agree that in connection with the sale or other distribution of the electrical transcriptions mentioned in this Paragraph 13 (c), which are manufactured from masters hereafter recorded by you during the term of this agreement, and which contain performances by members of the Federation as aforesaid, you will stipulate for the benefit of the Federation an obligation that your customers shall not use or authorize the use of such electrical transcriptions more than once on any particular station without the prior written approval of the Federation.

(d) All payments provided for in this Paragraph 13 shall be made to the Federation within forty-five days following each calendar half-year, and shall be accompanied by a statement certifying all payments required to be made pursuant hereto.

(e) The Federation at its option shall have access and right of examination of your books and records at all reasonable times relating to the payments referred to in this Paragraph 13.

(f) Your obligations to make the payments pursuant to this Paragraph 13 shall continue after the expiration or other termination of this agreement, with respect to any and all recordings from masters made hereunder during the term hereof.

(14) The American Federation of Musicians will use the "Employment Fund" described in this agreement only for the purposes of fostering and propagating musical culture and the employment by it of live musicians, members of the Federation, for the rendering of live music. This Fund will be kept separate and apart from all other funds of the Federation. No part of this Fund will be used for the payment of the salaries of any officer of the Federation, or for any other purpose than the foregoing. However, up to 5% may be used for the purpose of administering the Fund. In the event administration expenses exceed 5%, the Federation will meet such additional expenses from its own Treasury.

The Federation has in the past submitted at its Conventions a full and detailed financial statement, accounting and annual report audited by certified public accountants to be submitted to the membership of the Federation, and such reports are made public. With respect to the Employment Fund referred to herein, a similar detailed statement, financial accounting and report will also be made annually and in like manner.

In administering the Fund, the American Federation of Musicians will, with a view to best serving the public interest, consult from time to time with an Advisory Committee to be created forthwith. Such committee shall have no power of vote. The Advisory Committee will consist of two persons to be selected and appointed by the Chairman of the National War Labor Board or, in the event that the present National War Labor Board shall not be in existence throughout the term of this contract, then successor appointments shall be made by the Secretary of Labor of the United States. The necessary traveling and other expenses of the Advisory Committee will be paid by the American Federation of Musicians and charged to the Fund, but the same shall not exceed $1500. in any year.

The purpose of consulting with the Advisory Committee will be to receive advice and suggestions from the Advisory Committee concerning the administration of the fund.

(15) The rights granted to you under this agreement are hereby declared to be personal to you, and you agree not to transfer, assign or attempt to transfer or assign this agreement without our prior written consent, which consent shall not be unreasonably withheld.

(16) In the event that we shall make any agreement permitting the making of phonograph records or electrical transcriptions, during the term hereof, upon any terms or conditions more favorable than or different from those contained in this agreement, you shall have the right at your sole option automatically to cause this agreement to be conformed therewith.

(17) You shall not make or permit the use of your facilities for making or otherwise give aid and assistance in the making of any phonograph records and electrical transcriptions which contain instrumental music for or on account of other persons engaged in the phonograph record or electrical transcription business who is not signatory to an agreement with us, permitting the employment of our members, unless authorized in writing by the Federation.

(18) Except as otherwise provided in this agreement, and so long as you perform your obligations hereunder, we agree that throughout the term of this agreement we shall exercise no influence or restraint upon our members against entering or remaining in your employ, to the end that there shall be no cessation or interruption of your employment of our members hereunder in the making of recordings, in connection with your business. However, our obligation under this paragraph shall not extend to phonograph records or to that type of recording known as commercial electrical transcriptions hereinabove referred to in Paragraph 13 (c).

(19) You agree not to make recordings of any radio programs containing the services of our members, off-the-line or off-the-air, without first obtaining from the Federation written permission, except that we agree that no such permission shall be necessary in instances where

(a) Recordings are for reference or file purposes, or

(b) For the purpose of making delayed broadcast transcriptions, which have been authorized in writing by the Federation.

The Federation agrees that in all other cases it will not unreasonably withhold permission to make such off-the-air or off-the-line recordings, and that in such other instances where granted, permission shall be given on payment of transcription scale to the members of the Federation concerned. This agreement shall not in any way modify any obligation independent of this agreement which you may be under to obtain from our members such individual approvals as may be necessary in connection with such off-the-line or off-the-air recordings.

(20) The term of this agreement shall be for the period commencing as of October 20, 1943, and terminating December 31, 1947.

If this is in accordance with your understanding, kindly execute both copies of this letter to constitute it an agreement between you and us.

AMERICAN FEDERATION OF MUSICIANS
OF THE UNITED STATES AND CANADA

BY JAMES C. PETRILLO, *Pres.*

ACCEPTED AND AGREED TO:

(Text of the Decca contract was reprinted in the Special A. F. of M. Bulletin No. 22, issued October 1, 1943.)

The Recording Companies' Letter

New York, February 23, 1943.

Mr. James C. Petrillo, President,
American Federation of Musicians
1450 Broadway
New York, N. Y.

Dear Mr. Petrillo:

After meeting with you on February 15th, the undersigned companies engaged in various phases of the recording and transcription business met to consider the proposals which you had distributed on February 12th. Considerable time has been spent by us in an effort to find a response which would result in your permitting the re-employment of your members. Any such response must be viewed in relation to these prior facts:

On June 25, 1942, without previous notice or demands you announced that you would not allow any of your musicians to perform for recordings after July 31st. This meant a complete cessation of recording because we had been operating under a license from you which imposed on us a "closed shop" for your union. Under this license, we had been paying your members at rates which are among the highest for skilled service in any industry. In addition substantial royalties for each phonograph record manufactured and sold have been paid to the musicians or orchestras who made them. Although hours and other working conditions were beyond criticism, you nevertheless called a strike, without previous notice or demands.

While you allege wholesale unemployment of your members (a claim we deny), you have continued this strike and the resulting unemployment for a period of almost seven months, to date. In doing so, you disregarded pleas of Elmer Davis of the O.W.I. on behalf of both military and civil officials, that the strike was harmful to the War effort. During those seven months you at no time offered to return your members to work or even to state the conditions upon which you would do so. This continued until a Senate Committee under the Chairmanship of Senator D. Worth Clark of Idaho insisted that you make some proposal. Even now your proposal is a proposal in form only.

You propose that the recording companies pay an additional sum directly to the union over and above their payments to the musicians employed. You further propose that this sum be accumulated or disbursed in the union's uncontrolled discretion *for the benefit of union members who render no service whatsoever to the recording companies.* The destructive and dangerous fallacy of your proposal is that it assumes that a specific industry owes a special obligation to persons not employed by it,—an obligation based only on such persons' membership in a union. In addition to the inherent unsoundness of such a proposal, the following objections are at once apparent:

(a) *Obstructs Technical Progress*

We are alarmed at the damage which might be done to the whole field of technical and technological improvement if the manufacturer of any new device, of proven value to the people as a whole, were to be saddled with the costs of special industry unemployment relief in addition to the already heavy costs of pioneering research and development, and subsequent promotion.

(b) *Subsidizes Non-Employees*

We do not believe that our companies, who before your ban were employing the maximum number of musicians at the highest wages in the history of the music industry, should be asked to assume responsibility for unemployment, even if such unemployment exists, of such of your union members who are not and cannot be employed by us.

(c) *Penalizes Employment and Use*

We cannot approve a proposal which imposes a private tax upon every phonograph record manufactured and sold when it is obvious that the records used in the home, far from creating unemployment, have been the source of much profitable employment to your members. This has been publicly and officially proclaimed on more than one occasion at your own union's conventions. Such records used in the home constitute at least eighty percent of the total phonograph record output, and thus, under your proposal, eighty percent of your tax would ultimately fall squarely on the public which buys records for home use and is in no way responsible for whatever unemployment you may claim exists.

(d) *Duplicates Government Relief*

The Government has provided taxes for unemployment relief. A second tax for a new private system aimed at the same relief seems wholly unjustified. Similar proposals could, with no more excuse, be made by singers, engineers and others contributing to the high quality of our products. Any such private and isolated system of unemployment relief within an industry is not only contrary to public policy but would be in direct conflict with the various plans under discussion in Government circles for the expansion of uniform and nation-wide social security measures. No private and limited scheme for the benefit of a few within an industry can be pyramided on top of Federal and State social security plans without creating serious inequities. Certainly mere membership in a union should not entitle a member to special privileges from an industry which does not employ him but happens to employ some of his fellow members.

We recognize that because a social philosophy is new it is not necessarily wrong. What you have proposed is a startling new kind of social philosophy for both industry and labor. While we believe that it is wholly wrong in principle, we doubt that either a single union or a single industry is qualified to be the final judge. Only the people of the United States are qualified to decide whether multiple systems of unemployment relief administered by a variety of private as well as governmental agencies shall now be created. Authority for the application of such basically new social theory should therefore come from the people's representatives in the Congress. Such sanction would necessarily be accompanied by rules and regulations defining the limits, requirements and approved objectives of such union relief funds, and subjecting the union and its administration of such funds to Governmental control and supervision. As in the case of pension and retirement plans created by corporations for the benefit of their employees, the Treasury Department would unquestionably desire to participate in such regulation and supervision.

This is not rhetoric but plain statement of fact because only the Congress should be called upon to answer such fundamental questions as the following:

(a) Would not such a payment directly to a union offer an easy means of evading the "wage freeze" regulations; or, on the other hand, would it not be deemed an indirect increase in compensation to the members employed and, as such, in violation of the regulations?

(b) If, on the other hand, it were ultimately determined that the additional payment directly to the Federation were not additional compensation, direct or indirect, to the employees, would not such a payment be merely a gratuity, and therefore a waste of a company's assets which would subject the company's management to liability under the law?

(c) Would not your proposal be in violation of Section 8 of the National Labor Relations Act which provides that it shall be an unfair labor practice for an employer to "contribute financial or other support" to any labor organization?

(d) What would the Treasury think of your proposal if it resulted in diverting taxable income in the hands of the employer to non-taxable receipts in the hands of your union?

(e) If on the other hand the Treasury Department refused to allow such payments as a deductible expense of the employer, would not the employer be compelled to pay not only the contribution to your fund but also an income tax on the amount of that contribution?

(f) Would not any plan for creating artificial employment for unemployed members of the Federation be contrary to the policy of the Manpower Commission, which is seeking to draw into War industries at least those persons not presently employed?

(g) Would not such a payment as you propose subject both you and us to the charge of a conspiracy to maintain or to increase prices,—and a resulting prosecution by the Government or civil suit by an injured consumer.

Only if you procure Congressional authority for the creation of a fund in accordance with your proposal could such a proposal become operative without raising many presently unanswerable questions.

Pending such Congressional authority for a plan which you yourself have termed "absolutely new," we suggest that you permit your members to return to work immediately and produce phonograph records and transcriptions which are sorely needed for both civilian and military morale.

You know of course, that we stand ready to meet with you at all reasonable times when you have anything further to submit. We want you also to know that the views expressed represent our individual as well as our joint decisions.

Very truly yours,

PETRILLO'S VICTORY

The terms of the contract that the Petrillo union has signed with Decca Records, Inc., have now been made known, and they confirm the worst misgivings. Under the contract the company agrees to pay directly to the union a fee on every record sold. The company must file with the union the serial number of each record, together with additional information that the union "may reasonably require." The union may examine the employer's financial records. In return for these and other concessions from the company, it is hard to see what the

Petrillo union gives except willingness to end its strike or boycott. It agrees that all its laws, rules and regulations are formally made a part of the contract. This protects, among other things, the union's continued right to call a strike when it deems it necessary. The union also agrees that it will not change its constitution or by-laws to contravene the terms of the pact. The practical effect of this would appear to be to prevent the members of the union from voting to have the record fees paid to the actual makers of the records, or from changing the constitution or by-laws to give them any greater control of the union's affairs than they have at present.

It need hardly be pointed out how dangerous the precedent here established would be. Under it Mr. Petrillo levies a private tax on employers. At best he will administer the proceeds—estimated at $500,000 annually if all record companies accept the terms—to set up his own private system of unemployment relief. But there is no public control whatever of the manner in which he uses these funds. If only a small part of the funds do go to pay unemployed musicians, if the bulk of them are used instead to increase the salary or expense accounts of Mr. Petrillo and other union leaders, neither the record companies nor the consuming public that will ultimately pay this private excise tax through higher record prices will have anything to say about the matter. The arrangement renders Mr. Petrillo and his fellow-union leaders financially independent even of the members of their own unions.

If past experience is any guide, the Administration and Congress will be complacent about this contract. Why should they interfere, they will say, with an arrangement that a private concern has voluntarily agreed to? But to take such an attitude is to be willfully blind to the main point, which is that Federal labor policy itself has placed in the hands of labor leaders the private irresponsible powers which enable them to drive bargains so clearly against the public interest.

Baltimore Sun

INCREASING THE STATURE OF MR. J. CAESAR PETRILLO

Previous suggestions that Mr. James C. (for Caesar) Petrillo, dictator of the American Federation of Musicians, indulged in a strategic retreat when he decided to let one of the popular recording companies use his union subjects are refuted by the actual terms of the contract now made public. Plainly he demanded—and received—an unconditional surrender.

Several weeks ago the report was that he had abandoned his stand for payment directly into his treasury of fees on all records sold. He was said to be willing to permit the company to pay them, as what might be called royalties, to the musicians who made the records. The contract flatly rejects any such concession. Its terms are precise on the point. The musicians will do the work; his union will collect the fees and have full charge of their spending.

The company, moreover, agrees to allow Mr. Petrillo's agents to examine its books whenever they so desire. It accepts all laws of the union as formal parts of the contract—which means, of course, among other things, that Mr. Petrillo retains the right to call off his men again at any time. It will make no re-recordings and take no program transcription "off the air" without first notifying Mr. Petrillo and obtaining his approval. He, in his turn, offers one handsome promise. He graciously assures the company that he will not be "unreasonable" in considering such requests from it.

Look well at this Mr. James C. (for Caesar) Petrillo; he constantly increases in stature. Before this he was the supreme boss in his own baliwick, which extends into every village where people toot horns for pay, boosted to that prominence by a Government which interprets its laws to say that he is exempt from most of their provisions. Now he begins to assume the status of a government himself, to take on some of the attributes of a sovereign state. In effect, he issues a license to a corporation to carry on its business, levies a tax upon it, undertakes to supervise its affairs and enacts the rules under which it shall operate. Will anyone really be surprised if some day soon a frock-coated gentleman turns up in Washington presenting credentials as an ambassador from the principality of Petrillo?

The Cleveland News
Oct. 4, 1943

PETRILLO'S $3,000,000

The terms of the contract which the Decca record making company has signed with James C. Petrillo's musicians union have been made public, along with Petrillo's estimate that the union will receive an annual income from the deal of $3,000,000 to $4,000,000.

The union is to get a fee on every record sold. To protect this award, the union is to be furnished with the serial number of every record sold, along with such other information as it "may reasonably require," and is granted the right to examine the company's financial books and sales reports.

The union gives up nothing, the company gains nothing except the consent of the musicians to resume making "canned music" at going rates of pay, plus the royalties.

The public interest is nowhere considered. No one is going to examine the union's books. There are no strings attached as to what purpose this income may be put, private or political. No one except Petrillo and his hand-picked union officials will ever know what becomes of these millions of dollars flowing into the union treasury. Petrillo says he is going to set up a union unemployment fund but this will, of course, be administered as a private Petrillo enterprise just as all affairs of the union are conducted. Anti-Petrillo insurrections have been dealt with so summarily as to discourage union members from interfering with the boss.

Petrillo's control of the federation is just as complete a dictatorship as there is on this earth. Where the contract reads "Federation" it might just as well, for all practical purposes, read "Petrillo." This one man's vast power is now reinforced by an enormous swollen income.

This is as clear an example as can be found for the urgent necessity of national legislation providing for publication of union financial statements. Some unions have taken this step voluntarily. Those of the boss-controlled type such as Petrillo's never will until they are forced. Perhaps the Little Caesar's boast of his $3,000,000 income will stir Congress to some action.

Philadelphia Inquirer

A CHALLENGE TO CAESAR PETRILLO

After the manner in which James Caesar Petrillo has been getting away with his role as grand dictator of music for the American people, it's refreshing to find the broadcasting companies standing up to him and declaring for a fight to the finish.

Petrillo recently proclaimed his "tremendous victory" in cowing several transcription concerns and making them agree to come across with a special fee for every record they sell.

By the terms of the contracts, this extra money doesn't go to the musicians who play for recordings. All they receive will be their regular high union wages. This tribute must be paid to Petrillo's union. He has said it will be used for an unemployment fund. But since Petrillo has the union in his pocket, there's no power to make him live up to his promise.

.No law requires an accounting of union funds. Neither is there any law forcing an employer to pay fees, or dues, to a union. But Petrillo has flatly told a Senate committee that he can do "practically anything under the union constitution to meet any situation."

The broadcasting industry, at least, isn't going to take this Caesar's threats of impositions lying down. Its association calls his exactions from the recording companies "as economically and socially unsound as extortion is immoral and illegal."

Unfortunately, the Petrillo peculiar brand of extortion is untouched by present laws. They not only lack any prohibition of his dictatorial practices, but the anti-trust laws grant the unions sweeping exemptions from prosecution which have been upheld by the United States Supreme Court.

Just consider what Petrillo's latest scheme means. It means the levying, by a private individual, of a special tax on employers. Then after having exercised his self-assumed taxing power, Petrillo personally administers the proceeds, estimated at $500,000 or more a year from the recording industry alone.

This huge fund, to be vastly increased if Petrillo should get his grip on the broadcasting companies and on the motion picture industry as well, in accordance with a hint he let drop to the Senate committee, would be utilized to set up Petrillo's own private system of unemployment relief.

As has been pointed out, the use of such funds is subject to no official control or public accounting. This virtual excise tax will be passed on to the buyers of the records. Under this contract the union, that is to say Petrillo, may examine the employer's financial records. The employer is barred from scrutinizing the union's finances.

Congress is now considering additional excise taxes to produce much-needed revenue for the Government to carry on the war. Petrillo levies his own tax and not a dollar of it will go to the Government. There's nothing to prevent other labor bosses from following his example.

It remains to be seen whether the broadcasting companies will be able to maintain their stand against Petrillo's threat to extend his aggressions. But whatever the outcome of this particular case, the menace will not be removed until Congress puts all citizens, employers and employes alike, on a basis of equality before the law.

New York Times
Oct. 22, 1943

MR. PETRILLO MOVES AHEAD

Four more transcription companies have capitulated to Mr. Petrillo, and will doubtless gain a temporary advantage over their more reluctant competitors in doing so. Mr. Petrillo has condescended to sweeten the pill by agreeing that his private unemployment relief scheme, to which he is forcing the companies to contribute, shall be kept separate from other union resources and that no part of the fund may be used for payment of salaries of union officials. The contract provides for a closed shop for members of the Petrillo union in making records. At a time of critical labor shortage, it contains various make-work provisions to give needless jobs.

A panel of the War Labor Board not only approved of the provision obliging the companies to pay a private tax direct to the Petrillo union on every record they make, but by suggesting that "an advisory committee representing the public" be appointed by the chairman of WLB in the administration of the fund, the board panel has given the whole arrangement an official sanction. It does not appear, however, that Mr. Petrillo is under any obligation to take the advice of this "advisory committee." Nor are there any Federal laws whatever which oblige him to make his accounts public, to submit to an independent audit, or to be, in fact, responsible to anybody for what he actually does with the funds.

The principle has now been established, in short, that a labor union leader is able to levy a private tax on employers to maintain a private unemployment relief system. The companies involved have finally agreed to this "voluntarily," of course, but the state of the law and the attitude of the administrators have put Mr. Petrillo in an extremely strong bargaining position and the companies in an extremely weak one. It would not be too much to say that Mr. Petrillo has made this deal thanks to the cooperation of the Federal Government.

New York Times
Sept. 23, 1943

WHY PETRILLO WINS

One of the phonograph record companies has succumbed in large part to Mr. Petrillo's demands. It has signed a four-year contract with him agreeing to pay fees on every record it sells, ranging from one-quarter of a cent on records selling for 35 cents to 5 cents on a $2 disk. It has still not been made entirely clear to whom these fees are to be paid. According to earlier reports they were to be paid to the musicians actually engaged in making the recordings. It was understood that the musicians, in turn, would be taxed by the Petrillo union to aid its unemployed members. Later reports, however, are that the fees will be paid by the record company direct to the union and not to the musicians making the disks.

Either of these arrangements would be unsound in principle, though the second would be the worse. In either case Mr. Petrillo would be levying a private tax—

in one case on employers, in the other on members of his own union. The second arrangement would be unobjectionable if the members of his union were in fact as well as theory merely voluntary members free to remain with or to leave the union as they saw fit. But their membership is, in fact, obligatory. Through the irresponsible powers that Mr. Petrillo is free to exercise under existing law a musician, no matter how competent, can be effectively prevented from making a livehood unless he is a member of the Petrillo union. Nevertheless, the membership of the union would presumably retain at least a nominal control over the funds that they were forced to turn into its treasury.

If the fees on record sales are to be paid directly to the Petrillo union, however, the resulting situation would be much worse. In that case Mr. Petrillo would be levying his private tax on employers. At best he would be administering a private system of unemployment relief. But there would be no public control whatever of the manner in which he used these funds. If only a small part of the funds actually went for paying unemployed musicians, if the bulk of them were used instead to increase the salaries or expense accounts of Mr. Petrillo and other union leaders, neither the record companies nor the consuming public that ultimately paid this private excise tax through higher record prices would have anything to say about the matter. If Mr. Petrillo can succeed in getting this principle established, he will render himself and his fellow union leaders financially independent even of the members of their own unions.

It would be lacking in clarity of thought to put the primary blame for the resulting situation either on Mr. Petrillo personally or on any record company that succumbs to his terms. The primary blame must be placed on the Administration and Congress, who, by their official labor policy, have placed in the hands of labor leaders the private irresponsible powers which enable them to drive such anti-social bargains.

NAB President Writes

TO THE WOMEN DIRECTORS OF NAB:

Congratulations on the accomplishments and growth of your organization!

The women of America form the bulwark of radio's patrons. Your work with women's organizations, war workers, listening and broadcasting groups constitutes an invaluable asset to this industry.

It is my hope that the extremities of war will give you only more determination to serve your country by serving its women, through radio.

Sincerely yours,

Neville Miller

NAB War Conference

The National Association of Broadcasters is sponsoring a Radio War Conference in Chicago at the Palmer House, April 26-29. First annual meeting of the Association of Women Directors will be held Wednesday, April 28, at 8:30 p. m., in connection with the War Conference. Your attendance is requested provided it meets with the approval of your station management.

Ruth Chilton's Message

I've always heard that the first message of a first president should be an awe-inspiring declaration of policy. Somehow, this isn't the time or place.

As directors of women's programs we have a real job to do. We have, along with our fellow broadcasters, the power to inspire, encourage and promote the unity of men and women in this nation. We have the privilege of spreading the story of Americanism, the privilege to pass on to our listeners the policies, plans and aims of our government. We have a job to do behind our microphones and I know we'll do it.

This is the first Association of Women Directors in radio. We're the pioneers; we carry the torch. We must lay a firm foundation for the structure of the years to come.

The only way any broadcaster can succeed over a period of time is to be sincere, honest and thoughtful toward the listeners. We must be sure our material is informative and entertaining (entertaining is used in a morale sense). We should always be authentic and carelessness in the stress of war may destroy the very principles for which we are fighting. I believe, as an Association, we should cultivate friendship among ourselves and the exchange of ideas conducive to better broadcasting.

Today the question of women in radio is a serious one. Manpower is being taken for war and the addition of women to station staffs is an increasing reality. Radio is a serious business. It is the greatest medium of human expression ever known. It demands the finest, expects the best. It takes your time, requests your intelligence, needs systematized planning, a knowledge of many subjects, a keen personality and a commercial sense. Women on the air can be of great value during these times and afterwards. We mustn't miss this opportunity to make good. Let's prove by our performances that we have what it takes. I know we can do it.

THE ASSOCIATION—

When, Who, What and Why

WHEN—The Association was formed as a division of NAB at the annual convention in Cleveland, May, 1942. It was found that many directors of women's activities have rarely had an opportunity to meet with other women doing similar work. The idea was immediately applauded and the task of organization begun.

WHO—At first the membership has been confined to Directors of Women's Activities of NAB stations and/or women commentators actually broadcasting over NAB stations. About 300 such women are now members, representing every NAB District and almost all states. They are *active* members. Later on, it is proposed to include other women, such as public relations executives, etc., of NAB stations, advertising executives and other women definitely connected with broadcasting.

Each district and state has a chairman who is assisting with a membership drive and in getting information for the Bulletin and other Association projects.

WHAT—1. Already a survey has been taken of the releases being sent to the membership by various commercial sources and national organizations. In addition, eight directors from all parts of the country have sent in a sample of all releases sent to them covering a 10-day period. In cooperation with the NAB Broadcast-Advertising division, a complete list of such releases is now being made and information will be sent to each member that will be of distinct value, it is hoped.

2. Several national organizations or bureaus, such as National Council of Women, The National Safety Council, Children's Bureau, and Girl Scouts—have been sending a series of spot announcements to our membership. Many letters of appreciation have been received.

3. Requests have come from station managers for information about hours and length of our women's programs, types of sponsorship, etc. The Association will doubtless undertake a study in the near future.

WHY—The Association of Women Directors was inaugurated at a time when, due to war emergencies, women were about to assume many new responsibilities in the radio field, as elsewhere. It provides a clearing house for exchange of ideas and techniques, for the innovation and promotion of projects affecting the directors and the public and for the furtherance of social contacts.

If you do not belong and your station is a member of NAB, you are cordially invited to send your name to the President, Ruth Chilton, % Association of Women Directors, National Association of Broadcasters, 535 Fifth Avenue, New York, N. Y.

New Members of AWD

Thelma McNeil Curren, WAGE, Syracuse, N. Y.
Mrs. Lapsley Hope, WDOD, Chattanooga, Tenn.

Mrs. Royal Miller, KROY, Sacramento, Calif.

Chit Chat

Millicent Polley of KHBF Rock Island, Ill., formerly 9th District Chairman of the Association of Women Directors, is now stationed with the WAVES at Cedar Falls, Iowa.

Dorothy McCune, women's activities director of KVOO, Tulsa, has left to join her husband, a lieutenant of the Army Air Forces in California.

On January 9th, **Mrs. Dorothy Lewis**, NAB Coordinator of Listener Activity, gave a Tea in honor of **Miss Ruth Chilton**, President of the Association of Women Directors of NAB and **Miss Elizabeth Goudy**, Radio Director of the Los Angeles Country Schools and noted authority on Radio education. The following persons attended: **Miss Kathryn Cravens**, WNEW; **Miss Margaret Cuthbert**, National Broadcasting Co.; **Miss Henrietta Harrison**, Radio Director, Y.M.C.A.; **Mrs. Harold V. Milligan**, President, Nat'l Council of Women; **Miss Grace Johnson**, Blue Network; **Miss Lucille Clark**, Radio Chairman, Nat'l Fed. of Press Women; **Mrs. Georgianan Brown Harbeson**, President, Society of American Painters; **Miss Luella Hoskins**, Radio Workshop, New York University; **Miss Dorothy Gordon**, Radio Artist; **Miss Luella Laudin**, Radio Chairman, Nat'l Council of Women, and **Miss Esther Hilton**, Director, Federation of Protestant Social Agencies.

Mary Jo Tate, of WMPS, Memphis, Tennessee, has joined her husband for the duration. **Mildred Flippin** is the new name and personality at WMPS.

Hazel Kenyon Markel, on leave from KIRO, Seattle, is a Lieutenant in the Naval Reserve, stationed at Washington, D. C., in the Public Relations Division. Hazel is radio director.

Irma Bitner, of KSL, Salt Lake City, is back on the job after a serious illness.

Dorothy Lewis, of NAB, addressed the Canadian Broadcasters Association at their annual convention in Toronto, February 15-17.

Bernice W. Foley, of WSAI, Cincinnati, formerly of WKRC, is producing a children's newscast every day at 5:00 P. M. The Cincinnati Board of Education is giving splendid cooperation. She gives a round-up of news and supplements that with stories about the countries discussed, stressing geography and history.

Ruth Chilton, President of the Assn. of Women Directors of the NAB, and Director of Women's Activities for WSYR, Syracuse, celebrates her eighteenth year on the air, March 27th, 1943.

Jessie Brown and **Jackie Talley**, of WFBL, Syracuse, were busy as bees the last couple of weeks in February, helping to uphold the women's division of WFBL, when the station celebrated its twenty-first anniversary.

(Continued on page 4)

HONOR ROLL

KATHRYN CRAVENS

WNEW, New York

A veteran in the radio industry, Kathryn has earned several honors: honorable mention from the Women's National Radio Committee; first prize for poetry and feature stories in an award made by the National League of American Pen Women in 1939; best-dressed woman in radio; favorite commentator of 2,500 Brooklyn high school children. A pet activity of Kathryn's is the American Theatre Wing. She works every week at Stage Door Canteen and is a member of the recently organized Theatre Wing Supper Club.

What Are You Doing for Uncle Sam?

Peggy Cave, KSD, St Louis, reports St. Louis women on their toes in the war effort. A recent drive to recruit WAAC personnel went over with flying colors. Bonds, salvage and recruiting campaigns are booming with all radio stations pitching in the groove.

Gladys Borne, WISR, Butler, Penna., helped her station sell $6,400 of War Bonds in 15 minutes.

Victoria Corey, KDKA, Pittsburgh, says her station is all-out in the war effort. (And whose is not?)

Our president, **Ruth Chilton**, WSYR, Syracuse, N. Y., describes "Women in Defense," a once weekly, 15-minute show sponsored by an insurance company, as presenting news of home front war activities of the Syracuse War Council through the interview method. Time is also given for armed forces recruiting. Time is allotted to the Civilian Mobilization Office by the insurance people. **Ruth** produces the ad lib show and it is now in its third year.

Mrs. Eleanor Boyd Whitelaw, WMOB, Mobile, Ala., writes that there has recently been a much greater enthusiasm in volunteer war work in her city. **Eleanor** has been working with local war groups and has changed the name of her program to "I Volunteer" and on the Wednesday show she names the "Volunteer of the Week" from the Office of Civilian Defense records. A recent activity was "Women in the War" week featuring bond luncheons and other war events on the station.

Susan Allen, KHQ, Spokane, Washington, tells of a special Public Service program series on KHQ Sundays at 10:30 a. m. Susan interviews informally various salvage chairmen and homemakers on the two sides of salvage—collecting and saving. Salvage questions from listeners are answered. Susan reports the broadcasts, originated June, 1942, have been instrumental in collecting many tons of salvage.

Alma Kitchell, Blue Network commentator, several months ago announced that she was buying a war stamp a day while her son, **Charles**, was in the service. **Alma's** "stamp-a-day" plan has swept the country as mothers wrote the Blue telling how well they liked the idea and were following it out.

Millicent Polley, WHBF, Rock Island, Ill. (now in the WAVES), reports how **Jack Sherman**, WHBF production manager, did something about the tin cans being thrown on the city dump. **Jack** took a portable recording unit to the dump and transcribed a five-minute report on what he saw with a dump truck unloading cans furnishing swell background material. **Jack** punched his show by pointing out the dump ground was no place for tin cans these days. **Millicent** followed this up by taking a unit to a housewife's kitchen where four women gathered, in addition to the president of the Women's Club sponsoring the tin can drive, and the complete step-by-step process of properly preparing tin cans for salvage was described, with appropriate sound effects. The two records made a 15-minute show and collections following it jumped tremendously.

Listeners who tune in "Something to Go By" over KTFI, Twin Falls, Idaho, hear facts on everyday living in wartime. For something to go by in the war, that's the show for listeners in Twin Falls.

Florence Sando, WJAS, Pittsburgh, Penna., lists the transformation of her show for a department store in June, 1941, when it originated, from a breezy musical variety frame to a "Women's Digest" type featuring war information and news, assists for homemakers, cooperation with war and civilian defense agencies and selling her sponsor's merchandise. **Florence** writes she is trying to do all this "with a degree of good humor and optimism that will reflect itself in the contribution I, through my listeners, make to the winning of this war."

Grace Johnson, Blue Network, reports that the Blue is now featuring programs supplying information regarding rationing, conservation, child care, nutrition and other fight-for-freedom homemaking to American women, including a new series on Victory Gardens.

"Your Wartime Job"

By LINNEA NELSON

J. Walter Thompson Co.

Congratulations on the formation of the Association of Women Directors!

The successful operation of your group seems even more desirable during this period of war than at any time during the past, because everyone wants the answers to today's problems *fast*. And by the sharing of the problems with which you are confronted, and the sharing of their solutions, you can be of greater service to the people of America than ever before.

Most of you know how seriously your audiences accept the things you say in your broadcasts, and through their confidence in you they expect help in many ways. There are new types of women in America today and you will be developing new audiences. While in the past you have been talking to women who led a fairly normal family life, today there are the millions of new brides and mothers whose husbands are at the far corners of the earth; the many who have answered the call to go into defense plants or other work, and the even greater number who must economize due to the reduction in the supply of foodstuffs and household equipment rather than for the sake of saving money.

Friend husband's temporary absence makes many women doubly appreciate what a handy man he was around the house—and so they've had to learn to hang pictures, fix the squeaky door hinges and walk the baby at night, tired or not. The listeners who were never forced to economize or take short-cuts in the past are now anxious to find out how to stretch a pound of butter or extend the lives of household articles.

Women Need Educating

When Milady finds she can't dash out and buy an alarm clock or a new toaster or some other item she'll do everything possible to keep the things she has in working order rather than do without entirely. Too many people are refusing to take today's war situation seriously until they find they can't get the things they want, and neither can their neighbors.

You may find you have lost some listeners due to their working hours, and if the percentage of women workers in your territory has increased to the point where listening is greatly affected, you too may find yourself on a new schedule. Most of these women have to be educated to the new routine of keeping their homes and families in good condition and need all the timesaving hints they can get. The women who have not yet taken what they feel is one of the greatest steps of their lives—that of going back to work—need to be taught that they too can continue to keep their homes and families going even though they do work away from home. Here you have a wonderful opportunity to help get the women workers that are so essential to the winning of the war.

Not being able to read the little crystal ball, it is difficult to predict the war time effect on advertisers. Those manufacturers not too seriously affected by priorities have an opportunity to continue getting new customers; others may be able to stress the merits of conserving their products and in so doing their names will ring a bell when we emerge victorious—to a greater appreciation of the things we took so completely for granted.

WOMEN TODAY

(An Editorial)

Never in all our history was it more important to have cooperation and understanding among the different nationalities in this country, among the different religions and above all between labor and management which must turn out our war materials. As William P. Witherow, president of the National Association of Manufacturers, said the other day:

> "The precious value of unity has never been more apparent. There must be no dislocations in our march to victory any more than there would be dislocations in Army or Navy administration. This is no time to tamper with our form of government. Neither is it any time for high-pressure groups to strive for advantage. The common purpose is to win the war, and this, with God's help, can be done by a united people supporting our brave armed forces."

And that is the job that WOMEN TODAY have undertaken. War used to be strictly a man's business. It isn't any more. It isn't just a man's war when bombs burst upon defenseless cities. It isn't just a man's war when all the rights which women hold dear are imperiled. And it isn't only a man's war when women can help to supply the men at the fighting fronts. This is a woman's war, too, and American women are working to insure victory and a just peace."

Our part in the great scheme of things is to keep the American woman informed of the part she is playing and must play to insure that victory and that peace.

3rd District AWD Meets

Initial meeting of the 3rd district, Association of Women Directors, was held January 16 in Pittsburgh, Pa., with Victoria Corey, of KDKA, district chairman, presiding.

Speakers included: James B. Rock, KDKA manager; Harry Kodinsky, Office of War Information; Janet Ross, KDKA, and Evelyn Gardiner, KDKA. Others present included: Marjorie Thoma, KDKA; Florence Sando, WJAS; Patti Littell, W75P; Marie Wilke, W47P; Gladys Borne, WISR; Virginia Wade, WCED; Elsie Lichtenstul, radio agent; Francine Blum, WCAE, and Robert White, KDKA.

Plans for a permanent organization were set up after short talks by Misses Ross and Gardiner and Messrs. Rock and Kodinsky.

CHIT CHAT *(Cont'd)*

Hazel Cowles, WHAM, Rochester, and chairman of District Two, reports intensive activities on the home-front, and a successful commercial season.

Betty Griffin, of WIBX, Utica, has been making history with her young people's and children's features. **Betty** takes her radio seriously, and does a good job.

Florence Lovejoy Shugars, WROK, Rockford, Illinois, and Chairman of her District, says that WROK is very proud of **Harriette Thompson**, one of the first full-time women announcers in the country. Harriette has demonstrated her versatility by efficiently operating the studio controls and doubling in the continuity department, in addition to her regular air schedule.

Thelma McNeil Curren, WAGE, Syracuse, keeps her ten fingers occupied most of the day, doubling as Director of Women's Activities and Musical Director for the station, and participating in volunteer activities on the home-front.

It is with regret that announcement is made of the resignation of **Miss Betty Patterson** of WFAS, White Plains, N. Y., from the office of Secretary of the Association of Women Directors. **Betty** is returning to her farm at Ancram, N. Y., to do special war work. **Miss Mildred Bailey** of WTAG, Worcester, Mass., takes over the office.

Dorothy Lewis On Tour

Representing both the National Association of Broadcasters and the Office of War Information, Dorothy Lewis, NAB Coordinator of Listener Activity, left March 25 on a tour of 16 major U. S. cities.

Dorothy has been assigned by OWI to get audience reaction to a special list of war-time shows and manner of presentation of war information.

For the NAB, she will address groups on "Radio's Major Role in the War" and other related topics and will assist in the formation of Radio Councils of civic, professional and clerical representatives to further more discriminating and intelligent listening by the radio audience.

Her itinerary will include: Nashville, St. Louis, Kansas City, Tulsa, Oklahoma City, Fort Worth, Dallas, Little Rock, Memphis, Jackson, Birmingham, Atlanta, Greensboro, Winston-Salem, Richmond and Washington.

Radio Music Tribute

In an extension of remarks printed in the Congressional Record of Thursday, February 25, 1943, authored by Senator Reynolds of North Carolina, radio receives the following accolade in a letter quoted from Mrs. Margaret Banks, music director of WBIG, writing on "Music in War":

"The development of radio and the phonograph brings music to thousands of homes that it could not otherwise have reached . . . with our splendid inventions of records and transcriptions, music can now come into all sectors. . . ."

Ohio Institute

Members of the Association of Women Directors, NAB, are invited to participate in the Ohio Institute for Radio, April 30-May 3, at the Deshler-Wallich Hotel, Columbus, Ohio. The AWD will participate actively in the sessions. Rhea McCarty, WCOL, is host AWD officer.

Meet the President

RUTH CHILTON

It takes a pioneer to pioneer! That's why Ruth is the first president of the first association of women in radio. She began her pioneering in radio eighteen years ago when that industry was considered a precocious infant not likely to outlast its first fragile swaddling garments. From a scintillating background as singer and dancer in vaudeville, musical comedy and with name bands, she has pioneered in radio ever since—writing, singing, producing, announcing. She is now director of women's activities at WSYR, Syracuse, N. Y., writing, producing and announcing her one-woman show "Ruth Chilton's Matinee" now in its sixth year.

She is a member of the National League of American Pen Women, Syracuse Zonta Club; takes active part in the Syracuse Chamber of Commerce and the Association of Education by Radio. Like most successful career women she has always time for one thing more:—she is guest lecturer at the Syracuse University Workshop, a frequent club speaker, and worked for the *Boston Herald Traveler* on the Woman's page under Marjorie Mills.

New Members of AWD

Ruth Franklin, KXL, Oakland, Calif.
Olive Kackley, WCKY, Cincinnati, Ohio.
Geraldine Foster, WBRE, Wilkes-Barre, Penna.
Mrs. M. Austin King, KFXM, San Bernardino, Calif.
Alma Dettinger, WQXR, 730 Fifth Ave., New York City.
Madge L. Cooper, WMRN, Marion, Ohio.
Jean Wright, WTOL, Toledo, Ohio.
Eileen M. Wright, WHCU, Ithaca, N. Y.
Eleanor Hanson, WHK, Cleveland, Ohio.

If you do not belong and your station is a member of NAB, you are cordially invited to send your name to the president, Ruth Chilton, % Association of Women Directors, National Association of Broadcasters, 535 Fifth Avenue, New York City, N. Y.

Dorothy Lewis' Message

Given at the Annual AWD Meeting in Chicago at the NAB War Conference

MANY of you will recall that on my various tours in 1939-40, visiting 350 stations I made a truly significant discovery. I found *you*, hundreds of you, directors of Women's Activities. In this capacity you were doing a pioneer job; selling merchandise, helping your women listeners with daily problems and opening vistas to the world outside.

I found you—fell in love with you and the service you render to America. What astonished me was the fact that few of you had ever met another woman director. I said to myself, à la Lincoln, "If I ever get a chance, I'll hit that thing hard." The opportunity came through my office with the NAB, which organization immediately saw the importance of your contribution. The rest of the story is well known: how we met at the Cleveland NAB convention, organized and how rapidly the AWD has grown. . . .

Going back into radio's dim, distant past in 1928-31, I, too, carried on this type of program over several stations and did a department store merchandising job as well. I know how loyal women listeners can be to women broadcasters. I know what power we have to mould the opinions of the homemakers and mothers of America. No more important task confronts the radio industry. Your national officers realize this fact and we hope to extend the service already begun; that of sending out releases from accredited national non-commercial organizations, giving you material of an informational, inspirational character. These releases supplement your own fine libraries and leaven the mass of excellent commercialism that inevitably reaches your desks.

In closing, let me wax sentimental. I have lived long enough, at mid-forties, to have anticipated several trends and initiated a few "firsts." If the hand of fate should change my destiny, I feel that the formation of the AWD will be one of the finest achievements of my life. Of course, I stand ready to do all I can to further its objectives. I commend to you the responsibility for its welfare and the outlining of its purposes and projects. Through you, faith in our American System of Broadcasting will be sustained; through you, new ideals and the capacity to translate them into action is possible; through you, a revitalizing of spiritual values may be forthcoming and through you the fate of a nation may be changed.

Chit Chat

Dorothy Lewis and Ruth Chilton were the featured speakers at the Wednesday morning breakfast, May 19th, at the Onondaga Hotel, Syracuse, for the Congress of the Colony of New England Women. Their subject was "Women in Radio" and we're told there were many interesting viewpoints on radio in general, expressed by the assembled company.

Our treasurer, **Rhea McCarty**, WCOL, Columbus, Ohio, made a most charming hostess for the visiting members of AWD at the Ohio Institute. During the sessions she interviewed **Dorothy Lewis, Ruth Chilton, Mary Mason, Grace Johnson,** and **Gloria Chandler** as guests in her program, "News Thru the Eyes of a Woman."

Women now are holding almost every job that exists in radio, but we met at the Ohio Institute one woman who is holding them all. May we present **Dr. Grace Ingledue**, WFIN, Findlay, Ohio, half owner of the station, president of the board, program director, production manager, director of women's activities, commercial scripter, and engineer. For recreation, she broadcasts three children's programs a week!

Ruth Crane, WJR, Detroit, has added to her 15-minute program six days a week as "Mrs. Page," a series of five-a-week afternoon broadcasts on "Women at War." These with her staff job as commercial editor keep her hopping. This seems to be the general lot of the women broadcasters!

Mrs. Richard Ramsdell, former "Jane Weston"—WOWO, Fort Wayne, now reports for daily duty at WSYR, Syracuse, N. Y. A soldier-husband stationed in the East caused the change.

Lavinia (Duffy) Schwartz, director of Public Service programs for WBBM, Chicago, and CBS in the Midwest, has been appointed assistant deputy chief of the OWI Radio Bureau, Chicago, it is announced. **Don Stauffer** stated that she has been doing excellent work for OWI in the past years of wartime activity. **Duffy** is one of the editors of AWD's "Beam."

Alma Kitchell, Blue Network personality, was a guest at ship-launching when **Dionne** Quints christened five ships. She writes: "The opportunity to see and broadcast about the **Dionne** Quintuplets was one of the highlights of a long and interesting experience in radio. They are five delightful little girls, unspoiled and natural. Singularly unconscious of the drawing power of their small persons, they were intensely excited about the crowds which they believed had come only to see the launchings of the five cargo vessels. They are exceedingly patriotic and well-informed about the war and knew full well the destiny of the ships they were naming. Somehow you can't help loving them."

Mary Mason, WRC, Washington, D. C., was guest speaker at Ohio Institute on the "Broadcaster's Part in the Battle of Food as Seen by a Station Women's Program Director."

CALLING DX! CALLING DX! We need more news from the other side of the Rockies! Let's hear from some of you western gals! We want to know what you're doing!

Virginia Wade, WCED, Du Bois, Pa., has off the press a wartime cookbook that even the men in her listening area have contributed to . . . which should certainly make it a best-seller . . . what with the number of husbands who're doing their own cooking now that their wives have gone into uniform or are on the production line.

We regret to announce that **Jane Weaver**, WTAM, Cleveland, has found it necessary to resign her post as editor, due to increasingly heavy wartime program demands. Many thanks for the fine work you put into it, Jane! You'll all be seeing her name many times on our pages in the months to come. **Victoria Corey**, KDKA, Pittsburgh, was appointed to fill her place at the recent meeting of Women Directors in Columbus. **Peggy Cave**, KSD, St. Louis, has been appointed to associate editor. **Eleanor Hanson**, WHK-WCLE, Cleveland, has graciously consented to serve on the Editorial Committee. Welcome back, **Eleanor!** We missed you when your station was not with NAB!

Evelyn Hicks, of WSGN, Birmingham, Alabama, and her daughter were injured in an automobile accident recently. We hope to have news of their recovery soon.

Congratulations to **Mildred Bailey**, WTAG, Worcester, who celebrated the third anniversary of her "Afternoon Journal" in June.

An announcement of particular interest to AWD members comes from the Columbia Broadcasting System. On August 1st, **Mrs. Dorothy Rowden** will join the CBS staff to act as liaison with women's organizations and to develop public relations activities in this important field. **Mrs. Rowden** was public relations director for the American Library Association. She is on the staff of the Institute for Adult Education of Teachers College, N. Y. City, and is editor of the Adult Education Journal. Welcome to the radio industry and a salute to your fine achievements, **Mrs. Rowden.**

With the exception of a few trips out of town to address special meetings, **Dorothy Lewis** expects to be in the NAB New York Office and at her farm, Echo Corner, Kinderhook, N. Y. She invites all AWD members to drop in for a chat. Members are warned, however, that they may be pressed into service helping to can produce from the victory garden. However, fishing and boating on her lake and riding await hardy souls.

Dorothy's latest fish story concerns her loss of a 4½ pound bass, hook, line, sinker and bright new spinner.

Hilda Woehrmehr, continuity supervisor, WOWO, Fort Wayne, had the privilege of taking back from Columbus news of the two WOWO prize winners in the Ohio Institute awards: "Tom Wheeler's Daily News Letter" in the Agricultural awards, and "Abe Andrews" in the Personal and Daily Life classification.

Rhona Lloyd, KYW, Philadelphia, writes that women's directors in the eastern half of the third district are making plans for a rousing get-together in the near future.

HONOR ROLL

MIRIAM DICKEY

KFAR, Alaska

She writes:

"Being in a semi-active war zone and quite close to an active zone, there is much of a military nature which runs through our broadcasts. Naturally, censorship prevents my telling you much of what is going on up here, but I can assure you that Alaska is a very interesting place to be these days. Since our morning listening audience up here now includes many men who work night shift and also many servicemen who are stationed in outlying posts, we have to keep away from too much stress on purely feminine household subjects. And in giving recipes, we occasionally give some that the boys in camp can try with their limited supplies. I shall look forward to receiving further copies of The Beam."

And we add that the Association and all women are fortunate to have Miriam representing us on the fighting front, broadcasting in a combat zone. More of your dramatic story in a later issue. Meanwhile, orchids to you, Miriam Dickey, of America's farthest north radio station.

Women for the Services

By LIEUT. HAZEL KENYON MARKEL

(Radio section, public relations, USN)

AT the outset of the war, the major problem confronting the Nation was manpower. Men to man the machines, the guns, the plows—men to fill the ranks of the armed forces. And very soon a disturbing shortage of that manpower faced America. Where to turn to supply it? The young men of the country were joining up to build the vast military machine made necessary by the exigency of war. Three other sources remained. Youth, older men, and women. Youth did a job—is still doing a job—on after-school hours, on vacation time, and in part-time positions. Older persons rapidly filled many of the places held formerly by their sons and daughters. But women offered the largest single reserve for the many industrial and civilian duties necessary to winning the war. Women answered the call with enthusiasm and challenge. They quickly took over a large percentage of the jobs in war industry, and they filled the gaps created by men leaving for service in the many and varied civilian pursuits.

War continued; more men and more men were needed; until yet today, manpower, or perhaps more specifically womanpower, is a number 1 on the list of Uncle Sam's major problems. Now, it has become a necessity—a very grave necessity—that women be used not only in the factory, on the streetcar, in the store, but on the farm, and finally, in the military services themselves. The need is growing greater daily. The job is too big, men cannot do it alone. Women *must* help! And here is where the women directors come in. This is a women's problem, and the woman director will want to tackle it. And the story is an exciting one! Today all three branches of the fighting forces have their women's organizations. Women are doing gladly and doing well all the many jobs behind the lines which women can do. They are doing the things they did in civilian life and many things more and, of most importance, they are releasing more men daily for front line duty. But more women must replace more men—a great many more men. And the first job is to make the women of America realize this, realize that their efforts, their work is of utmost significance right now.

Women's Service Varied

All the many things women are doing in the services should make a stirring appeal to women everywhere. What can be more thrilling than women manning the control towers of one of the Nation's major air bases, directing the incoming and outgoing traffic of planes. Teaching America's future aces of the air to fire the guns that are to blast the enemy, or instructing flyers to pilot planes through darkness and fog by means of instruments! Women are serving as aviation mechanics, as code and signal workers, as hospital corpsmen, as radio operators and radio repairmen, working at confidential duties, using highly technical skills with electricity, X-ray, physiotherapy. They are working in Navy Yards, training stations, air bases, hospitals, and supply depots. These are but a few of the important places that women can fill! No matter what the job in civilian life, there is a place in the service for it. Yes, it is a story that can be told with drama, excitement, and appeal.

Add to the story the way women have been received in the services. From all over the Nation come reports of "good fellowship, patience, understanding, and appreciation." Perhaps best summed up in the invitation of Lieut. Gen. Thomas Holcomb, Commandant of the Marine Corps, on the occasion of the formation of the Women's Reserve of the Marines—"We of the Marine Corps invite you to join us, to wear our uniform, to share our trials and triumphs, to march with us to victory." Everywhere women are working beside men as colleagues, as equals, as friends. It is a comradeship and experience that women will always cherish.

Recruitment Is Local Problem

The problem of interesting more women in joining up is a local one mainly. The networks, in cooperation with the Office of War Information, are doing a splendid overall national task, but the local situation is one in which much can be and must be done. Let's consider a few ways to attack this job. First, it would be well to confer with your local public relations and recruiting officers, to learn the actual needs of your particular locality as to numbers wanted, numbers possibly available, and qualifications necessary. Consider your program plans in the light of these needs. Consider approaches and appeals for the different audiences to which you play—women, schools, or general public. Consider approaches and appeals from the standpoint of your geographical location. There undoubtedly will be a difference in the appeals in Maine than in Kansas.

There are many good program ideas that some of you have used and are using daily. I am inclined to think that more men speaking for the work of women in service is immeasurably more effective than the women speaking for themselves. For instance, a man with a wife, a daughter, or a sister in the service; a man returned from the front who knows the need for more men out there and hence more women here at home; the commanding officer of a WAVE, WAC, SPAR, or Marine to tell how she is "filling the bill" and the need for more such women; the man who is working beside a woman in uniform, what she is doing and how she is doing it. A yeomanette of the last war undoubtedly could tell a stirring and convincing story of women's military contributions. A woman who is a prospective candidate is good program material, asking the questions, expressing the interests of other prospectives.

Woman Director "Ideally" Equipped

And, it seems to me, the woman director is ideally equipped to carry on this campaign. As a leader in her community, she has an obligation and responsibility to this cause so vital to women and to the nation.

The many activities in which she takes part will serve richly to increase the "coverage" for the drive . . . her speaking engagements, the other shows on her station, her own special shows, all will be a means of telling her community the story of women in service and the growing need for more. She can talk to school groups, church groups, social clubs. The schools are an especially significant group to reach as it is from their ranks much of the womanpower for war will have to be drawn. The woman director can see to it that her public not only understands the needs fully but that they know the general requirements, and the duties. That every woman who listens faithfully for the daily voice of the WD on her radio will, in turn, take up the cause, accept and feel the responsibility to help, to tell her club, her church, her friends, yes and her family. For this is a woman's war, too. Dire is the peril of our country, grave the implications for the lives and hopes of each one of us. And who more than women are concerned? Our homes, our families, our very world are at stake!

DOROTHY LEWIS ADDRESSES NEW JERSEY WOMEN'S FEDERATION

Mrs. Dorothy Lewis addressed the convention of the New Jersey Federation of Women's Clubs May 20 at the Commodore hotel in New York City on the subject "The Importance of Radio in Education."

Mrs. Robert Cornelion, federation education chairman, introduced Dorothy.

The need to keep radio free and then to promote its use in our free school system to the enrichment of the educational process were stressed by Dorothy, who cited the "Texas School of the Air" as an example.

She pointed out that through the cooperation of the 170,000 parent-teacher members and 80,000 club women and laymen of civic groups, Texas has the only radio division of the state department of education in the U. S.

School equipment of the future will feature libraries of recordings as well as those of books, she predicted.

Dorothy stated that if we use radio as diligently and forcefully as Hitler has done, but to intelligent and constructive ends, the problems of democracy can be solved through our youth. Radio is the purest expression of the democratic process and is a potent factor in education, she concluded.

MEMBERSHIPS

All members of AWD must be on the staff of stations that belong to NAB.

Active membership requirements are defined as whether you are broadcasting and/or directly concerned with the presentation of women's and children's programs.

Associate members will include women executives in other fields of activities in NAB member stations (except women secretaries) such as public relations officers, technicians, saleswomen, etc. Also women in the fields of radio advertising; radio writing, producing and broadcasting; radio editors, etc., will be included. All applicants for associate membership must be presented to the membership committee and executive board for consideration. Their decision will be final.

What Are You Doing for Uncle Sam?

Inspired by the recruiting talks of **Lt. Hazel Kenyon Markel**, now radio director with the WAVES, our AWD president **Ruth Chilton** went to work on the local gals of Syracuse with a special show for the SPARS and presented one of those charming lassies in person.

Kay Halle, of WGAR, Cleveland, well-known commentator of the Cleveland Orchestra Broadcasts, has just completed a series of programs giving an inspiring account of the work in the war industries of her city. So effective were they that the president of one war plant she described made a special tour of his mill to see all the exciting details he had heard for the first time.

When you tune in the Office of Education's "VICTORY HOUR," each Tuesday afternoon on the BLUE, you may like to know that **Lieut. Hazel Kenyon Markel**, on leave from KIRO, Seattle, has recently been appointed liaison for the Navy's radio section for this series.

Alma Kitchell, Blue Network, adds a new one with "The Women's Exchange." This half hour show, Monday through Friday on WJZ, is in addition to her 15 minute Monday through Friday network program. It's exactly what the title implies—an exchange of useful ideas on subjects of interest to women today. Conservation takes the spotlight—with sewing make-overs, rationing and nutrition time savers, canning and gardening helps.

Your news editor reports the first mass recruiting of Marine Women Reserves in the country. Through her station, KDKA, Pittsburgh, plans were made with the mayor of the city to proclaim "Free a Marine to Fight" Day. The National Head of the Women's Reserve, **Major Ruth Cheney Streeter**, appeared for the occasion and the first mass induction was made over NBC coast-to-coast hook-up. So much for station initiative and patriotic responsibility.

Lieut. Hazel Kenyon Markel, Navy public relations, at Ohio Institute Breakfast for AWD, stressed the need for women broadcasters' help in the recruiting of women for the Army and Navy. She made a point that would be a good one to remember the next time you tackle the subject. . . . It's no longer a call that a woman can answer or not at her pleasure . . . it has become the duty of every eligible woman to volunteer. And if you want to know some of the grand jobs the WAVES are doing, write to her, Office of Public Relations, Navy Department, Washington, D. C., and she'll give you really startling information.

Elaine Ewing, OWI, reports new releases are available now that all your listeners will be grateful for. They're short cuts for homemaking. In these days when every woman is doubling up on her day's duties, you'll find these racy aids for war workers a swift audience-getter . You can reach her, Women's Division, Office of War Information, Washington, D. C.

Ann Ginn, WTCN, Minneapolis, has been appointed state chief of household salvage campaigns, by the WPB. She is also state chairman of the women's division of General Salvage. These new activities will mean a good deal of traveling; but she is one of the most energetic women in radio, as we soon learned from meeting her in Columbus; so we know her various activities at the station won't suffer from the new duties she is adding to her crowded schedule.

Evelyn Gardiner, KDKA, Pittsburgh, asks if other AWD members have commented on the increasing similarity in the tenor of OWI messages and that of the industrial advertising recommended by the national participation advertisers nowadays? When you give one, you've practically given the other.

Ruth Crane, WJR, Detroit, has been appointed to the advisory committee of WAC Recruiting for Michigan. The Army has apparently learned the value of the woman broadcaster in molding the public mind.

There'll be no shortage of trained workers and artists when KDKA's men go to war! Program director **Bob White** and production manager **Bob Shield** are conducting weekly classes in announcing, writing, producing, and engineering for women staff members. Already some of the students have stepped up to take the controls.

And speaking of schools for Radio, **Judith Waller**, NBC public service director, is co-director of the second annual NBC-Northwestern University Summer Radio Institute in Chicago. She's teaching the course in public service programs. (To those students responsible for that up-and-coming publication, "On the Beam," congratulations! We'll be seeing and hearing more of you yet!

Colonel E. M. Kirby, chief, radio section, bureau of public relations, War Department, announces fact sheets are available from the War Department for those who are deep in war program writing.

Rhea McCarty, WCOL, Columbus, recently installed president of Bexley Women's Club, is working directly with Harrison Sayre, director of Civilian War Services in Ohio, to give her radio audience the latest information on the home front.

From **Ann Stirling**, KJR-KOKO, Seattle, district chairman of AWD, comes news of our women directors in the Northwest.

Ruth Poindexter, KXRO, features "Town Topics"—the Society Page of the Air, with weddings, births, club-notes, and social events the main material. On it are carried all government releases.

Jeanne C. Peckenpaugh, program manager, KVOS, Bellingham, Washington, lists "Back Page" and "Communique from the Home Front" as audience getters and says they're inaugurating a new program using government releases on food and other timely home front news.

Virginia Van Hoy, KUJ, Walla Walla, conducts "Let's Go Shopping" daily feature on war-time problems of food, clothing, housing, morale.

Gertrude Commerford, KPO, Wenatchee, Washington, finds her listeners eager for helpful hints for the combination career woman-housewife. Womanpower brings new problems for the woman director to solve.

Helena Rutan, KVAN, Vancouver, announces that in her vital defense area the "Home Defense Reporter" has a wide audience.

Expert gardener **Mrs. Stewart Clark**, KMO, Tacoma, uses her knowledge for the government's Victory Garden campaign in the five day weekly "KMO Garden Guide."

Evelyn Courtney, WKZO, Kalamazoo, reports a wartime style broadcast, a made-over fashion parade. "Best-dressed" (Vogue) Congresswoman Stanley was present and most enthusiastic about Director Evelyn Courtney's smart outfit, made from her husband's morning suit. Congratulations on your wartime ingenuity, Evelyn, the conservation suit is a beauty!

Orchids for Programs

"This is Rosemary" . . . editor-in-chief of the WGL Magazine of the Air, published Monday through Friday, a magazine for the American Homemaker in Wartime. Has a real "red-white-and-blue" binding, with all suggestions covering a wartime theme. "Magazine" divided into sections: Charm and Fashion; What's New; Interior Decorating and Gardening; Food and Homemaking; Meet the Ladies; Today's Best Buy in Food; Today's Hard to Get Item; Tomorrow's Men and Women; and This and That. On "Meet the Ladies" interviewees chosen at random from telephone directory, contacted by "Rosemary" and brought to the studio as guests. A poetess, head of a children's theater group, a negro maid, high school student, have been among the guests, and during recent flood, quite inadvertently, an actual evacuee. The "cover," which is used to open the show, is always a graphic word picture in keeping with the season, the day, or a mere figment of Rosemary's imagination. So detailed is this cover that listeners have actually drawn pictures of what they felt it must look like. "Patriotic Pete" is another daily character appearing in the magazine and is eagerly awaited as a favorite cartoon. This character gives Editor Rosemary a good chance to get in some clever "plugs" for salvage, bonds, tin cans, etc. One unique example of this happened on the day of the opening of the second war loan when Patriotic Pete appeared in the magazine wearing nothing but a barrel—he'd pawned his clothes to buy war bonds.

(Let's have your ideas!)

AWD Formulates War Policy at Radio Conferences

The AWD celebrated its first birthday with participation in two national radio meetings—the NAB War Conference in Chicago and the Ohio Institute at Columbus. Despite heavy wartime broadcasting schedules and the difficulties of transportation, some fifty members attended the session.

Ruth Chilton presided over panel discussions and business sessions at both meetings. Speakers were Dorothy Lewis, coordinator of listener activities, NAB; Willard D. Egolf, NAB assistant to the president; Grace Johnson, director of women's and children's programs, Blue network; Gracia Wood, women's division, NBM; Elaine Ewing, OWI; Lewis H. Avery, director of broadcast advertising, NAB.

Previous officers were re-elected. An analysis and crystallization of the wartime activities of the members was made. Plans to extend these projects were incorporated into the following statement of policy: The Association of Women Directors of the National Association of Broadcasters pledges its wholehearted support and talents to the promotion of essential war projects. Believing that the enlistment of woman power for the services, for industry, and for civilian wartime activities presents an immediate and serious problem, the steering committee recommends that the members carefully consider the needs in their locality, and as their current major responsibility offer their services and talents to the solution of the problem.

Members Attending the Sessions:

Ruth Chilton, president, WSYR, Syracuse, N. Y.; Mildred Bailey, secretary, WTAG, Worcester, Mass.; Rhea McCarty, treasurer, WCOL, Columbus, Ohio; Dorothy Lewis, NAB, New York City; Mary Mason, district chairman, WRC, Washington, D. C.; Ann Ginn, district chairman, WTCN, Minneapolis, Minn.; Ruth Crane, district chairman, WJR, Detroit, Mich.; Peggy Cave, district chairman, KSD, St. Louis, Mo.; Florence Shugars, district chairman, WROK, Rockford, Ill.; Victoria Corey, district chairman, KDKA, Pittsburgh, Pa.; Marvel Campbell, district chairman, WAIR, Winston-Salem, N. C.; Frances Wilder, state chairman, KNX, Hollywood, Cal.; Jane Weaver, WTAM, Cleveland, Ohio; Duffy Schwartz, WBBM, Chicago, Ill.; Marjorie A. Wever, WHIZ, Zanesville, Ohio; Gladys Borne, WISR, Butler, Pa.; Virginia Pierson, WTAD, Quincy, Ill.; Judith Waller, WMAQ, Chicago, Ill.; Madge L. Cooper, WMRN, Marion, Ohio; Hilda C. Woehrmeyer, WOWO-WGL, Fort Wayne, Ind.; Verda Mae Ziegler, Fort Wayne Public Schools, Fort Wayne, Ind.; Grace E. Ingledue, WFIN, Findlay, Ohio; Gertrude Broderick, FREC, Washington, D. C.; Lt. Hazel Markel, U. S. Navy, Washington, D. C.; Capt. Ruth Morton, WAC, Washington, D. C.; Linnea Nelson, J. Walter Thompson, New York City; Dorothy Spicer, Chicago, Ill.; Hayle Cavenor, Regional Director, OWI, Minneapolis, Minn.; Madeline Johnson, WCOL, Columbus, Ohio; J. A. Barber, representing Ruth Schleber, KGVO, Missoula, Mont.; Lillian Gold, Chicago, Ill.; Kirt Cuff, Variety, Chicago, Ill.; Mrs. Oscar A. Ahlgren, president, Indiana Fed. of Women's Clubs; Mrs. R. F. Grosskopf, 7th District, Indiana Fed. of Women's Clubs; Mrs. Esther Cook, state radio chairman, Wisconsin Fed. of Women's Clubs; Mrs. Clarence A. Muth, Children's Theater, WTMJ, Milwaukee, Wis.; Mrs. George B. Palmer, national radio chairman, General Fed. of Women's Clubs and regional director of listener activity, Minneapolis, Minn.; Mrs. R. K. Stoddard, regional director of listener activity of NAB in Cedar Rapids, Iowa; Mrs. W. F. Ottmann, regional director of listener activity, Omaha, Nebr.; Mrs. Robert Stirling, Illinois Federation of Women's Clubs; Willard Egolf, NAB, Washington, D. C.

Committees

The following committees were appointed at the annual meeting:

Release Committee:

Margaret Cuthbert, NBC, New York City
Mildred Bailey, WTAG, Worcester, Mass.
Peggy Cave, KSD, St. Louis, Mo.
Ruth Lyons, WLW, Cincinnati, Ohio
Dorothy Lewis, NAB, New York City
Rhea McCarty, WCOL, Columbus, Ohio
Lavinia Schwartz, WBBM, Chicago
Ruth Chilton, *ex officio*, WSYR, Syracuse, N. Y.

Steering Committee:

Chairman, Ann Ginn, WTCN, Minneapolis
Victoria Corey, KDKA, Pittsburgh
Marvel Carter Campbell, WAIR, Winston-Salem
Mary Mason, WMAL, Washington
Ann Erickson, WHAI, Greenfield
Ruth Lyons, WLW, Cincinnati
Peggy Cave, KSD, St. Louis
Hazel Cowles, WHAM, Rochester
Evelyn Hicks, WSGN, Birmingham
Ruth Crane, WJR, Detroit
Leah McMahon, KFSD, San Diego
Marjorie Cooney, WSM, Nashville
Florence Shugars, WROK, Rockford
Ann Holden, KGO, San Francisco
Ann Stirling, KFR, Seattle

By-laws Committee:

Chairman, Ruth Chilton, WSYR, Syracuse
Mildred Bailey, WTAG, Worcester
Grace Johnson, Blue Network
Dorothy Lewis, NAB, New York
Victoria Corey, KDKA, Pittsburgh
Dr. Grace Ingledue, WFIN, Findlay
Rhea McCarty, WCOL, Columbus

Membership Committee:

Chairman, Mary Mason, WMAL, Washington
Ann Ginn, WTCN, Minneapolis
Rhea McCarty, WCOL, Columbus
Dorothy Lewis, NAB, New York
Lavinia Schwartz, WBBM, Chicago

To: AWD
From: Ruth Chilton

We missed you at our NAB War Conference in Chicago and the Ohio Institute meetings but we hope for better luck next time.

Our accredited membership list yields the astonishing fact that we now number 580 members. This letter carries my very best wishes to each and every new member! Next year, through local group meetings, many of us will become better acquainted. Meanwhile let us hear from you; what you are doing and thinking—and particularly news about yourself.

Yes, our meetings this spring were grand. Messages were brought from industry leaders, speeches made by experts and, best of all, we took our hair down in several closed sessions. Committees have been set up. For further information, read all about it, folks, in THE BEAM! How about a special cheer for Vickey Corey, our new BEAM Editor!

We have come a long way under wartime conditions. As we look forward we face roads with many a turn and obstruction, yet I have faith that an organization born and thriving during these hectic days will live and progress toward a happier peacetime era.

Above all, I hope we'll remember that the future of AWD is in the hands of each one of us. We'll strive to build fellowship and friendship, one for the other, that will guarantee the success of the Association of Women Directors of NAB. The year 1943 is a challenge to the AWD. We'll meet that challenge on the "beam".

May I express my deep appreciation to each and every one of you for your kindness and cooperation. Here's good luck for another year.

NAB PUBLICATIONS

The results of a special study on women's audiences recently compiled by our president, Ruth Chilton, and the executive officers, were distributed at the NAB War Conference in Chicago. They're invaluable sources of information and are now available for all women directors. If you haven't received a copy yet, you can get one by writing to Ruth Chilton, 535 Fifth Avenue, New York.

There's another little booklet that every woman director should read to get the listener's viewpoint. . . . It's titled "HOW TO LISTEN TO RADIO." See if your station has received a copy . . . if not, send to the NAB office, 535 Fifth Ave., New York City. You'll be nearly as wise as your audience after you've read it.

"The Network Serves the Woman Listener"

By GRACE M. JOHNSON

(Condensation of a speech made at Northeastern Radio Council)

RADIO in wartime must offer much practical help. It must provide entertainment, inspiration; it must sustain our courage. That is the problem network broadcasting faces today . . . and also the problem facing the woman director. As the homemaker's interests grow, we must increase our service and broaden our sphere of activity.

For assistance in solving the wartime living problems of the housewife, broadcasters have established the informative "how to" program: The Blue Network's "Mystery Chef," who explains the need for rationing, how to conserve on points and still feed the family amply and nutritiously. NBC's "Consumer Time" and "Betty Crocker" programs; CBS, "Fashions in Rations"; Mutual with its fine array of programs. Specific information is given on other programs on nutrition, consumer guidance, conservation, victory gardens, income tax, budget, and sewing.

Perhaps the greatest service the Blue Network has contributed to the mothers of America is its child care program, "The Baby Institute."

Child Problems Presented

Each weekday morning outstanding pediatricians, child psychiatrists, and pre-school educators present a physical or social problem in the life of a mother and her child from the time of conception until the child is ready for school. This meets the mothers' new awareness of their child care responsibility during the wartime drain on the medical profession.

With gas rationing and lack of transportation for lecturers, radio assumes a more important place in the lives of clubwomen. So, in addition to our regular forums and discussion programs, we broadcast many special programs for women dealing with national, international, and, particularly, postwar problems.

There are programs dealing with every phase of the war effort. To bring the mothers, wives, and sweethearts of our fighting men closer to their men, the Blue Network's "Men of the Land, Sea, and Air" broadcasts interviews with sailors, aviators, and soldiers in our own country and abroad. Whenever an American is to be interviewed from abroad we endeavor to contact the family. Sometimes this will take hours, sometimes days, but the results justify the time and effort as this mother's letter testifies: "We appreciate very much your notifying us of the London broadcast on which John was interviewed. It was a very great thrill for us. We haven't seen John for a year and a half. His older brother is in Australia. Thank you so much."

Education, music, religion for wartime living, these needs are all covered by special programs. They are part of radio's responsibility, be it network or woman director, of building and bettering our American family life. Because isn't that what we are fighting for?

"GRANDMA" DOROTHY

These lightning visits of Dorothy Lewis bring an infectious response of energy and efficiency from everybody in her vicinity. Even the stork responded with obliging promptness and delivered a beautiful nine-pound boy to her daughter, Mrs. Thomas A. Gage, while Dorothy was visiting her May 16th. Those of you familiar with Dorothy's years of contribution to fine music in radio will not be surprised to hear the new grandson, Thomas Lewis Gage, was greeted with a beautiful lullaby composed expressly for him by his grandmother, Dorothy Lewis, herself.

1943 RADIO INSTITUTE REPORT

NATIONAL ASSOCIATION OF WOMEN DIRECTORS, NAB

Ruth Chilton, Station WSYR, Syracuse, President of the National Association of Women Directors, presided at the 8 p.m. session when the topic—"The Woman Listener Discovers New Horizons in Wartime" was discussed. Preceding the four speakers, Ruth Chilton introduced the following Women Directors who participated later in the Round Table Discussion: Peggy Cave, Station KSD, St. Louis; Victoria Corey, Station KDKA, Pittsburgh; Ann Ginn, Station WTCN, Minneapolis; Ruth Lyons, Station WLW, Cincinnati; Mary Mason, Station WRC, Washington; Rhea McCarty, Station WCOL, Columbus; Lavinia Schwartz, Station WBBM, Chicago; and Jane Weaver, Station WTAM, Cleveland. Also, she presented Dorothy Lewis, coordinator of listener activity, NAB, who said she was happy to witness the very wonderful occasion of having the National Association of Women Directors of NAB sponsor this important session because *women* today really have power!

"Advertising Does Double Duty on the Home Front" was the subject of the opening address made by Lewis H. Avery, director of broadcast advertising, NAB.

In the round table discussion, which was kept plenty alive with pertinent questions directed to the above speakers and also to the women directors with the audience participating, it was emphasized that in America today thousands of women, whose wartime job is in the home, need to be told of the paramount importance of their wartime responsibilities. Furthermore, with new horizons lifting to *women* it was pointed out that Radio is one of the most potent factors in making women realize what a great contribution they are making and can continue to make on the Home Front!

It was disclosed that unfortunately too many advertisers are unfair about carrying their load. Avery suggested that women directors and women broadcasters should explain to Station Managers how advertising can best tie into all the various Government campaigns such as salvage and other vitally important promotions thru OWI, OPA, and WPB that touch directly the homemaker's life. Dissemination of this information presented in simple, understandable, everyday language reveals what is needed and why and how Mrs. American Housewife can help. It was interesting to have one of the listening audience say "one of the things that is most appealing to the women listeners is to have a woman broadcaster tell them in her *own* words about current topics of particular interest to women—they believe *her!*" Whereupon both the audience and women directors questioned the amount of radio script and advertising continuity that was actually being written by *women* to appeal directly to women—for instance, the discussion of *nutrition* in the kitchen lingo using Governmental information issued to press and radio for planning and presenting women's programs.

It was gratifying to learn that some commercial sponsors feel that a *service* not a *selling* program is sufficiently important to merit sponsorship as a wartime service for women on the home front. In conclusion, Mrs. American Housewife *is* discovering new and broader horizons and *women* radio commentators can and are playing an important role in her education.

New Station Members of NAB

We extend welcome to new stations who became members of NAB at the recent War Conference in Chicago.

KCMO, Kansas City, Mo.; KCRC, Enid, Okla.; KEEW, Brownsville, Texas; KFFA, Helena, Ark.; KGDM, Stockton, Cal.; KGFL, Roswell, N. M.; KHUB, Watsonville, Cal.; KLZ, Denver, Colo.; KSAN, San Francisco, Cal.; KSCJ, Sioux City, Iowa; KTBS, Shreveport, La.; KWFC, Hot Springs, Ark.; WDAK, West Point, Ga.; WEBR, Buffalo, N. Y.; WGGM, Gulfport, Miss.; WGRC, New Albany, Ind.; WHBQ, Memphis, Tenn.; WJPA, Washington, Pa.; WKBB, Dubuque, Iowa; WKBO, Harrisburg, Pa.; WTOL, Toledo, Ohio; WWPG, Palm Beach, Fla.; WHK, Cleveland, Ohio; WHKC, Columbus, Ohio; and four managed stations of the Texas State Network.

We suggest that our district chairmen write to the managers of the stations in their districts inviting their women directors to join with us.

NBC Establishes Women's Activities Division

Creation of a Women's Activities Division to establish channels of communication with women directors of all NBC-owned and operated stations was announced recently by William Burke Miller, manager of NBC's Public Service Department.

The new department, recognizing the importance of women in the wartime radio pattern, began functioning October 1.

The Division will exchange information and suggestions with the manager of the central division, Public Service Department, Chicago, and the western division outlet in Hollywood.

Chairmanship of the Division will rotate automatically after each four months' period. Duties of incumbent will be to conduct correspondence and to distribute information among eastern, central and western divisions and the NBC O-and-O stations.

Margaret Cuthbert will serve as chairman the first period with Jane Tiffany Wagner for the second and Mrs. Doris Corwith, third.

In outlining her objectives, Miss Cuthbert said she "hoped to give credit, impetus and glamor to the work of the women of NBC-owned and operated stations and those independent stations affiliated with NBC by publicizing their total effort."

Ruth Chilton Moves to WCAU

Ruth Chilton, president of AWD, has passed another notable milestone in her long and scintillating radio career. WCAU is the station which was able to persuade her to bring her rich and varied talents to Philadelphia to take over their popular and well-established participation program "For Women Only." She will present informal chats on fashions, home-making, child care and the hundred-and-one subjects dear to a woman's heart . . . all in the refreshing, inimitable **Ruth Chilton** manner. Despite the title, however, we have reason to know there is a large percentage of the "sterner sex" who follow her broadcasts with the same keen interest as the women; for her interests are so inclusive that no one can be impervious to her charming personality.

We all join in wishing **Ruth** the best of success in her new position.

DOROTHY LEWIS TOUR

AWD has some vitally important projects shaping up. We hope that each of you in the cities listed below will plan to see Dorothy and give her your reactions and ideas.

City	*Date*	*Hotel*	*Station Headquarters*

Extended Horizons

(EDITORIAL)

Through the daily mail response we women in radio are realizing more and more the responsibilities we hold to our listeners and community. We are like a valued, near neighbor, always ready with advice and cheer. In many cases, our voice is the one which the woman listener can turn to for sympathy and understanding. Our interests and discussions give her a new and wider horizon that she might not have achieved without us.

Our responsibility increases as radio extends its influence to a global sphere. Radio will have a major part in the post-war world in reconstructing countries and laying the foundations of lasting peace. This work extends to us as a woman director, as well. We interpret the world to the woman at home; through her we interpret it to her husband, her children. That world is as broad or as narrow as we make it. We bring that world into her home and our concept of it limits or extends her horizon.

If there are world-problems for women to face . . . and we know there are . . . ours is the responsibility, the opportunity, of setting their minds in a constructive pattern with a greater vision of the whole.

Escapist habits of thought are out-moded. It is the place of the woman director to present facts and truth that call the listener to face the world . . . not as she fondly wishes it to be, but as it is . . . a world of which she is a part and which she may in a small way help to mold.

There is no ceiling on opportunities for women directors today . . . we can go as far as our imagination and understanding will carry us.

Chit Chat

Peggy Cave, our associate editor, KSD, is conducting several business and discussion sessions at a National Radio Conference at Stephens College, November 19-21. General theme of the conference is "The Responsibility of Radio in the New World". Radio women from Nebraska, Missouri, Iowa, Kansas, Oklahoma, Arkansas, Tennessee and Illinois will be present. We're looking forward to hearing the results of this fine meeting.

Congratulations to **Alicia Fuller** on her recent appointment as program director of KQV.

And congratulations to **Nancy Boothe Craig,** WJZ "Woman of Tomorrow", on the birth of a baby boy.

A recent addition to women newscasters is **Virginia Safford,** WTCN. From her background of newspaper and magazine writing she is now radioing, "Postscripts on the News."

Another newspaper girl . . . **Kay Kenney** . . . has deserted her daily column which was featured in 250 newspapers for three years, in favor of the microphone with "Kay Kenney's Conclusions" now heard on WFMJ.

Since our last issue, **Alma Dettinger,** WQXR, celebrated the second anniversary of her program "Other People's Business". And **Mary Margaret McBride** cut the cake in honor of her third anniversary with WEAF.

Olive Kackley, WCKY's goodwill ambassador, sets a record at which broadcasters may shoot. She has spoken to more than 1000 civic, professional and business organizations, or an audience totaling more than 500,000 persons. During her career as a dramatist she has trained more than 100,000 persons, many of whom reached stage and radio success. At present her speaking engagements extend into next year. In addition to her speaking engagements, she's heard in twelve programs, seven days a week: her "Olive Kackley" program daily except Sunday; "Famous Women", Monday through Friday; and "Prologue", a program of philosophy and literature, every Sunday.

Ann Ginn, WTCN, is president of the Women's Advertising Club of Minneapolis. She has that comprehensive human touch in radio that makes children beg to name their baby sisters after her . . . and we're told the farmers grow her name on their squash!

When **Ruth Lyons,** WLW, puts in a call on her "Petticoat Party Line" they're all listening! She gave her annual picnic this summer with over 12,000 women of the Party Line and their friends, husbands, and children in attendance.

Mr. and Mrs. Stan Lee Broza, WCAU, are still receiving congratulations for their "Children's Hour." With more than 15 years to its credit, the program has received "Tune-In" Magazine's award of merit.

WANTED . . . an AWD 8th District Committee Member from Indiana! If you're interested, drop a line to **Ruth Crane** (Mrs. Page, to her listening audience), WJR, Detroit.

'Victory, Like Charity Begins at Home'

By Hayle C. Cavanor

(Following out the idea stated in our Columbus meetings to be more active in war and public service, we present an article from a former program manager of WCCO who is now regional director of the Office of War Information. The OWI Womanpower Campaign received top ratings during the month of September; but we can't believe that it ends there. One million additional workers must be added to the labor force in 1944 . . . which means that every month in the coming year must have an urgent appeal for workers. We suggest, however, that you follow the advice given in the Woman's War Program Guide for September and find from your local U. S. Employment Service manager what the womanpower needs of your community are before you go into the subject on the air.—EDITOR.)

ON SUNDAY afternoon of December 7, 1941, every man in the United States listening to the radio wanted to enlist, and every woman was quite ready to take over any task, no matter how gruelling or how lowly, for their own United States had been cruelly, wantonly attacked.

Now, in September, 1943, through almost super-human effort, the situation of the United States has changed. Uncle Sam is no longer unprepared, with his back to the wall. He is armed to the teeth and has taken the offensive. The attitude of the men and women on the home front also has changed. Overconfidence has swept the nation like a prairie fire. It has become an enemy which must be destroyed. The feeling that the war is already won, that we can relax and coast along now until the Axis collapses, is an exceedingly dangerous one. To quote the words of the Secretary of the Navy Frank Knox, on July 20, "only a careless fool would pretend that we have done more than make a good beginning."

Just how has overconfidence affected the home front? Here are a few examples:

Let's take a look at the records of the American Red Cross. During the past six weeks thousands of Americans have broken their appointments to give their blood to the blood banks—blood which might have saved the lives of American soldiers. Thousands of nurses aides and grey ladies, needed desperately as the armed services recruit more and more nurses, have resigned from this important voluntary work in hospitals. Local Civilian Defense Councils complain that many members of their volunteer groups have ceased to do their work conscientiously or consider it vital. Civilians say "no danger of bombings now—the war is practically won, and blackouts here are a joke." But, even more serious than the situation in the Red Cross or Civilian Defense Councils is the effect on war agencies and war plants. Women are resigning from their jobs in defense plants at a time when the War Manpower Commission is scraping the bottom of the war manpower barrel and is seeking 3,000,000 additional women workers in the next twelve months. WPB salvage officials report that housewives are becoming careless about saving tin cans and grease. They have found many farmers openly indifferent about selling their heavy scrap, although the farmers have been warned that the steel plants cannot operate without this heavy scrap.

Over-optimism on the home front should not be fought with pessimism but with facts.

What Can Be Done About It?

The women commentators and women program directors of radio stations in the United States can probably do as much, if not more, than any one group to prevent American optimism from delaying American victory. Facts and figures upon which to base broadcasts can be obtained from local War Production Boards, War Manpower Commission officials, officials of Civilian Defense, U. S. Employment offices, hospitals or the American Red Cross. All of these agencies have experienced information men whose files are bulging with not only facts and figures, but good human interest stories. Your regional OWI radio officers will put you in contact with these information men or get the material for you.

American women must first be told the facts, then persuaded, inspired or shamed into doing their share. Interviews with leaders in the community, well known entertainers or soldiers home on furlough who are donating blood to the blood banks may inspire others to do likewise. Talks by salvage and scrap experts may bring home the vital need of fats and scrap. Educators who have made a study of world geography, or aviation experts, can frequently convince the public that every country in the world must be prepared for a defense against bombing until the war is over. Doctors, hospital superintendents, nurses and public health workers can explain that hospitals are not money making institutions and quash the rumors that nursing aides and grey ladies help swell the coffers of these institutions of mercy. In some instances they have actually helped to keep the doors of the hospitals open.

Women broadcasters can also be of assistance to the War Manpower Commission and the U. S. Employment Service by featuring broadcasts with grandmothers who have dropped their knitting or afternoon bridge and gone into war plants to work forty-eight hours a week, releasing a man for the fighting front. Interviews with war brides who have entered a munitions factory to help make the bullets their husbands will use may inspire other women whose husbands are in service to get into essential war work. Programs presenting women in any kind of war work are of timely interest these days if they tell other women why they took a war job, how they trained for it, and how they manage their households while they help win the war.

What Are You Doing For Uncle Sam?

Eleanor Hanson, director of women's activities at WKH-WCLE, Cleveland, and a member of our own BEAM Committee, was one of 15 women chosen by Mutual to be a WAC for a week! She went through the training routine at Fort Oglethorpe and says it was the most exciting experience in her career. Radio is lucky to get her back!

When you read the fulfilled quotas of Ohio's Third War Loan you can give **Katherine Fox,** WLW, part of the credit. She spent much of the time in Cleveland serving on the advisory committee for women's activities for the drive in that state.

WOWO'S **Jane Weston,** cooperating with the OCD, conducted a six weeks' period of "Canning Classes of the Air". Nearly a thousand listeners enrolled. Actual demonstrations were conducted by home economists of the area. Last program of the series brought in women enrolled in the classes, selected at random from mail received. A "True or False" quiz show on what had been taught in the classes gave a tangible answer to the efficacy of the course. Students were sent "certificates" upon completion of the lessons. Already plans are under way for next year's classes. Incidentally, **Jane's** a bride now . . . so we all send our best wishes to the new **Mrs. Bill Stewart.**

Elinor Lee's "Home Service Daily" program, WTOP, Washington, D. C., was named winner of the local radio program awarded by the National Advertising Agency network. It's a program to answer war-time needs of the housewife, and all indications are that it has done it quite successfully! Congratulations, **Elinor Lee!**

Women are handling many unusual jobs now, and **Dorothy Crandall** has taken on a unique one. She's one of the country's few agricultural broadcasters. She's just joined the Department of Agriculture's New England Radio News Service, and is filling a job that's been vacated twice this year by men now in the armed forces.

And speaking of war service, **Mary Ellen Trotter,** WCCO, is one of two women in Minnesota who hold a First Class Radio-Telephone Operator's license. She joined the engineering staff in 1942.

Have you heard the BLUE program "This Is Official"? It's scripted by **Sylvia Milrod.** known for her WINX "Victory Starts At Home." She is on leave from that station now to do the necessary research and writing for the network.

Martha Lewis' "Musical Clock" beamed to war workers from WGL has picked up a considerable audience at Baer Field army base. **Martha's** wake-up music and correct time are on the air while the boys are straightening up their barracks. One soldier fan wrote: "We like your music and comments so well, we can even stand to hear you tell about all those fancy doodads you try to sell. If we were in the market we'd certainly go right out and buy them." There's salesmanship for you!

"Food as a Weapon" takes the spotlight this month in the nation's campaigns. And as usual women in radio play a leading part. **Mrs. Vianna D. Bramblett,** WLW nutrition expert, writes a weekly "No Point Menu" and nutritional article for the station's radio news clipping sheet in their wartime food series. She is a member of the nutrition committee of OCD.

A little lady who's proving that age doesn't count is **"Johnny" Kathryn Gould** . . . just 16, but in complete charge of programming, producing and announcing for Fort Wayne's FM station W49FW. She's had five years' radio experience as singer, narrator, and director of a chorus of 60 voices. Her dad is **Jay Gould**, the well-known character "Doctor Hickory" formerly heard on the Blue.

From Totem Broadcasters, Inc. (and isn't that a picturesque heading?), **Ann Stirling** reports her program "A Woman Wonders" is now going into its fifth consecutive year. Another half-hour, Monday through Friday, which she presents, is "Homemakers Calendar." It's marvelous how these girls do it! During her vacation she worked on her farm from dawn to dark. That's helping Uncle Sam both on duty and off!

And how many others of our girls are taking their responsibility to the nation's food seriously this year . . . going home each evening and week ends to care for their gardens and put up the extra fruit and vegetables in cans? In line with this **Dorothy Lewis** spent Labor Day canning a bushel of beans from her farm!

Public Service in broadcasting is radio's answer to that phrase in the broadcaster's code: "Public interest, convenience, and necessity." NBC's Public Service Department held its annual fall meeting in September to make plans for the network in the coming year. And as usual, women played a prominent part in the planning. **Judith Waller,** manager of the Central Division Public Service Department, Chicago, reported on the Second NBC Northwestern University Summer Radio Institute, and on the activities of the Central Division. **Jane Tiffany Wagner,** director of war activities for women, discussed women's war activities for the year to come. **Margaret Cuthbert,** director of programs for women and children, reported on women's activities other than those directly connected with the war effort. **Doris Corwith,** assistant to the public service counsellor, and public service lecturer, was called upon for recommendations as an outgrowth of her travels and activities. **Dr. James Rowland Angell,** public service counsellor, presided.

Emphasizing the importance of proper nutrition, **Olga Johannes** conducts the "Victory Food Club" on WROK, Rockford. Scheduled Monday through Friday mornings, the program is presented in cooperation with the local OCD nutrition committee. Wartime food saving hints, stretching scarce foods, suggestions for balanced menus and general recipes are among the topics covered. **Olga's** an excellent cook and listeners agree that she knows what she's talking about. **Miss Johannes** and **Lorna Lane,** WROK staff organist, are one and the same.

Orchids for Programs

Orchids to **Mrs. R. H. Eddy**, KHQ, for her radio personality "Mrs. Edna Perry" and the "Morning Mail"! In these days of increasing retail store advertising and promotion by radio, **Mrs. Eddy** and the "Morning Mail" are blazing a new trail in personalized radio shopping service. Her sympathetic understanding of women's needs and problems in wartime shopping has made it an outstanding success. There's another "Mrs. Perry" who's on duty at the department store to handle the customers who come in to shop with her in person, and to handle the large volume of mail orders that come in after each broadcast. **Mrs. Eddy** finds she has to serve not only as shopper advisor, but as a sort of Dorothy Dix-Emily Post combination to her listeners. The program carries a full schedule of war service items as well. It does its share of recruiting for women in the armed services, Red Cross activities, and plays an outstanding part in solving civic needs and problems. So for original and ingenious community service and entertainment ideas . . . here's to you, **Mrs. Eddy!**

(Send us your idea.)

Does Your Survey Speak For Your Audience?

By Elizabeth Reeves

Knox-Reeves Agency, Minneapolis, Minn.

PERHAPS the objective of sponsored radio can best be defined as an effort to devise programs which combine the highest entertainment standard possible with consideration for the widest audience acceptance.

The radio audience is of course the most diverse audience possible to assemble. It is, in short, everyone.

The question then becomes "What do most people want to listen to most?" There have been many efforts to find the answer to this question. Popularity trends are measured by Crossley and Hooper audience ratings and independent surveys are constantly being made in an effort to determine audience preferences. These methods are good as far as they go. There has been, however, one rather striking variation in that occasionally a program which has a high audience rating in the Crossley and Hooper percentages does not come in for voluntary approval by independent small groups, while just as often the programs which win their approval are not programs which are generally the most popular according to other surveys.

There are several possible reasons for this. It may be that the women who vote on these independent surveys are not familiar with the entire field, or it may be that they are not typical of the average radio listener, and therefore their choice would never follow the trend of the majority. This is a very important fact to determine since these women represent the most articulate listener, and since, in most cases, they purport to speak for the radio audience at large. If the sponsor is guided by them, will his program be led into paths of greater general popularity, or will he sacrifice the approval of the vast inarticulate mass which has been his audience? As long as these articulate groups function independently, the sponsor will be left in doubt as to the thoroughness of their methods and therefore as to the value of their findings.

Since the organization of radio council groups by Mrs. Dorothy Lewis during the past few years, it has become increasingly possible for radio councils and sponsors, or their agencies, to get together in an effort to find the answer to the question of what radio audiences want. As well as to these other questions, do these women who comprise the radio councils speak for the majority? Are their methods thorough enough to be a value? Are the agencies open to suggestions? Is it possible by working together to raise both the popularity and the standard of sponsored programs?

In an effort to make a beginning at least in forming some sort of working plan for finding the answers to these questions, a survey was conducted last May 28th through June 24th in Minneapolis by Knox Reeves Advertising, Inc., in cooperation with Minnesota Radio Council groups. The technique of the survey was worked out by the Research Department of Knox Reeves according to accepted commercial survey standards. Mrs. George B. Palmer, coordinator of listener activities for the Minnesota Radio Council, organized the listening panels. The plan was as follows:

The survey covered eight programs—four on CBS and four on NBC. One hundred twenty-five women were selected from radio council groups. Half of these women listened to NBC, the other half to CBS for a period of two weeks. At the end of this period those who had been listening to NBC changed to CBS, and the CBS listeners changed to NBC. with a few changes and additions to personnel. The women were paid one dollar a week. Two hundred fifty dollars, or half the total amount, went for a nurses' scholarship; the other two hundred fifty dollars was used for a radio scholarship. The method was quite simple. Questionnaires were distributed every week. These were filled out every day and mailed back to the agency. As each week's listening period ended, a postal card was mailed to Mrs. Palmer by each of the women in the panel noting that the programs had been listened to and the reports sent in. Payment was made to Mrs. Palmer for the radio scholarship and to Mrs. L. R. Upham for the nursing scholarship, as the women all understood their time was contributed to these scholarship drives.

Questionnaires Ask Reaction

The questionnaires asked for reports on the listener's reaction to story material and also a vote on preference of the program heard. The reports were not signed except by number, so that the identity of the voter was known only to the person who tabulated the master list. At the conclusion of the survey all comments were tabulated so it was possible at a glance to get an accurate cross section evaluation of all eight programs so far as this group was concerned. No attempt was made in this survey to get suggestions from the women as to what type of program they might prefer to those listed on the survey. It was felt that this would open up an entirely different phase of listener-sponsor relationship. The purpose of this particular survey was an attempt to get the articulate reaction of the typical listener. The women on the panel were not asked not to listen as critics, but rather to express spontaneous enjoyment or disapproval of the programs which were to be regarded solely as entertainment.

Eventually program planning may become a very important part of radio council activities. If it is to be successful, however, it must come as the fruit of a realistic attitude which has been nurtured through actual experience in listening to and evaluating programs which carry the seal of acceptance of the majority of listeners. Since radio depends entirely upon voluntary popular acceptance for its success, no program can be considered successful unless it has what it takes to command popular acceptance. Successful radio program planning, therefore, can only be achieved when programs are conceived with their cultural or entertainment values considered in relation to their degree of audience acceptance. This requires experience and familiarity with the whole field of radio toward which listening is the first step.

The Minneapolis survey, while it represented a rather small sample and therefore its conclusions were not considered final, was, nevertheless, considered a very valuable guide toward a better evaluation of the programs concerned. At the same time, the council groups themselves required a more thorough knowledge of the kind of programs which are typical of daytime radio fare. It was felt, I believe, by all concerned that a beginning had been made from which a closer working relationship could be developed between those who plan radio programs and those who listen to them.

Washington Radio Woman Among Award Nominees

Among honorable mentions given in connection with the annual Josephine Snapp Award at the summer convention of the Advertising Federation of America this year, one was to Elizabeth B. Grove, of WTOP, Washington, D. C.

A silver cup is awarded the top nominee, while the four honorable mention recipients receive plaques.

Noteworthy was the fact that this honorable mention was given not for a radio program alone—but for Mrs. Grove's work on a complete advertising campaign which she conducted while she was with the McCord Co., Minneapolis, Minn.—proving BEAM'S point that opportunities for radio women to become versatile advertising women are wide open.

The campaign which won the plaque was for a process of permanent waving, developed by a Minnesota laboratory. Its significance lay in the fact that this product was the first of its kind to be advertised—and accepted—on a national basis. To begin with, there was a certain amount of public prejudice because of the method the process used. So in addition to the basic problems of any campaign—advertising, marketing, merchandising, promotion—there was an important job of trade and public relations to be done. It was a challenge to the agency—and it required a woman's point of view. The account executive, Louis Melamed, called on Mrs. Grove, who as radio director was first and foremost a copywriter.

The scope of the campaign was all-inclusive. It began with the foundation research done by the manufacturer, and continued on up through every phase of an advertising job—product testing, product naming, package design, market research, media research, merchandising plans, the preparation of both trade and consumer booklets and of the advertisements themselves—and finally, a complete publicity program. In most of these campaign steps, Mrs. Grove participated. She was active in the campaign planning, and she wrote all of the copy, including not only the ads, but the copy for the merchandising material and the publicity stories for release to beauty and fashion editors.

The campaign was an outstanding success. The process is today the leader in the chemical permanent waving field. This is a credit, of course, to the quality of the process itself and to the sound thinking of the agency which put it on the market, but the story does not stop there.

The BEAM feels that this campaign, with its accompanying award, is proof of the fact that there are opportunities today—and growing opportunities—for radio women to prove their ability as informed, able advertising women—in short, for radio women to step into the breaches caused by the war, and show that they have the required "basic training" for planning sound, integrated, success advertising campaigns.

Radio stations, like advertising agencies—once proving-grounds for bright young men—are undergoing a change. Most of the bright young men today are on sterner proving-grounds. Given a chance, the girls can do much to help hold the fort, and the clients, till the boys come home.

PEABODY "LISTENING POST"

This year radio stations come into close contact with the people chosen to evaluate programs for the George Foster Peabody Award (the Pulitzer Prize of radio). Local committees have been set up throughout the country. Two thousand persons in more than a hundred cities in some forty states will evaluate programs in their own communities and make recommendations to the National Board.

AWD Committee Activity

During the spring of 1943, a survey of the quality and character of the releases sent to women directors and broadcasters by commercial organizations and information services was conducted. Sampling of the membership throughout the country revealed that women were receiving from 35 to 80 releases in a ten day period. It was found that distribution was spotty and regional. A careful investigation of all these releases was made and information was set forth in chart form, which was forwarded to every member. The chart carried two questions:

1. Do you receive this material?
2. Do you use the material?

Out of 580 charts, 162 were returned or about 27%.

Specific information on the acceptance of any of the listed releases is available at the AWD New York office.

Our Release Committee has been working on a *Masthead* for AWD releases which is now ready and will be used by the various companies and information services that have been authorized by our Release Committee. Use of the masthead must be OK'd by the Release Committee for *each* mailing.

After discussion with the Public Relations Committee of the NAB, it was determined that the women directors should ***check regularly*** with their ***station managers*** all of the AWD and commercial releases. The station manager has the privilege of discarding all releases contrary to his station policy. All AWD members will exercise caution in giving unnecessary credit lines and should be doubly careful to check everything so that potential clients for sponsored time are protected.

It is always the privilege of the woman director to rewrite, in her own style, all releases sent to her. We are under no obligation to give releases verbatim, as long as we present the information authentically.

Consult your release chart for any services you desire, and which you are not receiving, then write directly to the address of the service given on the chart, or to the AWD office at 535 Fifth Avenue, New York. Be sure your correct title and address is on file with the release services you wish to receive.

PUBLICATIONS

Do you know women's latest achievements in radio and what they are contributing to the industry? NAB has a new brochure to give you a picture of the technical accomplishments of the "weaker sex." It's a "Tribute to Women Technicians and an Invitation." Your station manager has a copy. Get it from him and read it. There are some ideas you'll be glad to include in the next speech you make to the Civic Club.

There's another booklet telling the story of radio in wartime. It's presented by NAB in collaboration with the CBS, BLUE, NBC, MUTUAL Networks: "This Is an Army Hitler Forgot." Stations and advertisers have employed $100,000,000 worth of talent and time to reach the radio audience with vital war messages. Don't forget this radio army the next time you tell of radio's modern wartime accomplishments.

The Writers' War Board is making available to stations a group of talks on various phases of the war effort. These talks may be obtained through the Committee on Speeches and Speakers . . . at 122 East 42nd Street, New York.

Washington Correspondent

From the nation's capital we hear that **Mary Mason** of Station WRC, Washington, has accepted the appointment to serve as Washington representative for the AWD. **Mary,** being in the thick of things, will be in a position to keep us in the "know" on activities in Washington, vital to the interest of our members and their listeners.

The full text of the attached bulletin appears in this issue of the "NAB" Reports." Please route this copy to your sales executive.

National Association of Broadcasters

1760 N STREET, N. W. ★ ★ ★ ★ ★ ★ ★ WASHINGTON, D. C.

Jan. 15, 1943 **BROADCAST ADVERTISING BULLETIN** No. 1

WHAT HAPPENS WHEN NEWSPAPER ADVERTISING STOPS

and radio advertising picks up a small part of the job

For three days, from Sunday evening, December 13, 1942, to 1:00 AM on Thursday morning, December 17, 1942, twelve New York City newspapers ceased publication while the members of the newspaper delivery unions were on strike.

Heavy schedules of planned newspaper advertising couldn't be published. Some retailers turned to radio advertising; others sat tight, expecting the strike to end momentarily.

To the credit of broadcasting, no New York City station tried to capitalize unduly on the misfortune of another medium. Where good time and good features were available, stations offered them for sale. Where time was at a premium, with only early morning or late evening open, stations declined to have broadcast advertising judged on the basis of such availabilities.

WHAT HAPPENED?

Department stores' sales boomed along as though nothing had happened. Here are the actual figures from the Weekly Federal Reserve Index of Department Stores' Value of sales:

	Week Ending December 19
Increase for New York City	4%
Increase for Entire District	4%

And the entire Federal Reserve district includes such war-busy markets as: Buffalo, Rochester, Syracuse, Utica, Albany, Troy, N. Y. and Newark, N. J. Despite the vastly expanded buying power in the rest of the district, New York City stores held their own against the field.

But radio can not nor does it seek to claim credit for holding sales at such a high level in the face of very adverse shopping weather. The total volume of retail radio advertising actually increased but little.

WHAT HELD SALES UP?

The answer to that question can be debated by academic students of advertising and merchandising for years to come. Probably the effect does deserve psychological probing.

But three facts do stand out: Christmas shopping was not a new idea this year; it might be termed an established American custom. Furthermore, newspapers and radio had featured Christmas merchandise, built up the urge to buy for weeks before the newspapers ceased publication temporarily. Many New York City radio stations were carrying a substantial volume of retail advertising and that continued unabated during the period.

Actually, broadcasters cooperated with newspapers during the trying days. Almost all radio stations increased the number of their newscasts. Newspapers cooperated to increase the local news coverage of radio stations. Radio did not try to profit unnaturally from the predicament of the newspapers. One of the leading newspapers had already contracted for time over one of the leading radio stations to tell its readers what the newspaper would contain when it resumed publication. Then the strike was called off. But one newspaper, nearly a thousand miles away, decided the history of advertising during the strike should be reviewed.

THE RETORT DISCOURTEOUS

Totally unaffected by the strike in any way, shape or manner, the *Chicago Daily News* carried a story by its financial editor, Royal F. Munger, that seemed totally unnecessary and definitely unfounded. Said Mr. Munger in the course of his article, after pointing out that buying held up on Monday, began to thin out on Tuesday:

> "By Wednesday, a buying slump was in full blast, and people who had forgotten to go shopping were beginning to say, 'Oh, well, it's a war Christmas anyway.'
>
> "The Crowds had fallen off, and the attempts to use radio in place of the missing advertising were getting nowhere rapidly. In fact, even through their anguish, the newspaper advertising men grinned at the job radio didn't do."

Unfortunately, Mr. Munger's article has been reprinted as a news story in many newspapers; as a house advertisement in others.

Apparently neither he nor those who reprinted his article have seen the Federal Reserve figures for department store sales during the week ending December 19, 1942.

Of course radio could answer this unprovoked and unjustified claim, but radio has more important things to do. Broadcasting as an industry has embarked, under the NAB Retail Promotion Committee, on a study of retailing and radio that should furnish concrete, factual evidence of the power of radio to help retailers solve some of the problems they face today. More reason why every radio station should subscribe to the Retail Promotion Committee Plan.

Bickering between media is the worst thing that could happen to advertising today. All media have a job to do today—the magnitude of which they have never previously faced. First and foremost, they must help to win the war and win it quickly. Then they must help manufacturers, distributors and retailers to meet utterly new problems; chart sales and institutional courses over unknown seas.

Perhaps this opportunity for inter-media cooperation is nowhere better expressed than it was on the "Inside Washington" page of *Printers' Ink* for January 1, 1943:

> "Food Administrator Wickard and OWI's Elmer Davis did an admirable job of building up for their last Sunday nights' broadcast (December 27, 1942) announcing that around 200 food products would be strictly rationed beginning sometime next February. First the Sunday

morning newspapers carried top-head to the general effect that something big was cooking in Mr. Wickard's department—probably having to do with rationing—and that the double-barreled broadcast would reveal the whole plot. Then throughout the day, the forthcoming event was ballyhooed at intervals by the various broadcasting systems. Thus the interest of *hoi polloi* was really stirred up and they did not mind too much being deprived of their usual Charlie McCarthy half hour and other Sunday evening features. The execution was good, too. The dignified preliminary roundup by Mr. Davis and the forthright speech by Mr. Wickard covered the subject adequately and effectively. . . . There was not a thing wrong with the technique employed. Mr. Wickard's reminder that "your Monday morning newspaper will contain an interesting detailed announcement in this connection" was an effective stroke. The two mediums, newspaper and radio, were thus effectively hooked.

Consider that important announcement and the manner of its release. Broadcasting was used to condition the minds of the people—to prepare them for more drastic sacrifices necessary to win the war. To newspapers were left the details of how that program would be implemented.

Some of the ablest men from broadcasting and newspapers are on the staff of OWI. When they agree on such a technique, doesn't that suggest the tremendous importance of broadcasting as the prime means of communication?

Don't let your retail accounts be misled by the misinformation that has unfortunately been published in connection with the strike of the New York City newspaper delivery unions. The statements set forth in this report are verifiable facts. Use them wherever and whenever necessary to spike fraudulent claims.

But don't forget: broadcasting will progress and grow, as it has in the past, through constructive selling on your part and the part of everyone else connected with the industry.

SELL A BOOK TO SELL STAMPS

One of the most offensive attempts to tie a commercial campaign into the war effort is the recent letter of Farrar & Rinehart, Inc., book publishers of New York City, urging stations to follow "The Treasury Star Parade" programs with an announcement plugging a book of the same name containing the scripts of these programs. And the reason why you should do this? If people buy the book containing the scripts, they will be stimulated to buy more War Bonds and Stamps. It would be much more effective to broadcast "The Treasury Star Parade" twice and so make a direct appeal. We hope no NAB member station will succumb to this appeal. Let the publishing house pay card rates for the announcements following these programs.

MORE P-I INSURANCE

Many member stations have forwarded letters from the Charles Edson Rose Company of Chicago, Ill., offering advertising of several types of insurance policies on a graduated P-I basis. The continuity is described as "snappy." We hope all NAB member stations will therefore bounce the continuity back to the agency with an urge to buy on a standard rate-card basis.

WINNER LEFT AT THE POST

Described as a "winner," the "Record of Service" wall certificate offered to radio stations by the Midwest Advertising Company of Springfield, Ill. should be left at the post by all NAB member stations. Try to get the business on a straight rate-card basis. If the deal is as good as the agency says it is, they certainly ought to buy and quickly.

COVERAGE CLAIMS

A recent FTC case, wherein a radio station stipulated to desist from making certain claims as to its coverage, serves as a warning to stations. Extreme care should be taken to insure that no coverage claims are made that cannot be substantiated by reliable evidence. Statements made in brochures and direct mail constitute advertising just as much as advertisements in the trade papers.

Advertising Can Aid Government Programs of War Information and Increase Your Local Time Sales

Probably you are familiar with the many, carefully planned government programs of war information. Undoubtedly you have explored the possibilities of selling time and talent in support of these programs to local manufacturers, distributors and retailers. Such efforts have the unqualified endorsement of the Office of War Information because of the evident need for more advertising and more publicity in support of these informational campaigns.

How great is the need for advertising was ably summed up by Gardner Cowles, Jr., well-known newspaper publisher and radio station operator now serving as Director of Domestic Operations for the Office of War Information, in a talk before the Annual Advertising Awards Presentation Banquet on February 5, 1943, in New York. Here are three significant paragraphs from that speech:

"Today Americans are ready to make sacrifices. If anything, they want to make more sacrifices in order to get on with winning the war. But specifically as to the details of each government program, too often they are confused and unconvinced. They are unconvinced in large part because they don't have full enough information on why a program is necessary and how it works.

"And that is where advertising should come in. In my opinion, even with the help of all the editorial and news channels open to us in OWI today, we need advertising. Advertising is the only force powerful enough to do the job. It is the only one which can put these government programs before the public in simple, exact terms *often enough* and with *enough power* and with *enough control* to get results.

"The war on the home front can be won, in my opinion, and should be won without giving up the traditional free character of our media and our advertising, provided the media owners, the agencies and the advertisers realize advertising can and should and must be geared to help with war problems on the home front."

In other words, the government depends on private enterprise for the advertising support needed to implement fully the programs of war information. What's more, you can co-operate in this activity to the profit of your station.

Look over the following partial list of programs of war information. Each of these is a pertinent subject in the very near future. Have you solicited advertising from every local account—whether it be a manufacturer, distributor or retailer—that can logically tie in with one or another of these programs? If you have overlooked any sources of support for the government campaigns or profit for yourself, now is a good time to call on such prospects.

Victory Gardens

No other program is more important and more vital to the success of the war on the home front than Victory Gardens and home canning as an aid to meeting food needs by producing for home use. Many stations have capitalized on this program to sell time and talent for effective advertising campaigns.

Who are the prospects for a program dealing with Victory Gardens? Here are a few:

China and glassware stores
Department stores
Feed and seed dealers
Gas and electric utilities
Hardware stores
Merchandise brokers

This promotion is now in full bloom with special emphasis planned for May. It will be continued until the first "killing" frost in your section of the country and Victory Gardners who planted early crops will be urged to replant for a second crop.

Recruitment of Farm Labor and Food Processing Labor

While it may sound unusual for a broadcasting station to run a "Help Wanted" program, such a feature, well-planned and intelligently presented, can serve both manufacturer and farmer as well as prospective employees. First tried on the West Coast, where aircraft manufacturers turned to radio in a desperate attempt to relieve the manpower shortage, such programs have proved amazingly successful.

This campaign will be launched in May to persuade the public to volunteer for peak-season work of farms and in food processing plants. Write to NAB for the campaign guide entitled, "U. S. Crop Corps."

Nutrition Program

This educational campaign will be directed to the public on the use of available food supplies for best nutrition, and to stimulate proper nutrition on the part of war workers. While this campaign is scheduled to start in June, now is the time to line up accounts to supplement the promotion you will put behind this effort as a part of the OWI Allocation Plan.

It gives you a brand-new approach to brokers, commission merchants, distributors, chain food stores and voluntary groups of stores. Take full advantage of this opportunity to convert these logical prospects to users of broadcast advertising.

Recapping in Time Saves Tires

With rubber available for recapping almost all motorists' tires, this campaign gives you a logical reason to approach the tire dealers in your community. Here are some of the prospects you should solicit:

Tires—Manufacturers
Distributors
Dealers
Accessory dealers
Service stations

Preliminary information indicates that some of the tire manufacturers may match advertising expenditures with distributors and dealers in this campaign. While it is not known whether this money will be ear-marked for a particular medium, the fact that it may be available should stimulate your sales approach.

Fuel Conservation and Home Heating

In May, OWI will inaugurate a concentrated campaign to the public to sell the the following objectives·

1. Order coal early.
2. Conserve fuel oil and where possible convert to coal.
3. Conserve household gas.
4. Heat-condition the home (by insulation, weather-stripping, storm sashes, etc.)

This campaign opens up a field in which radio stations can write a substantial volume of new business by careful planning. Check the following list of prospect types with the actual prospects in your community and get to work early:

Asbestos products
Boiler cleaning and repair
Chimney cleaning and repair
Cleaning compounds
Coal dealers
Concrete contractors
Floor contractors
Furnace cleaning and repair
General contractors
Hardware stores
Heating contractors
Heating engineers
Insulation manufacturers & contractors
Lumber dealers
Millwork manufacturers
Paperhangers
Plumbers
Pipe covering contractors
Roofing contractors

Fats and Grease Salvage

A new campaign to urge the collection of waste fats and greases for explosives will be conducted during July and August. While this will primarily concern the placement of national spot advertising, you should cover every possible local angle in connection with this activity.

In this connection, the Department of Broadcast Advertising will work with the advertising agency and trade association involved in an effort to obtain a larger share for broadcast advertising of the rumored $500,000 budget.

Homes for War Workers

The National Housing Agency and OWI will shortly announce a three-fold campaign to alleviate the housing shortage that exists in many war production centers. This campaign has three objectives:

1. To induce property owners to make available to war workers all the vacant space—houses, apartments and rooms—which can be utilized without any expenditure of critical materials.
2. To induce other owners, whose properties are not now suitable for use, to convert them into additional accommodations by remodeling with their own funds or with the assistance of private financial institutions.
3. To induce property owners, who are unwilling or unable to convert on their own responsibility, to lease their buildings to the government, and let the government do the job.

Here, too, is a field in which alert radio station sales executives can render a real service in the government campaign as well as build a substantial volume of new business.

Conservation

Soon a nation-wide campaign will be instituted to induce people to use less, waste less, save more. This program will be concentrated in two fields:

1. Household equipment (maintenance of electrical appliances, etc.)
2. Clothing (making clothing go further.)

Look at the list of prospect types in this field of conservation. What's more, many radio stations have already developed important customers from among these groups:

Air conditioning service
Cleaners and dyers
Clothing repair and reweaving establishments
Electrical appliance service
Laundries
Oil burner service
Refrigeration service

These government informational campaigns represent real sales opportunities if you will but translate the objectives of each activity into terms of local accounts that can and should contribute to the program.

THE SAWDUST TRAIL

Each time the Department of Broadcast Advertising receives a letter from an NAB member station, calling attention to a per-inquiry offer, a sales letter is immediately written to the advertiser or advertising agency, urging the use of broadcast advertising on an ethical basis. Now and then such letters result in conversions. Here are two recent examples:

From Arthur M. Holland of the Malcolm Howard Advertising Agency, 20 E. Jackson Blvd., Chicago, Ill.:

"May we state that at no time has this agency ever placed any advertising with ANY radio station anywhere in the United States on a 'per-inquiry' basis, and this one instance where such an attempt was made, was done without the authorization of anyone in authority.

"We hope this will clear up our position with regard to the subject in question."

From Michael F. Ellis of the Ellis Advertising Company, Buffalo, N. Y.:

"I promise never again to deviate from the straight and narrow path under pain of being deprived on my nationally known non de plume of Ethical Ellis . . .

"Seriously, thank you for bringing this to our attention. It's all over now and won't occur again."

HELLO, SUCKER!

For complete frankness on the purpose of per-inquiry offers, the following excerpt from a letter received within the last few days deserves first prize and a place in your memory:

"We did not originate the idea of making radio commitments on a per inquiry basis. As a matter of fact, we were approached by two out-of-town stations, through their representatives, who solicited contracts on that basis. Since we felt that some of the smaller stations, whose facilities we would not use on any other basis, might be willing to enter into a similar arrangement, we proceeded to suggest same in a letter to them. Frankly, we did not expect any large station to enter into the arrangement, and surely there could be nothing wrong in offering the deal to anyone who wished to take it on.

"For your information, we are also buying time for . . . in the regular way on larger stations in major cities, and shall continue to do so so long as radio pays out."

THE STATION VIEWPOINT

Having preached against per-inquiry business times without number, this column is herewith turned over to Robert T. Mason, President of WMRN, Marion, Ohio:

"We have steadfastly refused to accept any PI business. I maintain that when we go into direct mail merchandising I'll buy my own merchandise and sell it, but while I am selling radio advertising I am going to stick to that business. When radio advertising reaches the point where it can't stand on its own feet as a merchandising medium I'll give serious thought to opening up a mail order house myself.

"I don't believe that radio will ever get its share of department store advertising and retail store advertising until we have out-grown, as did the newspapers, the era of cut rates and shady deals. It can be done because we've done it and I would like to see some of the other stations likewise clean up their operation."

Thanks, Bob, that tells the story perfectly.

SPECIAL BULLETIN

Broadcast Advertising Bulletin

JUNE 28, 1943 ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ No. 3

1760 N St., N.W. NATIONAL ASSOCIATION OF BROADCASTERS Wash. 6, D. C.

Urge Your Local Fuel Dealer To Sponsor OWI Announcements In "Order Fuel Now" Campaign

Through the vigorous representations of the Small Market Stations Committee and the NAB, the Office of War Information has offered to make the transcribed announcements for the "Order Fuel Oil NOW" campaign available for local sponsorship. This provides radio stations in the rationed areas an opportunity to aid the government program of war information and to increase local sales *at the same time.*

The announcements are being recorded in Washington today and the scrips are tentatively set at 50 seconds to provide time for the local commercial identification within the one-minute limit. There are four announcements in the series: three are dramatized, while the fourth is straight selling copy.

These announcements will be forwarded to the OWI field men for discussion with the stations in the rationed areas. It will probably be the end of this week before the OWI field staff has pressings of these recordings.

Campaign Starts July 12

If you have been unable to sell these announcements to your local fuel oil dealers by July 12, these announcements will automatically become part of the OWI Allocation Plan. So it behooves every radio station to make a concerted and prompt effort to line up local sponsors for these announcements.

The "Order Fuel Oil NOW" campaign is part of the "Fuel Conservation and Home Heating" program outlined briefly in "Broadcast Advertising Bulletin No. 2," issued on April 23, 1943. Here are additional details about this phase of the activity, taken from the publication: "Information Program for Fuel Oil Rationing—1943-44 Season," issued by the Department of Information, Office of Price Administration.

June 1 to July 1—Formal Announcement to the Public

The first part of the month of June was devoted to formal announement of the new and simplified fuel oil rationing program to the public. This explained just how it works.

June 15 to July 31—Get Your Coupons NOW

During this period, the public has been and will be urged to mail in their applications for fuel oil rationing coupons as soon as possible.

July 15 to August 30—Order Fuel Oil NOW

For seven weeks, the public will be urged to stock up with fuel oil *now* and to order the entire winter's supply immediately. This is the phase of the campaign for which OWI has prepared the transcribed announcements for sale to local fuel oil dealers.

Get Behind This Campaign

Many station managers wrote members of the Small Market Stations Committee—and many others have written NAB—protesting the discrimination against broadcasting through the refusal of OWI to permit announcements (and soon programs) to be sponsored by local distributors and dealers. Here is a break in the long line of adverse rulings. *However, this applies only to the "Order Fuel Oil NOW" announcements.*

Get behind this campaign and interest every fuel oil dealer in your community to carry his part of the job of promptly and properly informing the public on all phases of the fuel oil rationing program. In your solicitation, don't forget to tell him what you have already done to build public acceptance for the order-now idea. Tell him about the announcements you have already broadcast, urging the public to mail in their applications for fuel oil as soon as possible. Be sure he knows what you are already doing to help with this important campaign.

Redouble Your Efforts In "Order Coal Now" Campaign

Don't forget the announcements and programs prepared by the Department of the Interior to further the "Order Coal NOW" campaign. These are important, too, in the "Get Ready for Winter" program which is such a vital home-front phase of the war effort. They are open to sponsorship.

In many communities, fuel dealers handle both coal and oil. This gives you a double-barreled approach to such prospects. Let's not miss this opportunity to write some desirable summer business in support of the programs of war information.

Want More Information?

If you want additional information about the Program for Fuel Oil Rationing—1943-44 Season, consult the branch or regional office of OWI nearest you or write the Department of Information, Office of Price Administration, for Bulletin 1-8231. If NAB can be of any assistance, don't hesitate to write.

REPRINTED FOR NAB DEPARTMENT OF BROADCAST ADVERTISING

Department Stores Can Make Radio Pay

Concentrated Promotion of Items Key to Profitable Selling

By JOHN A. GARBER
Advertising Manager
Strawbridge & Clothier, Philadelphia

SEVERAL YEARS ago the writer spent a good part of a year analyzing the broadcast advertising activities of some 92 department stores across the country. It was apparent from the results reported that they were not using radio successfully or intelligently in most cases, and that radio was evidently not doing the right kind of a selling job for the department stores. This paper will attempt to show that radio can do a resultful job for the stores if handled properly.

The entire radio-department store relationship cannot be analyzed in so short an article, but certain obstacles can be analyzed, obstacles that make it difficult for the average department store and radio to walk the flowery path together.

Radio Can Pay

Let me make my stand clear at the outset by stating unequivocally that I believe radio can be used successfully by department stores, and that radio will and should have a considerably more important place in the department store advertising budget.

But let me say unequivocally, too, that for all the research and study I have seen, I have never found a department store doing a truly important, *resultful job on radio as evidenced by sales returns relative to total sales, or by expenditures relative to total publicity outlay.*

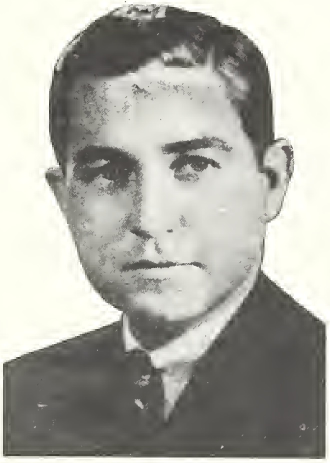
There are isolated cases, but I think if the broadcast advertising activities of these stores are analyzed, it will be found that they are relatively unimportant compared to the *total* publicity job. The figures still show that newspapers take some 3½% of the typical store's sales, and radio about .07%. The fact stands that few stores really check *carefully* the results of radio publicity and that few stores use radio for other than supplemental advertising.

Now, faced as radio is in this field by a rather bleak picture, it must decide once and for all if it wants its share of the department store's advertising dollar—some 75 to 100 million of them nationally—and decide whether the long missionary and selling job which still must be done to get radio's share of that dollar is worth while.

I have heard many radio men state flatly that they were not interested in department store business, that it was more trouble than it was worth. Yet in the same city the major stores were spending 3 to 4 million dollars on publicity, the bulk of it in local newspapers. I would think that radio, for all of its national windfalls, would welcome a good share of this heavy local department store expenditure.

Reasons for Failure

Most radio people, however, have indicated a very real concern regarding this lost sales potential, so it is imperative that the department store broadcast advertising situation be studied carefully, and that an attempt be made to find out why radio (a notably successful industry) has been so notably unsuccessful in selling the department store (also a rather successful industry), and in *all frankness* to find out why radio has been also notably unsuccessful in producing substantial results for a great many of the stores that have used it.



MR. GARBER

We can put our fingers on a number of reasons: (1) Lack of intelligent approach to programming and timing by both stores and stations. (2) The charge-back system by which the buyer or divisional man is in the last analysis responsible for his publicity expenditures as well as sales, and his consequent refusal to take a chance on radio. (3) Failure of stores to give programs adequate time to take. (4) Failure of stores to expend enough of their publicity budget on good national programs practically throughout the day. (5) Lack of understanding of radio by store advertising men trained in visual media. And there are many others, any one of which is enough to frighten a research man away from the subject.

But I believe the problem goes far deeper than any of these superficial reasons would indicate, deep into merchandising practices of the stores—in fact, into the very make-up of the department store as a merchandising entity.

Typical Store

Most organizations with which radio deals sell one thing or a relatively limited group of related things. Perhaps it is a great national manufacturer's branded item, perhaps it is a local credit jeweler's credit. If their sales volume for a given product or service is large enough to warrant extensive publicity, the entire advertising expenditure can be devoted to driving home the story of that one product. This means broad coverage with sufficient repetition to influence a sizable portion of the market.

A large department store, on the contrary, has literally hundreds of thousands of items to sell, divided into scores of merchandise classifications. It is a multi-item operation and derives a relatively minute percentage of its total sales from any given department, and so much less from any of that department's score or hundreds of items. There are exceptions in the departmental breakdown, but let us take a look at a typical picture.

A typical store doing about 7 million dollars, normally operates between sixty and eighty departments. Of these departments it is notable that the largest does no more than 5% or less of the store's total business, and the smallest 2 or 3/10% of the total business. Thus, although the store itself does some seven million dollars in volume and expends some three hundred to four hundred thousand dollars a year on publicity, the largest single department or selling entity does something less than $350,000 worth of business, with a total publicity expenditure of about $17,000 (only about two-thirds of which is available for media purchases). The smallest department does only $14,000 in sales over the year and devotes only some $700 for its publicity.

To complicate this situation further, the average item which the typical department has to sell is backed by from little more than a few dollars' worth of stock to several thousand dollars' worth of stock, which means that the total expectancy during a turn is necessarily limited, and expenditure must be governed accordingly, even though it is absorbed by the entire department's business for a given period.

Compare this to the national product or item which of itself is backed sometimes by millions of dollars' worth of processed or unprocessed stock and where expenditure on the selling story for a given product is accordingly tremendous.

Although this policy may be criticized or condemned, the department store merchandising job *is based on item promotion*, and a number of decades' experience, trial and travail have brought about this practice. People come to one store in preference to another *primarily* because the favored store has merchandise (items) which the customer wants. The store's job is to prove that it has the desired merchandise and to tell that fact unceasingly *by advertising specific items of desired merchandise.* A store may have a beautiful building or central location, or a fine dining room, or pleasant personnel, but unless that store has on its shelf desired items, and unless that store tells this fact to the public, its competitors will get the trade. I think you will find few exceptions to this rule.

Appeal Concentrated

Just as in the national field the American Tobacco Co. attempts to sell and advertise Luckies, *not* the American Tobacco Co.; and General Foods sells and advertises Jello, *not* General Foods, so in the local field Blank's Department Store must sell and advertise its $1.98 slip or a $2 shirt or some other item and *not* (other than

(*Continued on page 34*)

ONLY a small group heard an outstanding evening talk at the recent NAB War Conference—a talk that throws new light, and plenty of it, on the department store problem. Speaker was Mr. Garber, and those who heard him left with the feeling they had been given an important message. 'Broadcasting' felt that way too. Mr. Garber sets down herewith his views on how a big store should use radio. He is author of "Survey of Broadcast Advertising, 92 Department Stores", a project which grew out of his research at the U. of Pittsburgh Research Bureau for Retail Training. His education includes Harvard and U. of Wisconsin. He went to Boggs & Buhl, Pittsburgh, from college, then moved to Gimbel Bros. where he stayed until Pitt called him to teach. He is a Navy reserve officer slated for early duty.

---

indirectly) Blank's Department Store.

In a sense, the advertising department of the typical store acts only as an advertising agency placing copy for each department and taking a certain percentage of sales for its own maintenance. Each department or selling entity must be given its adequate share of the store's total publicity outlay based primarily on the department's percentage of the store's total sales.

Departments carefully plan series of advertisements, sometimes stressing price promotion, sometimes quality or prestige, sometimes intangibles such as fashion significance, sometimes inherent value, *but invariably offering an item or items that have selling appeal.* And there are a great many departments all of which in at least some season must have their items covered daily or weekly.

Now when a store employs newspaper space, this is a relatively simple job; a daily section or sections can be planned with linage allotted according to the value of each promotion. Important or seasonably important departments can be readily covered and, *most important*, a customer can read at leisure and re-read even the smallest section at will. Customers have been educated for half-a-century to look for and read department store copy, and tests show that department store sections have exceptional, constant readership. The newspaper "audience" does not have to be built up—it's a daily show with a relatively constant public.

Choosing a Show

Radio offers a more difficult merchandising picture. A show must be chosen as a vehicle, and several commercial insertions will be permitted depending upon the length of the program. Here is where trouble starts, for although most retail people attempt to merchandise a radio show, just as they merchandise a newspaper section with a diversity of items *seldom repeated*, it cannot be done. If you toss three or more unconnected items into any given news period, sports period or any other type of program at 40 seconds per impression, you can't expect results that will compete with the newspapers even if you have a built-up audience.

Forty seconds' worth of commercial a month would not sell Jello either.

Educational Job

Granted that few if any stores have done the tremendous educational job in radio that they have done in newspapers, and granted that expenditures on radio in the beginning naturally will be rather limited, how can this merchandising obstacle be surmounted, permitting the store to advertise items (as it must if across-the-counter results are to be obtained) and still employ radio's normal programming and production techniques?

Radio, to compete with the newspaper in this field, must bring desired results at from 3 to 4% expenditure, and immediate results are normally limited to 24 or 48 hours. (Obviously, only a small percentage of total daily sales can be traced to advertised items, but a medium must induce strong sales results for the advertised merchandise if it is to prove its salt). The seven-million-dollar store's individual departments will do from only a few dollars in volume for the smallest to a thousand or so for the largest in a given day. Four per cent of these volume figures permits very little expenditure, even when absorbed by a week's or a month's business.

It is my belief that stores can best get around this situation by doing careful merchandise dissection jobs when employing radio. That is, choose merchandise divisions such as the men's, home furnishings, fashion, or large departments such as furniture, or important seasonal departments such as furs. Programs can be built around these divisions which can be directed readily to a specific customer audience.

Thus, a store might use a baseball scores' program or sportscast, or a news program for the men's division. It might use a fashion information program, a Hollywood gossip program, or some other suitable vehicle for the fashion division. It might use a consumer program cooperating with various women's clubs or the PTA, or a homemaker's program of some kind for the home division or furniture department.

The problem will be simpler from the standpoint of results in the beginning if we choose good staple items, either private or nationally branded items, backed by enough stock and with sufficient sales expectancy to permit considerable repetition. If possible, it will help results if items of sufficient unit value are employed so that total sales of even a few of these items will pay the way. As examples: men's suits, fur coats, heavy appliances (when we are fortunate enough to have them again).

Simplifying Practice

By this method of selection a store will be able to reduce the advertising job to the simple practice of allowing for plenty of repetition of a basic selling story that will sell both the merchandise and the division. If we were to choose men's clothing, as an example where our 7-million-dollar store would probably do from 200 to 300 thousand dollars a year, we could constantly hammer home a few branded lines, and merchandise our broadcast with $20 to $60 unit sale items. (Perhaps under present conditions the men's clothing example is unfortunate, but it demonstrates the point).

The writer believes emphatically that if radio is to have an important place in the department store advertising picture it must sell goods across the board. It may be a good institutional medium, but dollars for institutional advertising are strictly rationed and easily cut. Radio must prove that it can sell merchandise immediately, giving the added sales which can be expected from newspaper advertising. Hence, the divisional or departmental dissection theory has considerable appeal, for it permits promotion of specific items in given classifications without running over the entire store map.

Individual Needs

Radio men will do well to study the individual stores in their area to find out what departments and divisions are particularly strong in each store, and what departments and divisions can stand the missionary expense necessary. Then the station will be able to formulate intelligently program vehicles which will be something more than "just shows", vehicles which will be in fact razor-sharp promotional shows attuned closely to the merchandise and the audience which buys that merchandise. Then, I believe, radio will produce results, given a year's time, which will astound most department store promotion men.

RETAIL PROMOTION COMMITTEE

May 27, 1943.

Dear Fellow Broadcaster:

You undoubtedly know from the reports of the NAB War Conference in Chicago that the Retail Promotion Plan is now under way and we are working toward a presentation in the fall. Mr. Sheldon Coons, our consultant, has been instructed to proceed with the preparation embraced in the outline which we sent you some time ago.

We wish you could all have been present at the session of the NAB War Conference on Wednesday, April 28th. We gave a full report of our eight months' preparation; showed the proposed route of the cities to be visited; described the material that each station is to receive for its meeting; made known the formation of subcommittees consisting of outstanding leaders in the field, who have already organized their work and are preparing pamphlets on the fundamentals of radio and its use for distribution at each meeting.

Although you have not as yet decided to give your financial support to this movement, we feel sure that you will wish to cooperate with the rest of the industry in helping us gather essential data. In order that this promotion shall be of maximum help to stations and markets of every size, and because we want the presentation to reflect the very latest developments in retail radio advertising, we are asking you to share some of your own experience with us, with our promise, of course, to keep your identity completely out of the picture.

You will be happy to know that we are cooperating with the Harvard University Business School in its announced study of retail radio advertising and, unless you object, the material we are asking you for herein will be submitted to Harvard for further study. Harvard, too, has guaranteed to keep all material strictly confidential.

Two kinds of information essential to us can be supplied only by you. Here is what we are asking you to do:

1. Statistical data.

On the back of this page is a questionnaire which asks for data concerning the extent and character of your retail and other advertising. Our Committee does not believe it will be difficult to fill it out. The person in your organization who keeps your records should find this form easy. Please *note* that you do not have to make an extensive check-back, as the questions asked are only for the month of March, 1943, and for any typical 1942 month or week.

2. A letter to be dictated by you.

We want you to tell us in your own way, and in your own words, some of your recent experiences with retail advertising. In order to help you review for yourself what you have done in this field, we have prepared an outline on page 3 of this folder. After you look it over, we believe you will find it as stimulating to you as it was to us. If, after you have read the outline, you will call in your secretary and just dictate the things that come to your mind, suggested by our list of topics, you will be making a real contribution to all our thinking on the subject.

Do not worry too much about the form—ramble as much as you want to—but if you can follow the topics in somewhat the order we give them, it will help to compare your experiences with similar experiences of other stations when your letters are analyzed by Mr. Coons and his staff. After you have dictated the letter, be sure to enclose sample commercials and scripts.

These two requests, (1) return of the statistical questionnaire and (2) the letter we want you personally to write, are all we will ask of you. But in order that we may proceed according to schedule, won't you please do this at once. We are enclosing a self-addressed envelope for your use in returning the questionnaire and your letter.

Just one more thing—several stations have written or told us that they preferred to decide on their support of the Plan when they were certain that the Plan would definitely go through. Since the NAB War Conference, twelve more stations have joined the list. If you have delayed decision for this reason, we hope that you will now join by sending us your pledge on the enclosed blank.

Sincerely yours,

RETAIL PROMOTION COMMITTEE

PW Morency

CHAIRMAN.

STATISTICAL DATA

Explanation of Terms: Our study is concerned primarily with the use which retailers, service establishments, and manufacturers with local distribution have made of radio station facilities. We have used the term *local* because that is the term used by the Federal Communications Commission, and hence your records are probably organized to provide data on such business without difficulty. In filling out the questionnaire, follow the same classification you have used in reporting *local* business to the FCC. You have probably already calculated the answer to question G for your report to the FCC.

The replies to the following questions will be held as strictly confidential and used only in combination with other stations. No individual figures will be released for any station.

A. Number of advertisers who used your station in March, 1943:

1. Total number of *local* advertisers ("local" as defined by the FCC) ....
   a. How many of these bought spot announcements only? ....
   b. How many *local* advertisers were serviced by advertising agencies? ....
2. Number of all advertisers (local, plus all others, including network) ....

B. Relative importance of local time and talent sales

1. About what percentage of your total revenue from sale of time in 1942 came from local advertisers? ....%
2. Your 1942 dollar income from sale of talent to *local* advertisers was about what percentage of your dollar income from sale of time to local advertisers? ....%

C. Approximately what percentage of your local revenue was received from the following types of time sales? You may use a typical 1942 month or week.

1. Spot announcements (including participations) ....%
2. Programs sponsored by individual advertisers ....%

D. About what percentage of total revenue from programs sponsored by *local* advertisers (see C-2 above) came from the following classifications of programs?

1. Five-minute programs ....%
2. Ten-minute programs ....%
3. Fifteen-minute programs .. ..%
4. Thirty-minute programs ....%
5. Sixty-minute programs ....%
6. Other units of time ....%

E. About what percentage of total revenue from *local* programs (see C-2 above) came from religious programs? ....%

F. Please give the following information on rates:

1. What are your rates for a Class A Quarter Hour:
   a. For national advertisers .... $..............................
   b. For local advertisers .... $..............................
2. Does your local rate provide a commission to recognized advertising agencies?
   Yes.............. No..............
   a. If yes, how much? ....%
3. About what percentage of your total revenue from local time sales in March, 1943, was placed through advertising agencies? ....%
4. Was all of this commissionable? Yes.............. No..............
   a. If not, what percentage of it was commissionable? ....%

G. It would help greatly in evaluating our sample if you would state your 1942 dollar income from *local* time sales .... $..............................

Detach and Mail with Your Letter in Enclosed Return Envelope

New York 17, N. Y.

STATION CALL LETTERS..............................

CITY AND STATE..............................

THESE ARE THE TOPICS WE WOULD LIKE YOU TO WRITE US ABOUT

Please "take your hair down" and tell anything that you think will assist us. The topics are merely suggestive. Leave out anything you consider not pertinent. When you have read them over, please call in your secretary and dictate whatever in your own experience they bring to mind.

1. Your Most Important Retail Account

Every station has at least one retail account that is outstanding either from the standpoint of the amount of time they use, or its growth, or the results obtained. We would like to have you tell us the story of one such account—the name of the account is not important. It's the story we want.

How much time do they use? How long have they been on the air? Have they increased the amount of time they are using—and particularly have they done this by adding a special program for any of their departments? What brought about this increase? Are they doing more business or have they found that radio cuts their selling costs?

2. What About the Program?

If they have increased their time, no doubt their program was successful. To what do you attribute this success—merely volume of time, or time of day they broadcast, or type of the program, or technique used in commercials, or tie-in with store selling? Please tell us about these things and *let us have some samples—program scripts and commercials.*

How does the local rating of this program compare with the national shows with which it has to compete?

3. Let's Get the Negative Side Also!

In some cases a station's leading retail account has cut the time used. If this has happened to you, we would like to know about it and what you think the reasons are so that we can analyze this along with the experiences we get from other stations. (Just cover the same ground as you would if it had been an increase instead of a decrease.)

4. Opening New Markets

We find that in many cases broadcasting enlarges a trading area or opens up an entirely new market or class of trade for the retailer. Have you had any examples like that? What happened?

5. What About These Controversial Questions?

What do you find is the best time of day for retail broadcasting? Please give us *your* experience. What types of merchandise have you been able to sell most successfully and how? Do you find it best to plug one item at a time or do you aim at multiple sales, or do you talk about the store in general, or their credit arrangements, or some special service? These are very important angles about which there is still no unanimity of opinion. Are there items or angles of retailing on which you feel radio hasn't done so well and why? If so, what progress have you made in overcoming these difficulties?

6. This Has to Do With Personalities

Do your salesmen possess any special training or background in retailing or selling retailers? What proportion of your retail accounts really know anything about radio? Have you ever obtained an account because some radio-minded person came into power in a store which had never used radio? What are some of the most notable examples of stores you have never been able to sell? Never mind names—just tell us the story. What reasons do they give? Does the size of your community and its proximity to a larger trading center have anything to do with it?

7. Selling Points and Contacts

What do you find are some of your best talking points? How much service do you give your retail accounts? Do you help them either with their programs or commercials? Do any of them use an advertising agency? Who decides what they will try to sell? Do you leave this entirely to them or do you insist that they meet competitive standards? Do you ever do comparison shopping? Whom do you work with at the store? Does he have real authority and capacity for sound judgment?

8. Contracts

What is the minimum contract you will take from a retailer? What has been your experience with short contracts? Do you consider them advisable?

9. Packaged Transcriptions

Do you feel that you have the means at hand locally to build a successful retail program, or do you think you might do better if you had a really good packaged transcription show to sell? Have you ever considered using a syndicated service for retail commercials?

10. Wartime Experience

What about your recent war experiences? How many new retail accounts have you obtained since the war began? How many have you lost? Have you emphasized the retailers' need of keeping more closely in touch with his customers? Have you urged him to exploit the consumer service possibilities of radio for his retail customers?

There may be a lot of other things you would like to tell us about, or about which you may have some opinion. Please don't hesitate to write us about them, just because they are not mentioned above.

Please be sure to send along sample scripts and commercials.

STORES can make

by VIRGINIA CORNWALL

CAN a department store use radio effectively? Can local talent possibly match network talent on the air? Is there a department store that can honestly say it has made radio pay? And if so, *how* was it done? Questions like these come to the mind of every department store advertising man who considers radio as a serious advertising medium.

"It can and does!" answers Walter E. Anderson, publicity director of J. N. Adam & Co., Buffalo, and he proves it with a regular morning program that rates with direct news from Europe, Boake Carter, The Breakfast Club, and Young Dr. Malone.

Mr. Anderson was one of those who attended the radio session at the NRDGA Conference of 1942, and voiced these very questions openly. The panel of radio experts, confronted by the problems of department stores, seemed at as great a loss as the stores on what to do. Answer to a few of the questions came from the stores themselves during the discussion: Filene's, of Worchester; Taylor's of Kansas City; Pizitz, of Birmingham, reported good results. The others were silent. The radio experts, too, were silent. An NRDGA report several months later indicated that 40% of the stores which had tried radio had given it up, and that 60% of the remainder term it only moderately successful or doubtful.

FINDS BELIEF IN RADIO PAYS

One of the most courageous and succesful pioneers in this new field—Walter Anderson—believes enough in radio to give it "the works", instead of the usual, timid experimentation. At the end of a single year results have dramatically proven him correct. Under a Hooper rating one of J. N. Adam's special 15-minute programs scored 22% (Jack Benny has a rating of 23%, Fred Allen 18%, Fibber McGee 24%, and Buffalo's highest ranking local program, 8%).

Which shows that it can be done! But how it has been done—what is left to do—what mistakes were made before the right answers were found—is one of the most fascinating stories of current promotional history.

> *Probably the Most Outstanding Difference in J. N. Adam's Approach to the Radio Was the Realization That Local Radio Programs Had to Be Better Than Local Newspaper Advertisements; and That Though in the Papers the Competition Was Local, Over the Air the Store Had to Compete with Topflight National Programs Produced in New York Studios with Excellent Working Facilities.*

"We had been liberal users of radio time since 1940," says Anderson, "but like most other stores we were working in the dark. In spite of the amount of time we were using and the attention we were giving them, we did not feel any of our programs were doing the job they should.

"In the spring of 1942 we revised our radio schedule completely and in its place bought the following radio package:

1. Morning program, six days a week for 15 minutes.
2. Afternoon program five days a week for 5 minutes.
3. Spots, 1,400 of them to be used as required.
4. 26 evening programs to be used throughout the year, produced with full dramatic staging, including full cast, full orchestra and studio direction.

STORE GOES ALL OUT FOR RADIO

"Realizing that the task ahead of us would be one of the most difficult that we had ever attempted, we decided to 'go all out for radio', putting behind it every ounce of effort and every promotional device we knew to make it succeed. What we have managed to accomplish has been due to these two resolutions."

Probably the most outstanding difference in J. N. Adam's approach to radio was the realization that over the air the store would compete with topflight national programs, produced in New York where facilities are of the best, while the facilities offered in Buffalo—though good—have decided limitations. Licking this problem was no task for a novice or an amateur.

STORES LACKING EXPERIENCE

"Department stores," says Anderson, "don't do a good job in radio because they completely lack experience. Radio grew up over night without a great common background among stores. The network studios have had tremendous experience, but local radio stations, except in very large cities, have not had to build up similar production ability and, of course, department stores with few exceptions have had no experience at all. Even the stations which did have the technical ability and staff experts corresponding to our own artists, copywriters and the like, knew nothing about department stores and department store problems. They just didn't talk our language.

STUDIO EXPERTS BROUGHT IN

"A store that cared enough about radio could overcome this difficulty by building its own staff of radio experts, as it has built its own staff of newspaper, advertising and display experts. But that is not likely to happen. The most expedient thing to do is to arrange it so that the studio experts work for the store. In other words, impose the responsibility for the program on the radio station . . . put the Program Director in charge of the store program!

Walter E. Anderson, Publicity Director of J. N. Adam's, Buffalo, is a courageous and successful pioneer in radio advertising for department stores.

USUAL PROCEDURE OUTLINED

"It is easier to illustrate what I mean by outlining the usual procedure. A salesman gets a store interested in radio. The store executives, the salesman, and the head of the radio station have a conference, wrap up a radio package and sign a contract. Too frequently all the store has bought is time, or White Space on the Air. They may have some idea how to develop it, but not much. They have no experts in filling up Air White Space. And the studio's Program Director who does know how to manage air space is not called in to help. The whole transaction is kept in the radio sales department.

"We worked that way for the first year, completely in the dark. This is no reflection on the Buffalo Broadcasting Company, as it seems to be the accepted way of doing business. So it was not until the second year, when we put Herbert Rice, Program Director of the studio, in charge of our program, that we began to know where we were going.

Herbert Rice, with his brilliance and talent, backed by his years of experience as studio director, brought to our program a high sense of drama and all the technical skill needed to interpret it. It became apparent almost immediately that under his direction our efforts could at last hope to compete favorably with those of the national networks.

THE WOMAN'S RADIO COMPANION

With Mr. Rice worked several more people, who devoted most of their time to our program. Most important was Ralph Snyder, an employee of BBC, who became "the Woman's Radio Companion". He spent many hours in conference with us, going through the store absorbing store background so that he could interpret the store to the public. On the

Stores Can Make Radio Advertising Pay

(*Continued from page* 15)

PM, just after the Columbia network shows and just before the news broadcast. The Columbia shows which precede it each night are different, so that the audience is a constantly changing one, and most of these sets remain tuned in for the newscast that immediately follows. Only fifteen words are allowed on this spot and every word counts. As proof of its effectiveness this one spot for one week brought in 100 service men to have free pictures taken.

Spots are used to announce store wide sales, promote specific merchandise, sell new store services, and to advertise other radio programs. 1400 of them are used during the year, varying anywhere from 3 to 60 a week, and, as Mr. Anderson indicated, they are usually bunched before good selling days, rather than scattered sparsely throughout the entire week. The spots are closely co-ordinated with newspaper advertising and usually promote the same items and ideas. This teamwork of media is vital.

NIGHT PROGRAM ENTERS NEW FIELD FOR STORES

It is on the fifteen-minute night programs that J. N. Adam's has made the most phenomenal strides. Here, in the vast emotional field that few department stores have endeavored to tap, this store has had the courage and skill to do an outstanding job. It was with this evening program, rather than the daytime program, that the store faced the stiffest competition from national networks. And its very nature, emotional rather than rational, made it completely new to the department store field.

EXPERT PUBLICITY A DECISIVE FACTOR

That they have succeeded—and succeeded admirably—as proven by national network ratings, can be attributed to two things: the tremendous publicity barrage laid down before each program; and adherence to the original resolution to keep hands off while the studio produced it. Twenty-six programs were scheduled. The choice was between having them weekly at definite times, or holding them at irregular intervals throughout the year. The latter course was chosen because it gave more time to assimilate the knowledge gained from the previous broadcast, and because programs could be better spotted for timely and worthwhile events.

Though the first conception of these programs was essentially one of merchandising, almost immediately the store saw in this new emotional medium a tremendous builder of good will. With but a few exceptions the programs have been on public service features . . . Bundles for Bluejackets . . . America Ahead (stamps and bonds) . . . Navy Day (recruiting) . . . are just a few of those that have gone over the air.

ARRIVAL OF SANTA CLAUS SETS NEW HIGH

The very irregularity of the programs proved to be a blessing in disguise. *Because of* the irregular schedule, Mr. Anderson believed the programs could not possibly succeed unless backed with strong publicity. It was the publicity, he found, which made half the difference between success and failure. Proof of it came when, on Thanksgiving Day, the J. N. Adam show with one star—Santa Claus—won out over a national (unpublicized) show featuring Bing Crosby, Red Skelton, Don Ameche, Charlie McCarthy, Jose Iturbi, Ginny Simms.

Choosing an example from the many successful programs offered is naturally difficult. The merchandising program which presented the most natural tie-in was that on "Old Album Prints," where an emotional and romantic story was worked up about a floral bouquet found in an album hidden away in an attic.

Of the Public Service features, "America Ahead" was so successful that the Treasury Department requested the store to make transcriptions available to other department stores throughout the country.

No tests were made on the listening audience of the "America Ahead" broadcast, but for the Santa Claus show Buffalo Broadcasting Corporation offered to conduct a survey. Coming as it did near the close of a year of experimentation this survey, Mr. Anderson felt, would be a test of the success of the entire year's venture. If the program could not equal or surpass that of national advertisers he felt it should be judged a failure!

Competition was severe. NBC Red network had two of the highest-rated features, "Lorenzo Jones" and "Young Widow Brown," and the Columbia Network carried a special two-hour program from 4:00 to 6:00 reputed to be one of the most expensive ever broadcast. This was the show that featured Charley McCarthy, Don Ameche, Bing Crosby and Red Skelton—but the show was not well advertised.

Results of the survey showed 53.2 of the radios were in use; 41.3 were tuned to the J. N. Adam's broadcast. The rating of this program compared favorably with such favorites as Fred Allen, Eddie Cantor, Lucky Strike "Hit Parade," Kate Smith and Jack Benny.

Mr. Anderson attributes the success of the program to the powerful publicity that backed it up. Starting in August he began to map out a publicity campaign for Santa Claus. Teaser ads were started first, a few weeks before the broadcast, in the form of news photographs with captions and stories beneath them. Action shots of "Oomlak," Santa's secretary, were taken in J. N. Adam's Fairy Toyland. Suitable, newsy stories were written and run in the papers, calling attention to the fact that Santa was going to land at a "secret" airport. The ads looked like regular news stories and received a tremendous amount of reader attention. On Sunday preceding the broadcast, another radio program described the Three Little Pigs leaving the "secret" airport to get Santa at the North Pole. On the day preceding the arrival of Santa, page ads were run in all papers urging every child to tune in. A poster-like style was used in these climaxing ads, and pounded home a tremendous publicity job. Newspapers, also, realizing the scope of the promotion, gave generous publicity. The Buffalo Broadcasting Corporation gave sustained publicity, which Anderson augmented by spot announcements immediately previous to Santa's arrival, describing the "course of the plane" as it brought Santa nearer to Buffalo, thus building up suspense until by the time Santa was due to arrive the children were in a fever of excitement.

In writing and producing the arrival of Santa, realism was considered of first importance. The arrival took place at the secret airport where the only ones present were fairyland characters (Mickey Mouse, Snow White, Donald Duck, Minnie Mouse, Three Little Pigs, etc.) and the Mayor. A WGR special events announcer was present with his mobile broadcasting unit and he covered the event the same way he might cover any other on-the-spot broadcast.

When Santa arrived in Buffalo at a secret airport, radio history was made. This broadcast proved conclusively the potentialities of coordinating newspaper with radio in putting across a promotion. No local radio program has ever achieved such a tremendous listening audience. One reason was that the program was good; the other that no local program, or national program for that matter, ever received so much carefully planned, well coordinated publicity.

"I am pleased, but not surprised," said Mr. Anderson, "at the results."

Back the Third War Loan With Plenty of Broadcast Advertising

Make September the Greatest Month in History of Your Station and Your Community

Remember what radio stations did to back up the Second War Loan? More than $7,000,000 worth of time alone was devoted to this all-important task! Considering the restricted available time of the average radio station, this was a greater contribution proportionately than that made by any other medium of mass communication.

But that wasn't enough—not nearly enough—in terms of the needs in connection with the Third War Loan that will be launched on Thursday, September 9, 1943. "How," you may ask, "can we give more time—no matter how worthy the cause—than we gave last April?"

Just think of this—the boys in Sicily, New Georgia and New Guinea didn't ask: "How can I give more?"—*they just gave more.* Somehow, some way, you'll have to figure out how you can give more and do more to put the Third War Loan over the top.

While you are thinking about it—have you done everything you could to sell the manufacturers, distributors and retailers of your community to back your efforts to tell every man, woman and child in your listening audience about the various War Loans? Here is a field in which broadcast advertising has not, regrettably, been used to the same extent that advertising in other media has been employed.

Whom Can You Sell?

You can and should sell every advertiser in your community—not only the present advertisers on your station but also the past advertisers not now on the air and new advertisers who have not yet tried radio. Don't leave a single prospect unsolicited in your drive for support of the Third War Loan.

Many State, County and Local War Finance Committees for the Third War Loan have solicited contributions from banks, clearing houses, manufacturers, distributors and retailers. These funds will be used to purchase advertising on a group basis to supplement the time and space contributions of all media. Be sure to cover these groups thoroughly and effectively. Be sure they are told what radio has done and is doing in support of the War Loans. Be sure they know how effective broadcasting has proved in the various government campaigns of war information.

As you probably know, the Third War Loan is organized on an entirely different basis than the Second campaign. This campaign is aimed at the individual citizen. For that purpose, many changes have been made in the organization and conduct of the effort. Therefore, if you received advertising in the Second War Loan, don't automatically assume you will receive it again. Correspondingly, if you didn't obtain advertising in the last campaign, don't assume it can't be obtained this time.

How Can You Sell?

First of all by making sure that every member of your sales staff is thoroughly familiar with the Third War Loan; with the themes and with the opportunity and obligation of advertising in this nation-wide, day-and-night effort. Make certain, too, that each member knows exactly what announcement availabilities, program and service features can be utilized during this campaign. Arm your staff with every sales tool you can think of—and then look for more.

There are three principal methods of selling broadcast advertising in support of the Third War Loan:

1. **Participate with other stations in your community, county or state in an equitable distribution of any funds collected by State, County or Local War Finance Committees.**
2. **Sell individual advertisers on the sponsorship of announcements, programs or service features.**
3. **Organize special Third War Loan programs and sell participations in such programs to small or infrequent advertisers. For example, sell all, or as many as possible, of the merchants on a given street to sponsor a program, or organize the shoe dealers of your community to back the Third War Loan with a program of their own.**

What Can You Sell?

First and foremost on the list of special programs available for local sponsorship are the feature shows of the United States Treasury Department. These include:

Noted news commentator Rush Hughes is preparing twenty special five-minute programs which will be transcribed and sent out to every radio station in the country for local sponsorship during the Third War Loan.

Also for local sponsorship, by retail merchants, the Treasury Department in cooperation with the Retail Merchants of America, has produced two 15-minute programs. These programs—SACRIFICE DAY, starring Singer John Charles Thomas, Commentator John Nesbitt and Victor Young's orchestra; and AXIS PAYDAY, starring Joe E. Brown, Singer Dennis Day and Wilbur Hatch's orchestra—will be mailed to the state offices of the War Finance Division (See List in Third War Loan Bulletin enclosed with this bulletin), which, in turn, will distribute them to county and city offices of the War Finance Division.

(We must emphasize again that station commercial managers must stay on top of this War Finance Division program and maintain closest touch with state and local War Finance personnel and retail stores.)

As has been the case since its inception, the Treasury Star Parade *will not be available for local sponsorship.* This is also true of a series of transcribed interviews with United States Senators which the Treasury Department is preparing. *These will not be available for sponsorship.*

But that is only the beginning! What have you on your station that should be sponsored by a local advertiser? Now is the time to sell that program or service. Don't sell it for just three weeks—the term of the Third War Loan campaign. Sell it for 13 weeks, 26 weeks or 52 weeks. Many radio stations have found that they can interest otherwise cold prospects in support of a campaign of this kind, and then get them to use radio on a continuing basis.

What Has NAB Done?

At an all-day conference with Treasury Department officials, representatives of the NAB finally succeeded in having a series of five-minute transcriptions, specially recorded for the Third War Loan, made available for local sponsorship.

Since no government appropriation exists for the purchase of time or space in connection with the Third War Loan, NAB has done as much as it can to make all of the specially designed broadcasting material available for local sponsorship.

When NAB learned that some State War Finance Committees for the Third War Loan had organized a fund for advertising to supplement the contributed time and space, it sent the following night letter to the executives of every NAB member station in those communities in which State Chairmen are located:

> **"Some State Committees for Third War Loan have collected substantial advertising budgets from banks, clearing houses, manufacturers, distributors and retailers to supplement free time and space. Details of budgets are unknown in Washington. Earnestly urge you to contact (name and address of State Chairman) your state chairman in cooperation with other NAB stations in (name of city) to whom identical telegrams have been sent. Suggest you try to sell broadcast advertising as medium to use in your state. Letter follows."**

Now It's Up to You

Here is your opportunity to make September the greatest month in the history of your station —and the greatest month in the history of the service of your station to your community.

(Aside to bonus and commission salesmen: Here's a chance to make some extra money —money that you can then put into War Bonds and be doubly proud of your achievement.)

Back The Attack . . . . . With War Bonds

REPRINTED FOR NAB DEPARTMENT OF BROADCAST ADVERTISING

Store Launches Big Radio Program

Plan Based on Hour of Music Nightly For a Year

By **BURTON C. GRANICHER**
Account Executive
McCann-Erickson, San Francisco

RADIO and department stores—there's a subject that's widely discussed everywhere but, like the weather, "nobody ever does anything about it."

Of course, that's a rather extreme statement, for there are many successful department store radio programs now on the air. After all, there's no reason why department stores can't use radio just as successfully as other advertisers.

On this premise, our agency created a radio program idea which was presented to Hale Bros., operators of a chain of five department stores in Northern California. And despite the fact that department stores, like many other advertisers, are not particularly interested in increasing their advertising these days, Hale Bros. realized that this radio program would serve as a change of pace and would do a special job for them.

Program Requirements

Department stores serve all types of people, young and old, white-collar workers and day laborers. For that reason, we wanted a radio show that would have a general appeal. And since department stores operate six days a week, we wanted a program that would give them daily coverage, if possible.

Accordingly, we set up a musical program of world-famous melodies, described as "the songs your mother used to sing to you . . . the tunes you whistled and danced to when you were young . . . melodies which bear happy associations." The program was titled *Hour of Melody*. To obtain the required regularity, the show is broadcast one hour every night, 365 nights a year, from 9 to 10 over KSFO, San Francisco.

Although all of the music is recorded, special care is taken in the planning of the programs and the selection of the records. The continuity is prepared with the thought of trying to reveal some new and unusual information about the artists or the music.

STATING HIS CONVICTION that department stores will depend more and more on radio as an advertising medium, Benjamin Sisholz, president of Francis Rogers & Sons, New York department store, signs a 52-week renewal for *News Through a Woman's Eyes*, conducted by Kathryn Cravens on WNEW, New York. Left to right are Alfred Rogers, treasurer of the store; Kermit Moss, WNEW account executive; Miss Cravens, Joseph F. Callo, president of Callo, McNamara, Shoeneich, agency for Rogers Store, and Mr. Sisholz.

GRANTING the mutual advantages, to radio and to retailing, of a greater use of the medium by the nation's department stores, it remains true that experience is lacking as to just what kinds of programs and promotions these important advertisers should use — when they use radio. Every department store radio program therefore becomes of interest as a precedent for future developments. And when a chain of important stores in a major market undertakes an extensive effort in this direction, station and store management are both interested. Here's the story, by Burton Granicher, who handled the account for McCann-Erickson and KSFO.

Unlike department store newspaper copy, the announcements are not required to bring about immediate sales. Regular items are featured and although the program has only been on the air a month, it has proven itself from a quick-sales standpoint. However, Hale Bros. also look upon the *Hour of Melody* as a vehicle for building good will, for winning new customers and making real friends out of its many regular customers.

In the opening programs, specific mention was made that the announcements on the *Hour of Melody* would be brief and would tend toward new merchandise developments designed to help ease the strain of wartime living. Prices of articles are never mentioned.

A maximum of four announcements is used on each program, all of which are kept below forty-five seconds. In addition to product announcements, Hale Bros. *Hour of Melody* devotes many spots to helping the war effort—salvage drives, blood bank, war savings and bonds, etc.

REAL PROMOTION has been put behind the *Hour of Melody* which Hale Bros., West Coast department store chain, is sponsoring on KFSO, San Francisco. These enthusiastic gentlemen are previewing an outdoor poster announcing the program. (L to r) Marshal Hale Jr., president, and Junius C. Smith, general sales promotion manager, Hale Bros.; Richard Oddie and Burton C. Granicher, McCann-Erickson Inc.; Mort Sidley, sales manager, and Edward J. Jansen, manager, of KSFO.

Newspaper Promotion

Hale Bros. are publicizing the program in the four Northern California cities where they have stores — San Francisco, Oakland, San Jose and Sacramento. Full-page newspaper ads announced the show and small ads featuring the night's program appear daily on the radio pages of a number of newspapers. An outdoor poster showing, calling attention to the program, is also being released in a number of cities. Store cards, window cards, direct mail and many other forms of advertising are also being used to remind customers of this nightly *Hour of Melody*.

Although the *Hour of Melody* is Hale Bros.' first major radio campaign, it is interesting to recall that this department store was a pioneer in the radio broadcasting field. They started KPO in 1922 and the studios were located in the main San Francisco store. Later they sold the station to the National Broadcasting Company. Hale Bros. is also a pioneer in the California department store field. They opened their first store in San Jose 67 years ago.

Returning to our original premise, we think that a sound radio program, carefully planned and executed, can do a successful job for a department store. We appreciate the fact that Hale Bros. share our belief and we hope that their success in radio will influence other department stores.

REPRINTED FOR NAB DEPARTMENT OF BROADCAST ADVERTISING

"A good way to lose this war is to be too sure of winning it. A good way to lose out in immediate and post-war business is to be too sure of getting it."

Why merchandise-short retailers must continue advertising

By HOWARD P. ABRAHAMS

RECENTLY a Washington, D. C. jewelry merchant asked me, "Don't you think I should stop advertising? Merchandise becomes tougher to obtain. Customers are easy to get; too easy, in fact, in this boom town. I really don't need to advertise. Look at the money I could save . . . the salaries of my advertising manager, his assistant, art costs, printing and all the newspaper linage I buy?"

Hundreds of merchants are undoubtedly asking the same question. With the stringent rationing of shoes, gasoline, autos, electrical appliances, electric refrigerators and other "big ticket" items it is no trick to sell watches and jewelry. In spite of War Bond purchases excess millions of dollars are burning holes in war workers' pockets.

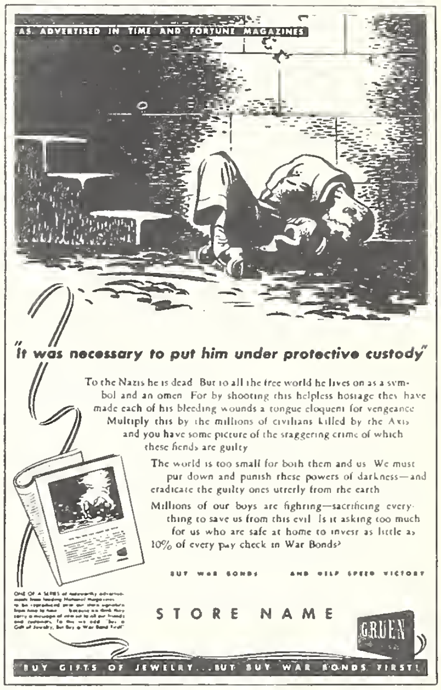
These factors have placed the retail jeweler in a fortunate sales position . . . a position which has seen his sales skyrocket to an all-time high. His customers are intent on buying luxuries and they will do it without the stimulus of vigorous sales promotion.

But does this mean that the retail jeweler should discontinue his publicity efforts? For his own protection and for the protection of his future welfare the answer is emphatically *no.* Stores and products which cease to keep their names before a forgetful and fickle purchasing public will unfortunately discover when the war is over, that they have faded from the retail scene.

It is almost always impossible to regain the prominence and business prestige which is carelessly and needlessly lost by the absence of a continuity of publicity. Reminiscing into the past can recall the names of stores and products which were accepted household standbys . . . names, which through the failure of constant publicity, have gone down memory's lane or become, in value, a fraction of their former fame.

What is the retail jeweler in for when the war is over? Forget, if such a thing is possible, all the merchandise changes, the radical improvements and new designs. Be concerned with the newcomers who will penetrate the retail jewelry business as well as the current crop of beginners whose competition will make itself increasingly felt on this retail front.

We appear to be in a cannibal era in retailing; furniture and fashion shops are eating into the jewelry business, men's clothing stores are eating into the women's clothing business, and so on. After the war, men and women who were attracted by high wages in war factories and people who drifted into other communities for war-time jobs will be coming home . . . home to your city where they will return to live and earn their living. With a huge backlog of earnings, partly secured by payroll deductions and War Bonds, many of them will decide to open establishments in stores right in your own trading area. Salespeople, your present and your ex-salespeople, as well as all types of your store personnel, will tend to shift to these new stores for employment.



AS ADVERTISED IN TIME AND FORTUNE MAGAZINES

"It was necessary to put him under protective custody"

To the Nazis he is dead But to all the free world he lives on as a symbol and an omen For by shooting this helpless hostage they have made each of his bleeding wounds a tongue eloquent for vengeance Multiply this by the millions of civilians killed by the Axis and you have some picture of the staggering crime of which these fiends are guilty

The world is too small for both them and us We must put down and punish these powers of darkness—and eradicate the guilty ones utterly from the earth

Millions of our boys are fighting—sacrificing everything to save us from this evil Is it asking too much for us who are safe at home to invest as little as 10% of every pay check in War Bonds?

BUY WAR BONDS AND HELP SPEED VICTORY

STORE NAME

BUY GIFTS OF JEWELRY . . . BUT BUY WAR BONDS FIRST!

Retail ad tying in with national campaign

Post-war success will require more than post-war buying and selling. It will require acceptance . . . by the consumer, the store's personnel and the community at large. When the war is over, that store which has kept itself out in front in its city will find the front door open to its selling effort . . . in spite of a new crop of stores or new departments in old stores. Just as merchants themselves adhere to tried and tested products, so do customers adhere to the store which has built up acceptance. The easy way to maintain this acceptance is through constant publicity.

It isn't just those who have remained on the home front who will be affected by the stimulation of advertising continuity.

This article was written for "Gruen Time," house magazine of the Gruen Watch Company, and it will appear in the September issue.

Because it is a vital message for all retail advertisers and for media which carry retail advertisements, Gruen Watch Company has made it available for pre-publication in PRINTERS' INK.

Comes "V" day and it will be found that the men in khaki and the men in blue will be decidedly influenced by the aura of good-will a store has built around itself during the war-torn years; because good-will is an ingredient which sinks in and spreads through a community.

In creating good-will, the retail watch and jewelry merchant has a head start over most others. Here is a field where big-league names play an impressive part in its business. Ask any consumer about the watch he wears and he will proudly refer to it by its brand name. These watch manufacturers, with their precision machines and their highly skilled workers, were among the first to convert a vast portion of their output to war production. This did not mean that their advertising pressure ceased. They wanted their immediate customer, the retail jeweler, as well as the consumer to be constantly aware of their product . . . aware to the extent that when normal production of civilian watches is resumed, their product will have had no letdown in the minds of their public.

This continuous flow of national advertising is a kite to which the retailer can hitch his advertising dollar. Picture for instance, the effect Gruen's national advertising campaign has upon customers and potential customers the country over. By publicizing its name in resourceful newspaper advertising, window displays and interior displays, the retail store can find a most inexpensive way to capitalize on an already accepted consumer buying trend. In this instance, a manufacturer lays the foundation of a dependable, style-right commodity. A retailer's job is half done. He builds the story of his reputation in his community on the maker's nation-wide acceptance. It is the old story of a man being known by the company he keeps.

Today's alert merchant and manufacturer is not confining his advertising message to merchandise alone. He is building one institutional layer on top of another to tell his customers about himself. The smart retailer is explaining his many customer services, showing why his store is a grand one in which to shop. He is showing the part his store is playing to win the war. Advertising which features War Bonds, Red Cross drives, USO and numerous local activities identify that the retail jeweler as an important store in that community . . . a store which deserves present and future buying support.

United States production will come out of this war riding high. It appears to this writer that watch manufacturers like Gruen will be able to produce at a pace which will make pre-Pearl Harbor records look very small. What part will a retail store play in the distribution of watches if its customers are not ready to accept watches from *that* store?

A recent study* by the Department of Commerce shows that if Victory comes in the next two years and if manufacturers' outputs continue at high levels, 1946 sales will reach an all-time high in jewelry stores. This study assumes that 96.5% of those seeking post-war reconversion employment will be in peacetime productive jobs. Estimated sales of clocks and watches run to $393,000,000—an increase of 92% over 1940.

A good way to lose this war is to be too sure of winning it. A good way to lose out in immediate and post-war business is to be too sure of getting it. Continuity of store advertising by promoting tried and tested nationally-famous products . . . store advertising that is tied on to the maker's own intensive campaigns . . . is the sure-fire insurance policy that will pay off with sales for the future.

---

NEWS FROM THE BLANK STORE
SEWING SCHOOL OF THE AIR

WARTIME USE OF RADIO ADVERTISING

WHEN the gasoline and rubber rationing program loomed upon the horizon and threatened to keep many of *The Paloce Store's* customers from "tripping" into *Spokone, Washington*, The Palace took steps to send its services into the homes in the outlying communities and neighboring states. Up to this period the store had no recognized mail order service . . . that is, no special bid was made for mail order patronage.

The first step was the compilation of a mailing list, with the store's charge customers as a nucleus. Spot announcements over the air were employed to build up this list and to reach new prospects affected by the rationing. Then began the merchandising of a sixteen-page "Bulletin" (not a catalog), for it did not pretend to itemize all of the articles in stock, nor did The Palace have any desire to become known as a mail order house or to compete with mail order establishments. The "Bulletin" is nine by twelve inches in size and is mailed under third-class postage. No envelope is used. Allowance is made on the cover for addressing.

Results Very Gratifying

Three issues of the "Bulletin" were released in the fall of 1942 and the results were highly gratifying. The store's strategic location in Spokane, the hub of the great Inland Empire of the Pacific northwest, makes it a logical mecca for shoppers in numerous small towns and farming communities in northwest Washington state, Idaho, and portions of Oregon and Montana. Except in rare instances, it is the custom of the store to pay the delivery charges on shipments into these four states as an added incentive to mail order shopping.

Hardly had the returns from the first issue of the "Bulletin" been tabulated before an idea was evolved in the studios of a local broadcasting station, centering around a lively musical quarter-hour program to further the progress of The Palace Store's Personalized Shopping Service. The idea was to feature a "musical postman," with lithe and gay lyrics, popular vocal and instrumental selections and The Palace's own shopper in person . . . a fifteen-minute live talent program—no recordings. An audition was arranged and it was decided forthwith to launch, "The Morning Mail"—on the air every day of the week, Monday through Friday, at 9:30 a. m. This hour was chosen as the most likely time to get the attention of the woman in the home.

Enter Mrs. Edna Perry

Now arose the problem of a suitable name for the store's shopper or director of personal shopping, for the shopping staff comprised a group of young women. It must be a simple name, easily understood and preferably with euphonious qualities. The designation of "Mrs." was unanimously agreed upon as preferable because it carried the added weight of wisdom in making merchandise selections, greater experience in shopping and a broader understanding of consumer requirements. Ultimately the name, "Mrs. Edna Perry" of The Palace, your Personal Shopper, was selected.

On the air and in the store it was imperative that the person chosen for the important role of Mrs. Perry must have a confidence-inspiring personality, a pleasing voice, an affable disposition and a general understanding of the average woman's shopping problems. Furthermore, if possible, she should possess sufficient executive ability to direct the activities of a corps of shoppers. Occasionally, mail order patrons do come into the store and desire to meet Mrs. Perry; perhaps to seek her advice or to engage her services in a shopping expedition.

Many are the times she is called upon to be a veritable Dorothy Dix or Beatrice Fairfax in the solution of perplexing personal problems. Recently, she received a letter of inquiry about a suitable wedding gift for a young couple who would not set up housekeeping until the end of the war. "The son of my husband's business partner was recently married to a girl back east whom I have never met. I know nothing of her likes or preferences. The gift should not be perishable or too weighty or bulky, etc." Another correspondent inquires, "Will you look after my daughter when she comes into your store later in the spring to select her graduation clothes? It will be impossible for me to come with her."

Letters of Thanks

"Thank you so much for offering to help fit hard-to-fit people," one woman writes: "I am 49 years of age, slightly grey, hair (brown), hazel eyes—five feet one inch and very hard to fit. I am thirty-one inches bust and forty hip size and short-waisted. Can you beat that combination? I would like very much to have an afternoon frock or something suitable for general wear in a small town."

"I enjoy your program very much and I am in a pickle. I can't seem to get any foot covering for my big feet and I'm having the same trouble with my daughter," states a mail order patron.

Appreciation of The Palace Store's efforts to serve the rural communities runs high. "Thank you so much for all you do for us people who are stranded out of reach of the big stores," says one woman. From a small town in Washington came the following: "I'm tall and have a terrible time finding garments and it struck me that maybe you could help." Late in January a heart-rending appeal from a mother in Oregon came in the mail inquiring about dolls. "This is a belated Christmas gift. We've tried numerous places without avail. Can you help us?" The Palace shoppers combed the city of Spokane; found two dolls only that could measure up to the requirements, purchased one and sent it. Then came a thank you note. "Wish you could have been here when our little girl opened the package. 'Oh, mommie,' she said, 'I'm so glad I didn't get a dolly for Christmas.' Tears came into her eyes. Isn't it grand to live in the good old U. S. A.?"

Mrs. Edna Perry handling "The Morning Mail," the program used by The Palace for Promoting its mail order service

Personalized Service

One morning's mail brought a letter from a ten-year-old boy in a small town in Oregon. Enclosed was a dollar bill which he instructed the personal shopper to use in buying a birthday gift for his sister whom he said worked in the main office of The Palace. Investigation disclosed the sister was employed in the main office but was leaving on her birthday to join the WAACs in Seattle. The boy had requested that a card be included with the gift, reading, "From Mother, Dad, brother and Trigger." Trigger, he explained, was her horse. "And please announce it on the radio," he added. The store granted the request and set up a radio receiver in the main office where the young lady heard the surprise broadcast, the hour being before the store opened.

As an aftermath to this event, Mrs. Perry received a lovely valentine, accompanied by the following message from the ten-year-old: "Dear Mrs. Perry: I want to thank you for getting the nice present for my sister, and I especially want to thank you for the nice announcement that you gave over the radio. All of my friends heard it. I sure did like it."

Sol Kaplan's newscast goes on the air. This radio program has taken on added importance in these times of tire and gasoline rationing

The foregoing is related as an example of the human relationship existing between the customer and the store via the "morning mail." Customer appreciation of this personal shopping service is high. Words of gratitude are profuse. "I am greatly pleased with the Cay Artley I got yesterday. It fits perfectly. The blouse is very smart. I appreciate the charge account you arranged for me and I shall enjoy using it from time to time." Another, from Montana, says: "I enjoy your program. It is so clear, one would think you were right here in our living room."

MR. SOL KAPLAN, department store executive who maintains six stores in *Potsdam, Massena, Gouverneur, Conton* and *Ogdensburg, New York*, is sold on radio for the duration. His reasons are numerous and valid and double-checked from a long experience.

To begin with, Mr. Kaplan points out that due to tire and gasoline shortages, Americans are depending more and more upon their radio for relaxation and entertainment. News every hour on the hour also adds fuel to their radio-consciousness. Radio reaches out into the suburbs where dwell defense workers, many of whom are newcomers to the community. These people need furniture for their newly found apartments or notions to dress up already furnished flats. Housewives need dress and fancy goods for themselves and kiddies. Knowing little about any merchants they are strongly inclined to drop in at the store whose name they hear emerging from the loudspeaker.

Mr. Kaplan does a tremendous mail order business and he points out that farmers and rural dwellers who can't get into town often, can order from Kaplan's knowing that if items desired are not available, Kaplan's will refund money fully. He estimates that average radio station covers a range from fifty to one hundred miles in radius. Operatives of one central department store will still benefit from sales made in distant communities.

Mr. Kaplan sponsors a daily newscast, five minutes in length. He prefers straight newscast to any other form of radio participation, because the audience is already available and no extensive ballyhoo is necessary to make up such audience attention. Newscast hits the air at 9:00 a. m., catching the housewife before she commences household tasks or her daily shopping expedition which detracts from attention to radio.

If strong enough impression is left by Kaplan commercial, she may stop in at the store en route down town and make a purchase, or at least browse about a bit.

Mr. Kaplan uses his commercial to stress variety of goods available mentioning the fact that even with wartime restrictions, merchandise in stock is yet ample to fulfill all needs. No emphasis on economy is placed but rather quality and service angle is played up as Mr. Kaplan feels that the average house frau is not as price conscious as in era before defense wages were hiked.

Radio and Newspaper Allied

Mr. Kaplan uses radio to call attention to forthcoming newspaper displays so as to garner maximum number of readers when actual newspaper insertion actually takes place. He also uses a portion of newspaper display space to plug radio newscast periods.

This merchant suggests that if newscast time is simply not available, perhaps a five minute musical spot on a radio station's early wakeup program between seven and nine a. m. is worthwhile for the entire family as a rule listens to the melange of music, news, sports and time reports heard on early morning affairs.

Another suggestion is that the efficiency of radio programs depends upon their frequency—a daily or thrice weekly affair is necessary for a once weekly shot, however effective, will not be impressed sufficiently upon the average listener's subconscious mind to be of any great advantage to a merchant. In short, Mr. Kaplan says, "Hop on the radio bandwagon!"

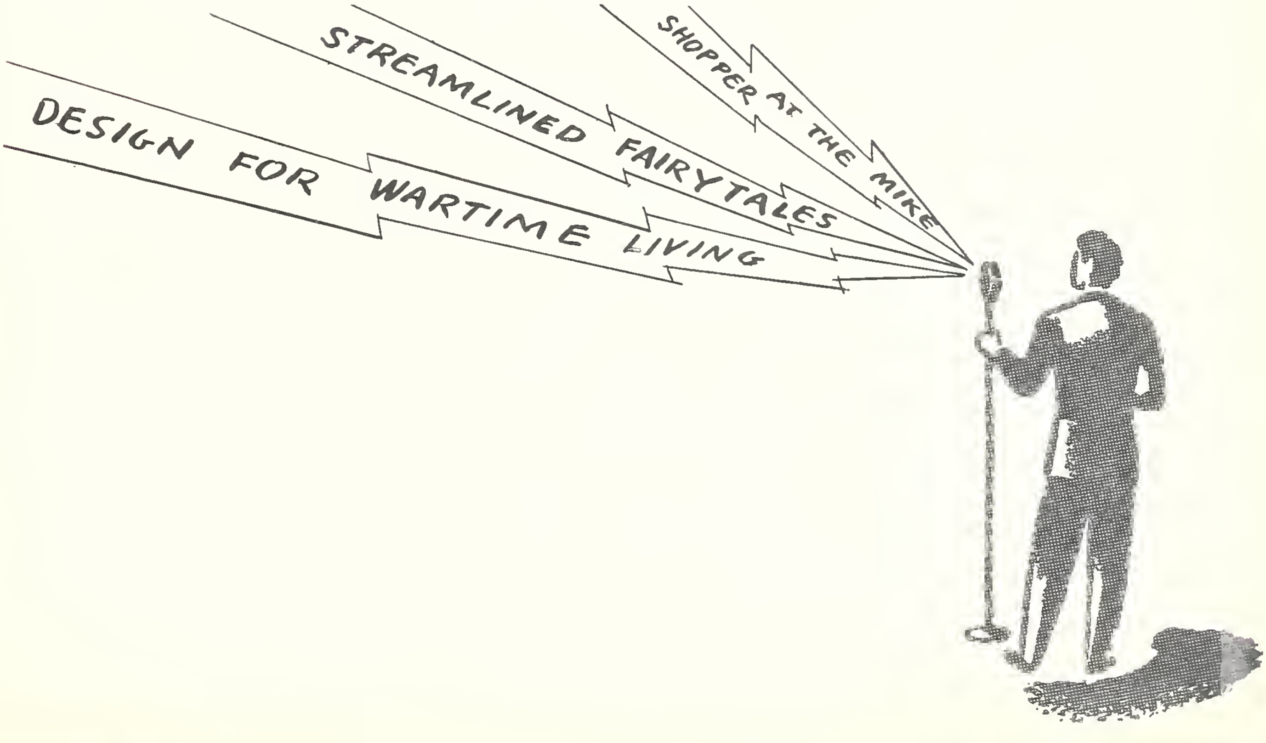
WARTIME USE OF RADIO ADVERTISING



Wartime Use of Radio Advertising

(Continued from page 33)

THIS article is written as a challenge to those complacent souls who sit in the advertising offices of department stores and say "Radio advertising is unprofitable . . . that returns are intangible . . . and that it is best used for 'institutional' advertising." These fellows won't like this article because it is the writer's contention that if they are not including radio in their space-spending budget, they are short-changing the "boss" out of a nice fat section of a potential market, and the only reason they are short-changing the "boss" is that they have not yet stumbled across a simple truth. They don't understand that a lot of people, people with money to spend, mind you, experience considerable difficulty in reading the printed word, but can capture and retain the meaning of the spoken word with ease. Perhaps these fellows should not be blamed, they are accustomed to working with art, engravings, layout, copy—the tangible things they can see and can feel—these men don't understand how much *sell* can be packed into the spoken word. They don't know that there are thousands of people in every retailer's market who would rather LISTEN than READ.

"Says who?" says you—and, to lend what authority I may to what follows, let me explain that this statement comes from a store in the "two million" class, located in a market of approximately 110,000 people, with two daily newspapers and radio available for advertising. We have been using radio for ten years, starting, as most stores do, with a few "spots." In the time intervening the management has found it profitable to increase radio spending to the point where we now carry six half-hour broadcasts, five fifteen-minute broadcasts, three five-minute broadcasts and a minimum of six spot announcements *every week*. This, you'll agree, can't be hay.

Success in radio advertising did not come to us at the start. Success began when we looked at radio as a medium that did not supplement, but rather paralleled other forms of advertising. When, proceeding upon the simple assumption that a lot of people find it easier to *listen* than to *read,* we looked upon radio listeners as a market that was not being well "sold" by newspapers. Of course, when we began to look at radio from that angle, it didn't take us long to decide that if radio advertising could be nothing more than "institutional," we didn't want any part of it. Our next step in the right direction was to toss overboard any idea of "programs." We reasoned that if a newspaper space seller came to us with the suggestion that we buy half pages and quarter pages and that we fill most of that space with portraits and poetry, leaving a little space at top and bottom to advertise what we had to sell, we'd throw the guy out of the office, so why listen to a paralleling proposition from a space salesman in radio. It's true that now we use a lot of radio time in a purely institutional manner, but we use a lot of newspaper space the same way, too, but before any of our radio time went ritzy with institutionals, it earned its place alongside newspaper advertising by SELLING MERCHANDISE—GOOD, DESIRABLE DEPARTMENT STORE MERCHANDISE.

Radio sold goods for us when goods were easy to get and hard to sell. We proved that when we took a street floor square and assigned it to merchandise advertised only on radio. There were no window displays, no departmental displays, no other form of advertising, just radio. In the twelve months preceding this assignment, the square grossed $5,000.* The first year of selling radio-advertised merchandise, the square grossed better than four times that amount, the year after that, five times the initial amount, and in the third year it reached almost six times the original figure of five thousand. (*The initial figure is fictitious, but the ratio of gains is real.)

Some years ago a survey of 25,000 Macy advertisements of merchandise designed to bring right-now response there was a newspaper space cost of 13 per cent on advertised merchandise sold. At the time this information was released we sold enough of a single item to bring air-space cost of that program down to 6.7 per cent.

In an early test for a comparison of costs of radio and other media, we made some interesting discoveries. In this test twenty-two items were used. Conditions for selling were identical. At the end of the test one medium had sold 180 units; radio had sold 381 units, 200 more. Dollar volume on radio-sold items was one-third greater; advertising cost in percentage to sales was just about one-half of that of the other medium.

For two successive years we used a live talent Santa Claus program. The first Christmas season the series was used whole store sales increased 5 per cent over the previous year, but toy sales jumped 17 per cent. We repeated the series the following year and toy sales were 14 per cent higher than the preceding year, or 31 per cent higher than before radio. After that, every big store wanted Santa on the air and so the station ruled the old gentleman off the air in an effort to preserve the illusion for children.

Back in the spring of 1940 when we still had to get in and pitch if we wanted to sell goods, a four months' (March through June) study was made of traceable returns in advertising. This study included all types of merchandise advertised in two dailies, morning and evening, and on radio. This study, and it was a thorough study, revealed that:

The evening paper got 70 per cent of the advertising money spent but produced only 68 per cent of the units sold. The morning paper got 28 per cent of the money spent and accounted for 24 per cent of the units sold. Radio received only 2 per cent of the money spent, but produced 8 per cent of the units sold. What radio might have sold with a better break in spending is conjectural.

In dollar volume the ratio was about the same, and the average sale for the evening paper was $2.76, for the morning paper $2.57 and for radio $2.48.

But radio was the fair-haired boy in the cost-to-sales column. During this four months period the morning paper took 9.6 per cent of each traceable dollar it brought in, the evening paper took 8.1 per cent, but radio took only 3.4 per cent. But please remember these figures are on traceable returns on items advertised and have no bearing on the relationship of total advertising costs to whole store sales.

Yes, back in 1940, when goods had to be *sold,* radio proved to us that it could earn a place in the space schedule of a progressive department store.

Some weeks ago we secured a few hundred pairs of nylons. Mention was made of them on one of our newscasts (news of the store). We placed a limit of one pair to a customer and accepted no phone orders. Within forty-five minutes enough women had come down town in response to radio, to clean out the lot. It's no trick to sell nylons, we know that. This simply shows that women want to *hear* store news, and when you have something they want to buy, you'll get "tangible" returns, and get them in a hurry.

People who intend to use radio for department store advertising should know a lot of things, among them:

Don't look upon newspapers and radio as competitive mediums, they are parallel. Radio reaches a market often missed by the printed word.

Don't use radio as a market place for odds and ends. People who *listen* are just as much interested in new, fresh merchandise as are people who read.

When we get back to normal tides of supply and demand, don't neglect to test and check, test and check constantly.

Don't fill your air time with copy on mink coats, because you want to impress people. There are far more women who will be impressed with the opportunity of buying nice ruffle curtains at $1.98. Don't, in fact, ever try to impress them with your importance. Try instead to sell merchandise.

Buy Air Space

Don't buy a "program." Buy air space, just as you would buy newspaper space. Then use that space intelligently. Use it to sell something—sell your store, your services—and, most important, sell your merchandise. Embellish it with music and song, if you must, but don't let entertnaiment dominate your program. The networks can provide better talent and entertainment than you can afford, but nobody but you can tell the news of what is happening in your store. And don't tell me people are not interested in your store and what is happening there, because if they were not interested, I doubt if your boss would be in business.

And finally, whenever you are inclined to discount the selling power of the spoken word, please remember President Roosevelt, and remember the people who listened to him. So, with the experience of ten years of radio advertising back of us, I repeat: the advertising man who doesn't include radio in his space-spending is short-changing his boss out of the returns that will come from a market that is responsive to the spoken word.

☛ The full text of the attached bulletin appears in this issue of the "NAB Reports." Please route this copy to your sales executive.

Sept. 24, 1943 BROADCAST ADVERTISING BULLETIN No. 5

Local War Advertising Pool

Community support is needed to insure the success of the various war campaigns to buy bonds, to combat the black markets, to fight inflation, to lessen absenteeism, etc. In a number of cities the media have joined together to raise a local war advertising pool by donations of space, radio time and money from local advertisers, which has been administered by a local committee which allocates the pool among the advertising media and among the various war campaigns in accordance with the campaign's importance under local community conditions. Such a plan has been very successfully operated by all media jointly in Cleveland and in some other cities.

Immediate Action Needed

Representatives of the War Advertising Council last summer worked on a proposal for a national plan which it was hoped could be put into operation in most of the cities of the country. However, announcement of a national plan has been abandoned, although the War Advertising Council still believes the plan is sound and would be helpful in all cities which could promote it. If such a plan is not in operation in your city, it is suggested that you give it serious consideration now, jointly with other media if possible, or separately if joint action is impossible.

Outline of Plan

Due to the fact that the NAB does not know the circumstances existing in each city, we are outlining a general plan which can be modified to fit local conditions.

Raising the Pool—Donations should be requested from local advertisers of advertising space, radio time and money. Assurances should be given that each donor will not be again solicited for support of war programs for a stated period.

Committee—A committee should be formed composed of community leaders. Radio and newspaper executives perhaps will have to take the lead, but local business executives from all branches of business should be included.

Allocation of fund—The local committee should allocate the pool among the local media participating.

Preparation and execution of the plan—The local committee should have charge of the preparation and execution of the plan. In many cities where the plan has been in operation, a local advertising agency has been retained to assume responsibility for the execution of the plan, working under direction of the local committee.

Campaigns—Food will be the subject of a national campaign in November, followed by anti-inflation in December. There will be local campaigns on absenteeism, womanpower, etc. Complete information on all these campaigns will be supplied by OWI.

Contact Your Local Newspaper

Rowan D. Spraker, representative of the National Editorial Association, on the War Advertising Council has just announced a plan similar to the one outlined above entitled "Small Community War Advertising Plan," which has been sent to the publishers of small community newspapers. This plan recommends joint action, stating:

> "It should be emphasized in connection with each request that the plan is not the plan of any one group or of any one advertising medium, but that it is a *community* plan for community war advertising which should include the combined support of all business, agricultural and civic interests in the community."

Therefore, it is suggested you contact your local newspaper publisher, as it is believed that the plan will be more successful in most cities if all media join in the promotion of a joint plan.

Local Responsibility

This type of plan has operated successfully in many cities. However, its success depends upon action of the local executives of radio stations, newspapers and billboard companies. The OWI will continue to furnish complete information on all campaigns, but the raising of the pool, its allocation, the keying of the campaigns to local conditions and the execution of the plan depends upon action by the local committee.

The NAB will be glad to supply additional information and advice on request.

Special Committee Considers Plans for Fourth War Loan

Meets With Treasury Department Officials; Maps Radio's Greatest Effort

Radio is justly proud of its record in the War Loan campaigns. An analysis of the support accorded these all-important drives by the broadcasting stations has revealed that more than $7,000,000 worth of time alone was devoted to the Second War Loan with that figure stepped up to more than $12,000,000 during the Third War Loan.

Considering the limitations of time alone, this was a greater contribution proportionately than that made by any other medium of mass communication!

But industry leaders have long recognized that this support could be substantially augmented if a greater variety of prepared programs and announcements could be made available for sponsorship over local radio stations by national, regional and local advertisers.

To examine that possibility and to make specific recommendations to the Treasury Department, a special committee, composed of Irving G. Abeloff, WRVA; Stanton P. Kettler, WMMN, and Edward C. Obrist, WFIL (representing John E. Surrick, also of WFIL), together with Willard D. Egolf, Arthur Stringer and Lewis H. Avery of the NAB staff, held an all-day meeting with Vincent F. Callahan and Emerson Waldman of the Treasury Department at NAB headquarters today.

The details of the discussion are incidental to the concrete recommendations submitted to the Treasury Department officials. These include:

1. Complete array of quarter-hour and five-minute programs and announcements of various lengths for local sponsorship.
2. Portfolio describing the programs and containing samples of the announcements.
3. Certificate signed by the Secretary of the Treasury for radio advertisers who support the Fourth War Loan.
4. Samples of the transcribed programs to be sent to each radio station well in advance of the campaign for auditioning to local prospects.
5. Repetition of network bond day to take place near the beginning of the campaign, with ample notice on the activity to the affiliated stations.
6. Local bond day, similar in intent to the network feature, but to take place near the end of the campaign.
7. Network programs devoted to the Fourth War Loan will provide time for station "cut-in" announcements to localize the effect of the program and the appeal.
8. Appointment of a special committee of radio station farm editors to counsel with the Treasury Department on the most effective approach to the farm audience.

The Committee recommended that the quarter-hour programs be patterned after the popular Treasury Star Parade, with the actual transcription 14½ minutes in length. Provision would be made for a one-half minute musical "open-end" at the beginning and a one-minute musical "open-end" at the close. By this arrangement, the actual program content would be contained within 13 minutes.

Similarly, the five-minute musical programs would provide for a 25-second musical "open-end" at the beginning and a 45-second musical "open-end" at the close. In a lengthy discussion of program ideas for the five-minute series, opinion was somewhat divided, with a substantial majority favoring musical programs while a minority expressed a preference for narrative-type shows. It is possible that programs of both types would be included in the proposed series.

In that connection, the Committee hopes that radio station executives will submit any unusual five-minute program ideas that they believe would be suitable for such Treasury Department programs. All suggestions should be submitted to NAB headquarters and will be reviewed by the Committee at an early meeting.

Several series of announcements will be prepared for local sponsorship. Some will be 100 words in length, while others will be condensed to 35 words, in an effort to cover all types of availabilities on all types of stations.

The portfolio for salesmen will contain an open letter from the Secretary of the Treasury, recommending the use of broadcast advertising in support of the Fourth War Loan. As previously stated, it will also contain a complete description of the quarter-hour and five-minute programs, as well as samples of the announcements.

In discussing the sale of the proposed programs to national, regional or local advertisers, the Committee emphasized the need for sample transcriptions to be submitted to radio stations as far in advance of the opening date of the campaign as possible.

At the conclusion of the meeting, Messrs. Callahan and Waldman agreed to review the recommendations of the Committee in relation to the over-all plans for the Fourth War Loan, and to meet with the group again at an early date.

1760 N St., N. W. NATIONAL ASSOCIATION OF BROADCASTERS Wash. 6, D. C.

Treasury Department Offers 52 Programs For Local Sale During Fourth War Loan

Several Series of 35 and 100 Word Announcements Also Available for Sponsorship; Audition Transcriptions and Sales Portfolios to be Mailed December 12

The Treasury Department announces that several series of announcements and a variety of five-minute and quarter-hour programs will be available for local sale in support of the Fourth War Loan.

Moreover, a sales portfolio, containing a complete description of the programs and samples of the announcements, together with audition transcriptions of both the five-minute and quarter-hour programs, will be mailed to all radio stations not later than December 12, 1943. This will provide from four to five weeks for local station sales effort before the Fourth War Loan is inaugurated on January 18, 1944.

Thus, the recommendations of the NAB special committee, consisting of Irving G. Abeloff, WRVA; Stanton P. Kettler, WMMN, and Edward C. Obrist, WFIL (representing John E. Surrick, also of WFIL), together with Willard D. Egolf, Arthur Stringer and Lewis H. Avery, of the NAB staff, were adopted by the Treasury Department to facilitate the sale of more broadcast advertising to insure the success of the Fourth War Loan.

Here is the complete package:

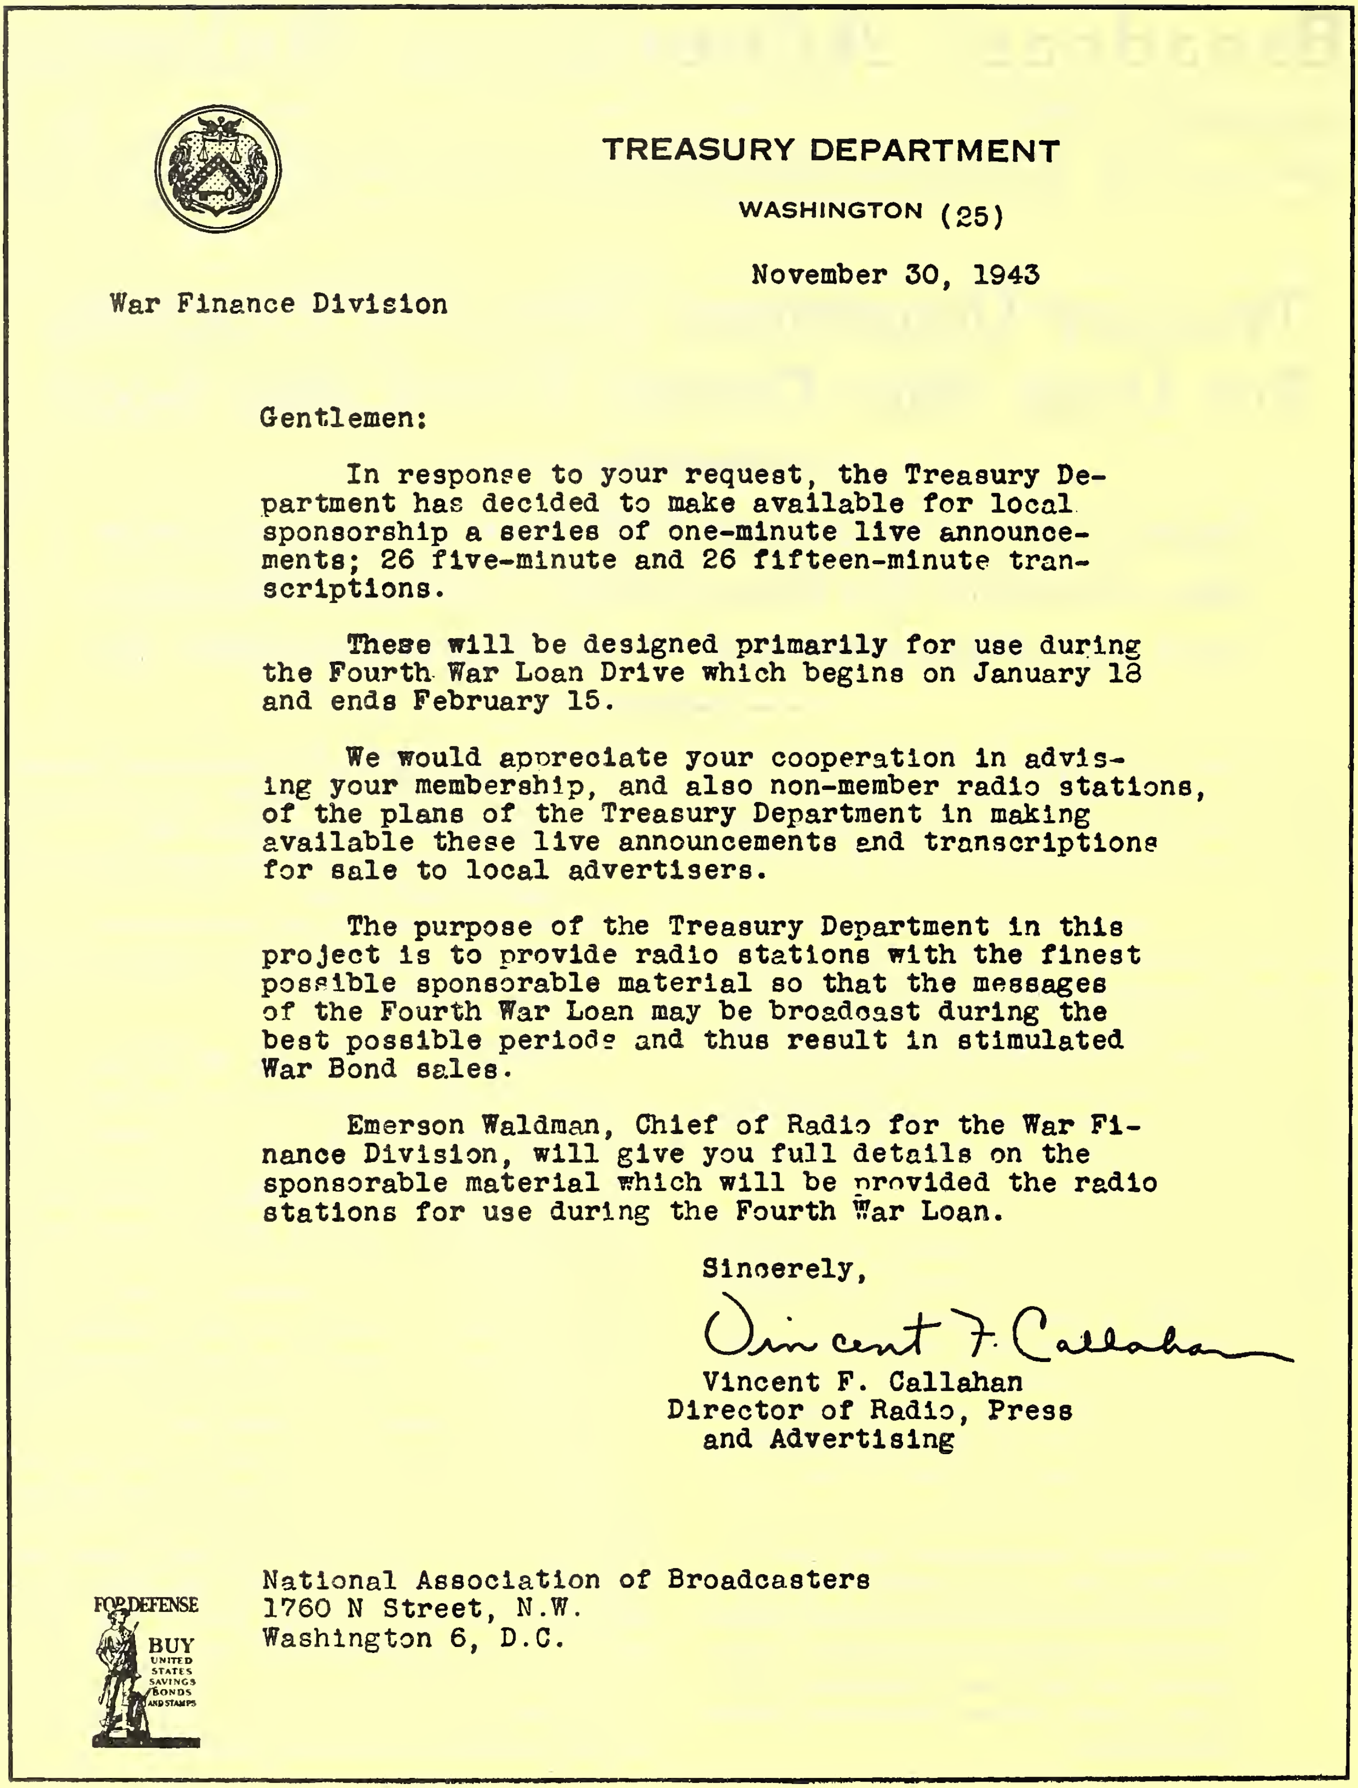
1. **Sales portfolio containing an open letter recommending the use of broadcast advertising in support of the Fourth War Loan; facsimile of a certificate, signed by the Secretary of the Treasury, for such radio advertisers; a description of the programs and samples of the announcements.**
2. **Twenty-six quarter-hour programs of the same high entertainment quality as the Treasury Star Parade, less the name stars.**
3. **Twenty-six five-minute programs of top-notch entertainment value.**
4. **Several series of live announcements, both 35 words and 100 words in length, to fit all types of availabilities.**

Now . . . It's up to You!

Large stations, medium-sized stations and small stations have been clamoring for government agencies and departments to cease their discrimination against radio, by providing mats for newspaper advertising without making comparable service available to radio stations. Last June, the Small Market Stations Committee unanimously passed a resolution calling on these branches of the government to provide parallel opportunities for the sale of broadcast advertising in support of the various home-front campaigns.

Such discrimination—at least as far as the Treasury Department is concerned—has ceased. Now it is up to the protesting stations to make full use of this material—to sell every announcement and every program to some local, regional or national advertiser—that the Fourth War Loan may have the widest support that any such activity has ever enjoyed.

You asked for it! Here it is! Now let's make the most effective use of this material.



TREASURY DEPARTMENT
WASHINGTON (25)

War Finance Division

November 30, 1943

Gentlemen:

In response to your request, the Treasury Department has decided to make available for local sponsorship a series of one-minute live announcements; 26 five-minute and 26 fifteen-minute transcriptions.

These will be designed primarily for use during the Fourth War Loan Drive which begins on January 18 and ends February 15.

We would appreciate your cooperation in advising your membership, and also non-member radio stations, of the plans of the Treasury Department in making available these live announcements and transcriptions for sale to local advertisers.

The purpose of the Treasury Department in this project is to provide radio stations with the finest possible sponsorable material so that the messages of the Fourth War Loan may be broadcast during the best possible periods and thus result in stimulated War Bond sales.

Emerson Waldman, Chief of Radio for the War Finance Division, will give you full details on the sponsorable material which will be provided the radio stations for use during the Fourth War Loan.

Sincerely,

Vincent F. Callahan

Vincent F. Callahan
Director of Radio, Press
and Advertising

National Association of Broadcasters
1760 N Street, N.W.
Washington 6, D.C.

FOR DEFENSE
BUY
UNITED STATES SAVINGS BONDS AND STAMPS

These Are for Sale

Here is a brief description of the sales portfolio you will receive soon after December 12, 1943. It will be impressive in both size and appearance. It will contain an open letter strongly recommending the use of broadcast advertising during the Fourth War Loan. It will include a facsimile of a certificate, signed by the Secretary of the Treasury, for radio advertisers who support the Fourth War Loan.

The portfolio will also contain a detailed description of the quarter-hour and five-minute programs, as well as both the 35- and 100-word announcements.

In other words, here is a sales tool comparable to anything and everything furnished other media by any agency or department of government. See that every sales person on your staff is equipped with one of these portfolios. See that he or she uses it to the best possible advantage.

The quarter-hour programs will be designed to salute men and women working in industries contributing to the war effort. The entertainment will feature the most popular American songs of the twentieth century. The Treasury Department states that the entertainment quality of these quarter-hour programs will be identical in every respect to the Treasury Star Parade, but without name stars.

The five-minute programs will feature the war songs of the United States. These will include some of the most tuneful melodies and easy-to-remember lyrics ever written in America.

While there may be minor changes or modifications in the content of these programs as they are put in production, there will be no change in the quantity or type of service available for local sale in support of the Fourth War Loan. The series outlined has been approved and is now in production.

Each of the quarter-hour programs will be 13½ minutes in length with a one-half minute musical "open-end" at the beginning and a one-minute musical "open-end" at the close.

Each of the five-minute programs will provide for a 30-second musical "open-end" at the beginning and a 30-second musical "open-end" at the close. Thus, there will be ample time on both quarter-hour and five-minute programs for local indentification and appropriate commercial continuity.

But Don't Stop There

Don't feel that you have done your job when you have sold these Treasury Department quarter-hour and five-minute programs to local, regional or national advertisers. Take a look at your program schedule: what else have you for sale that could be adapted to a Fourth War Loan program?

What programs or features, which could well carry a message about the Fourth War Loan, are unsponsored on your station? Could you incorporate three or four of the announcements for different advertisers in each program and make a co-operative Fourth War Loan show?

Has each member of your sales staff all of the information about the Treasury Department programs, about announcement availabilities, about unsponsored programs or features on your station?

Whom Can You Sell?

You can and should sell every advertiser in your community—not only the present advertisers, but the past advertisers as well—those who have reduced or eliminated their advertising because of merchandise shortages or service restrictions. And don't forget that the opportunity to participate in the Fourth War Loan offers you an entirely new approach to advertisers who have never previously used radio. Don't leave a single prospect unsolicited in your drive for support of the Fourth War Loan.

To paraphrase Broadcast Advertising Bulletin No. 4, dated August 20, 1943:

Many State, County and Local War Finance Committees for the Fourth War Loan have solicited contributions from banks, clearing houses, manufacturers, distributors and retailers. These funds will be used to purchase advertising on a group basis to supplement the time and space contributions of all media. Be sure to cover these groups thoroughly and effectively. Be sure they are told what radio has done and is doing in support of the War Loans. Be sure they know how effective broadcasting has proved in the various government campaigns of war information.

As you probably know, the Third War Loan was organized on an entirely different basis from the Second campaign. This campaign, too, is aimed at the individual citizen. For that purpose, many changes have been made in the organization and conduct of the effort. Therefore, if you received advertising in the Second or Third War Loans, don't automatically assume you will receive it again. Correspondingly, if you didn't obtain advertising in the last campaign, don't assume it can't be obtained this time.

The Fourth War Loan is even more completely an appeal to the individual. More than ever, the Treasury Department is looking to the subscription of the average citizen to put this campaign over the top. That's why the job to be done is greater than ever before. That's why you are being given more tools with which to do the job.

An Appreciation

The entire broadcasting industry is indebted to Vincent F. Callahan and Emerson Waldman of the War Savings Staff of the Treasury Department for their able and ceaseless efforts to have radio provided with every tool available to other media. As you examine the material for local sale, don't you agree that radio shares at least like opportunity with other forms of advertising?

And, again, it's up to you! The Treasury urgently needs the money sought during the Fourth War Loan to enable the Army, Navy, Marine Corps and Coast Guard to prosecute the war with every means at their command. When you stop to remember that broadcasting is the greatest means of mass communication the world has ever known, then you'll appreciate the part radio—both commercial and sustaining—must play in the Fourth War Loan.

4th WAR LOAN IS BIG CHANCE FOR RADIO STATIONS TO HELP

FIRST TIME RADIO SHARES EQUAL SALES OPPORTUNITY

Let's All

BACK THE ATTACK

Radio's share of retail advertising depends on your individual efforts. Here is retailers' plan:

4 ADVERTISING PEAK DAYS

Thursday, January 20—"*Army Day*"

Thursday, January 27—"*Navy Day*"

Thursday, February 3—"*Marine Day*"

Thursday, February 10—"*Schools-at-War Treasure Hunt*"

Surveys disclose that in the past retailers sponsored an average of 80 per cent of all newspaper War Bond advertising in America, which is indicative of the important role the industry plays in the success of the War Financing program by spreading the War Bond gospel to every village and hamlet.

Retailers are not asked by their War Campaigns Committee to earmark any fixed percentage of their budget for advertising—but each store is expected by the committee to meet or exceed the advertising job they did so well in the 3rd War Loan.

Past experience will serve as an excellent guide in determining the type and amount of advertising that will insure retailers reaching their quota for the 4th War Loan.

YOU know what the retailers of America plan to do in advertising for the 4th War Loan Campaign.

Here is the list of ETs for them. If your sample audition platter has not been received, don't wait. Order ETs today without audition. They really are salable. And time is short. Address:

Emerson Waldman, Chief of Radio, War Finance Division, Treasury Department, Washington Building, Washington 25, D. C.

Request by number or simply say *all* 15-minute and *all* 5-minute ETs, if you can use them.

BASIC 4TH WAR LOAN FACTS

DATES—January 18 to February 15, 1944

GOAL—To raise $14 Billion—$5½ Billion from individuals

SLOGAN—"Let's All Back the Attack"

THEME—Sacrifice—Every one to buy extra bonds

Bond buyers in the Fourth War Loan campaign, which runs from Jan. 18 to Feb. 15, 1944, will be given their choice of seven U. S. Government securities. The securities to be sold under the direction of the War Finance Committee are:

Series E Savings Bonds
Series F and G Savings Bonds
Series C Savings Notes
2½% bonds of 1965-70
2¼% bonds of 1956-59
⅞% Certificates of Indebtedness

U. S. War Savings Bonds, Series E

This is the so-called "People's Bond," undoubtedly the most widely held security in the world, of which over 100 million pieces have been sold in the first three War Loan campaigns. From the standpoint of interest return, it is the most attractive of all the issues offered by the government, and is the ideal investment for the wage earner and the small business and professional man. Over $14 billions of these E bonds are now outstanding in the hands of the American public.

The bonds come in denominations of $25, $50, $100, $500, and $1000. The issue price is 75 per cent of the maturity value so that a $25 bond costs $18.75 and a $100 bond costs $75. They cannot be used as collateral for loans.

5-MINUTE ET CONTENTS

(These programs run 4 minutes, prox., leaving one minute open at the ends. All programs available for sponsorship.)

TREASURY SONG FOR TODAY—Master 6732

1. "My British Buddy" .... Ray Heatherton
2. "Bless Them All" .... Jimmy Carroll
3. "You'd Be So Nice To Come Home To" .. Mary Small

TREASURY SONG FOR TODAY—Master 6733

4. "Here Comes The Navy" .... Mary Small
5. "Let's Bring New Glory To Old Glory" .. Mary Small
6. "Johnny Zero" .... Mary Small

TREASURY SONG FOR TODAY—Master 6734

7. You're A Lucky Fellow, Mr. Smith" .... Mary Small
8. "In My Arms" .... Ray Heatherton
9. Comin' In On A Wing and A Prayer" Ray Heatherton

TREASURY SONG FOR TODAY—Master 6735

10. "Buckle Down Buck Private" ...... Ray Heatherton
11. "Jingle Jangle Jingle" .... Ray Heatherton
12. "Good-Bye Sue" .... Ray Heatherton

TREASURY SONG FOR TODAY—Master 6736

13. "I've Got Sixpence" .... Ray Heatherton
14. "This Time" .... Ray Heatherton
15. "There's A Star Spangled Banner" .. Ray Heatherton

TREASURY SONG FOR TODAY—Master 6737

16. "This Is The Army, Mr. Jones" .... Ray Heatherton
17. "He Wears A Pair of Silver Wings" .. Kay Lorraine
18. "Old Glory" .... Kay Lorraine

TREASURY SONG FOR TODAY—Master 6738

19. "Pennsylvania Polka" .... Kay Lorraine
20. "Praise The Lord and Pass The Ammunition" Kay Lorraine
21. "He's A-1 In The Army" .... Kay Lorraine

TREASURY SONG FOR TODAY—Master 6739

22. "I'm Getting Tired So I Can Sleep". Jimmy Carroll
23. "I'll Meet You At Duffy's Square" .... Jimmy Carroll
24. "Sempre Paratus" .... Jimmy Carroll

TREASURY SONG FOR TODAY—Master 6740

25. "Lili Marlene" .... Jimmy Carroll
26. "Johnny Doughboy Found A Rose" .... Jimmy Carroll
27. "White Christmas" .... Jimmy Carroll

TREASURY SONG FOR TODAY—Master 6741

28. "United Nations On The March" ...... Jimmy Carroll
29. "We're All Together Now" .... Jimmy Carroll
30. "With My Head In The Clouds" ...... Jimmy Carroll

Statement by

NEVILLE MILLER, NAB PRESIDENT

"Ours is a nation of radio listeners. Radio has both a unique opportunity for service during the forthcoming Fourth War Loan Drive, and an obligation. That is why we join with Secretary Morgenthau in urging the continued support of all broadcasters to the end that this campaign, as all those which have gone before, will achieve overwhelming success. There is no other medium which can be used with equal effectiveness to bring home to all our people the reasons for backing our boys at the front by the purchase of War Bonds. We've done it before. We can do it again."

Broadcast Engineering Bulletin

FEBRUARY 5, 1943 ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ No. 1

1760 N St., N.W. NATIONAL ASSOCIATION OF BROADCASTERS Wash., D. C.

RADIO GETS AA PRIORITY

As first predicted in NAB Reports November 13, 1942, page 648, the preference rating applying to materials for maintenance, repair or operating supplies of the broadcast industry has been raised from A-1-J to AA-2X under Preference Rating Order P-133 as amended February 4, 1943, by the Director General for Operations, War Production Board. The amendment also raises the ratings allowed to those engaged in commercial sound recording and radio communications. Broadcasters and those engaged in commercial sound recording may now apply the preference rating AA-2X to purchases of recording blanks and other necessary replacement items used in recording.

The new order does not provide replacement materials for automotive replacement as defined by General Limitation Order L-158 (this has been interpreted as eliminating mobile police stations). NAB has been informed that the new preference rating is the highest generally obtainable for non-military requirements. The suffix letter X of the preference rating identifies purchases of a non-military nature.

The amended order requires that broadcasters "keep and preserve for two years copies of all purchase orders or contracts applying such rating," and that those "affected by this order shall execute and file with the War Production Board such reports and questionnaires as the War Production Board shall from time to time prescribe." General instructions for the purchase of material in accordance with P-133 as amended February 4, 1943, are as follows:

1. Read Preference Rating Order P-133 as amended and become familiar with the provisions of the order.
2. Operate all tubes and parts to absolute failure, before installing replacements, in order to bring inventory within the limits of the order.
3. Hold best spare tubes for last use in the equipment thus minimizing the chance of failure while procuring replacements. In order to check the condition of spare tubes and to insure their immediate availability without conditioning, use all spares not less than one day every three months and not more than one day of each month. This practice is preferable to the rotation of spare tubes on an equal use basis.
4. Immediately upon the failure of spares which will reduce the inventory to less than one hundred per cent, as permitted by the order, place a purchase order with your supplier. This purchase order should bear the required certification assigning an AA-2X preference rating. When placing the purchase order request delivery prior to a definite date and ask your supplier to advise you immediately if for any reason the order cannot be filled on or before the required date. If notice is received from supplier that delivery cannot be made by the date specified, immediate *inquiry* should be made to all other known sources of supply concerning their ability to fill the order in accordance with your requirements. If these inquiries result in a satisfactory delivery promise from another supplier, the original order *should be cancelled* and another order placed with the new supplier (WPB Regulation 3, amended June 26, 1942, Section (b), paragraph 3. This regulation forbids duplicate orders.)
5. If after following the procedure outlined in paragraph 4 a satisfactory delivery promise is not obtained, an order should be placed with the supplier offering the best delivery promise. At the same time a PD-1A form should be filed with the War Production Board, Director of Industry Operations, Washington, D. C. Be sure to furnish all required information on the PD-1A form and outline in the covering letter the substance of your correspondence under paragraph 4 above.
6. If your station is actually off the air due to the failure to obtain spare tubes or parts or if the tubes or parts in use (for which no replacements are available) appear to be approaching failure communicate immediately by telephone or telegraph with the WPB Emergency Branch, Washington, D. C. The telephone number is REpublic 7500, extension 2333 or extension 2330. This communication should refer to your PD-1A application.

To avoid confusion it is suggested that the original P-133 dated October 5, 1942 be removed from your files and the amended order substituted. The revised sections of the order are printed in bold face type. The new order reads as follows:

Part 3037—Electronic Equipment

[Preference Rating Order P-133 as Amended Feb. 4, 1943]

§ 3037.5 *Preference Rating Order P-133*—(a) *Definitions.* For the purpose of this order:

(1) "Operator" means any individual, partnership, association, business trust, corporation, receiver or any form of enterprise whatsoever, whether incorporated or not, the United States, and the several states thereof, and any political, corporate, administrative or other division or agency thereof, to the extent engaged in any activity listed in Schedule A, hereof.

(2) "Material" means any commodity, equipment, accessory, assembly or product of any kind; exclusive, however, of automotive replacement parts as defined by General Limitation Order L-158.

(3) "Maintenance" means the upkeep of an operator's buildings, structures and equipment in sound working condition; and this, without regard to whether the expenditures therefor are for any reason required to be recorded in the operator's accounting records in accounts other than maintenance and repair.

(4) "Repair" means the reconstruction or restoration without expansion, improvement or change of design of any portion of an operator's buildings, structures and equipment when such portion has been rendered unsafe or unfit for service by wear and tear or other similar causes, but not including reconstruction or restoration of any portion damaged or destroyed by fire, flood, tornado, earthquake, act of God or the public enemy; and this, without regard to whether the expenditures therefor are for any reason required to be recorded in the operator's accounting records in accounts other than maintenance and repair.

(5) "Operating supplies" means any material which is essential to and consumed directly in the operation of any of the services specified in paragraph (a) (1) above, but does not include photographic film, fuel, office or building

supplies, or any material which is physically incorporated in whole or in part in the property or equipment of the operator.

(b) Assignment of preference rating. Subject to the terms of this order, preference rating of AA-2X is hereby assigned:

(1) To deliveries of material to an operator for operating supplies and for maintenance and repair.

(2) To deliveries to any supplier of material to be physically incorporated in other material required by an operator for operating supplies, maintenance or repair.

(c) *Persons entitled to apply preference rating.* The preference rating hereby assigned shall be applied where a preference rating is required to obtain material for maintenance, repair and operating supplies by:

(1) Any operator engaged in an activity in Schedule A hereof and may be applied by

(2) Any supplier, provided deliveries to an operator or another supplier are to be made by him, which are of the kind specified in paragraph (b) and have been rated pursuant to this order.

(d) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(e) *Restrictions on inventory and use.* The preference rating hereby assigned may be applied by any operator, provided:

(1) Such rating is not used to replace in inventory more than one spare tube for each active tube socket.

(2) Such rating is not used to replace in inventory any spare parts except:

(i) Those subject to frequent failure, deterioration or other exhaustion.

(ii) Those which are so unique that failure would inevitably result in long delay in resumption of essential operations.

(3) Such rating is not used in any case to increase the value of an operator's inventory of repair parts, other than tubes, above the value of such inventory on the date of this order.

(4) Such rating is not used to replace in inventory a new part if the defective part can be repaired with a smaller consumption of raw material.

(5) The tube which has been replaced from operator's inventory or for which replacement is requred has been operated to failure.

(6) The operator has returned to the manufacturer any power tube rated at 25 watts or more which has failed, unless such tube is to be repaired.

(7) Equipment which has failed has been operated within the ratings specified by the manufacturer.

(8) Such rating is not used to build up inventory of operating supplies other than tubes, in excess of requirements for a three-month period.

(9) Such operator was actively engaged in one of the activities listed on Schedule A hereof, on the date of issuance of the order, or has received specific authorization for his installation from the Director General for Operations of the War Production Board.

(f) *Application and extension of rating.* An operator or supplier, in order to apply the preference rating assigned by this order, shall endorse the following statement on the purchase order or contract for such material signed manually or as provided in Priorities Regulation No. 7 (§ 944.27) by an official duly authorized for such purposes.

CERTIFICATION

The undersigned purchaser hereby represents to the seller and to the War Production Board that he is entitled to apply or extend the preference ratings indicated opposite the items shown on this purchase order, and that such application or extension is in accordance with Priorities Regulation No. 3, as amended, with the terms of which the undersigned is familiar.

....	....
Name of Purchaser	Address
By......................	....
(Signature and title of duly authorized officer)	Date

(g) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(h) Records. All operators assigned a preference rating by or pursuant to this order shall keep and preserve for two years copies of all purchase orders or contracts applying such rating.

(i) Reports. All operators affected by this order shall execute and file with the War Production Board such reports and questionnaires as the War Production Board shall from time to time prescribe.

(j) Communications. All reports to be filed, and other communications concerning this order, should be addressed to War Production Board, Radio and Radar Division, Washington, D. C. Ref: P-133.

Issued this 4th day of February 1943.

CURTIS E. CALDER,
Director General for Operations.

SCHEDULE A

1. Radio communication, including broadcasting.
2. Sound recording for commercial purposes.
3. Radio direction finding.

EXECUTIVE ENGINEERING COMMITTEE

The following broadcasters make up the membership of the NAB Executive Engineering Committee:

John V. L. Hogan, Chairman, WQXR, New York
E. K. Cohan, CBS, New York, N. Y.
Franklin M. Doolittle, WDRC, Hartford, Conn.
O. B. Hanson, NBC, New York, N. Y.
G. Porter Houston, WCBM, Baltimore, Md.

The Committee held a meeting in New York City on January 27. Included in the discussion were the following subjects: training of replacement operators and technicians, availability of repair facilities for broadcast equipment and components, methods for the recruiting of new technical personnel, servicing of home receivers, consideration of standard coverage recommendations, priority regulations, batteries for farm radios, publicizing NAB recording standards and post war planning.

Much constructive progress was made through policy recommendations and outlining future activity of the Engineering Department.

The full text of this bulletin appears in this issue of the NAB REPORTS. Please route this copy to your Chief Engineer.

RMA TRANSMITTING TUBE CONSERVATION RECOMMENDATIONS

Percentages of rated normal filament voltages to be used under various operating and stand-by conditions to give maximum filament life.

	Operating Conditions		Recommended Stand-by Conditions (% of Normal Operating Voltage)				
Tube Type by Kind of Filament or Cathode	Normal Load Operation	Light Load; May Increase Life	Under 15 Minutes	15 Min. to 2 Hours	2 to 12 Hours	Over 12 Hours	Typical Tube Types
1. Pure Tungsten filament (small and medium types)	100*	Reduce	80	80	off	off	207, 891R
2. Pure Tungsten filament (large types)	100*	Reduce	80	80	80	off	895, 899A, 898
3. Thoriated Tungsten filament (small and medium types)	100	95–100	80	off	off	off	211, 803, 851
4. Thoriated-Tungsten filament (large types)	100	95–100	80	80	off	off	827R, 861
5. Oxide-coated filament (small and medium-gas, vapor)	100	100	100	100	off	off	866A, 872A
6. Oxide-coated filaments or cathodes (large-gas, vapor)	100	100	100	100	100	off	857B, 870A
7. Oxide-coated cathodes (high vacuum)	100	95–100	100	off	off	off	807, 837
8. Oxide-coated filaments (high vacuum, quick heating)	100	95–100	80	off	off	off	1616, 1619, 1624

* Normal load operation may be less than 100% as recommended in instructions.

Note: Recently the NAB Engineering Department asked vacuum tube manufacturers to submit recommendations covering the stand-by operating conditions that would assure the maximum life from transmitting tubes. It was found that differences of opinion existed among the manufacturers and that the problem was further complicated by the variety of tube types to be considered. The manufacturers coordinating through the RMA Transmitting Tube Committee have now released the above standard recommendations.

TUBES REPAIRED WITHOUT PREFERENCE RATING

The radio and radar division of WPB has just released the following interpretation of preference rating order P-133 and general limitation order L-265, insofar as the orders apply to the repairing of vacuum tubes:

"From time to time the question has arisen as to the restrictions of preference rating order P-133 with regard to the repair of vacuum tubes. The limitations and restrictions of P-133 apply only to the extension of ratings under that order.

"Order P-133 prohibits an operator from applying a rating to obtain a new tube as long as he has one spare tube for each active tube socket. *However*, there is no limitation on the number of tubes which may be repaired, or the number of repaired tubes which may be held as spares. It is permissible to repair any tube without the extension of a preference rating. It is also to be noted that if a burned-out tube is to be repaired, it is not necessary, under P-133, to return the old tube to the manufacturer in order to obtain a new tube.

"General limitation order L-265 specifically exempts from its provisions the transfer of electronic equipment for repair, as well as exempting any operations involved in the repair of a specific piece of electronic equipment. Thus, any number of tubes can be repaired without the extension of a preference rating. However, a preference rating under P-133 cannot be extended for the purchase of a new tube unless an operator has in his inventory less than one spare tube per socket."

NEW PREFERENCE RATING IS "AA-2"

Radio broadcasting now has AA-2 rating instead of AA-2X rating assigned last February 14, under P-133.

All other terms of P-133 still apply with one possible exception. This concerns the quantity of material you are now using for maintenance, repair and operating supplies. Quantity cannot be more than that used in 1942. This is covered in paragraph (f) of CMP Reg. 5 (page 238, *NAB Reports*).

In buying materials your new AA-2 preference rating is applied by use of the following certification appearing on order and properly signed:

> "Preference rating AA-2—MRO. The undersigned certifies, subject to the criminal penalties

> for misrepresentation contained in section 35(A) of the United States Criminal Code, that the items covered by this order are required for essential maintenance, repair or operating supplies; that this order is rated and placed in compliance with CMP Regulation No. 5; and that the delivery requested will not result in a violation of the quantity restrictions contained in paragraph (f) of said regulation."

Use form PD-1A for material not obtainable with AA-2. No change in this procedure.

The above is an interpretation of the new regulations obtained from WPB.

NEED TECHNICIANS?

The NAB engineering department has now been recruiting technicians, not presently employed in the broadcast industry, for several months. Several methods of recruiting both men and women for replacement technical positions are now being used. Currently, we are receiving more applications for positions than requests for assistance from broadcast stations.

It is important that these applicants be placed as soon as possible after registering with NAB or they will find employment elsewhere and be lost to the broadcast industry. In order to expedite the placing of these candidiates, a few applicants are being selected from the NAB files to be placed on regional availability lists. These lists will be mailed with the current issue of the *Swap Bulletin* addressed to chief engineers.

Stations in need of replacement technicians should first make every effort to fill vacancies locally. If it is found impossible to obtain the required replacements, stations are invited to write to the NAB Engineering Department for the names of several available persons. NAB has no knowledge of the applicants other than the statements contained in the registration letter and is therefore not in a position to make employment recommendations. The usual employment references should be obtained by direct correspondence with the applicants.

The full text of this bulletin appears in this issue of the NAB REPORTS. Please route this copy to your Chief Engineer.

Broadcast Engineering Bulletin

OCTOBER 22, 1943 ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ No. 3

1760 N St., N.W. NATIONAL ASSOCIATION OF BROADCASTERS WASH. 6, D. C.

New Priority Instructions

As first reported in NAB REPORTS (page 414, October 8, 1943), Preference Rating Order P-133 has been revised by WPB to make it the exclusive controlling order for obtaining maintenance, repair and operating supplies for radio broadcasting. The amendment continues the AA-2, MRO-P-133 symbol and preference rating to broadcast stations.

Recording blanks to be used exclusively for broadcast purposes may be purchased by broadcast stations under the preference rating AA-2, MRO-P-133. Blank discs to be used for purposes other than broadcasting are assigned the preference rating AA-5 by the revised order.

Section (e) (1) is a clarification of tube inventory restrictions. The language of this section has been interpreted to allow the use of these ratings or allotment symbol only if a similar tube has first been operated to failure and the purchaser has in stock less than one new and one rebuilt tube, or two rebuilt spare tubes per active socket.

PART 3289—RADIO AND RADAR

[Preference Rating Order P-133, as Amended Oct. 8, 1943]

ELECTRONIC EQUIPMENT

Section 3289.41 *Preference Rating Order P–133* is hereby amended to read as follows:

§ 3289.41 *Preference Rating Order P–133* —(a) *What this order does.* This is a complete revision of Preference Rating Order P–133. It gives preferences ratings to persons engaged in certain businesses. It also entitles some of them to use the allotment symbol "MRO". The ratings and symbol can be used only to get materials for maintenance, repair and operating supplies; and there are also certain special restrictions set forth in paragraph (e). The businesses, and the ratings and symbol assigned to persons engaged in them are:

(1) Radio communication—AA–1. Persons engaged in this business are also entitled to use the allotment symbol "MRO".

(2) Radio broadcasting—AA–2. Persons engaged in this business are also entitled to use the allotment symbol "MRO".

(3) Sound recording for commercial, educational or industrial purposes—AA–5.

(4) Operation and maintenance of public address, intercommunication, plant sound or other similar electronic systems. such as systems for the controlled distribution of musical programs—AA–5.

(b) *What is meant by maintenance, repair and operating supplies.* These terms include whatever is necessary to keep a person's business property and equipment in sound working condition, or to fix it when it has broken down or is about to break down. They also include those things which are normally used in the day-by-day operation of any of these businesses, being as a rule things which are consumed in use. On the other hand, there are some things which these terms do not include, and to which the benefits of this order do not extend. These are production materials, capitalized repairs, capital equipment, capital replacements, plant expansion, addition of facilities, and the construction and remodeling of buildings.

(c) *Relation of this order to War Production Board regulations and other orders.* This order and all things done under it are subject to the provisions of all applicable regulations and orders of the War Production Board, except that persons who are engaged in the businesses listed in this order to that extent are entitled to none of the benefits, and are subject to none of the restrictions, contained in CMP Regulations No. 5 and No. 5A. Any one using this order should read particularly Priorities Regulation No. 3, which tells how to apply and extend ratings, and which contains a list of things which blanket MRO ratings (such as those assigned by this order) cannot be used to get (Priorities Regulation No. 3, paragraph (f) and List B).

(d) *How to use the ratings and allotment symbol.* (1) Persons entitled to use these ratings and the allotment symbol "MRO" under this order may do so by placing on their purchase orders either the form of certificate provided in Priorities Regulation No. 3, or that provided in CMP Regulation No. 7. In every case those persons entitled under this order to use the allotment symbol "MRO" must place on their purchase orders in addition to the certificate the symbol "MRO–P–133".

(2) Any purchase order for controlled materials which bears such a certificate and symbol is an authorized controlled material order, and on such orders the preference rating should not be shown. The preference rating must, of course, be shown on orders for anything but controlled materials.

(e) *Restrictions on the use of the ratings and allotment symbol.* No person shall use these ratings or allotment symbol:

(1) To buy or to repair a tube unless a similar tube has first been operated to failure, or unless he has in stock less than one new and one rebuilt, or two rebuilt spare tubes for each active tube socket. All power tubes of 250 watts or more (plate dissipation), which have been operated to failure and are not to be repaired, shall be returned to the manufacturer.

(2) To replace in stock any spare parts except parts which are subject to frequent failure or rapid deterioration, or parts which are of such special design that their failure would cause a lengthy interruption of operations unless they could be immediately replaced from stock.

(3) To replace in stock a new part (other than a tube) if the old part can be repaired.

(4) To replace equipment which has not been used within the ratings specified by the manufacturer of the equipment.

(5) To increase the value of a person's inventory of repair parts (not including tubes) above the value of such inventory on October 5, 1942.

(6) To increase a person's inventory of operating supplies (not including tubes) above a ninety-day requirment.

(7) To get aluminum if the use of any other material is practicable, or to get more than five hundred pounds of aluminum in any calendar quarter in any event.

(8) To get materials for the maintenance, repair or operation of equipment for the account of War Emergency Radio Service.

(f) *Persons who service these businesses.* Any person (such as a service repair shop) who does maintenance or repair work for anyone engaged in any of the businesses described in this order may use the rating and symbol to which his customer would be entitled in order to get materials to do that work for his customer. In such a case the restrictions of paragraph (e) apply as to the customer and the customer shall be responsible if they are violated.

(g) *Special rule for international, point-to-point, radio communication carriers.* Any person engaged in international, point-to-point radio communication, as a commercial operation, may use the rating and allotment symbol given by this order to rearrange, modify or expand existing facilities and equipment (but not buildings) either to maintain his regularly established services, or to provide whatever new or modified service may be necessary to render services required by or for the account of the United States Army, the United States Navy, any agency of the United States Government, or any agency of any foreign government.

The cost of materials for any one project undertaken under this paragraph (g) must not exceed $1,500.00, in which case the restrictions of paragraph (e) of this order, and the rules of Conservation Order L–41 shall not apply, and an authorization to begin construction shall not be necessary.

(h) *Penalties for violating this order.* Any person who wilfully violates any provision of this order or falsifies the certificate prescribed in paragraph (d), or who conceals any material information or furnishes false information to any department or agency of the United States is guilty of a crime. If convicted, he may be punished by fine or imprisonment. He may also be deprived of any or all priorities assistance. For example, he may be prohibited from getting, delivering, processing, or using anything which is subject to priority control by the War Production Board.

(i) *How to appeal from any provision of this order.* Any person may appeal for relief from any provision of this order by writing a letter which explains fully what provisions he is appealing from and why he thinks he should be relieved from those provisions so far as they relate to him or his business. He should send this letter with two signed copies to the War Production Board.

(j) *Letters and reports about this order.* Any letters about this order, or any reports which persons subject to this order may be required to file, should be addressed to the War Production Board, Radio and Radar Division, Washington 25, D. C., Ref: P–133.

Issued this 8th day of October 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

General instructions for the purchase of materials in accordance with P-133 as amended October 8, 1943, are as follows:

1. Read Preference Rating Order P-133 as amended October 8, 1943, and become familiar with the provisions of the order.

2. Operate all tubes and parts to absolute failure, before installing replacements, in order to bring inventory within the limits of the order.

3. Hold best spare tubes for last use in the equipment thus minimizing the chance of failure while procuring replacements. In order to check the condition of spare tubes and to insure their immediate availability without conditioning, use all spares not less than one day every three months and not more than one day of each month. This practice is preferable to the rotation of spare tubes on an equal use basis.

4. Immediately upon the failure of tubes which will reduce the spare inventory to less than the maximum permitted, place a purchase order with your supplier. This purchase order should bear the required certification assigning the preference rating AA-2, MRO-P-133. When placing the purchase order request delivery prior to a definite date and ask your supplier to advise you immediately if for any reason the order cannot be filled on or before the required date. If notice is received from supplier that delivery cannot be made by the date specified, immediate *inquiry* should be made to all other known sources of supply concerning their ability to fill the order in accordance with your requirements. If these inquiries result in a satisfactory delivery promise from another supplier, the original order *should be cancelled* and another order placed with the new supplier (WPB Regulation 3, amended June 26, 1942, Section (b), paragraph 3. This regulation forbids duplicate orders.)

5. The following certification form should be placed on all orders:

CERTIFICATION

The undersigned purchaser hereby represents to the seller and to the War Production Board that he is entitled to apply or extend the preference ratings indicated opposite the items shown on this purchase order, and that such application or extension is in accordance with Priorities Regulation No. 3, as amended, with the terms of which the undersigned is familiar.

....
Name of Purchaser Address

By.. ....
(Signature and title of duly authorized officer) Date

6. If after following the procedure outlined in paragraph 4 a satisfactory delivery promise is not obtained, an order should be placed with the supplier offering the best delivery promise. At the same time a 541 form should be filed with the War Production Board, Director of Industry Operations, Washington, D. C. Be sure to furnish all required information, including your purchase order number or the vendor's order number, on the WPB-541 (formerly PD-1A) and outline in the covering letter the substance of your correspondence under paragraph 4.

7. If capital equipment, such as turntables, microphones, amplifiers, monitors, transmitters, antennas, etc., is destroyed by fire, accident or other causes, it is suggested that the problem of obtaining proper authorizations for the replacement of the lost equipment be referred to the regional WPB office for instructions. A directory of regional WPB offices will be found in this issue of NAB Reports and Broadcast Engineering Bulletin No. 3.

8. If your station is actually off the air due to the failure to obtain spare tubes or parts or if the tubes or parts in use (for which no replacements are available) appear to be approaching failure communicate immediately by telephone or telegraph with the WPB Emergency Branch, Washington, D. C. The telephone number is REpublic 7500, extension 75052. This communication should refer to your 541 application, if previously filed.

To avoid confusion, it is suggested that Broadcast Engineering Bulletin No. 1 dated February 5, 1943, be removed from your files and this bulletin substituted. The complete text of the new order as amended October 8, 1943, is printed herewith.

REPAIRED TUBES

Many stations have been able to maintain adequate tube inventories through the use of repaired tubes. When difficulties are encountered in obtaining new tubes (250 watts or more) it may be well to investigate thoroughly the repair facilities now available. A directory of firms engaged in this work will be found in NAB Reports of October 2, 1942, page 580, and October 23, 1942, page 611. If additional information is desired concerning either tube repairing facilities or the dependability of repaired tubes, communicate with the NAB Engineering Department.

"PAT-ON-THE-BACK" BULLETIN

Here Are a Couple of Roses

OFFICE OF PRICE ADMINISTRATION

Mr. Neville Miller, President,
National Association of Broadcasters,
Washington, D. C.

Dear Mr. Miller:

I wish to take this opportunity to express on behalf of the Office of Price Administration and myself the deepest appreciation for the fine public service rendered by your industry during the past few months in helping explain to the American people the essential facts concerning recent rationing programs instituted by this agency.

We in OPA have been faced recently with the problem of implementing complex rationing programs covering footwear, processed foods, and meats and fats. The task of instilling in the American people an understanding of (a) the reasons underlying these programs and (b) the mechanics of their operation has been a difficult one. In certain cases we have had to get information out to every household and to thousands of merchants with a minimum of delay. We turned, of course, to our system of free radio for aid in this important work.

The industry has responded magnificently. You have helped us in three principal ways: (a) Through your regular news broadcasts you have enabled us to get basic information out almost simultaneously; (b) through your commentators you have aided us in dissemination of explanatory material designed to secure wide understanding and acceptance of our programs; and (c) by making available time on your stations for myself and other OPA officials you have made it possible for us to make detailed explanations of OPA problems.

Your cooperation has proved to be a vital factor in the success of these "home front" measures which are related intimately to the winning of the war. For that we in OPA extend to you our grateful thanks and appreciation.

Sincerely yours,

Prentiss M. Brown.

TREASURY DEPARTMENT

April 15, 1943.

Mr. Art Stringer,
National Association of Broadcasters,
1760 N Street N. W.,
Washington, D. C.

Dear Mr. Stringer:

On behalf of the Treasury Department, we want to express to you and all associated with NAB our heartiest thanks for the invaluable cooperation given us in planning and publicizing RADIO DAY to launch the 2nd War Loan.

April 12, 1943 should go down in radio history as the greatest all-out cooperative effort ever accomplished by the industry. The Treasury Department is deeply grateful to the nation's broadcasters who gave so unsparingly of their time and effort to make Radio Day such a tremendous success. Since it is impossible personally to thank the thousands of people who contributed toward the radio launching of the 2nd War Loan, we hope that you will pass on to all your stations our sincere and heartfelt THANKS.

Sincerely

Vincent F. Callahan,
Director of Radio, Press and Advertising.

Marjorie L. Spriggs,
Chief, Radio Section, War Savings Staff.

Third War Loan Bulletin

The Gauntlet Is Down In The Biggest Challenge Ever Given The Broadcasting Industry

New Guinea

This boy got it in the steaming mess that is jungle fighting in New Guinea. All we can do can't touch what this boy has done.

Sicily

Thank God that this isn't one of our homes and one of our children this soldier is carrying out the doorway.

These pictures were printed because they say a lot of things that we broadcasters are taking and have got to take to heart to accept this great challenge:

> **"The Third War Loan Is The Biggest Job Of War Financing Ever Undertaken In One Month In The History Of The World—Are You Equal To It?"**

Some folks think we aren't. Some in the government and elsewhere. They think it's just too big for radio or anyone else. Even the Treasury is only figuring on a 50-50 chance of you or anyone else making the grade. Here It Is:

Name of Campaign: Third War Loan
Starting date: September 9, 1943
Slogan: BACK THE ATTACK—WITH WAR BONDS

Objective: To raise 15 billion dollars to finance the war. All money to be obtained from sources other than commercial banks.

Theme: Invasion. Each person who possibly can do so is asked to buy at least an *extra* $100 Bond during September to back up the men in the armed forces.

Where the money is to come from: Current income and surplus accumulations of funds.

Activate Yourself As Issuing Agencies

The Treasury is issuing 65 million registered certificates for the Third War Loan Drive—a bigger job than the U. S. Census. There aren't nearly enough issuing agencies. Many broadcasting stations have registered as issuing agencies—BUT THEY'RE FALLING DOWN ON THE JOB AND EVEN WITHDRAWING AS SUCH! Let's about face on this thing and help the Treasury as issuing agencies—this is vital—put one or more of your best people on this.

Neville Miller Says—

"In war as in peace, sometimes a ray of sunshine cheers us out of all proportion to the threat of heavy, black clouds all around. There is a little sunshine in our war picture right now, but the storm still rages heavily, with great loss of life and physical destruction still impending.

"We must never forget that our war losses are directly proportionate to our ability to maintain a rapidly expanding, hard hitting military juggernaut. This is a tremendous responsibility. If we falter even for a moment, casualties and new dangers can be traced to our let down.

"The Third War Loan Drive of the United States Treasury is imminent. It calls for fifteen billion dollars to be raised from the people—NOT from banks and other financial centers, but from the people in your block and my block, in the coverage areas of radio stations, in all the streets and farm lands of this nation.

"It will be a challenge not only to radio, but to everyone to meet this goal. Radio has pledged itself anew to do everything possible in furnishing voluntarily time, talent and facilities without stint or qualification, both network and local.

"As a vital artery of communications, radio knows its job. Like the people it serves, radio will keep its eyes fastened to the balance sheet, showing materiel of war in the one column against casualties, defeats and despair in the other. We all know that it will take greater and greater effort to add up to final victory.

"The Third War Loan campaign calls for raising from the public four times the money raised in the last drive. We of radio shall set our sights accordingly and shall not let false optimism diminish our attack until the goal is achieved."

This Is It!

By

Vincent F. Callahan

Director of Advertising, Press and Radio
U. S. Treasury War Savings Staff

The Third War Loan drive to raise fifteen billion dollars in War Bonds, between September 9 and September 30, to finance the war, is the biggest and toughest job which the radio industry ever has had to face.

The success of the Third War Loan drive depends to a great extent upon how well the radio industry realizes the immensity of this challenge.

The radio industry was one of the prime forces behind the spectacular success of the 2nd War Loan Campaign . . . previously the greatest single money-raising campaign in the history of the world.

But, still, there are facts to show that the great April War Loan drive did not reach all of the American people with its message of the great need for more dollars invested in War Bonds.

By the same token, these facts show that there is a great, rich field left uptapped . . . and which must be tapped by radio if the Third War Loan drive is the success it must be.

Here are those facts:

More than one out of every five urbanites did not even know there was a War Loan drive on!

More than three farmers out of ten did not even know there was a War Loan drive on!

Of course, the answer to this situation lies in the hands of the radio industry. The radio is an intimate member of almost every family in America.

What's In the Book

Preliminary reports indicate that the radio industry will make every possible effort to meet successfully the challenge of the Third War Loan Drive. Here is what is in the "book" so far:

During the 22 days beginning September 9 (opening day of the drive), the greatest array of radio programs and personalities ever to go to work on any campaign will hit the airwaves in behalf of the effort to get every person who possibly can to buy at least one extra $100 War Bond.

Through the medium of national commercial and sustaining programs, local station announcements, and national spot programs the radio industry will register at least one and one-half billion listener impressions in behalf of the 3rd War Loan, from September 9 until the drive is finished. This coverage is expected to be at least 25% greater than the radio coverage of the 2nd War Loan.

The estimated total value of time and talent for the programs and announcements on the 3rd War Loan will mount up into the millions of dollars.

Two hundred and fifteen of the bigtime network programs . . . with a listener audience of 600,000,000 . . . will aim messages on the 3rd War Loan during the drive. In essence this amounts to three out of four of the bigtime network programs.

During these programs, radio's favorite stars and their guest stars will make personal appeals on the 3rd War Loan. Also, appeals on bigtime programs will be made by returned veterans of the fighting fronts.

In addition, almost 100% response is expected to the proposal that every big network schedule devote at least one entire program to the 3rd War Loan during the time of the drive.

The Army and the Navy also are marshalling their radio big guns in the armament of the 3rd War Loan. War and Navy Department press relations officers will give coverage on approximately 800 Local Service Programs during the 3rd War Loan.

Amazing as all this national coverage is, still this is not all—not by a long shot. At this moment all four networks are busy devising special programs and events to give complete radio life to the 3rd War Loan . . . and bring home the meaning of this drive to every American. These network special programs and events may take the form of individual network-and-affiliate 'round the clock broadcasts—sparked by personal appeals by radio personalities and war heroes. The tentative plans call for one such 'round the clock special event by each network. And there are plans underway for special pick-ups from the fighting fronts—talks by commentators on the scene of battle and our military leaders. Other programs in the tentative stage are broadcasts from military hospitals, broadcasts from scenes famous in American history.

And these are only a few examples of what is still in the network "hopper" for the 3rd War Loan Drive.

Radio Day

September 9, Radio Day, will explode the message of the 3rd War Loan through the following 'round the clock broadcasting events:

Every radio program slated to carry a Government message on September 9 will plug the 3rd War Loan.

Eighty per cent of the top network programs on this day will be 3rd War Loan programs.

At least twenty-six of the bigtime programs will give special treatment to 3rd War Loan messages—carrying these messages as integrated parts of the program or even basing the entire program on the 3rd War Loan.

All network affiliate stations will carry nine one-minute transcribed dramas or "live" announcements on the 3rd War Loan. All non-network stations will carry 12 one-minute transcribed dramas or "live" announcements on the 3rd War Loan.

The four networks' sustaining programs on September 9 will carry the ball for the 3rd War Loan.

Every local station in the country will devote station break announcements to the 3rd War Loan on Radio Day. In addition, a majority of local stations are planning special events connected with local rallies, speeches by community leaders, other special promotions designed to explode the 3rd War Loan locally with the biggest War Bond bang possible.

Throughout the Drive

Among the big guns in the radio barrage for the 3rd War Loan are the programs of the Treasury Star Parade—the most popular series of transcribed programs ever to go out over the air. Twenty-one Treasury Star Parade programs . . . one a day for the length of the drive . . . have been produced for the 3rd War Loan. Here they are:

Bing Crosby leads off the "Treasury Star Parade" program for the 3rd War Loan Drive as Master of Ceremonies and Singer of the nation's favorites, such as "You'll Never Know" and "Sunday, Monday or Always." John Scott Trotter conducts the orchestra, with The Charioteers and the Music Maids and Phil rounding out this all-musical program.

A visit to the Bumsteads is furnished in the next program called "Blondie Sells Some Bonds" with the radio favorites—Penny Singleton as Blondie and Arthur Lake as Dagwood.

Another comedy in the series is furnished by the beloved Baby Snooks. The "Treasury Star Parade" presents "Baby Snooks and Daddy," starring Fannie Brice and Hanley Stafford.

Comedian Eddie (Rochester) Anderson steps into a stirring dramatic role in "Big Jim" with Michael O'Shea.

Another dramatic presentation is "A Man's Memory" starring Martin Kosleck.

Fibber McGee and Molly add a lighter vein to the "Treasury Star Parade" in a program presented in their own inimitable manner.

The most popular tunes of today are brought to the "Treasury Star Parade" by the most popular orchestra leaders of today. Freddy Martin, Ray Noble, Ted Lewis, Jan Garber, Vaughn Monroe and Tommy Dorsey—all do two or more complete musical programs with their orchestras and individual soloists.

Another feature to be issued from Washington in the 3rd War Loan is the series of transcribed messages made by United States Senators. Radio stations in every state will receive three transcribed 3rd War Loan appeals by each of that state's own U. S. Senators. (Owing to unavoidable circumstances connected with the war it may not have been possible to record both Senators from your state.)

Saturday Night Bandwagon

As the paratroopers in the 3rd War Loan drive there are the Treasury Department's own programs: The Saturday Night Bondwagon, heard over the Mutual Broadcasting System, from 10:15 to 10:45 p. m., EWT, on Saturdays; Tommy Dorsey, heard over the Blue Network, from 12:30 to 12:55 a. m., on Fridays; Horace Heidt, heard over the Blue Network, from 5:00 to 6:00 p. m., on Saturdays; Guy Lombardo, heard over the Mutual Broadcasting System, from 11:30 to 12:00 midnight, on Wednesday.

Every radio station in the country will receive and broadcast an average of 42 one-minute transcribed dramas or "live" announcements weekly in behalf of the 3rd War Loan drive.

And, still in the works are many special events . . . to be arranged and broadcast by the Treasury throughout the length of the campaign, featuring Secretary Morgenthau and other government leaders.

Local Work Is Key

The greatest part of the preceding is the story of the radio industry's national participation in the Third War Loan drive. Such national participation is a credit to the radio industry and, without it, the Third War Loan could not succeed. But, equally important, if not more important, is the **local** picture of radio's cooperation with the Third War Loan Campaign.

> **Without wholehearted, one hundred per cent cooperation by local radio stations the Third War Loan cannot be a success no matter how much radio does on a network scale. The local radio station is the key to all successful local promotion of the Third War Loan drive and the actual sale of War Bonds to the amount of $15,000,000,000.**

What the local radio station can do in the Third War Loan drive is best known to the local radio station manager and the personnel of that radio station—based upon activity in the Second War Loan and activity in the general field of sales promotion. However, it must be emphasized, whatever has been done in the past must be judged as a springboard for doing more not as a "ceiling."

To assist local radio stations in their efforts to make a success of the Third War Loan Drive, the War Finance Division is preparing a special edition of the *Radio News* which will contain ideas and suggestions which originated in the radio industry itself.

Here are the Securities in the Third War Loan

Securities to fit every class and type of investor will be sold to the American people during the Third War Loan campaign opening September 9.

Salient facts about each type of security follow:

United States War Savings Bonds Series E: Now the most widely sold security in America. Known as the People's Bond the Series E War Bonds are issued to meet the needs of the small investor. No one person may buy more than $5000, maturity value ($3750 purchase price), in any one calendar year. For every $3 invested in Series E Bonds you receive $4 at the end of 10 years. They are dated the first day of the month in which payment is received by an authorized issuing agent. Due 10 years from issue date. Interest return: equivalent to 2.9 per cent compounded semiannually, if held to maturity. Denominations: $25, $50, $100, $500, and $1000. Issue price is 75 per cent of maturity value. Owners may redeem bond in whole or part at any time 60 days after issue date without notice at stated redemption values. Cannot be used as collateral for loans.

United States Savings Bonds Series F and G: For larger investors. Series F, issued at a discount, are commonly known as 12-year appreciation bonds. Redeemable at option of owner at increased fixed redemption values. Increase in value represents the interest return, which is approximately 2.53 per cent compounded semi-annually if bonds are held to maturity. Issue price is 74 per cent of maturity value. Issued in $25, $100, $500, $1000, $5000, and $10,000 denominations. Limit on holdings: $100,000 (issue price), of either series or a combination of both F and G, in any one calendar year. **Who may buy:** All classes of purchasers other than commercial banks accepting demand deposits.

Redemption: On first of any month, six months after issue date upon one month's written notice.

Series G Bonds are issued at par. They bear interest at the rate of 2½ per cent a year, the interest being payable semi-annually by Treasury check. They mature 12 years from issue date. They are redeemable prior to maturity at option of owner, at fixed redemption prices, which are less than the face amount of the bonds for interest adjustment purposes. In the matter of who may buy, limit on holdings, and redemptions they are similar to the F Series. Denominations are $100, $500, $1000, $5000, and $10,000.

Treasury Savings Notes of Series C: Issued at par in $1000, $5000, $10,000, $100,000, $500,000, and $1,000,000 denominations. Designed for Federal tax payments and short term investment. Due three years from issue date. Investment yield is 1.07 per cent a year if held to maturity; lesser yield if redeemed for cash or tendered in payment of taxes at earlier dates. May be redeemed at par and accrued interest, after six months from purchase date. May be used as collateral for loans from banking institutions only. May be purchased in unlimited amount by any individual, or bank, corporation or other entity.

Treasury Certificates of Indebtedness: Dated September 15, 1943, due September 1, 1944, paying ⅞ per cent. They will be available for subscription by investors during the entire period of the drive. The certificates will be in denominations of $1000 to $1,000,000 and will be issued in coupon form only. Not open to commercial bank subscription.

Two per cent Treasury Bonds: Dated September 15, 1943, due September 15, 1953, callable September 15, 1951. Available for subscription by investors for the entire period of the drive. These bonds will be in denominations of from $500 to $1,000,000 and will be issued in coupon or registered form at the option of the buyer. Not open to commercial bank subscription.

Twenty-six Year 2½ Per Cent Treasury Bonds: Dated September 15, 1943, due December 15, 1969, callable December 15, 1964. Will be issued in coupon or registered form at the option of the buyer. Commercial banks, which are defined for this purpose as banks accepting demand deposits, will not be permitted to own these bonds until September 15, 1953. There will be no limit to the amount of this issue and no restriction upon the issuance excepting the temporary exclusion of commercial banks from ownership for their own account. The bonds will be sold in denominations of from $500 to $1,000,000.

Morgenthau Letter of August 14, to Every Radio Station Manager

DEAR SIR:

As you know, the Third War Loan Drive starts September 9 and will continue for approximately three weeks. Its purpose is to get more money from the American people than ever before. The goal will be $15 billion, with none of it coming from commercial banks.

During the Second War Loan we had an opportunity to see the important job radio can do; and in expressing the Treasury Department's appreciation at the conclusion of that drive, I stated that the cooperation of the radio broadcasters of the nation was a great factor in the success of the drive. You can see, therefore, why we feel that the success of the Third War Loan depends to some extent upon your cooperation and the cooperation of your organization.

Plans for promoting the Third War Loan Drive through radio have been developed by the Treasury with the help of the Office of War Information and the War Advertising Council; and these groups, as well as ourselves, will appreciate your complete cooperation.

We are hoping that on September 9 all four networks and every individual station will devote the entire day to a round-the-clock selling drive by commercial and sustaining programs. This, as you will recall, was done last April 12 with tremendous success. We hope to have even a greater job done September 9.

We have prepared special material which will be of interest to all cooperating stations in the opening day's promotion, and therefore, we will appreciate hearing from you and would like to know what plans you may have.

Sincerely,

HENRY MORGENTHAU, JR.,
Secretary of the Treasury.

National Association of Broadcasters

1760 N STREET, N. W. ★ ★ ★ ★ ★ ★ ★ WASHINGTON, D. C.

SPECIAL BULLETIN

NAB DISTRICT MEETING REPORT

The series of District Meetings, which opened with the meeting in Philadelphia on October 18 and closed with the meeting in Boston on December 10, was the most successful series ever held. The primary purpose was to discuss war problems and the meetings afforded an excellent opportunity for broadcasters to discuss their problems with representatives of the Army, Navy, Marine Corps, Office of Censorship, Office of War Information, Selective Service, War Manpower Commission, War Production Board, Office of Civilian Defense and Treasury.

Broadcasters gained a clearer understanding of how they can assist constructively in the war effort. Conversely, these government representatives have gotten from broadcasters some understanding of the problems which confront the broadcaster. We are sure the results of these conferences will be very beneficial to all concerned.

On every side we heard expressions of appreciation for the wonderful cooperation given by broadcasters to every government department, campaign and war activity. Broadcasters have made a splendid contribution to the war effort and have reason to be proud of the record they have made.

Conference With Chairman Fly

President Neville Miller, upon his return to Washington on Friday, December 11, paid a personal visit to Chairman James Lawrence Fly of the Federal Communications Commission, to report to him pertinent information collected on the trip. The Chairman expressed great interest in all subjects discussed at the meetings and the manner in which broadcasters were handling the problems created by the war.

The resolution requesting an extension of the restricted operators licenses for the duration of the war and six months thereafter, originally adopted by the 17th District and at all subsequent meetings, was forwarded to Chairman Fly on December 3. A reply reading as follows has been received:

> "This will acknowledge receipt of your letter of December 3, 1942, enclosing a resolution adopted at certain meetings of the National Association of Broadcasters urging that the Commission renew or extend restricted operators' licenses for the duration of the war and six months thereafter without requirement of a comprehensive examination within the presently prescribed six-month period.
>
> "This matter will receive the careful attention of the Commission. As you state,

(Continued on page 2)

it is already under consideration by Committee IV of the Board of War Communications."

RETAIL PROMOTION PLAN

Designed to co-ordinate and implement the efforts of radio stations to sell department stores and retail establishments on the increased use of broadcast advertising, the Retail Promotion Plan was presented to station managers and sales managers at all the district meetings. More than 200 radio stations subscribed, with individual pledges ranging from $25 to $750 based on 1941 income. This response has been very gratifying to the NAB Retail Promotion Committee.

Although some broadcasters have succeeded in developing a substantial volume of business from the retail classification, the industry as a whole has done very little to convince department stores and retail establishments of the possibilities of broadcast advertising. For example, during 1941, department stores spent approximately $240,000,000 in newspaper advertising, while only $5,000,000 was devoted to broadcast advertising. On the other hand, in the field of national advertising, radio leads both magazines and newspapers in volume of business.

The proposed plan does not seek to supplant newspaper advertising with broadcast advertising, but to sell the advantages of broadcast advertising as such. In fact, the presentation points out that the two media can be used in combination with special effectiveness.

The Retail Promotion Plan was conceived after an impartial analysis of the problem had clearly shown that retailers and radio are kept apart because of:

1. A very definite lack of understanding of the retailers' problems on the part of broadcasters.
2. Too little knowledge of the uses of broadcast advertising on the part of retailers.

To meet this situation, the presentation starts with the problems of retailers under wartime conditions and shows how many of these problems can be met by the use of broadcast advertising. Thus, it sets a favorable stage for the presentation of individual radio station recommendations for the use of broadcasting by department stores and retail establishments. As one broadcaster put it: "This is the most forward-looking project the industry has ever undertaken."

Send in your signed pledge now to assure the success of the plan.

ATTENDANCE

The trip to the district meetings covered a period of eight weeks; and those making the entire trip traveled 10,307 miles. The total attendance was 1,485, consisting of owners, and employees of radio stations, representatives of government departments and agencies, others interested in radio. There were 456 stations represented, of which 340 were NAB members, and 116 were non-members. Two charts giving detailed information regarding attendance are on page 4 of this bulletin.

Now would be an excellent time for every broadcaster to consider himself a member of the membership committee and urge non-members in his district to join the NAB.

RADIO PLAQUE

Many broadcasters have expressed a desire to have for display purposes in their studios one of the plaques which was on the speakers table at each District Meeting. The plaque is a reproduction of the pin given to the Convention delegates at Cleveland last May by Station WGAR, and carries the words "Radio in Service of Home and Nation." The cost is $5.00, and the call letters of your station can be added at an additional cost of 10¢ per letter. Send order, with check, to: NAB Headquarters, Washington, D. C.

COMMENT FROM BROADCASTERS ON DISTRICT MEETINGS

"I believe this last NAB District meeting was the finest which has yet been held. We received some worthwhile information and the whole agenda of the meeting moved on at a splendid pace. I heard much favorable comment from others regarding the conduct of the whole affair."

"Frankly, I was very much impressed with the entire meeting. We always learn more about our industry from these meetings. However, I think one of the greatest assets to a broadcaster is the opportunity of talking with other broadcasters. We get a chance to find out what the other fellow is thinking and doing. How business is in other sections. New ideas, etc. However, it seems that we never have enough time left after or before the lengthy meetings to 'shoot the bull' with the fellow broadcasters. It would seem a good idea for NAB to plan for some time to be devoted to just such a purpose. Most of this time is valuable and when the meetings are over the men scatter very quickly to their various stations."

"In reply to your letter of November 21, the recent district meeting at the Ambassador Hotel in Los Angeles happens to be the second NAB meeting that I have attended.

"My reactions to both meetings have been that they were well planned and prepared, that nothing was left undone or unsaid, that they were very constructive in every way and highly inspirational."

"I would like to report that we have always felt that we derived something of advantage from all NAB meetings. It is always helpful for the station managers and sales managers to get together with managers and sales managers of other stations to iron out their individual problems.

"To give you a definite idea of how this recent Pinehurst meeting has been of value to us, I can say that we solved at least three of our many problems by talking to other radio men who had been bothered in the past by the same problems. It is my personal opinion that nothing could be finer for radio, especially for the smaller stations, than these NAB get-togethers which we have had in the past and intend to have in the future."

"I think the meetings were handled extremely well and were packed with good information for anyone in the broadcasting business and gave a fine opportunity to not only learn what is going on nationally but to air the views of our local members and their troubles.

"We sit pretty far out here on the West Coast and things that happen in the East, most things do happen first there, are extremely interesting to me anyway and to have them brought into closer focus by the holding of these meetings makes me very happy. I am only sorry that we cannot have them oftener but realize that is impracticable."

"We wish to inform you that we feel that this meeting was in every way a most successful one and we derived from it much information which will be helpful to us during the coming months. We were particularly favorably impressed by the breakfast meeting at which we were able to discuss informally various problems confronting the individual stations."

"Many matters of importance were presented and discussed informally at these meetings, and I believe much good came from these discussions. It seems as though more and more stations are becoming more interested in the sales problems, and the meeting of the Sales Managers Division was very interesting and helpful.

"The retail clothiers or department store presentation which NAB plans to prepare no doubt will be a wonderful thing for all stations, and we are anxious that a sufficient number of stations are interested to make this presentation possible."

"You asked for it—here it is! The 11th District Meeting was the best meeting ever held.

"Fundamentally, more concrete information pertaining to radio was enjoyed by the Minneapolis broadcasters attending and hob-nobbing with the out-of-town boys, which had never been done heretofore."

"It is my very considered opinion that this meeting was the best Fourth District gathering of broadcasters which it has been my pleasure to attend—and I have attended them all.

"I think the program as arranged was very constructive and made possible certain valuable information during these trying times for all broadcasters."

"I feel that these district meetings are of much advantage to the broadcasters and we came away from the meeting with many helpful suggestions in addition to having had the opportunity to get together with our fellow broadcasters which was in itself a good reason for these meetings."

"I think the meeting which I attended at Pinehurst was exceedingly well master-minded and a model of efficiency as far as the meetings were concerned. No one's time was wasted. It was constructive and completely justifiable even in these days of restricted travel. This was my first. If they're all this good, I hope to attend some more."

"We were fortunate in having three of the members of our organization to attend this meeting and each came back with the idea that radio had a definite part to play in the war effort and also that we were most fortunate in having an association that is interested in the welfare of smaller stations.

"Our commercial manager attended the sales session and came back with some very progressive ideas he had obtained from the speakers in these meetings.

"We always derive a benefit from these association meetings and wish it could be arranged so that we could have two or three meetings each year, especially for the smaller stations, whose problems seem to increase year by year."

It is our purpose to make these meetings of the greatest possible value to the industry. If you have any suggestions regarding the meetings, you are urged to send them to NAB Headquarters.

ANALYSIS OF ATTENDANCE—1942 NAB DISTRICT MEETINGS

OCTOBER 19—DECEMBER 10, 1942

District	NAB Member Stations	NAB Member Stations Represented	Per Cent of NAB Member Stations Represented	Non-Member Stations Attending	Total Stations Present	Government Representatives	Others	Total Attendance

NAB War Conference Bulletin

MARCH 19, 1943 ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ No. 1

1760 N St., N.W. NATIONAL ASSOCIATION OF BROADCASTERS WASH., D.C.

Event: NAB War Conference (21st Annual Membership Meeting, National Association of Broadcasters.)

Dates: Monday, April 26 to Thursday, April 29, 1943.

Place: Palmer House, Chicago, Illinois.

Purpose: To make the grand job radio is doing in the war effort even more effective.

How: By exchanging ideas; discussing ways and means with each other, and with government officials primarily responsible for the conduct of the war; by formulating policies based thereon.

TO THE STATION MANAGER:

The NAB War Conference has every aspect of a military assignment. The maintenance of a well integrated civilian communications system in wartime, keenly alive to Government objectives, is a responsibility of this industry which parallels the production of actual war materials.

Every station manager should give earnest and careful consideration to his attendance and the attendance of his Chief Engineer, Program Director and Sales Manager. Problems affecting these men in the conduct of their departments will be discussed and policies reached. Government or wartime agency representatives will participate in every session.

We cordially invite all broadcasters and networks, members or non-members of NAB, to have comprehensive representation at this War Conference in Chicago, April 27th to 29th, sending those who may contribute something to it and whose instruction will further the war effort.

Neville Miller

PLEASE NOTICE

This NAB War Conference is strictly a business and working session. We are arranging a program that will measurably contribute to better broadcasting in the war effort, and those who attend must come with a determination to get every possible advantage.

All features, including affairs usually arranged at NAB conventions for the entertainment of the wives are eliminated. The banquet is scratched. Any formal social gatherings will be matters of private concern only.

AGENDA

Following is the tentative subject agenda for the Conference:

Speakers' names have been omitted pending confirmation, but we have lined up outstanding war and industry leaders to address us on all phases of radio in the war picture.

MONDAY, APRIL 26

Pre-Conference Day

9:00 A.M. Registration
    10:30 A.M. Program Directors Committee
    10:30 A.M. Sales Managers Committee
    2:00 P.M. NAB Bureau of Copyrights
    2:00 P.M. Public Relations Committee
    2:00 P.M. Research Committee
    2:00 P.M. Engineering and Insurance Committees
    2:30 P.M. Code Committee
    3:00 P.M. Retail Promotion Committee
    4:00 P.M. BMI Board
    7:00 P.M. Accounting Committee
    7:00 P.M. Labor and Wage and Hour Committees
7:00 P.M. NAB Board of Directors Dinner

TUESDAY, APRIL 27

War Manpower and War Materials

9:00 A.M. Registration
10:30 A.M. Manpower
    1. Needs of the Army.
    2. Needs of Industry.
    3. Selective Service.
    4. How to meet the need.
12:45 P.M. Luncheon
2:30 P.M. War and Materials
    1. Operation of stations.
    2. Listeners.
    3. Operations under Fighter Command.
8:00 P.M. (1) The Clear Channel, Regional and Local Groups are offered the opportunity to have meetings at this time
    (2) NAB Women Directors

WEDNESDAY, APRIL 28

8:30 A.M. Breakfast Round Tables
    1. Selective Service and Manpower.
    2. Foreign Language.
    3. Tubes and equipment, gas and tires, listener problems, batteries, receiving sets.
    4. Music.
    5. Radio Management Club of Chicago.
10:30 A.M. Radio Problems and the War
    1. Censorship.
    2. The Government and Programs.
12:45 P.M. Luncheon
2:30 P.M. Sales Problems during War Time
    1. Retail Promotion Committee plan.
    2. Petrillo recording ban.
    3. NAB Annual Meeting.
        a. Election of Directors-at-large.
        b. Vote on by-laws changes.
8:00 P.M. "Sales—A Wartime Necessity"

THURSDAY, APRIL 29

8:30 A.M. Breakfast Round Tables
    1. Censorship.
    2. Training courses—48-Hour Week—Women.
    3. OWI.
    4. Sales Managers.
    5. The Recording Ban.
    6. Legislation and Taxation.
10:30 A.M. Recommended standards for coverage maps
    The role of advertising in wartime—a panel discussion
1:00 P.M. Luncheon

Resolutions and Adjournment of Conference

3:00 P.M. Meeting of New NAB Board of Directors.

A study of this agenda will assist station managements in determining what men from their staffs should attend the War Conference. In order that the fullest possible information and understanding may be brought to each discussion we desire to know at the earliest possible date what men the stations plans to send. TELL US IF YOU ARE COMING YOURSELF, IF YOUR SALES MANAGER, YOUR CHIEF ENGINEER AND PROGRAM DIRECTOR WILL BE THERE.

We want to select some men from each of these fields to assist in preliminary planning and to bring local information to particular problems. Will you cooperate with us by sending this information, together with the names of the various men, just as soon as you can.

Transportation

Travel is heavy. Immediate attention should be given to making train or plane reservations. Be sure to get them both ways.

Certification

NAB will hold its 21st Annual Membership Meeting in conjunction with the War Conference. Directors-at-Large and Network Directors are to be elected. The By-Laws require every active member whose dues are not more than one month in arrears to certify to the Secretary-Treasurer "the owner, a partner, an officer, or an agent, who shall be actively engaged in the business of such member to be its representative in the Association and who shall represent, vote and act for the member in all the affairs of the Association, including the holding of office therein."

With this bulletin is enclosed a certification. Please return it promptly.

Rules Governing Conference Hotel Reservations

1. Requests for hotel reservations may be sent direct to the hotel at which the applicant desires accommodations or to the NAB Housing Committee, 1 North La Salle Street, Chicago, Illinois.

2. The request should set forth in as much detail as possible:

HOTEL RESERVATION FORM

NATIONAL ASSOCIATION OF BROADCASTERS

WAR CONFERENCE

(21st Annual Membership Meeting)

April 26-29, 1943

NOTE: If you want rooms in the Palmer House, send this Reservation Form direct to the Palmer House, Chicago, Illinois. If you prefer some hotel other than the Palmer House, send the Form to NAB Housing Committee, 1 North La Salle Street, Chicago, Illinois, Attention: W. J. Hennessy.

Please reserve accommodations as follows:

..................Room(s) WITH bath for one person each — Room rate desired $.......... to $..........

..................Room(s) WITH bath for two persons each (double bed)) — Room rate desired .... to ....

..................Room(s) WITH bath for two persons each (twin beds) — Room rate desired .... to ....

..................Room suite ( ) WITH parlor — Room rate desired .... to ....
( ) WITHOUT parlor

First Choice Hotel..

Second Choice Hotel..

Third Choice Hotel..

IMPORTANT!!

Chicago hotels desire to serve you efficiently and promptly. You can assist by providing exact information as to the type of accommodation desired; the names of all persons who will be in your party and *most important:* the exact time of arrival.

Room or rooms will be occupied by:

Name	*Company or Business Connection*	*City*	*State*	*Time of Arrival*	
				Date	*Time*

(SEE REVERSE SIDE FOR LIST OF HOTELS)

	ROOMS WITH BATH		
HOTEL	*Single*	*Twin Bedrooms*	*Suites*
Palmer House (Headquarters)...........	$3.85	$6.60	2-Room—$15.40 to $16.50 single
	4.40	7.15	$17.60 to $18.70 double
	4.95	7.70	3-Room—$23.10 to $25.30 single
	5.50	8.80	$27.50 to $29.70 double
	6.05	(For single or double occupancy.)	
	6.60		
	7.70		
	(These rooms have double beds. If occupied by two persons, add $2.20 to each price.)		

	Single	*Double*	*Suites*
Atlantic	$2.75 UP	$3.75 UP	....
Bismarck	3.75 “	5.25 “	$12.00 Up
Blackstone	4.00 “	7.50 “	10.00 “
Drake	4.00 “	7.00 “	12.00 “
Edgewater Beach	4.40 “	6.60 “	11.00 “
Harrison	2.50 “	3.50 “	10.00 “
Knickerbocker	3.50 “	6.00 “	10.00 “
La Salle	3.30 “	4.95 “	7.00 “
Morrison	3.30 “	4.40 “	8.80 “
Sherman	2.75 “	4.40 “	8.80 “
Shoreland	5.00 “	6.00 “	....

a. The type of accommodations desired, rate, single or double occupancy, double or twin beds, etc.

b. The exact date of arrival and if possible, the time; the names of all people for whom reservation is requested.

c. The length of time which the party plans to stay.

d. If the reservation is not made in a firm name or the request written on a firm letterhead, the station or other business with which the reserving parties are affiliated should be given.

3. The Housing Committee and the Palmer House each has a complete list of NAB members. Reservation requests from parties or stations whose names are on this list will be given priority and assignments made in the order of their receipt. Requests from parties or stations not appearing on the membership list will be held in abeyance until April 15, at which time rights of priority will terminate and assignments made in order of their receipt. While NAB members will be given precedence, every effort will be made to suitably and satisfactorily care for the accommodations requested by individuals, firms and radio stations not on this list.

4. If the exact type of accommodations requested are not available in the hotel specified, the NAB Housing Committee or the Palmer House will immediately notify the individual, firm or radio station of that fact and give information as to the type of accommodation available which most nearly meets the specifications. Applicants should bear in mind that no assignments will be made in such cases until a confirmation is sent to the Palmer House or the Housing Committee.

5. Reservations for delegates or persons from member radio stations planning to attend the Conference should be sent in by the station itself and not by a third party. You are urgently requested not to have your station representative or anyone outside your station make a reservation for anyone from your station. This confuses handling of reservations and results in duplication. We ask your cooperation.

For your convenience we enclose a hotel reservation form on the back of which is listed the Chicago hotels which are cooperating with us through the Convention Bureau of the Chicago Association of Commerce. The rates of the various types of accommodations are shown. To facilitate the handling of your reservation request, PLEASE USE THIS FORM.

IF YOU DESIRE ACCOMMODATIONS AT THE PALMER HOUSE, SEND THE FORM DIRECTLY TO THEM; IF AT A HOTEL OTHER THAN THE PALMER HOUSE, SEND IT TO THE NAB HOUSING COMMITTEE, ONE NORTH LASALLE STREET, CHICAGO, ILLINOIS, ATTENTION: W. J. HENNESSY.

Reception Committee

NAB Ninth District Director Edgar Bill has appointed a Reception Committee made up of the following Chicago NAB broadcasters: J. L. Van Volkenburg, WBBM-CBS, Chairman; Harry Kopf, WMAQ; and Edwin R. Borroff, WENR.

From the station staffs in Chicago a number of men and women receptionists will be recruited. Some of these will be at each of the depots to greet you on arrival. Their location will be well identified so that you can easily find them. UPON ARRIVAL YOU ARE URGED TO CONSULT THESE RECEPTIONISTS FOR ANY DESIRED INFORMATION.

Promotional Display

The annual station promotion competition, a feature of NAB conventions, will not be held in connection with the War Conference. However, provision will be made for the display of promotion material issued for sustaining or sponsored war programs. To contribute to the most attractive and orderly display, the following simple rules will govern.

1. Material is to be mounted on board of sufficient weight to be self-supporting.

2. All panels are to be uniform in size—28 inches wide by 44 inches high, composed vertically.

3. Each panel must show the station call letters on the face.

4. All shipments must be made, charges prepaid, in time to arrive not later than Thursday, April 22. Address them to C. E. Arney, Jr., Palmer House, Chicago, Illinois.

5. If you wish the panels returned, pack in a carton or crate which can be opened without dismantling. Return shipments will be made freight collect unless otherwise specified.

Room Assignments

The following message from the Palmer House is self-explanatory:

"For those who are wondering what the hotel situation will be when they arrive in Chicago to attend the NAB War Conference, the Palmer House wishes to say that it will guarantee to deliver on every reservation it makes.

"With travel increased a great deal over other years, we will not be able to guarantee rooms immediately upon arrival but, with planning and cooperation, inconveniences can be kept to a minimum.

"(1) If our reservations show that it is necessary to open a special Registration Desk, we will set one up alongside the Registration Desk on the fourth floor for the convenience of all the members.

"(2) If your room is not ready when you arrive at the meeting, you can attend to other matters and your room assignment will be made during the day.

"(3) Several rooms will be set aside where you can clean up and go into the meeting without delay.

"The hotel suggests that, where possible, all registrants plan their reservation and arrival for the night before the meeting starts.

"Again, the Palmer House guarantees that they will 'deliver' on every reservation that is made, but asks your cooperation and patience if rooms cannot be had immediately on arrival in the morning hours.

"Very truly yours,

Edward T. Lawless,

Vice President & Managing Director"

Associate Members

As announced in last week's NAB Reports, plans have been made to care for associate members. Details and information forms will be sent out shortly.

Pre-Registration

Last year we inaugurated a plan of registering in advance of the opening of the convention. The results were quite satisfactory and speeded up registration considerably. We believe those who registered in advance last year will so testify. We will again offer the opportunity to pre-register for the NAB War Conference.

Within the next few days pre-registration information and forms will be sent to all stations and others concerned.

NAB War Conference Bulletin

APRIL 2, 1943 ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ No. 2

1760 N St., N.W. NATIONAL ASSOCIATION OF BROADCASTERS WASH., D.C.

Event: NAB War Conference (21st Annual Membership Meeting, National Association of Broadcasters.)

Dates: Monday, April 26 to Thursday, April 29, 1943.

Place: Palmer House, Chicago, Illinois.

Purpose: To make the grand job radio is doing in the war effort even more effective.

How: By exchanging ideas; discussing ways and means with each other, and with government officials primarily responsible for the conduct of the war; by formulating policies based thereon.

WAR CONFERENCE

Attendance Instructions

Wartime demands on the transportation facilities of the country are tremendous. Joseph B. Eastman, head of the Office of Defense Transportation, has emphasized the necessity for the most severe curtailment of civilian travel. He has made a plea for voluntary cooperation on the part of all.

We have discussed attendance at our NAB War Conference with officials of the ODT and have agreed to cooperate in discouraging attendance of any but absolutely essential personnel. Broadcasters, associate members and others are cautioned in planning their attendance at the conference and that of staff members, to consider the following questions:

1. Will the persons who go to Chicago contribute constructively to assist the broadcasting industry in more effectively aiding the war effort; or,
2. Will the persons who go to Chicago attend the serious sessions arranged for them and gain a clearer understanding of their responsibility and thus be able to serve more effectively the national interests through radio.

Unless anyone you send fits into one of the above classes, he should not attend. It is intended that this year's conference be limited strictly to those members of the broadcasting industry responsible for its continued functioning in the war program.

It is to be regretted no invitation can be extended to the wives nor are any plans being made for their entertainment for reasons which are most obvious.

Certification Card

Please send in the station representative certification cards as quickly as possible.

Promotional Display Out

After discussing the subject with the Office of Defense Transportation, we have determined to abandon entirely all plans to conduct any kind of a promotion display. Stations are, therefore, requested not to send any material to Chicago and not to expect to see any display of any kind there, except such as may be of purely local origin. We ask your cooperation.

Pre - registration

Take advantage of pre-registration by returning your registration cards with check as soon as possible.

Associate Exhibits

Any Associate Member who had planned an exhibit at Chicago is asked to abandon those plans. The need for conserving transportation space, both express and mail, is so urgent as to justify us in asking you not to exhibit.

Radio In The War

A Report By The War Advertising Council

Following is an excerpt from the speech of Chester LaRoche, director of the War Advertising Council, delivered in New York City, Thursday, May 27, before 150 radio time salesmen. This is "results from radio" testimony which everyone in the industry will be proud to carry in his portfolio.

1. **The Network Allocation Plan**—A statement by OWI says, "From the beginning of our efforts to effect radio coordination it was clearly evident that the large network commercial and sustaining programs offered the best and most easily coordinated facilities for war information."

"Early in 1942, the Advertising Council presented to the Office of Facts and Figures (predecessor agency to the Office of War Information) a plan for systematic allocation of war information on network programs *both sustaining and sponsored*—a plan which received the approval of all networks and network sponsors."

Since April, 1942, 65 different war information subjects have been handled under network allocation plan. In an average week this plan provides 7,500 station broadcasts to a maximum number of 100 million listeners.

2. **The Special Assignment Plan** was created to render personal service to a limited number of established network programs—both sustaining and commercial—which have volunteered to serve the war information effort either full or part time, *over and above* the Network Allocation Plan. Sixty-five commercial network programs are handling war subjects under this plan. Typical illustrations are The Aldrich Family, Fibber McGee and Molly and We the People, which build an entire program around a war theme. In an average week the Special Assignment Plan receives 4,200 station broadcasts to a maximum audience of 100 million listeners. There are fifty-six such programs per week, eight a day—or two daily on each national network.

3. **The National Spot Plan** in an average week is participated in by thirty-six commercially sponsored programs with 800 station broadcasts per week to a maximum listening audience of 10 million.

These three plans for the utilization of commercially sponsored and network sustaining programs reach a maximum listener audience of 210 million per week. Another 44 million weekly listeners are reached through OWI's own programs under three plans:

1. **Station Announcements** — Twelve a day from stations affiliated with one of the four major networks and sixteen a day from each independent station.

2. **Special Features**—The combined networks produce these programs which have to do with general background war information. These programs average 1,500 station broadcasts per week with a maximum listening audience of 15 million.

3. **Station Transcription Plan**—OWI produces and distributes two major transcription programs to 820 stations.

   * A. Uncle Sam — five a week—under commercial sponsorship—on 226 stations.

   B. Other government transcriptions — both serials and one-time topical programs.

The Station Transcription Plan disseminates 8,000 station broadcasts per week to a maximum audience of 4,000,000.

In addition to the 5 types of regular weekly operation, OWI also arranges special events broadcasts and local live programs.

Undoubtedly you all want to know some of the specific results of this great war theme radio campaign. Here are some results of the "action" messages broadcast under the network allocation plan.

RADIO'S "BOX-TOP" RETURNS

Candidates for Marine Officers schools jumped 40 per cent after two weeks on the Network Allocation Plan, June 8 through 21.

"Glider Pilots" was on the Network Allocation Plan for two weeks from July 6 to 20. Up to this time all efforts to recruit glider pilots had failed because the boys wanted to fly motorized planes. At the end of this two-week period, however, 30,000 glider pilots had been turned up, and every CAA school in the country packed to capacity.

---

* Uncle Sam is to be replaced by two 15-minute transcriptions per week. These will use radio's top-flight talent, and because of this cannot be sold to local sponsors.

Coast Guard after a three-week campaign, from July 20 to August 10, increased the number of applications being received for Reserve Officers training at least 40 per cent.

"Army-Navy Nurses" ran for three weeks, from July 27 to August 17. The Army and Navy were calling for 3,000 nurses a month, and it looked as if the pool might soon be exhausted unless new volunteers were secured. At the conclusion of the drive, volunteers were already coming in at 50 per cent above the pre-drive rate. Several weeks after the conclusion of the drive, the number jumped to well over 100 per cent—and in many communities as high as 250 per cent above the pre-drive rate.

Signal Corps drive, August 10 through 23, upped recruits over 800 per cent.

"Army Specialists" ran on the Network Plan from October 5 to 19, and on the Baseball Allocation Plan from September 21 to October 5. By mid-October quotas for these mechanics for three branches of the Army were passed. This was considered a particular achievement, in view of the enormous pressure from industry for this type of skilled technical personnel.

"Non-Combat Pilots" was carried for one week on the Network Plan, beginning November 2. The CAA hoped for 50,000 returns; at the end of the 7-day period a total of 104,000 inquiries was assured.

Don't Travel at Christmas—Breakdown of transportation during Christmas loomed unless civilian travel curtailed. Radio went to work. On many railroads less traveled than last Christmas. Mr. Joseph Eastman reported much-feared breakdown completely averted. And *all* soldiers who wanted to get home got there.

V-Mail—Army and Navy problem—one sack of V-Mail equals 65 sacks of regular mail. Week before campaign one-half million V-Mail letters, during third week of campaign one-and-a-quarter million—116% increase. Today increase is between 150 to 200%.

Shoe Rationing—This campaign was so secret OWI called it the Oyster Campaign. Had to be broken on Sunday at 3:00 P. M. to eliminate run on shoe stores. No Sunday newspapers (all printed Saturday night). Radio had to not only tell consumers they couldn't buy without ration coupons, it also had to tell shoe dealers they couldn't open Monday. Very few instances of dealers not hearing.

Recruitment of War Workers at U. S. Employment Service gained 21% in January over previous month.

No. 2 SPECIAL INFORMATION BULLETIN June 11, 1943

What Radio Is Doing In The War

(This report was given by Walt Dennis, NAB news bureau chief, before the National Conference of Entertainment Industry for War Activities in New York City, June 3-4. The material in it is offered herewith to broadcasters for possible use in their public relations work in their communities, such as in civic club talks, etc.).

When the word radio is used today, it is generally used in a commonplace sense. Of all the miracles of science which have been developed in the last century, radio has been the greatest which we now take for granted. To me radio means power. The power to fashion and mold the minds, lives and emotions of men. It is an instrument of information and entertainment with a potential so vast we should stand in awe of its accomplishments and its future promise.

Some portion of that power and some portion of that future have been revealed during this war—for war is the crucible in which science labors at white heat to fashion the great devices of peace into the weapons of war. Radio has been and is so being used and worked so that when peace again blesses us, radio will step forward to serve mankind in many new ways.

But my purpose today is not to clothe the mystery of radio in the poor raiment of my words, but to talk about the use of radio in the entertainment and information fields and especially its use to those ends in war time.

American radio at war breaks down into three categories—the domestic, the shortwave for overseas and foreign consumption and the technical, such as radar.

In order that you receive my report as I should like to have you receive it, I must tell you that I feel that radio is merely the instrument through which men and women, such as you in the entertainment world, transmit their art to our services and allies here and abroad.

When I think of radio in that sense I think of people working—working hard and selflessly—day and night to do their bit in their way to lighten the burden now resting on the shoulders of those who wear the uniforms of U. S. soldiers, sailors and marines.

And now it is time to talk of you—for you are the people of whom I am thinking. Your work could be translated into columns of statistics about the numbers—the thousands of programs and appearances you have broadcast and made at our camps in this country—the thousands of broadcasts and appearances you have made to the troops overseas, but statistics have always seemed like skeletons to me, clanking around in cold symmetry with no flesh and blood to give them life.

Rather do I see Edgar Bergen and that scamp Charlie McCarthy up in Alaska doing shows—and, yes, doing something else. How many of you know we have a hospital up at Dutch Harbor where battle-shocked soldiers and civilians are being nursed back to sanity? Maybe some of you know what Edgar and Charlie did for one civilian there not long after the Dutch Harbor raid. This unfortunate person would constantly take off his clothes and try to bathe himself—he didn't know who he was—or much else. Charlie and Edgar visited him and did a bit of patter. Months and months of listening to the radio—to Charlie McCarthy—had their effect. Charlie registered. The sick mind snapped back and today the man is well again.

No. 3 SPECIAL INFORMATION BULLETIN June 25, 1943

How To Use Radio

(This report was given by Walt Dennis, NAB news bureau chief, before the New Jersey Federal-State War Conference on Social Protection on the theme "Venereal Disease—Saboteur of War Manpower." The report suggested the methods by which a campaign against venereal disease might be initiated via radio. It is presented to station managers in this form as pre-information of similar conferences to be held in all 47 other states this summer and fall.)

Under the American system of broadcasting, radio is licensed in the "public interest, convenience and necessity." This places every station manager in a position of public trust.

Since the courageous efforts of Doctor Parran to drive the clouds of bigotry and shame from the study of the prevention and cure of venereal diseases have born fruit in the last two decades, we should now dwell on the theory of how it might be possible to use radio as a weapon in conquering these diseases by education.

Public service is implicit in any means whereby the spread of venereal diseases may be stamped out and it is on this point that use of radio revolves.

You have a magnificent precedent in this field in the fact that one of the George Foster Peabody awards in 1942 for outstanding public service was made to radio station KOAC, Corvallis, Oregon, for its presentation of ten broadcasts on the topic "Our Hidden Enemy—Venereal Disease." These broadcasts were made by electrical transcription and originated from Dr. Charles G. Baker, syphologist of the Fayette county health department, Lexington, Ky. Stations WLAP, Lexington, and WHAS, Louisville, also have presented these lectures.

Generally speaking, however, access to a radio station on a matter of this kind is not simple. A station manager must be convinced that the source and authority behind such a campaign is first-rate and carries the eminence of dignified respectability. For, speaking practically, we just cannot ride rough-shod over four centuries of tabus.

Getting down to cases, let us take a community as an example and work out a proposed means of campaigning.

Let us suggest any average metropolitan community. Any such campaign must embrace at least the newspapers and the radio station or stations. There is little point in using any one to the exclusion of others (and in this talk I am assuming that you wish me to tell you how best to use radio and how to obtain its cooperation). Although we know radio can do almost any given job of education or information alone, we also admit that the more media participating the more penetration obtained.

In a campaign against venereal disease—and I am suggesting that any such campaign might resolve into a permanent part of the civic endeavor—indispensable participants are the health agencies, doctors and nurses organizations, medical and health societies and associations and related groups. Highly important supplemental organizations are the churches, the women's clubs, civic and service bodies and all the constructive organized power of a community, including the full resources of the city government.

When this power is organized behind such an endeavor, then a plan of procedure must follow. Most important part of this plan is transmitting its purpose and information to the public through available media—a process sometimes known as publicity and in certain cases as news. In this case it would be both combined under public education.

When these steps have been taken and the plan made definite, then committees should be designed to contact the radio station manager or managers of other media to enlist their cooperation. Such a committee can demonstrate the organization behind their request and display the working plan and material they have assembled.

> *And now to the crux of the discussion—this is the point at which the radio station manager takes charge. He knows radio; he knows how best to present material over his station—he knows who should be able to prepare it and present it most effectively.*

You show him the definite public interest involved—you show him the community organized to do something about it—you show him material and a plan—and he will take care of his end. He may call upon members of the community to serve; in this case he might wish to have an outstanding physician, or head of the city or county health department, make a talk or two—but if I know radio men, he'll do that and plenty more. He will pull out all the stops in his experience and lend the fullest production experience of his station to your purpose.

I have pointed out that precedent has been set. The stations which already have presented material on venereal diseases have received public and official acclaim. No criticism can come from public-spirited listeners on the worth of the fight—some may arise on the manner of its presentation over the radio. And it is here that I must inject a note of caution—do not attempt to impose the judgment of inexperienced but well-meaning nonradio people upon station managements. You certainly would not want a radio station manager to treat a syphilitic patient—nor is it logical to presume that a physician or layman with little or no radio experience can handle such a delicate—and I use the word in the presentation sense—subject on the air waves.

In closing let me summarize—don't send a boy to do a man's job. The fight against venereal disease is not only a clinical one, we also must eradicate forever the hush-hush mantle of shame which has impeded medical progress in this fight for centuries.

Therefore, when you approach a radio management for help, do not do so in the name of a small, but sincere, group which "wants to do something about this"—organize your community and plan the battle as a full-scale offensive. Then the cooperation of media is not only assured, but you will receive the fullest power of that cooperation in all its many phases.

No. 4 SPECIAL INFORMATION BULLETIN July 2, 1943

Public Relations of the Radio Industry

By **JAMES W. IRWIN**

Assistant to the President, Monsanto Chemical Co., St. Louis, Mo.

Address delivered to the Public Relations Committee of NAB, managers of Chicago radio stations and representatives of Chicago NAB Associate Members at the Palmer House, June 23, 1943.

(Additional copies available upon request.)

It is with a feeling of apology that I come before this NAB group today to discuss with you the matter of public relations for the broadcasting industry, because I am in the position of a listener and know very little about the inner workings of present-day radio.

When Mr. Egolf reached me in Milwaukee a week ago to ask me to join with you today he said that an address I had made before a group of industrial executives last March in Edgewater Park, Mississippi, had aroused some interest and it was the desire of your group that I express to you some of my philosophy as it might apply to the radio industry. I assumed, therefore, when I was gathering my notes, that you wanted a frank expression of the way I view the things that affect the operation of your industry, plus whatever constructive suggestions I might be able to toss into the hopper.

It happens that I was one of the original station managers of radio because back in 1922 I handled what little administrative duties there were for Station WGAY, at that time owned and operated by the Wisconsin State Journal at Madison. When I was tendered an opportunity to go on the rim of the Journal's copy desk at $15 a week instead of the $12.50 I was getting as a radio station manager, I decided that radio was only a fad anyway and that there was a greater opportunity in newspaper work. That was my last official contact with the management side of radio, although I have had considerable contact with sponsorship of programs over some of the networks.

Ever since the old crystal-set-earphone days, however, and up until a year or two years ago I had been an avid listener. I organized my social life to make certain that I would not miss such programs as Jack Benny and Bing Crosby. Then a year-or two ago I began to become fed up with the pap that the networks and the individual stations were feeding over the air lanes to the listening public.

I have radios in my cars, on my sleeping porch, in my bedroom, in my study and in my office. It used to be that wherever I was a radio always was playing. I have noticed in the last ten to twelve months that I seldom turn on the car radio, my office radio is turned on only in event of something of great importance, and the house radios seldom come on now except for a purely comedy or escape entertainment program.

I cite all of these things because I think possibly I come as near to being an average radio listener as a great many other people with whom you might consult and because I have heard my associates on my staff and my acquaintances out in the various fields of industry express somewhat the same thoughts.

And if I as an individual with purchasing power and the members of my staff as individuals with purchasing power are becoming fed up with listening to the radio then your industry is approaching a point where it is being weakened as a means of selling institutional good will and product acceptance.

I have the positive feeling in my own mind, and have had this feeling for the last several years, that radio has compromised with its conscience and has not fought back against the efforts of the bureaucrats and the 'do-gooders' to regiment and rule the industry for fear of reprisal in the revocation of station licenses.

I have not admired this attitude on the part of radio. Without referring to any name, I sincerely believe that a certain newspaper, the owners of which I know, supported the third term campaign in return for increased power and fulltime operation.

Over a period of years your industry has lived in fear and trembling of the Federal Communications Commission and the commissioners making it up. I know of one instance, although I cannot recall the date, when Mr. Fly desired to go on the network with some type of a statement, lines were cleared and he was permitted to run over the scheduled time so that the following programs were delayed—a courtesy you would not accord anyone else in the United States other than the President, or a visiting Prime Minister, or someone of equal rank. All of which gives me—and others like me—the feeling that you were afraid of Mr. Fly.

For example, I know that you are worried over the Frankfurter decision, because it so happens that my good friend Merle S. Jones, General Manager of KMOX, had mailed a copy of it to me on June 15, which I found on my return to St. Louis.

I believe that the fact that all three networks give Elmer Davis clear channels once a week impugns the confidence of the public in other commentators who have freedom of action uninfluenced by any apology from a badly run administration. I don't disagree with the policy that the air should be available at any time to give top officials the opportunity to disseminate to the public facts about the war, which the people are paying for. Still, it appears to me that we are getting entirely too near the Goebbels Nazi technique when we have an ordained minister of propaganda who takes every station in the country once a week and shoos every other program off the air; saying, in effect, "You will listen to me or else."

A broadcasting station or network, in my humble opinion, should insist upon the same freedom as newspapers to interpret the news to the public. Davis and the OWI and other departments should be placed in the position of giving a memorandum to the press and radio on a particular subject that they want to put across and leave the treatment or interpretation of such memoranda to the experienced editors and commentators who are on your private payrolls and not on the government payrolls.

I sincerely feel that the radio industry is approaching the point that has been reached by labor, namely, that you turned to government and surrendered some of your prerogative of freedom of action and now find that you have put handicaps on yourselves. Just as labor turned to the administration and obtained organizing support and one-sided legislation and regulations, it now finds the dictatorial attitude of the administration becoming troublesome because the pendulum is swinging the other way, and the public has become so fed up that the administration knows it has to do something to survive.

You might be interested in the reaction of another businessman who long has been a follower of radio, although having no connection with the industry.

His views are expressed in "The Spirit of Enterprise" which is being brought out by Charles Scribner's Sons on July 12. In this book Edgar M. Queeny, who is the Chairman of the Board of the company with which I am associated, said:

"We Americans pay for radio broadcasting by hearing how little tubules secreted under our armpits may frustrate an otherwise promising combination for winning friends and influencing people, or by listening to advice about our kidneys, our hair or our diet. Advertising pays for our broadcasts.

"As each advertiser wants his message to reach the largest number of people, his program of entertainment is designed to please. Elaborate systems of sampling of audiences gauge popularity. Programs with wide audiences remain on the air—others do not pay and are dropped. Hence public acceptance is the only criterion. The American public now gets the kind of broadcasting it wants, good or bad.

"Without advertising revenue, broadcasting stations would fall into the lap of the state. Competition between chains and stations would cease. A bureaucrat would provide the music he thought the people ought to hear and place before the microphone personalities whose views he thought would be good for the people, which, incidentally, would also serve his own vested interest. The American mind would lose its freedom of determining its own music and entertainment, and of choosing its political, economic and spiritual thought. We would lose one of our organs of freedom of speech.

"We would also cease to be the best-informed nation in the world. The cost of producing our magazines and newspapers is met in most part by advertising revenue. With advertising eliminated, much higher prices would have to be charged to maintain present standards. This in turn would force drops in circulation; again prices would have to be increased, which would be followed by another drop in circulation. This descending spiral would finally end in a new balance between a lower standard, a lower circulation and a higher price."

I don't think, however, that your cause is entirely lost, although I think you've got a pretty tough battle ahead.

If I were a radio property owner or an administrative executive of one of the networks I think I would cease compromising with my conscience, buckle on my armor and, at the risk of losing that job and/or my properties, give the administration and the Federal Communications Commission the damndest fight it's ever had. In organizing for that fight I would take some very positive steps because I believe most emphatically that if the radio listening public is given the true facts about the hamstringing and censorship and regulation of the radio industry by the administration for selfish gain, it will get up on its hind legs and scream to the high heavens. Certainly that has happened on a great many occasions when there have been attempts to throttle the free action of the press and silence editors.

It is my studied opinion that the radio industry and the press of the nation have so much in common, and are in such a dangerous position, that now is the time to forget all petty disagreements between the two great industries. Both need to recognize that they are the only two major channels for the dissemination of information to the people that make up this nation and that, therefore, they should bury whatever little hatchets they still use and form a united front.

I know that each of the major networks and a great many of the larger and better-financed stations have qualified public relations executives on their staffs, and I would like to stress here that I mean public relations and not publicity executives engaged in program promotion. It is the duty of these men, one of whom—Frank Mason—happens to be a very good friend of mine, to watch the broad trends of the industry they serve, and the national trend as well, and help guide policy and operating management in the making of decisions that will be to the best interests of the country and the industry.

I do believe, however, that each of the networks or the industry as a whole should also retain outside public relations counsel to give it a broader and more objective viewpoint. I believe that each of the networks should select for election to its board of directors a man who is chief public relations officer of some American industrial organization and pay him a salary as a working director. Then, the man so retained on each network board should serve on an advisory committee on public relations to the National Association of Broadcasters, thus bringing into your picture additional minds who can think a little bit more independently than can those who are so close to your operating problems. On this line some of the more successful railroads have gone to outside directors and, of course, the American Telephone and Telegraph Company has pursued that policy for years and found it very successful, so it is not a new departure.

I think that NAB and its advisory group and its outside public relations counsel should carry on a continuing listener opinion research program under the direction of some able poller of opinion, such as Dr. Claude Robinson, so that its activities in developing public support could be guided by reactions of the listening public.

I believe that radio should very seriously consider a national advertising campaign in which it would use radio as a media and also use daily and weekly newspapers and national magazines, telling the listener public its story and reasons why it must not be throttled. Thus, the public will get the story not only orally but visually. Some members of NAB probably will throw up their hands in horror at the expense involved, but if I am not mistaken, your industry as a whole is decidedly on the profit side and since you are not one-track minded bureaucrats it would pay you well to use all available media in a battle for survival.

Based on a very enjoyable experience I had for several years as a member of the educational advisory group of KMOX in St. Louis I believe that you should develop a grass roots activity by forming in each locality in which there is one or more stations a joint advisory board, the members of which have no formal contact with the radio industry. Such a board would sit with the members of the local radio stations regularly at luncheon or dinner to discuss problems of public relations affecting radio. Such groups should be made up of representative citizens who are leaders in the formation or influence of public opinion and should represent not only the business mind, but the labor mind, the educational mind and the civic activity mind. Granted you would have on such groups all shades of political completion and thinking, still you would have a working group that could go out carrying your spear. It would be an invaluable aid in helping to combat bureaucratic regimentation and development of bureaucratic control by obtaining for you the support of a great many influential groups of whom the 'do-gooders' and long-haired boys and short-haired girls down east live in fear and trembling.

It has been my experience in the last 23 years to have been editor of several rather important newspapers and to have dealt with industrial workers in the capacity of industrial relations officer. That experience leads me to think that many times we underestimate the intelligent thinking of our public. Often, we can be very pleasantly surprised if we take the trouble to carry to that public our problems and the reasons why we should not be subjected to certain types of legislation or regulation.

Your American industrial worker, your American farmer, your American business or professional man still prides himself in the fact that he can tell his boss to go to hell. He can tell the politicians to go to hell by voting against them at the polls at his next opportunity, and instinctively he holds to the belief he has a right to speak his mind as long as his speaking is not subversive.

He will even support an editor he does not like or a paper he hates if an attempt is made by the politicians or some pressure group or other to gag that editor or suppress that publication. He is not so well acquainted with radio, although it probably occupies a stronger position in his household than his newspaper. As a matter of fact, it is well known there are millions of people who have radios who never see a newspaper.

I don't believe your industry alone is being taken for a ride by the apologists for the New Deal and the Fourth Term planners, because I have become completely fed up also with the movies and I know that a great many of my friends and associates feel as I do. Hollywood has sold out to the administration and the propaganda that is being foisted on the American public which has paid its good money to the motion picture theaters is absolutely shameful.

I think that of the three great avenues for information, namely, radio, press and movies, that the press has held on the longest to freedom of action and has not prostituted itself to anywhere near the extent the other two have. I have read a great many newspapers for years and I now read daily not only the three newspapers in St. Louis but also the Chicago Tribune and the Chicago Sun and the New York Times. While I disagree with some of the things each of these papers does, at least there is some semblance of honesty to subscribers in attempting to tell a true story in an independent and free thinking way. Some national magazines, however, have gone down the river and I now do not find much of interest because of the propaganda.

Therefore, I submit these suggestions for whatever help they may be to you. I don't mind saying that I was willing to accept your kind invitation to join with you today on such short notice and to devote a week-end to putting these remarks into tellable form, for a very definite reason. I, as an American, as an officer of an American corporation charged with the responsibility of representing our employes in our policy thinking so that they will be fairly treated and fairly paid, believe strongly that something must be done to halt the bureaucrats from suppressing what little freedom of action there is left in radio, and then obtaining control of the press by ruling out brand names, discouraging advertising, and many other ways that already are visible. I am only too happy to devote some time and what little talent I have in an attempt to arrive with you at a solution of your problem, because I feel that I and the workmen I associate with have just as much at stake in this matter as you have as radio operators.

I realize thoroughly that some of these remarks may bring attempts at reprisal against me by some of the bureaucrats in Washington. But I have always felt that I would rather be purged for fighting for what I believe to be right than taking the easy way, compromising with my conscience and letting the social planners get away with murder by feathering their own nests at the expense of the American people as a whole.

Mr. Egolf did not make it clear to me when we talked this over as to whether there would be time for discussion, but I hope that there is because in discussion we probably can bring out a little bit more clearly my thinking on some of these points.

No. 5 SPECIAL INFORMATION BULLETIN July 16, 1943

WHITE HOUSE PRESS MEETINGS NOW 'PRESS AND RADIO'

(The following exchange of correspondence occurred between Walt Dennis, NAB news bureau chief, and Stephen T. Early, secretary to President Roosevelt. The correspondence is self-explanatory. Station managers are asked to act on paragraph 5 of Dennis' letter by advising their news editors. Similar letters have been sent to James F. Byrnes, Edward R. Stettinius, Harold Ickes, Mrs. Roosevelt, Secretaries Hull, Stimson and Knox, Donald Nelson and Elmer Davis.)

June 29, 1943.

Dear Mr. Early:

This is a small request in a time of big things, but having dealt with you as a newsman in several sections of the country on various occasions I know you will give it your usual generous consideration.

The conferences President Roosevelt holds with newspaper and radio reporters are generally referred to as "press" conferences. This does an injustice to what is now the greatest news medium in the world—radio.

I realize that the word "press" may be considered now to have a general meaning and not apply specifically to newspapers in connection with "press" conferences, but we offer an easy way out—

Substitute the word "news" and you have "news" conference.

The radio industry through our association is being urged to effect this changeover and to edit all copy for broadcasting to read "news" conference or "news" source, or "news" association, etc.

We ask your consideration on this matter and hope to have the favor of your approval so far as the White House official naming of "news" conferences is concerned.

July 1, 1943.

Dear Mr. Dennis:

This is in acknowledgment of your letter of June twenty-ninth. The suggestion that you make is entirely consistent and in principle I am quite willing to go along with you. Accordingly, we will hereafter at the White House designate the President's stated meetings with the news gatherers as "press and radio conferences."

"BUSINESS AT WAR"

Donald Nelson, Elmer Davis, Judge Fred M. Vinson, Marvin Jones and Chester LaRoche Appeal for Advertising's Support of War—Laud Radio

REQUEST WAR MESSAGE IN EVERY ADVERTISEMENT

In a special broadcast to the business leaders and advertising executives of every state, city and community in the nation, prominent government officials, speaking from Washington, D. C., over the facilities of the National Broadcasting Company, 1:15 to 2:00 P. M., EWT, Wednesday, July 14, praised the part business and advertising are playing in the war and pleaded for even greater support with "A War Message in Every Ad."

Preceded by a closed circuit talk on July 6, this broadcast was directed at specially called meetings of luncheon clubs, business groups of all kinds and thousands of individuals, to mobilize advertising as never before on the war front.

Scripts of both the closed circuit talk and the special broadcast are reproduced in full, as follows:

NBC Closed Circuit Talk, July 6, Opened by Frank Mullen, Vice-Pres., National Broadcasting Company

Mr. Mullen: We in radio have long been proud of our public service record. We have recognized that radio, as a democratic institution, can count its progress only in direct proportion to the service it renders to the people of the nation. Throughout the years, we have expanded our program structure in terms of entertainment, education and information. These are the ingredients in our public service formula.

In arranging this closed circuit hookup, the National Broadcasting Company is motivated by a desire to acquaint you with a new opportunity for public service. We have a special message for you today. It is a vital message, not only because it concerns a critical phase of the war effort, but also because it concerns everybody who hears these words, whether he be station manager, salesman, production man or announcer.

We have asked you to gather in this studio today to tell you about a special program that will be broadcast next week—at 1:30 P. M. EWT, Wednesday, July 14. This program may well prove to be a milestone in the organization of our home front. It will also be a milestone in the relationship between government and business. For both of these segments of our democratic system will join forces to help all the citizens on the home front understand better the meaning of total war.

American business, which has already performed production miracles, is rapidly undertaking its second great conversion job—the job of converting its advertising to war needs. The focal point of this contribution to the war program is the War Advertising Council. This was set up immediately after Pearl Harbor to act as liaison between government and business in the development of home front information campaigns. Time does not permit a complete resume of the achievements of this organization, which represents all phases of advertising activity—Advertisers, agencies and the four great media, radio, newspapers, magazines and outdoor. But standing beside me is the man who has been the motivating force in this farsighted activity. He is Chester J. LaRoche, chairman of the War Advertising Council, whose energy and leadership have contributed so much to the Council's success. Mr. LaRoche will give you the details of next week's broadcast and will explain why it is so essential for every advertiser and media representative to participate in this program. Mr. LaRoche:

NAB, through the cooperation of NBC, ordered master recordings made of the broadcast, *"Business at War."* Pressings are available of the complete 45 minute program at a total cost of only $3.00, express collect.

A complete set includes one double-face record and one single-face record, 16", 33 1/3 R.P.M.

$3.00 brings you the complete set, express collect, which you may use locally before civic clubs, for private auditions in your studios, etc. The recordings are not to be re-broadcast.

Order your set today!

CLOSED CIRCUIT TALK
July 6, 1943

Mr. Chester La Roche: Thank you, Frank Mullen, for your generous cooperation in making these facilities available and for your desire to make this a cooperative, united effort of all media, rather than of radio alone.

The purpose of this closed circuit broadcast is to ask those who are listening to *organize* meetings of advertisers—national and local—and agency executives, to listen to a nationwide live broadcast over 138 stations of this network at 1:30 Eastern War Time on Wednesday, July 14th.

The subject of the broadcast will be "The Role of Business in Furnishing the People with Essential War Information." The speakers from the government will be Elmer Davis, Judge Marvin Jones, Donald Nelson and Justice Byrnes.

This broadcast may well be a milestone in the relationship between business and government. Certainly it will represent one of the most important gatherings of business leaders since the outbreak of war.

Why has this July 14th broadcast been arranged?

It is clear that our armed forces can do their job. The momentum of their might increases daily. It is also increasingly clear that our Home Front is sagging. The *certainty* of victory and its *nearness* is threatened, unless we act promptly.

What are we to do? Are we helpless? Must we wait until Washington has settled every policy, has every detail worked out? *No.* Fortunately, there is a greater power than any in Washington. That is the resourcefulness, initiative and will of the people.

Of course, it is important what Washington does about subsidies, inflation and food. The laws and directives that are issued are vital. But no matter what our leaders do, unless the people *understand* and *act*, Democracy cannot go all out in total war. But given understanding, our Democracy can be more efficient than any political organization known.

Tell our people the scope of a problem—the result expected and why—and soon unusual, ingenious solutions come along and the best solution of one is passed along until it often becomes the common method of us all.

What will bring about this understanding?

The speeches of our leaders and the news columns will play their part. But the part advertising can play,—its great responsibility and opportunity,—is not so clearly understood.

Now advertising does not seek to do the complete information job on its own. It should be coordinated with the news. *Both* news and advertising must be used in planned information programs.

But it is the function of the news columns to report. It is the function of advertising to get action; to clarify and interpret; to make readable to masses of people how large social, economic and military problems scale down and touch their daily lives;—to repeat and repeat and inspire until desired actions are taken.

What an opportunity we have to arouse this nation to a mighty wrath, and to finish this war with *amazing speed* and the *minimum loss* of our lives.

Not to understand the part advertising can play in this war job is the equivalent of a military error.

Through the individual actions of many, and through the War Advertising Council, advertising has already done much.

The War Advertising Council is composed of the owners and principals of magazines, radio, outdoor, the country's advertising agencies, and national advertisers. It is sponsored and financed by the following organizations, whose representatives also serve on its board.

Association of National Advertisers
American Association of Advertising Agencies
National (Magazine) Publishers
American Newspaper Publishers
Outdoor Advertising Association
National Association of Broadcasters

It should be made very clear that the War Advertising Council represents no political party, no pressure group, no special interest, no selfish axe-grinders, and it is not concerned with increasing appropriations. Anyone who thinks it seeks to make money for this business is MILLIONS OF DOLLARS WRONG as what follows will show.

The Council renders all services to government *gratis.* With the exception of a staff of ten principals, the work is done by volunteer experts, who donate their time. The council asks nothing and wants nothing except a chance to serve the nation in a field it knows best.

It may be fairly said that the War Advertising Council has placed at the disposal of the Federal Government since the outset of the war the creative talents of the entire advertising field. The government wisely saw that the huge machine advertising had built to serve the ways of *peace* was best qualified to do the *war* information job. The government, in this case, decided not to raise billions and create departments to spend these billions, if the advertising industry would do the job. Let's see what Advertising has done.

Since the start of the war, the public has over-subscribed two great War Loans, has turned in so much scrap metal as to create a huge national stockpile, has planted 2 million Victory gardens, saved and turned over to munition plants 57 million pounds of fats and grease, has volunteered by the hundreds of thousands for part-time work as civilian defense workers, as ration board members, as auxiliary helpers on farms and in food processing plants.

These things have not just happened. They are the result of an enormous amount of hard, tough fact-finding, opinion study and planning. Let me cite a few examples of this planning.

The entire mechanism by which the nation is given war messages over commercial radio programs was worked out by the War Advertising Council in close cooperation with the Office of War Information.

Every line of Washington-released Advertising supporting the Second War Loan was prepared by the War Advertising Council, without its costing the taxpayers a penny either for the creation of the material or the space and time.

To give you a quick idea of how much advertising is already being contributed at no cost to the government, I think you should know that since April 27, 1942, 120 advertisers have contributed time on 202 coast-to-coast network programs every week. On these shows 115 messages are delivered weekly to an average audience of 300,000,000 listeners a week.

On 85 *spot* programs 38 messages are delivered to 9,000,000 listeners weekly.

70 advertisers have contributed, at various times, their *entire shows* to war information projects and without any mention of their own products.

In addition to this national effort, 891 stations broadcast 8,000 messages locally per day.

Combined with the networks' contribution of time and talent for shows, like the Army Hours, This Is Our Enemy, business has made a total *contribution* of $100,000,000 through radio to the government's Information Program.

National Magazines, too, have contributed generously. 444 of them have given one page a month to inspirational messages concerning total war. These 444 magazines will continue to contribute a page a month to the *new campaign* on *inflation* worked out with Justice Byrnes and Judge Vinson, starting in August. Those anti-inflation ads will reach a circulation of 90,000 monthly.

The Newspapers of the country not only helped organize the scrap drive, but have been instrumental in organizing local and national advertisers to contribute toward the Treasury advertising. As an example of the type of support the government is getting, on the recent Second War Loan Drive, the newspapers through their soliciting efforts, secured from advertisers the equivalent of 36,000 full-page ads which ran during a period of three weeks. This was the largest newspaper campaign in the history of our business.

In 1943 it is estimated that 63% of all outdoor posters will be devoted to wartime advertising. Outdoor will contribute 100.000 wall panels and 30,000 twenty-four sheets to the Third War Loan Drive which starts September 9th, at no cost for space to the government, and has a soliciting quota of 20,000 twenty-four sheets to be secured from business firms.

More than 450 advertising agencies have contributed

$4,000,000 of the only thing they have to sell—time and skill.

National and local advertisers have devoted more than $100,000,000 in the past year in magazine and newspaper space to war themes. The drug industry alone devoted $2,000,000 to the sale of war bonds.

The total contribution of all advertising in the past twelve months was at least $250,000,000.

And now twice that amount is needed,—$500,000,000 or one-third of the total of all advertising; twice as much because the job this Fall is easily twice as big.

To help reach this goal, the War Advertising Council is launching a campaign which starts with asking your help to make the July 14th broadcast a well organized, resultful event.

The slogan of this campaign is "A War Message in Every Ad."

In order to make clear exactly what subjects advertising can deal with, our nation's leaders have agreed to participate in the special program on Wednesday, July 14th. These leaders will explain to business men the vital part their advertising can play in creating a better informed army of civilian fighters.

The keynote of next Wednesday's broadcast will be sounded by Justice Byrnes, Director of the Office of War Mobilization, who will tell the business men of this nation and the public at large how important the Home Front is to a successful and quicker completion of the war. Justice Byrnes will explain what the government's responsibilities are and what the people's responsibilities are. He is accustomed to speaking frankly and convincingly. I believe that he will adhere to this pattern next Wednesday.

Elmer Davis, Director of the Office of War Information, will discuss the many new problems that have arisen in connection with his office. He is both aware and appreciative of the help OWI has had from business.

Donald Nelson, Chairman of the War Production Board, whose support and suggestions helped organize the War Advertising Council, will give us the latest news on production, and his plans to keep our economy vital through production of needed things.

Marvin Jones, newly appointed War Administrator, will discuss the subject that directly affects more citizens than any other—food.

All these government spokesmen will make clear that they cannot do their jobs without understanding and help from the public. War advertising can bring that understanding.

What is war advertising? It is not brag advertising—not advertising which simply shows pictures of tanks, ships, planes. War advertising is advertising which interests people through information, understanding or persuasion to take certain action necessary to speedy winning of the war. It is this type of war advertising with which the July 14 broadcast will concern itself.

The July broadcast will obviously be more successful if in the listening audience there is a high percentage of *top management executives* as well as sales and advertising executives. For the most part advertising people are better acquainted with the role of advertising in wartime than are management people. But the story must be impressed upon both, if business is to discharge this public service.

For this reason, it is essential that every ounce of energy be exerted on the part of all media representatives to be certain that the top business men of the nation sit before the loud speakers at 1:30 P. M. Eastern War Time on Wednesday, July 14th.

I strongly urge everyone within the sound of my voice to constitute himself a committee of one to turn out the listenership that we must have if the objectives of this program are to be achieved.

The way to organize listening meetings is a matter for individual or company decision. In the smaller cities possibly the media will get together and arrange joint meetings of their own to which advertisers and agency men will be asked.

In the larger cities, *numbers* will make joint meetings difficult, so it is suggested that each media and each company work out its own method of separate meetings, preferably at luncheon time. There will be overlapping invitations, to be sure. But the advertiser is used to being approached by the different media for a share in his business, so he won't be confused or mind if he gets several invitations to lunch. In the West, the meetings can either be a *late* breakfast or an *early* luncheon. In all cases time should be allowed for discussion as to what follow-up action is suggested by the talks.

You, the members of the Radio Industry and all advertising men, carry a heavy responsibility to see it goes well. You have helped to create this great information machine. In effect, you are the West Pointers and Annapolis men of our information army. The importance and size of the audience of this broadcast is very largely in your hands. On its success depends the first organized attempt to create the fighting Home Front we must have to back up our invading armies.

"BUSINESS AT WAR"

WEDNESDAY, JULY 14, 1943

NATIONAL BROADCASTING COMPANY—1:15–2:00 P.M. EWT

ANNOUNCER: "Business At War" . . . the National Broadcasting Company, in association with the War Advertising Council, invites you to participate in one of the most important business meetings held since the beginning of the war. Gathered before radios and speakers in conference rooms all over the nation, in radio studios, and at special luncheon meetings, are the business leaders of America. In hundreds of communities management, sales, and advertising executives have met to hear this broadcast during which the leading government officials will speak to American business. Elmer Davis, Director of the Office of War Information will open the meeting and introduce the speakers . . . Mr. Davis.

DAVIS: The purpose of this broadcast meeting is to complete the mobilization of American advertising to help win this war. Each of the speakers to be heard on this program is in charge of one or more aspects of the home-front war effort that affect the lives of every citizen. Justice James F. Byrnes, Director of the Office of War Mobilization, who had hoped to be with us, is detained by unavoidable commitments; but you will hear from Judge Fred M. Vinson, the head of the Office of Economic Stabilization; from Donald Nelson, Chairman of the War Production Board; from Marvin Jones, War Food Administrator, and finally from Chester J. La Roche, Chairman of the War Advertising Council.

Now, these operations are very satisfactory beginnings; but the liberation of Europe, the Pacific Islands, and southeast Asia will not be briefly or easily accomplished. We can expect our offensive action to grow swifter and heavier, which means that we shall have to expend larger and larger amounts of material, and suffer heavier casualties. And that means that we need a better organized, more efficient home front.

Our Army and Navy have the tough part of the job, and they are doing all right. But it is up to the rest of us to help them just as much as we can. What the supporting cast of civilian fighters on the home front may do can either hasten the victory, or delay it; but the difference between an earlier and a later victory is worth working for just as hard as we can. Every twenty-four hours the government of the United States spends three hundred million dollars on the war. Shorten the war by one day, you save three hundred million dollars; also, almost certainly, you will save hundreds or thousands of American lives. Every man, woman and child in this country ought to be doing everything we can to shorten the road to victory.

To help attain this objective, some of our war leaders on the civilian front are today outlining some of the urgent problems they face. They are asking that business, through its advertising, help create the public understanding that is essential to whole-hearted cooperation by the people. We know from experience that if the people know what is expected of them, and why, and believe that it makes sense, they will rspond magnificently. But the job of bringing them essential war information, in a war so complex as this, is gigantic. It calls for the use of all the channels of communication—the news and editorial columns of newspapers and magazines; radio broadcasting —and the radio industry has done an immensely valuable job of transmitting war information to the public; the job needs also books, and posters; and it needs the technique that is the voice of American business—advertising.

The Office of War Information is fully aware and deeply appreciative of the help that business has already given us, by contributing advertising space and time for war messages. This would not have been possible without the help of the War Advertising Council—the voluntary, nonprofit organization representing all branches of advertising, which has served so ably and effectively since Pearl Harbor. We in the Office of War Information, who have worked with the Advertising Council ever since our organization was established, can testify to the work it has accomplished; for we have seen the results—results that can be measured.

In telling the people about every one of these home-front projects, the War Advertising Council, the Office of War Information, and the Federal agency or agencies involved have worked as a team; and this team work has resulted in advertising space and time contributions estimated at more than a quarter of a billion dollars during the past year. Yet all this, like our military offensive operations, is just a start. It is clear that our men on the fighting fronts can do their jobs; that is being made plain every day. What is not yet quite so clear is our ability to organize a home front which in energy, morale and fighting power is worthy to be compared with them. In the months ahead, the need for people to do and not to do certain things having a direct bearing on the war will multiply enormously. Every move by every citizen is a factor that will help determine the speed of the victory. The government leaders gathered at this microphone want to explain to the business men of the nation how urgent is this job of getting people to do what must be done, and how business can help enormously, by contributing even more space and time for war messages than heretofore.

Your government has adopted a policy on the use of advertising for war needs that seems to be sound and practicable. We have recognized the need for harnessing this great American force to do the job that all citizens, as well as the government that serves them all, want to get done. Two alternatives presented themselves: the government could either appropriate a huge advertising budget —hundreds of millions of dollars, perhaps a billion, would be necessary to do the job; *or* government could turn to the people who are experts in using the advertising mechanism that already exists, and ask them to assume this responsibility.

We decided against huge government advertising appropriations. We decided in favor of asking business to assume the responsibility of converting its advertising to war themes. And in view of the magnitude of the job ahead, we believe it is important that business should support the War Advertising Council's campaign—"A War Message in Every Ad"—of which you will hear more later.

Now here is Judge Fred M. Vinson, the new director of the Office of Economic Stabilization.

VINSON: On the home front, our deadliest and most insidious enemy is inflation. Inflation threatens the security of the people's savings. It is the mortal foe of every bank deposit, every insurance policy and every war bond.

To the average man and woman, inflation reveals itself in a soaring cost of living. You may rest assured that those associated with me and I will exercise all the powers which we possess to hold this line. If we allow prices and wages to rise, the cost of war will be materially increased. The resulting economic confusion and the bitter struggle among pressure groups which would follow from it, would reduce the effectiveness of our productive effort and cost needless thousands of American lives. Rising prices now mean falling prices later. Inflation in wartime means deflation after the war; and with deflation come panic, bankruptcy, unemployment and financial ruin. To speed the day of victory and to build a solid foundation for a prosperous peace, we must hold the line against inflation.

Here is the situation we face: Total war demands that we strain every nerve to produce the munitions of war. We can meet our production goals only by converting all our available resources to the production of military goods. In order to produce more of the things which the fighting forces need, we must produce less of the goods which we at home are accustomed to use. At the same time, we must put every available man and woman to useful work at longer hours.

The job of stopping inflation is almost unbelievably difficult. In all frankness I must tell you that, up to now, we have not entirely succeeded. Neither have we failed. Between May, 1941, and May, 1942, when the first General Maximum Price Regulation was imposed, the cost of living rose 12%. In the next twelve months, between May, 1942, and May, 1943, the cost of living rose only 7.8%. We did not lost as much ground during the second year as we lost during the first.

But we lost too much, and we cannot afford to lose more. Indeed, we must regain some of the ground we have lost, and that is the purpose of the so-called "rollback" program about which you have heard so much.

Most of the ground we have lost has been in the field of food costs, and we are fighting hard to hold this line. Simpler and more easily enforced ceilings have been placed upon food prices—ceilings which every housewife can understand. These new dollars and cent ceilings, along with the limited use of subsidies, should enable us more nearly to achieve our goal of stabilizing food prices at the level directed by the Congress last October.

In other fields, we have been more successful. Between May, 1942, and May, 1943, the level of rents was actually reduced by 1.7%. Clothing prices, during the same period, rose only 1.3%, despite the fact that during the previous year they had gone up 23%.

The battle is not won, but I believe that the tide is turning. To win, the Government must offer firm and vigorous leadership. You, the people, must also take firm and vigorous action. Those who are fighting inflation can act more firmly and more vigorously if they know that you are backing them in their fight against inflation.

In my job as Economic Stabilization Director, I must lead the fight against inflation. I cannot win without the energetic support of an informed public opinion. For our country's sake, I ask you business men who are listening to me now to make full use of Advertising—that powerful information machine which serves you so well in peacetime—to help secure for us the support which we now must have.

There is not a single battlefront in this struggle against inflation where the support, the understanding and the informed opinion of the American people are not more important than any law or regulation.

There are some who doubt the willingness of our people to accept the hardships and restrictions that total war requires. On this score I have no doubts. But I am not so certain that all of our people have yet been given sufficient information to understand the specific needs and the specific requirements of total war on the home front. I realize that it is difficult, at best, to determine how far a free Government can go in guiding the opinions and the habits of a free people. I realize also that there are many who honestly and sincerely disagree with the Government's anti-inflation policy.

But, regardless of what we do in Washington, it is essential that we have the understanding cooperation of you, the business leaders of this nation.

Perhaps I am a special pleader, but I shall run the risk of being called a special pleader to suggest that, in considering controversial economic questions, we must take special account of the other fellow's difficulties. To hold the cost of living, we must hold wages, prices and profits, and we must impose a heavier burden of taxation. Naturally, therefore, each of us is likely to be slightly more eager to hold down the other fellow's prices, wages or profits, and to raise the other fellow's taxes. Each of us will feel the squeeze of total war, each of us is only human, and each of us will be looking for the moat in the other fellow's eye. Yet, unless we all stand together, there will be little or nothing for any of us. If the American people understand exactly what we are doing and why we are doing it, I am convinced that they will stand together. Our people need to know why they should buy and hold war bonds, why they should pay higher taxes and save more money, why they should abominate black markets and chiselers, buy only what they need, at only ceiling prices, and only, in the case of rationed goods, with ration stamps, and why they should not demand higher prices, higher wages or greater profits.

In large measure, this is an advertising job. Advertising is not a charitable institution—it is the handmaiden of business. And there is no business in this nation so strong that inflation will not work havoc and ruin upon it.

That is why the War Advertising Council has seen the issue so clearly. Cooperating with that Council, almost 450 magazines are going to contribute a full-page advertisement every month. These advertisements will spread information as to what every American citizen can do to help hold the line. It will not cost the Federal Government a single cent.

I am also informed that the insurance companies of the nation are considering a similar major advertising effort. I hope that others will join in the procession. I am making a special plea that you business men everywhere work with the War Advertising Council and the Office of War Information to inform every individual in America how he can help fight inflation. As advertisers, each one of you can, like Paul Revere, warn that inflation is coming unless the American people take up arms against it.

DAVIS: Thank you, Judge Vinson. The Office of War Information is, of course doing all it can to help in this campaign, but the job is so enormous that it needs the help of everyone in a position, as advertisers are, to reach the public eye and ear. Judge Vinson, do you think the job of holding down the cost of living can be done successfully?

VINSON: It can, Mr. Davis—but we can't do the job without the help of every citizen. And we'll get that help to the degree that the people understand the importance of fighting rises in the cost of living, and how they can join in the fight. Advertising can give them that understanding.

DAVIS: Our next speaker is a man who is an expert on the relationship between government and business. He was one of the nation's leading management and merchandising executives when he came to Washington to tackle one of the biggest of all war jobs. As head of the War Production Board, he is perhaps in closer touch with business men than any other leader in Washington. From the outset Mr. Nelson recognized the tremendous importance of war information. He played an important role in the creation of the War Advertising Council.

Mr. Nelson. . . .

NELSON: One of the questions which every American should ask himself these days is this:

"How are we getting on with war production?"

It is about the answer to this question that I want to talk for a few minutes.

Let me make it clear at once that there is no one, quick, glib, easy answer. When talking about a program so complex and so vast as ours, oversimplification is full of hazards, and it is easy to select a few random figures and produce a series of different answers.

Here, for example, are two facts:

> First, we are still behind schedule in our production effort, and we face a really staggering job in the months immediately ahead if we are to meet those schedules.
>
> Second, production in May, as I reported, was not so good, and the preliminary figures for last month, though better, did not show enough improvement to satisfy me.

These are the kinds of facts which give daily, hourly concern to those of us in Washington who are engaged in the production effort. But now, let me give you two other facts that sound a little different:

First, we produced over 7,000 airplanes last month, according to preliminary figures, and that means about 270 every working day, or about ten very hour, around the clock. Compare this 7,000 plane figure for June with the production of 5,000 planes back in January, at the start of the year. The increase in the January-June period for planes is about 40 percent.

Second, our munitions and construction program for last month ran over the $6,000,000,000 mark, compared with an output of only $5,293,000,000 during the first month of the year. And remember that the construction part of this figure is declining according to plan. The munitions figure alone increased about 25 percent during the first half of the year.

Such figures, you see, when considered alone, are likely to give only part of the picture. For the real fact of the matter is that the picture is mixed—production has risen greatly this year; some important items are *on* schedule; other items are *behind* schedule. I might sum up with a paradox and say that, although American industry has done a job which in part is amazing, it is just not nearly amazing enough to suit me, or to suit the high goals we have set. We must do better—a lot better. I cannot say with too much vigor that we have not done enough.

It is true that some problems have been solved and are behind us, such as building the basic plants and factories for war production. But these problems give way to new ones, and we must still struggle over such tough problems as steel production, and airplane building, and petroleum questions, and the job of adequately engineering some of our newer devices of war. Perhaps it will serve to clarify the distinction between the rather creditable job we have done and the harder task that lies ahead if I remind you of what I said last week in an address I gave in Toronto. At that time, I said that the United Nations output this year will probably be nearly three times as high as total Axis production and that some of our production figures for certain important items are almost astronomical. But in that same speech, I went on to say—and I must emphasize it again today:

> "We can clearly see that the hardest part of our job remains ahead, both for our fighting men and for the producers of the home front . . . this is no time to speak of easing up in our efforts. . . . Our production schedules for this year and the next will tax us to the utmost."

All of you who are listening to these figures may wonder what they have to do with the subject of this especially arranged broadcast—advertising and the war. Well, the connection is simple, for advertising is one of the instruments that can be used to get more facts before the people and thereby help the people cooperate on the home front in getting the production job done.

Let me show you why this is true. The War Production Board does not produce airplanes with a magician's wand, nor by waving the big stick of legal power. We get planes, in the final analysis, by the cooperation of the men and women who make them. And the same thing is true all along the line. In case after case, war production succeeds because of the cooperation of *all* the people—not just the people on the production line, but also the people who quietly save tin cans and metal and who join car pools and who insulate their homes to make precious oil go farther and who save waste fats.

I need not list all the many campaigns in which the War Production Board is interested, but I must emphasize that the programs just mentioned, together with such other efforts as industrial safety and the correction of absenteeism, are all extremely important to the winning of the war.

Moreover, every one of these campaigns is a job that cannot be done merely by rules and regulations; every one is a task that can only be done on the basis of willing cooperation—a cooperation given willingly, because the facts have been made clear, and because the cooperators are well informed.

Since the fulfillment of our goals in these fields depends on a free flow of accurate and clear information, it is fitting during this special broadcast to point out that industry's own special medium—advertising—can benefit both the people and the Government by the inclusion of war messages. I have no hesitation in saying that, in my opinion, the well coordinated use of advertising to give the people more facts about the war will mean an earlier victory, faster solutions for our production problems, less bloodshed, and less red tape for industry.

It has already been demonstrated that the American people, once they know what is needed, and why, will do a tremendous job. Think back, for example, to the newspaper scrap salvage campaign, in which the War Advertising Council had a part, when more than 6,000,000 tons of metal were collected. Or recall that just last month, despite the rationing of meats, housewives turned in an estimated 8,000,000 pounds of waste fats and grease. These things came about not by accident, but because the people were informed of the need—and in my opinion no request that we make can be effective unless that request is made clear to the people who must answer the call.

So far on the information front, as in the case of war production, a mixed job has been done. And, frankly speaking, I think that there is also a much bigger job still to be done here in informing the people about the progress of the war and in letting them know *concretely*, how they can help. Industry has converted its tools and machines to war production—yes; but now there is an opportunity for industry to convert its *advertising* to the same goal.

I have a special interest in this kind of conversion—not only because of the immediate help it can give us in solving some of the problems I spoke of, but also because I have been interested in the War Advertising Council since it was created in those days when advertisers and advertising men and magazine and newspaper owners and others came together to make their facilities available to the war effort. Now, because of the continuing and growing problems we face, this kind of cooperation is more important than ever, and we all have an opportunity to make the cooperative effort more effective.

One final note: During the next twenty-four hours, by the middle of the tomorrow, this nation will turn out 270 more airplanes to hurl at the Axis. That is not enough. If everyone in America knew all the issues, knew exactly *what* to do and *how* and *when* to do it, and knew *why*, we might be making 300 or 350 planes a day. We could use them. And one quick way of boosting that production total higher and higher is to complete the conversion of advertising—by putting "A War Message In Every Ad."

DAVIS: One question, Mr. Nelson. Are your WPB problems such that they can best be handled in the so-called mass-media, which carry messages to the general public?

NELSON: Not at all. *Some* of our campaigns require the help of everybody—like car-sharing—but others, like conservation of cutting tools, and the absenteeism, and industrial safety, are particularly good for handling in the business press and trade journals.

DAVIS: Among all our war problems, none strikes home to the average citizen so intimately as does the question of food. Whereas many a war problem may seem remote and abstract, the subject of when, where, and how much do we eat is as personal as breathing. We have had 100 years of thinking in this country behind the point of view that our food supply was inexhaustible. Now, in our first total war, we find that there is a bottom to our food basket just as there is a bottom to everything else.

The men charged with the responsibility of shaping the country's food program is War Food Administrator Marvin Jones. No one knows better than Judge Jones that he faces an educational job of enormous scope, that he must adjust the food producing and eating habits of 130 million Americans to war conditions. Judge Jones, in his first radio broadcast since taking office, will tell you how he sees the picture.

JONES: Today we are announcing the allocations of canned fruits and vegetables for the coming 12 months. Because of increased war demands, civilians will get considerable less canned fruits and somewhat less canned vegetables than average. On Monday we announced allocations of dairy products. Civilians will get less than average of several products including butter, cheese and condensed milk.

Is this because farmers are turning out less? No, far from it! Farm Production is on the increase and new high records have been set in each of the past six years. But war is a very hearty eater. As it increases in size and overseas strength the armed forces require greater quantities of canned fruits and vegetables. Our armed forces and our allies require large amounts of dairy products. To make food fight most effectively civilians are limiting their consumption of foods like these so that these other claims may be met. We are going to try to push production even higher than in the past. The July crop report indicated that farmers have increased their crop acreage by 7 million acres more than in 1942. They have done this in the face of adverse Spring weather and shortages of labor and equipment. Yesterday, we announced a food production program for 1944 that calls for planting the largest acreage of crops ever put in by American farmers.

But great as is our accomplishment in production, we could not last year, we cannot this year or next year produce enough to supply all claimants with all the kinds of food they want. This year, our food stocks are called on to supply the people at home, our armed forces on 60 fighting fronts, our fighting Allies, and the liberated peoples. Still, of our total food supply, three-quarters will be consumed on our home front. All remaining claimants will get one-fourth of our output.

Every group would like to have more than can be apportioned to it. If we can provide more, we can help shorten the war. Therefore, the management of food is a wartime job of top importance. It is a front for all of us. Every one of America's 40 million families has a battle station on the food front.

For example, in peacetime the average American wastes some 380 pounds of food each year. Multiplied by 130 million, this represents almost 50 billion pounds of food thrown out into American garbage pails—enough to supply a large part of our Army and Navy and our Lend-Lease commitments as well. This waste is criminal in wartime and must stop.

As we study the wartime food problem we find there are four pillars upon which our program must be built. First, we must secure maximum production of the needed crops and livestock; second, we must conserve food and use it wisely; third, we must share—share with our armed forces and allies, share fairly among civilians; and fourth, we must change food buying and eating habits as required by wartime circumstances.

We must see to it that our citizens understand the facts about how our food is being used to fight this war. We must engender a new respect for food as a crucial weapon of war and establish a wartime code of food conduct so that every American—whether he be a farmer—producer—a processor or packer—a food distributor or consumer will help make our food fight by doing their best with what's available.

Helping citizens understand and adopt such a wartime code of food conduct is one job on which we are asking the assistance of business, through its advertising. This is one of the vital problems I hope you will think about, as you proceed with the work of putting "A War Message in Every Ad." If you will roll up your sleeves and become partners with us in this task, it is not too much to say you will be helping to shorten the war. For there is not just food at stake; there are the lives of tens of thousands of American fighting men.

DAVIS: We have heard Judge Marvin Jones, War Food Administrator. And before he leaves this microphone, I'd like him to answer one question for me. Judge, am I correct in summing up the points you have just made by saying that as the war progresses and we come closer to final victory, the more all of us may have to tighten our belts?

JONES: That is right, Mr. Davis, but if we can make the best possible use of our food at home and accept calmly and cheerfully the changes and inconveniences in our eating habits, we'll be helping food help win the war.

DAVIS: Our final speaker on this program comes not from government, but from business. He heads a voluntary non-profit organization that enjoys a semi-official status in Washington—the War Advertising Council. This group of earnest, public-spirited business men is one of which American business may well be proud. They have been serving the interest of the war unselfishly, almost before the echo of Pearl Harbor died away. I, for one, think the work of the War Advertising Council typifies in the best sense the teamwork between government and business with the common aim of winning the war. Here is Mr. Chester J. LaRoche, Chairman of the War Advertising Council.

CHESTER J. LAROCHE: As Mr. Davis and the previous speakers have recognized, we have, in this nation, channels of communication unmatched anywhere in the world. Through the combination of news and advertising—news to report, advertising to inform and persuade—we can reach the eyes, ears, and hearts of 130 million Americans. We can secure a degree of unity, understanding and fervor which can help us end more quickly the waste and slaughter of war.

The organization formed by business to harness the great power of advertising to the war is the War Advertising Council. The War Advertising Council is a peculiarly American organization. I know of no other country where such a group could be brought together, or so much combined power could be geared to an entirely unselfish purpose. The Council is composed of owners and principals of magazines, newspapers, radio, outdoor, printing and direct mail, the country's advertising agencies, and the great industrialists who use advertising.

I want to emphasize here that the War Advertising Council has no selfish axe to grind. It is a business group representing no political party, and no pressure groups. Anyone who thinks it seeks to make money for the advertising business is wrong—*millions of dollars* wrong—as the following facts will show:

The advertising agencies of the country—the people who have written the Washington-released advertising on war bonds, scrap, black markets, etc.—have contributed more than four million dollars worth of the only thing they have to sell—their time and skill. Radio advertisers and the radio industry have contributed $100,000,000 worth of time and talent during the past year to promote war messages. 440 magazines have been contributing at least one page of space a month for a campaign on total war. The newspapers of the country during the Second War Loan drive organized the contribution of 36,000 full pages of advertising, 25% of which they contributed themselves. 63 per cent of all outdoor posters are devoted to war messages. The car-card industry contributed 100,000 units of space monthly for war messages. In addition to their contribution on radio, national and local advertisers have contributed more than $100,000,000 worth of space in magazines and newspapers. The drug industry alone is devoting $2,000,000 for a special war bond drive.

The total contribution of the entire advertising field in the past 12 months was at least $250,000,000.

And now *twice* that amount, or $500,000,000 worth of space and time—is needed. Twice as much because the job ahead is twice as big. $500,000,000 is roughly one-third the total annual amount of all advertising expenditures.

Our goal for the coming year is therefore two-fold:

First, one-third of all advertising space devoted exclusively to war messages.

Second, a war message in *every* ad.

As an advertiser this means that *some* of your space should be devoted entirely to war messages, and *all* of your space should *contain* a war message.

In other words, because your ad devotes most of its space to a product is no reason why a war message cannot also be included. A lot of information can be packed into a few paragraphs.

Let me say right here that this proposal does not in any way conflict with the radio network allocation plan or the various other radio allocation plans of the Office of War Information. These need supplementing, not disrupting.

One-third of all space devoted *exclusively* to war advertising. And a war message in *every* ad. If these two goals are realized, the cumulative power behind war messages will penetrate into every community and every home in the land. Understanding will replace uncertainty. There will be no room for indifference and life-as-usual. No longer will one-half the population say about the other half, "They don't know there's a war on."

Nor is this a program for national advertisers alone. The biggest percentage of advertising is local advertising. Dislocations in life and living strike into every community. Our great national problems are merely the sum of hundreds of thousands of local problems.

This is why local advertising media and local business men should arrange pools of space or money large enough to cover the local war advertising needs for the next six months. Such cities as Houston, Cleveland, Louisville, Portland, Hartford have already done this. No community in this country can fairly say that it is doing its war job until its is similarly organized.

During these talks, you have heard many references to "war advertising." When we speak of war advertising, exactly what do we mean?

We do not mean advertising that simply shows pictures of planes or tanks or guns. Everybody knows we're at war—it is eighteen months since Pearl Harbor. Is war advertising that which tells how a company's products are helping win the war? Generally no. It certainly is not if it doesn't help get action by the people. In the midst of a struggle for survival, while American boys are dying by the thousands, blatant brag advertising is in questionable taste.

By war advertising we mean advertising which induces people, through information, understanding or persuasion, to take certain actions necessary to the speedy winning of the war.

War advertising follows agreed-upon themes. As every advertising man knows, best results are achieved when all advertising on a given subject adopts the same approach, tells more or less the same story, makes more or less the same appeals.

These official campaigns are all things that virtually anyone would agree need doing. They have nothing to do with *politics;* they have a lot to do with winning the war.

What are some of these official campaigns? In the months ahead we will be called upon to help recruit housewives by the millions to leave their kitchens for the jobs men left behind, we will have to persuade millions to help harvest the food, can and process it, see that it is shared; we will have to persuade Americans to eat nutritious foods, to shun black markets, to understand the overall food picture; we will have to recruit part-time volunteers by the hundreds of thousands for rationing boards, Civilian Defense Councils, Army ground observers or spotters; we will have to help get our people to buy more and more war bonds, to spend less; they will have to learn to conserve—to eat it up, wear it out, make it do. We will be called upon to quicken public responsibility to stay on jobs every working minute, to work harder, without grumbling. We will need to make the meaning of the war clearer, to curb disunity, to halt loose talk, to de-bunk rumors. These are the action messages which badly need consistent mass circulation.

The War Advertising Council and the Office of War Information are ready and eager to assist advertisers in the development of war theme advertising. Many of you will receive shortly a booklet entitled "A War Message in Every Ad" which will, we hope, enable you to make an immediate start on advertising that is really "converted for war." If you wish further information on any war campaign, get in touch either with OWI in Washington or the War Advertising Council, 60 East 42nd Street, New York City.

On the other side of the world, our invasions have now begun. During the hard months to come, American boys from your home town and mine will fight and die on foreign soil. As they endure suffering and hardships that put our petty inconveniences to shame, we who stay at home—if we have a spark of conscience—must form a solid front line behind them.

There must be an end to bickering, petty jealousies, suspicion of one group of Americans for another. At this time, of all times, we must have unity. That is why this group of war leaders have taken time from their busy lives to speak to you today. We can achieve that unity, provided only that our people understand clearly what must be done, and why.

What will an invading soldier see as he looks to his homeland? Will he see a nation aroused—effective in action? Upon what he sees depends in no small part his morale. And upon his morale, his fighting spirit, depends our way of life.

DAVIS: Thank you, Mr. LaRoche.

ANNOUNCER: (WASHINGTON—WRC) The National Broadcasting Company in association with the War Advertising Council has presented a special program broadcast as a meeting between American business and the United States Government. The speakers included Judge Fred M. Vinson, Director of the Office of Economic Stabilization; Donald Nelson, Chairman of the War Production Board; Marvin Jones, War Food Administrator; Elmer Davis, Director of the Office of War Information, and Chester J. LaRoche, Chairman of the War Advertising Council. This program came to you from Washington. This is the National Broadcasting Company.

The National Association of Broadcasters

No. 7 SPECIAL INFORMATION BULLETIN July 23, 1943

Labor Transcriptions

Transcriptions offered to stations at commercial rates by the United Automobile Workers and CIO necessitates consideration of the NAB Code of Ethics, with respect to the following provisions:

Controversial Public Issues

"As part of their public service, networks and stations shall provide time for the presentation of public questions including those of controversial nature. Such time shall be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the questions to be presented. Broadcasters shall use their best efforts to allot such time with fairness to all elements in a given controversy.

"Time for the presentation of controversial issues shall not be sold, except for political broadcasts. There are three fundamental reasons for this refusal to sell time for public discussion and, in its stead, providing time for it without charge. First, it is a public duty of broadcasters to bring such discussion to the radio audience regardless of the willingness of others to pay for it. Second, should time be sold for the discussion of controversial issues, it would have to be sold, in fairness, to all with the ability and desire to buy at any given time. Consequently, all possibility of regulating the amount of discussion on the air in proportion to other elements of properly balanced programming or of allotting the available periods with due regard to listener interest in the topics to be discussed would be surrendered. Third, and by far the most important, should time be sold for the discussion of controversial public issues and for the propagation of the views of individuals or groups, a powerful public forum would inevitably gravitate almost wholly into the hands of those with the greater means to buy it.

"The political broadcasts excepted above are any broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot. This exception is made because at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away.

"Nothing in the prohibition against selling time for the presentation of controversial issues shall be interpreted as barring sponsorship of the public forum type of program when such a program is regularly presented as a series of fair-sided discussions of public issues and when control of the fairness of the program rests wholly with the broadcasting station or network."

Manifestly any movement to influence public opinion on the subject of the actions of Congress is not "broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot." Therefore broadcasts of this nature should not be classed as political under the Code, nor should they be presented on paid time.

Station management should accept the responsibility of considering this matter as a controversial issue and allot time to both sides or schedule it on a public forum broadcast, if consistent with the public interest.

WILLARD D. EGOLF,
Assistant to the President and
Acting Secretary to the Code
Compliance Committee

United States Radio, War and Post-War

By Paul Hollister

(Vice President, Columbia Broadcasting System)

(This speech was given by Mr. Hollister before the St. Louis Advertising Club and contains information which may be of use to station managers in their public relations work.)

The safe guide to the direction of post-war radio is a projection of the trends and techniques of the past and present. The intelligent layman's guess is likely to be as accurate as the research professional's, provided the layman accepts the potentials and limitations of finite radio engineering, and the professional researcher accepts the no less realistic but far less finite potentials and limitations of human nature, human relations and consumer reactions.

So your reporter in this series of post-war weather forecasts will not do much flapping around in prediction of specific facilities and services which radio will provide after the war has ended. To be sure, television (still around that corner) is within easy reach of production and actual broadcasting . . . but it will not serve widely unless it provides a form of entertainment, of instruction, of cultural and spiritual resort equivalent in quality at least to the standard of service provided by the invisible air today. A logical community of interest seems to be appearing over the horizon between the industry that knows best how to make pictures and the industry that knows best how to broadcast sound waves. Again, it is self-evident that another contrivance, called "radar," will serve the mass public in many and interesting ways—ways which cannot be described without telling the present enemy a lot of things he'd like to know about how radar is seeking him out and knocking him off. It ought not to take very long to put on the market improvements likewise in receiving sets of all sorts. Any engineer in radio can tell you some pretty sensational stories about other superhuman mechanisms that will perfect the services of broadcasting. Your speaker today is no engineer. He is no prophet. Instead of the road of forecast, marked "Passable But Unsafe," he chooses the conventional graded highway in spite of occasional signs reading "Beware of Falling Rocks." He asks you simply to look back down the long steep grade up which radio has come so far, to observe the gradings and turns, and to guess with him what the general direction of radio's further progress upward may be.

Asks 'Modern' Radio Law

Constructive changes . . . that is, changes in the interest of most of the people, will not come abruptly. Restrictive changes, in the disinterest of the majority of the public, may come unwarned at any time through the capricious application of bureaucratic power, and further restriction of that freedom of speech upon which press and radio base inseparably and wholly. Let us assume that such lightning will not strike, though that is certainly an optimistic assumption until Congress passes a modern and equitable radio law. Let us concern ourselves not at all with the electrical gadgets under cover today. Let's take a glimpse of that path that radio has come to date.

Remember that public-serving radio, serving most of the people most of the time, is only about 20 years old. In that short span some 31,000,000 American families have come to depend enormously upon the 900 free radio stations and upon the American "fair-bargain" method of advertising goods and services over those stations so profitably as to furnish a fabulous daily total of entertainment, instruction and culture without "admission fee" to all who care to listen in our nation. In 20 years American free enterprise has built a radio system which cannot be degraded to the position of mouthpiece for any administration, any pressure group. During those same 20 years there broke upon our people the greatest of all wars in the history of our self-preservation, and for the first time there was ready for instant use a means of communication to all the people.

Less than 24 hours after the Japanese attack on Pearl Harbor, President Roosevelt spoke not only to the assembled Houses and the press and the representatives of the foreign nations, but to some 63,000,000 rank-and-file American listeners. He was heard abroad, too. He was heard in Berlin and Rome and Tokio. The next evening he spoke again from the White House and some 70 million Americans listened. Thus within a couple of days of actual war, the people of our nation got their marching orders from the heard voice of their commander-in-chief. And from that voice the peoples of the world knew exactly where the United States of America stood.

No Radio 'Retooling' Necessary

From the moment the first news flashes from Pearl Harbor broke into that Sunday radio program on December 7, 1941, the full force of American radio swung into war action. No retooling was necessary. There isn't much question that radio's swift distribution of every flicker of developing war news made the American people the best-informed, as well as the largest, company of freemen on earth concerning the immediate fortunes and hazards of their country suddenly plunged into war.

Now at the risk of trying your patience with numbers, I propose to make that statement specific . . . for upon its proof will base your own easy projection of where radio is to go when peace comes. I shall now report to you certain war-time accomplishments of radio broadcasting, as these accomplishments are reflected from the records of a single network (CBS).

This report will take us from Pearl Harbor Day down through March 30, 1943 (the latest date of summary record), and it will go outside the CBS records to cite certain totals of joint accomplishment in radio by the Advertising Council and the Radio Division of the Office of War Information. The only reason why the records of all four major networks are not included is because they are not available to this reporter. The totals run up by the single network which I shall recite are impressive enough alone; they are typical, I believe, of the pattern of activity followed on the other three networks; let their moral, therefore, be multiplied by four.

To the least of the 900-odd stations in the United States, radio volunteered, and to the least of the thousands of national and local advertisers using radio, their services were instantly placed at the disposal of the single common cause.

They sprayed the air morning, noon and night with a volume and variety of war information which no nation before had ever received in such proportion to its diverse and gigantic need. Quality and finesse and subtlety had to stand aside for quantity, for when a dam breaks it is common sense to block the flood before you try to purify the water upstream. No use to quibble now, or any time in the future, unless you're an academic historian, a professional dilletante, or a disgruntled politician, as to whether there was during those first months of radio, too much, or too little, on the air, for the average shocked mind to absorb and to react to.

Radio Converts National Mood

One result is plain: never before had the *mood* of so large a democracy been so swiftly converted to a war footing, pointed in the direction of its most effective volunteer war behavior, or stimulated to project its volunteer tradition to greater result.

Out of the fog of mobilization, certain forces began to loom clear: (1) In government the departments and usable agencies most directly concerned with war, and with total civilian support of it based on the complete dissemination of essential war information. (2) In civilian life, the 900-odd radio stations who provide 31,000,000 of the 34,000,000 homes in America with constant free radio-listening of all sorts. (3) In civilian life too, the thousands of manufacturers and stores and services who alone implement the radio industry with the funds for providing broadcasting. The major problem became (and it is today much the same problem multiplied) one simply of collecting the information, sorting it, putting it into the best form to broadcast, persuading the network or station or advertiser to pay for it and putting it out on the air . . . and thus getting the information to the people.

The Office of Facts and Figures took over the Herculean job of bringing some sort of orderly flow into this torrent. The Office of War Information took over from the OFF, improved on its methods, staffed it with people somewhat more seasoned to their technical tasks (in its domestic radio division in particular) and produced a strikingly heavy and smooth flow of traffic in clearing the information output of 30 separate Government agencies (and two quasi-governmental agencies, the National War Fund and the Red Cross) to the total of the people.

Now to bring that flow down to realistic figures, let us see how war information of all sorts actually went to the American people over the CBS network alone during the period December 7, 1941, to March 31, 1943—a total of 480 war days.

CBS Is Active

CBS broadcast during that period a total of 11,880 programs containing war matter.

These 11,880 separate programs treated 16,055 war "items."

These 11,880 CBS programs used 2,165 hours 42 minutes of radio time, donated wholly by the network or the advertiser.

In addition to these 11,880 programs, CBS broadcast 6,221 programs of war *news*.

The grand total of *war broadcasts* of this single network, therefore, was (during this period), 18,101; they treated of 22,276 war items; they used 3,349 hours 39 minutes of broadcasting time, for which Government paid not one penny.

Of these 18,101 war programs, 9,272 were bought and paid for and volunteered to the war-effort by advertisers.

The remaining 8,829 war programs were bought and paid for and volunteered by the network . . . that is, they were sustaining programs.

Now to sharpen the focus of the effect of this upon the morale of the American people, let us take a cross-section . . . an average day . . . during this period, on this one network:

During an average, typical day . . .

12 times the audience heard a sustaining war-program.

22 times the audience heard a war program volunteered by an advertiser.

8 times the audience heard also a sustaining war *news* program.

5 times the audience heard also a sponsored war *news* program.

Thus . . .

47 times a day the radio audience of this single network heard war information.

What's more, the total of *war information* broadcast during an average CBS day was 37.6% of the entire broadcasting clock of the day.

Exclusive of war *news*, 91 different major war topics were treated in the subject matter of the program itself during the first 480 days of the war. In addition, seventy war topics were handled via straight war announcements. In all, CBS broadcasts aided 99 mutually exclusive major war campaigns during this period.

No man who has the faintest knowledge of the dependence of the American public upon radio, and who knows that the average family listening reflects that dependence by using its radio over 4 hours a day, can sneer at the power that radio has used with self-discipline and forthright patriotism since we went to war. It is important to bear in mind that the OFF and the OWI have never deviated from their basic policy of **guided voluntary effort.** It is equally important to recognize that the voluntary response was forthcoming to a degree no prophet could have foretold.

Now let us open the diaphram of our lens so as to get a picture, if we can, of the combined war effort of *all* the networks and *all* the individual stations, as those records come off the diary of the Office of War Information.

OWI receives its broadcastable material from 32 government agencies. It sorts this inflow into eight classes, or eight different methods of most suitable *treatment*. Out of OWI, to the networks and stations and agencies and advertisers, these eight great "pipe-lines" carry the war information to the radio transmitters, where it is broadcast incessantly to all America.

Public Gets the Low-Down

Through this "processing and clearing" technique, the U. S. radio public receives (according to the circulation estimates of the OWI itself) during each average week:

74,450 station war-information broadcasts.

It is the OWI's reasonable calculation that these broadcasts amass a total of Listener-Impressions each week amounting to 474,800,000.

Huge as that figure is, if you divide it by total population, it provides no more than the exposure of the total of the American people about four times a week to a war message. Maybe it's not "too much," but really little after all. This is a 7-day war, isn't it? I haven't heard that the men in uniform get three days off each week.

The plan for sorting and clearing this mass of war information is the joint development of the OWI and the Advertising Council; it isn't any more complex than an International Business Machine, but like that machine it sorts out, adds up, and works. Here's a typical week's schedule broadcasting during March, 1943; the estimate of Listener-Impressions is OWI's own, and it must be noted that the OWI confesses that "these figures cannot possibly take into account the spontaneous efforts by *commercial* programs which we cannot always trace." But look at that typical week:

WAR BONDS got	165,320,000	(Listener
MEAT RATIONING	154,960,000	Impressions)
U. S. CROP CORPS	132,750,000	
WAAC RECRUITING	94,820,000	
VICTORY GARDENS	44,960,000	
SOCIAL SECURITY CARDS	44,960,000	
RED CROSS	42,800,000	
HOME FORCES	23,210,000	
UNITED NATIONS	19,450,000	
FIGHTING FORCES	16,570,000	
WORKING FORCES	11,680,000	
THE ENEMY	9,530,000	
WOMANPOWER WAR JOBS	9,000,000	
LEND LEASE	4,800,000	
POST WAR WORLD	2,910,000	

The mass of voluntary war-information broadcasting adds up to a large sum of hard money.

87 Millions Donated

"Broadcasting" (the magazine) on March 29, 1943, estimated the time volunteered by networks, stations and advertisers to programs cleared through OWI, at $71,570,000 at card rates and best discounts; the talent donated at $15,330,000; the total contribution for a single year of war broadcasting under the OWI-Council plan of clearance at $86,900,000.

The actual out-of-pocket is considerably more than that figure today. One little item in the calculation worth noting is that the total of U. S. radio stations were estimated to broadcast 400,000 quarter-hour Government transcriptions in a year . . . an out-of-pocket of some $7,740,000 for those stations themselves.

It is impossible to do more than hit the high spots of results. The intangibles are brilliantly apparent to everyone who has the eyes to observe. But some of the tangibles are unusual.

The radio campaign on Victory Gardens helped raise the decision-to-plant from 48% (1942) to 59% in 1943 (about 2 million families).

A concentration on V-letters increased the processing 116% in 3 weeks.

Fat-and-grease collections went up, under radio advocacy, from 3,016,338 pounds in August, 1942, to 7,273,016 pounds in March, 1943.

The Coast Guard says that the applications for reserve officers' training rose 40% following the radio network time allotted the service.

Prentiss Brown called the radio broadcasting of point-rationing "an outstanding job." Norman Davis says the 1943 Red Cross Drive was "successful due to the splendid cooperation of radio and other media."

A Victory Food Special drive on cheese moved cheese "into the millions of pounds," according to the administrator. In fuel oil (Mr. Ickes testifying), in War Bonds (Mr. Morgenthau speaking), in Community War Chest Mobilization (Mr. Tom Smith on the stand), the witnesses all confirm the force voluntary radio added to the solution of an emergency. Radio in a few months trebled the number of citizens who believed that gasoline and mileage rationing *was* necessary. Radio discouraged Christmas travel so thoroughly that Mr. Eastman said radio averted a railroad breakdown.

The Army and the CAA wanted glider pilots, and a 2-weeks' radio campaign got 30,000 grade-A candidates. . . . In a 10-day radio campaign, 92% of the country was convinced that a Victory Tax was not only tolerable, but did so without drawing down the sale of War Bonds. Shoe rationing had to be kept so secret that the OWI called it "the oyster campaign" . . . but when it was announced it was announced by Sunday radio . . . the stores were closed. When they opened Monday morning, radio had averted stampedes and chiselling.

Red Cross Recruitment Booms

The Red Cross needed 3,000 nurses a month, and in 3 weeks of radio enrollments went up 100%. The Office of Defense Health and Welfare needed student nurses, and the radio industry and the advertisers of the country got 23,972 applicants, of whom 19,000 were eligible. In the spring, radio urged immediate though unseasonable coal purchase, and deliveries went up 70%. The CAA wanted non-combat pilots, and though every previous recruiting effort had failed, radio got them 104,000 new applications. Recruitment of war workers at U. S. Employment Services gained 21% in January over the previous months . . . under skillful radio exposition. And so on. . . .

The short paragraph of "results" is a flea-bite on the total. The total, no mind, no set of adding machines, can encompass. But a good deal of what radio has done . . . through voluntary effort all down the line, mind you . . . can be sensed by everyone here as he goes about his daily life. It is apparent, it is plain as day, in the attitude of every real patriot you know . . . every clamorous, impatient, let's-go, common-sensible, self-confident American citizen who has forced himself to think this thing through despite his indifference to "being told," his jealous grip on the right of free speech, his resentment of coercion of all sorts.

Someone said one night, pre-war, in the presence of a great general of the old Army, "We're a peaceful nation." "Peaceful, hell," said the General officer, "we are a damn war-like nation! Step on our toes or shut our mouth or try to order us around without showing us how and why, and look out!" Radio, I think, has helped to "show us how and why." Not all we want to know, by a long shot, but it is possible that we could talk so much that we might tell the enemy something of aid and comfort.

And radio hasn't told us unpleasant things in the manner we all like best, either. But figures like those I have recited, and they are indeed fragmentary, cannot be construed as apology by any but the mischievous. They stand on their own bottom. It would at least be equitable if the experts who want to tyrannize the radio structure, or to sand its machinery, could stand so securely on their own record of performance.

We Have Just a Glimpse

Now we've had a glimpse . . . and I repeat it is only a fractional glimpse of the impact of radio upon a people at war. We have had no glimpse at all of the steady daily service provided to take people to churches-of-the-air by the millions, to pour out to them the music of half a dozen first-rate symphony orchestras, to carry to the total electorate with rigid impartiality both sides of all controversial questions, to invite the mass of the American public to attend regular schools of the air, and to provide the mass of the public with a daily bill-of-fare of outright entertainment the like of which has never been offered to any people on earth. But all those services went forward, pursued with extra skill and extra zeal by the broadcasters who knew that it's just twice as important to support the human mind and spirit in wartime as in peacetime. We have not time to glimpse the short-wave operation which has presented the American viewpoint to the world, nor to glimpse the job that has been done to short-wave special entertainment to our men in the field all over the world.

On the train last Tuesday I met a Marine corporal, a kid, from Indianapolis, and on his sleeve was a patch marked Guadalcanal. "Get any radio?" I asked. "Sure, sure." "What's best?" "Well, I *guess* that 'Command Performance.' One of the boys got a little receiver and man, we sure didn't miss that one!" "How many listen at a time?" "Oh," he said, "many as could git within hearing. Not less than three or four hundred. And boy, I want to tell you, when they played that Star-Spangled Banner you see plenty of 'em crying right into their whiskers. It shore does something *to* you."

What Is Ahead?

I could stand here till the war ends reciting facts and figures. I won't. I'll take a long running guess ahead, and look out for falling rocks.

Radio hasn't begun to start to commence to approach its horizon. It's going to help rip the sides off the colleges and universities, so the folks outside who support them can see and hear what's going on inside them, and apply it to their own lives, and receive a *quid pro quo* for their contributions, especially to the endowed and private institutions and laboratories.

Radio can be a major force in a renaissance of reliance upon religion. Radio has already learned ways to translate academic book-larnin' into audible forms and dimensions more "graphic," therefore more memorable, than the printed page. Radio can do things the press cannot, just as the press can do things radio cannot . . . and the sooner the sophomores in both industries throw away their brass knuckles and accept the nobility of joint responsibility which is inherent in their community of interest, the better.

Radio can continue to fashion, out of a nation of human beings who find it a little hard to carry a tune even in a bathtub, a nation of real musicians . . . as radio has already begun to do. These are a very few of the things radio can do, if (and only if) the American people wish it. Radio can collect and disseminate live news from here to Singapore and back, it can acquaint people with each other as no other medium short of physical travel can do. If you want radio post-war to help heal the world radio is ready . . . and there will be new techniques as forward of today's as today's are forward of the programming you heard on your crystal set back in 1923.

Radio Creates Demand

It is pretty generally agreed that if we are to adopt a national policy of low-priced productive abundance after the war . . . and there is no other policy conceivable if this country is to go on a free democracy . . . it will base on full employment, at a wage which will buy the low-priced abundance that can be produced only by full employment. This implies a volume distribution of goods and services which makes the prewar consumption look palid by comparison. But before there can be consumption (even granted money in the pocket) there must be demand. Radio has already proven its power in creating demand. It can create new demand for Kishlar's food and Irwin's plastic and Bowes' glass and Dunn's railroads as well as for Miller and Proeser's ideas.

The price level of radio itself to the distributor must not exclude the small distributor of goods and services. Radio, from the start, has been challenged to produce programs which would certainly follow, preferably the veering tastes of the public; the challenge is greater today, and will be greater tomorrow. After all, nothing in the world causes the average radio-owning family to spend an average of four or five hours a day listening except that the average programming is *wanted.*

Radio broadcasting as a producing industry is itself deeply interested in turning out a product *demanded, because it is "better for less," by most people;* the radio industry is wholly selfish in intending not only to serve as a medium for sustained employment in the other productive plants and systems of our economy, but in its own plant as well. For two years past CBS has been studying post-war; CBS has no "package plan" to solve the world's ailments. But when the whistles blow, this network of ours, and every other network, and every station that is of no network but that is somewhere serving its community with its best possible product . . . they'll all be there doing their best to adjust to the new order as they adjusted that Sunday afternoon December 7, 1941.

Now, gentlemen, thank you for your patience. Add up your own guess. It's the correct, or 64-dollar, answer. Now let the rocks fall where they may.

The National Association of Broadcasters

No. 9 SPECIAL INFORMATION BULLETIN Sept. 24, 1943

Radio Newscasting and News of Radio

(Herewith are presented two addresses given before the first meeting of the NAB Radio News Committee at the Waldorf-Astoria Hotel, New York, Sept. 15-16. Because both talks contain information of interest to station operators, news personnel and publicity personnel, NAB is presenting the full texts below. Titles and identity of the speakers are listed with each address.)

"After 12,000 Newscasts"

By Charter Heslep, News Editor, Broadcasting Division, Office of Censorship

Mr. Chairman and Gentlemen:

This meeting is not concerned directly with war-time censorship and I wish the record to show plainly that I am not here representing the Office of Censorship or the government. Some of these remarks may be critical and it should be understood that any opinions ventured or suggestions made do not in any particular reflect the views—official or otherwise—of Censorship Director Byron Price or of the Assistant Director who heads the Broadcasting Division, J. Harold Ryan.

In fact, the Office of Censorship not only has no criticism of Radio's handling of news but is proud of the record being made by the industry as a co-partner in the unprecedented experiment of voluntary, civilian censorship. As of last Saturday, this record showed only 177 confirmed violations of the Broadcasting Code in a total of 12,044 news shows heard or read by the Broadcasting Division's radio news desk. That's a batting average of 98.3 per cent for the radio news editors of the nation acting as their own censors. It is convincing evidence that Radio, working with an equally alert Press, has succeeded so far in throwing up an effective security screen around our global war operations.

My only fear in telling this is that you may get overconfident, complacent or careless. Any violation—tho it may be the *only* one in a hundred broadcasts—can be tragic. Just last month, there was a serious breach of the Code which may have endangered the lives of a group of Army communications specialists. We must not relax our day-to-day, hour-to-hour vigilance for a single newscast, commercial or continuity. And the Code should be required reading for every new staff member as well as for the veterans. A veteran of today, according to *The New Yorker*, is an employe who has served loyally for a full six weeks!

Monitor Millions of Words

Walt Dennis asked me to talk shop with this committee from the viewpoint of an experienced newsman who has had an unusual opportunity to observe news broadcasting. The topic assigned—"After 12,000 Broadcasts"—means that through the operation of two simple controls set up to check on Code observance throughout the country, the radio news desk of Censorship has monitored, reviewed or precensored every one of those 12,044 shows I mentioned earlier.

The two controls are a monitor of network programs which enables us to catch 400 to 600 shows a month and spot checking of selected groups of stations which brings us about the same number of news scripts every 30 days.

These uncounted millions of words include, up to now, the outgivings of more than a hundred network commentators and newscasters and at least one entire week's news production from more than a third of all the stations of the country. These stations include everything from 100 watters to 50 kilowatters. Some have been checked in every state in the Union.

These remarks may seem heavily slanted on the newspaper side. This is because of 15 years as a newspaperman and less than 3 years in Radio. And because I feel that Radio, to use a mixed metaphor, is today the world's widest read newspaper. And that Radio should live up to the opportunities and responsibilities that go with this newly acquired position in the life of our nation.

The National Association of Broadcasters is making a sound move in setting up this distinguished committee to formulate standards to be set before the industry that will improve the overall presentation of news on the air. And any apparent shortcomings that may be discussed here do not represent an indictment of all broadcasters. In most cases, the practices cited are found in relatively few stations. I may even be accused of fly specking. But if any points made here help this committee in its important task, the effort will have been worthwhile.

I had instilled into me by editors I almost worshipped, some high standards of journalism. Working the various beats, departments, news desks and finally as a managing editor, I tried to live up to these ideals. We realize that no paper or service ever achieves perfection. Sometimes my paper fell down miserably. There were moments when I felt cheap, mean and discouraged. But always there were these guiding standards, these goal posts, to give me a fresh start.

The standards that seem pertinent to this committee's discussions are ACCURACY, HONESTY, INTEGRITY AND RESPONSIBILITY. Let's start with ACCURACY.

Accuracy

A well known newspaper buys a lot of spot announcements. The punch line of these messages has been: "When You Read It in The Star, It's TRUE." Some cynics scoff at this paper as dull and uninteresting. But I was part of its opposition for 12 years. I know that this insistence on accuracy built up a remarkable reader confidence—a blind loyalty that would cause me to boil when some of my friends just couldn't conceive that our paper could be equally as accurate as its older competitor. And advertisers have reacted to this prestige by making this paper the nation's lineage leader for more than a decade.

How can radio achieve such an enviable position? Especially when it must carry the burden of the careless listener. The records of Censorship do not reflect the hundreds of inquiries we have from listeners—sometimes including generals and admirals who are willing to take an oath they heard the Code being violated. Most of you in this room have had requests from us to check on such charges. And most of the time we find it was imperfect listening. How to deal with the careless listener is more a matter of style and technique of radio writing but Radio always can have one complete answer—the story as actually broadcast was ACCURATE. And—as long as the war lasts—didn't cross the Code!

No single move will do more to achieve accuracy than *copyreading*. I hope this committee will recommend that no broadcaster ever put a line of news on the air unless it has been read carefully by someone. Consider the care a well-edited paper exercises. Every story is read by the city editor, telegraph editor, or department head. Then a copyreader goes over it, word by word. The news editor gives it a look-see. The composing room proofreads it and the managing editor or some editorial executive checks the proofs before the paper locks up. That's five operations. No wonder bad bulls in the Press are collectors' items.

'Bust It, Bust It. . . .'

What happens in some radio stations? The ticker buzzes merrily in a corner. Shortly before the next newscast, an announcer bounds over, measures up on his arm the amount of copy he needs or snips off the last roundup and rushes to the mike. Before NBC sent me to Censorship, I had a spot on a small station right here in New York. One afternoon, while mulling over some stuff for the next day, I heard this: "San Francisco—The Western Defense Command today ordered the evacuation of all bust it, bust it . . . I beg your pardon." The announcer hadn't even glanced at the copy to notice that there had been a wire break.

This case, I hope, is an extreme one. But of the 340 stations spotchecked to date, more than half originate NO news. That means several million listeners get only what comes over the tickers and what is fed from the networks. It seems reasonable to conclude also that in many of these same stations there isn't a single person employed who possesses much newspaper experience. This situation places a terrific responsibility on the networks and the news services serving radio. Doubtless the manpower shortage explains some of this lack of enterprise by individual broadcasters.

Copyreading comes as natural as breathing to a newspaper. A $40 a week desk man has no inferiority complex about cutting the stuff of a $1000 a week columnist. Even a printer will come to the copy desk, holding a pencil smeared piece of copy of perhaps a famous writer and ask: "Isn't this dope all wet here or do you want it to go that way?" But in radio, there is too much reverence for big names, too much standing in awe of the name commentator or newscaster. One night a top news analyst violated the Code. When the originating station was called, the news editor on duty said: "Gee, Mr. Heslep. I thought it was wrong but who am I to question Mr. X. I'm just an announcer here in charge of news."

Station managements should give their news editors complete authority to copyread all material and have the final word—even if that word means ordering control to cut the program if a commentator tries to use material the editor has ordered out. No commentator, analyst, ace reporter or expert who is not a complete stuffed shirt or afflicted with a messiah complex is going to resent competent and intelligent copyreading.

Check Wire Stuff

Don't take your wire service as the last word in perfection. This is no reflection on the great news organizations serving Radio and Press. But any telegraph editor worth his salt is quick to detect inaccuracies that inevitably appear on any news wire. I recall that while night editor for NBC, one news service began winning the war every night in its roundup. After steering news writers along a more realistic approach for a few nights, we protested to the service. I presume some managing editors did likewise. The situation was corrected.

Dozens of stations, particularly those in semi-rural communities, are attempting considerable local coverage. The police blotter, courts, city government, community meetings and that lifeblood of the small newspaper—the personals—are being used. The station usually pastes up clippings from the local paper or just marks up a copy of the paper—a throwback to the early days of newscasting. A few really are doing a neat job of processing this news in interesting fashion. Here, too, accuracy should be paramount, especially where the relation between station and listener is apt to be very personal.

We've all acquired habits as voluntary censors that should be carried over to post war broadcasting. I refer to the Code requests to verify all messages sent in by telephone, to check the source of emergency notices, to edit letters from overseas and to check personal items to see that no clues are given to troop or ship movements. All of these checks promote accuracy—as well as security. Accuracy should be one of the cornerstones in any set of radio news standards.

Honesty

Honesty is the next standard. When debating over making the switch from city room to radio news room, an old broadcasting veteran said to me: "The biggest thing you've got to realize is that you're going into the show business." Well, after I got into radio, and especially after a year on an observation post in Washington, I wonder if radio management wouldn't do well to forget it is in the show business when it is promoting its news department. Legitimate promotion of commentators and services—yes. Frenzied overwriting and extravagant claims for this or that "news boy"—no.

Today, Radio tosses around the words "commentator", "news analyst," "editor," "newscaster" and "reporter" like so many balls kept in the air by a juggler. I know this committee will attempt to evaluate these terms and give them definite meaning to the public. Here is some comment that may be useful. An opening commercial or top sheet breathlessly tells you that this or that "international expert, famous newspaperman, ace reporter" and so forth is about to give his keen analysis of the news and comment on the great events of the day. And what comes next? A collection of from 10 to 15 stories clipped from a wire service. In some cases there isn't a single pencil mark on the copy! This phoney buildup also hits a network now and then. A commentator fairly new to the airwaves is a good newspaperman and a friend of mine. However, like most newsmen who haven't made a trip abroad, my friend has a fairly obscure background. Both of us get a chuckle and then feel a little uneasy over the false glamor that the network press agents weave around him.

Then, there is the plagiarist. A wire service man comes up with a good think piece. Or a correspondent gets a real beat. Or a rewrite man happens to do a particularly fine piece of writing. How many commentators give the service or the man credit? In one instance, a Washington correspondent did an excellent piece of deduction on a night when newsbreaks were few. I happened to listen to three commentators that use this service. The first analyst appropriated the story completely as his own. The second merely read the story. The third had the honesty to report it as an excellent story on the wire service he was using—even giving the writer credit.

Give Source Credit

This deception also extends in a lesser degree to the stations. Your newspaper labels most of its material. The press and picture associations call you quickly and loudly when you omit that log or agate credit line. But some stations blithely present the news "as gathered by the WWWW newsroom." This committee may see fit to recommend that all material be identified where such labeling contributes to more honest news presentation.

A station discovers it has an announcer who is very facile in reading news. He may never have written a story or handled a piece of copy in his life. But in no time at all he may become a commentator. Why, he'd be paralyzed if he had to write his own script. I recall an instance when an excellent news announcer—newscaster seems to be the right word—was asked to address a prominent women's club. He rushed about the newsroom seeking to get some lowly scribe to ghost the speech for him.

Take another amusing case. It was shortly after the fall of Crete and the top news had shifted suddenly to Russia. A "news analyst" was looking over the copy served up to him neatly by a newsroom writer. "Say," he exclaimed, "there isn't any news from the Mediterranean tonight, eh?" Before the writer could explain, there came this explanation from the bogus commentator: "Oh well, THAT war down there is over now, anyway."

Remember how you cursed in the old days when you put out a nickel for an extra that amounted to a fake? Well, Radio has abolished most of the newspaper extras—both legitimate and spurious—but has appropriated this vice as its very own. One salutary effect of the war is the virtual banning of the word "flash." I shudder every time I read a show whose format calls for insertion of a last minute bulletin. Some radio men seem to think they can order news to break to suit station schedules. This vicious practice often forces a news editor to prostitute his judgment and give listeners a completely phoney bulletin. A famous network show used this trick for a while. One night, it inserted a "bulletin"—a story taken from the previous day's edition of a New York newspaper—and incidentally ran smack into a Code violation! Another night, a sports result came in just as a newscast went on the air. It was included in the news show—complete result. Thirty minutes later—on the same station—a sportscaster shouted: "And here is the result of that game just torn off the news ticker . . ." I don't think the listening public is so dumb that it isn't going to catch on and lose faith in the honesty of radio news.

Radio Has Speed, Freshness

Speed and freshness is one of the greatest advantages Radio has over the slower paced press. But I wonder if some radio operators realize that even tho it has the pace of a tortoise as compared with broadcasting, a good newspaper that gets a break on edition time can get on the street in 20 to 30 minutes? Today, with newscasts on the hour, quarter-hour, half-hour and sprinkled in between, the bulletin quality of any news break fades quickly. New millions have become regular radio news listeners—but we don't have to bulletin them to death to hold their interest. A good news writer can revamp his show smoothly to put a new top on it within 30 minutes of air time. Why not restrict the use of the word "bulletin" to those newsbreaks that occur within 30 minutes of airtime? It's so easy to keep the freshness of radio news before the listener by phrases like "less than 2 hours ago, a dispatch from North Africa said. . . ." If such a standard were accepted in the radio newsrooms of the country, the word "bulletin" would again come to mean something to the public.

This committee might well recommend definite standards to eliminate these petty frauds and trickery from news programming. If the public is to develop complete trust in radio's presentation of the news, we've got to be honest with it.

Integrity

The next goal post is INTEGRITY. Here, let us look at sponsor censorship, controversial issues, propaganda and time chiselers.

Just last week a friend asked me to read the manuscript of a proposed text on radio news writing and supervision. Several pages were devoted to "sponsor's rights." The author inferred that if a news spot was sponsored by an airline, for example, and a crash occurred on that line, the news should be played down!

Here's an angle that timid broadcasters (and newspapers) might be overlooking. It so happened one year that within a few months, I ran into some hot stories involving local business concerns. The first one caused an advertiser to cancel a 25,000 line contract. The second sent a smaller contract out of the window. The third resulted in the withdrawal of a 50,000 line account. The "front office" was getting dazed. But the stories were accurate, truthful and newsworthy. The editor stood firm and the paper's policy didn't change. And do you know, that within six months, all three of those accounts were back in the paper—one with a lineage boost? It seems fair to assume that respect for the paper's integrity plus its value as an advertising medium that couldn't be passed up must have figured in the return of this business.

All of us know of a large oil company that sponsors many newscasts. This firm has been in the spotlight on many occasions—sometime a most unfavorable spotlight. To my knowledge, the agency placing this radio business never has protested the use of stories critical of its client. I hope this committee will take a firm stand against any so-called sponsor's right or sponsor censorship. And that station managements will stand resolutely behind the judgments of its news editors if demands are made to suppress a story.

Editorializing

There is the much discussed problem of editorializing on controversial issues. As I understand it, the broadcast practice aims primarily at preventing the possibility of political control by any party over any segment of broadcasting. But if you had read all the scripts that have passed over the radio news desk in Censorship, you would conclude this theory is a dead letter in many cases. Network commentators certainly reflect almost every shade of opinion on controversial subjects. And you don't often hear a disclaimer by the station or the chain. Two outstanding men appear to voice the views of extreme conservatives. A half dozen others expound the liberal viewpoint with the fervor of a crusader. The most conspicuous example has been the battle raging over our foreign policy.

There are stations who boldly label certain of their programs as "editorial." Several news programs devote a section to what is called openly "the editorial page." And this is not confined to national issues. In a western city, a local commentator poured out purple passages of vituperation against certain members of the City Council for a week. I've wondered if the station was sued for libel! But during the week reviewed, there was not a single word of rebuttal.

What appears to be a possibly dangerous practice is presentation of only one side of a question while claiming that what is said is the whole picture. The lead-ins may say there is much confusion about a certain issue. Then comes the punch line, delivered with finality: "Here to give you the FACTS on this issue is Mr. So-and-so." And then Mr. So-and-So proceeds to give all the facts—favorable to one side of the issue. The listener is NOT told that what he has heard is only one side of the question. If he has only a casual interest in the topic, he may think he has just heard the complete story. He has not, and I think this is a serious breach of any standard of integrity of radio news that this committee may set out.

Propaganda is a much abused word that means many things to many people. Some charge that all the government releases funnelled thru OWI into the stations are propaganda. Without discussing the merits of that contention, I think it fair to point out that other governments are bombarding radio news desks with free material. Some of it is definitely slanted to give the government's point of view. And it is being used. We have had numerous inquiries about this material. In a week's scripts from one station, there were eight newscasts consisting entirely of verbatim reading of handouts of governments other than our own. Three were from the Swedes, two each from the Dutch and the Belgians and one from the Australians. A very internationally minded station, you may say. But what of this broadcaster's ability to protect the integrity of his news? This is not said in criticism of the excellent information services operated by the neutral and allied governments. But it is a red flag to radio news editors to weigh carefully all propaganda. Pressure groups and minorities in this country are active. Many have powerful backing and plenty of money. The flow of handouts and transcribed features to stations is going to increase. And all this imposes a heavy burden on the station management and its news editors to keep their judgments keen and sharp.

Adopt High Personnel Standards

Many of you will recall the scandal that resulted when a congressional investigation revealed certain interests were paying off renegade newspaper men behind the counter to write articles favorable to these interests. The expose was damaging to the prestige of journalism. If we are alert, we can prevent anything like that happening in Radio. A sound policy would be to adopt as qualifications for a station news editor the same high standards required for admission to the Radio and Press galleries of Congress. Require the news editor to divorce himself of outside promotion, lobbying, publicity and other work—and pay him accordingly. There aren't many stations today—even those originating no news—that cannot with profit to their service to the public employ a full time man in charge of news and coverage of special news events. And if they get the right man, the broadcasters will be taking a major step toward safeguarding the integrity of their news.

Now, for the time chiselers. At a cocktail party recently, a "public relations counsel" boasted that he was getting his clients' products plugged on 205 stations every week for only $3.50 per station. That's the cost of producing a 15-minute show, the platter and mailing charges. The vehicle is a well written news feature with the free advertising worked in very skillfully. The press agent added that he was not dealing only in teakettles—that he had many big stations on his free list. All of us have been following the current argument about railroads buying thousands of lines of newspaper space but getting the same advertising free over the radio. Also, there are many anecdotes about commentators and newscasters "paying off" for free merchandise, free meals, free hotel bills and the like with sly plugs on the broadcaster's time. I don't know how true these stories are and haven't seen much evidence of this in my brief years in radio. But news editors should be alert to guard against such infringements that may occur in their bailiwick and against subtle or cleverly concealed plugs that smear the integrity of the station's news.

Responsibility

The last goal post is RESPONSIBILITY. Perhaps here is where a plea should be made for more aggressiveness by individual stations in news handling. Several times "no broadcast" slugs have been slapped on stories on the wire services thru misunderstanding or just plain stupidity. But I have yet to hear the first complaint from a radio news editor.

Again, it sometimes appears that almost any shave-tail or one striper can scare the wits out of a station with a single phone call. Cases are on record of an officer—way out of bounds—ordering a broadcaster to suppress a program or story. Willy, nilly, it is done. Not many months ago, an Intelligence officer called up a network and said an innocent little show was dangerous to security. Without investigating, the network immediately ordered the format changed in such a way that the main feature of the show was killed. The next day, the owner of the show tossed the problem in the lap of Censorship. It did not remotely cross the Code. There was no security factor not already provided for. The show was restored to its original form—but not thru any aggressiveness of the network in protecting its rights.

I should state here that we have a huge Army and Navy with many newly indoctrinated officers. It is to be expected some will make mistakes or that some will try to throw their weight around. We always get 100 per cent cooperation in such cases from the top ranks in washington.

I'll wager that if a general walked into any country weekly and started issuing orders, the editor would tell him to stick to running the Army or take the responsibility of declaring martial law. Once, while I was a managing editor, a three-star general practically demanded our paper not run a certain story. We weren't at war then. And the story wouldn't violate today's Code. Well, when the General refused to give the Army side of the issue and continued to insist on suppression of the story, I had to inform him acidly of a certain warm region where I was consigning him and his ancestors. It is the responsibility of news editors to defend their stations against any unreasonable demands involving news.

Balance News Schedule

Is a station licensee obligated to provide news for his listeners? Most stations now find the news department they once kicked around is now a good money maker. It's so profitable that some of them are losing all sense of proportion and scheduling newscasts and commentaries in such profusion over the broadcast day that it is a wonder that the ratings of all news shows aren't dragged down by a bored public. But what about the leaner days that may come?

Well, I don't suppose any station will lose its license because it drops all its news shows. But can you think of any type of programming that provides such a complete answer to that much discussed phrase ". . . in the public interest . . ." as a well balanced schedule of newscasts and commentaries with special news events handled with judgment and intelligence?

War has brought us the biggest audience in radio history. It was news that did it. Is it going too far to say that it has become the duty of every broadcaster to provide his listeners with the best and most complete news coverage he can afford? Also, I feel that the radio news editor of today and in the future should rank as the equal in importance with other department heads. Of course, probably all of us here may not be unbiased judges of this question. But in pointing up some possible shortcomings of our present handling of news, we have only emphasized the vast importance of this segment of the broadcasting picture, especially in its impact on the public.

As soon as the war is over, many stations probably will not be content any longer to tear copy off the ticker and plug in the network. Of course, some stations are fat, rich and lazy. They may feel: "That's all I need. That gives them the whole story. Why put out more money for news?" Well, it isn't the whole story as I shall explain later. And I think it is unworthy of 50,000 watt stations—which should be the leaders in the industry—to follow such a course. But I can name a half dozen in this class that are content with this kind of coverage. Here's another angle of radio measuring up to its responsibilities—and opportunities. Some leaders in the industry are mystified that the public and Congress appear to have so little interest in the welfare and advancement of Radio. The average citizen will run a temperature when freedom of the press becomes an issue in any part of the nation. But all of us know how little he bothers about matters affecting the freedom of Radio—which is freedom of Speech.

I understand that a survey is to be made to find out why Mr. and Mrs. Citizen seem to care so little for an institution that brings them so much. Some critics blame this condition on lack of an aggressive public relations policy of the industry. Some psychologists say it is because Mr. and Mrs. Citizen will have to pay out money for their newspaper and that radio is free. And that a person always feels a proprietary interest in something he pays for. Perhaps that factor will disappear in some future year when everyone owns a television and facsimile set and has to pay service charges to keep the receiver supplied with paper.

Need More Local News

But here I make a plea for a more adequate local coverage of news, for local commentators translating the news into terms of their own particular main street and crossroads, for objective but authoritative discussion of local problems. Perhaps I'm still a city editor who can't get out of the habit of thinking that, in normal times, local news sells the most papers. You will find that Army and Navy PRO's have drilled into them the importance of providing the home town paper with personal news about the boys and girls in the armed services. Any college press agent, and I was one, knows that altho it may be drudgery, home town items are tops in building interest in his school.

At least two small stations recently have hired reporters to gather just this kind of news and put it on the air. A few are devoting one spot a day entirely to local items. I'll wager a reasonable sum that the listeners of such stations will come to feel a more personal interest in the welfare of these broadcasters. And it is my belief that if station managements will assume the responsibility for developing adequate local coverage; if they will pay less money for promoting second rate commentators who parrot the news or rehash what the network men have said and give more thought to developing good local commentators, if all this happens, I believe you will see developing a closer relation between radio and its listeners that may serve Radio well if its welfare is imperiled—either by government or any combination of other interests.

In all of this finger pointing, I am speaking as one who is completely converted to Radio, who hopes to live the rest of his life with it. I have tried to set out four important goal posts to which can be nailed practical suggestions looking to raising the standards of news handling by Radio.

Under ACCURACY, were discussed the importance of copyreading and complete authority of the news editor.

Under HONESTY, have been listed several petty deceptions such as phoney buildups, false labels, lack of credit lines, the overworked bulletin coupled with a suggestion for a 30-minute deadline for use of that term.

Under INTEGRITY fall the important topics of sponsor censorship, fair play in handling controversial issues, an alertness to propaganda and a ban on all time chiselers.

Finally, under RESPONSIBILITY, I have pleaded for more aggressive defense by news editors of their rights and contended that it is the duty of every station to present the most complete coverage within its means. I have asked for more local coverage—both from the angle of listener appeal and as a cataclyst to bring radio and its audience into a closer bond of friendship.

I wish to thank this committee for the honor of being asked to talk with you. And may I repeat, in conclusion, that my remarks are based on the study of those 12,000 broadcasts; that they represent only my personal views and have no official connection with my duties as a radio news editor for the Broadcasting Division of the Office of Censorship.

Thank you—and "Thirty."

"News of Radio Within the Industry"

By Bruce Robertson, Associate Editor, Broadcasting Magazine

Looking at the radio trade press—but why should I pretend to be modest?—if I'm going to talk about industry news I'm going to talk about the way it's handled in the sheet I work for, so I might just as well start out by saying BROADCASTING MAGAZINE and not go to a lot of trouble to think up fancy synonyms which would mean the same thing, anyway—looking at the current issue of BROADCASTING MAGAZINE, then, a reader who was not familiar with the broadcasting business might think that a broadcaster's lot is not a happy one.

Here are a few headlines: "Cox Probe to Charge Fly with Contempt; Report to Suggest License Powers Be Stripped." "FCC Turns Down NBC Petition." "Way Calls Meeting in Chicago to Discuss Hitch Hike Problems." "Disc Net Plan Offers Hope in AFM Fight; Threat of Petrillo Would Hit 160 Stations." "New Definition of FCC Power Urged; Senator Smith Asks Radio Law to Nullify Supreme Court Blow at Free Speech". The poor broadcaster, our innocent reader would think, every hand turned against him, not a friend in the world, how does he stand it?

But then he might look at some other headlines in the same issue: "Local Food Disc Series Starts on 80 Stations." "Tobacco Sponsor Announces Plans." "Wine Discs." "Healthaids Promotes." "Vick Renews." "Information Please Returns." "Sun-Rayed Series," and so on at great length, and he'd begin to think that maybe his first impression had been wrong and that this broadcasting business is not a headache but a goldmine.

Of course there are a lot of other headlines in the issue such as "Italy Armistice Gives Radio New War Role," "Radio War Effort Is Lauded by Hoyt," etc., which I omitted bcause they didn't fit into the point I'm trying to make, which is that we don't have to worry about naivety on the part of our readers because they are definitely hep to what goes with radio.

Readers Are Broadcasters

Our readers are broadcasters—station and network owners, managers, department heads; advertising agency executives, particularly radio directors and time buyers; advertising managers and their assistants of the companies with national or regional distribution who pay most of radio's bills by advertising on the air, and then there's a fringe of Congressmen, radio attorneys, university libraries, etc., who make up the balance of our subscription list. I should of course have included the station reps and other service organizations in our list of readers, and at the moment there are quite a few copies going to men who are temporarily employed by Uncle Sam on an extermination project, but who want to keep in touch with what is going on in the industry they hope to come back to one of these days.

In other words, a trade paper is a business paper, written and edited for members of the industry, who want to get all of the news and who can add up apparently conflicting headlines and articles into a composite picture of the industry as it is at the moment. They know what it's all about, so we can go ahead with our work without stopping to explain the implications of every news development.

Probably in no other business is there as much interest in the whole field as there is in radio. Radio lives in a goldfish bowl. Everybody in the business, it seems, knows everybody else's business. Radio has more rumors and more crises than any other area of human endeavor except possibly show business, per se, which radio isn't. Broadcasting is a hybrid of journalism, show business, the pulpit, the school, the dime novel and the continued story, not to mention the corner drug and grocery stores, from which all box-tops flow.

Such a business naturally produces a considerably varied flow of news from week to week which a good card-cataloger would probably cross-index under a thousand or more headings. But for my purpose today, I'll deal with them in 3 classes. First, there's industry news, which might be described as covering the relationships of the broadcaster to the rest of the world—for instance, the broadcasters contacts with the public both directly and through the public's elected representatives in Congress and its appointed representatives on the FCC and other government commissions and agencies; the broadcasters contacts with the American Federation of Musicians, with AFRA, ACA, IBEW and other labor organizations; the broadcaster's dealings with music licensing groups, news services, transcription library services, networks and other sources of programs and, perhaps, revenue. Station reps might also be included under the general industry news heading, or they might come under the second classification—business news. As long as they are definitely included in the picture, which they certainly ought to be, I don't think it matters very much which group they get put in.

Business and Personal News

Business news covers news about advertisers using radio for the first time, advertisers renewing and expanding and changing their use of radio, even on very rare occasions, advertisers discontinuing their radio campaigns—always because they've been so successful that the advertiser can't keep up with his orders, of course.

The third classification is personal news. This includes every thing from a Behind-the-Mike note that Joe Jolley has joined the announcing staff of WJUN, Juniper Patch, Ga., to a biographical sketch in which BROADCASTING MAGAZINE pays its respects to Joseph J. Jolley, president of the Rural Regional Network. Seriously, the personal columns of the MAGAZINE over the last 12 years contain the business histories of a good many of today's big shots from the time of their first jobs in radio. The only reason they aren't all there is that a lot of them were already big shots when we started publishing in October, 1931.

Before going into more detail about the handling of these three types of news for industry consumption, I'd like to read part of a memo I got Monday from Sol Taishoff when he told me about this assignment. Here's how he outlines our MAGAZINE'S general editorial policy:

"BROADCASTING magazine always has had a purpose and a mission. It has a definite editorial policy. It is 100% broadcasting industry; it does not owe its allegiance to any other field or business.

"BROADCASTING magazine's mission is to preserve a free, competitive industry, operated by the American Plan. It has been, and I hope always will be, the champion of an industry dedicated to public service but with the profit motive. That's the democratic way.

"We are a trade journal and a business paper. We have pioneered in the field. I think our formula has been right, though there is plenty of room for improvement.

"When we started out, radio was still regarded as a passing fad, something like the miniature golf course. The movies were on our tail; so were the newspapers. Radio had to sell the hard way.

"It gave to the public something it wanted. The educators early saw the prospects of the medium as a disseminator of information. They tried to get their cut of the wavelengths. So did other special groups and interests. Those were the knock-down drag-out days of the industry, happily about over. But some of the boys still are pot-shotting.

"We think radio should stand on its own hind legs. It should not play second fiddle to any other group or industry. By the same token, there shouldn't be any discrimination among classes of people or industries on station ownership. That is what the newspaper ownership fight is all about.

"So we get down to this on our editorial policy and overall philosophy:

Radio Must Be Independent

"Radio must be maintained as an independent entity. That goes for any radio development or invention having to do with the dissemination of information to the public. Radio is not a common carrier like the railroads or busses; it can't take all comers. When television comes along, it should be part of the radio industry, not a subsidiary of the motion picture field. It will get its greatest development that way.

"These constitute the reasons BROADCASTING magazine has always hammered away at independence for the industry. I repeat, it isn't the show business, it isn't the newspaper business, and it isn't a Government vehicle. It embodies all these fields.

"I think all of you know about our policy on industry problems, both regulatory and dollar-gouging. In the former, we have had a running fight about Government inroads in the form of radio regulation. In the second category follow such groups as AFM, the music licensing societies and others out for their pounds of flesh.

"It isn't that we feel the industry can do no wrong. We want to dispel the idea that radio is a key to the mint and that it is a sucker for these outfits. Publicly we defend radio at every turn. Privately, on occasions, we may hold a different view about certain things. But there is a certain amount of linen that shouldn't be washed in public."

Other News Handling

That pretty much sums up the treatment of industry news, under the limited definition we gave it as our first general classification. Most of this kind of news originates outside of your control; War Labor Board hearings on the musician's union ban on recordings, for example, is a story which we and the other trade papers will cover by having reporters present at the hearings; we don't expect to find that kind of news in station and network releases.

But occasionally you will have a good public service story which the station publicity man will write up and send to us. At the moment this story will probably concern the cooperation of the station with the Treasury Dept. in putting over the 3rd War Loan Drive. As soon as this drive was hinted at we at BROADCASTING began checking the Treasury for any information they had about the part radio would be given in the drive, and as soon and as fast as this information was available we published it for your information and so you and all the other broadcasters could make your plans for promoting the drive in your areas.

Well, the drive is now on and we are being flooded, deluged and almost submerged with War Bond publicity stories and pictures from the national and regional networks and from some 900 individual radio stations, according to a memo I recently got from our managing editor, Frank Beatty, a very nice guy although somewhat of a professional pessimist, which seems to amount to an occupational disease for managing editors.

His memo said: "There will be hundreds and hundreds of pictures—War Bond Sales wagons, platforms and thermometers and other structures set up in the town square, guys on stilts and girls in or out of bathing suits. Out of great flocks we will try to cull with fairness and editorial judgment, a couple of good ones here and there, although there's a strong temptation to say to hell with the whole thing, as every one we print will make 890 other stations sore. So any war bond stuff we handle during this drive is merely designed to typify the sort of job the entire industry is doing and every publicity man whose stuff isn't included will figure we have no sense of news values and that we cater exclusively to our big advertisers."

About Pictures

I'll come back to that advertising angle later. It's a pat alibi for any publicity man whose stuff isn't used—and don't we all love pat alibis? But first let's get back to this industry news coverage. Every station is rightfully proud of its public service programs, rightfully pleased when some organization which it has helped gives it a public pat on the back by awarding the station a plaque or scroll. Usually the presentation ceremony is broadcast and the station publicity man naturally arranges to get a photograph of the station manager receiving the award from the head of the awarding organization. The picture is good for space in the local press, unless a radio-newspaper feud is going on, and it's also space-worthy in our magazine, *the first time.*

But so frequently the plan is worked out on a national scale. For instance, about a year ago the American Legion posts throughout the country began making awards of merit to stations which had given time to the Legion. The first picture came in; it looked pretty good; the caption said that this legion chapter had awarded this station a plaque for its outstanding service to the cause, etc.; so it got printed. The next week we got two dozen duplicates, except for names and call letters. They did not get used because the story just wasn't news any more.

Speaking of pictures and repetition, I want to beg you to use all the influence you have to see that your station, at least, doesn't send us any more pictures showing a renewal contract being signed with the advertiser, station manager, salesman on the account and the artist on the program all standing around grinning like toothpaste ads. Oh, yes, the agency man is also usually on hand to show his teeth 15% worth.

Now, everybody knows that when the salesman has got the client to agree to renew, the contract is mailed out and signed without any ado about it; but everybody also knows that one of the major purposes of BROADCASTING MAGAZINE from our inception has always been the education of advertisers and agencies about radio as a new, virile and aggressive medium. Recently we have occasionally substituted "established, virile and aggressive medium," but you get the idea. Radio is good; radio advertising is good advertising. And there's no better way to prove it than by a commercial success story.

Business Pictures

Sometimes these success stories run to a page or more. But not necessarily. A one paragraph item can be a helluva success story. Every new account helps sell radio to other accounts. At least that's what our advertiser and agency subscribers tell us, and they can't both be wrong. And every renewal account is another good sales argument.

Certainly it's legitimate and welcome news. And certainly we like business pictures. But there ought to be some way of getting over the idea that a contract has been signed without actually depicting the pen-in-hand pose. Every once in a while some ingenious guy proves that it can be done. For example, a few weeks back we got a picture about a new milk account, with the boys drinking a toast to the sponsor in his own product. And the "boys" were good—president of the company, ditto of the agency, station manager and salesman. No trace of Milky Moe, your smooth-as-cream crooner.

And just this last week another smart publicity man worked a new twist by having everybody in the picture offering his pen to the client. So it can be done. And the boys who do it get the breaks with us, which may account for a seemingly disproportionate number of pictures from a few stations. This brings me back to the squawks that we cater to our advertisers. We don't. We give in to the guy with the ideas. I was going to add that there isn't any connection between him and advertising, but it occurs to me that the station that is smart enough to work out new variations on a familiar theme will also probably be smart enough to be a consistent user of space in our magazine.

The same thing is true about stories as about pictures. The easiest thing for a station publicity man to do is to send us a carbon of what he's written for the local radio column, blithely ignoring the fact that the local columnist would be almost certain to delete the very part that we are most apt to use. Let me pass along a few remarks from managing editor Beatty, over whose desk all your copy goes, except that which is given a preliminary sifting by one of our branch offices.

Tips on Publicity

"I wish you could tell the boys how tough it is from our end to process some of the stuff they send out. For instance, we'll wade through a couple of windy paragraphs and after sifting out the cigars, diapers, future announcers and spurious emissions we discover that Bill Jones, announcer of WOOF, Wisteria, Del., is the father of a boy born Sept. 16.

"My special curse goes to the publicity man who writes a whole page of single-spaced stuff about Mary Belle Crooner who has a nifty new yellow sweater—keep your eyes on your copy, boys; Harry McGonigle is strutting high these days as he fondles a new 52-week contract with Dangerous Dan's Delicatessen. And we have to read through the tenth carbon they sent us to find out in the last sentence that Charles Coughin, formerly of WOOF, Wisteria, Del., has joined the announcing staff of KOWF, Throttlebottom, Cal.

"The boys who really click in feeding us are those who study what we print and then go about sending us news that conforms to our style. If all publicity men were on a string basis, they would use the keen judgment of the experienced freelancer as he maps a story to submit to an editor.

"You might remind the boys that we operate as a trade magazine for the commercial broadcasting industry and that we deem the industry an advertising medium as well as a purveyor of information, news and entertainment. Therefore we face a very considerable sifting and sorting job several times a day as we get tons of publicity and handouts. We want all the stuff they put out, but they must remember that we can't come up with a four-column head every time station WOOF sells another station break to Freddie the Furrier. We are doing a national job, but still want to give a cross-section of what is going on in the thousands of localities served by broadcast outlets. And if we happen to use WOOF's story when we have the same tale from a hundred other stations at the same time, we're thinking in national terms and hope the other hundred aren't peeved."

That pretty much covers the personal news category too, completing the third of the three general classifications into which I divided the whole field. I realize that I've only touched the highspots and if any of you would like to ask any questions I'll try to answer them. But before I stop to do that I'd like to quote a little platform that we used to carry on our editorial page masthead:

> "American radio as free as the press.
>
> Maintenance of a free, competitive system of broadcasting.
>
> Programs providing greatest good for the greatest number.
>
> The right to render public service without undue restraint.
>
> Maintenance of highest moral, social and economic standards.
>
> Stand aloof from political partisanship on the air.
>
> Build radio circulation to saturation in 30,000,000 American homes, with radios in every classroom, office and automobile.
>
> Keep abreast of modern technical developments.
>
> Foster sound and progressive development of commercial television and facsimile."

"That was back in Jan., 1940. It holds good today."

No. 10 SPECIAL INFORMATION BULLETIN Oct. 8, 1943

National War Fund

The Facts:

1. **The National War Fund Drive Is Now On and Will Extend Through November.**
2. **It Is the First Time a Group of Patriotic Fund-Raising Activities Have Been United Into One National Effort.**
3. **The Goal Is $125,000,000.**
4. **This Drive Is for the Benefit of United Nations Relief (including such groups as British War Relief, Belgian War Relief, United China Relief and Russian War Relief and others); Service to the Forces (including United Service Organizations, War Prisoners Aid, etc.) and Home Front (including American Women's Voluntary Services, local defense recreation committees, etc.)**
5. **Our Armed Forces and Our Fighting Allies Are the Principal Beneficiaries.**
6. **This Is a National Job, but Its Success Depends Squarely Upon the Kind of Job Done Locally.**
7. **Radio Is Being Called Upon to Do Its Best in Support of This Drive. Let's Do It!**

(For the information of station managers and war program directors, we are reprinting the following excerpts taken from the National War Fund's "Radio Kit," which has been sent all War Fund campaign committees in cities with local radio stations:)

The radio program of the National War Fund represents the cooperative thought and effort of the Radio Bureau of the Office of War Information, experienced in war time campaigns; the Radio Committee, a cross section of network and local station operators of the country; the Radio Advertising Committee, composed of specialists in the commercial radio field, and the Radio Department of the Fund.

For a period of one month nationally starting October 4th, and three weeks locally beginning October 11th, the OWI has given the National War Fund a "green light" on the radio over all governmental and semi-governmental projects.

The national network programs will be arranged from National Headquarters, in conjunction with the OWI. But the success of the radio campaign of the War Fund depends on the combined successes of all local radio efforts. The importance of local stations and local programs cannot be overemphasized and local committees are urged to take full advantage of this potent means of education, entertainment and news dissemination in their communities. Along with the press, local radio outlets exert great influence. Sometimes the local impact will be more powerful than that made by network programs since local personalities and interests are involved.

The radio manual, containing program suggestions, spot announcements and talks, is intended only as a guide. There is plenty of room for originality in projecting the story of the National War Fund, its seventeen member agencies and the various home front activities of local community campaigns, to local station audiences. But local radio stations rightfully want good programs and committees should keep this in mind in formulating their plans.

THE LOCAL RADIO COMMITTEE AND ITS FUNCTIONS

In cities where local radio stations are located, the Campaign Director should appoint a strong committee to develop a local radio program which will tie in with the national and local radio allocations assigned to the Fund.

Remember the entire radio industry is back of the Fund and patriotically interested in taking an active part in the drive to raise the money.

Be sure to include the heads of local stations on the radio committee, along with radio editors, representatives of advertising agencies, the musicians union and others whose professional activities are identified with this medium. Whenever available, a local representative of the Office of War Information should be added.

To this committee, which should work in close cooperation with the Field Representative of the Office of War Information in your area, should be assigned the entire task of developing and carrying through a comprehensive radio plan in behalf of the appeal in your community.

One of the important functions of the Radio Committee will be to work out with local sponsors the most effective means of projecting the War Fund story on local commercial programs during the allocation period.

The Radio Committee also can assist the State Director in placing electrically transcribed programs which are available for local stations during the campaign. These records feature both instructive talks and entertainment. The speakers, most of whom are limited to five minute spots, include John D. Rockefeller, Jr., Prescott S. Bush, National Campaign Chairman of the Fund, a war correspondent to be selected, and Raymond Massey, distinguished star of the stage and screen. There has also been recorded a fifteen minute program representing labor-management endorsement of the National War Fund, with Eric Johnston, President of the Chamber of Commerce of the United States, speaking for management and William Green, President of the American Federation of Labor, and Philip Murray, CIO head, voicing Labor's active support.

In the entertainment field, Gracie Fields and Dick Haymes have contributed their musical talents in behalf of the Fund. A fifteen minute dramatization, starring Helen Twelvetrees and Ralph Bellamy and highlighted with human interest material, is available for local stations.

As the campaign develops there will be additional transcribed material for local radio committees.

TYPES OF PROGRAMS

Based on experience, the following program notes may be of value. Of course, local tastes vary and should be taken into account.

TALKS. The shorter the better! There are few speakers who can hold the attention of the radio audience for a quarter of an hour. A five minute talk following a news broadcast or national hook up tieing in the community angle in the latter is very effective. Don't forget to broadcast your campaign opening and your victory dinner or meeting.

INTERVIEWS AND ROUND TABLES. All radio stations have competent interviewers and commentators, as well as women's broadcasters with home making programs whose interest may be kindled in inviting War Fund or Chest Representatives as guests. These impromptu question and answer interviews have a spontaneity that makes for good radio. The guest should be provided with background material on which to base the answers. Soldiers home on furlough or citizens who have been in the war zones offer good possibilities. Remember however that military personnel must be cleared with the Army or Navy Public Relations officer in your city before going on the air. A round table discussion on the national and local aspects of the Fund, projecting the three fronts—the military, the United Nations and the home—should result in an interesting half hour.

DEDICATED PROGRAMS. Recent experience has proved that it is often more effective to participate in sustaining programs with established audiences than to attempt to build special shows.

Local commercially sponsored programs, of course, may be contacted by the local Radio Committee.

Programs which are the local favorites produced by the local station—the classical hours, the popular music periods and the like should be utilized.

It is often possible to persuade the Program Director to dedicate some of these programs to your local United War Chest, with brief opening and closing announcements urging support of the campaign. Sometimes a speaker reading a "case history" or interesting factual material on the need, may be introduced during the program for a three minute spot, with telling effect, particularly on a lengthy musical program.

QUIZ PROGRAMS. There are many variations of this popular type of radio entertainment which have been found productive in campaigns. With a bow to Clifton Fadiman and his group of experts one may develop a local "Information Please" using a panel of prominent local men and women and having every fifth question relate to the War Fund and the local United Community Campaign. Other possibilities: three campaign workers pitted against three plain citizens who will be contributors, three men in uniform against three women in uniform or three representatives of Management matching their quiz wits against three representatives of Labor.

COMMENTATORS. Don't forget to supply your local news commentators with brief human interest material regarding your campaign and the agencies. Keep them informed with the progress of the campaign. Quite often commentators have guests who speak for a minute or two.

LABOR MANAGEMENT PROGRAMS. There are 2,300 Labor-Management committees in plants of the country. Many of them have orchestras and talent groups which entertain the workers during lunch hour or when the night shift has a rest period. This offers a source of radio entertainment but remember if the program is carried from the plant there will be a telephone line charge to the radio station which must be absorbed. Because the radio stations contribute so much in valuable time, it is not expected they will pay this charge. It may be feasible, though not as effective, to put on this kind of a program from the studio of the station.

A Great 'First' For Morgenthau

Henry Morgenthau, Jr., Secretary of the Treasury, has recorded, for broadcast purposes, a personal message of thanks to the manager of each radio station in the United States, its staff and its advertisers, for the great job done in the Third War Loan Campaign.

This is the first time each radio station has been thanked in this singularly effective manner and it reflects a unique appreciation and adept use of radio's facilities on the part of the Secretary of the Treasury.

Secretary Morgenthau's personal message to each station manager will be heard in the middle of the Treasury Star Parade record number 291, featuring Vincent Lopez, which will be shipped on or before October 23 and may be broadcast immediately upon receipt by your station.

Properly localized by the announcer on the record, who says, "Here is a message to the management and the personnel of this radio station from the Secretary of the Treasury," the Secretary's remarks are as follows:

> "This is Henry Morgenthau, Jr., speaking. I want to thank you, as manager of this station, for the help you gave us in the Third War Loan. Your staff and your advertisers and your stars worked hard, and the results of the Third War Loan—the greatest financial undertaking in the history of the world—reflect your energy, effort and enthusiasm. You have served your country well. Because of what you have done, perhaps you have helped to shorten the war, and to save the lives of American fighting men. I think there could be no greater reward than that. Again thank you—thank you all."

Permission to Dub Off and Use As Local Spot

The Treasury Department has given each station permission to re-record the Secretary's statement and use it as a local announcement, preceded by a local introduction identifying the manager and station by name, as follows:

LOCAL ANNOUNCER:	(FROM SCRIPT) We take pleasure in presenting Mr. Henry Morgenthau, Junior, Secretary of the Treasury, in a personal transcribed message to ...., manager of ....
RECORD:	This is Henry Morgenthau, Junior, speaking (etc.).

Good Taste

Good taste requires that the Secretary's statement, used as a local spot, be handled with great care and diligence to avoid needless repetition.

All Stations Should Obtain Treasury Star Parade No. 291

Some stations are not receiving regularly the Treasury Star Parade. To be certain that you receive number 291, address your request at once to the Radio Section, War Finance Division, Treasury Department, Washington 25, D. C., or to NAB.

WILLARD D. EGOLF,
Assistant to the President.

No. 12 SPECIAL INFORMATION BULLETIN Oct. 22, 1943

The Following Material Pertaining to and Including Representative Mundt's Remarks in the House on October 18 Are Reprinted in Full as Taken From the Congressional Record of That Date.

Mr. MUNDT. Mr. Speaker, in these days of global warfare news stories of great significance tumble over themselves so rapidly that frequently a matter of primary importance on the domestic front gets far from the publicity it deserves. As a result, many citzens are sometimes months behind in the business of getting caught up with far-reaching developments on the home front.

I believe, Mr. Speaker, that the recent announcement of the Columbia Broadcasting System by which it self-imposed upon itself a voluntary code of radio good behavior and impartial performance is an item of this kind. Judging from the almost universal acclaim which this public-spirited action has won from Members of Congress and from impartial editors who have commented upon it, I believe this move on the part of C. B. S. is an epochal step in the direction of protecting free speech and fair play on the American radio. C. B. S. should be congratulated and supported on its patriotic decision to protect its listeners against propaganda and politics and to give all sides of all controversial issues an equal opportunity to be heard over its great radio network. It is hoped that the other radio networks will quickly follow this wise policy as enunciated by the Columbia Broadcasting System.

In my opinion, Mr. Speaker, the decision of C. B. S. to prevent the use of a semipublic monopoly such as radio by private individuals or commercial sponsors of propaganda or political purposes will do more to preserve private ownership and operation of radio in this country than anything which has happened since the advent of broadcasting.

Perhaps a few wealthy radio tycoons who own or control big radio outlets feel secure in their power and believe it to be reference to but a straw man when it is declared, as I am about to declare, that private ownership and operation of radio in this country is not a guaranteed certainty for even the next 4 years—to say nothing of the permanent future.

Let these big men of radio scoff if they want to—I happen to know that the danger that privately operated radio in this country may have a short life is not something to be blithely overlooked. Stockholders and officials of large radio corporations might well remember that indifference to danger signs along the way was precisely the attitude which trapped the great industrialists of Germany into becoming the servants of the Nazi political state. Indifference to public opinion and to public trends in this country may well do the same for our radio industry.

Those who are in authority for the moment in private radio have a responsibility to themselves, to their stockholders, to the cause of private radio, and to America itself, to discontinue flaunting bad practices in the face of public opinion and to take steps to eliminate them before they give cause to support existing plans to make radio a public instead of a private monopoly. For that reason, the far-sighted and public-serving decision of the executives of C. B. S. is not only gratifying to all those believing in the continuance of private radio but it is one which the executives of other radio networks might well emulate. It should not be forgotten that one persistent offender in the radio field may well break down the dike which is now holding back the flood waters of Government-operated radio.

As background for what I am about to say with regard to two important questions which must soon be settled by the radio industry, the Federal Communications Commission, and the Congress, Mr. Speaker, I want to call attention, briefly, to some previous considerations which I have given this subject and which appear in earlier issues of the CONGRESSIONAL RECORD.

In the RECORD for May 30, 1940, under the title of "A Question Radio Executives Should Ponder Seriously—and Answer Carefully," I set forth some suggestions which, if followed, I hoped and believed would tend to safeguard private radio in this country and prevent it from flaunting its way into complete Government control or even ownership. Permit me here to read you a few paragraphs from those remarks:

A CHALLENGE TO THE SELF-RESTRAINT OF RADIO

Mr. Speaker, I have a passionate devotion to the American principle of free speech. But should such freedom, when exercised over air channels which are privately owned and from which others are excluded by governmental regulations, get out of bounds to the detriment of the public morale, it would become a public problem of vital concern to the entire Nation. Wise self-restraint, now, by the radio companies themselves is, in my opinion, a far better solution to the problem of hysterical excesses and unduly exciting and provocative broadcasts than any laws which Congress could devise. Surely such restraint can prevent the necessity of new legislation to meet the problem propounded by the question of what is and what is not public-serving broadcasting of war news.

We can still too well remember the results of Orson Welles' purely fictitious broadcasting of a fanciful invasion from Mars. So real did the highly emotionalized speeches of radio speakers appear that a near panic developed in many localities in America. Wisely, radio executives themselves took steps to prevent a repetition of such a sensational program to unnerve large portions of the populace. Confronted, too, with the problem of how much emotionalism and hysteria to convey over the air waves in reporting war news, it is my hope these same radio executives themselves, with no legislative stimulus or restraint, will use equal discretion in not permitting factual reporting to be colored by hysterical or emotional commentators whose inflections and intonations can well induce emotional upsets and develop panicky thinking if they carelessly or deliberately engage in all the histrionics of their art instead of functioning simply as reporters of news.

COMMENTATORS CULTIVATE THE "ILLUSION OF INTEGRITY"

On the other hand, especially among radio commentators who inject their personal opinions and emotions into the news, too frequently an attempt is made to create an "illusion of integrity" which leads the unwary listener to believe that what he hears is more factual or fulsome and reliable than what he reads. Obviously, such is not the case because newspapers and radio stations, alike, are limited by the same conditions in foreign countries and all are circumscribed by the same foreign censors and the same propagandists who are in the business of distorting the facts for military or psychological purposes.

Following that discussion, Mr. Speaker, I received a telephone call and then a letter from Harry C. Butcher, vice president of the Columbia Broadcasting System. The letter from Mr. Butcher was dated June 5, 1940, and said in part:

> To repeat what I told you on the phone, I think your statement in the CONGRESSIONAL RECORD indicates that you have given a great deal of thought to this subject, as have the executives of the broadcasting networks and stations generally. We appreciate the responsibilities placed upon us by these trying times and are attempting, I believe, with considerable success, to inform the public honestly and conscientiously. Certainly Columbia is making every effort in that direction.

This letter was followed by conferences with representatives of the broadcasting industry and by considerable additional correspondence, with Mr. Kaltenborn and other commentators and officials personally interested in private ownership and operation of radio and its utilization in the best possible public interest. As a result of this correspondence and these conversations, I again addressed the House on June 18, 1940, summarizing my observations and proposing five specific factors to which it seemed to me the radio industry should give serious consideration and develop remedial policies. Mr. Speaker, I incorporate extracts of that speech at this point as a part of these remarks.

RADIO'S RESPONSIBILITIES EXPAND WITH RADIO'S PRIVILEGES

Mr. Speaker, all Members of Congress are aware of the severe charges recently leveled at the American radio industry by certain Government officials charging it with "monopolistic practices" and other unfair policies. Personally, I am unwilling to subscribe to these charges on the basis of available evidence. I think that the record of American radio, taken as a whole, is highly commendable. Great public service is rendered the public by radio through its practice of making available to speakers of opposing sides on controversial issues like periods of free time to present their arguments. To my knowledge radio has not yet been guilty of using its monopoly of favorite air waves and its protective licenses and permits to sponsor one set of protagonists against another or to freeze out opposing viewpoints. It is my sincere hope that radio will never permit itself to become guilty of such prejudicial practices because to my mind that would be a big step backward through providing potent arguments for more Government control or supervision and for substituting bureaucratic control—never very satisfactory and seldom very equitable—for self-restraint and fair-play codes which radio can much better provide for itself by a faithful recognition of the responsibilities which always attach themselves to such special privileges as radio presently enjoys.

With the hope that radio may redouble its efforts to avoid justifiable criticism and that it may reexamine its practices to the end that the best public interests may always be served, I summarize herewith some considerations which I believe radio executives should carefully ponder and not lightly shunt aside on the basis that at this time no great complaint is evident in demands for legislative reforms or executive restraints. The time to eliminate a widespread public demand for governmental correctives is before the complaint is crystallized—once the crusade is on and a chorus of demands for Government action is apparent, it is frequently too late to stem the tide and all too often the alleged correctives go too far and impose new vices more pernicious than those they would eradicate. No business enterprise is ever so strong or so safe that it can afford to discard substantial segments of its good will by turning a deaf ear to sincere critics and trusting to time alone to quiet valid criticisms. For that reason, I list the following factors for whatever value they may have in stimulating thought leading to the preservation of free radio in America and the nipping in the bud of any proposals that Government action be utilized to eradicate such minor deficiencies as radio may now be heir to. American radio is good and it is getting better. It is entitled to a fair chance to demonstrate that its self-imposed regulations are adequate to serve the public interest and to protect the functions of democratic government in this great Republic.

A SUMMARY OF FACTORS FOR RADIO EXECUTIVES TO CONSIDER

1. Ninety percent of present-day radio programs are free from substantial criticism by the public. That in itself is a high tribute to American radio. The 10 percent of radio programs which cause concern are in the opini-ated observations of speakers who are either on the pay roll of the radio companies themselves or who speak for hire for commercial sponsors. Radio cannot afford to ignore the significance as molders of public opinion which these opinionated observers have and the delicate problem growing out of them concerning how far radio or commercial sponsors go in employing speakers for hire to shape public opinion.

2. Radio executives should study the advisability of setting up self-imposed regulations whereby sponsored programs by commercial groups, professional commentators, speakers working for pay and salaried reporters on sustaining programs, should not permit their personal prejudices, their individual opinions, their political philosophies, and their own viewpoints to color the programs in which they participate. To expand this type of opinionated program to its full extent would be to permit the opinion backed by the biggest purse to propagandize America and dominate the air waves. Carried to its ultimate degree, a billion-dollar sponsor could purchase enough time and sponsor speakers and commentators enough to superimpose its philosophy or policies upon an entire people. Thus, such free speech on the air could be used to circumvent the free thinking of a nation.

3. Radio's current policy of permitting conflicting sides of controversial questions to have equal opportunity with free radio time to present its arguments is Americanism in action. It is the essence of democracy and is highly commendable. But if speakers on commercial programs and those speaking on the sustaining programs of the big radio chains themselves attempt to influence public opinion and present lopsided arguments on public questions they can well destroy and nullify the great democratic value of the prevailing policy of giving free time to all sides of a controversial question, because the professional commentators and speakers are on the air so much more frequently than the laymen.

4. Radio should recognize a responsibility for not permitting itself to be for sale to the highest bidder on controversial questions, which is not shared by the newspaper business. The difference is clear-cut and obvious. As many newspapers can present themselves for public approval in any State or community as the public will support, they seek and secure no governmental license and obtain no governmental monopoly of favored channels of presentation. Thus editors have an independence which radio systems cannot rightfully exercise because radio by its very nature is more monopolistic than are the newspapers. Too many radio stations find too few choice air waves to share for day and night broadcasting. Therefore the Government licenses some and must refuse concessions to others. While no legitimate complaint can attach to this necessity, it does impose upon those radio units favored by Government permit to own an air wave the obligation not to exercise that concession to plump for one opinion or to play down another.

5. Excesses and abuses in the realm of these optionated programs by speakers for hire are the danger zone around free radio in America. Government regulation could correct the abuses but I hope it will never have to come to that. In my opinion, such coercion is unnecessary. Radio deserves the opportunity to eliminate these abuses for itself where they occur and to guard against their extension. To say they never occur, is to blink at the facts; to say they are the prevailing practice, is to exaggerate the exception. Between the extremes of too many too highly opinionated commercial or sustaining programs, and a ban against all interpretative speakers and personal commentators there is surely a happy compromise at which point such speakers for hire can

be selected who will exercise uniform good taste and opinions balanced by open-minded recognition that others equally wise may hold differing viewpoints. Such speakers can be secured, I believe, who will stress the factual over the prejudicial elements of news and who will avoid taking sides on issues of political importance or governmental significance at times and on points which comprise periods of our national history when the general public is seeking to formulate clear-headed and far-reaching decisions which may determine our national destiny for many years to come.

In view of the foregoing experience, Mr. Speaker, I am naturally gratified as are many other Americans, both in and out of Congress, at the progressive and forward-looking step in the interests of free speech and fair play which have been taken by the Columbia Broadcasting System in its recent declaration of policy assuring the listening public that C. B. S. would not permit its facilities to be exploited for propaganda purposes. A few radio commentators have utilized the facilities of other radio networks to condemn C. B. S. for forthrightly barring propaganda from its network. Consequently, Mr. Speaker, I want at this time to read into the record an open letter written by Paul W. Kester, vice president and general manager of C. B. S. at the present time, which presents the C. B. S. point of view in this matter. The letter follows:

FREEDOM OF THE AIR

DEAR MR. WINCHELL: During the past several days you have commented critically on Columbia Broadcasting System's news broadcasting policies. There are at least three points not thus far mentioned in your column, which we think your readers should have in order to understand the real issue involved. In view of your own interest in freedom of expression and journalistic fairness, we urge that you publish this letter explaining why we feel that freedom of expression on the air is protected, not "muzzled" by Columbia Broadcasting System's policies of noneditorial news reporting and news analysis.

1. You have not mentioned the fact that, while keeping opinion out of news broadcasting as such, we invite the freest expression of opinion elsewhere in our broadcasting schedule. In other words, our air is wide open to the most partisan speakers on every major issue in the news. Proponents and opponents of lend-lease, post-war collaboration, price control, tax policies, etc., have championed their respective sides of public arguments in a constant battle of public opinion over the Columbia Broadcasting System network. But it is presented as opinion and not as news. This is most important because it eliminates the camouflaged propaganda that opinionated reporters could otherwise insinuate into a field which we think should remain simon pure, honestly objective, and utterly noneditorial.

2. Your comments, we think, imply that Columbia Broadcasting System's policies preclude straight news reporting on "controversial subjects" in the news. The opposite is true. For instance: The draft of fathers is one of the "hottest" controversies now before the public. It has been dealt with fully, freely, and fearlessly on Columbia Broadcasting System network news for the past several weeks. None of our news reporters or news analysts has sought to lobby for or against it. Nor has any one of them avoided accurate news reporting of the controversy's daily progress.

3. You should have told your readers the simple, physical fact that lies behind our policy of nonpartisan news broadcasting. The number of radio wave lengths is, at present, definitely limited. There are only a certain number of physical facilities, that is, of radio transmitters which can be linked into radio networks. Clock hours are also limited. And thus a small group of news commentators, commanding preferred positions and established audiences on nationwide networks, could, if they opinionated their news broadcasting, exert a dangerous and dominating power over public opinion. Such power in the hands of a few, would destroy all fairness on the air—and in a domestic world, there is no freedom without fairness.

PAUL W. KESTER,
Columbia Broadcasting System.

NEW YORK.

THE C. B. S. POLICY STATEMENT

Mr. Speaker, the new policy statement of the Columbia Broadcasting System, to which Mr. Kester's letter refers, dated September 7, 1943, speaks for itself. I am incorporating it with my remarks at this point in the RECORD, since it deserves the study of every American who places the preservation of free speech high among the attributes of this Republic:

To C. B. S. news analysts:

This is a restatement of Columbia's policies in regard to news analysis, an explanation of their reasons for being, and a declaration of our intention to enforce them rigidly to the end that the American listening public will be best served.

Please do not expect anything new in this memorandum. No innovations are involved. It is sent you at this time merely because there have been occasional instances recently in which there seemed to be a lack of clear understanding of our policies both on the part of news analysts and of our editors. I trust this will clear up any confusion which may have existed, especially among newer members of our staff. If not, then I shall be all too happy to discuss these matters with you personally at greater length and supply you with fresh copies of previous material dealing with our policies.

First off, let it be emphasized that Columbia has no editorial views except in regard to radio itself. By extension, those men selected by us to interpret or analyze the news must also refrain from expression of editorial opinion or our noneditorial position becomes an empty shell.

Each of you has been chosen by us because of your background and knowledge, insight, clarity of thought and special ability to make yourselves understood by vast audiences. We feel we have faced and met a considerable responsibility in your selection. We now feel that you must meet and face much the same responsibility in writing your analyses. For we have said to ourselves, "We will not choose men who will tell the public what they themselves think and what the public should think." And we ask that you say to yourselves, "We are not privileged to crusade, to harangue the people or to attempt to sway public opinion."

In our view, then, the function of the news analyst is to marshal the facts on any specific subject and out of his common or special knowledge to present these facts so as to inform his listeners rather than persuade them. The analyst should attempt to clear up any contradictions within the known record, should fairly present both sides of controversial questions and, in short, should give the best available information upon which listeners can make up their own minds. Ideally, in the case of controversial issues, the audience should be left with no impression as to which side the analyst himself actually favors.

The news analyst, so restricted in the expression of his personal beliefs, may argue that he is being denied freedom of speech, that if he were employed by a newspaper or a magazine, he would have much greater latitude in speaking his mind. This argument brings us to the reasons for the policies I have just enunciated and the best way to deal with those reasons is to declare at once that there is a very considerable difference between the radio station or network and a newspaper or magazine.

The essential contrast is supplied by the available opportunities for publication and for broadcasting. Nothing except lack of funds or unwillingness to risk them prevents anyone anywhere from starting a newspaper, a magazine, or a publishing house. Within the laws of libel, obscenity and sedition, the publisher is then able to say editorially anything he wishes to say, or to hire men to say it for him. But in the case of broadcasting, there are only a certain number of frequencies available for broadcasting stations and by the same token, only a limited number of networks can be created and maintained on a national basis. It is this limitation which makes for the basic difference between broadcasting and the press, from which stems our noneditorial policy. Without such a policy it is easy to see that a powerful and one-sided position on serious issues could be created for a small group of broadcasters locally, regionally, or nationally.

The threat of such unbalanced power is inimical to a democratic and free radio or to democracy itself.

As for those radio-news analysts who cry out that the limitations which our policies impose on them threaten freedom of speech, I think the opposite is true. For we have set aside regular broadcasting periods in which controversial issues of the day can be and are discussed first by one side, then the other. We have declined repeatedly to sell time for the discussion of these issues, so that the greater amount of time (and with it the effective control of public opinion) would not be at the disposal of the side prepared to spend the most money.

Actually freedom of speech on the radio would be menaced if a small group of men, some thirty or forty news analysts who have Nation-wide audiences and have regular broadcasting periods in which to build loyal listeners, take advantage of their "preferred position" and become pulpiteers. To permit these men to preach their own views would be to create for C. B. S. news a super-editorial page, instead of no editorial page at all. Then freedom of the air, within the genuine spirit of democracy, would be merely a hollow phrase. There is no sense to the idea of erecting a barricade that will protect public opinion from one-sided assault and then drilling holes in that defense whereby men in our own employ are permitted just such assault.

Our policies are meaningless unless strictly enforced and every news editor is held accountable for their enforcement. We are quite aware that other networks and individual stations may not as yet have similar policies. We hope that in the interest of furthering a free and democratic radio all of them will come to agree with us. But whether or not they do, we want C. B. S. world news to continue to set the highest possible standards of news objectivity and to retain its leadership in public confidence.

PAUL W. WHITE,
Director of News Broadcasts.

SEPTEMBER 7, 1943.

Mr. LANDIS. Mr. Speaker, will the gentleman yield?

Mr. MUNDT. I yield to the gentleman from Indiana.

Mr. LANDIS. I just want to say that I believe the Members of Congress and others generally are in debt to the Columbia Broadcasting Co. for its readiness in attempting to solve the very serious situation existing in radio newscasting.

Mr. MUNDT. I thank the gentleman for his contribution, and in view of his well-known advocacy of free speech and fair play, it has extra significance. I am sorry, however, that I cannot yield further during these remarks as I have all the material here which I can cover in the time allotted me.

In this connection I would like to read from an article appearing in the October 18, 1943, issue of Broadcasting, the weekly news magazine of radio.

On page 22 of that magazine an article appears, written by Ed. Craney, general manager of Z-Bar Net, the radio network throughout the State of Montana.

Mr. Craney entitled his article "Free Speech, the Right To Be Heard," and I commend the reading of the entire article and editorial to Members of Congress and citizens who are interested in this problem of working out a radio code and a radio policy which will protect the rights and freedom of speech.

I will quote briefly from this article appearing in Broadcasting magazine of October 18: Mr. Craney says:

> We of the Z-Net—

Montana's radio network—

> recognized the above problems and strove to solve them in the year 1930 with the establishment of the Montana Radio Forum. CBS has just done so. Some say there is no problem—others say some other method must be found. All right—let's find it. I believe all of us are actually striving for the same goal—freedom of speech—the right for both majorities and minorities to be heard on American radio.

Then continuing in his article, Mr. Craney points out there is a definite distinction between the freedom of expression as it is applied to the newspaper field and how it is applied to radio, because of the differences which are obvious between radio and the newspaper.

He asks this question in his article:

> Is radio like a newspaper?

Then he answers:

> No—anyone with the funds can start a newspaper. Radio is limited and licensed by Government because of the present lack of frequencies. The good newspaper presents factual news of the day written by "on-the-scene reporters of events all over the world."
>
> It has an editor who is free to express his views on any subject in its editorial columns.

Then he points out the differences existing because of limited facilities on the air, because the radio depends on licensing by the Government to enable a certain station to dominate specified air waves at stipulated times; and he points out further on down that radio broadcasts cannot be laid aside and read later; if the broadcast is not heard it is lost forever.

Still later in the article he calls attention to the fact that there are some who think radio can cure this commentator trouble by a device which has been tried in Montana, the home State of Senator Wheeler who has, himself, devoted a lot of study to the radio situation.

I quote further from the article again:

> We of the Z-Net believe commentaries are healthy. We believe the public needs their ideas—we said "theirs," not his or hers. We have saluted C. B. S. on its stand because we know it has taken courage to recognize the problem and C. B. S. is trying to solve this problem. While we do not say our method is the ideal we nevertheless believe it is more practical than any other thus far devised for the protection of the right to be heard and the right to hear.

And I think the Members of Congress who are interested in the welfare of radio are interested in the fact that Mr. Craney recognizes that freedom of speech on the radio means that there must be a right to be heard as well as a freedom of the right to hear and it cannot be exclusively placed within the power of an individual operator on the air.

Continuing the quotation from Mr. Craney's article:

> We have merely endeavored to build the columnist page of the newspaper into an air show. We never put a single commentator on the air. We insist on two or more peoples' ideas being expressed on the same or on adjacent shows or we don't carry the broadcast.

I hope the Members of Congress will take time to read this entire article, because it offers an approach to the solution of a very disturbing problem; that is, the alarming tendency of commentators increasingly to use their time and their position to attack individuals in both private and public life and to propagandize and lobby for public causes in which the speakers or sponsors may or may not have a selfish or ulterior motive.

Now, Mr. Speaker, let us leave the problem of making free speech on the air a fact rather than a fiction for the time being and examine the recent Supreme Court decision which bears on the same subject. Later in this talk, I shall return to the original proposition in an effort to show how the circumvention of free and impartial expression on the air by making it the sole privilege of the sponsors with the biggest purse buying up select time on a semipublic monopoly or of the radio companies themselves has a direct relationship to the implications and ramification of the Supreme Court decision of May 10.

On May 10, the United States Supreme Court in a decision of 5 to 2 with the majority opinion being written by Justice Frankfurter and the minority opinion being written by Justice Murphy made it the constitutional law of the land that the Federal Communications Commission should have the right to determine the composition of the traffic on the air. To use the exact words of Mr. Justice Frankfurter with reference to the Federal Communications Act of 1934:

> It puts upon the Commission the burden of determining the composition of that traffic.

I think as we go along with this discussion, Mr. Speaker, it will become clear how this decision of the Court has a direct bearing on what should be considered broadcasting policies which are compatible with the best public interests and with considerations of free speech and fair play. It should also become clear how the Court's decision supports my contention that since radio is a semipublic monopoly exercised through preferential licenses granted to some and denied to others, it must either adopt for itself or have imposed upon it from without a public-serving policy which does not permit one group of citizens or one individual to have opinion-molding opportunities which are denied to those of opposing points of view.

RADIO IS NECESSARILY MONOPOLISTIC IN CHARACTER

In Mr. Justice Frankfurter's majority opinion we find some interesting evidence in support of these observations. In support of the statement that radio is monopolistic in character under its existing network system, Mr. Frankfurter makes this statement in a quotation from the Federal Communications Commission:

> It pointed out that the station affiliated with the national networks utilized more than 97 percent of the total nighttime broadcasting power of all the stations in the country.

Under these conditions, it is obvious that if the networks are to be used for propaganda or political purposes, or to support or oppose programs of public policy, there must either be provided equal and suitable opportunity for reply or else we must reconcile ourselves to the fact that those who buy up the radio time are to be granted the exclusive right of indoctrination over the air waves in America. I think it will be generally conceded that to make indoctrination the exclusive right of the fellow with the fattest purse or the man with the best spot on the dial is not sound Americanism. And it is not conducive to the permanent operation of private radio in this country. It is, in fact, according a privilege to a few which will sooner or later draw penalties from the many.

The extent to which this monopolistic character of private radio, when coupled with the use of indoctrination and propaganda over the air, might be used or abused to distort or warp the thinking of America is further elaborated upon by subsequent statements in the prevailing opinion of Justice Frankfurter.

For example, he points out that the Federal Communications Commission found that network affiliation contracts usually contain so-called network optional-time clauses. Under these provisions, the network could upon 28 days' notice call upon its affiliates to carry a commercial program during any of the hours specified in the agreement as network optional time. The Commission reported:

> We find that the optioning of time by licensee stations has operated against the public interest.

Certainly, Mr. Speaker, it can be seen how this could be true if networks permit sustaining or commercial commentators to engage in opinion-molding propaganda which could thus be "force fed" over station outlets which, in themselves, are out of sympathy with the propaganda line of the sponsor or the network. For example, many commentators on the air have seemingly joined in a crusade to discredit the farm bloc in Congress and to a certain extent the farmers of America by insinuating that they are demanding better prices for food products than are warranted. Quite apart from the merits of such contentions—and for one I believe they have no merit whatsoever—it is obvious that a radio station in a farm State might seriously object to being forced to broadcast a network program expressing antipathy to the farm element and broadcast by some city commentator who knows nothing about farming conditions and cares less.

It is also brought out in this decision of the court that net work affiliation contracts contain a clause defining the right of the station to reject network commercial programs. The F. C. C. is quoted as finding that "these provisions do not sufficiently protect the public interest." The F. C. C. further states:

> We conclude that a licensee is not fulfilling his obligations to operate in the public interest, and is not operating in accordance with the express requirements of the Communications Act, if he agrees to accept programs on any basis other than his own reasonable decision that the programs are satisfactory.

Still another indication of the fact that chain broadcasting and network growth has made radio increasingly more monopolistic and consequently more subject to public regulation than ordinary private enterprise is the following statement included in the Frankfurter decision with reference to radio facilities in the major cities and primary news sources of this country. I quote:

> Competition among networks for these facilities is nonexistent, as they are completely removed from the network-station market. It gives the network complete control over its policies. This bottling-up of the best facilities has undoubtedly had a discouraging effect upon the creation and growth of new networks.

SPECIAL PRIVILEGES REQUIRE PUBLIC RESPONSIBILITIES

Now, sir, let us get down to a discussion of how the monopolistic development of radio, which in itself has granted special privileges to some, demands the acceptance of special public responsibilities on the part of the radio industry if the present system of radio is to be public serving rather than public perverting.

In the gist of the prevailing decision of the Court, Justice Frankfurter said on May 10:

> It puts upon the Commission the burden of determining the composition of that traffic.

In that, Mr. Speaker, he referred to the traffic over the air waves of this country. Continuing to quote from Justice Frankfurter, he further said:

> The facilities of radio are not large enough to accommodate all who wish to use them. Methods must be devised for choosing from among the many who apply. And since Congress itself could not do this, it committed the task to the Commission.

Mr. Speaker, this responsibility for devising methods "for choosing from among the many who apply" for radio time as well as for station licenses is the crux of the whole matter insofar as demonstrating whether private radio is to serve the public interest or to serve as a propaganda vehicle for some sponsor, some commentator, some political administration, some network, or some cause.

If it is argued that the method of "choosing from among the many who apply" for time on the air, for example, shall be that of permitting the fellow with the fattest purse to buy advertising time and employ commentators or speakers to denounce or support individuals in public life, institutions of government, organizations of private citizens, or occupational groups, it simply resolves itself into a policy of favoritism to some and frustration for others. In like manner if this process of "choosing" is to be operated so that radio networks can employ commentators on their sustaining time to applaud one point of view and abhor another it means that freedom of speech has become a fiction instead of a fact. It would mean in short that radio networks were reserving to themselves a freedom to indoctrinate which is incompatible with real freedom of speech.

ACCESS TO THE MICROPHONE AN ESSENTIAL IN FREEDOM OF SPEECH

Mr. Speaker, let us keep always in mind the fact that freedom of speech must mean freedom of access to the microphone as well as freedom of acclamation insofar as radio is concerned.

In the concluding summary of the majority opinion as delivered on May 10 by Justice Frankfurter, this analysis of the true meaning of free speech is again emphasized. Says the prevailing opinion:

> We come, finally, to an appeal to the first amendment. The regulations—

Of the Commission—

> even if valid in all other respects, must fail because they abridge, say the appellants, their right of free speech. If that be so, it would follow that every person whose application for a license to operate a station is denied by the Commission is thereby denied his constitutional right of free speech. Freedom of utterance is abridged to many who wish to use the limited facilities of radio.

RADIO FACILITIES ARE LIMITED

Mr. Speaker, that statement from the majority opinion should be high-lighted. Let me repeat it:

> Freedom of utterance is abridged by many who wish to use the limited facilities of radio.

It is this elemental truth which the new policy of the Columbia Broadcasting System recognizes in its decision to keep all propaganda off its programs unless equal opportunities are given at the same hour and on the same coverage for expression of the other point of view. It is this same fundamental truism which the critics of the new C. B. S. policy ignore and which, when violated, gives cause for public demands restricting the use of radio for private propaganda purposes.

It is, of course, to be expected that a few commentators, Mr. Speaker, or radio officials who enjoy monopolistic privileges of free expression and who have at times used these individualized opportunities to lobby for or against this, that, or the other cause in accordance with their personal views or corporation outlook will disapprove of steps taken along the direction of the C. B. S. policy. Such men may wail that "freedom of speech is being curtailed" but they are not thinking primarily of freedom of speech in the aggregate but of their own personal freedom to use a semipublic monopoly as a personal opportunity to pontificate, propagandize, or pillory. They ignore the axiom that freedom of speech to be realistic when applied to radio must also include freedom of access to the microphone for opposing points of view. Otherwise, any other interpretation of freedom of speech over the air would be a restriction of freedom of thinking rather than an expansion of it. What the thought processes produce depends upon what information is provided as the basis for thinking. If radio is to do its just share toward developing sound and sane national thinking it must either refrain from projecting prejudice and propaganda or else provide for equal representation for all points of view.

RADIO DAILY QUOTES KALTENBORN AGAINST C. B. S.

In the Radio Daily for Thursday, September 16, Mr. Kaltenborn is quoted by this New York City publication which is read widely in radio circles as being severely critical of the C. B. S. policy of barring propaganda from its newscasts. Radio Daily quotes a speech which Kaltenborn made at a luncheon in the Waldorf-Astoria wherein he states in part:

> The argument that commentators should have no opinions because only a limited number can be put on the air is false. Newspaper space is also limited. Only a certain number of columnists can get their material printed. Today, we have almost as many commentators with a national following as we have columnists with a national following. The radio news analyst cannot and should not function night after night as preacher or soap-box orator. He cannot constantly make himself a medium for passionate expression of personal or minority opinions.

Mr. Speaker, these statements by Mr. Kaltenborn warrant some analysis. It appears that there are some blind spots in his thinking. For example, his assumption that an exact analogy can be drawn between newspapers and the radio is inaccurate. While it is true that only a limited number of columnists may get their columns printed, it is equally true that most newspapers present their readers with a balanced diet by carrying columnists with conflicting points of view in the same issue so that the same set of readers get both sides of the question. Such is not the case with radio. It is also true that in a paper's editorial columns it frequently takes exception with something a columnist reports in another section of the same edition. And it is vitally significant that newspapers almost invariably accord to citizens the privileges of answering charges or criticisms by printing open letters in the paper in refutation of something a columnist may have said. This is a feature almost entirely lacking in present radio policy insofar as it applies to prejudicial newscasting, to slurs and criticisms on radio time sponsored by advertisers who sometimes have their own "ax to grind" or to attacks and lobbying propaganda projected by commentators speaking on sustaining programs provided by the networks and in which the nature of the news is colored either by the bias of the corporation officials or by the prejudice of the individual commentator.

The right of rejoinder, Mr. Speaker, is fully as important as the right of criticism insofar as freedom of speech is concerned. It appears that Mr. Kaltenborn overemphasizes a single side of the problem in his criticisms. It is significant, moreover, that even Mr. Kaltenborn notes the excesses to which his profession is heir by continuing:

> The radio analyst should not function night after night as a preacher or soap-box orator. He cannot constantly make himself a medium for passionate expression or minority opinions.

That is sound advice. But like the best medicine in the pharmacopoeia, it can affect no cures if never taken.

One wonders, for example, how zealous Mr. Kaltenborn and certain radio officials would be for the "rights of free speech" about which they talk if regulations provided that any individual, group, or cause which is attacked on the radio should have the right to insist upon a like amount of time on an equally important program in which to make reply. I am afraid that those who now enjoy choice radio program periods and carefully selected wave lengths would be the first to protest if public policy insisted that those wont to abuse this privilege must provide those offended with an opportunity on the next regular program to present their side of the story. Advertisers would be less inclined to permit or instruct commentators to engage in crusades of indoctrination if they were compelled to give opposing points of view an opportunity to be heard "on this same station at this same hour next Sunday evening" or whatever the case might be. It is this inavailability of radio time of like importance to varying points of view which makes one of the big distinctions between a private enterprise like a newspaper and a semipublic monopoly like a great radio network which depends upon the perpetuation of its license to protect it in the use of a highly coveted wave length which it alone can utilize.

Radio officials and men like Mr. Kaltenborn should not expect to be able to enjoy all the privileges of a monopolistic hold on certain wavelengths which is assured them by the Government and at the same time to have all the opportunities for projecting purely personal points of view which would be theirs if they were engaging in a completely competitive enterprise. If government is not to step in to safeguard the public against the propagandist on the air, the radio industry itself must recognize its responsibilities in this matter and not fall back upon the weak abili that anything which is fair practice for newspapers is also fair practice for the radio.

To conform with the standards of good manners and fair play on the air, it is not necessary to destroy the sparkle and spirit and pungency of radio reporting. It is necessary only to remove the malicious, the prejudicial, the inimical, and the purpose-serving tactics of certain broadcasters and to safeguard the interests of veracity by insisting that radio reporters follow the precepts of good reporting, anywhere, rather than color their reports with personal prejudice and individual bias.

Members of Congress and citizens generally can quickly bring to mind the commentators that they hear and make their own classifications as to whether they measure up to the responsibilities which are theirs as performers on an exclusive state licensed by the public as a monopoly or whether they pervert their power for personal profit, political advantage, prejudicial acclaim, or just because of habitually bad radio manners. Occasional violations of good taste and good practive can be overlooked, but the repetitious offenders jeopardize the whole future of privately owned radio due to the fact that they abuse their control of a great public-opinion-forming institution which in its very nature is not available to all and which looks to government to protect it against infringements by competitors who frequently might covet a popular wavelength to propagandize a different party line or point of view. It is the hope of those of us in Congress who are working on this problem that the good judgment of enlightened leaders in the industry which has made radio strong will not too long delay taking the steps needed to make privately owned radio as secure as it is strong.

Justice Frankfurter points out, in this prevailing opinion:

> Unlike other modes of expression, radio inherently is not available to all. That is its unique characteristic, and that is why, unlike other modes of expression, it is subject to government regulation.

There is no denying the validity of this conclusion.

Radio networks which permit speakers and commentators on either sustaining programs or commercial broadcasts habitually to belabor Congress or the executive departments, or to attack individuals, groups, or points of view are flagrant violators of their public responsibilities as the licensed operators of a semipublic monopoly. Continued flaunting of this responsibility, Mr. Speaker, is certain to result in legislative curtailments of private radio or in similar action by the F. C. C. C. B. S. has taken the lead in attempting to avert this result by imposing a voluntary code of fair play and good manners upon itself. It is hoped other networks will do likewise, as I, for one, would deplore seeing private radio replaced by government radio in this country.

RADIO INDUSTRY MUST MEASURE UP TO ITS RESPONSIBILITIES

Mr. Speaker, the radio industry must measure up to its responsibilities as custodians of the public interest on the networks or by its own shortsightedness it will dig its own grave by its own indiscretions.

The serious offenders of good taste and wise policy on the air probably do not number more than five or six. But these five or six can ruin radio for the host of able and conscientious commentators who serve the public interest, and they can cause the stockholders and owners of radio facilities to find their investments becoming worthless and their period of ownership suspended by governmental interference.

ASSOCIATED PRESS DEMONSTRATES BEST REPORTING IS UNBIASED

Mr. Speaker, the phenomenal success of the Associated Press provides the complete rejoinder to those who insist that to be interesting radio reporting has to be biased, prejudicial, or opinionated. The Associated Press serves newspapers of every political preference. It gathers news for papers in every section of the country, and readers in every walk of life look to it for the complete and candid coverage of the news. Surely nobody would argue that the freedom of the press is curtailed because the Associated Press does not permit its great corps of reporters to use this agency of public service as a device for purveying personal spleen or propagandizing and lobbying for public policies. C. B. S. may not have found the final answer to the important business of keeping radio free and fair, but it has faced the problem and is approaching a solution. Perhaps radio might find something worth emulating by studying the reportorial habits of the Associated Press.

CONGRESS WAITS TOO LONG—THEN GOES TOO FAR

It is the history of government in this country that we in Congress wait too long before taking corrective action in matters like this, and when we act we go too far. All this can be avoided if radio management will cooperate now in eliminating the causes for growing discontent before they compel corrective legislation. Simply to ignore the situation is to court disaster.

Before concluding this address I wish to emphasize that it is my conviction that private radio is much to be preferred to Government radio in a Republic such as this. Even with its present deviations from proper policy at times I must prefer radio as it is to radio as it would be under Government ownership, operation, or domination. However, there is no use of our ignoring the signs of the times.

There are many who prefer a system of radio such as operates in Britain. I do not. As a believer in private radio, however, I am growing steadily more convinced that either through voluntary steps or through legislative channels arrangements must be made to discontinue propaganda activities on the air by speakers utilizing sponsored advertising time or enjoying monopolistic privileges as commentators on network sustaining programs.

It is not the exclusive province of the U-Tell-'em Soap Co., the We-fool-'em Lotion Co., or We-know-all What's It Co. to indoctrinate the American public with the peculiar personal views of the men and women they engage to capture the attention of the audience and to propagandize it between sponsor "plugs" for this or that particular commercial product. Nor is it the inherent monopoly of speakers representing the networks themselves on sustaining time continuously to criticize or commend, to applaud or abhor, to propagandize or to pillory without suitable and adequate opportunities being given for a similar expression of opposing points of view.

Radio provides this equal opportunity for all during political campaigns but it fails to do so in the day-to-day and week-to-week programs which come to us over the air.

THIS PROBLEM MUST BE SOLVED

A number of us in Congress, Mr. Speaker, have made and are making a study of the abuses of radio and proposals for correcting them. We ask the cooperation of all Members on this matter, since it is of vital concern to all. Government has a responsibility in this matter which we do not propose to ignore and which we must not dodge.

It is our hope that the radio industry will take steps to eradicate its own evils, but if Government must act it is felt that Congress can prescribe regulations which will make freedom of speech on the air an equally true privilege of all and not merely an opportunity for propagandizing to the privileged few.

The Columbia Broadcasting System has courageously and patriotically pointed the way for the preservation of private radio and free speech on the air in this Republic. In this effort it deserves the plaudits of all who believe in equal opportunity and fair play. If similar policies prevail or are adopted by the other networks one of the major causes of dissatisfaction with present-day radio will have been corrected. C. B. S. may not yet have found the perfect solution to a vexing problem, but it has made candid recognition of the problem and has taken courageous action to do something about it.

It is the hope of those of us who are devoting ourselves to this subject that these corrections will be made voluntarily by the great radio networks rather than to force congressional action by a continuation of the abuses which C. B. S. has so wisely set out to correct. America neither wants its radio information distorted by Government domination, by party politics, nor by personal pundits with axes to grind and purposes to propagandize. Good judgment and fair play would seem better devices than censorship for preventing the monopolistic facilities of radio from becoming the devices for propaganda for a select few in this great Republic.

American citizens can form their own conclusions when they are given the undiluted and uncolored facts. It is the function of a semipublic monopoly such as radio to relay the facts rather than to fashion the thinking of America.

SUPREME COURT DECISION HAS DANGEROUS IMPLICATIONS

Before concluding, let me say that while I have quoted at length from the majority opinion of the United States Supreme Court in its decision of May 10, I am not at all pleased or satisfied with some of the implications of that decision. I am not happy over the prospect of having the Federal Communications Commission or any other body "regulate the composition of the traffic" over the air waves of America without some definite standards being set up in advance which circumscribe and direct those regulating powers.

A broad application of the "regulation of the composition of the traffic" on the air waves could mean outright Government censorship. Its very existence as a right of the Commission operates as a silent threat of censorship to automatically tend to color and bias radio reporting. Now that the Supreme Court has decreed that this right exists, Congress should act promptly to define it clearly, and to limit it definitely so as to bar all possibility of censorship either direct or indirect.

If radio requires a traffic cop of the air America wants him to be bound by specific instructions as to what violations he can and cannot regulate. We must not have a radio traffic cop, whether it be an individual or a commission, with power to exercise personal discretion with regard to what is considered proper traffic on the air waves.

Congress should quickly act to set up safeguards, in the light of the May 10 decision of the Court, to be sure that private excesses of radio are not replaced by governmental censorship of nonmilitary broadcasts.

Regulations can and should be established which are clear to all, which operate equally in the interests of all, which will remove radio from all fear of governmental crack-downs, and which will conform with the principle that in this Government of laws and not of men the only rightful traffic cop of the air must be a code of prescribed behavior compiled in written form and free from any perversions by power-loving men, be they radio commentators, radio-management officials, members of the Federal Communications Commission, or members of the executive or legislative branches of our Government. Only thus can we realistically enjoy genuine freedom of expression for all alike over the radio networks of this country.

The National Association of Broadcasters

No. 13 SPECIAL INFORMATION BULLETIN Oct. 29, 1943

FCC Requests Explanation From CBS With Regard To New Affiliation Agreements With Stations

(We are printing herewith the text of the FCC letter to CBS and the telegram sent by Paul W. Kesten, CBS executive vice president, to CBS affiliates concerning the FCC letter and press release. The press release follows the FCC letter.)

October 26, 1943.

Columbia Broadcasting System, Inc.,
485 Madison Avenue,
New York, New York.

Gentlemen:

The Commission is informed that since the effective date of the Chain Broadcasting Regulations, you have entered into new affiliation agreements with Stations WPAD, WHOP, KEYS, KGBS, and perhaps others, containing such clauses as the following:

> "Columbia will continue the Station as the exclusive Columbia outlet in the present standard broadcast band in which the Station is located and will so publicize the Station, and will not furnish its exclusive network programs to any other station in the present standard broadcast band in that city, except in case of public emergency * * *."
>
> "The Station will operate as the exclusive Columbia outlet in the present standard broadcast band in such city and will so publicize itself, and will not join for broadcasting purposes any other formally organized or regularly constituted group of broadcasting stations. The Station shall be free to join occasional local, state-wide or regional hook-ups to broadcast special events of public importance."
>
> "The Station will broadcast all network sponsored programs furnished to it by Columbia during the time when the Station is licensed to operate; provided, however, that except in connection with occasional sponsored programs of special events (such as World Series broadcasts) during periods of not more than two weeks each, the Station need not in any week broadcast network sponsored programs totaling more than fifty 'converted hours' (as defined below, but for this purpose computed during the entire term of this agreement on the basis of the differences in rates at different hours specified in Columbia's Rate Card No. 23). The Station may require Columbia to give not less than twenty-eight days' prior notice of the commencement of sponsored programs for new accounts."

Attached to the contracts in question are riders or "schedules" containing certain "saving clauses". No question is raised at this time concerning these "saving clauses" with respect to contracts effective prior to the effective date of the Regulations, since the Commission desired to achieve a transition to operation under the Regulations with minimum delay and without requiring a redrafting of all existing network affiliation contracts. However, the entering into of new contracts containing the very clauses which the Commission has found not to be in the public interest raises a very serious question under the Chain Broadcasting Regulations, even though the objectionable clauses may be limited by other clauses in a schedule attached to the contract. Such contracts would appear to hinder, if not to prevent, a station from exercising the degree of freedom specified in the Chain Broadcasting Regulations.
